2. *Semler's Researches in Church History* produced less durable results. He lacked the necessary qualities for thorough work in this field—a philosophical and profoundly Christian spirit, a philosophical and religious pragmatism, and especially an unbiassed judgment. He brought to light an abundance of new material, however, and became the father of the history of doctrines; while his restless scepticism contributed towards a more satisfactory settlement of many incidents, and prepared the way for more unprejudiced views respecting many historical phenomena. His faults are, that he is incapable of rising to the conception of a historical development, and therefore prefers the arrangement by centuries; that he has no philosophical apprehension of dogma; and that he gauges past centuries by the tests of his own time—e. g. enlightenment and tolerance, liberality and morality. Being convinced that the character of private religion must necessarily differ with the multitudes of individuals, he is continually outraged to find all independence of private thought repressed by the power of the Church. Lacking a profound faith himself, he naturally stamps every appearance of mysticism as fanaticism; and as he is never able to escape the suspicion of priestly cunning and despotism, the impression derived from his survey of Church history is but dreary at the best. The martyrs were people "whose minds were unsettled, monks and hermits were madmen, the bishops chiefly intriguers, Augustine keen and crafty, Tertullian highly odd and fanatical, Theodoret superstitious, Bernard sanctimonious." Pelagius alone (whose *Epp. ad Demetriadem* he published with notes in 1775) meets with his approval. His method, too, was chaotic and confused, resulting in lengthy prefaces and numerous additions, appendices, and supplements to his works, most of which suffer, in addition, from the absence of indexes, and even of tables of contents. He tells us, however, that he was accustomed to deliver four or five lectures per day; and yet he managed to write no less than one hundred and seventy-one

books, though but one or two of them passed into a second edition.

The views of Semler on the canon of Scripture and connected subjects are developed in numerous works, prominent among which are the *Abhandlung vom freien Gebrauch des Kanons* (1771-75, 4 vols.):—with which connect his *Neue Untersuchungen über die Apokalypse* (1776):—*Vorbereitungen zur Hermeneutik* (1760):—*Briefe zur Erleichterung der Privat-Religion der Christen* (1784):—*Von freier Unters. des Kanons*:—*Erklärung über theol. Censuren*:—*Vorbereitung auf die königl. grossbrit. Aufgabe von d. Gottheit Christi* (1787).—On Church history, *Selecta Capita Historiæ Ecclesiasticæ*:—*Versuch eines Auszugs aus d. Kirchengeschichte*:—*Commentarii Historici de Antiquo Christianorum Statu*:—and *Neue Versuche die Kirchenhist. d. ersten Jahrh. mehr aufzuklären*.

Sources.—Semler's *Selbstbiographie* (1781, 2 pts.); Eichhorn, *Leben Semlers in der Bibliothek*, pt. v; Tholuck, *Verm. Schriften*, ii, 39; Schmid, *Die Theologie Semlers* (1858). See RATIONALISM.

Semnè (Σεμνή, *revered*), a Greek term for a nun.

Semnion (Σεμνιον), a Greek term for a monastery.

Semnium (Σεμνιον, a temple), a name given by Philo to places of worship of the Therapeutæ (q. v.). He says, "In every one of their dwellings there is a sacred house or chapel, which they call their *seminium*, or monastery, where they perform the religious mysteries proper to their holy lives" (Bingham, *Christ. Antig.* vol. vii, ch. ii, § 11). Monasteries came afterwards to be called *seminia*, as Suicerus shows out of Balzamon, Methodius, and Suidas. See Bingham, *Christ. Antig.* vol. vii, ch. ii, § 14.

Semnos (Σεμνός), a Greek term for a monk.

Sempecta, a term for a monk who had passed fifty years in a monastery. He was excused from regular duties, and at Westminster and Crowland lived in the infirmary and had a young attendant.

Semphycrâtes, in Græco-Egyptian mythology, was a being which represented Hercules in combination with the Egyptian Harpocrates. It has been regarded as symbolical of the germinating period, in and through which germs make their appearance, or of the union of time and life.

Sempiternitas (Lat. *semper*, "always," and *eternitas*, "eternity"), an everlasting state of existence, having a beginning, but no end. It is used in speaking of angels and the souls of men in distinction from the eternity of God. See Hagenbach, *Hist. of Doctrines*, § 166.

Semple, ROBERT BAYLOR, a Baptist minister, was born at Rose Mount, King and Queen Co., Va., Jan. 20, 1769. After completing his academical course, he commenced the study of law; but having been induced to join the Baptist Church, he turned his attention to the ministry, and on Sept. 20, 1790, he was ordained pastor of Bruington Church, King and Queen County, which position he held until his death, Dec. 25, 1831. He is identified with the earliest efforts of the Baptist Church to send the Gospel to the heathen. He was a member of the first Baptist General Convention; president for a number of years of the Virginia Baptist Missionary Society; was often moderator of the General Association of Virginia, and president of its board of managers. He was also an earnest friend of the Colonization Society; and when the Columbian College in the District of Columbia became involved, he accepted the charge of its financial concerns (in 1827), accomplishing his difficult task with great discretion and energy. He published a *Catechism* (1809):—a *History of Virginia Baptists* (1810):—and various *Memoirs and Letters*. See Sprague, *Annals of the Amer. Pulpit*, vi, 305.

Sena Panthis, a Hindû sect which was established by Senâ, the third of the disciples of Ramânand, but is now almost, if not quite, extinct. For some time, however, Senâ and his descendants were the family *gurus* of the rajah of Bandoogur, and from that circumstance enjoyed considerable authority and reputation.

Sen'aäh [some *Sena'ah*] (Heb. *Senuah'*, סֵנְאָה, *thorny*; Sept. Σενάδ, Σενανά, Σαγά, etc.), the name of a man (B.C. ante 445) whose descendants, or (more probably), if a town (but none like it is elsewhere mentioned), whose inhabitants (given in various numbers, all apparently exaggerated by erroneous transcription) returned from Babylon (Ezra ii, 35; Neh. vii, 38) and rebuilt the Fish-gate at Jerusalem (Neh. iii, 3, Heb. with the art. *has-Senaah'*; Sept. 'Ασανά; A. V. "Has-senaah").

Senagen, in Hindû mythology, is a king belonging to the race of Children of the Sun, who is connected with the fables relating to the tyrant of Ceylon (Lanka), the noted Ravana, and consequently with the story of Rama. Ravana having demanded a vessel filled with blood from certain holy devotees, it was afterwards buried by the gigantic demon in the territories of Senagen because it brought him trouble. Senagen found it, and discovered in it a beautiful child which he recognised as an embodiment of the goddess Lakshmi. She was subsequently married to Rama, an incarnation of her consort Vishnu.

Senate (γερονσία, *eldership*, used by classical writers for a deliberative or legislative body, and by the Sept. for the collective mass of the Jewish elders, and later for the Sanhedrim) is used once in the New Test. (Acts v, 21) for some portion of the Sanhedrim, apparently the elders, who constituted its main element. See ELDER; SANHEDRIM.

Senatorium, a place in some churches where are the seats appropriated to the use of emperors, kings, magistrates, and other persons of distinction. Some think that it is so called because the bishop and presbyters, who form the *senate* of the church, were seated there.

Senault, JEAN FRANÇOIS, a French preacher and religious writer, was born at Anvers, near Pontoise, in 1601. After studying at Douai, in 1618 he entered the then young congregation of the Oratory, and being designated to the office of preaching, he prepared himself by an earnest study of the Scriptures, the Church fathers, and the best French authors. For forty years he preached with success at Paris, to the court, and in the provinces. He was made superior of the Seminary of St. Magloire, and in 1662 was elected superior-general of the Oratory, an office which he administered gratuitously and with great prudence till his death, Aug. 3, 1672. He wrote several religious biographies and practical works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Sendal. See SENDEL.

Sendel, a kind of taffeta, frequently used of old in the making of ecclesiastical garments and banners. The clergy in 1343 were forbidden to wear their hair rolled with fur or sendal.

Senderling, JOHN Z., D.D., a Lutheran minister, was born Nov. 12, 1800, at Philadelphia, Pa. Having in early life a thirst for knowledge and a desire to be useful in the Master's service, he was advised to prepare for the Gospel ministry. In 1817 he entered Hartwick Classical and Theological Seminary, where he remained seven years. Immediately after graduating he was licensed to preach, and took charge of a small Church in Clay, Onondaga Co., N. Y. In 1826 he went to Centre Brunswick, near Troy, and then to the city of Troy, where he remained till 1856, when he received a call as pastor of St. Paul's Church in Johnstown, N. Y. In the

spring of 1867 he resigned his pastorate, and lived a retired life until Dec. 20, 1877, when he was called to his rest. (B. P.)

Seneca, LUCIUS ANNÆUS, was a teacher, rhetorician, philosopher, poet, essayist, epistolographer, naturalist, advocate, magistrate, and statesman, under the later Roman emperors of the adscititious Julian house. It is in the character of philosopher that his reputation has endured through all subsequent times. This reputation has been preserved, as it was generated, mainly by the piquancy of his style, the terseness of his expression, the incisiveness and the epigrammatic felicity of his phrase, and the constant ostentation of an earnestness which was, in some degree, factitious, and of a profundity which is more apparent than real. By whatever arts his renown was attained, or by whatever accidents it was perpetuated, the name of Seneca has ever continued the most notable and the best known in the scanty catalogue of Roman philosophers, and of Romans pretending to philosophy. There has been no period in which any smattering of letters survived when Seneca was not admired and cited. His own profession, "Nulla dies sine linea," has been applicable to him in many forms. The fathers of the Church, the schoolmen of the Middle Age, the poets of the Renaissance, and their corrivals the Elizabethan dramatists, had all frequent recourse to Seneca, and Shakespeare was reproached with his too ready use of the convenient repertory of gnomes and maxims. In his own day, Seneca occupied a conspicuous station. His abilities merited a very high position, and his accomplishments accorded with his abilities. He obtained the quaestorship and the prætorship in the official hierarchy when these honors were conferred by imperial favor. He was the instructor and chief minister of an emperor whose excesses and atrocities have made the name of Nero a synonym for all that is brutal and heartless in despotism, despicable in license and vanity, and unparalleled in crime. He lauded frugality and simplicity (*De Tranquill. Animi*, i, 5-8; *Ep.* II, ii, 9), and echoed the desire of Propertius:

"Utinam Romæ nemo esset dives; et ipse
Straminea posset dux habitare casa."

But while eulogizing cottage life—"domus hæc sapientis angusta, sine cultu, sine strepitu, sine adparatu" (*De Constant.* XV, v)—he passed his days in splendid villas and in palaces. He professed the wise man's indifference to the hazards of life, the caprices of fortune, and the conditions of existence, but he dwelt in all the luxury and indulgence of Roman sybaritism. He preached the blessings of obscurity in the press of courtiers, of whom he was the chief. He strenuously commended poverty, but he more sedulously increased his millions, and is charged with provoking the most serious of British revolts by the sudden recall of his usurious loans. These contrasts were human weakness—"mortalibus mos est ex magnis majora cupiendi" (*De Benef.* III, iii, 2)—but they were not the sage's triumphs over human infirmities and worldly temptations. He addressed his treatise *On Clemency* to Nero, but he disguised, if he did not sanction, the poisoning of Claudius; he justified the assassination of Agrippina by her son, and he failed to prevent the divorce and murder of the empress Octavia. He might well exclaim, "Mali inter malos vivimus" (*De Ira*, III, xxvi, 4). Could he find an excuse in another of his sayings, "Mansuete immansueta tractanda?" (*ibid.* xxvii, 3). He expatiated on the evil of avarice, and wrote at great length *On Beneficence*, but he enriched himself by imperial confiscations. He exulted in the perfect freedom of the true philosopher, and cringed to the freedmen and minions of an imbecile and semi-idiotic sovereign (*Consol. ad Polyb.*; *Dion Cass.* LXI, x). He was prominent among the Stoics of the time, whom he patronized by his countenance and by his predication; he was chief among the satellites and profligates of the court, whom he rebuked by his precepts, but did not stigmatize by his

retirement. In all things he was a rhetorician and an actor. His literary productions glitter with the coruscations of unintermitting paradox and antithesis; but the paradox of his tenets and the antithesis of his style are less novel and less startling than the contrasts between his professions and his career, his doctrine and his practice (*πάντα τὰ ἐναντιώτα οἷς ἐφιλοσόφει ποιών ἡλέγχθη* [*Dion Cass.* LXI, x]). The image and example of his life were his bequest to his friends. They should have been accompanied with the epigraph,

"Deficior prudens artis ab arte mea."

At the first contemplation of these strange anomalies we are inclined to say, "tota vita mentitur" (*Ep.* V, iv, 10)—his life was all a lie. But much that is contradictory, much that may invite the sternest reprobation, may be palliated by regarding the times, the difficulties of the situation, and the artificial and discolored lights under which all is seen. Such discrepancies, however, between the philosophy and the conduct cannot fail to stimulate curiosity and to require cautious estimation.

I. Life.—L. Annæus Seneca was the second son of M. Annæus Seneca, the rhetorician, and the author of the *Controversial Exercises* for the instruction of students of rhetoric. His elder brother, Gallio, proconsul of Achaia at the time of Paul's visit, had assumed the name of the distinguished advocate Junius Gallio, by whom he had been adopted. His younger brother, L. Annæus Mela, was the father of Lucan, the poet of the *Pharsalia*. Marcus, the founder of the distinguished family, was a citizen from Corduba, in Spain, and of the equestrian order. He was wealthy, reputable, accomplished, and noted for his wonderful memory. He took an eminent position at Rome as a teacher of rhetoric, and lived to be an octogenarian. His illustrious son was born at Corduba, but was transferred to Rome in early life, and was educated there under his father and Papirius Fabianus, Attalus, and Sotion. Fabianus he mentions frequently in his works with respect and affection. By Sotion he was initiated into the mysteries, vagaries, and asceticism of the Pythagoreans. Seneca was so earnest in his abstinences and in his renunciation of animal food that he became emaciated and endangered his health. By the urgent persuasions of his father he abandoned his fasts and vigils, and turned from the pursuit of severe philosophy to the business of life. He adopted a forensic career. The remains of Seneca attest his abilities, the breadth of his culture, the diversity of his acquirements, the vigor of his fancy, the variety of his reflections, the fluency and perspicuity of his style. He soon rose to eminence and lucrative employment. He became quaestor, at what time is unknown, but probably in the middle of the reign of Tiberius. Under Caius his life was nearly cut short. Jealousy of his talents, envy of his distinction, apprehension of his sentiments, hatred of his opinions and associations, or more adequate provocations, excited that insane and furious emperor's hostility, and he was designated for execution. By adroit intervention he was spared, on the representation that he would soon sink under disease. Two years later Caligula was assassinated, but Seneca survived. The opening of the new reign was inauspicious to him. Claudius banished him to the sterile and inhospitable island of Corsica—"Horrida desertis undique vasta locis." Messalina suspected his intimacy with the emperor's nieces, Agrippina and Julia, and alleged an intrigue with one or both. Seneca was safer and more innocent on the most inhospitable coast than in the company of any of these infamous sirens. He had already addressed his tractate *On Anger* to his brother Novatus, who had not yet become Gallio. Little of his fortitude, and nothing of the tranquillity of the philosopher, were displayed by Seneca in his exile. In the first period of his expatriation he achieved a *Consolation to Helvia*, his mother, to calm her natural grief at the violent and hazardous separation. It abounds in

showy sentiments, in exquisite expressions, in wholesome but exaggerated reflections, which fall upon the expectant ear like the sound of hollow brass. His equanimity is belied by his effort to discover, to multiply, and to adorn reasons for equanimity. The impression is irresistible that the affected contentment of the sage is only the triumph of the rhetorician, and intended to attract public admiration and sympathy. This unfavorable effect is deepened by the *Consolation to Polybius*, also composed in the Corsican seclusion, and written to the powerful freedman of Claudius to comfort him on the loss of his brother, and to invoke for himself the commiseration of the libertine and the favor of his master. The wise man, who, like Ovid, had bemoaned the miseries of banishment in elegiac verse, declared that, under Claudius, "the life of exiles was more tranquil than that of princes under Caius." He enlarged upon the resplendent qualities of the stupid, misled, blundering pedant on the throne, whose *pumpkinification* he was to celebrate after his death in bitter satire. The intense servility and adulation of the twenty-sixth chapter of this discreditable *Consolation* have often attracted remark; but it has high literary merits.

After eight years not unprofitably spent, Seneca was recalled from his exile. The new empress, Agrippina, mindful of old intimacy, or anxious for additional support, summoned him from the sterile rocks of Corsica to the luxury and license of the imperial palace. He was advanced to the prætorship, and appointed tutor to her son, the young, handsome, promising Domitius Nero. Had not Alexander been the pupil of Aristotle? What might not be anticipated from the disciple of Seneca? It was very shortly before the acceptance of this charge that he had written the *Consolatio ad Marciam* on the death of her son. It was apparently followed by the disquisition *On Tranquillity*. Unreality of emotion characterizes both works. Marcia was the daughter of Cremutius Cordus, the republican historian of the last civil wars. Her son, for whom she was tardily consoled, had been dead three years. The praise of intellectual calm came with a suspicious air from one who had been fretting and moaning in obscurity for eight years, and was ready to welcome the bustle and extravagance of the court. There seems to have been no hesitation in accepting the proposals of Agrippina to forsake tranquillity. She was scheming to advance to the throne a son of whom his father had said that nothing but a monster could spring from such parents. The throne was secured by poisoning the old and uxorious emperor. Seneca became prime-minister and chief administrator under Agrippina, with Burrus as head of military affairs. The first service of the political or politic philosopher was to compose for his pupil a fulsome laudation of the murdered prince, whose memory he lampooned himself. The Neronian lauds were so highly appreciated that the senate directed them to be inscribed on a pillar of silver, and to be read by the prætors when they entered on their office. When Nero had been a year upon the throne, his younger colleague, Britannicus, the son and true heir of Claudius, was removed out of his path—perhaps by poison, though this has been disputed in late years. At this opportune moment, Seneca addresses to his imperial pupil the notable treatise *On Clemency*. What was the demand for it, unless cruel dispositions had been manifested? How could they have been carried into effect unless by the acquiescence of Seneca, who was now in the height of his power? Tacitus alleges (*Ann.* XIII, xi) that he published Nero's frequent asseverations of his clemency "testificando quam honesta præciperet, vel jactandi ingenii."

Seneca is charged with encouraging and excusing Nero's amour with Acte to prevent worse excesses. The offence was venial in comparison with other subserviences. This liaison, however, irritated Agrippina, and inflamed the growing hostility between the mother and the son. Public affairs continued to be conducted

quietly and prosperously, and Seneca has reaped the honor. The calm was only on the surface. A few years later, the indictment of Suilius, under the antiquated Cincian law, brought discredit upon Seneca, who appears to have been active in the prosecution. Suilius, in his defence, turned savagely upon him—charged him with having been the quæstor of Germanicus, and with having corrupted his daughter none the less; demanded by what wisdom or by what precepts of philosophy he had accumulated such a vast estate in four years of imperial friendship; denounced him for catching rich and childless men, as with a net, and for exhausting Italy with his usuries (*Tacit. Ann.* XIII, xlii). The arts of the infamous Poppæa Sabina widened the breach between Agrippina and her son, and the trust and influence of Seneca sickened with the declining authority of Agrippina. He was alarmed and jeopardized by the unnatural combat. The mother sustained the rights of the injured empress Octavia; the son yielded to the wiles of the sorceress Poppæa Sabina, whose victory portended the utter overthrow of the maternal supremacy. It was a conflict to be terminated only by the death of Nero or of Agrippina. The mother, by whose crimes he had secured the throne, was the victim. It was generally credited that Seneca and Burrus assented to the matricide, though they devolved the execution on other instruments. Seneca has been accused of suggesting the crime to regain Nero's confidence. That he defended it has never been denied, and admits no exculpation. A later minister of Rome welcomed death rather than stain his conscience by apologizing for a less atrocity; but the meanness of Seneca's complicity in the crime sustained him in his position, if not in his full ascendancy, for a few years longer. He was still the first subject in the empire, the most prominent of the imperial ministers, when the "Quinquennium Neronis," the first five years of the new reign, was celebrated by the Quinquennial games. The imaginary felicity of these years was long a memory and a regret to the Roman world, and posterity has accepted the impression which was then made. To Seneca has been assigned the credit of those halcyon days. Yet Britannicus had been suspiciously removed; Agrippina had been murdered by her son, and Seneca had justified the murder; Poppæa Sabina had supplanted Octavia, and insured her subsequent divorce and assassination. The Quinquennium Neronis was a theatrical illusion—a hypocrisy of brief duration. With the death of Burrus (A.D. 62), the scene rapidly changes. The marriage of Poppæa Sabina to the emperor, the divorce and murder of the young and innocent empress Octavia at the age of nineteen, and the final overthrow of Seneca's influence were nearly simultaneous—"Mors Burri infregit Senecæ potentiam" (*Tacit. Ann.* XIV, lii, 1). About the same time, Paul was brought as a prisoner to Rome, on his appeal to Cæsar. Signs and portents, on earth and in heaven, terrified the superstitious. Earthquakes and bloody comets spread distress and consternation, and pestilence succeeded. In the second summer after the murder of Octavia, the fearful conflagration which led to the persecution of the Christians and the martyrdom of the apostles Peter and Paul devastated the city for six days and seven nights. During these years, Seneca's influence had vanished, and his peril had been ever before him. The asseverations of Nero "that he would perish rather than injure him" (*Sueton. Nero*, xxxv) were scarcely reassuring. A convenient ambiguity may be detected in the phrase. Seneca begged for his dismissal from court; he proposed to surrender his villas and his vast estates, his five hundred ivory-footed chairs of citron, his three or four millions of substance (*Tacit. Ann.* XIV, liv; *Dion Cass.* LXI, x). His entreaties and his offers were disregarded, but he sought an ostentatious seclusion. He endeavored to conceal himself under the garb of a philosopher; he returned to the asceticisms of his youth; he seemed oblivious of human affairs, and to hold communion only with philosophy

and with his God. "Deo parere, libertas est" (Senec. *De Vit. Beat.* xv, 7). To these years of solicitous obscurity belong his best and most characteristic works—the treatises *De Providentia*, *De Brevitate Vitæ*, *De Vita Beata*, *De Beneficiis*, the *Letters to Lucilius*, and the *Natural Questions*. The danger so long foreseen was not averted by philosophical pretensions or by rhetorical homilies. Seneca, whether justly or not, was believed or declared to be involved in the conspiracy of Calpurnius Piso. Was he guilty? The recorded evidence is wholly inadequate. The probabilities alone convict him, and guilt in this case would be the most innocent of his criminalities. He knew his own peril; he knew the persistent and unscrupulous bloodthirstiness of his pupil; he knew the present and impending miseries of the Roman world when Nero's passions were unleashed; he had been cognizant and acquiescent, perhaps active in some cases, in the murder of Claudius, of Agrippina, of Octavia, and probably in many more assassinations. There is no appeal for him from his suspicious life to his sentimental morality, however lofty, pure, and fascinating. He was ordered to die, and the same decree was issued against his brother Gallio (but see Tacit. *Ann.* XV, lxxiii) and his nephew, the poet Lucan. The fatal mandate was promptly obeyed, but his death was lingering and painful. Nothing in the life of Seneca became him more or was more consistent with his philosophy than his manner of leaving it. There was something of parade—something of the *vos plaudite* of a classic comedy; but the ancients were always actors, and the ostentation of philosophic calm and indifference had been the habit of Seneca's life, and could not be wholly abandoned in the last act, when the situation was so tragic and imposing, so apt for one of his own dramas. The story of Seneca's serene but lingering death is told by Tacitus (*ibid.* XV, lix-lxv) with elaborate art and with the most adroit *chiar-oscuro*. It is

Seneca. (From an antique bust.)

some of the touches of the painter's brush have no better justification than there was for the loose rumor reported by him that the conspirators had designed, if successful, to elevate Seneca to the throne of the Cæsars.

II. *Writings*.—The literary remains of Seneca are in both prose and verse. The prose productions are moral essays, fragments of such essays, one hundred and twenty-four *Letters to Lucilius* (which are themselves essays), the *Ludus de Morte Claudii* (or *Apocolocyntosis*), and seven books of *Natural Questions*, or speculations in natural history. The *Apocolocyntosis* is a medley of prose and verse, but its authorship is doubtful. Seneca's poetry consists of nine epigrams—the wail of the exile—and ten tragedies, one of which (the *Octavia*) cannot have been written by him, while it remains uncertain whether he wrote any of them. The merits and defects of Seneca's style may be gathered from the incidental remarks already made. It may suffice at this time to quote the just censure of the emperor Caius, "Arenâ sine calce," and to approve the equally brief

and accurate criticism of Quintilian, "Abundat dulcibus vitiiis." It is always affected, it is always pointed, it is always attractive, it is always radiant; but it is a string of artificial gems, not of "Orient pearls at random strung," or of genuine diamonds.

There are some old fabrications ascribed to Seneca, which should not be left altogether unnoticed. One of these is the treatise *De Formula Honestæ Vitæ*, which was constantly cited as his in the Middle Ages, but is now attributed to Martinus Dumiensis, a Christian writer contemporaneous with Justinian. The other is the imaginary correspondence between Seneca and Paul, which was known to Jerome. These letters are indubitably spurious; but an acquaintance between the pagan moralist and the Christian missionary is not without probability, though it is without evidence. The belief in such acquaintance, and the favorable acceptance of the *Letters* by Jerome and Augustine, encouraged the fancy that Seneca had been converted to Christianity. More deserving of consideration than the possibility of such intercourse is the close agreement between many passages in the writings of the Roman philosopher and in the *Epistles* of the apostle, and the singular consonance of the maxims of the Stoic rhetorician with the precepts of the evangelists and apostles. This significant concord has often been noticed, and recently, with especial care, by Dr. Lightfoot, the new bishop of Durham. The parallelisms are most frequent and most startling—of course in ethical rather than in theological matters. Almost equally suggestive is the fact that the ethical productions of Seneca are much after the fashion of sermons and hortatory discourses—preaching a purer faith, a cleaner heart, and virtuous action in the midst of a corrupt and unbelieving generation. An obvious explanation is that which induced the supposititious correspondence between Seneca and Paul. When this is rejected, it is easy to presume the diffusion of Christian doctrine by constant communications of all kinds between the several parts of the empire. It is certain that Christian influence was early discernible at Rome, and has been detected in the contemporaneous Roman law. There was a Christian community in the palace at an early period. But this does not explain all. During the whole lifetime of Seneca there was an earnest and widely extended movement in the line of moral renovation, which was illustrated by the growth of Stoicism at Rome and the expansion of its doctrines, by the tenor of the writings of Philo-Judæus, by Sibylline forgeries, and by the memorable career of Apollonius Tyaneus, which has been disguised and obscured by the fictions of his biographers. It does not conflict with a reverential interpretation of "the ways of God to man" to conjecture that the miseries of the civil wars which had spread from Calpe to the Euphrates, the consequent disintegration of society everywhere, and the general dissoluteness which those wars had engendered, produced, along with the decay of pagan belief, a recognition of the need, a solicitude for the accomplishment, and attempts at the introduction, of a religious regeneration. Such a condition of the mind and heart of the nations would be a natural preparation for the reception and diffusion of Christianity. Nor does it seem alien to the course of Providence, who never effects great changes *per saltum*, and to whom "a thousand years are but as a day."

III. *Philosophy*.—No distinct scheme of philosophy can claim Seneca as either its founder or its systematic expositor. He only enlarged the lines, adorned the precepts, and amplified the spirit of the philosophy which he professed. He declared himself a Stoic, has always been so regarded, and is recognised as such by Zeller, Ueberweg, and the other historians of ancient philosophy. It is therefore needless to dwell upon his doctrines. They are those of the Stoics (q. v.). But Seneca was much more and much less than a Stoic of the old and rigid school, and much of his favor in his own and in later times may be attributed to the excess

and the defect. He was thoroughly unsystematic and discontinuous. He indulges in no speculation to establish or to fortify the theory. He employs the current tenets for the practical conduct of life. He had a broader comprehension than Zeno or Chrysippus. He was latitudinarian in his sentiments. He applauds the character, commends the ethical doctrines, and cites the maxims of Epicurus. He inclines to the large intelligence of the Peripatetics, and emulates the spiritual aspirations of the Academics. Philosophy, in his conception, was no abstract and recondite study, of service only in the closet: it was the rule of life in the midst of distractions and temptations, of uncertainties and dangers—a refuge for the troubled mind, a shelter from suspicion and envy, a defence against tyranny, and the balm of a serene conscience (*De Beat. Vit.* xv).

Philosophy has been, since the Christian revelation, so distinct from religion, or so completely identified with it, that it is not easy to appreciate its character, its charms, and its value in those ages when it was the sole substitute for revealed truth—when from its dark, intricate, and insoluble problems could alone be expected vague hopes and vaguer aspirations, where Christianity affords absolute assurance to all. By the cultivated and inquiring pagan, philosophy was pursued as the guide of life, the moderator of prosperity, the solace in adversity, the oracular response to the eager questions which the earnest heart and intelligent mind are ever asking about here and hereafter—about the world, its origin, and its governance; about man, his duties and his destinies; about all that lies beyond the dark veil of death and the darker veil of birth. This is fully manifested in Seneca's invitation to Paulinus to seek "the shady spaces of divine philosophy" (*De Brev. Vitæ*, xix, 1, 2).

Philosophy offered many inducements to its pursuit or its pretence under the early empire. It was a discipline of mind and heart to those of gentle disposition and refined tastes whose easy circumstances in life relieved them from the necessity of public or professional vocations. Hence philosophy grew into a fashion, and the fashion, like all fashions, moral or religious, was often perverted into a cloak or a pretence.

Under the pressure of despotic rule, slight differences become symbols of political faith. At Rome, Stoicism associated itself with regrets for the republic, with a mild, inert aversion to the empire, or with a more decided antipathy to the emperor. Lord of himself, the Stoic asserted his independence of all control of man by governments or by fortune. The haughty pretension afforded little offence to the constituted powers. The sole sovereignty of the Stoic had its single throne within his own bosom. There he, too, was emperor; he cared for naught beyond. He had thus the credit of independence, without assuming the complexion of a conspirator or a revolutionary. Every age illustrates the facility with which prevalent principles shrivel up into empty forms. Loud professions may disguise hollow sentiments. Sentiments accordant with the professions may be sincerely entertained, and yet produce neither earnestness of feeling nor constancy of action. Men will more readily die for their avowed faith than live for it. Genuine martyrs may be found who would scarcely practice what they die for. Their faith is in their profession—"Cum verba eruperunt, affectus ad consuetudinem relabuntur" (*Senec. De Brev. Vit.* vi, 3). Of such was Seneca. Augustine's comment on his boast of independence may be applied to most of his virtues: "Adfuit scribenti, viventi defuit" (*De Civ. Dei*, vi, x). To this danger he was peculiarly exposed. He was courtly in manners and courtly in associations, amiable and impressible in disposition, serene and averse to violent emotions; of affectionate and placid temperament, rather than of deep and solid nature; vain rather than ambitious, and ever mindful of his own interest. His birth, his home influences, his education, his vocation, his career, his experience in either fortune, led him to

deem that best which was most plausible or most secure. He was the son of a great rhetorician, brought up in the schools of the rhetoricians, destined for a rhetorician, winning early profit, distinction, and promotion by rhetorical displays. Rhetoric was the passion of the time; he was not constituted to despise it. He declared, "Oratio sollicita philosophum non decet" (*Ep.* XVI, v, 4); yet his expression was always curious and surprising. He has given us the maxim, "Qualis vir, talis oratio." It may be justly inverted, *Qualis oratio, talis vir*.

All that remains of Seneca shows that he was nothing if not rhetorical. The tartness of expression, the compression of phrase, the fertility of fancy, the paradox of thought, were ever uppermost in his mind. These things did not make him false, but unreal. They did not make him insincere, but superficial. His predilections were good, but evanescent in action. He had the fragility of the man who looks to form and fashion, not to substance. This may explain the contradiction between the ethical theory and the personal morality of Seneca. An instructive parallel, on a lower plane and with narrower exorbitancies, is furnished by the contrast between the character and the *Night Thoughts* of Edward Young.

It is a perilous and doubtful task to unveil the depths of the human heart; to reconcile the complex and often unconscious duplicities of human nature; to decide where delusion ends and deception begins; to estimate the force of temptations and the degrees of resistance to them; to discern the subtle harmony which binds all the parts of life together, and may unite general purity and noble appetencies to grievous frailties and ignoble crimes. None but the All-seeing One, "to whom all hearts are open, and from whom no secrets are hid," can pierce the obscure mazes of human motives. The harsh, censorious, confident, sweeping, unrestricted judgment will blunder, whether it praise or blame—"Ut absolvaris, ignosce" (*Senec. De Benef.* VII, xxviii, 3). Was it a cry from his own lacerated conscience when Seneca exclaimed so truly and so sadly,

"Magnus humanum pectus recessus habet!"
(*Fragm.* iii, *De Amicit.*)

IV. *Literature.*—The historians of ancient philosophy and the *Works* of Seneca, of course. See also Lodge, *The Life of L. Annaeus Seneca, described by Justus Lipsius, in The Works of L. Annaeus Seneca, both Morall and Naturall* (Lond. 1614); La Grange, *Vie de Sénèque* (Paris, 1819); Aubertin, *De Sap. Doctoribus qui a Cic. Morie ad Neron. Princip. Romæ Viguerunt* (ibid. 1857); Bernhardt, *Die Anschauung des Seneca vom Universum* (Wittenb. 1861); Seidler, *Die religiös-sittliche Weltanschauung des Philosophen L. Annaeus Seneca* (Fraustadt, 1863); Dourif, *Du Stoïcisme et du Christianisme*, etc. (Paris, 1863); Montée, *Le Stoïcisme à Rome* (ibid. 1865); Martha, *Les Moralistes sous l'Empire Romain* (ibid. 1866); Stahr, *Agrippina, die Mutter Nero's* (Berl. 1867); Lightfoot, *Essay on St. Paul and Seneca*, ap. *Comm. on the Epistle to the Philippians*; *Westminster Rev.* July, 1867, No. clxxiii, art. ii; Merivale, *Romans under the Empire* (Lond. 1850-62). (G. F. H.)

Senectus, in Roman mythology, a personification of old age. He dwells at the entrance to Hades.

Seneh. See BUSH.

Se'neh (Heb. *Seneh*, סֵנֶה, thorn; Sept. Σενά [Vat. 'Evvaáp, Alex. omits]; Vulg. *Sene*), the name of one of the two isolated rocks which stood in the "passage of Michmash" at the time of the adventure of Jonathan and his armor-bearer (1 Sam. xiv, 4). It was the southern one of the two (ver. 5), and the nearest to Geba (A. V. "Gibeah"). The name in Hebrew means a "thorn," or thorn-bush, and is applied elsewhere only to the memorable thorn of Horeb; but whether it refers in this instance to the shape of the rock or to the growth of *seneh* upon it, we cannot ascertain. The latter is more consistent with analogy. It is remarkable

that Josephus (*War*, v, 2, 1), in describing the route of Titus from the north to Jerusalem, mentions that the last encampment of his army was at a spot "which in the Jews' tongue is called the valley" (or perhaps the plain) "of thorns (*ἀκανθών ἀλών*), near a certain village called Gabathsaulé," i. e. Gibeah of Saul. The ravine of Michmash is about four miles from the hill which is, with tolerable certainty, identified with Gibeah. This distance is perhaps too great to suit Josephus's expression; still the point is worth notice.—Smith. Between Jeba, or Geba, and-Mukhmās, or Michmash, there are two narrow and deep valleys, or gorges, running nearly parallel towards the east, with a high, rocky, and precipitous ridge between them. These two valleys unite a little lower down, i. e. a little to the east of the direct line from Jeba to Mukhmās. The ordinary route descends obliquely to the right from Jeba, and passes through the united valley at the junction, rounding the point of the promontory, and then ascends obliquely to the left towards Mukhmās. This is the passage of Michmash alluded to in 1 Sam. xiii, 23; Isa. x, 28, 29. The ridge between the two valleys has two steep or precipitous sides, one facing the south towards Geba, and the other facing the north towards Michmash. These were the two "sharp rocks" or precipices called "Seneh" and "Bozez." The two valleys are still called *Suweineh* and *Buweizeh*. Jeba stands on the south side of Suweineh, on the very edge of the valley, and Mukhmās on the north edge of Buweizeh. Lieut. Conder regards the valley of Suweineh itself as a trace of the name Seneh, and thinks its opposite walls were scaled by Jonathan (*Quar. Statement* of the "Pal. Explor. Fund," April, 1874, p. 62); and he graphically describes the descent of his own surveying party down the rocks (*Tent Work in Palestine*, ii, 113). See **BOZEZ**.

Senes (*old men*), a name given to the primates of the Christian Church in Africa. Here the primacy was not confined, as in other places, to the civil metropolis, but always went along with the oldest bishop of the province, who succeeded to this dignity by virtue of his seniority, whatever place he lived in.

Seneschal, a monkish name for a *steward*. His duties were to seat the guests in the guest-hall, send presents to strangers of degree, and in some cases to have charge of the bishop's palace. The same name was given to stewards of the year or months, minor canons or vicars, who catered for the common table.

Sengler, JACOB, a Roman Catholic divine of Germany, was born at Husenstamm, near Frankfort-on-the-Main, Sept. 11, 1799. When twenty years of age, after having learned the trade of a shoemaker, he entered the gymnasium at Frankfort. In 1824 he studied theology at Tübingen, under Möhler, and in 1828 he attended the philosophical lectures of Schelling at Munich. In 1830 he commenced publishing the *Catholic Church Gazette* for Germany, and numbered among his contributors, besides Döllinger and Fischer, such Protestant divines as Hoffmann, Weiss, and others. In 1831 he went to Marburg as professor of philosophy, where he remained for eleven years, living on the best terms with his Protestant colleagues, Hupfeld, Kling, Henke, J. Müller, etc. In 1842 he was called to Freiburg, where he lectured for thirty-six years, and where he also died, Nov. 8, 1878, five days after having retired from his office. As a philosopher, he tried to harmonize speculation with Christianity; as a Roman Catholic, he never believed in the Roman spirit of exclusiveness. He wrote, *Würdigung der Schrift von D. Schulz: Ueber die Lehre vom heil. Abendmahl* (Mainz, 1830);—*Die Idee Gottes* (Heidelberg, 1845–52, 2 pts.);—*Die Erkenntnisslehre* (ibid. 1858). See Zuchold, *Bibl. Theol.* ii, 1223; Winer, *Handbuch der theol. Literatur*, i, 454, 582; ii, 73, 74, 776; *Neue evangel. Kirchenzeitung*, Feb. 22, 1879. (B. P.)

Sengumara BRĀMA, in Hindû mythology, is one
IX.—L L

of the most ancient sages and princes of the human race. He was contemporary with king Druven, a grandson of the father of all who have been born, and gave to him his only daughter Bravibamey in marriage.

Seng-Wan-Mau, in Chinese mythology, is the supreme deity of the Chinese, which is composed of nothing, is created from nothing, and does or thinks nothing, though, as conceived of, is not without exalted divine attributes, e. g. incomprehensibility, omniscience, justice, etc. He is seated in the highest heaven, and thence looks down in immovable quietude on the doings of mankind. He is never pictured, because no conception of his form is possible; but there are a number of inferior gods, who preside over every rank of men, over every human occupation, city, etc., who are portrayed in every imaginable form, in clay, stone, wood, etc. These gods are subordinate to Seng-Wan-Mau, and are the rulers of human affairs, so that man's destinies, his weal and woe, are committed to their hands. Their images are worshipped, but they are also broken into fragments when the gods fail to gratify the wishes of the worshippers.

Senior (1), a monk from the age of forty to fifty years who was excused from the external offices of provisor, procurator, cellarer, almoner, kitchener, master of the works, etc., but took his turn in singing masses. (2) The head of a college of secular canons, as at Christ-church, Hants, 1099. (3) At Osnaburg, Trent, Lübeck, and in some Italian cathedrals, the *antianus*, or *senior*, corresponds to the archpriest of certain French cathedrals, in which he acted in the bishop's absence as his representative in the administration of sacraments and the benediction of ashes, palms, and the font. Such an archpriest was required in every cathedral by the Council of Merida.

Senior Bishop. In the Protestant Episcopal Church, the bishop who is oldest in the order of consecration is thus known. The senior bishop is president of the House of Bishops, and has certain duties committed to him by the general constitution and canons of the Church. Except in case of infirmity, he consecrates the newly elected bishop; he also receives the testimonials of a bishop elect, in case of such election taking place during the recess of the General Convention, and transmits them to all the other bishops for their consent or dissent. Special general conventions are called by his summons on consent of all the bishops; the place of meeting of any general convention may be changed by him. This plan of deciding as to presidency was adopted in 1789; but in 1792 a different principle was adopted, viz. that of rotation. This continued only for a short time, and the order of seniority was again established.

Seniority. See SENIOR BISHOP.

Se'nir (1 Chron. v, 23; Ezek. xxvii, 5). See SHENIR.

Senlis, COUNCILS OF (*Concilium Silvanectense*). There were several councils held in Senlis, which is a town in the department of Oise, France.

I. Held in 873 by the bishops of the provinces of Sens and Rheims, in which Carloman, the son of king Charles the Bald, was brought to judgment, deposed from every ecclesiastical dignity, and reduced to lay communion, on account of his treasonable and other evil practices. See Mansi, ix, 257.

II. Held Nov. 14, 1235, by the archbishop of Rheims and six of his suffragans, who put the whole of the king's domains within the province of Rheims under an interdict. See COMPÈRE, SYNODS OF.

III. This council was held in 1310 by Philip de Marigni, archbishop of Sens. Nine Templars were condemned and burned, denying in the hour of death their

confession of guilt, extorted from them by torture. See Dubois, *Hist. of Paris*, p. 551.

IV. The fourth council at Senlis was held in 1315 or 1316 by Robert de Courtenay, archbishop of Rheims, and his suffragans, in which Pierre de Latilly, bishop of Chalons-sur-Marne (accused by Louis Hutin of the death of Philip le Bel, and of another murder, and imprisoned), demanded his liberty and the restitution of his property. Subsequently he was entirely justified of the charge, and was left in quiet possession of his bishopric. See Mansi, xi, 1623.

V. Held in 1326 by William de Brie, archbishop of Rheims, with seven of his suffragans (present either in person or by deputy). Seven canons were made.

1. Lays down the proper forms to be observed in holding councils.

4. Declares excommunicated persons to be incapable of suing at law, of defending themselves, and of giving evidence.

5. Excommunicates those who violate the asylum afforded by churches, either by dragging away forcibly those who have taken refuge there, or by refusing them nourishment.

6. Against clandestine marriages.

7. Against those who impeded ecclesiastical jurisdiction.

See Mansi, xi, 1768.

Sennabris (Σενναβρίς), an encampment of the Romans under Titus, thirty furlongs from Tiberias, which was in sight (Josephus, *War*, iii, 9, 7); perhaps the *Senabrai* (סנבראי) or *Tsinabri* (צנבריי) of the Talmud (Reland, *Palest.* p. 999). Schwarz says (*Palest.* p. 178) that ruins in that vicinity are still called *Sinabri* by the Arabs. Thomson identifies the place with the modern *Shughab*, containing traces of old buildings (*Land and Book*, ii, 65).

Sennach'erib [some *Sennache'rib*] (Heb. *Sanche-rib'*, סנחריב; read in the cuneiform as *Sinachirib*, i. e. *Sin* [the Moon] *increases brothers*, thought to indicate that he was not the first-born; Sept. Σενναχηριμ v. r. Σενναχηριμ; Josephus, Σενναχηριμ; Herodotus Σενναχηριμ; Vulg. *Sennacherib*), a famous Assyrian monarch, contemporary with Hezekiah. The name of Sennacherib (in Assyrian *Sin-achi-iriba*) is written in various ways; but three forms are most common, of which we present the most usual. It consists of three elements: the first, *Sin*, or the "Moon" god; the second, *achi*, or "brothers" (אחי); and the third, *iriba*, or "he increased" (רב); the meaning of the whole being "the Moon has multiplied brothers." See CUNEIFORM.

Cuneiform of the Name of Sennacherib.

1. *Earlier Annals.*—Sennacherib was the son and successor of Sargon (q. v.). We know very little of him during his father's lifetime. From his name, and from a circumstance related by Polyhistor, we may gather that he was not the eldest son, and not the heir to the crown till the year before his father's death. Polyhistor (following Berosus) related that the tributary kingdom of Babylon was held by a brother—who would doubtless be an elder brother—of Sennacherib's, not long before that prince came to the throne (Berosus, *Fragm.* 12). Sennacherib's brother was succeeded by a certain Hagisa, who reigned only a month, being murdered by Merodach-Baladan, who then took the throne and held it three months. The details of Sennacherib's campaigns are given under each year in the cuneiform records of his reign. From these it appears that he began to reign July 16, B.C. 705, and was murdered in December, 681 (Smith and Sayce, *Cun. Hist. of Senn.* [Lond. 1878] p. 8).

His first efforts were directed to crushing the revolt of Babylonia, which he invaded with a large army. Merodach-Baladan ventured on a battle, but was de-

feated and driven from the country. Sennacherib then made Belibus (Bel-ibni) an officer of his court, viceroy, and, quitting Babylonia, ravaged the lands of the Aramæan tribes on the Tigris and Euphrates, whence he carried off 200,000 captives. In the ensuing year he made war upon the independent tribes in Mount Zagros, and penetrated thence to Media, where he reduced a portion of the nation which had previously been independent.

2. *Conquest of Judæa.*—We give the account of this as condensed from the cuneiform annals by the late George Smith (*Hist. of Assyria from the Monuments*, p. 117 sq.):

"The eastern expedition of Sennacherib occupied his third year, and at the close of this year, his southern and eastern borders being secure, he had leisure to turn his attention to the affairs of Palestine. Encouraged by the king of Egypt, Hezekiah, king of Judah, had thrown off the Assyrian yoke, several of the smaller sovereigns had either voluntarily joined him or been forced to submit to the king of Judah, and Lullia (the Elulius of Josephus), king of Tyre and Zidon, had also rebelled against Sennacherib. The Assyrians had lost their hold on all the country from Lebanon to Arabia, and Sennacherib resolved to reconquer this region. Crossing from his capital into Syria, which he calls the land of the Hittites, he attacked first Lullia, king of Zidon; but this prince was not prepared to resist Sennacherib, so he embarked on one of his vessels from the city of Tyre, and set sail for the land of Yatan (the island of Cyprus), abandoning his country to the mercy of the Assyrians. Sennacherib now besieged and took the various Phœnician towns: Tyre, the strong city, appears to have successfully resisted him, but he captured Zidunnurabu (great Zidon, Josh. xix, 28) and the lesser Zidon; then coming south, Bit-zitte and Zariptu (Zarephath, 1 Kings xvii, 9), Mahalliba Uzu (Hosah, Josh. xix, 29), Akzibi (Achzib, ver. 29), and Akku (Accho, Judg. i, 31). The sea-coast of Phœnicia, down to the land of the Philistines, was now in the hands of Sennacherib, and he raised a man named Tubahal to the throne of Zidon, and fixed upon the country an annual tribute. The success of Sennacherib along the coast, and the failure of Egyptian aid, now brought nearly the whole of Palestine to his feet, and the various rulers sent envoys with tribute, and tokens of submission to present before the Assyrian monarch. Menahem, who ruled at Samaria; Tubahal, the newly made king of Zidon; Abdi-hiti, king of Arvad; Urumelek, king of Gebal; Metinti, king of Ashdod; and Buduli, king of the Ammonites; Kemosh-uabbi, king of the Moabites; and Airammu, king of Edom, now made their peace, and Askalon, Ekron, and Judah alone remained in rebellion. Sennacherib started from Akku, and keeping along the coast, invaded Askalon, and capturing Zida, the revolting king, sent him, his wife, his sons and daughters, his brothers, and other relatives, captive to Assyria. The cities of Askalon, Bitdaganna (Berth-dagun, Josh. xv, 41), Yappu (Joppa, Jonah i, 3), Benni-barqa (Beue-berak, Josh. xix, 45), and Azuru were successively captured, and Sennacherib placed Saru-ludari, the son of Ikkibiti, on the throne. Moving from

Askalon, Sennacherib attacked Ekron: he tells us that Padi, king of Ekron, had been faithful to his pledges to Assyria, and the priests, princes, and people of Ekron had conspired against him and revolted, and, putting their king in bonds, had delivered him into the hands of Hezekiah, king of Judah, to be kept prisoner at Jerusalem. The revolt at Ekron relied on the assistance of Egypt; and when Sennacherib advanced against the city, a force under the king of Egypt came to their assistance. The Egyptian army was from the kings of Egypt (the plural being used), and from the king of Mithra, or Ethiopia. To meet the army of Egypt, Sennacherib turned aside to Altauq (Eltekeh, ver. 44), where the two forces met, and the Egyptians were defeated. See So. The overthrow of the Egyptian army was followed by the capture of Altauq and Tamma (Timnah, xv, 10), and Sennacherib again marched to Ekron, and put to death the leading men of the city who had led the revolt, and severely treated the people. Their king, Padi, was demanded of Hezekiah, king of Judah, and, being delivered up, was once more seated on the throne. The last part of the expedition given in the Assyrian annals consists of the attack on Hezekiah. The king of Judah was the most important of the tributaries who had thrown off the yoke of Assyria, and was reserved for the last operations. After settling the affairs of Ekron, Sennacherib marched against Judah, and captured forty-six of the fortified cities of Hezekiah, agreeing with the statement of the Scripture (2 Kings xviii, 13-16) that he came up against all the fenced cities of Judah and took them: all the smaller places round them were destroyed, and Sennacherib carried into captivity 200,150 people of all sorts, together with horses, mules, asses, camels, oxen, and sheep in

Throne of Sennacherib before Lachish (q. v.). (From the Monuments.)

great numbers. Sennacherib goes on to relate that he shut up Hezekiah in Jerusalem like a caged bird, and built towers round the city to attack it. Sennacherib now began to portion off and dispose of the territory which he had conquered. The towns along the western side he detached from Judah, and divided them between Metinti, king of Ashdod, Saru-ludari, king of Askelon, Padi, king of Ekron, and Zilli-bel, king of Gaza, the four kings of the Philistines who were now in submission to Assyria, and he increased the amount of the tribute due from these principalities. Hezekiah and his principal men, shut up in Jerusalem, now began to fear, and resolved on submission. Meanwhile the soldiers of Sennacherib were attacking Lachish, one of the last remaining strong cities of Judah. The pavilion of this proudest of the Assyrian kings was pitched within sight of the city, and the monarch sat on a magnificent throne while the Assyrian army assailed the city. Lachish, the strong city, was captured, and thence Sennacherib dictated terms to the humbled king of Judah. Hezekiah sent by his messenger and made submission, and gave tribute, including thirty talents of gold, 800 talents of silver, precious stones of various sorts, couches and thrones of ivory, skins and horns of buffaloes, girls and eunuchs, male and female musicians. According to the record of Sennacherib, he returned to Nineveh in triumph, bearing with him this tribute and spoil, and not a single shadow of reverse or disaster appears in the whole narrative.

"The accounts of this expedition of Sennacherib given in the Bible relate that after the submission of Hezekiah, 'the angel of the Lord' went through the camp of the Assyrians and destroyed 185,000 men of Sennacherib's army, and that the Assyrian monarch returned in disgrace to Nineveh (2 Kings xix, 35-37). This overthrow of Sennacherib's army is confirmed by a story told to Herodotus (ii, 141) by the Egyptian priests. They relate that in the time of an Egyptian king named Sethos, Sennacherib made an expedition against Egypt, and came as far as Pelusium. Sethos went out against him with an inferior army, having invoked the aid of the Egyptian gods and been promised deliverance. In the night, as the two armies lay opposite each other, hosts of field-mice came and destroyed the bowstrings of the Assyrians, who next morning fled."

The discrepancy in dates between the cuneiform and the Biblical accounts of this invasion are at present irreconcilable (*Journ. of Sac. Lit.* July, 1854, p. 383 sq.). See CHRONOLOGY. There has probably been an error in reading the former, or perhaps an error in the record itself. All attempts to correct the Scripture date are forbidden by the manner in which it is interlaced and confirmed by the context. Rawlinson and others have sought a partial solution of the difficulty by the supposition of a twofold attack by Sennacherib upon Palestine; but neither the Assyrian nor the Biblical an-

nals give any countenance to this view. See HEZEKIAH.

3. *Later Campaigns and Death.*—In his fourth year Sennacherib invaded Babylonia for the second time. Merodach-Baladan continued to have a party in that country, where his brothers still resided; and it may be suspected that the viceroy, Belibus, either secretly favored his cause, or, at any rate, was remiss in opposing it. The Assyrian monarch, therefore, took the field in person, defeated a Chaldean chief who had taken up arms on behalf of the banished king, expelled the king's brothers, and, displacing Belibus, put one of his own sons on the throne in his stead. In his fifth year he led an expedition into Armenia and Media; after which, from his sixth to his eighth year, he was engaged in wars with Susiana and Babylonia. From this point his annals fail us.

Sennacherib is believed to have reigned at least twenty-two, and perhaps twenty-four,

years. The date of his accession appears to be fixed by the canon of Ptolemy to B.C. 702, the first year of Belibus or Elibus; but Col. Rawlinson's revised computation (in the *Athenæum*, No. 1869, Aug. 22, 1863, p. 245) dates the accession in B.C. 704, and the late Assyriologist George Smith makes the reign to have begun in B.C. 705. The Scripture synchronism locates its beginning in B.C. 715. The date of his death seems to be marked in the same canon by the accession of Esarhaddon (Esarhaddon) to the throne of Babylon in B.C. 680; but it is possible that an interval occurred between the two. See ESAR-HADDON. The monuments are in conformity with the canon, for the twenty-second year of Sennacherib has been found upon them, while they have not furnished any notice of a later year. See ASSYRIA.

Of the death of Sennacherib nothing is known beyond the brief statement of Scripture, that "as he was worshipping in the house of Nisroch (?) his god, Adrammelech and Shazere his sons smote him with the sword: and they escaped into the land of Armenia" (2 Kings xix, 37; Isa. xxxvii, 38). It is curious that Moses of Chorene and Alexander Polyhistor should both call the elder of these two sons by a different name (Ardumazanes or Argamozanus); and it is still more curious that Abydenus, who generally drew from Berosus, should interpose a king Nergilus between Sennacherib and Adrammelech, and make the latter be slain by Esarhaddon (Eusebius, *Chr. Can.* i, 9; comp. i, 5; and see also Mos. Chor. *Arm. Hist.* i, 22). Moses, on the contrary, confirms the escape of both brothers, and mentions the parts of Armenia where they settled, and which were afterwards peopled by their descendants.

4. *Character.*—Sennacherib was one of the greatest of the Assyrian kings, and also one of the proudest of them. The prophet Isaiah pictures his haughtiness—his "stout heart," and the "glory of his high looks;" represents him as boasting, "Are not my princes altogether kings?" and as ascribing his victories to his "strength of hand" and his "wisdom"—victories, at the same time, so complete and so easy as when one takes away the eggs of a fowl so scared that it neither fluttered nor "peeped" (x, 8-14). Sennacherib himself verifies the portrait, for he calls himself "the great king," "king of nations," "king of the four regions," "first of kings," "favorite of the great gods," etc. The

Clay Impression from Seal of Sennacherib. (In the British Museum.)

accompanying seal depicts him killing a lion, and in one of his inscriptions he boasts of such a conquest. His approaching invasion filled Jerusalem with deep alarm, and Isaiah again and again depicts it. His boasts of previous conquests were not vain ones: ancient monarchies had disappeared before him, opposing armies had perished "as grass on the house-tops," and his numerous hosts had drunk up rivers on their march. An ideal march is vividly sketched for him — by Aiath, Migron, and Michmash, to Geba, and Nob on the northern shoulder of Olivet. Sennacherib did not come by this route, for he wished to prostrate Egypt; but the route sketched might have been taken, and its very difficulties are meant to picture Assyrian intrepidity and perseverance. All the while Sennacherib was only God's "rod," an "axe in his hand;" and "Lebanon," an image of his stately and warlike grandeur, "shall fall by a mighty one." "The virgin, the daughter of Sion," without armor or prowess, but courageous in her seeming helplessness, laughed him to scorn. Nay, God would do to him as he had done to the captives at Iachish, "put a hook into his nose," and ignominiously and easily turn him "back by the way he came" (Isa. xxxvii). "The stout-hearted are spoiled, they slept their sleep; at thy rebuke, both the chariots and horses were cast into a deep sleep;" "the earth feared and was still, when God arose to judgment" (Psa. lxxvi, 5-9).

Sennacherib was not only a great warrior, but also a grand builder. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His great work is the palace of Koyunjik, surpassing in magnificence all the buildings of his predecessors. The royal structure, built on a platform of about ninety feet in elevation, and paved with bricks, covered fully eight acres. Its great halls and chambers were ranged round three courts; one of them 154 feet by 125, and another 124 feet by 90. One of the halls was about 180 feet in length by about 40 in breadth, and sixty smaller rooms have been explored. These rooms are broader than those of his predecessors, probably because he used cedars from Lebanon. He built also, or repaired, a second palace at Nineveh on the mound of Nebbi Yunus, confined the Tigris to its channel by an embankment of brick, restored the ancient aqueducts, which had gone to decay, and gave to Nineveh that splendor which she thenceforth retained till the ruin of the empire. The realistic sculptures of Sennacherib are very instructive; every-day scenes of Assyrian life are depicted by them; landscapes and hunting; the various processes of masonry; the carving

and transportation of the great bulls; and the slaves working in gangs, and often in the presence of the king. He also erected monuments in distant countries. One of his memorials is at the mouth of the Nahr el-Kelb, on the Syrian coast, verifying his boast that he "had come up to the height of the mountains, to the sides of Lebanon;" and there it stands side by side with the tablet which tells of the conquests of Rameses the Great, more than five centuries before the period of Sennacherib. See NINEVEH.

Sennert, ANDREAS, a German Orientalist, was born at Wittenberg in 1606, and began the study of the Semitic languages at the age of ten years. Having completed his education, he visited various universities in Germany and Holland, and in 1638 was appointed professor of Hebrew in his native place, where he died, Dec. 22, 1689. He wrote various philological works, among which are, *Compendium Lexici Hebraici* (Wittenb. 1664); — *Rabbinismus* (ibid. 1666); — *Grammatica Orientalis* (ibid. 1666); — *Ἀσκημα Γλωττικόν* (ibid. 1648). For a more complete list of his works, see Fürst, *Bibl. Jud.* iii, 312 sq.; Steinschneider, *Bibliog. Handbuch*, p. 131 sq.; Wolf, *Bibl. Hebr.* iv, 302; Hoefler, *Nouv. Biog. Générale*, s. v.

Sens, COUNCILS OF (*Concilium Senonense*). These councils were so called from being held in Sens, a town in the department of Yonne, France.

I. This council was held in 1140. Among those present were Louis VII, Samson of Rheims, and Henry of Sens. In this council St. Bernard charged Abelard (q. v.), who was present, with his errors, accusing him of making *degrees* in the Trinity, as Arius had done; of preferring free will to grace, with Pelagius; and of dividing Jesus Christ, with Nestorius. He produced extracts taken from his works, and called upon Abelard either to deny having written them, or to prove their truth, or to retract them. Abelard, instead of defending himself, appealed to Rome; whereupon the bishops present contented themselves with condemning his doctrine, passing no sentence upon him personally out of deference to Innocent II, to whom Samson and three of the bishops wrote, requesting his concurrence in their judgment. The pope condemned Abelard in the same year, and, in his answer to the letter of the bishops, declared that he concurred with them in the sentence they had passed, and that he had imposed perpetual silence upon Abelard. The latter published an apology, in which he confessed the sound Catholic faith, declared that he desisted from his appeal, and retracted all that he had written contrary to the truth. See Mansi, x, 1018.

II. Held in 1199 by the legate Peter against the Poplicans (or *Populicani*), a sect of Manichæans. Among others, the dean of Nevers, and Raynaldus, abbot of St. Martin, were charged with this heresy. The latter was deposed, being found guilty not only of this heresy, but also of those of the Stercoranists and Origenists. Both appealed from the decision of the council to the pope. See Mansi, xi, 3.

III. The third Council of Sens was held in May, 1320, by William de Melun, archbishop of Sens. Four statutes were published.

1. Enacts that the bishops should grant an indulgence of forty days to those persons who would fast on the vigil of the feast of the Holy Sacrament.

2. Directs that places in which clerks were forcibly detained should be laid under an interdict.

4. Condemns those priests who dressed themselves improperly, such as in red, green, yellow, or white boots, etc., and wore beards and long hair.

See Mansi, xi, 1860.

IV. This council was held in 1485 by Tristan de Salazar, archbishop of Sens, in which the constitutions published by his predecessor, Louis, in a council held A.D. 1460, were confirmed. Among other matters treated of were

Tablet Sculptured on Rock at Nahr el-Kelb, near Beirût.

the celebration of the holy office, the reform of the clergy and of the monks, the duties of laymen towards the Church, etc. It also enacted that canons shall be considered absent who are not present at nocturn, before the end of the *Venite*; at the other hours before the first psalm, and at mass before the end of the last *Kyrie*. Most of these regulations were taken from the canons of Basle, Lateran, and the Pragmatic. See Mansi, xiii, 1721, App.

Sensation, the immediate effect produced on the mind by something acting upon the bodily organs. The earliest sign by which the Ego becomes perceptible is corporeal sensation, and this sensibility appears to be a necessary attribute of animated organic matter itself. All the perceptions of sense are rooted in the *general* sensation, which, however, is very obscure, even pain not being clearly felt by it at the place where it exists. The next step from this obscure, original, innate sensation is *particular* sensation, through the medium of the nervous system. Sensation should be distinguished from *perception*. The former properly expresses *that change in the state of the mind* which is produced by an impression upon an organ of sense; perception, on the other hand, expresses the *knowledge* or the *intimations* we obtain by means of our *sensations* concerning the qualities of matter. Sensation proper is not purely a passive state, but implies a certain amount of mental activity. It may be described, on the psychological side, as resulting directly from the attention which the mind gives to the affections of its own organism. Objection may be made that every severe affection of the body produces pain quite independently of any knowledge we may possess of the cause or of any operation of the will being directed towards it. Yet facts prove that if the attention of our minds be absorbed in other things, no impulse can produce in us the slightest feeling. Numerous facts prove that a certain application and exercise of mind, on one side, is as necessary to the existence of sensation as the occurrence of physical impulse, on the other. See Fleming, *Vocab. of Philosophy*, s. v.

Sense, MORAL. See MORAL SENSE.

Sense of SCRIPTURE. See INTERPRETATION.

Sentence, ECCLESIASTICAL. Among the sentences pronounced by ecclesiastical judges are: 1. *Definitive*, a sentence which closes and puts an end to a controversial suit, and has reference to the chief subject or principal matter in dispute; 2. *Interlocutory*, a sentence which determines or settles some incidental question which has arisen in the progress of an ecclesiastical suit; 3. *Deprivation*, a sentence by which the vicar or rector of a parish is formally deprived of his preferment after due hearing and examination.

Sentences, a name for the unarranged texts of Scripture, or preliminary antiphons, which, in the Prayer-book of the Anglican Church, form a part of the introduction to matins and even-song.

SENTENCES, BOOK OF. See LOMBARD, PETER.

SENTENCES, OFFERTORY, a name for the texts of Scripture either said or sung at the time of the offertory in the Anglican form for the celebration of the holy eucharist. See OFFERTORY.

Sententiarii, the followers of Peter Lombard (q. v.), whose four *Books of Sentences*, on their appearance in 1162, at once acquired such authority that all the doctors began to expound them. They brought all the doctrines of faith, as well as the principles and precepts of practical religion, under the dominion of philosophy. They were held in the highest estimation, and attracted great numbers of eager listeners, which state of things continued down to the time of the Reformation. See Gardner, *Faiths of the World*, s. v.

Senter, Anthony, a Methodist Episcopal minister, was born in Lincoln County, N. C., Jan. 28, 1785, converted in 1806, admitted on trial in 1809, into full connection in 1811, and filled the following appointments: Great Peedee Circuit, 1809; Bladen, 1810; Little Peedee, 1811; Buncombe, 1812; Sparta, 1813; Georgetown, 1814; Charleston, 1815; and presiding elder of the Broad River District, 1816–17. He died Dec. 23, 1817. A strong mind and a benevolent heart, a single eye and a steady purpose to glorify God, an unwavering faith, fervent love, and burning zeal—these were the exalted attributes of this good man. See *Minutes of Conferences*, i, 307; Stevens, *Hist. of the M. E. Church*, iv, 243; Bangs, *Hist. of the M. E. Church*, iii, 79.

Senter, M. Alverson, a minister of the Methodist Episcopal Church, was the son of Riley Senter, of Murphys, Cal. He graduated from the Genesee College in 1865, and united with the Troy Conference in 1867. He served the Third Street Church in Troy, N. Y., and was pastor for the same length of time of the Church in South Adams, Mass. He was then appointed to Hoosic Falls, N. Y., and served it for a little over a year. He died at the residence of Joseph Hillman in Troy, Feb. 1, 1876. See *Minutes of Annual Conferences*, 1876, p. 81.

Sentia, in Roman mythology, was the goddess of opinion, i. e. the deity who inspires opinions, views, judgments.

Sentinus, in Roman mythology, was the god who awakened and watched over the senses of the newly born.

Sen'uah [some *Semu'ah*] (Neh. xi, 9). See HASENUAH.

Seorah. See BARLEY.

Seo'rim (Heb. *Seorim'*, שְׂעִירִים, plur. of שְׂעִיר, *barley*; Sept. Σειριμ v. r. Σειριπ), the head of the fourth division of priests as arranged by David (1 Chron. xxiv, 8). B.C. 1012.

Separates, a sect of Calvinistic Methodists in the United States, which arose about 1740 in consequence of the labors of George Whitefield. They took, at first, the name of "New Lights," and afterwards, being organized into distinct societies, were known as "Separates." They were soon after joined by a preacher (Shubal Stearns, of Boston) who labored among them until 1751, when he embraced the opinions of the Baptists, as did also many others of the Separates. The distinctive doctrine of the sect was that believers are guided by the immediate teachings of the Holy Spirit; such supernatural indications of the divine will being regarded by them as partaking of the nature of inspiration, and above, though not contrary to, reason. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.

Separation of CHURCH AND STATE. See CHURCH AND STATE.

Separation of EASTERN AND WESTERN CHURCHES. See SCHISM.

Separatism, a term used to denote the disposition and practice by which persons withdraw from established communities or dissent from settled and common views or beliefs. This article is concerned with the religious, or more specifically the ecclesiastical, form of separatism only.

The strict meaning of the phrase "religious separatism," which is also its only admissible meaning, makes it denote a tendency to break away from accepted religious views or a settled Church organization without sufficient cause. The imperfections and faults of the Church constitute the ordinary plea by which the action resulting from such tendency is defended; but as separatists never attempt to purify the Church from within, it is evident that the real motives by which

they are actuated are personal indifference towards the Church, an alienation from the Church through the influence of rival institutions, or other reasons found in themselves. History shows that pride and perverse views have been the usual motives from which separatists have acted. All true reformers have continued in their churches until thrust out, e. g. Luther, Wesley, etc.

The term *separatist* (q. v.) occurs for the first time in the history of Protestantism, though it applies to movements in the ancient and Middle-Age churches as well (e. g. Donatism). Separations on the grounds already indicated were not unknown in any period of the history of the organized Church. In Protestantism the churches of England and Scotland furnished several kinds of separatists during the 16th and 17th centuries, especially the Independents and the Brownists (q. v.). The term, however, became a party name for the first time in Germany, being originally employed in the Wetterau, then in Württemberg, and subsequently in Bremen. In the latter place, a Lutheran student of theology named Theodore Schermer became the head of a small clique (1699) which taught a kind of purgatory, rejected infant baptism and all public worship, and recommended the disuse of the Lord's supper because of the abuses attendant on its observance. They led a retired and pious life, wholly apart from the Church. The most able refutation of their peculiar views was written by J. W. Jäger, of Tübingen (1715). Other minor separatist movements occurred about this time, which are involved in the disputes growing out of the Pietist controversy.

The congregations of the Inspired (q. v.) demand special notice in this connection. These persons denounced all ecclesiastical organization as a work of the devil, which they cursed through inspiration of the spirit, and resolutely avoided. They justified their separation by various reasons: 1, that the Church is corrupt and has been divorced from Christ; 2, the ministrations of unregenerate persons are without effect; 3, only spiritual ties can bind a Christian to the Church; 4, infant baptism has no support in Scripture; 5, an inward and powerful impulse led them to withdraw from public worship, and secured to them a wondrous rest and peace of conscience; 6, separation insures exemption from many temptations; 7, it is favorable to the cultivation of an impartial love for all pious persons, and for them only; 8, it secures solitude, quietness, love for the cross, and a self-denying temper, all of which are necessary to the welfare of the soul. They argued that only separation could deliver from the chilling and baleful influences existing in the Church, and declared that persons once earnest to purify the Church had, without exception, sunk into indifference and spiritual sloth because they had not come out from the mystical and apocalyptic Babylon. Their opponents replied by showing that in the Saviour's parable the wheat and tares were made to grow together until the harvest; that Christ and the apostles did not avoid the services of the corrupt Temple, though they superseded it when its work was done; and that Protestantism had not assumed an independent organization by its voluntary action, but only when necessity, consequent on its expulsion from a Church corrupt in its very principles, had compelled that measure. God's kingdom is a heaven; but the separation of the good from the bad is reserved for the day of judgment. The simple duty of each individual is to guard himself and his surroundings from the evil. On the Inspirationists see Weissmann, *Introd. in Memorab. Eccles. Hist. Sacre* (Stuttg. 1719), pt. ii, sec. xvii, p. 1264 sq., No. 9. On the Separatists generally, Schlegel, *Kirchengesch. d. 18ten Jahrhunderts*, ii, 1054 sq.

Separatists, a general term which may be considered as meaning dissenters from the Church of England, but also applied at different periods to certain sects as the special name by which they chose to be known.

1. In the reign of bloody Mary, the name was given to two congregations of Protestants who refused to conform to the service of the mass. Mr. Rose was minister of the one which met in Bow-church Yard, London, where thirty of them were apprehended in the act of receiving the Lord's supper, and narrowly escaped being committed to the flames. The other and much larger congregation was discovered at Islington, and Mr. Rough, its minister, and several others were burned by order of bishop Bonner.

2. In Ireland there are three distinct bodies of Separatists. The Walkerites, founded by Rev. John Walker, who seceded from the Established Church of Ireland and formed a small Church in Dublin on the principle of holding no communion with any other sect. They profess to found their principles entirely upon the New Test., and to be governed wholly by its laws. On doctrinal points they agree with the Sandemanians (q. v.). They hold that by his revealed word the spirit of God works in them, both to will and to do; that God is the sole author and agent of everything that is good; and maintain that everything that comes from the sinner himself, either before or after conversion, is essentially evil; that the idea of any successors to the apostles, or of any change in the law of Christ's kingdom, is utterly unchristian. They have, therefore, no clerical order. Another body of Irish Separatists was originated by Rev. Mr. Kelly, who seceded from the Established Church, and was soon after joined by Rev. George Carr, of New Ross. The few churches belonging to this sect hold the same order and discipline as the Sandemanians, though in doctrine they approach more nearly to the evangelical dissenters. The Darbyites, followers of the Rev. Mr. Darby, who combined strict evangelical doctrines with the peculiar tenets of the Millenarians. From these sprang the Plymouth Brethren (q. v.).

3. A German Pietist sect at Württemberg who separated themselves from the Lutheran Church about the middle of the 18th century. Meeting with much opposition and persecution, a number of them, under George Rapp, emigrated to Pennsylvania, and formed the *Harmony Society*. In 1815 they removed to Indiana, where they remained only two years, and, selling their property, returned to Pennsylvania, and in Beaver County built a town called Economy, where they have amassed considerable property. See RAPPISTS. Those who remained in Germany, after much opposition, were allowed to form a congregation at Kornthal, and became known as Kornthalites. See KORNTHAL, SOCIETY OF. Those who refused to conform to the German Evangelical Union, formed by Frederick William III of Prussia, were also called Separatists.

4. The name was assumed by some of the early Puritans, perhaps the early Traskites (q. v.). In their principles, condemning taste in dress, joyousness of life, etc., we recognise the class of Puritans afterwards represented by the Quakers. There were a few congregations of Separatists in Scotland, and one was commenced in London in 1820. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.

SEPARATISTS AT ZOAR. The village of Zoar, which is the home of this communistic society, is in Tuscarawas County, O. From Nordhoff's *Communistic Societies of the United States* we gather the following information respecting them:

I. *History.*—This society, like the Harmony Society, originated in Württemberg, and like them, the Inspirationists, and others, were dissenters from the Established Church. Their refusal to send their children to the schools under the control of the clergy, and to allow their young men to serve as soldiers, brought upon them persecution from both civil and ecclesiastical authorities. They suffered for ten or twelve years, when they were assisted by some English Quakers to emigrate to the United States. They arrived at Philadelphia in August, 1817, and bought a tract of 5600 acres of land in Ohio. They chose Joseph Bäumeler

to be their leader, who, with a few able-bodied men, took possession about Dec. 1, 1817. At first it was not intended to form a communistic society, but having many very poor among them, it was thought that the only way they could keep the enterprise from failing was to establish a community of goods and efforts. An agreement to that effect was signed, April 15, 1819. Bäumeler was chosen spiritual and temporal head, and changing his name to Bimeler, the people came to be commonly spoken of as "Bimmeliers." In March, 1824, an amended constitution was adopted. Between 1828 and 1830 they began to permit marriage, Bäumeler himself taking a wife. In 1832 they were incorporated by the Legislature as the "Separatist Society of Zoar," and a new constitution, still in force, was signed the same year. They have prospered materially, and now own, in one tract, over 7000 acres of very fertile land, besides some in Iowa. They have a woollen-factory, two large flour-mills, saw and planing mill, shops, tannery, etc. They had in 1874 about 300 members and property worth more than \$1,000,000.

II. *Religion*.—Their "Principles," printed in the first volumes of Bäumeler's discourses, were evidently framed in Germany, and consist of twelve articles:

"I. We believe and confess the Trinity of God: Father, Son, and Holy Ghost.

"II. The fall of Adam and of all mankind, with the loss thereby of the likeness of God in them.

"III. The return through Christ to God, our proper Father.

"IV. The Holy Scriptures as the measure and guide of our lives, and the touchstone of truth and falsehood.

"All our other principles arise out of these, and rule our conduct in the religious, spiritual, and natural life.

"V. All ceremonies are banished from among us, and we declare them useless and injurious; and this is the chief cause of our separation.

"VI. We render to no mortal honors due only to God, as to uncover the head or to bend the knee. Also we address every one as 'thou'—*du*.

"VII. We separate ourselves from all ecclesiastical connections and constitutions, because true Christian life requires no sectarianism, while set forms and ceremonies cause sectarian divisions.

"VIII. Our marriages are contracted by mutual consent, and before witnesses. They are then notified to the political authority; and we reject all intervention of priests or preachers.

"IX. All intercourse of the sexes, except what is necessary to the perpetuation of the species, we hold to be sinful and contrary to the order and command of God. Complete virginity or entire cessation of sexual commerce is more commendable than marriage.

"X. We cannot send our children into the schools of Babylon [meaning the clerical schools of Germany], where other principles contrary to these are taught.

"XI. We cannot serve the state as soldiers, because a Christian cannot murder his enemy, much less his friend.

"XII. We regard the political government as absolutely necessary to maintain order, and to protect the good and honest and punish the wrong-doers; and no one can prove us to be untrue to the constituted authorities."

III. *Practical Life*.—The members of the society are divided into two classes, the novitiates and the full associates. The former are obliged to serve at least one year before admission into the latter class, and this is exacted even of their own children, if on attaining majority they wish to enter the society. According to the constitution, all officers are elected by the whole society, the women having the right to vote as well as the men. They manage, with the consent of the society, all its affairs, cases of disagreement being referred to the "Standing Committee of Five," as a court of appeals. Before 1845, children remained with their parents until three years of age, when they ceased to be under their exclusive control. Since then the custom of the society taking care of the child ceased, being found inconvenient. The Zoar people read little except the Bible and the few pious books brought from Germany, or imported since. They belong to the peasant class of South Germany, are unintellectual, and have risen but little in culture.

In their religious observances they studiously avoid forms. On Sunday they have three meetings; in the morning, after singing, one of Bäumeler's discourses is

read; in the afternoon the children meet to study the Bible; and in the evening they meet to sing and listen to the reading of some work that interests them. During the week there are no religious meetings. Audible or public prayer is not practiced among them, neither do they have any "preacher." They use neither baptism nor the Lord's supper. They address each other by the first name, and use no titles of any kind. They wear their hats in a public room, and seat the sexes separately in Church.

Se'phar (Heb. *Sephar'*, סֶפֶר, a numbering; Sept. Σαφφρά v. r. Σωφφρά), "a mountain of the east," a line drawn from which to Mesha formed the boundary of the Joktanitic tribes (Gen. x, 30). The name may remind us of *Saphar*, which the ancients mention as a chief place of South Arabia (Pliny, *H. N.* vi, 23-26). The map of Berghaus exhibits on the south-west point of Arabia a mountain called *Sabber*, which, perhaps, supplies the spot we seek (see Burckhardt, *Arabia*, p. 236). If this be the case, and Mesha be (as usually supposed) the Mesene of the ancients, the line between them would intersect Arabia from north-east to south-west. That Sephar is called "a mountain of the east" is to be understood with reference to popular language, according to which Arabia is described as the "east country." See Baumgarten, *Theolog. Commentar zum A. T.* i, 152; Bochart, *Phaleg*, ii, 20.—Kitto. The immigration of the Joktanites was probably from west to east [see ARABIA; MESHA], and they occupied the south-western portion of the peninsula. The undoubted identifications of Arabian places and tribes with their Joktanitic originals are included within these limits, and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient seaport town called Dhafári or Zafári, and Dhafár or Zafár (now *Jofár*, i. e. *ez-Zofar*), without the inflexional termination, represents the Biblical site or district: thus the etymology is sufficiently near, and the situation exactly agrees with the requirements of the case. Accordingly, it has been generally accepted as the Sephar of Genesis.

But the etymological fitness of this site opens out another question, inasmuch as there are no less than four places bearing the same name, besides several others bearing names that are merely variations from the same root. The frequent recurrence of these variations is curious; but we need only here concern ourselves with the four first-named places, and of these two only are important to the subject of this article. They are of twofold importance, as bearing on the site of Sephar, and as being closely connected with the ancient history of the Joktanitic kingdom of Southern Arabia, the kingdom founded by the tribes sprung from the sons of Joktan. The following extracts will put in a clear light what the best Arabian writers themselves say on the subject. The first is from the most important of the Arabic lexicons:

"Dhafári is a town of the Yemen; one says, 'He who enters Dhafári learns the Himyeritic.' . . . Es-Sughání says, 'In the Yemen are four places, every one of which is called Dhafári; two cities and two fortresses. The two cities are Dhafári-l-Hakl, near San'a, two days' journey from it on the south; and the Tubbaas used to abide there, and it is said that it is San'a [itself]. In relation to it is called the onyx of Dhafári. (Ibn-Es-Sikkít says that the onyx of Dhafári is so called in relation to Dhafári-Asad, a city in the Yemen.) Another is in the Yemen, near Mirbát, in the extremity of the Yemen, and is known by the name of Dhafári-s-Sáhib [that is, of the sea-coast], and in relation to it is called the Kust-Dhafári [either costus or aloes-wood], that is, the wood with which one fumigates, because it is brought thither from India, and from it to [the rest of] the Yemen.' . . . And it Yákút meant, for he said, 'Dhafári . . . is a city in the extremity of the Yemen, near to Esh-Shihr.' As to the two fortresses, one of them is a fortress on the south of San'a, two days' journey from it, in the country (of the tribe of) Benú-Murád, and it is called Dhafári-l-Wadiyeyn [that is, of the Two Valleys]. It is also called Dhafári-Zeyd; and another is on the north thereof, also two days' journey from it, in the country of Hemandán, and is called Dhafári-dh-Dhábir' (*Táj-el-'Arás*, MS. a. v.).

Yakût, in his homonymous dictionary (*El-Mushtarak*, s. v.), says:

"Dhafári is a celebrated city in the extremity of the country of the Yemen, between 'Oman and Mirbát, on the shore of the sea of India: I have been informed of this by one who has seen it prosperous, abounding in good things. It is near Esh-Shihr. Dhafári-Zeyd is a fortress in the Yemen in the territory of Habb; and Dhafári is a city near to San'a, and in relation to it is called the Dhafári onyx; in it was the abode of the kings of Himyer, and of it was said, 'He who enters Dhafári learns the Himyeritic, and it is said that Sau'a itself is Dhafári.'"

Lastly, in the geographical dictionary called the *Marásid*, which is ascribed to Yakût, we read, s. v.:

"Dhafári: two cities in the Yemen, one of them near to San'a, in relation to which is called the Dhafári onyx: in it was the dwelling of the kings of Himyer; and it is said that Dhafári is the city of San'a itself. And Dhafári of this day is a city on the shore of the sea of India; between it and Mirbát are five parasangs of the territories of Esh-Shihr, [and it is] near to Suhár, and Mirbát is the other anchorage besides Dhafári. Frankincense is only found on the mountain of Dhafári of Esh-Shihr."

These extracts show that the city of Dhafári near San'a was very little known to the writers, and that little only by tradition. It was even supposed to be the same as, or another name for, San'a, and its site had evidently fallen into oblivion at their day. But the seaport of this name was a celebrated city, still flourishing, and identified on the authority of an eye-witness. M. Fresnel has endeavored to prove that this city, and not the western one, was the Himyeritic capital; and certainly his opinion appears to be borne out by most of the facts that have been brought to light. Niebuhr, however, mentions the ruins of Dhafári near Yerm, which would be those of the western city (*Descr.* p. 206). While Dhafári is often mentioned as the capital in the history of the Himyeritic kingdom (Caussin, *Essai*, i, passim), it was also in the later times of the kingdom the seat of a Christian Church (Philostorgius, *Hist. Eccles.* iii, 4). Abulfeda has fallen into an absurd error in his *Geography*, noticed by M. Fresnel (*Ive Lettre*, p. 317). He endeavors to prove that the two Zafáris were only one, by supposing that the inland town, which he places only twenty-four leagues from San'a, was originally on the sea-coast.

But, leaving this curious point, it remains to give what is known respecting Dhafári the seaport, or, as it will be more convenient to call it, after the usual pronunciation, Zafár. All the evidence is clearly in favor of this site being that of the Sephar of the Bible, and the identification has accordingly been generally accepted by critics. More accurately, it appears to preserve the name mentioned in Gen. x, 30, and to be in the district anciently so named. It is situated on the coast, in the province of Hadramäwt, and near to the district which adjoins that province on the east, called Esh-Shihr (or as M. Fresnel says it is pronounced in the modern Himyeritic, *Shhër*). Wellsted says of it, "Dofár is situated beneath a lofty mountain" (ii, 453). In the *Marásid* it is said, as we have seen, that frankincense (in the author's time) was found only in the "mountain of Dhafári;" and Niebuhr (*Descr.* p. 248) says that it exports the best frankincense. M. Fresnel gives almost all that is known of the present state of this old site in his *Lettres sur l'Hist. des Arabes avant l'Islamisme* (V^e Lettre, *Journ. Asiat.* iii^e série, tom. v). Zafár, he tells us, pronounced by the modern inhabitants "Isfór," is now the name of a series of villages situate some of them on the shore, and some close to the shore, of the Indian Ocean, between Mirbát and Rás-Sájjir, extending a distance of two days' journey, or seventeen or eighteen hours, from east to west. Proceeding in this direction, those near the shore are named Tákah, Ed-Daháriz, El-Beld, El-Háfah, Saláhah, and Awkad. The first four are on the sea-shore, and the last two at a small distance from it. El-Beld, otherwise called Harkám, is, in M. Fresnel's opinion, the ancient Zafár. It is in ruins, but ruins that attest its former prosperity. The inhabitants were celebrated for their hospitality.

There are now only three or four inhabited houses in El-Beld. It is on a small peninsula lying between the ocean and a bay, and the port is on the land side of the town. In the present day, during nearly the whole of the year, at least at low tide, the bay is a lake and the peninsula an isthmus; but the lake is of sweet water. In the rainy season, which is in the spring, it is a gulf of sweet water at low tide, and of salt water at high tide.

The classical writers, as above noted, mention "Sapphar metropolis" (Σαφάρα μητρόπολις) or Saphar (in *Anon. Peripl.* p. 274), in long. 88°, lat. 14° 30', according to Ptolemy, the capital of the Sappharite (Σαφαριται), placed by him (vi, 6, 25) near the Homerite; but their accounts are obscure, and probably from hearsay. In later times, as we have already said, it was the seat of a Christian Church—one of three which were founded A.D. 343, by permission of the reigning Tabbaa, in Dhafári (written Tapharon, Τάφαρον, by Philostorgius, *Hist. Eccles.* iii, 4), in 'Aden, and on the shores of the Persian Gulf. Theophilus, who was sent with an embassy by order of the emperor Constantine to effect this purpose, was the first bishop (Caussin, i, 111 sq.). In the reign of Abrahah (A.D. 537–570) St. Gregentius was bishop of these churches, having been sent by the patriarch of Alexandria (see the authorities cited by Caussin, i, 142–145).

Seph'arad (Heb. *Sepharad*, סֶפְרָד, meaning, if Heb., *separated*; Targ. סֶפְרָדָא, i. e. *Ispamia*; Sept. Ἰσπᾶρ *Ἰσπαρᾶ*; Vulg. in *Bosporo*), a name which occurs in Obad. 20 only, as that of a place in which the Jews of Jerusalem were then held in captivity, and whence they were to return to possess the cities of the south. Its situation has always been a matter of uncertainty, and cannot even now be said to be settled.

1. The reading of the Sept. given above, and followed by the Arabic Version, is probably a mere conjecture, though it may point to a modified form of the name in the then original, viz. *Sepharath*. In Jerome's copy of the Sept. it appears to have been *Eḡpárarē*, since (*Comm. in Abd.*) he renders their version of the verse *transmigratio Ierusalem usque Euphrathem*. This is certainly extremely ingenious, but will hardly hold when we turn it back into Hebrew.

2. The reading of the Vulgate, *Bosporus* (obtained by taking the prefixed preposition as part of the name—סֶפְרָדָא—and at the same time rejecting the final D), was adopted by Jerome from his Jewish instructor, who considered it to be "the place to which Hadrian had transported the captives from Jerusalem" (*Comm. in Abd.*). This interpretation Jerome did not accept, but preferred rather to treat Sepharad as connected with a similar Assyrian word signifying a "boundary," and to consider the passage as denoting the dispersion of the Jews into all regions. We have no means of knowing to which Bosporus Jerome's teacher alluded—the Cimmerian or the Thracian. If the former (Strait of Yenikale), which was in Iberia, it is not impossible that this rabbi, as ignorant of geography outside of the Holy Land as most of his brethren, confounded it with Iberia in Spain, and thus agreed with the rest of the Jews whose opinions have come down to us. If the latter (Strait of Constantinople), then he may be taken as confirming the most modern opinion (noticed below), that Sepharad was Sardis in Lydia.

3. The Targum Jonathan (see above) and the Peshito-Syriac, and from them the modern Jews, interpret Sepharad as *Spain* (Ispamia and Ispania), one common variation of which name, *Hesperia*, does certainly bear considerable resemblance to Sepharad; and so deeply has this taken root that at the present day the Spanish Jews, who form the chief of the two great sections into which the Jewish nation is divided, are called by the Jews themselves the *Sephardim*, German Jews being known as the *Ashkenazim*. It is difficult to suppose that either of these can be the true explanation of Sepharad. The prophecy of Obadiah has every appearance

of referring to the destruction of Jerusalem by Nebuchadnezzar, and there is no reason to believe that any Jews had been at that early date transported to Spain.

4. Others have suggested the identity of Sepharad with *Sippbara* in Mesopotamia (Hardt, *Sippbara Babylonie* [Helmst. 1708]), but that is more probably Sepharvaim.

5. The name has perhaps been discovered in the cuneiform Persian inscriptions of Naksh-i-Rustum and Behistun (see Burnouf, *Mém. sur Deux Inscr. Cunéif.* 1836, p. 147), and also in a list of Asiatic nations given by Niebuhr (*Reiseb.* ii, pl. 31). In the latter it occurs between Ka Ta Pa TUK (Cappadocia) and Ta UNA (Ionia). De Sacy was the first to propose the identification of this with Sepharad, and subsequently it was suggested by Lassen (*Zeitschr. f. Morgenl.* V, i, 50) that S Pa Ra D was identical with *Sardis*, the ancient capital of Lydia. This identification is approved of by Winer, and adopted by Dr. Pusey (*Introd. to Obad.* p. 232, note, also p. 245). In support of this, Fürst (*Handb.* ii, 95 a) points out that Antigonus (B.C. cir. 320) may very probably have taken some of his Jewish captives to Sardis; but it is more consistent with the apparent date of Obadiah's prophecy to believe that he is referring to the event mentioned by Joel (iii, 6), when "children of Judah and Jerusalem" were sold to the "sons of the Javanim" (Ionians), which—as the first captivity that had befallen the kingdom of Judah, and a transportation to a strange land, and that beyond the sea—could hardly fail to make an enduring impression on the nation.

6. Ewald (*Propheten*, i, 404) considers that Sepharad has a connection with *Zarephath* in the preceding verse; and while deprecating the "penetration" of those who have discovered the name in a cuneiform inscription, suggests that the true reading is Sepharim, and that it is to be found in a place three hours from Akka, i. e. doubtless the modern Shefa 'Omar, a place of much ancient repute and veneration among the Jews of Palestine (see Zunz, note to Parchi, p. 428); but it is not obvious how a residence within the Holy Land can have been spoken of as a captivity, and there are considerable differences in the forms of the two names.

7. Michaelis (*Suppl.* No. 1778) has devoted some space to this name; and, among other conjectures, ingeniously suggests that the "Spartans" (q. v.) of 1 Macc. xii, 15 are accurately "Sepharadites." This suggestion, however, does not appear to have stood the test of later investigations. But it is adopted by Keil (*ad loc.*), who objects to the view expressed above (No. 5) that Sardis would naturally be Hebraized סרדר.

8. Juynboll proposes (*Hist. Samar.* p. 20) to read סרדר, at the end of (i. e. beyond) the Euphrates, as the origin of the Sept. rendering, but such a phrase would be unnatural.

Sephardim, a name applied to the Spanish Jews. They were banished from Spain in 1492, and from Portugal in 1497, and yet they still maintain their identity as a separate class of Jews among their brethren in all parts of the world. They look upon themselves as a higher order of Israelites. One peculiar point of distinction which marks them out from other Jews is their daily use of the old Spanish language, with which they are so familiar that their own Scriptures are better known to them in the old Spanish version than in the original Hebrew. See JEWS.

Sepharva'im (Heb. *Sepharva'yim*, ספריים; Sept. Σεφαρωναίμ, Ἐπφαρωναίμ) is mentioned by Sennacherib in his letter to Hezekiah as a city whose king had been unable to resist the Assyrians (2 Kings xix, 13; Isa. xxxvii, 13; comp. 2 Kings xviii, 34). It is coupled with Hena and Ava, or Ivah, which were towns on the Euphrates above Babylon. Again, it is mentioned in 2 Kings xvii, 24 as one of the places from which colonists were transported to people the desolate

Samaria, after the Israelites had been carried into captivity, where it is again joined with Ava, and also with Cuthah and Babylon. These indications are enough to justify us in identifying the place with the famous town of *Sippara*, on the Euphrates above Babylon (Ptolemy, v, 18), which was near the site of the modern *Mosaiib*. Sippara was mentioned by Berosus as the place where, according to him, Xithrus (or Noah) buried the records of the antediluvian world at the time of the deluge, and from which his posterity recovered them afterwards (*Fragm. Hist. Gr.* ii, 501; iv, 280). Abydenus calls it πόλιν Σεπαρηνών (*Fragm.* 9), and says that Nebuchadnezzar excavated a vast lake in its vicinity for purposes of irrigation. Pliny seems to intend the same place by his "oppida Hipparenorum"—where, according to him, was a great seat of the Chaldaic learning (*Hist. Nat.* vi, 30). When Pliny places Hippara, or Sippara, on the Narragam (Nahr Agam), instead of on the Euphrates, his reference is to the artificial channel which branched off from the Euphrates at Sippara and led to the great lake (Chald. ܢܗܪ ܐܓܡ) excavated by Nebuchadnezzar. Abydenus called this branch "Aracanus" (Ἀράκανος, Ar Akan (*Fragm.* 10). The plural form here used by Pliny may be compared with the dual form in use among the Jews; and the explanation of both is to be found in the fact that there were two Sipparas, one on either side of the river. Berosus called Sippara "a city of the sun" (ἡλίου πόλιν); and in the inscriptions it bears the same title, being called *Tsipar sha-Shamas*, or "Sippara of the Sun"—the sun being the chief object of worship there. Hence the Sepharvites are said, in 2 Kings xviii, 31, to have "burned their children in the fire to Adramelech and Anammelech, the gods of Sepharvaim"—these two distinct deities representing respectively the male and female powers of the sun, as Lunus and Luna represented the male and female powers of the moon among the Romans.

Se'pharvite (Heb. *Sepharvi'*, ספריי, but only in the plural; Sept. Σεφαρωναίμ v. r. Σεφφαρουν, a native of Sepharvaim (q. v.) (2 Kings xviii, 31).

Sephe'la (1 Macc. xii, 38). See SHEPHELIAH.

Sepher ASARA MAAMAROTH. See AFFENDOFULO, CALEB.

Sepher HA-BAHIR. See NECHUNJAH BEN-HA-KANAH.

Sepher HA-NIKKUD. See CHAJUG, JEHUDA BEN-DAVID.

Sepher JEZIRAH. See JEZIRAH.

Sepher NITSACHON. See LIPMANN, JOMTOB.

Sepher TORAH. See TORAH.

Sepher ZERUBBABEL (ספר זרובבל) is the title of an apocalyptic book, written in the form of a dialogue between Zerubbabel and the angel Metatron about the birth, education, life, war, and death of Armillius, who is about to appear after the war between Gog and Magog, etc. The wonders of the Messiah were to be seen between 1063 and 1068. This work, which was probably written between 1050 and 1060, was first printed at Constantinople in 1519; then at Wilna in 1819. Lately it was published by Jellinek, according to two Leipsic MSS. (Cod. 22 and 38), in his collection entitled *בית המדרש* [Leipsic, 1853], ii, 54-57). See Fürst, *Bibl. Jud.* iii, 317; Grätz, *Gesch. der Juden*, vi, 58 sq. (B. P.)

Sephiroth (ספירות), a Cabalistic term of frequent occurrence in late Jewish writers. The ten Sephiroth have been represented in three different forms, all of which may be seen in H. More's *Opera Philos.* i, 423; and one of which, although not the most usual, has already been given in the art. CABALA. The Sephiroth have been the theme of endless discussion; and it has even been disputed whether they are designed to express theological, philosophical, or physical mysteries. The Jews themselves generally regard them as the sum

and substance of Cabalistical theology, indicating the emanating grades and order of efflux according to which the nature and manifested operation of the Supreme Being may be comprehended. Several Christian scholars have discerned in them the mysteries of their own faith, the Trinity, and the incarnation of the Messiah. In this they have received some sanction by the fact noticed by Wolf, that most learned Jewish converts endeavor to demonstrate the truth of Christianity out of the doctrines of the Cabala (*Biblioth. Hebr.* i, 360). The majority of all parties appear to concur in considering the first three Sephiroth to belong to the essence of God, and the last seven to denote his attributes, or modes of existence. The following treatises on this subject are among the most remarkable: a dissertation by Rhenferd, *De Stylo Apocalypseos Cabalistico*, in Danz's *Nov. Test. ex Talmude Illust.* p. 1090, in which he endeavors to point out many extraordinary coincidences between the theosophy of the Cabala and the book of Revelation (which may be compared with an essay of similar tendency in Eichhorn's *Bibl. Biblioth.* iii, 191); some remarks by Löwe, in the last-named journal (v, 377 sq.); and a dissertation by Vitranga, *De Sephiroth Kabbalistarum*, in his *Observat. Sacr.* i, 126, in which he first showed how the Sephiroth accorded with the human form.

Sephorno. See SFORNO.

Sepphōris (Σεπφώρις v. r. Σέφφορις), a town of Upper Galilee, not mentioned under this name in Scripture, but frequently by Josephus. It was garrisoned by Antigonius in his war with Herod the Great, until the latter took it early in his Galilean campaign (Josephus, *Ant.* xiv, 15, 4). It seems to have been a place of arms, and to have been occasionally the royal residence, for, in the troubles which arose in the country during the presidency of Varus, the robber chief Judas, son of Ezekias, seized the palace of Sepphoris, and carried off the arms and treasure which it contained (*ibid.* xvii, 12, 5). It was subsequently taken and burned by Varus (*ibid.* xvii, 12, 9). Herod the tetrarch (Antipas) afterwards rebuilt and fortified it, and made it the glory of all Galilee, and gave it independence (*ibid.* xviii, 2, 1); although, according to the statement of Justus, the son of Pistus, he still maintained the superiority of his newly founded city, Tiberias; and it was not until Nero had assigned Tiberias to Agrippa the Younger that Sepphoris established its supremacy and became the royal residence and depository of the archives. It is termed the strongest city of Galilee, and was early taken by Gallus, the general of Cestius (*War*, ii, 18, 11). It maintained its allegiance to the Romans after the general revolt of Galilee (*ibid.* iii, 2, 4; 4, 1), but did not break with the Jewish leaders (*Life*, 8, 9). Its early importance as a Jewish town, attested by the fact that it was one of the five cities in which district sanhedrim were instituted by Gabinus (*War*, i, 8, 5), was further confirmed by the destruction of Jerusalem, after which catastrophe it became for some years the seat of the Great Sanhedrim, until it was transferred to Tiberias (Robinson, *Bib. Res.* iii, 202). It was subsequently called *Diocæsarea*, which is its more common appellation in the ecclesiastical annals; while Epiphanius and Jerome recognise both names. A revolt of the Jewish inhabitants in the reign of Constantius (A.D. 339) led to the destruction of the city by Constantius (Gallus Cæsar (Socrates, *H. E.* ii, 33; Sozomen, *H. E.* iv, 7). This town, once the most considerable city of Galilee, was situated, according to Jerome, ten miles west of Mount Tabor (*Onomast.* s. v. Θαβώρ; Procopius Gazæus, *Comment. in Lib. Judicium*). It was much celebrated in the history of the Crusaders for its fountain, a favorite camping-place of the Christians. It is still represented by a poor village bearing the name *Seffurieh*, distant about five miles to the north of Nazareth, retaining no vestiges of its former greatness, but conspicuous with a ruined tower and church, both of the

Middle Ages; the latter professing to mark the site of the birthplace of the Virgin Mary, assigned by a late tradition to this locality. It became the see of a suffragan bishop under the metropolitan of Scythopolis (Le Quien, *Oriens Christianus*, iii, 713, 714), and there are coins still extant of the reigns of Domitian, Trajan, etc. (Reland, *Palestina*, p. 199–1003; Eckhel, *Doct. Vet. Num.* iii, 425, 426).—Smith, *Dict. of Class. Geog.* s. v. A recent German writer (Lebrecht, in his pamphlet on the subject [Berlin, 1877]) maintains that this was the site of the *Bether* (q. v.) of the Talmud.

Sept. See SEPTUM.

Septfoil (*seven-leaf*), an architectural ornament which has seven cusps or points.

Septimāna in Albis (*sevenfold in white*) is the name frequently given to the first week in Whitsuntide with reference to the state of the newly baptized, who wore their white robes of baptism during that time. See ALB.

Septimontium, a Roman festival which was held in the month of December, and lasted only for a single day. The day of the Septimontium was a *dies feriatius* for the Montani, or the inhabitants of the seven ancient hills, who offered sacrifices to the gods in their several districts. They were believed to have been instituted to commemorate the enclosure of the seven hills of Rome within the walls of the city. See ROME.

Septuagesima (*seventieth*), the third Sunday before Lent. The reason of its application to the day is uncertain. Some liturgical writers—e. g. Pamelius—trace it to the association of the ancient monastic Lent of seventy days with the seventy years' captivity of Israel in Babylon. The following is more probable: There being exactly fifty days between the Sunday next before Lent and Easter-day inclusive, that Sunday is termed *Quinquagesima*, i. e. the fiftieth; and the two immediately preceding Sundays are called from the next round numbers *Sexagesima*, the sixtieth, and *Septuagesima*, the seventieth. The observation of these days and the weeks following appears to be as ancient as the time of Gregory the Great. Some of the more devout Christians observed the whole time from the first of these Sundays to Easter as a season of humiliation and fasting, though the ordinary custom was to commence fasting on Ash-Wednesday. See EDEN, *Dict. of the Church*, s. v.; BLUNT, *Dict. of Theology*, s. v.

Séptuagint is the common title of the earliest and most important version of the Old Testament, namely, into Greek, and is generally held to have derived its title (*seventy*) from the traditionary number of its translators (see below), rather than (as Eichhorn thought) from the authority of the Alexandrian Sanhedrim as consisting of seventy members. In the following account we shall endeavor to sift the truth out of the traditions on this subject. See GREEK VERSIONS.

I. Origin of the Version.—This is as great a riddle as the sources of the Nile. The causes which produced the translation, the number and names of the translators, the times at which different portions were translated, are all uncertain.

1. *Ancient Testimony on the Subject.*—(1.) The oldest writer who makes mention of the Septuagint is Aristobulus, an author referred to by Eusebius (*Prepar. Evangel.* xiii, 12) and Clement of Alexandria (*Stromata*, v, 595). According to Eusebius, he was a Jew, who united the Aristotelian with the Jewish philosophy, and composed a commentary on the law of Moses, dedicated to Ptolemy Philometor. He is also mentioned in 2 Macc. i, 10. Both Clement and Eusebius make him contemporary with Philometor (2d century B.C.), for the passages in their writings, in which they speak of him under Philadelphus must either have been corrupted by ignorant transcribers or have been so written by mis-

take (Valckenaer, § 10, 11; Dähne, p. 81 sq.). His words relative to the Septuagint are these:

"It is manifest that Plato has followed our law, and studied diligently all its particulars; for before Demetrius Phalereus a translation had been made by others of the history of the Hebrews' going-forth out of Egypt, and of all that happened to them, and of the conquest of the land, and of the exposition of the whole law. Hence it is manifest that the aforesaid philosopher borrowed many things, for he was very learned, as was Pythagoras, who also transferred many of our doctrines into his system. But the entire translation of our whole law (*ἡ δὲ ὅλη ἐρμηνεία τῶν διὰ τοῦ νόμου πάντων*) was made in the time of the king named Philadelphus, a man of greater zeal, under the direction of Demetrius Phalereus."

The entire passage has occasioned much conjecture and discussion. It is given by Valckenaer (*Diatribē*, etc.), Thiersch (*De Versione Alexandrina*), and Frankel (*Vorstudien*, etc.). It appears that the words of Aristobulus do not speak of any *prior Greek translation*, as Hody supposes, or indeed of any translation whatever. They rather refer to some brief extracts relative to Jewish history, which had been made from the Pentateuch into a language commonly understood by the Jews in Egypt, before the time of Demetrius. The *entire law* was first rendered into Greek under Philadelphus. Hody, and after him Eichhorn, conjectured that the fragments of Aristobulus preserved by Eusebius and Clement were written in the 2d century by another Aristobulus, a Christian, and that Aristobulus, the professed Peripatetic, was a heathen. But the quotation of Cyril of Alexandria (*Contra Julianum*, lib. vi), to which they appeal, was erroneously made by that father, as may be seen by comparing it with Clement. Richard Simon also denied the authenticity of Aristobulus's remains (*Histoire Critique du V. T.* p. 189). But Valckenaer has sufficiently established their authenticity. The testimony of Aristobulus is corroborated by a Latin scholion recently found in a MS. of Plautus at Rome, which has been described and illustrated by Ritschl in a little book entitled *Die alexandrinischen Bibliotheken*, etc. (Berlin, 1838). From the passage of Aristobulus already quoted, it appears that in the time of Aristobulus, i. e. the beginning of the 2d century B.C., this version was considered to have been made when Demetrius Phalereus lived, or in the reign of Ptolemy Soter. Hody, indeed, has endeavored to show that this account contradicts the voice of certain history, because it places Demetrius in the reign of Philadelphus. But the version may have been begun under Soter and completed under Philadelphus, his successor. In this way may be reconciled the discordant notices of the time when it originated; for it is well known that the Palestinian account, followed by various fathers of the Church, asserts that Ptolemy Soter carried the work into execution, while according to Aristeas, Philo, Josephus, etc., his son Philadelphus was the person. Hody harmonizes the discrepancy by placing the translation of the Pentateuch in the two years during which father and son reigned conjointly (B.C. 286 and 285). The object of Demetrius in advising Soter to have in his library a copy of the Jewish laws in Greek is not stated by Aristobulus, but Aristeas relates that the librarian represented it to the king as a desirable thing that such a book should be deposited in the Alexandrian library. Some think that a *literary* rather than a *religious* motive led to the version. So Hävernick. This, however, may be reasonably doubted. Hody, Sturz, Frankel, and others conjecture that the object was *religious or ecclesiastical*. Eichhorn refers it to *private impulse*; while Hug takes the object to have been *political*. It is not probable, however, that the version was intended for the king's use, or that he wished to obtain from it information respecting the best mode of governing a nation and enacting laws for its economic well-being. The character and language of the version unite to show that an Egyptian king, probably ignorant of Greek, could not have understood the work. Perhaps an *ecclesiastical* motive prompted

the Jews who were originally interested in it, while Demetrius Phalereus and the king may have been actuated by some other design.

It is difficult, if not impossible, to ascertain whether Aristobulus's words imply that *all* the books of the Old Test. were translated into Greek under Philadelphus, or simply the Pentateuch. Hody contends that *νόμος*, the term used by Aristobulus, meant at that time the Mosaic books alone, although it was afterwards taken in a wider sense so as to embrace all the Old Test. Valckenaer thinks that *all* the books were comprehended under it. It is certainly more natural to restrict it to the Pentateuch. The Pentateuch, therefore, was completed under Philadelphus.

(2.) The next historical testimony regarding the Septuagint is the prologue of Jesus the son of Sirach, a document containing the judgment of a Palestinian Jew concerning the version before us. His words are these: "And not only these things, but the law itself, and the prophets, and the rest of the books, have no small difference when they are spoken in their own language." Frankel has endeavored to throw suspicion on this passage, as if it were unauthentic, but his reasons are extremely slender (p. 21, note w). It appears from it that the law, the prophets, and the other books had been translated into Greek in the time of the son of Sirach, i. e. that of Ptolemy Physcon, B.C. 180.

(3.) The account given by Aristeas comes next before us (see Rosenmüller, *Hundb. d. Lit. d. bibl. Kritik u. Exeg.* ii, 413 sq.). This writer pretends to be a Gentile, and a favorite at the court of Ptolemy Philadelphus, king of Egypt. In a letter addressed to his brother Philocrates, he relates that Philadelphus, when forming a library at great expense, was advised by Demetrius Phalereus to apply to the Jewish high-priest Eleazar for a copy of the book containing the Jewish laws. Having previously purchased the freedom of more than a hundred thousand captive Jews in Egypt, the king sent Aristeas and Andreas to Jerusalem with a letter requesting of Eleazar seventy-two persons as interpreters, six out of each tribe. They were despatched accordingly with a magnificent copy of the law, and were received and entertained by the king for several days with great respect and liberality. Demetrius led them to an island, probably Pharos, where they lodged together. The translation was finished in seventy-two days, having been written down by Demetrius piece by piece, as agreed upon after mutual consultation. It was then publicly read by Demetrius to a number of Jews whom he had summoned together. They approved of it, and imprecations were uttered against any one who should presume to alter it. The Jews requested permission to take copies of it for their use, and it was carefully preserved by command of the king. The interpreters were sent home loaded with presents.

The work of Aristeas, which was first published in the original Greek by Simon Schard (Basel, 1561, 8vo), and several times reprinted, was also given by Hody in Greek and Latin, in his book entitled *De Bibliorum Textibus Originalibus, Versionibus Græcis, et Latina Vulgata* (Oxon. 1705, fol.). The most accurate edition, however, is that by Galland, in the *Bibliotheca Vet. Patrum*, vol. ii. It was translated into English by Whiston, and published at London in 1727, 8vo. See also Aristeas, *Hist. LXXII Int. ex Rec. Eld. de Parchum* (Francf. 1610; Oxon. 1692).

(4.) In all discussions relative to the name of *Septuagint*, so universally appropriated to the Greek version of Alexandria, the scholion discovered by Osann and published by Ritschl ought to be considered. The origin of this Latin scholion is curious. The substance of it is stated to have been extracted from Callimachus and Eratosthenes, the Alexandrian librarians, by Tzetzes, and from his *Greek* note an Italian of the 15th century has formed the Latin scholion in question. The writer has been speaking of the collecting of ancient Greek poems carried on at Alexandria under Ptolemy

Philadelphus, and then he thus continues: "Nam rex ille philosophis affectissimus [corr. "differtissimus," Ritschl; "affectissimus," Thiersch] et cæteris omnibus auctoribus claris, disquisitis impensa regie munificentie ubique terrarum quantum valuit voluminibus opera Demetrii Phaleri phzsa senum duas bibliothecas fecit, alteram extra regiam alteram autem in regia." The scholion then goes on to speak of books in many languages: "Quæ summa diligentia rex ille in suam linguam fecit ab optimis interpretibus converti" (see Thiersch, *De Pentateuchi Versione Alexandrina* [Erlang. 1841], p. 8, 9). Bernhardt reads instead of "phzsa senum," "et lxx senum," and this correction is agreed to by Thiersch, as it well may be: some correction is manifestly needed, and this appears to be right. This gives us *seventy elders* associated in the formation of the library. The testimony comes to us from Alexandrian authority; and this, if true (or even if believed to be true), would connect the *Septuagint* with the library—a designation which might most easily be applied to a version of the Scriptures there deposited; and, let the translation be once known by such a name, then nothing would be more probable than that the designation should be applied to the *translators*. This may be regarded as the first step in the formation of the fables. Let the *Septuagint* be first known as applying to the associates in the collection of the library, then to the library itself, and then to that particular book in the library which to so many had a far greater value than all its other contents. Whether more than the Pentateuch was thus translated and then deposited in the royal library is a separate question.

2. *Confirmation by Later Authorities.*—(1.) Of Jewish writers, Josephus (*Ant.* xii, 2) agrees in the main with Aristæus; but Philo's account (*De Vita Mosie*, lib. ii) differs in a number of circumstances.

(2.) Among the Greek Church fathers Irenæus (lib. iii, c. 24) relates that Ptolemy Lagi, wishing to adorn his Alexandrian library with the writings of all nations, requested from the Jews of Jerusalem a Greek version of their Scriptures; that they sent seventy elders well skilled in the Scriptures and in later languages; that the king separated them from one another and bade them all translate the several books. When they came together before Ptolemy and showed their versions, God was glorified, for they all agreed exactly, from beginning to end, in every phrase and word, so that all men may know that the Scriptures are translated by the inspiration of God.

Justin Martyr (*Cohort. ad Græcos*, p. 34) gives the same account, and adds that he was taken to see the cells in which the interpreters worked.

Epiphanius says that the translators were divided into pairs, in thirty-six cells, each pair being provided with two scribes; and that thirty-six versions agreeing in every point were produced, by the gift of the Holy Spirit (*De Pond. et Mens.* c. iii-vi).

(3.) Among the Latin fathers Augustine adheres to the inspiration of the translators—"Non autem secundum LXX interpretes, qui etiam ipsi divino Spiritu interpretati, hoc aliter videntur nonnulla dixisse, ut ad spirituale sensum scrutandum magis admoneretur lectoris intentio" (*De Doctr. Christ.* iv, 15).

But Jerome boldly throws aside the whole story of the cells and the inspiration—"Et nescio quis primus auctor Septuaginta cellulas Alexandriæ mendacio suo extruxerit, quibus divisi eadem scripturarent, cum Aristæus ejusdem Ptolemæi ὑπερασπιστής, et multo post tempore Josephus, nihil tale retulerint: sed in una basilicâ congregatos, contulisse scribant, non prophetasse. Aliud est enim vatem, aliud esse interpretem. Ibi Spiritus ventura prædicit; hic eruditio et verborum copia ea quæ intelligit transfert" (*Præf. ad Pent.*).

3. *Modern Opinions.*—(1.) Until the latter half of the 17th century the origin of the Sept. as given by Aristæus was firmly believed; while the numerous additions that had been made to the original story in the prog-

ress of centuries were unhesitatingly received as equally genuine. The story was first reckoned improbable by L. Vives (in a note to Augustine's *De Civitate Dei*); then Scaliger asserted that it was written by a Jew; and Richard Simon was too acute a critic not to perceive the truth of Scaliger's assertion. Hody was the first who demonstrated with great learning, skill, and discrimination that the narrative could not be authentic (*De Bibl. Text. Orig. Vers. Græc. et Lat. Vulg.* [Oxford, 1705] lib. iv). It is now universally pronounced fabulous.

(2.) But the Pseudo-Aristæas had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the version itself: (a.) The version was made at Alexandria. (b.) It was begun in the time of the earlier Ptolemies, about B.C. 280. (c.) The law (i. e. the Pentateuch) alone was translated at first. It is also very possible that there is some truth in the statement that a copy was placed in the royal library. (The emperor Akbar caused the New Test. to be translated into Persian.)

(3.) But by whom was the version made? As Hody justly remarks, "It is of little moment whether it was made at the command of the king or spontaneously by the Jews; but it is a question of great importance whether the Hebrew copy of the law and the interpreters (as Pseudo-Aristæas and his followers relate) were summoned from Jerusalem and sent by the high-priest to Alexandria." On this question no testimony can be so conclusive as the evidence of the version itself, which bears upon its face the marks of imperfect knowledge of Hebrew, and exhibits the forms and phrases of the Macedonic Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. The forms ἡλθοσαν, παρενβάλοσαν, betray the fellow-citizens of Lycophron, the Alexandrian poet, who closes his iambic line with *κάπο γῆς ἰσχυάσαν*. Hody (II, iv) gives several examples of Egyptian renderings of names and coins and measures; among them the hippodrome of Alexandria for the Hebrew *Cibrah* (Gen. xlviii, 7), and the papyrus of the Nile for the rush of Job (viii, 11). The reader of the Sept. will readily agree with his conclusion, "Sive regis jussu, sive sponte a Judeis, a Judæis Alexandrinis fuisse factam." The question as to the moving cause which gave birth to the version is one which cannot be so decisively answered either by internal evidence or by historical testimony. The balance of probability must be struck between the tradition, so widely and permanently prevalent, of the king's intervention, and the simpler account suggested by the facts of history and the phenomena of the version itself. It is well known that after the Jews returned from the captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the books of Moses in the synagogues of Palestine were explained to them in the Chaldaic tongue in Targums or paraphrases; and the same was done with the books of the prophets when, at a later time, they also were read in the synagogues. The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek. They had settled in Alexandria in large numbers soon after the time of Alexander and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the law first, and afterwards the prophets, would be explained in Greek, and from this practice would arise in time an entire Greek version. All the phenomena of the version seem to confirm this view; the Pentateuch is the best part of the version; the other books are more defective, betraying probably the increasing degeneracy of the Hebrew MSS. and the decay of Hebrew learning with the lapse of time.

(4.) Nevertheless, the opinion that the Pentateuch was translated a considerable time before the prophets is not warranted by the language of Justin, Clement of

Alexandria, Tertullian, Epiphanius, and Hilary of Poitiers; although we are aware that Aristaeas, Josephus, Philo, the Talmudists, and Jerome mention the *law only* as having been interpreted by the seventy-two. Hody thinks that the Jews first resorted to the reading of the prophets in their synagogues when Antiochus Epiphanes forbade the use of the law, and therefore that the prophetic portion was not translated till after the commencement of Philometor's reign. It is wholly improbable, however, that Antiochus interdicted the Jews merely from reading the Pentateuch (comp. 1 Macc. i, 41, etc.; and Josephus, *Ant.* xii, 5; Frankel, p. 48, 49). The interval between the translating of the law and the prophets, of which many speak, was probably very short. Hody's proof that the book of Joshua was not translated till upwards of twenty years after the death of Ptolemy Lagi, founded upon the word *γαιός*, is perfectly nugatory, although the time assigned cannot be far from the truth. The epilogue to the book of Esther does *not* state that this part of the Old Test. was translated under Ptolemy Philometor or that it was dedicated to him. On the contrary it refers to a certain epistle containing apocryphal additions to the canonical book of Esther (Valckenaer, p. 33, 63). It is a fruitless task to attempt to ascertain the precise times at which separate portions of the version were made. All that can be known with any degree of probability is that it was begun under Lagi and finished before the thirty-eighth year of Ptolemy Physcon.

It is obvious from internal evidence that there were several translators, but certainly not seventy-two. Hody has endeavored to parcel out their version into small portions, assigning each part to a separate person, and affirming that they were put together in one cento without revision; but his notions of rigid uniformity in the translators are such as exclude perspicuity, freedom, variety, and elegance. There is no ground for believing that the Pentateuch proceeded from more than one interpreter, who was unquestionably the most skilful of all. The entire work was made by five or six individuals at least, and must, consequently, be of unequal value. Comp. Amersfoort, *De Variis Lectio. Holmes. Loc. quorund. Pent. Mos.* (Lugd. 1815); Thiersch, *De Pent. Vers. Al. Libri III* (Erlang. 1841); Frankel, *Ueber d. Einfluss d. palest. Exeg. auf d. alex. Hermen.* (Leips. 1851); Rosenmüller, *op. cit.* p. 435 sq.

(5.) In opposition to the Pseudo-Aristaeas, we cannot but maintain that the translators were *Alexandrian*, not *Palestinian*, Jews. The internal character of the entire version, particularly of the Pentateuch, sufficiently attests the fact. We find, accordingly, that proper names and terms peculiar to Egypt are rendered in such a manner as must have been unintelligible to a Greek-speaking population other than the Egyptian Jews. That the translators were Egyptians has been proved, to the satisfaction of all, by Hody; although some of his examples are not appropriate or conclusive. Frankel supposes that the version was made not only at different times, but at *different places*. This is quite arbitrary. There is no reason for believing with him that different books originated after this fashion, the impulse having gone forth from Alexandria and spreading to localities where the Jews had settled, especially Cyrene, Leontopolis, and even Asia Minor.

(6.) The division into verses and chapters is much later than the age of the translators. Our present editions have been printed in conformity with the division into chapters made in the 12th century, though they are not uniform in this particular. Still, however, many MSS. have separations in the text. The Alexandrine Codex is said by Grabe to have 140 divisions, or, as they may be called, *chapters*, in the book of Numbers alone (*Prol. egomena*, c. 1, § 7).

The titles given to the books, such as *Γένεσις*, etc., could hardly have been affixed by the translators, since often they do not harmonize with the version of the book itself to which they belong.

II. *Textual Basis of the Version.*—1. It has been inquired whether the translator of the Pentateuch followed a Hebrew or a Samaritan codex. The Sept. and Samaritan harmonize in more than a thousand places, where they differ from the Hebrew. Hence it has been supposed that the Samaritan edition was the basis of the version. Various considerations have been adduced in favor of this opinion; and the names of De Dieu, Selden, Whiston, Hottinger, Hassencamp, and Eichhorn are enlisted on its behalf. But the irreconcilable enmity subsisting between the Jews and the Samaritans, both in Egypt and Palestine, effectually militates against it. Besides, in the prophets and Hagiographa, the number of variations from the Masoretic text is even greater and more remarkable than those in the Pentateuch; whereas the Samaritan extends no further than the Mosaic books. No solution, therefore, can be satisfactory which will not serve to explain at once the cause or causes both of the differences between the Seventy and the Hebrew in the Pentateuch, and those found in the remaining books. The problem can be fully solved only by such a hypothesis as will throw light on the remarkable form of the Sept. in Jeremiah and Esther, where it deviates most from the Masoretic MSS., presenting such transpositions and interpolations as excite the surprise of the most superficial reader. The above solution of the question must be rejected not only for the reasons assigned, but also for the following. (1.) It must be taken into account that if the discrepancies of the Samaritan and Jewish copies be estimated numerically, the Sept. will be found to agree far more frequently with the latter than the former. (2.) In the cases of considerable and marked passages occurring in the Samaritan which are not in the Jewish, the Sept. does not contain them. (3.) In the passages in which slight variations are found, both in the Samaritan and Sept., from the Jewish text, they often differ among themselves, and the amplification of the Sept. is less than that of the Samaritan. (4.) Some of the small amplifications in which the Samaritan seems to accord with the Sept. are in such incorrect and non-idiomatic Hebrew that it is suggested that these must be *translations*, and, if so, probably from the Sept. (5.) The amplifications of the Sept. and Samaritan often resemble each other greatly in character, as if similar false criticism had been applied to the text in each case. But as, in spite of all similarities such as these, the Pentateuch of the Sept. is more Jewish than Samaritan, we need not adopt the notion of translation from a Samaritan codex, which would involve the subject in greater difficulties, and leave more points to be explained. (On some of the supposed agreements of the Sept. with the Samaritan, see bishop Fitzgerald in *Kitto's Journal of Sacred Literature*, Oct. 1848, p. 324–332.)

Some suppose that the one was *interpolated* from the other—a conjecture not at all probable. Jahn and Bauer imagine that the Hebrew MS. used by the Egyptian Jews agreed much more closely with the Samaritan in the text and forms of its letters than the present Masoretic copies. This hypothesis, however, even if it were otherwise correct, would not account for the great harmony existing between the Samaritan and Sept.

Another hypothesis has been put forth by Gesenius (*Commentatio de Pent. Samar. Orig. Indole, et Auctor.*), viz. that both the Samaritan and Sept. flowed from a common recension (*ἐκδόσις*) of the Hebrew Scriptures, one older than either, and different in many places from the recension of the Masoretes now in common use. "This supposition," says Prof. Stuart, by whom it is adopted, "will account for the differences and for the agreements of the Sept. and Samaritan." The following objections have been made to this ingenious and plausible hypothesis. (a.) It assumes that before the whole of the Old Test. was written there had been a recension or revision of several books. But there is no record or tradition in favor of the idea that *inspired*

men applied a correcting hand in this manner till the close of the canon. To say that *others* did so is not in unison with right notions of the inspiration of Scripture, unless it be equally affirmed that they *corrupted*, under the idea of *correcting*, the holy books. (b.) This hypothesis implies that a recension took place at a period comparatively early, before any books had been written except the Pentateuch, Joshua, Judges, and the writings of David and Solomon. If it be improbable that a revised edition was made before the completion of the canon, it is much more improbable that it was undertaken when few books were written. (c.) It supposes that an older recension was still current after Ezra had revised the whole collection and closed the canon. In making the Sept. version, it is very improbable that the Jews, who were the translators, followed a recension far inferior in their estimation to the copy of the sacred books corrected by Ezra. This objection rests on the assumption that Ezra completed the canon of the Old Test., having been prompted, as well as inspired, to arrange and revise the books of Scripture. Such is the Jewish tradition; and although a majority of the German critics disallow its truth, yet it is held by very able and accomplished men.

Prof. Lee (*Prolegomena to Bagster's Polyglot*) accounts for the agreement between the Sept. and Samaritan in another way. He conjectures that the early Christians interspersed their copies with Samaritan glosses, which ignorant transcribers afterwards inserted in the text. But he has not shown that Christians in general were acquainted with the Samaritan Pentateuch and its additions to the Hebrew copy; neither has he taken into account the reverence entertained by the early Christians for the sacred books. We cannot, therefore, attribute the least probability to this hypothesis.

Another hypothesis has been mentioned by Frankel, viz. that the Sept. flowed from a Chaldee version, which was used before and after the time of Ezra—a version inexact and paraphrastic, which had undergone many alterations and corruptions. This was first proposed by R. Asaria di Rossi, in the midst of other conjectures. Frankel admits that the assumption of such a version is superfluous, except in relation to the Samaritan Pentateuch, where much is gained by it. This Chaldee version circulated in various transcripts here and there; and as the same care was not applied in preserving its integrity as was exercised with respect to the original Hebrew, the copies of it presented considerable differences among themselves. Both the Greek version and the Samaritan Pentateuch were taken from it. Frankel concedes that this hypothesis is not satisfactory with regard to the Sept., because the mistakes found in that version must have frequently originated in misunderstanding the Hebrew text. There is no evidence, however, that any Targum or Chaldee version had been made before Ezra's time, or soon after. Explanations of the lessons publicly read by the Jews were given in Chaldee, not regularly perhaps, or uniformly; but it can scarcely be assumed that a Chaldee version had been made out in writing, and circulated in different copies. Glosses, or short expositions of words and sentences, were furnished by the public readers for the benefit of the people; and it is by no means improbable that several of these traditional comments were incorporated with the version by the Jewish translators, to whom they were familiar.

In short, no hypothesis yet proposed commends itself to general reception, although the *Vorstudien* of Frankel have probably opened up the way towards a correct solution. The great source from which the striking peculiarities in the Sept. and the Samaritan flowed appears to us to have been early traditional interpretations current among the Jews, *targums*, or *paraphrases*—not written, perhaps, but orally circulated. Such glossarial versions, which must have circulated chiefly in Palestine, require to be traced back to an early epoch—to the period of the second Temple. They existed, in substance

at least, in ancient times, at once indicating and modifying the Jewish mode of interpretation. The Alexandrian mode of interpretation stood in close connection with the Palestinian; for the Jews of Egypt looked upon Jerusalem as their chief city, and the Sanhedrim of Jerusalem as their ecclesiastical rulers. If, therefore, we can ascertain the traditional paraphrases of the one, those of the other must have been substantially the same (see Gieseler's *Eccles. Hist.*, transl. by Cunningham, i, 30).

Tychsen (*Tentamen de Variis Codd. Heb. V. T. MSS. Gener.*) thought that the Sept. was made from the Hebrew transcribed into Hebrew-Greek characters. It is almost unnecessary to refer to such a notion. It never obtained general currency, having been examined and refuted by Dathe, Michaelis, and Hassencamp.

2. *Evidence as to the Verbal Condition of the Original.*—Here we naturally inquire as to two obvious points:

(1.) Was the version made from Hebrew MSS. with the vowel-points now used? A few examples will indicate the answer.

A. PROPER NAMES.

Hebrew.	Septuagint.
Exod. vi, 17, לִבְנִי, Libni.	Λοβεῖ.
vi, 19, מַחֲלִי, Machli.	Μοολεί.
xiii, 20, אֶתְחָם, Etham.	Ὀθᾶμ.
Deut. iii, 10, סַלְחָה, Salchah.	Ἑλχᾶ.
iv, 48, בֶּזֶר, Bezer.	Βοσόρ.
xxxiv, 1, פִּסְגָּה, Pisgah.	Φασγά.

B. OTHER WORDS.

Hebrew.	Septuagint.
Gen. i, 9, בָּקִים, place.	συναγωγή (ἡ) (בָּקִים).
xv, 11, וַיִּשְׁבּוּ אֹתָם, and he drove them away.	καὶ συνεκάτισεν αὐτοῖς (וַיִּשְׁבּוּ אֹתָם).
Exod. xii, 17, וַיִּשְׁבּוּ אֹתָם, unleavened bread.	τὴν ἐντολὴν ταύτην (וַיִּשְׁבּוּ אֹתָם).
Numb. xvi, 5, בֹּקֶר, in the morning.	ἐπέσκειται (בֹּקֶר).
Deut. xv, 18, מִשְׁנֵה, double.	ἐπέτειον (מִשְׁנֵה).
Isa. ix, 8, דְּבַר, a word.	ζῆνατον (דְּבַר).

Examples of these two kinds are innumerable. Plainly the Greek translators had not Hebrew MSS. pointed as at present. In many cases (e. g. Exod. ii, 25; Nahum iii, 8) the Sept. has possibly preserved the true pronunciation and sense where the Masoretic pointing has gone wrong.

(2.) Were the Hebrew words divided from one another, and were the final letters ך, ם, ן, ף, in use when the Sept. was made?—Take a few out of many examples:

Hebrew.	Septuagint.
(1) Deut. xxvi, 5, אֲרָמִי אֲבִיר, a perishing Syrian.	Συρίαν ἀπέβαλεν (אֲרָמִי אֲבִיר).
(2) 2 Kings ii, 14, אֲנִי־חַיָּה, he also.	ὁ φῶς [It joins the two words in one].
(3) 2 Kings xxii, 20, לָכֵן, therefore.	οὕχ οὕτως (לָכֵן).
(4) 1 Chron. xvi, 10, וְאָנֹכִי לָךְ, and I told thee.	καὶ αὐθίω σε (וְאָנֹכִי לָךְ).
(5) Hos. vi, 5, וַיִּשְׁפֹּךְ אֹרֶר, and thy judgments [are as] the light [that] goeth forth.	καὶ τὸ κρίμα μου ὡς φῶς ἐξελεύσεται. The Sept. reads: (וַיִּשְׁפֹּךְ אֹרֶר).
(6) Zech. xi, 7, לָכֵן עֲנִיךָ הַצֹּאֵן, even you, O poor of the flock.	εἰς τὴν Χαναΐτιν [it joins the first two words].

Here we find three cases (2, 4, 6) where the Sept. reads as one word what makes two in the present Hebrew text; one case (3) where one Hebrew word is made into two by the Sept.; two cases (1, 5) where the Sept. trans-

fers a letter from the end of one word to the beginning of the next. By inspection of the Hebrew MSS. must have been written without intervals between the words, and that the present final forms were not then in use. In three of the above examples (4, 5, 6), the Sept. has perhaps preserved the true division and sense.

In the study of these minute particulars, which enable us to examine closely the work of the translators, great help is afforded by Cappelli *Critica Sacra*, and by the *Vorstudien* of Frankel, who has most diligently anatomized the text of the Sept. His projected work on the whole of the version has not been completed, but he has published a part of it in his treatise *Ueber den Einfluss der palästinischen Exegese auf die alexandrinische Hermeneutik*, in which he reviews minutely the Sept. version of the Pentateuch.

III. *Ecclesiastical Authority and Influence.*—The Sept. does not appear to have obtained general authority among the Jews so long as Hebrew was understood at Alexandria. It is remarkable that Aristobulus quotes the original, even where it departs from the text of the Sept. The version was indeed spread abroad in Egypt, Northern Africa, and Asia Minor. It seems to have been so highly esteemed by the Jews as to be publicly read in some of their synagogues. From the 146th Novella of Justinian, it would seem that some Jews wished the public interpreter, who read the lessons out of the law and the prophets in Hebrew, to give his explanations of them in Greek, while others desired to have them in Chaldee. The reader, therefore, employed this translation as explanatory of the sections recited in the original, yet, although they highly esteemed the Greek, they did not regard it as equal to the Hebrew. Even the Talmudists make honorable mention of its origin. It is true that the Talmud also speaks of it as an abomination to the Jews in Palestine; but this refers to the 2d century and the time following, not to the period immediately after the appearance of Christ. When controversies arose between Christians and Jews, and the former appealed with irresistible force of argument to this version, the latter denied that it agreed with the Hebrew original. Thus by degrees it became odious to the Jews—as much execrated as it had before been commended. They had recourse to the translation of Aquila, who is supposed to have undertaken a new work from the Hebrew, with the express object of supplanting the Sept. and favoring the sentiments of his brethren.

Among the Christians the ancient text, called *κοινή*, was current before the time of Origen. We find it quoted by the early Christian fathers—in Greek by Clemens Romanus, Justin Martyr, Irenæus; in Latin versions by Tertullian and Cyprian. We find it questioned as inaccurate by the Jews (Just. Martyr, *Apol.*), and provoking them to obtain a better version (hence the versions of Aquila, etc.). We find it quoted by Josephus and Philo; and thus we are brought to the time of the apostles and evangelists, whose writings are full of citations and references, and imbued with the phraseology of the Sept. From all this we are justified in the following conclusions on this head:

1. This version was highly esteemed by the Hellenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work (Philo, *De Vita Mosi*, lib. ii). The manner in which it is quoted by the writers of the New Test. proves that it had long been in general use. Wherever, by the conquests of Alexander or by colonization, the Greek language prevailed; wherever Jews were settled, and the attention of the neighboring Gentiles was drawn to their wondrous history and law, there was found the Sept., which thus became, by Divine Providence, the means of spreading widely the knowledge of the One True God and his promises of a Saviour to come throughout the nations; it was indeed *ostium gentibus ad Christum*. To the wide dispersion of this

version we may ascribe, in great measure, that general persuasion which prevailed over the whole East (*percrebuerat Oriente toto*) of the near approach of the Redeemer, and which led the magi to recognise the star that proclaimed the birth of the King of the Jews.

2. Not less wide was the influence of the Sept. in the spread of the Gospel. Many of those Jews who were assembled at Jerusalem on the day of Pentecost, from Asia Minor, from Africa, from Crete and Rome, used the Greek language; the testimonies to Christ from the law and the prophets came to them in the words of the Sept.; St. Stephen probably quoted from it in his address to the Jews; the Ethiopian eunuch was reading the Sept. version of Isaiah in his chariot (*ὡς πρόβατον ἐν ὄφει ἡχθῆν*); they who were scattered abroad went forth into many lands, speaking of Christ in Greek, and pointing to the things written of him in the Greek version of Moses and the prophets; from Antioch and Alexandria in the East to Rome and Massilia in the West, the voice of the Gospel sounded forth in Greek; Clemens of Rome, Ignatius at Antioch, Justin Martyr in Palestine, Irenæus at Lyons, and many more, taught and wrote in the words of the Greek Scriptures; and a still wider range was given to the Sept. by the Latin version (or versions) made from it for the use of the Latin churches in Italy and Africa; and in later times by the numerous other versions into the tongues of Egypt, Ethiopia, Armenia, Arabia, and Georgia. For a long period the Sept. was the Old Test. of the far larger part of the Christian Church (see the Hulsean Prize Essay, by W. R. Churton, *On the Influence of the Sept. on the Progress of Christianity* [Camb. 1861]; and an art. in the *Zeitschr. f. wissensch. Theol.* 1862, vol. iii).

A number of other versions have been founded on the Sept. 1. Various early Latin translations, the chief of which was the *Vetus Itala*; 2. The Coptic and Sahidic, belonging to the 1st and 2d centuries; 3. The Ethiopic, belonging to the 4th century; 4. The Armenian, of the 5th century; 5. The Georgian, of the 6th century; 6. Various Syriac versions, of the 6th and 8th centuries; 7. Some Arabic versions [see ARABIC VERSIONS]; 8. The Slavonic, belonging to the 9th century.

IV. *Liturgical Origin of Portions of the Version.*—This is a subject for inquiry which has received but little attention; not so much, probably, as its importance deserves. It was noticed by Tregelles many years ago that the headings of certain psalms in the Sept. coincide with the liturgical directions in the Jewish Prayer-book. The results were at a later period communicated in Kitto's *Journal of Sacred Literature*, April, 1852, p. 207–209. The results may be briefly stated: The 23d Psalm, Sept. (Heb. 24th), is headed in the Sept. *τῆς μᾶς σαββάτου*; so, too, in Heb. in De Sola's *Prayers of the Sephardim*, בְּיָמֵינוּ הַרְבֵּי: Psa. xlvii, Sept. (Heb. xlviii), *δευτέρα σαββάτου*, לְיָוֶם שֵׁנִי: Psa. xciii, Sept. (Heb. xciv), *τρίτη σαββάτου*, לְיָוֶם רִבְעִי: Psa. xcii, Sept. (Heb. xcii), *εἰς τὴν ἡμέραν τοῦ προσαββάτου*, לְיָוֶם שְׁשִׁי. There appear to be no Greek copies extant which contain similar headings for Psa. lxxxi and lxxx (Heb. lxxxii and lxxx), which the Jewish Prayer-book appropriates to the third and fifth days; but that such once existed in the case of the latter psalm seems to be shown from the Latin *Psalterium Vetus* having the prefixed *quinta sabbati*, לְיָוֶם הַחֲמִישִׁי. Delitzsch, in his *Commentary on the Psalms*, has recently pointed out that the notation of these psalms in the Sept. is in accordance with certain passages in the Talmud.

It is worthy of inquiry whether variations in other passages of the Sept. from the Hebrew text cannot at times be connected with liturgical use, and whether they do not originate in part from rubrical directions. It seems to be at least plain that the Psalms were translated from a copy prepared for synagogue worship.

V. *Character of the Version.*—Under this head we

have to consider several special questions relating to its internal character as a translation:

1. *Is the Sept. Faithful in Substance?*—Here we cannot answer by citing a few examples; the question refers to the general texture, and any opinion we express must be verified by continuous reading. For a purely philological examination, see SEPTUAGINT, LINGUISTIC CHARACTER OF.

(1.) It has been clearly shown by Hody, Frankel, and others that the several books were translated by different persons, without any comprehensive revision to harmonize the several parts. Names and words are rendered differently in different books; e. g.

Πᾶσχα, the Passover, in the Pentateuch is rendered πᾶσχα; in 2 Chron. xxxv, 6, φασέκ.

ὁ ἄγγελος, *Urim*, Exod. xxviii, 26, δόλωσις; Dent. xxxiii, 8, δῆλοι; Ezra ii, 63, φωτίζοντες; Neh. vii, 65, φωτισάν.

Θυμὴν, *Thumimim*, Exod. xxviii, 26, ἀλήθεια; Ezra ii, 63, τέλειον.

The Philistines in the Pentateuch and Joshua are φυλιστιμῖν; in the other books ἀλλόφυλοι.

The books of Judges, Ruth, Samuel, and Kings are distinguished by the use of ἐγὼ εἰμι instead of ἐγώ.

These are a few out of many like variations.

(2.) Thus the character of the version varies much in the several books; those of the Pentateuch are the best, as Jerome says ("Confitetur plus quam cæteris cum Hebraicis consonare"), and this agrees well with the external evidence that the law was translated first, when Hebrew MSS. were more correct and Hebrew better known. Perhaps the simplicity of the style in these early books facilitated the fidelity of the version.

(3.) The poetical parts are, generally speaking, inferior to the historical, the original abounding with rarer words and expressions. In these parts the reader of the Sept. must be continually on the watch lest an imperfect rendering of a difficult word mar the whole sentence. The Psalms and Proverbs are perhaps the best.

(4.) In the major prophets some of the most important prophecies are sadly obscured—e. g. Isa. ix, 1, τοῦτο πρῶτον πῖε ταχύ ποίει, χώρα Ζαβουλών, κ. τ. λ.; and in ix, 6, "Esaias nactus est interpretem sese indignum" (Zwingli); Jer. xxiii, 6, καὶ τοῦτο τὸ ὄνομα αὐτοῦ ὁ καλεῖται αὐτὸν Κύριος Ἰωσεδέκ ἐν τοῖς προφηταῖς.

Ezekiel and the minor prophets (speaking generally) seem to be better rendered. The Sept. version of Daniel was not used, that of Theodotion being substituted for it.

(5.) Supposing the numerous glosses and duplicate renderings which have evidently crept from the margin into the text to be removed (e. g. Isa. vii, 16; Hab. iii, 2; Joel i, 8)—for these are blemishes not of the version itself, but of the copies—and forming a rough estimate of what the Sept. was in its earliest state, we may perhaps say of it, in the words of the well-known simile, that it was, in many parts, "the wrong side of the Hebrew tapestry," exhibiting the general outlines of the pattern, but confused in the more delicate lines, and with many ends of threads visible; or, to use a more dignified illustration, the Sept. is the image of the original seen through a glass not adjusted to the proper focus—the larger features are shown, but the sharpness of definition is lost. On Judges, see Grabii *Ep. ad J. Millium qua Ostend. L. Judd. Gen. LXX Vers. eam esse quam MS. Alex. Exhibet*, etc. (Oxf. 1705); Ziegler, *Theol. Abhandl.* (Gött. 1791), vol. i. On Samuel and Kings, Thenius, *Kurzegef. exeg. Hdb. z. A. T.* iv, 24 sq.; ix, 13 sq. On Chronicles, Movers, *Krit. Unters.* (Bonn, 1834). On Esther, Fritsche's ed. (Zür. 1848). See *Jer. s. v. Jud. Alex. ac Relig. init. Græc., em. Notisque Crit. ill. G. L. Spohn* (Lips. 1794; 2d ed. 1824, by F. A. G. Spohn).

2. *Is the Version Minutely Accurate in Details?*—We have anticipated the answer to this question, but will give a few examples:

(1.) The same word in the same chapter is often rendered by differing words—Exod. xii, 13, פָּסַחְתִּי, "I will

pass over," Sept. σκεπάσω, but 23, פָּסַח, "will pass over," Sept. παρελεύσεται.

(2.) Differing words by the same word—Exod. xii, 23, פָּסַח, "pass through," and פָּסַח, "pass over," both by παρελεύσεται; Numb. xv, 4, 5, מִנְחָה, "offering," and מִנְחָה, "sacrifice," both by θυσία.

(3.) The divine names are frequently interchanged; Κύριος is put for יְהוָה, God, and Θεός for יְהוָה, Jehovah; and the two are often wrongly combined or wrongly separated.

(4.) Proper names are sometimes translated, sometimes not. In Gen. xxiii, by translating the name *Machpelah* (τὸ διπλοῦν), the version is made to speak first of the cave being in the field (ver. 9), and then of the field being in the cave (ver. 17), ὁ ἀγρός ἔφρων, ὃς ἦν ἐν τῇ διπλῇ σπηλαίῳ, the last word not warranted by the Hebrew. Zech. vi, 14 is a curious example of four names of persons being translated—e. g. תִּבְיָהּ, "to Tobijah," Sept. τοῖς χρησίμοις αὐτῆς; Pisgah in Deut. xxxiv, 1, is φασγά, but in Deut. iii, 27, τοῦ λελαξέμενον.

(5.) The translators are often misled by the similarity of Hebrew words—e. g. Numb. iii, 26, מִיתֵיָהוּ, "the cords of it," Sept. τὰ κατάλοιπα, and iv, 26, τὰ περισσά. In other places οἱ κάλοι, and Isa. liv, 2, τὰ σχοινίσματα, both rightly. Exod. iv, 31, הִשְׁמָעוּ, "they heard," Sept. ἐχάρη (הִשְׁמָעוּ); Numb. xvi, 15, "I have not taken one ass" (הִמְרִי), Sept. οὐκ ἐτιθύμημα (חִמְרִי) εἴληφα; Deut. xxxiii, 10, הִנֵּה אֲנִי, "he found him," Sept. ἀντάρκισεν αὐτόν; 1 Sam. xii, 2, שָׁבַי, "I am gray-headed," Sept. καθήσομαι (שָׁבַי); Gen. iii, 17, הָרַגְתִּיךָ, "for thy sake," Sept. ἐν τοῖς ἔργοις σου (רָגַלְתִּי).

In very similar cases the error may be thus traced to the similarity of some of the Hebrew letters, ד and ר, ח and ט, ו and י, etc.; in some it is difficult to see any connection between the original and the version—e. g. Deut. xxxii, 8, בְּנֵי יִשְׂרָאֵל, "the sons of Israel," Sept. ἀγγέλων Θεοῦ. Aquila and Symmachus, υἱὸν Ἰσραήλ.

Isa. xxi, 11, 12.

Watchman, what of the night?
Watchman, what of the night?
The watchman said,
The morning cometh, and also
the night:
If ye will inquire, inquire ye.
Return, come.

Septuagint.

Φυλάσσετε ἐπάλξεις;
Φυλάσσετε ἐπάλξεις;
Φυλάσσω τοπρῶι καὶ
τὴν νύκτα.
ἐὰν ζητῇ, ζητεῖ·
καὶ παρ' ἐμοὶ οἶκει.

(6.) Besides the above deviations and many like them, which are probably due to accidental causes—the change of a letter, or doubtful writing in the Hebrew—there are some passages which seem to exhibit a studied variation in the Sept. from the Hebrew, e. g. Gen. ii, 2, on the seventh (הַשְּׁבִיעִי) day God ended his work; Sept. συνετέλεσεν ὁ Θεός ἐν τῇ ἡμέρᾳ τῇ ἑκτῇ τὰ ἔργα αὐτοῦ. The addition in Exod. xii, 40, καὶ ἐν τῇ γῇ Χαναάν, appears to be of this kind, inserted to solve a difficulty.

Frequently the strong expressions of the Hebrew are softened down; where human parts are ascribed to God for hand the Sept. substitutes power; for mouth, word, etc. Exod. iv, 16, "Thou shalt be to him instead of God" (אַנְדְּלוֹהִי), Sept. σὺ δὲ αὐτῷ ἔσθ' ἡ τὰ πρὸς τὸν Θεόν (see Exod. iv, 15). These and many more savor of design rather than of accident or error.

The version is, therefore, not minutely accurate in details; and it may be laid down as a principle, *never to build any argument on words or phrases of the Sept. without comparing them with the Hebrew*. The Greek may be right; but very often its variations are wrong.

3. We shall now be prepared to weigh the tradition of the fathers, that the version was made by inspiration (κατ' ἐπίπνοιαν τοῦ Θεοῦ, Irenæus; "Divino Spiritu

interpretati," Augustine). Even Jerome himself seems to think that the Sept. may have sometimes added words to the original "ob Spiritus Sancti auctoritatem, licet in Hebraeis voluminibus non legatur" (*Præfat. in Paralip.* tom. i, col. 1419).

Let us try to form some conception of what is meant by the *inspiration of translators*. It cannot mean what Jerome here seems to allow, that the translators were divinely moved to add to the original, for this would be the *inspiration of prophets*, as he himself says in another passage (*Prolog. in Genesin*), "Aliud est enim vertere, aliud esse interpretem." Every such addition would be, in fact, a new revelation. Nor can it be, as some have thought, that the deviations of the Sept. from the original were divinely directed, whether in order to adapt the Scriptures to the mind of the heathen or for other purposes. This would be, *pro tanto*, a new revelation, and it is difficult to conceive of such a revelation; for, be it observed, the discrepancy between the Hebrew and Greek Scriptures would tend to separate the Jews of Palestine from those of Alexandria, and of other places where the Greek Scriptures were used; there would be two different copies of the same books dispersed throughout the world, each claiming divine authority; the appeal to Moses and the prophets would lose much of its force; the standard of divine truth would be rendered doubtful; the trumpet would give an uncertain sound. No! If there be such a thing as an *inspiration of translators*, it must be an effect of the Holy Spirit on their minds, enabling them to do their *work of translation* more perfectly than by their own abilities and acquirements; to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human infirmity and weariness; and so to produce a copy of the Scriptures, setting forth the Word of God and the history of his people, in its original truth and purity. This is the kind of inspiration claimed for the translators by Philo (*Vit. Mosie*, lib. ii): "We look upon the persons who made this version not merely as translators, but as persons chosen and set apart by divine appointment, to whom it was given to comprehend and express the sense and meaning of Moses in the fullest and clearest manner."

The reader will be able to judge from the foregoing examples whether the Sept. version satisfies this test. If it does, it will be found not only substantially faithful, but minutely accurate in details; it will enable us to correct the Hebrew in every place where an error has crept in; it will give evidence of that faculty of intuition in its highest form which enables our great critics to divine from the faulty text the true reading; it will be, in short, a republication of the original text, purified from the errors of human hands and eyes, stamped with fresh authority from heaven. This is a question to be decided by facts, by the phenomena of the version itself. We will simply declare our own conviction that, instead of such a divine republication of the original, we find a marked distinction between the original and the Sept.—a distinction which is well expressed in the words of Jerome (*Prolog. in Genesin*): "Ibi Spiritus ventura prædicit; hic eruditio et verborum copia ea quæ intelligit transfert." It will be remembered that this agrees with the ancient narrative of the version, known by the name of Aristæas, which represents the interpreters as meeting in one house, forming one council, conferring together, and agreeing on the sense (see Hody, lib. ii, c. vi).

There are some, perhaps, who will deem this estimate of the Sept. too low; who think that the use of this version in the New Test. stamps it with an authority above that of a mere translation. But as the apostles and evangelists do not invariably cite the Old Test. according to this version, we are left to judge by the light of facts and evidence. Students of Holy Scripture, as well as students of the natural world, should bear in mind the maxim of Bacon, "Sola spes est in verâ inductione."

IX.—M m

VI. *Benefits to be Derived from the Study of the Septuagint.*—After all the notices of imperfection above given, it may seem strange to say, but we believe it to be the truth, that the student of Scripture can scarcely read a chapter without some benefit, especially if he be a student of Hebrew, and able, even in a very humble way, to compare the version with the original.

1. We have seen above that the Sept. gives evidence of the character and condition of the Hebrew MSS. from which it was made with respect to vowel-points and the mode of writing. This evidence often renders very material help in the correction and establishment of the Hebrew text. Being made from MSS. far older than the Masoretic recension, the Sept. often indicates readings more ancient and more correct than those of our present Hebrew MSS. and editions, and often speaks decisively between the conflicting readings of the present MSS. The following are instances:

Psa. xxii, 17 (in the Sept. xxi, 16). The printed Hebrew text is כָּאֵרִי; but several MSS. have a verb in the third person plural, כָּאֵרִי, the Sept. steps in to decide the doubt, ὤρξαν χεῖράς μου καὶ πόδας μου, confirmed by Aquila, ὄρχυναν.

Psa. xvi, 10. The printed text is כִּסְרִירָה, in the plural; but near two hundred MSS. have the singular, כִּסְרִירָה, which is clearly confirmed by the evidence of the Sept., οὐδὲ δώσεις τὸν ὕπνόν σου ἰδεῖν διαφθοράν.

In passages like these, which touch on the cardinal truths of the Gospel, it is of great importance to have the testimony of an unsuspected witness in the Sept. long before the controversy between Christians and Jews.

In Hosea vi, 5, the context clearly requires that the first person should be maintained throughout the verse; the Sept. corrects the present Hebrew text, without a change except in the position of one letter, τὸ κρίμα μου ὡς φῶς ἐξελεύσεται, rendering unnecessary the addition of words in italics in our English version.

Other examples might be given, but we must content ourselves with one signal instance of a clause omitted in the Hebrew (probably by what is called ὁμοσιτέλετον) and preserved in the Sept. In Gen. iv, 8 is a passage which in the Hebrew and in our English version is evidently incomplete: "And Cain talked (וַיֹּאמֶר) with Abel his brother; and it came to pass when they were in the field," etc. Here the Hebrew word וַיֹּאמֶר is the word constantly used as the introduction to words spoken, "Cain said unto Abel;" but, as the text stands, there are no words spoken, and the following words "... when they were in the field" come in abruptly. The Sept. fills up the lacuna *Hebræorum codicum* (Pearson), καὶ εἶπε Κάιν πρὸς Ἀβὲλ τὸν ἀδελφὸν αὐτοῦ, διέλαθωμεν εἰς τὸ πεδῖον (= וַיֵּלְכוּ בַּמִּדְבָּר). The Samaritan Pentateuch and the Syriac version agree with the Sept., and the passage is thus cited by Clemens Romanus (*Ep.* i, 4). The Hebrew transcriber's eye was probably misled by the word וַיֹּאמֶר terminating both the clauses.

In all the foregoing cases we do not attribute any paramount authority to the Sept. on account of its superior antiquity to the extant Hebrew MSS., but we take it as an evidence of a more ancient Hebrew text, as an eye-witness of the texts, 280 or 180 years B.C. The decision as to any particular reading must be made by weighing this evidence, together with that of other ancient versions, with the arguments from the context, the rules of grammar, the genius of the language, and the comparison of parallel passages. Thus the Hebrew will sometimes correct the Greek, and sometimes the Greek the Hebrew; both liable to err through the infirmity of human eyes and hands, but each checking the other's errors.

2. The close connection between the Old and the New Test. makes the study of the Sept. extremely

valuable, and almost indispensable to the theological student. Pearson quotes from Irenæus and Jerome as to the citation of the words of prophecy from the Sept. The former, as Pearson observes, speaks too universally when he says that the apostles "prophetica omnia ita enuntiaverunt quemadmodum Seniorum interpretatio continet." But it was manifestly the chief storehouse from which they drew their proofs and precepts. Grinfield says that "the number of direct quotations from the Old Test. in the Gospels, Acts, and Epistles may be estimated at 350, of which not more than fifty materially differ from the Sept. But the indirect verbal allusions would swell the number to a far greater amount" (*Apol. for LXX*, p. 37). The comparison of the citations with the Sept. is much facilitated by Grinfield's *Editio Hellenistica* of the New Test., and by Gough's *New Test. Quotations*, in which the Hebrew and Greek passages of the Old Test. are placed side by side with the citations in the New. (On this subject see Hody, p. 248, 281; Kennicott, *Dissert. Gen.* § 84; Cappelli *Critica Sacra*, vol. ii.)

3. Further, the language of the Sept. is the mould in which the thoughts and expressions of the apostles and evangelists are cast. In this version Divine Truth has taken the Greek language as its shrine, and adapted it to the things of God. Here the peculiar idioms of the Hebrew are grafted upon the stock of the Greek tongue; words and phrases take a new sense. The terms of the Mosaic ritual in the Greek version are employed by the apostles to express the great truths of the Gospel, e. g. ἀρχιερεύς, θυσία, ὁσμή εὐωδίας. Hence the Sept. is a treasury of illustration for the Greek Testament. Many examples are given by Pearson (*Præf. ad LXX*), e. g. σάρξ, πνεῦμα, δακτύλος, φρόνημα τῆς σαρκός, "Frustra apud veteres Græcos quæras quid sit πιστεύειν τῷ Θεῷ, vel εἰς τὸν Θεόν, quid sit εἰς τὸν Κύριον, vel πρὸς τὸν Θεὸν πιστεῖν, quæ toties in Novo Fœdere inculcantur, et ex lectione Seniorum facile intelliguntur." Valckenaer also (*on Luke i*, 51) speaks strongly on this subject: "Græcum Novi Testamenti contextum rite intellecturo nihil est utilius, quam diligenter versasse Alexandrinam Antiqui Fœderis interpretationem, e qua una plus peti poterit auxilii, quam ex veteribus scriptoribus Græcis simul sumtis. Centena repertur in N. T. nusquam obvia in scriptis Græcorum veterum, sed frequentata in Alex^a. versione." E. g. the sense of τὸ πάσχα in Deut. xvi, 2, including the sacrifices of the Paschal week, throws light on the question as to the day on which our Lord kept his last Passover, arising out of the words in John xviii, 28, ἀλλ' ἵνα φάγωσι τὸ πάσχα.

4. The frequent citations of the Sept. by the Greek fathers, and of the Latin version of the Sept. by the fathers who wrote in Latin, form another strong reason for the study of the Sept. Pearson cites the appellation of *Scarabæus bonus* applied to Christ by Ambrose and Augustine, as explained by reference to the Sept. in Hab. ii, 11, κἀνθαρὸς ἐκ ζύλου.

5. On the value of the Sept. as a monument of the Greek language in one of its most curious phases, this is not the place to dwell. Our business is with the use of this version as it bears on the criticism and interpretation of the Bible; and we may safely urge the theological student who wishes to be "thoroughly furnished" to have always at his side the Sept. Let the Hebrew, if possible, be placed before him; and at his right, in the next place of honor, the Alexandrian version. The close and careful study of this version will be more profitable than the most learned inquiry into its origin; it will help him to a better knowledge both of the Old Test. and the New.

VII. *Objects to be Attained by the Critical Scholar.*—

1. Among these a question of much interest, suggested above, still waits for a solution. In many of the passages which show a *studied variation* from the Hebrew (some of which are above noted), the Sept. and the Sa-

maritan Pentateuch agree—e. g. Gen. ii, 2; Exod. xii, 40.

They also agree in many of the ages of the post-diluvian patriarchs, adding one hundred years to the age at which the first son of each was born, according to the Hebrew (see Cappelli *Critica Sacra*, III, xx, 7). See PATRIARCH.

They agree in the addition of the words διέλωμεν εἰς τὸ πεδῖον (Gen. iv, 8), which many have seen reason to think rightly added.

Various reasons have been conjectured for this agreement—translation into Greek from a Samaritan text, interpolation from the Samaritan into the Greek, or *vice versa*; but the question does not seem to have found a satisfactory answer (see § ii above).

2. For the critical scholar it would be a worthy object of pursuit to ascertain as nearly as possible the original text of the Sept. as it stood in the time of the apostles and Philo. If this could be accomplished with any tolerable completeness, it would possess a strong interest, as being the first repository of any writing into another tongue, and the first repository of divine truth to the great colony of Hellenistic Jews at Alexandria.

The critic would probably take as his basis the Roman edition from the *Codex Vaticanus* as representing most nearly the ancient (κοινὴ) texts. The collection of fragments of Origen's *Hexapla*, by Montfaucou and others, would help him to eliminate the additions which have been made to the Sept. from other sources, and to purge out the glosses and double renderings; the citations in the New Test. and in Philo, in the early Christian fathers, both Greek and Latin, would render assistance of the same kind; and perhaps the most effective aid of all would be found in the fragments of the old Latin version collected by Sabbatier in 3 vols. fol. (Rheims, 1748).

3. Another work of more practical and general interest still remains to be done, viz. to provide a Greek version, accurate and faithful to the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. Field's edition is as yet the best of this kind. It originated in the desire to supply the Greek Church with such a faithful copy of the Scriptures; but as the editor has followed the text of the Alexandrian MS., only correcting, by the help of other MSS., the evident errors of transcription (e. g. in Gen. xv, 15, correcting τραπεῖς in the Alexandrian MS. to ταφεῖς, the reading of the Complut. text), and as we have seen above that the Alexandrian text is far from being the nearest to the Hebrew, it is evident that a more faithful and complete copy of the Old Test. in Greek might yet be provided.

We may here remark, in conclusion, that such an edition might prepare the way for the correction of the blemishes which remain in our authorized English version. Embracing the results of the criticism of the last two hundred and fifty years, it might exhibit several passages in their original purity; and the corrections thus made, being approved by the judgment of the best scholars, would probably, after a time, find their way into the margin at least of our English Bibles.

One example only can be here given, in a passage which has caused no small perplexity and loads of commentary. Isa. ix, 3 is thus rendered in the Sept.: Τὸ πλεῖστον τοῦ λαοῦ, ὃ κατήγαγες ἐν εὐφροσύνῃ σου· καὶ εὐφρανθήσονται ἐνώπιόν σου, ὡς οἱ εὐφρανόμενοι ἐν ἀμύτῃ, καὶ ὃν πρόπον οἱ διαφρούμενοι σκέλα. It is easy to see how the faulty rendering of the first part of this has arisen from the similarity of the Hebrew letters פ and פ, 7 and 7, and from an ancient error in the Hebrew text. The following translation restores the whole passage to its original clearness and force:

It appears from these and other passages that Origen, finding great discordance in the several copies of the Sept., laid this version side by side with the other three translations, and, *taking their accordance with each other as the test of their agreement with the Hebrew*, marked the copy of the Sept. with an *obelos*, ÷, where he found superfluous words, and supplied the deficiencies of the Sept. by words taken from the other versions with an *asterisk*, *, prefixed. The additions to the Sept. were chiefly made from Theodotion (Jerome, *Prolog. in Genesin*, vol. i; see also *Præf. in Job*, p. 795). From Eusebius, as quoted below, we learn that this work of Origen was called *Τετραπλᾶ*, the *fourfold Bible*. The following specimen is given by Montfaucon:

Gen. i. 1.

ΑΚΤΑΔ.	ΣΥΜΜΑΧΟΣ.	ΟΙ Ο.	ΘΕΟΔΟΤΙΩΝ.
ἐν κεφαλαίῳ ἔκτισεν ὁ θεὸς συν τὸν οὐρανὸν καὶ συν τὴν γῆν.	ἐν ἀρχῇ ἔκτισεν ὁ θεὸς τὸν οὐρανὸν καὶ τὴν γῆν.	ἐν ἀρχῇ ἐποίησεν ὁ θεὸς τὸν οὐρανὸν καὶ τὴν γῆν.	ἐν ἀρχῇ ἔκτισεν ὁ θεὸς τὸν οὐρανὸν καὶ τὴν γῆν.

But this was only the earlier and the smaller portion of Origen's labors: he rested not till he had acquired the knowledge of Hebrew, and compared the Sept. directly with the Hebrew copies. Eusebius (*Hist. Eccl.* vi, 16, p. 217, ed. Vales.) thus describes the labors which led to the greater work, the *Hexapla*; the last clause of the passage refers to the *Tetrapla*:

"So careful was Origen's investigation of the sacred oracles that he learned the Hebrew tongue, and made himself master of the original Scriptures received among the Jews in the Hebrew letters; and reviewed the versions of the other interpreters of the Sacred Scriptures, besides the Sept.; and discovered some translations varying from the well-known versions of Aquila, Symmachus, and Theodotion, which he searched out, and brought to light from their long concealment in neglected corners; . . . and in his *Hexapla*, after the four principal versions of the Psalms, added a fifth, yea, a sixth and seventh translation, stating that one of these was found in a cask at Jericho, in the time of Antoninus, son of Severus; and bringing these all into one view, and dividing them in columns over against one another, together with the Hebrew text, he left to us the work called *Hexapla*; having arranged separately, in the *Tetrapla*, the versions of Aquila, Symmachus, and Theodotion, together with the version of the Seventy."

So Jerome (in *Catal. Script. Eccl.* vol. iv, pt. ii, p. 116):

"Quis ignorat, quod tantum in Scripturis divinis habuerit studiū, ut etiam hebræam linguam contra ætatis gentisque suæ naturam edisceret; et acceptis LXX interpretibus, alias quoque editiones in unum volumen congregaret: Aquilæ scilicet Pontici proselyti, et Theodotionis Ebionæi, et Symmachus ejusdem editionis. . . . Præterea quintam et sextam et septimam editionem, quas etiam nos de ejus bibliotheca habemus, miro labore reperit, et cum cæteris editionibus comparavit."

From another passage of Jerome (in *Epist. ad Titum*, vol. iv, pt. i, p. 487) we learn that in the *Hexapla* the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters:

HEXAPLA (Hos. xi, 1).

Το ΕΒΡΑΙΚΟΝ.	Το ΕΒΡ. ΕΛΛΗΝΙΚΟΙΣ ΓΡ.	ΑΚΤΑΔ.	ΣΥΜΜΑΧΟΣ.	ΟΙ Ο.	ΘΕΟΔΟΤΙΩΝ.
כִּי נִצַּר יִשְׂרָאֵל וַאֲחֲבָהוּ וּמִצָּרִים קִרְאֵהוּ לִבְנֵי	χι νεϛ Ισραηλ ουεαβηου ουμεμεσραιμ καραδι λεβανι.	οτι παις Ισραηλ, και ηγαπησα αυτον, και απο Αιγυπτου εκαλεσα τον υιον μου.	οτι παις Ισραηλ και ηγαπημενος εξ Αιγυπτου κεκληται υιος μου.	οτι νηπιος Ισραηλ και εγω ηγαπησα αυ- τον και εξ Αιγυπτου κεκληται υιος μου.	οτι νηπιος και ηγαπ- και εκαλε- μου εξ Αι-

It should here be mentioned that some take the *Tetrapla* as denoting, not a separate work, but only that portion of the *Hexapla* which contains the four columns filled by the four principal Greek versions. Valesius (*Notes on Eusebius*, p. 106) thinks that the *Tetrapla* was formed by taking those four columns out of the *Hexapla*, and making them into a separate book. But the testimony of Origen himself (i, 381; ii, 131), above cited, is clear that he formed one corrected text of the Sept. by comparison of the three other Greek versions

(A., Σ., Θ.), using them as his criterion. If he had Hebrew at this time, would he have confined the Greek versions? Would he have appeared as represented by Aquila, etc.? It is evident that he must have learned Hebrew time, and therefore that the *Hexapla*, which, in comparison with the Hebrew, must have followed the *Tetrapla*, which was formed by the help of the three versions only. The words of Eusebius also (*Hist. Eccl.* vi, 16) appear to distinguish very clearly between the *apla* and *Tetrapla* as separate works, and to indicate that the *Tetrapla* preceded the *Hexapla*. The order of precedence is not a mere literary question; the version of Origen, which is supported by Montfaucon, Ussher, and others, strengthens the force of Origen's example as a student of Scripture, showing his increasing confidence in the sacred text.

The labors of Origen, pursued through a long series of years, first in procuring by personal travel the original texts for his great work, and then in comparing them, and arranging them, made him worthy of the name of *the Great*. But what was the result of all this toil? The *Hexapla*, which is now his great work, the *Hexapla*, prepared with much care, and written by so many skilful hands, and large for transcription, too early by centuries was lost (which alone could have saved it), it was reduced to a short existence. It was brought from the library at Caesarea, and there perished by the flames, A.D. 653. One copy had been made, by Pamphilus and Eusebius, a copy containing the corrected text of the Sept. Origen's *asterisks* and *obelis*, and the letters from which the other translators each had taken. This copy is probably the ancestor of the codices which now approach most nearly to the original, and are entitled *Hexaplar*; but in the course of transcription the distinguishing marks have disappeared, and become confused; and we have thus a text partly of the old Sept. text, partly of insertions from the three other chief Greek versions, especially of Theodotion.

The facts above related agree well with the results of the MSS. before stated. As we have derived from the *Hexaplar* text (e. g. 72, 59, 55, etc.) the other extreme the Codex Vaticanus (II), representing nearly the ancient uncorrected text, so between these we find texts of intermediate character in the Codex Alexandrinus (III), and others which may perhaps be derived from the text of the Sept.

To these main sources of our existing MSS. we have added the recensions of the Sept. mentioned by Eusebius, and others, viz. those of Lucian of Antioch and of Egypt, not long after the time of Origen, and have seen above that each of these had a wide circulation, that of Lucian (supposed to be corrected by Origen) in the churches from Constantinople to

that of Hesychius in Alexandria and Egypt; churches lying between these two regions used the *Hexaplar* text copied by Eusebius and Pamphilus (vol. i, col. 1022). The great variety of text in the existing MSS. is thus accounted for by the various sources from which they have descended.

IX. *Modern Editions*.—1. This version appears in the present day in five principal editions:

1. Biblia Polyglotta Complutensis (1514-17).
2. The Aldine edition (Venice, 1518).

3. The Roman edition, edited under pope Sixtus V (1587).
 4. Fac-simile edition of the Codex Alexandrinus, by Baber (1816).

5. Fac-simile edition of the Codex Sinaiticus, by Tischendorf (St. Petersburg, 1862, 4 vols. fol.).

The texts of (1) and (2) were probably formed by collation of several MSS. The Roman edition (3) is printed from the venerable Codex Vaticanus, but not without many errors. This text has been followed in most of the modern editions. A transcript of the Codex Vaticanus, prepared by cardinal Mai, was lately published at Rome by Vercelloni. It is much to be regretted that this edition is not so accurate as to preclude the necessity of consulting the MS. The text of the codex, and the parts added by a later hand, to complete the codex (among them nearly all of Genesis), are printed in the same Greek type, with distinguishing notes. The fac-simile edition by Baber (4) is printed with types made after the form of the letters in the Codex Alexandrinus (British Museum Library) for the fac-simile edition of the New Test. by Woide in 1786. Great care was bestowed upon the sheets as they passed through the press. The Codex Sinaiticus (5) was published in fac-simile type at the expense of the emperor of Russia, and a very limited edition was printed. See SINAITIC MS.

2. Other important editions are the following: The Septuagint in Walton's Polyglot (1657) is the Roman text, with the various readings of the Codex Alexandrinus. The Cambridge edition (1665) (Roman text) is only valuable for the preface by Pearson. An edition of the Codex Alexandrinus was published by Grabe (Oxford, 1707-20), but its critical value is far below that of Baber's. It is printed in common type, and the editor has exercised his judgment on the text, putting some words of the codex in the margin, and replacing them by what he thought better readings, distinguished by a smaller type. This edition was reproduced by Breitinger (Zurich, 1730-32, 4 vols. 4to), with the various readings of the Vatican text. The edition of Bos (Franq. 1709) follows the Roman text, with its scholia, and the various readings given in Walton's Polyglot, especially those of the Codex Alexandrinus. This has often been reprinted, and is now the commonest text. The valuable critical edition of Holmes, continued by Parsons, is similar in plan to the Hebrew Bible of Kennicott; it has the Roman text, with a large body of various readings from numerous MSS. and editions (Oxford, 1798-1827). The Oxford edition by Gaisford (1848) has the Roman text, with the various readings of the Codex Alexandrinus below. Tischendorf's editions (the 5th, 1875) are on the same plan; he has added readings from some other MSS. discovered by himself, with very useful Prolegomena. Some convenient editions have been published by Bagster, one in 8vo, others of smaller size, forming part of his Polyglot series of Bibles. His text is the Roman. The latest edition, by Field (1859), differs from any of the preceding. He takes as his basis the Codex Alexandrinus, but corrects all the manifest errors of transcription by the help of other MSS., and brings the dislocated portions of the Septuagint into agreement with the order of the Hebrew Bible. The text in Stier and Theile's *Polyglotten Bibel* (Bielefeld, 1854) is revised arbitrarily, and without the aid of the Codex Sinaiticus. Scrivener has promised a new critical edition.

3. Editions of *particular books*, more or less critically prepared, have occasionally been issued: Genesis, by Lagarde (Lips. 1868); Esther, by Fritzsche (Turici, 1848); Ruth, by the same (ibid. 1867); Jeremiah, by Spohn (Lips. 1794-1828); Ezekiel, by Vincent (Rom. 1840); Jonah, by Hühner (Lips. 1787-88). The genuine text of Daniel (which was long supposed to be lost, the translation of Theodotion having been substituted for it in the common MSS.) was first published separately by Simon de Magistris in 1772, from the Codex Chigianus; and it was reprinted by J. D. Michaelis

(1773-74), Segar (1775), and more critically by Hahn (1845), from the Codex Ambrosianus.

The best *Lexicon* to the Septuagint is that of Schleusner, published at Leipsic (1820-21, 5 pts.), and reprinted at Glasgow (1822, 3 vols. 8vo). An earlier one is that of Biel (Hag. 1779-80, 3 vols.). The best for the Apocrypha is Wahl's *Clavis* (Lips. 1863). The best *Concordance* is that of Trommius (Amst. 1718, 2 vols. fol.). An earlier one is that of Kircher (1607). Winer's *N. T. Grammar* serves an excellent purpose for philological comparison. The student may also consult Sturz, *De Dialecto Macedonica* (Lips. 1808); Maltby, *Two Sermons before the University of Durham* (1843). See GREEK LANGUAGE.

X. *Literature*.—In addition to the works named by Walch, *Bibl. Theol.* iv, 81 sq., 156 sq.; Rosenmüller, *Handb. d. Literatur*, ii, 279 sq.; and Danz, *Wörterb. d. Theol.* s. v. "Alex. Vers.," the following are important: Cappelli *Critica Sacra* (Par. 1650); Waltoni *Proleg. ad Bibl. Polyglott.* (Lond. 1657); Pearsoni [Bp.] *Præf. Parænetica ad LXX* (ibid. 1655); Vossius, *De LXX Interp.* (Hag. 1661; app. 1663); Montfaucon, *Hexaplorum Origenis quæ Supersunt* (Par. 1710; Lips. 1740); Hody, *De Bibl. Text. Original. Vers. Græcis, et Latina Vulgata* (Oxf. 1704); Hottinger, *Thesaurus* (Zur. 1649); Owen, *Inquiry into the Sept.* (Lond. 1769); *Brief Account*, etc. (ibid. 1787); Kennicott, *Dissertationes* to his *Vet. Test.* (Oxon. 1776-80); Wörner, *De LXX Interpretibus* (Hamb. 1617, 8vo); Knapp, *De Versione Alex.* (Hal. 1775-76, 4to); Hasenkamp, *De Pentat. LXX Interp.* (Marb. 1765, 4to); Stroth, *Symbolæ Criticæ* (Lips. 1778-83); Sulzner, *De LXX Interp.* (Hal. 1700, 4to); Weyhenmeyer, *De Versione LXX* (Ulm. 1719, 4to); Reineke, *De Dissensu Vers. Alex. ab Archetypo* (Magd. 1771, 4to); Holmes, *Prolegg. ad LXX* (Oxf. 1798-1827); Valckenæer, *Diatribæ de Aristobolæ Judæo* (L. B. 1806); Schleusner, *Opusc. Crit. ad Vers. Gr. V. T.* (Lips. 1812); Dahne, *Jüdisch-alexandrinische Philosophie* (Hal. 1831-34); Töpler, *De Pentat. Interp. Alex. Indole Crit. et Hermen.* (Hal. Sax. 1830); Gfrörer, *Urchristenthum* (Stuttg. 1831, 8vo); Fabricii *Bibliotheca Sacra*, ed. Harless, vol. iii; Studer, *De Versionis Alexandrinæ Origine, Historia, Usu, et Abusu Critico* (Bernæ, 1823, 8vo); Credner, *Beiträge zur Einleitung*, etc. (Halle, 1838, 2 vols. 8vo); Amersfoordt, *Dissertatio de Variis Lectionibus Holmesianis* (Lugd. Bat. 1815, 4to); Pluschke, *Lectiones Alex. et Hebr.* (Bonn, 1837); Thiersch, *De Pent. Vers. Alex.* (Erlang. 1841); Frankel, *Vorstudien zu der Septuaginta* (Leips. 1841); *Ueber den Einfluss der palästinischen Exegese auf die alex. Hermeneutik* (ibid. 1851); Grinfield, *N. T. Editio Hellenistica* (ibid. 1848); and *Apology for the Septuagint* (ibid. 1850); Selwyn, *Notæ Criticæ in Ex. i-xxiv, Numeros, Deuteronomium* (ibid. 1856-58); also *Hor. Hebr. on Isa. ix* (ibid. 1848); Churton, *Hul-sean Essay* (ibid. 1861); Pearson [G.], *Papers*, in the *Journal of Sacred Lit.* i, iv, vii, 3d series.

SEPTUAGINT, LINGUISTIC CHARACTER OF THE. The language of the Sept., from its close connection with that of the New Test., has been a fruitful source of discussion, and various theories on the subject have been maintained with considerable vehemence. Thus Isaac Vossius maintained that the Alexandrian Jews were studious of Attic Greek. Scaliger used the phrase "Hellenistic tongue;" Salmasius contended for a "Hellenistic Greek," and maintained that the diction or style of the Sept. was not a form of Greek which had its origin in Alexandria, or in other parts where the Macedonian rule had prevailed, but that it was the style of translators, or of authors whose acquaintance with the language was imperfect. It was the Greek of the unlearned, and therefore ἰδιωτικόν, or unpolished; it was used to interpret Hebrew ideas and phrases, and thus it was ἑρμηνευτικόν, or the language of interpreters. R. Simon used the term "synagogue Greek" to express a style of Greek which was so full of Hebrew words and Hebraisms as to be scarcely intelligible to readers who had no knowledge of He-

brew or Chaldee. He illustrates this by the Spanish Jews' translation of the Bible into the Spanish tongue, which can be understood only by those who have some knowledge of Hebrew as well as Spanish. Later critics have, however, admitted the existence of an Alexandrian dialect, from which the Sept. has derived some of its features, though these are not its most prominent characteristics. Thus Iiody, quoting Crocus, says: "The Greek translators of the Scriptures are to be described as Hebraists, Chaldaists, and Alexandrists. Their version is full of Hebrew, Chaldee, and Alexandrian words and phrases. They render word for word, and often where a passage is thus translated, the words are Greek, but the Hebrew construction is retained" (*De Bibl. Text. Orig.* II, iv, 23).

As the text from which the Alexandrian version was made did not have the vowel-points, it would be very interesting to know how the translators pronounced the Hebrew, and the more so since some critics who delight in hunting after various readings would make the Sept. the standard for the Hebrew text. But here we are at a loss, and all that we know we can only make out from the version itself. Commencing with the *alphabet*, the pronunciation of the letters is given to us in the Lamentations of Jeremiah, where the verses are arranged alphabetically. The letters of the alphabet, thus commencing the different verses, are expressed fully, as the following scheme will show:

א = Ἀλεφ.	ל = Λάμεδ.
ב = Βήζ.	מ = Μήμ.
ג = Γίμελ.	נ = Νούν.
ד = Δάλεθ.	ס = Σάμεχ.
ה = H.	ע = Αίγν.
ו = Οὐαῦ.	פ = Φή.
ז = Ζαίν.	צ = Τσαδή.
ח = ח.	ק = Κώφ.
ט = Τήθ.	ר = Ρήχς.
י = 'Ιώδ.	ש = Χσέν.
כ = Χάφ.	ת = Θαῦ.

That א and ח were pronounced *uav* and *lav* we may infer from the fact that *v* is always equivalent to the Hebrew ו, thus לירי = Λερί. From the version itself we see that the letters had the following pronunciation:

א, in itself inaudible (like the Greek *spiritus lenis*), receives its intonation from the vowel, as אהרן, 'Aarwv; אלקנה, 'Elkaná. Sometimes it has the *spiritus asper*, as אברהם, 'Aβραάμ; אליהו, 'Hliás; אלן (Judg. ix, 37), 'Hláv.

ב is β, sometimes φ: יקב-זאב (Judg. vii, 25), 'Iakeβ-ζήφ; also υ, רחוב (Josh. xix, 30), 'Paav. Sometimes ב is expressed by μβ, as נבח, Νομβά; זריבבל, Ζερονυμβαβελ; or by μ alone, as לבנה, Λεμένά; ויבשם (1 Chron. vii, 2), 'Ieuasáiv.

ג is γ, sometimes κ, as נפג, Ναφέκ; דיאג, Δωήκ; also χ, as שריוג, Σερούχ.

ד is δ, but also ζ, as מטרד (Gen. xxxvi, 39), Ματραΐζ. ח is, like א, either inaudible, as חבל, 'Aβέλ; or it has the *spiritus asper*, as חיימן, 'Himán.

ו is υ, הוה = 'Eua, לוה = Λεύι. Sometimes it is β, as שוה, Σαβύ (Gen. xiv, 5), and שיע (xxxviii, 12), Σαβί. Sometimes it is not expressed at all, as ישרה, 'Asri; ישני (1 Chron. vi, 13), Σανι.

ז is ζ, seldom σ, as אליפז, 'Ελιφάς (Gen. xxxvi, but 1 Chron. i, 'Ελιφάζ); very seldom ξ, as בוי (Gen. xxii, 21), Βούξ.

ח is inaudible at the beginning, middle, and end of a word. Often it is χ, חם, Χάμ; נחור, Ναχώρ; sometimes κ, as כבב (Gen. xxii, 24), Θαβίκ.

ט is τ, seldom δ, as רשית (Gen. x, 6; 1 Chron. i, 5), or ז, as אליפלט (2 Sam. v, 16; 1 Chron. xiv, 5), Λιάς.

י is ι, as יעקב, 'Iakwβ; but it is also i when followed by a vowel, as ירמיהו, 'Ieremias.

כ is χ, sometimes κ, as סבחא (Gen. x, 7), Σαδχ, seldom γ, as כפחריים (ver. 14), Γαφζωρείμ. כ נ is λ ν ρ.

מ is μ, but sometimes β, as נמרוד, Ναβρώδ; ח (Chron. i, 47), Σεβλά.

ש ש ס are σ.

ע is inaudible, as עפרון, 'Eφρών; or with the *asper*, as עשו, 'Hsaū: It is also γ, as עמורה, Γόμω (at the end of the word), as ארבע (Gen. xxiii, 2), Αρβέ.

פ is φ, sometimes π, as צלפחד, Σαλπαάδ.

צ is σ, seldom ζ, as עוץ (Gen. x, 23; xxii, 21), Αούζ.

ק is κ, sometimes χ, as קטורה (Gen. xxv, 1), Χατόρη, חקופא (Neh. vii, 53), 'Aχιφά: seldom γ, as חלק (xxvi, 30), Χελέγ.

ר is ζ, sometimes τ, as רחש, Τοχός; גתר, Γατέ.

A greater difficulty we have in fixing the pronunciation according to our *vowel-points*, but in general the following rules may be laid down:

Kamets (ך) is α, as אדם, 'Αδάμ; חם, Χάμ. Pathe is α, as אהרן, 'Aarwv.

Twere (ך) = η: אשר, 'Asir; ישראל, 'Israhēl. Se is α, as אברהם, 'Aβραάμ; אβιמלך, 'Abimelēχ.

Cholem (ך) = ω: יעקב, 'Iakwβ; יושה, 'Iwsēph.

chaturph (ך) = ο, as בלתי, Γολιιάς.

Long chirek (ך) = ι or ε: עננים, 'Ananīm, -meim; Μαχίρ, -eip. Short chirek (ך) = ι or υ, the latter very common, as פולסטειμ, Συμείων.

Shurek (ך) = ου: לוד, Λοῦδ; רבוס, 'Ieβούς. Kili = ο: בקר, Βοκκί; רפנה, 'Ieφοννή.

This may be regarded as a most general outline of the pronunciation of the vowels; for a closer examination, upon which we here enter, will show that these principles are everywhere carried out. As to Sheva, its pronunciation is determined by the following vowel; thus קעור is קעור, 'Poób; פולסטעיμ, Συμείων; רחוב, 'Raab; סבחא, Σαβαθακ. This vocalization exercises its influence upon the vowel preceding the Sheva. Thus בללם is Βαλαάμ; מבשם = Μαβασάμ, etc.

Dagesh lene is not expressed in the Sept., but *gesh forte* usually is, as צלח, Σελλά; מנשה, 'Mnēsh; and it is also found, where the Hebrew text has dagesh, as רבקה = 'Peβέκκα. Sometimes the *forte* of the Hebrew is not expressed at all, as אשום; חקלח, 'Haklāh; חקלח, 'Haklāh.

With these preliminary remarks we have passed on to the manner in which grammar has been treated by the translators of the Sept.; but here the difficulty is greater still, for the translators, as seen from their mode of translating, had not a fixed rule, but the translation, of the Scripture in view; this must account for many grammatical peculiarities which we find so often in the Alexandrian version. Thus e.g. the present is very often used for the imperative, especially in λέγω and ὁράω, as in Gen. xv, 2, λέγει δὲ 'Aβραάμ; xxxvii, 29, ἵστα, καὶ οὐχ ὁρᾷ 'Iwsēph, or the infinitive before a verb is expressed by a participle or a noun. This is often exchanged for the passive, or *vice versa*, as in Gen. xii, 15, ἔλαβεν τὴν ἁρσέναν, καὶ εἰσήγαγον. Leaving all further remarks on these points as not exactly belonging to our object, we now come to the subject of the linguistic peculiarities. Here we

1. Unusual formations of words and verbs, viz.:

- ἄβρα, a favorite slave, Exod. ii, 5.
 αἰχμάλωτιζειν, to make a prisoner, Ezek. xii, 3.
 ἄκαν, a thorn, 2 Kings xiv, 9.
 ἀλγνός, sorrowful, Jer. x, 9.
 ἀμφιέσθαι, to put round about, Job xxix, 14.
 ἀμφίσις, a garment, Job xxii, 6.
 ἀναδεματίζειν, to devote to destruction, Deut. xiii, 15.
 ἀποκοδοῦν, to strip the head of, Lev. x, 6.
 ἀποπεμπτοῦν, to take up the fifth part, Gen. xli, 34.
 ἀσβόλη, soot, Lam. iv, 8.
 βουνίζειν, to accumulate, Ruth ii, 14.
 γλωσσόκομον, a chest, 2 Chron. xxiv, 8.
 γρηγορεῖν, to watch, Neh. vii, 3.
 διαρτάν, to deceive, Numb. xxiii, 19.
 ἐκδεμα, an edict, Esth. viii, 17.
 ἐκτοκίζειν, to put on interest, Deut. xxiii, 10.
 ἐντομίζειν, a cutting, Lev. xix, 28.
 εὐδοκεῖν, to approve, Lev. xxvi, 41.
 Ζέριστηρον, a veil, Song of Sol. v, 7.
 καταχωρίζειν, to enter in a register, 1 Chron. xxvii, 24.
 λυτρίων, a sewer, 2 Kings x, 27.
 μαγειρεῖν, a kitchen, Ezek. xli, 23.
 μαγειρίσσα, a female cook, 1 Sam. viii, 13.
 μακροήμερεύειν, to live long, Deut. v, 33.
 μανδύς, a coat of mail, 1 Sam. xvii, 38.
 πρωτοτοκεῖν, to appoint as first-born, Deut. xxi, 16.
 πρωτοτόκια, the birthright, Gen. xxv, 32.
 ῥῖψ, a grape, Isa. lxx, 8.
 σαββατίζειν, to rest, Exod. xvi, 30.
 σισίον, the corner of the head, Lev. xix, 27.
 σκεπετός, covered, Neh. iv, 13.
 σκηνοπηγία, Feast of Tabernacles, Deut. xvi, 16.
 τελίσκειν, to complete, Deut. xxiii, 18.
 φυλάκισσα, a keeper, Song of Sol. i, 6.

2. New meanings of words:

- ἀγχιστεύω, to redeem, Ezra ii, 62.
 ἄστυον, abominable, Lev. xix, 7.
 ἀπό = ὑπό, Gen. xlviii, 10.
 διαφθεῖν, to be missing, Numb. xxxi, 49.
 μετριάζειν, to be sick, Neh. ii, 2.

3. An abstract used collectively:

- αἰχμάλωσις, the captive, Ezek. xi, 25.
 διασπορά, living here and there, Psa. cxlvii, 2.
 ἐξουδένημα, despised, Psa. xxii, 6.
 ιεράτευμα, priesthood, Exod. xix, 6.

4. Peculiar forms of words, as—

- ἀγαθώτατος, Gen. xlvii, 6.
 ἀγαθώτερος, Judg. xv, 2.
 ἀπεκτάγκατε, Numb. xvi, 41.
 ἄρπξ, Lev. xix, 13.
 εἰποισαν, Psa. xxxiv, 25.
 ἐλδῶτω, Esth. v, 4.
 ἐπρονόμευσαν, Deut. iii, 7.
 ἐφάγοσαν, Psa. lxxvii, 29.
 φηγαν, 2 Sam. x, 14.
 ἄρακαν, Deut. xi, 7.
 ἄλδσαν, Psa. lxxviii, 1.
 ἰδοσαν, Job xxi, 20.
 ἰδοσαν, Deut. vii, 19.
 καμμῶν, Isa. vi, 10.
 κατεῖπαντες, Numb. xiv, 37.
 κακῆθραντες, Numb. xxii, 6.
 κεκραβάντες, Exod. xxii, 23.
 κλίβανος = κρίβανος, Exod. xv, 17.
 μαχαίρη, Exod. ix, 9.
 παρῆσταν, Isa. v, 29.
 ποιήσαντες, Deut. i, 44.
 πρᾶξῃται, Ezek. xlviii, 14.
 φαγοῖμεθα, Gen. iii, 2.

5. Syntactic peculiarities, as—

- ἁδῶς ἀπό, καθάρως ἀπό, Gen. viii.
 ἀμαρτάνειν ἀπο, Lev. v, 15.
 ἀμαρτάνειν ἐν, Lev. iv, 14.
 ἀμαρτάνειν ἐναντι, Lev. v, 2.
 ἀμαρτάνειν περί, Lev. v, 5.
 ἀμαρτάνειν τινι, Judg. xi, 27.
 ἀναμνησθῆναι τι, Exod. xxiii, 13.
 ἐξέρχονται τι, Exod. ix, 29.
 ἐξιλίσσονται τινι, Ezek. xvi, 63.
 εὐδοκεῖν τι, Eccles. ix, 7.
 καταρᾶσθαι τινα, Gen. v, 29.
 οἰκτεῖν ἀπό τινος, Jer. xlii, 14.
 οἰκτεῖν τινά, Psa. lv, 2.
 φείδεσθαι τινα, Job xvi, 5.
 φείδεσθαι τινι, Job vii, 11.

6. To these we may add:

The construction of ἐρχομαι and similar verbs with the infinitive, as ἀπῆλθε φαγεῖν καὶ πίνειν, Neh. viii, 12; κατέβη λαοσάσθαι, Exod. ii, 5.
 The vocative is expressed by the article, as σῶσόν με ὁ Θεός μου, Psa. lxxviii, 7.

τίς is used as a relative, as μόνον τοῦτο τὸ ἱμάτιον . . . ἐν τίνι κοιμηθήσεται, Exod. xxii, 27; καὶ ἦξει τίνος αὐτοῦ ἡ οἰκία, Lev. xiv, 35.

The relative is connected with ἐάν, as πᾶν σκεῦος ὑστράκινον εἰς ὃ ἐάν πῆσθ ἀπὸ τούτων ἔνδον, ὅσα ἐάν ἔνδον ᾗ ἀκάθαρτα ἔσται, Lev. xi, 33; ἐν ἀργῇ ὃ ἐάν ᾗ ἐκεῖ . . . καὶ ὁφθαλμοὶ ὅτι ἐάν ᾗ, 1 Sam. xix, 3; ἀνθρώπος . . . τινι ἐάν ᾗ ἐν αὐτῇ μῶμος, Lev. xxi, 17.

The connection with ἐν instead of εἰς, as πορεύσομαι ἐν πύλαις πόλεως, Isa. xxxviii, 10; ἀεὶ ἐν κρίσει, Eccles. xii, 14.

The connection of ἐνθυμίαις, as εὐρον χάριν ἐν ὀφθαλμοῖς σου τὸ ἐπενθυναί με, Ruth ii, 10; πόλις αὐτῇ ἐγγὺς τοῦ καταφυγεῖν με ἐκεῖ, Gen. xix, 20; ἡγήσαν αἱ ἡμέραι Ἰσραὴλ τοῦ ἀποθανεῖν, xlvii, 29; ἔσθη τοῦ τικτεῖν, xxix, 35; ἦν αὐτῶν τὰ ὑπάρχοντα πολλὰ τοῦ οἰκεῖν ἁμα, xxxvi, 7; ἡμελύνθησαν οἱ ὀφθαλμοὶ αὐτοῦ τοῦ ὁρᾶν, xxvii, 1.

7. Very prominent also are the Egyptian words which we find in the Sept., and which betray the origin of the translation. The following are the most remarkable:

ἀλήθεια, truth, the rendering of תְּהוֹמִים (Thummim, or perfections), in Exod. xxviii, 26; Lev. viii, 8; and Deut. xxxiii, 8. According to Elian, ἀλήθεια was the name given to an image of sapphire stone, which was hung by a golden chain round the neck of the oldest and highest in rank of the Egyptian priests, who also held the office of judge. This was to denote the truth or justice with which he was to decide the cases which were brought before him. Hence it is supposed that the use of it for the Thummim of the high-priest was derived; yet not without regard to the meaning of truth, as expressing the faithfulness and righteousness of God.

The word ἄπις (Apis, the sacred bull of the Egyptians) occurs in Jer. xli (xxvi), 15: Διὰ τί ἐφυγεν . . . ἄπις ὁ μόσχος ὁ ἐκλεκτός σου ("Why is Apis, thy chosen calf, fled?"), where it is put as a paraphrase upon אֲבִירֶיךָ, "thy valiant ones," in the prophecy of the desolation of Egypt by the armies of Nebuchadnezzar.

ἄρτιβη is a measure which is mentioned by Herodotus as being used in Egypt and Persia. It is put for the "homer" in Isa. v, 10, and it also occurs in Dan. xiii, 3 (History of Bel and the Dragon).

ἄχει, or ἄχι, is an Egyptian word for the papyrus, or some other reed or growth of the marshes. It occurs both in the Hebrew and Sept. of Gen. xli, 2; Isa. xli, 7, 8. It is also found in Eccles. xi, 16.

γένεσις, as applied to the "creation" of the world, was traced by Hody to Egyptian philosophy. But it seems rather to be derived from the גִּנְזִית, or genealogical narratives, of which the first book of the Pentateuch is composed.

ζῶσις was a drink made from barley in Egypt, mentioned by Herodotus and Diodorus Siculus. It is found in the Sept. version of Isa. xli, 10, where it seems that שכר (strong drink) was read instead of שֶׁכֶר (merchandise).

זִירָא is found in Psa. cxxxii, 16, "I will abundantly bless her provision." Jerome said that it was an Egyptian word for corn; and Hesychius mentions ἀσηρά as a decoction of milk and corn employed by the Egyptians—perhaps the medicine athara of which Pliny speaks. The Heb. צִירִי is, however, rendered זִירָא (venison) in Gen. xxv and xxvii.

ἵπποδρόμος is used to denote a measurement of space in Gen. xxxv, 19; xlvii, 7. Jerome seems to have been perplexed by its introduction in these passages. Hody conjectures that the use of the word was suggested by the hippodrome which was constructed by Ptolemy Lagus at Alexandria, and was the scene of the events recorded in the 3d book of Maccabees. Thus the "hippodrome of Ephraim" signifies a certain distance from Bethlehem, which was nearly the interval between the goals of the Egyptian race-course.

The word κόνδιον, used for a cup, in Gen. xli, Isa. li, is of Persian origin.

κόσμητος, a head-band or fringed garment, the wearer of which is called κοσμηβωτός (Exod. xxviii; Isa. iii), was an Egyptian ornament.

νόμος, in Isa. xix, 2, is not to be read νόμος, "law," but has the sense of "province," or "district," Egypt being divided into νομοί, governed by νομάρχαι, or prefects. In this sense it occurs in 1 Macc. x, 30.

οἶφι was supposed by Jerome to be the Hebrew ephah; but Hesychius states that it was an Egyptian measure containing four χοῖνικες (Numb. xxviii, 5; Judg. vi, 19).

πάτερος, or πάντρος, occurs in some of the Greek texts in Exod. ii, 3, the Egyptian paper-reed, which was the material of the ark in which the parents of Moses concealed him. It was also called βίβλος, and hence the "vessels of bulrushes" in Isa. xviii, 2 are called ἐπιστολαὶ βιβλιναι.

παστοφόριον is used in the Sept. for the chambers and treasuries adjoining the Temple inhabited by the priests and Levites (1 Chron. ix, 26, 33; Ezek. xl, 18, etc.). The παστοφόροι are mentioned by Clemens Alexandrinus as a class of priests among the Egyptians.

'Ραιφίν, in Amos v, 26, was an Egyptian name for the sun-god, or the king of heaven. It is put for כִּיּוֹן, Chiuu.

σινδών, in Judg. xiv, 12, 13, was a fringed garment of fine linen which was made in Egypt.

στίβη, or στίμην, a dark purple or black, with which the guilty city of Jerusalem anoints her face to conceal her deformity (Jer. iv, 30). This is traced to στίμμις, a word of Egyptian origin.

σχοῖνος, in Psa. cxxxix, 2, "Thou hast searched my path," etc., was a word which, according to Herodotus, represented a measure of space or distance of sixty stadia.

ψοῦδοφανήχ, in Gen. xli, 45, answers to the Heb. Zaphnath Paaneah. The latter is supposed to be an Egyptian word, signifying "the food of the living;" but Josephus and Origen ascribed to it the sense of "discoverer of secrets," or "one to whom the future is revealed." Hody supposed that ψοῦδοφανήχ also had this sense in the later Egyptian; but Jerome explains it to be the "Saviour, or Deliverer, of the world."

8. Another feature of this version is the many *Hebrew* and *Chaldee* expressions, as—

ἄρψας,	Jer. lii, 19.	μαωλείμ,	Dan. xi, 38.
ἀρηλῆ,	1 Chron. xi, 22.	ναγέβ,	Ezek. xx, 46.
αὐρώδ,	2 Kings iv, 39.	νύβελ,	Hos. iii, 2.
Δαρόμ,	Ezek. xx, 46.	οὐλομούτ,	Gen. xxviii, 19.
Ἑσέφιμ,	1 Chron. xxvi, 17.	ἐζύμεν,	1 Kings xix, 4.
ζακχύν,	1 Chron. xxviii, 11.	σάβκι,	Gen. xlii, 13.
Ἰαμείν,	Gen. xxxix, 24.	σάμ,	1 Chron. xlix, 2.
Ἰαρεμί,	Hos. v, 13.	φελλάνι,	1 Sam. xxi, 2.
μανάδ,	2 Kings viii, 9.	χαβραζά,	Gen. xli, 7.
μασμορσῶ,	Jer. lii, 19.	χυρρί,	2 Kings xi, 4.
μαχβάρ,	2 Kings viii, 15.		

These and many more words must not be regarded, as has usually been the case, as a mark of ignorance of the Hebrew, but as attempts to mix the vernacular with Hebrew expressions. Besides such Hebrew words, we find a great many Hebraisms; as Greek words with a Hebrew signification, Greek words in Hebrew constructions, Hebrew constructions, etc.—too many to be enumerated.

9. Another peculiarity of the Alexandrian version is that the same word is differently translated, not only in different books, but also in the same book. This point is the more important, as it evidently shows that the different books must have had different translators. A comparison of the Pentateuch with the book of Joshua will prove this beyond a shadow of doubt.

A. Verbs.

חמד, to desire, Exod. xx, 17; Dent. v, 18; vii, 25, ἐπιθυμεῖν τι ὡς τινός (Exod. xxxiv, 24); but Josh. vii, 21, ἐνθυμούμαι τινός.

ἔρεψ, to explore, Dent. i, 22, ἔφοδεύω; Josh. ii, 23, κατασκοπεῖω.

טבל, Exod. xli, 22; Lev. iv, 6, 17; xix, 9; xiv, 6, 16, 51; Numb. xix, 18; Dent. xxxiii, 24; Josh. iii, 15, βάπτω; but Gen. xxxvii, 31, μολύνω.

לכר, to storm: 1. λαμβάνειν, Josh. viii, 21; x, 1, 23, 32, 35, 39; xii, 12, 17; Numb. xxxii, 39, 41, 42. 2. καταλαμβάνειν, Josh. viii, 19; xi, 10. 3. καταλαμβάνεσθαι, Numb. xxi, 32. 4. κρατεῖν, Dent. ii, 24; iii, 4. 5. κυριεύειν, Josh. xv, 16.

סכס, to break up, to move on: 1. ἀπαίρω, Gen. xli, 9; xlii, 11; xxxiii, 12, 17; xxxv, 16; xxxvii, 17; xlvii, 1; Exod. xli, 37; xvi, 1; xvii, 1; xix, 2; Numb. ix, 17, 20, 21, 22, 23; xiv, 25; xx, 22; xxi, 4, 10, 12, 13; xlii, 1; xxxiii, 3, 7, 8, 9, 10 sq.; Dent. i, 7, 19; ii, 1, 24; x, 6, 7, 11; Josh. iii, 1, 3, 14; ix, 17. 2. ἐξάιρω, Gen. xxxv, 5; Exod. xlii, 20; Numb. i, 51; ii, 9, 16, 17, 24, 31, 34; iv, 5, 15; ix, 19; x, 5, 6, 17, 21, 22, 25, 28, 29, 33, 34, 35; xi, 35; xii, 15; xli, 1; xlii, 11. 3. αἶρω, Numb. ii, 17, and ibid. ἐξάιρω. 4. στρατοπεδεύω, Gen. xli, 9; Exod. xiv, 10; Dent. i, 40. 5. κινέω, Gen. xi, 2; xx, 1. 6. προπορεύομαι, Numb. x, 33. 7. ἀναζεύγνυμι, Exod. xvi, 15; xi, 36, 37.

These few examples may suffice.

B. Nouns.

אהל, a tent: 1. σκηνή, Gen. iv, 20; xli, 8; xlii, 3, 5; xviii, 1, 2, 6, 9, 10; xxvi, 25; xxxi, 25; xxxiii, 19; Exod. xxxiii, 7, 8, 10; Numb. xvi, 26, 27; Dent. i, 27; xi, 6; Josh. vii, 21, 22, 23, 24. 2. σκηνομα, Dent. xxxiii, 18; Josh. iii, 14. 3. οἶκος, Gen. ix, 27; xxiv, 67; xxxi, 33; Josh. xxii, 4, 7, 8. 4. οἰκία, Gen. xxv, 27. 5. σκεπτήριον, Exod. xvi, 16.

נף is, 1. παρδία, Gen. xlv, 19; Numb. xiv, 3, 31; Dent. i, 39; iii, 6; Josh. i, 14. 2. τέκνα, Dent. ii, 34; iii, 19. 3. ἔγκονα, Dent. xxi, 11; xxxi, 12. 4. συγγένεια, Gen. i, 8. 5. οἰκία, Gen. i, 21. 6. ἀποσκευή, Gen. xxxiv, 29; xlii, 7; xlv, 5; Exod. x, 10, 24; xii, 37; Numb. xvi, 27; xxxi, 9; xxxii, 17, 24, 26; Dent. xx, 14. 7. ἀποσκευαί, Numb. xxxii, 16.

The same variations we find in *adverbs*, *particles*, *proper nouns*, but more especially in certain phrases.

See Thiersch, *De Pentateuchi Versione Alexandrina* (Erlange, 1840); Frankel, *Vorstudien der Septuaginta* (Leips. 1841); Kaulen, *Einleitung in die heilige Schrift* (Freiburg, 1876), p. 85 sq. (B. P.)

SEPTUAGINT, TALMUDIC NOTICES CONCERNING THE. It is strange that the writers of the art. SEPTUAGINT in Smith's *Dict. of the Bible* and in Kitto's *Cyclop.* should not have mentioned the notices we find concerning that version in the Talmud and other Jewish writings. It is true that in Kitto we find it stated, "It is spoken of in the Babylonian and Jerusalem Talmuds;" but where, and what, the reader is at loss to see. Yet these notices are very important, since they throw a great deal of light upon some points which have vexed the interpreters. The oldest notice is that contained in the *Mechilta*, a Midrashic commentary on Exodus (comp. the art. MIDRASH), where Exod. xii, 40 is thus cited: 'אשר ישבו במצרים ובארץ כנען ובארץ גושן ל' וגו', and where we read, "And this is one of those things which they wrote to king Ptolemy. In the same manner they wrote, Gen. i, 1, אלהים ברא בראשית, ver. 26, אנשה אדם בצלם וברמות; ver. 27 (comp. v, 2), ויכל אלהים ביום הששי; xi, 7, ארדה; xviii, 12, בקרוביב; xlix, 6, אבוס (instead of שור); Exod. iv, 20, נשא אדם (for יהוה); Numb. xvi, 15, חמד; Deut. iv, 19 (they added) להאיר; xvii, 8, לאומות לעבדם; and they wrote, Lev. xi, 6, and Deut. xiv, 7, צרית הרגלים (for ארנבת)."

From this passage we can infer that, besides the changes enumerated here, others are not to be excluded; besides, it only speaks in general of those who wrote the Bible for Ptolemy, and neither the number seventy nor seventy-two writers or translators is mentioned. It is different with the relation given in the Jerus. Talmud, *Megilla*, i, 9. Here the number of changes made is given as thirteen (עשרה עשרה שינוי חכמים): the passages are the same as given in the *Mechilta*, with some very slight changes. Thus Gen. i, 27 (comp. v, 2) we read וינקבי וינקבי; xlix, 6, שור (instead of ארש); Exod. xii, 40, במצרים ובארץ; in Lev. xi, 6 (Deut. xiv, 7) the explanation of the change is given that the name of Ptolemy's mother was also given. ארנבת. The number of the translators is also not given. The Babylonian Talmud, *Megilla*, 9 a, however, mentions the number of elders as seventy-two, who were put in seventy-two different cells without knowing for what purpose. Then king Ptolemy went to each of these and said to him, "Write for me the law of Moses, your teacher." God disposed it so that they all translated alike. The changes mentioned here are given without any number; but they are almost the same as the above, with slight modifications. Gen. i, 27 (comp. v, 2), וינקבה, is not changed, but בראם is changed into בראו; xlix, 6 agrees with the Jerusalem Talmud; and so, likewise, Exod. xii, 40. We find, as an addition, that in Exod. xxiv, 5, 11, זאבנטי is written for נדרי and אצירי; in Deut. xvii, 3, we have the addition לעבדים without לאומות; and to Lev. xi, 6 (Deut. xiv, 7) a similar explanation is given as in the Jerusalem Talmud, that the name of Ptolemy's wife was ארנבת; and hence they thought that it would be regarded as a mockery, on the side of the Jews, should they have mentioned her name (as that of an unclean animal) in the law. In the Midrashim only single passages are mentioned—thus Gen. i, 27 in *Beresheet Rabba*, ch. viii, as *Mechilta*, with which also agrees Gen. ii, 2 in ch. x; xi, 7 with ch. xxxviii; xviii, 12 with ch. xlviii; xlix, 6 with ch. xeviii, where, as in *Mechilta*, we find אבוס. All these passages are accompanied with the remark that here is

one of the changes made for Ptolemy, without giving their number. In *Shemoth Rabba*, ch. v on Exod. iv, 20, it is stated that this is one of the *eighteen* changes made for Ptolemy, without stating wherein these changes consist. In *Beresith Rabba*, ch. lxi on Exod. xii, 40, in order to show that Abraham was already called "Israel," the verse is quoted, "It is an old matter; the dwelling of the Israelites in Egypt, Canaan, and Goshen," etc. (and thus Abraham's stay in Egypt and Canaan is numbered among the 430 years). In the treatise *Sepher Torah*, i, 8, 9, seventy elders are mentioned who wrote the law, and the alterations made are given as thirteen. In the treatise *Sopherim*, i, 7, 8, we also read of thirteen alterations made by the translators.

In examining more minutely these changes we shall find the following:

1. Gen. i, 1-3, according to the structure of the language and the most ancient traditions still preserved by Rashi and Aben-Ezra, is to be rendered "*In the beginning when God created.*" But as this supposes the existence of primordial waters and of a chaotic mass, which, by the draining of the waters on the second day, became the formed earth, it was thought necessary, in translating the Bible into Greek, and in opposition to the Greek cosmogony and polytheism, to lay great stress on the absolute unity of God and on the absolute creation from nothing. Hence the word *רֵאשִׁית* had to be made independent of the following verses, and to be rendered in the *beginning*, ἐν ἀρχῇ ἐκείνῃ, instead of "in the beginning *when*." This change the Talmud indicates by the pregnant construction *בראשית ברא אלהים*, thus placing *בראשית* last, and precluding every other translation than *God created in the beginning* (Geiger, *Urschrift*, p. 344, etc.).

2. Gen. i, 26, where we read "Let us make man in our image (בצלמנו), after our likeness (כדמותנו)," has been altered into "I will make man in the image (בצלם), and in the likeness (וכדמות)," to remove the appearance of polytheism.

3. Gen. ii, 2, where "And he ended on the *seventh* (השביעי) day" has been changed into (הששי) the *sixth* day, to avoid the apparent contradiction, since God did not work on the seventh day. This alteration is still to be found in our text of the Sept., and also in the Samaritan version (שחיתרו), and in the Syriac (שחיתריא).

4. Gen. v, 2 (i, 27), where "Male and female created he *them*" (בראם) has been altered into *created he him* (ברא), to remove the apparent contradiction in the passage where the man and woman are spoken of as having been created together or simultaneously.

5. Gen. xi, 7, for the same reason as in 2, the words "Let us go down, and let us confound" (ירדו ונבלו) has been changed into "I will go down and I will confound" (אירדו ויאבלו).

6. Gen. xviii, 12, "After my decay I had again pleasure" has been altered into *אחר בלתי היה לי צדקה*, ὅς περ μὲν μοι γέγονεν ἔως τοῦ θανάτου, after it had been thus with me hitherto, to avoid the offensive application to the distinguished mother of Israel of the expression *בלי*, which is used for rotten old garments (comp. Geiger, *Urschrift*, p. 46 sq.).

7. Gen. xlix, 6, "In their anger they slew a man, and in their self-will they hamstring an ox," has been altered into "In their anger they slew an ox (שור), and in their self-will they hamstring a fattened bull (אֶבְיִם)," to do away with the wholesale slaughter of men.

8. Exod. iv, 20, the word *חומר*, *ass*, is altered into *ἡμιζύγια*, *beasts of burden*, because of the reluctance which the translators had to mention the name of this beast. This alteration is still preserved in our text of the Sept.

9. In Exod. xii, 40, and all other lands, i. e. "the land of Canaan," has been added in order to remove the apparent contradiction, since the Israelites did not sojourn four hundred and thirty years in Egypt.

10. Exod. xxiv, 5, 11, *נערי* and *אצילים* are changed into *זענוני* (=ζῆνοι; i. e. *worthy*, or *searchers after wisdom*), because it was not thought becoming to say that at this great revelation *boys* or *youths* (נערים) were brought as sacrifices.

11. In Lev. xi, 6 and Deut. xiv, 7, *ארינב* = *λαγός*, *a hare*, has been altered into *χοιροπούλας*, *porcupine* or *hedgohog*,

to avoid giving offence to the Ptolemy family, whose name was *Lagos*.

12. Numb. xvi, 15, *חמר*, *ass*, was changed into *ἐπιθύμημα* = *חמד*, *a desirable thing*, for the same reason as given under 8. This alteration is still in our text of the Sept.

13. Deut. iv, 19, the word *לואיר* = *διακοσμέω*, *to shine*, has been inserted so as to avoid the idolatry of the heathen being ascribed to God.

14. Deut. xvii, 3, where we read that God had not commanded the *Israelites* to worship other gods (in accordance with Deut. iv, 19), has been altered to *אשר לא ציריה* (לאומות לעבדם) which I have forbidden the nations to worship, to preclude the possibility of ascribing the origin of idolatry to the God of Israel.

This much for the alterations. But there are two other very important notices, viz. "that the day on which the translation of the Bible into Greek was made was regarded as a great calamity equal to that of the worship of the golden calf" (*Sopherim*, i, 7); and "the day on which it was accomplished was believed to have been the beginning of a preternatural darkness of three days' duration over the whole world, and was commemorated as a day of fasting and humiliation" (comp. Kuenen, *The Religion of Israel*, iii, 214-216). The Samaritans took the same view on account of their hatred of the Jewish translation (comp. Herzfeld, *Geschichte*, iii, 537). Says dean Stanley, "It needs but slight evidence to convince us that such a feeling, more or less widely spread, must have existed. It is the same instinct which to this hour makes it a sin, if not an impossibility, in the eyes of a devout Mussulman, to translate the Koran; which in the Christian Church assailed Jerome with the coarsest vituperation for venturing on a Latin version which differed from the Greek; which at the Reformation regarded it as a heresy to translate the Latin Scriptures into the languages of modern Europe; and which, in England, has in our own days regarded it in the English Church as a dangerous innovation to revise the Authorized Version of the 17th century, or in the Roman Church to correct the barbarous dialect of the Douay translation of the Vulgate, or to admit of any errors in the text or in the rendering of the Vulgate itself. In one and all of these cases the reluctance has sprung from the same tenacious adherence to ancient and sacred forms—from the same unwillingness to admit of the dislodgment even of the most flagrant inaccuracies when once familiarized by established use. But in almost all these cases, except, perhaps, the Koran, this sentiment has been compelled to yield to the more generous desire of arriving at the hidden meaning of sacred truth, and of making that truth more widely known. So it was, in the most eminent degree, in the case of the Septuagint" (*Jewish Church*, iii, 286 sq.). While we agree in the main with the learned dean, yet in the case of the Sept. the explanation of the above-given Talmudic statement must be sought for somewhere else. It is known that most of the early controversies with the Jews were conducted in the Greek language, and on the common ground of the faithfulness of the Sept. version, which was quoted alike on both sides. And so it continued to be respected during the age of the writers of the New Test. and the 1st century of the Christian era. As, however, the version grew into use among Christians, it gradually lost the confidence of the Jews, especially when it was urged against them by the Christians. The first signs of this appear in the works of Justin Martyr, in the 2d century. His *Dialogue with Trypho the Jew* professes to be the account of a discussion which actually took place, and Eusebius (*Hist. Eccles.* iv, 18) places the scene of it at Ephesus. The *Dialogue* abounds in citations from the Old Test.; and even such passages are quoted as are not to be found in the Hebrew. The latter circumstance made Justin charge the Jews with removing especially four prophecies of Christ from their copies. The first of these is: "And Ezra said unto the people,

This passover is our Saviour and our refuge; and if ye consider and it enter into your heart that we shall, by a figure (*ἰνσμίειν*, i. e. the cross), afflict him and afterwards hope in him, this place shall not be made desolate to all time, saith the Lord God of Hosts. But if ye believe him not, and hear not his preaching, ye shall become a spoil for the Gentiles" (*Dial.* c. 72). This passage, which is also quoted by Lactantius (*Instit. Divin.* iv, c. 18), is not to be found in the book of Ezra, and may probably have been interpolated according to the Apocryphal Ezra (vi, 21) into the copies of the Sept. by some Christian. The second (from Jer. xi, 19) had, he said, been but recently erased from certain copies, and was retained in others which were preserved in the synagogues. This, however, is found entire in all our present copies. The third passage is said to be taken also from Jeremiah: "And the Lord God remembered his dead, who were fallen asleep in the dust of their tombs, and descended to them to declare unto them the good tidings of his salvation." These words are remarkable from their resemblance to those of 1 Pet. iv, 6 (*νεκροῖς εὐηγγελισθῆναι*). The passage of Jeremiah, as alleged by Justin Martyr, read *κατὰ βῆθ πρὸς αὐτοὺς εὐαγγελίσασθαι*. "If a genuine passage," says Churton, "the apostle's words seem to contain an allusion to them as well as to the doctrine enunciated in the preceding chapter of his epistle. If interpolated by a Christian convert from some traditional saying of the prophet, or adapted from Peter's words, it seems that the person who introduced them into the text of the Sept. took the words of the apostle in their literal sense, and not as later commentators have conjectured, that the persons called *νεκροί* were alive at the time of the preaching." The fourth and last passage is from Psa. xcvi, 10: "Declare among the heathen that the Lord hath reigned from the tree" (*Dial.* c. 73). Out of this passage the Jews are accused of having erased the last words, *ἀπὸ τοῦ ξύλου*. The words *ἀπὸ τοῦ ξύλου* are quoted again by Justin Martyr in his *Apology*; they are also quoted by Tertullian (*Adv. Jud.* c. 10), Ambrose, Augustine, Leo, Gregory, and others. Yet the words occur in no Greek or Hebrew MS., and the probability is that they were added by some Christian. Under these circumstances we can very well understand the feeling of the Jews towards a version which brought such accusations against them; and this, it seems, gives us the real clue to the Talmudic passage which regarded the day of the translation of the Bible into Greek as a great calamity. See Frankel, *Vorstudien zur Septuaginta*, p. 25 sq.; Geiger, *Urschrift der Bibel*, p. 439 sq.; *Masechet Soferim* (ed. Müller, Leips. 1878), p. 12 sq.; Ginsburg, *Introduction to the Rabbinic Bible*, p. 70 sq.; Churton, *The Influence of the Septuagint Version*, p. 41 sq.; Reinke, *Beiträge zur Erklärung des Alten Testaments*, vii, 292 sq.; Friedländer, *Patristische und talmudische Studien* (Vienna, 1878), p. 133 sq. (B. P.)

Septum, a term used by certain 17th-century Anglican writers for the fixed or movable rail placed on each side of the entrance of the sanctuary to support the communicants when they knelt to receive the Lord's body and blood.

Sepulchre (קבר, *kéber*, or קבורה, *keburáh*, a *burying-place* or *grave*, as sometimes rendered; τάφος, a *tomb*, as elsewhere rendered; also μνημα or μνημείον, a *monument*, likewise rendered "grave" or "tomb"). Mankind in all ages have been careful, indeed of necessity, to provide suitable resting-places for the dead. In treating of the Hebrew usages in this respect, we will adduce whatever elucidation modern research has contributed to them. See BURIAL.

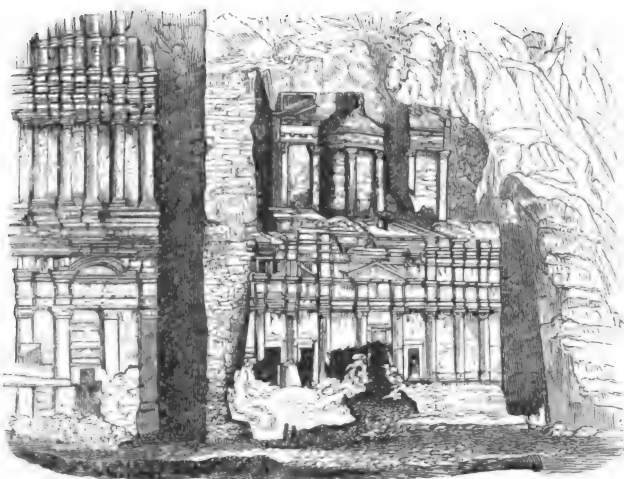

I. *General Principles of Sepulture*.—1. *The Duty*.—The Jews uniformly disposed of the corpse by entombment where possible, and, failing that, by interment; extending this respect to the remains even of the slain enemy and malefactor (1 Kings xi, 15; Deut. xxi, 23), in the latter case by express provision of law. Since

this was the only case so guarded by Mosaic precept, it may be concluded that natural feeling was relied on as rendering any such general injunction superfluous. Similarly, to disturb remains was regarded as a barbarity, only justifiable in the case of those who had themselves outraged religion (2 Kings xxiii, 16, 17; Jer. viii, 1, 2). The rabbins quote the doctrine "dust thou art, and unto dust shalt thou return" as a reason for preferring to entomb or inter their dead; but that preferential practice is older than the Mosaic record, as traceable in patriarchal examples, and continued unaltered by any Gentile influence; so Tacitus (*Hist.* v, 5) notices that it was a point of Jewish custom *potius corpora condere quam cremare*. See CORPSE.

The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Adopting a similar notion, some of the rabbins taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in the Messiah's reign on earth. Thus that land was called by them "the land of the living," and the sepulchre itself "the house of the living." Some even feigned that the bodies of the righteous, wherever else buried, rolled back to Canaan underground, and found there only their appointed rest (Nicolaus, *De Sepult. Heb.* xiii, 1). Tombs were, in popular belief, led by the same teaching, invested with traditions. Thus Machpelah is stated (Lightfoot, *Centuria Chorographica*, s. v. "Hebron") to have been the burial-place not only of Abraham and Sarah, but also of Adam and Eve; and there was probably at the time of the New Test. a spot fixed upon by tradition as the site of the tomb of every prophet of note in the Old Test. To repair and adorn these was deemed a work of exalted piety (Matt. xxiii, 29). The scruples of the scribes extended even to the burial of the ass whose neck was broken (Exod. xxxiv, 20), and of the first-born of cattle (Maimon. *De Primogen.* iii, 4, quoted by Nicolaus, *De Sepult. Heb.* xvi, 3, 4). See GRAVE.

2. *Rites*.—On this subject we should remember that our impressions, as derived from the Old Test., are those of the burial of persons of rank or public eminence, while those gathered from the New Test. regard a private station. But in both cases "the manner of the Jews" included the use of spices where they could command the means. Thus Asa lay in a "bed of spices" (2 Chron. xvi, 14). A portion of these were burned in honor of the deceased, and to this use was probably destined part of the one hundred pounds' weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burned also. Such was probably the "great burning" made for Asa. If a king was unpopular or died disgraced (e. g. Jehoram, 2 Chron. xxxi, 19; Josephus, *Ant.* ix, 5, 3), this was not observed. In no case, save that of Saul and his sons, were the bodies burned, nor in that case were they so burned as not to leave the "bones" easily concealed and transported, and the whole proceeding looks like a hasty precaution against hostile violence. Even then the bones were interred and re-exhumed for solemn entombment. The ambiguous word in Amos vi, 10, מְסַרְסֵר, rendered in the A. V. "he that burneth him," possibly means "the burner of perfumes in his honor," i. e. his near relation, on whom such duties devolved; rather than, as most think, "the burner of the corpse." For a great mortality never causes men to burn corpses where it is not the custom of the country; nor did the custom vary among the Jews on such an occasion (Ezek. xxxix, 12-14). It was the duty of the next of kin to perform and preside over the whole funeral office; but a company of public buriers, originating in an exceptional necessity (Ezek. *loc. cit.*), had become, it seems, customary in the times of the New Test. (Acts v, 6, 10). The closing of the eyes, kissing, and washing the corpse (Gen. xlvii, 4; 1, 1; Acts ix, 37) are customs common to

all nations. Coffins were but seldom used, and, if used, were open; but fixed stone sarcophagi were common in tombs of rank. The bier, the word for which in the Old Test. is the same as that rendered bed [see BED], was borne by the nearest relatives, and followed by any who wished to do honor to the dead. The grave-clothes (*ᾠδῶνα, ἐντάφια*) were probably of the fashion worn in life, but swathed and fastened with bandages, and the head was covered separately. Previously to this being done, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark that the woman had anointed his body *πρὸς τὸ ἐνταφιάζειν*, "with a view to dressing it in these *ἐντάφια*;" not, as in the A. V., "for the burial." For the custom of mourners visiting the sepulchre, see MOURN; for other usages, see FUNERAL.

Corinthian Tomb at Petra.

3. *The Site*.—A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. This was what the structure of the Jewish soil supplied or suggested. A distinct and simple form of sepulture as contrasted with the complex and elaborate rites of Egypt clings to the region of Palestine, and varies but little with the great social changes between the periods of Abraham and the captivity. Jacob and Joseph, who both died in Egypt, are the only known instances of the Egyptian method applied to patriarchal remains. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens, by roadsides, or even adjoining houses. Kings and prophets alone were probably buried within towns (1 Kings ii, 10; xvi, 6, 28; 2 Kings x, 35; xiii, 9; 2 Chron. xvi, 14; xxviii, 27; 1 Sam. xxv, 1; xxviii, 3). Sarah's tomb and Rachel's seem to have been chosen merely from the accident of the place of death; but the successive interments at the former (Gen. xlix, 31) are a chronicle of the strong family feeling among the Jews. It was the sole fixed spot in the unsettled patriarchal life; and its purchase and transfer, minutely detailed, are remarkable as the sole transaction of the kind, until repeated on a similar occasion at Shechem. Thus it was deemed a misfortune or an indignity, not only to be deprived of burial (Isa. xiv, 20; Jer. *passim*; 2 Kings ix, 10), but, in a lesser degree, to be excluded from the family sepulchre (1 Kings xiii, 22), as were Uzziah, the royal leper, and Manasseh (2 Chron. xxvi, 23; xxxiii, 20). Thus the remains of Saul and his sons were reclaimed to rest in his father's tomb. Similarly, it was a mark of a profound feeling towards a person not of one's family to wish to be buried with him (Ruth i, 17; 1 Kings xiii, 31), or to give him a place in one's own sepulchre (Gen. xxxiii, 6; comp. 2 Chron. xxiv, 16). The head of a family commonly provided space for more than one generation; and these galleries of kindred sepulchres are common in many Eastern branches of the human race. Cities soon became populous and demanded cemeteries (comp. *πολὺν ἄνθρωπον*, Sept. at Ezek. xxxix, 15), which were placed without the walls; such a one seems intended by the expression in 2 Kings xxiii, 6, "the graves of the children of the people," situated in the valley of the Kedron or of Jehoshaphat. Jeremiah (vii, 32; xix, 11) threatens that the eastern valley, called Tophet, the favorite haunt of idolatry, should be polluted by burying there (comp. 2 Kings xxiii, 16). Such was also the "potter's field" (Matt. xxvii, 7) which had, perhaps, been wrought by digging for clay into holes serviceable for graves. See CEMETERIES.

II. Explicit Information from Ancient Sources as to

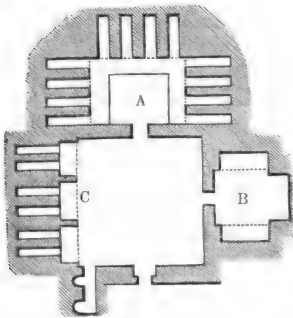

the Style of Sepulchres.—1. *From a Comparison with Early Heathen Nations*.—It has been too much the fashion to look to Egypt for the prototype of every form of Jewish art. The Egyptian tombs at Thebes were extensive excavations in the barren mountains which skirted the city on the west. In like manner, the magnificent tombs in the necropolis of Sela, in Arabia Petraea, were sculptured out of the sides of the rock surrounding the ancient city. See PETRA. The Edomites and the Egyptians seem to have regarded the habitations of the living merely as temporary resting-places, while the tombs are regarded as permanent and eternal mansions; and, while not a vestige of a habitation is to be seen, the tombs remain monuments of splendor and magnificence, perhaps even more wonderful than the ruins of their temples. Funeral urns or vases are found in great numbers on the plains and mounds of Assyria and Mesopotamia containing human skeletons or fragments of bones which appear to have been calcined.

But in Jewish history there is a total diversity from these customs in the matter of tombs. From the burial of Sarah in the cave of Machpelah (Gen. xxiii, 19) to the funeral rites prepared for Dorcas (Acts ix, 37) there is no mention of any sarcophagus, or even coffin, in any Jewish burial. No pyramid was raised—no separate hypogeum of any individual king, and, what is most to be regretted by modern investigators, no inscription or painting which either recorded the name of the deceased or symbolized the religious feeling of the Jews towards the dead. It is true, of course, that Jacob, dying in Egypt, was embalmed (Gen. l, 2), but it was only in order that he might be brought to be entombed in the cave at Hebron, and Joseph, as a naturalized Egyptian and a ruler in the land, was embalmed; and it is also mentioned as something exceptional that he was put into a coffin, and was so brought by the Israelites out of the land and laid with his forefathers. But these, like the burning of the body of Saul, were clearly exceptional cases. See EMBALMING.

Still less were the rites of the Jews like those of the Pelasgi or Etruscans. With that people the graves of the dead were, or were intended to be, in every respect similar to the homes of the living. The *lucumo* lay in his robes, the warrior in his armor on the bed on which he had reposed in life, surrounded by the furniture, the vessels, and the ornaments which had adorned his dwelling when alive, as if he were to live again in a new world with the same wants and feelings as before. Besides this, no tall stèle and no sepulchral mound has yet been found in the hills or plains of Judæa, nor have we any hint either in the Bible or Josephus of any such having existed which could be traced to a strictly Jew-

ish origin. In very distinct contrast to all this, the sepulchral rites of the Jews were marked with the same simplicity that characterized all their religious observances. The body was washed and anointed (Mark xiv, 8; xvi, 1; John xix, 39, etc.), wrapped in a clean linen cloth, and borne without any funeral pomp to the grave, where it was laid without any ceremonial or form of prayer. In addition to this, with kings and great persons there seems to have been a "great burning" (2 Chron. xvi, 14; xxi, 19; Jer. xxxiv, 5), all these being measures more suggested by sanitary exigencies than by any hankering after ceremonial pomp.

2. *Normal Style*.—This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres—the *deep loculus*—which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the annexed diagram, representing the forms of Jewish sepulture. In the apartment marked

Regular Plan of Jewish Sepulchre.

A, there are twelve such loculi about two feet in width by three feet high. On the ground-floor these generally open on the level of the floor; when in the upper story, as at C, on a ledge or platform, on which the body might be laid to be anointed, and on which the stones might rest that closed the outer end of each loculus. The shallow loculus is shown in chamber B, but was apparently only used when sarcophagi were employed, and therefore, so far as we know, only during the Græco-Roman period, when foreign customs came to be adopted. The shallow loculus would have been singularly inappropriate and inconvenient where an unembalmed body was laid out to decay, as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus, on the other hand, was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end and luted into the groove which usually exists there. This fact is especially interesting, as it affords a key to much that is otherwise hard to be understood in certain passages in the New Test. Thus in John xi, 39, Jesus says, "Take away the stone," and (ver. 40) "they took away the stone," without difficulty, apparently; which could hardly have been the case had it been such a rock as would be required to close the entrance of a cave. Also in xx, 1 the same expression is used, "the stone is taken away;" and though the Greek word in the other three Evangelists certainly implies that it was *rolled* away, this would equally apply to the stone at the mouth of the loculus, into which the Marys must have then stooped down to look in. In fact, the whole narrative is infinitely more clear and intelligible if we assume that it was a stone closing the end of a rock-cut grave than if we suppose it to have been a stone closing the entrance or door of a hypogeum. In the latter case the stone to close a door—say six feet by three feet—could hardly have weighed less than three or four tons, and could not have been moved without machinery. There is one catacomb—that known as the "Tombs of the Kings" (see below)—which is closed by a stone rolling across its entrance; but it is the only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock tombs around Jerusalem, nor could the traces of it have been obliterated had it anywhere existed. From the nature of the openings where they are natural caverns,

and the ornamental form of their doorways which are architecturally adorned, it is evident, except in one instance, that they could not have been covered by stones rolled across their entrances; and consequently it seems only to be to the closing of the loculus these expressions can refer. But until a more complete and more scientific exploration of these tombs has been given to the public, it is difficult to feel quite certain on this point.

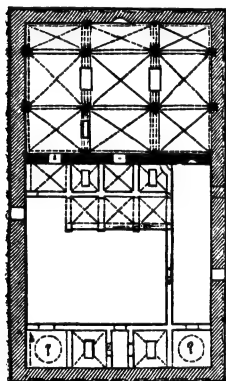

Although, as we have seen, the Jews were so free from the pomps and vanities of funeral pomp, and hence, they were at all stages of their independence an eminently burying people. From their entrance into the Holy Land till their removal by the Romans they seem to have attached the greatest importance to the possession of an undisturbed place for the bodies of their dead, and in all ages to have shown the greatest respect, if not veneration, for the sepulchres of their ancestors. Few, if any, could enjoy the luxury of a rock-cut tomb. The few that are known, and all that are likely to be discovered, there are not probably 500, certainly not 1000, loculi in or about Jerusalem; and as that city in the days of its prosperity have possessed a population of from 30,000 to 40,000 souls, it is evident that the place of the people must then, as now, have been crowded with graves dug in the earth, but situated as near as possible to the places as their means would allow their bodies to be placed. The bodies of the kings were buried in the Temple walls (Ezek. xliii, 7-9), and, however they may have done in their life, the place of their burial is carefully recorded in the Chronicles of the Kings. The cause why that place was chosen is generally not known, as if that record was not only the most important event, but the final judgment on the life of the king.

3. *Talmudical Statements*.—The Mishnic description of a sepulchre, complete according to Rabbinical law, is somewhat as follows, and serves to illustrate the plan: a cavern about six cubits square, or six cubits from three sides of which are recessed long narrow vaults, called *ביתים*, each large enough to hold a corpse. On the fourth side the cavern is approached through a small open covered court or portico, large enough in size to receive the bier and bearers. In some of these structures the *dæmoniæ* may have housed. From the court to the cavern was closed by a large stone, called *גזל*, as capable of being rolled away, thus furnishing the Evangelistic narrative. Sometimes such caverns, each with its recesses, were entered from the several sides of the same portico (Mishna *Bathra*, 6, 8, quoted by J. Nicolaus, *De Sepulchris*). Such a tomb is that described in *Ham's Travels in Arabia* (p. 158), and those mentioned in tradition as the "Tombs of the Kings" (above). But earlier sepulchres were doubtless more numerous, and to judge from 2 Kings xiii, 21, did not require mutual contact of remains. Sepulchres were sometimes by pillars, as that of Rachel, or by a wall, as those of the Asmonæans at Modin (Josephus, *J. Ant.* vi, 6, 7), and had places of higher and lower honor. In the temples, they were, from their assumed inviolability, sometimes made the depositories of treasures (Josephus, *J. Ant.* ii, 183). We find them also distinguished by a "title" (2 Kings xxiii, 17). Such as were reserved for the rich were scrupulously "whited" (Matt. 23, 27) once a year, after the rains before the Passover, to warn passers-by of defilement (Hottinger, *Chron.* p. 1034; Rosseusch, *De Sepul. Calce Notat.* in *Chron.* xxxiii).

III. *Historical Notices of Hebrew Sepulchres* derived from certain Antique Jewish Tombs situated in the Holy Land.

—1. *Sepulchres of the Patriarchs and other Eminent Persons*.—We find that one of the most striking events in the life of Abraham is the purchase of the Cave of Machpelah at Hebron, in which was the sepulchre of his father Isaac, and of his brother Jacob, in order that he might there

Sarah, his wife, and that it might be a sepulchre for himself and his children. His refusing to accept the privilege of burying there as a gift shows the importance Abraham attached to the transaction, and he insisted on purchasing and paying for it (Gen. xxiii, 20), in order that it might be "made sure unto him for the possession of a burying-place." There he and his immediate descendants were laid 3700 years ago, and there they are believed to rest now; but no one in modern times has seen their remains, or been allowed to enter into the cave where they repose. A few years ago, Signor Pierotti says, he was allowed, in company with the pasha of Jerusalem, to descend the steps to the iron grating that closes the entrance and to look into the cave. What he seems to have seen was that it was a natural cavern, untouched by the chisel and unaltered by art in any way. Those who accompanied the prince of Wales in his visit to the mosque were not permitted to see even this entrance. All they saw was the round hole in the floor of the mosque which admits light and air to the cave below. The same round opening exists at Neby Samwil in the roof of the reputed sepulchre of the prophet Samuel, and at Jerusalem there is a similar opening into the tomb under the dome of the rock. In the former it is used by pious votaries to drop petitions and prayers into the tombs of patriarchs and prophets. The latter having lost the tradition of its having been a burying-place, the opening now only serves to admit light into the cave below. Unfortunately, none of those who have visited Hebron have had sufficient architectural knowledge to be able to say when the church or mosque which now stands above the cave was erected; but there is no great reason for doubting that it is a Byzantine church erected there between the age of Constantine and that of Justinian. From such indications as can be gathered, it seems of the later period. On its floor are sarcophagi purporting to be those of the patriarchs; but, as is usual in Eastern tombs, they are only cenotaphs representing those that stand below, and which are esteemed too sacred for the vulgar to approach. Though it is much more easy of access, it is almost as difficult to ascertain the age of the wall that encloses the sacred precincts of these tombs. From the account of Josephus (*War*, iv, 7), it does not seem to have existed in his day, or he surely would have mentioned it; and such a citadel could hardly fail to have been of warlike importance in those troublous times. Besides this, we do not know of any such enclosure encircling any tombs or sacred place in Jewish times, nor can we conceive any motive for so secluding these graves. There are not any architectural mouldings about this wall which would enable an archaeologist to approximate its date; and if the bevelling is assumed to be a Jewish arrangement (which is very far from being exclusively the case), on the other hand it may be contended that no buttressed wall of Jewish masonry exists anywhere. There is, in fact, nothing known with sufficient exactness to decide the question, but the probabilities certainly tend towards a Christian or Saracenic origin for the whole structure, both internally and externally. See MACHPELAH.

Plan of the Mosque at Hebron.

For *Joseph's Tomb* and *Rachel's Tomb*, see those articles respectively. Aaron died on the summit of Mount Hor (Numb. xx, 28; xxxiii, 39), and we are led to infer he was buried there, though it is not so stated; and we have no de-

tails of his tomb which would lead us to suppose that anything existed there earlier than the Mohammedan Kubr that now crowns the hill overlooking Petra, and it is, at the same time, extremely doubtful whether that is the Mount Hor where the high-priest died. See HOR.

Moses died in the plains of Moab (Deut. xxxiv, 6), and was buried there, "but no man knoweth his sepulchre to this day," which is a singular utterance, as being the only instance in the Old Test. of a sepulchre being concealed, or of one being admitted to be unknown. See NEBO.

Joshua was buried in his own inheritance in Timnath-serah (Josh. xxiv, 30), and Samuel in his own house at Ramah (1 Sam. xxv, 1), an expression which we may probably interpret as meaning in the garden attached to his house, as it is scarcely probable it would be the dwelling itself. We know, however, so little of the feelings of the Jews of that age on the subject that it is by no means improbable that it may have been in a chamber or loculus attached to the dwelling, and which, if closed by a stone carefully cemented into its place, would have prevented any annoyance from the circumstance. Joab (1 Kings ii, 34) was also buried "in his own house in the wilderness." In fact, it appears that from the time when Abraham established the burying-place of his family at Hebron till the time when David fixed that of his family in the city which bore his name, the Jewish rulers had no fixed or favorite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.

2. *Sepulchre of David.*—Of the twenty-two kings of Judah who reigned at Jerusalem from 1048 to 590 B.C., eleven, or exactly one half, were buried in one hypogeum in the "city of David." The names of the kings so lying together were David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Ahaziah, Amaziah, Jotham, Hezekiah, and Josiah, together with the good priest Jehoiada. Of all these it is merely said that they were buried in "the sepulchres of their fathers" or "of the kings" in the city of David, except of two—Asa and Hezekiah. Of the first it is said (2 Chron. xvi, 14), "they buried him in his own sepulchres which he had made for himself in the city of David, and laid him in the bed [loculus?], which was filled with sweet odors, and divers spices prepared by the apothecaries' art: and they made a very great burning for him." It is not quite clear, however, whether this applies to a new chamber attached to the older sepulchre, or to one entirely distinct, though in the same neighborhood. Of Hezekiah it is said (xxxii, 33), they buried him in "the chiefest [or highest] of the sepulchres of the sons of David," as if there were several apartments in the hypogeum, though it may merely be that they excavated for him a chamber above the others, as we find frequently done in Jewish sepulchres. Two more of these kings (Jehoram and Joash) were buried also in the city of David, "but not in the sepulchres of the kings"; the first because of the sore diseases of which he died (xxi, 20); the second apparently in consequence of his disastrous end (xxiv, 25); and one king, Uzziah (xxvi, 23), was buried with his fathers in the "field of the burial of the kings," because he was a leper. All this evinces the extreme care the Jews took in the selection of the burying-places of their kings, and the importance they attached to the record. It should also be borne in mind that the highest honor which could be bestowed on the good priest Jehoiada (xxiv, 16) was that "they buried him in the city of David among the kings, because he had done good in Israel, both towards God and towards his house."

The passage in Neh. iii, 16, and in Ezek. xliii, 7, 9, together with the reiterated assertion of the books of Kings and Chronicles, that these sepulchres were situated in the city of David, leave no doubt that they were on Zion (q. v.). It is quite clear, however, that

the spot was well known during the whole of the Jewish period, inasmuch as the sepulchres were again and again opened as each king died; and from the tradition that Hyrcanus and Herod opened these sepulchres (*Ant.* xiii, 8, 4; xvi, 7, 1). The accounts of these last openings are, it must be confessed, somewhat apocryphal, resting only on the authority of Josephus; but they prove at least that he considered there could be no difficulty in finding the place. It was a secret transaction, if it took place, regarding which rumor might fashion what wondrous tales it pleased, and no one could contradict them; but there having been built a marble stèle (*Ant.* xvi, 7, 1) in front of the tomb may have been a fact within the cognizance of Josephus, and would, at all events, serve to indicate that the sepulchre was rock-cut, and its site well known. So far as we can judge from this and other indications, it seems probable there was originally a natural cavern in the rock in this locality, which may afterwards have been improved by art, and in the sides of which loculi were sunk, where the bodies of the eleven kings and of the good high-priest were laid, without sarcophagi or coffins, but "wound in linen clothes with the spices, as the manner of the Jews is to bury" (*John* xix, 40).

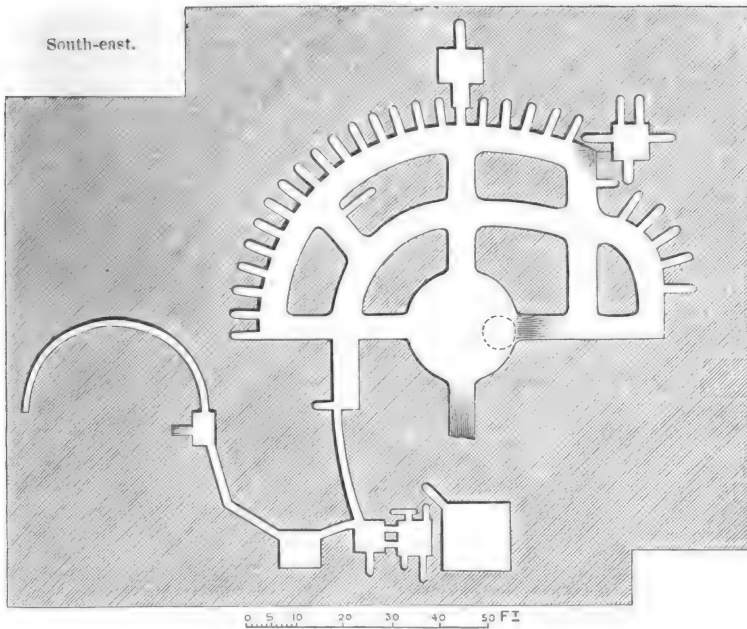

Modern tradition has assigned the name of the *Tomb of David* (also of Solomon) to a structure still standing on Mount Zion outside the present city walls, otherwise called the *Cœnaculum*, from the tradition that it was likewise the building in which the Lord's supper was instituted. From the time of the notice by the apostle Peter (*Acts* ii, 29), which shows that the true site was then well known, the royal tombs appear to have been forgotten, or at least they are not mentioned till the close of the 11th century, when Raymond d'Agiles, one of the historians of the first crusade, says regarding the *Cœnaculum*, "There are also in that church . . . the sepulchres of king David and Solomon, and of the holy protomartyr Stephen" (*Gesta Dei per Francos*, p. 174). In the next century Benjamin of Tudela visited the holy city, and wrote the following singular story, which has perhaps some foundation in fact: "On Mount Zion are the sepulchres of the house of David, and those of the kings who reigned after him. In consequence of the following circumstance, this place is hardly to be recognised. Fifteen years ago one of the walls of the church on Zion (the *Cœnaculum*) fell down, and the patriarch commanded the priest to repair it. He ordered stones to be taken from the original wall of Zion for that purpose, and twenty workmen were hired at stated wages, who broke stones taken from the very foundation of the wall of Zion. Two laborers thus employed found a stone which covered the mouth of a cave. This they entered in search of treasures, and proceeded until they reached a large hall, supported by pillars of marble, encrusted with gold and silver, and before which stood a table with a golden sceptre and crown. This was the sepulchre of David; to the left they saw that of Solomon in a similar state; and so on the sepulchres of the other kings buried there. They saw chests locked up, and were on the point of entering when a blast of wind like a storm issued from the mouth of the cave with such force that it threw them lifeless on the ground. They lay there until evening, when they heard a voice commanding them to go forth from the place. They immediately rushed out and communicated the strange tale to the patriarch, who summoned a learned rabbi, and heard from him that this was indeed the tomb of the great

The "Tomb of David" at Jerusalem. (From a photograph by the Editor.)

king of Israel. The patriarch ordered the tomb to be walled up so as to hide it effectually." The narrator closes by the statement, "The above-mentioned rabbi told me all this." About the middle of the 15th century the tombs are mentioned by several travellers, and one (Tucher of Nuremberg, A.D. 1479) says that the Moslems had converted the crypt, or lower story of the *Cœnaculum*, into a mosque, within which were shown the tombs of David, Solomon, and the other kings. In the following century, Fûrer, a German traveller, professes to have visited the tombs, and gives a brief description. "On the left of the *Cœnaculum*, under the choir, is a large vaulted cave; from it we come by a narrow passage, shut in by wooden rails, to an arch on the left, in which is a very long and lofty monument cut entirely out of the rock, with carving admirably executed. Under this are buried David, Solomon, and the other kings of Judah." This account also partakes of the marvellous, and must be received with caution. It is a fact, however, that Jews, Christians, and Moslems have now for more than four centuries agreed in regarding the *Cœnaculum* as the spot beneath which the dust of the kings of Judah lies. Numbers of Jews may be often seen standing close to the venerable building, looking with affectionate sadness towards the spot. In 1839 Sir Moses Montefiore and his party were admitted to the mosque. They were led to a trellised doorway, through which they saw the tomb, but they were not permitted to enter. A few years ago an American lady, daughter of Dr. Barclay, was enabled, through the kindness of a Mohammedan lady friend, to enter and sketch the sacred chamber. She says, "The room is insignificant in its dimensions, but is furnished very gorgeously. The tomb is apparently an immense sarcophagus of rough stone, and is covered by green satin tapestry richly embroidered with gold. A satin canopy of red, blue, green, and yellow stripes hangs over the tomb; and another piece of black velvet tapestry embroidered in silver covers a door in one end of the room, which, they said, leads to a cave underneath. Two tall silver candlesticks stand before this door, and a little lamp hangs in a window near it, which is kept constantly burning" (*City of the Great King*, p. 212). The real tomb, if it be in this place, must be in the cave below. The structure covered with satin and described by Miss Barclay is merely a cenotaph, like those in the mosque at Hebron. When both mosque and cave are thrown open, and full opportunity given for the search, then, and not till then, can it be satisfactorily established that the royal tombs are or are not in this place (*Porter, Hand-book for Palestine*, p. 181 sq.).

Besides the kings above enumerated, Manasseh was, according to the book of Chronicles (2 Chron. xxxiii, 20) buried in his own house, which the book of Kings (2 Kings xxi, 18) explains as the "garden of his own house, the garden of Uzza," where his son Amon was buried, also, it is said, in his own sepulchre (*ver.* 26);

Plan of the "Tombs of the Prophets" on Olivet.

but we have nothing that would enable us to indicate where this was; and Ahaz, the wicked king, was, according to the book of Chronicles (2 Chron. xxviii, 27), "buried in the city, even in Jerusalem, and they brought him not into the sepulchres of the kings of Israel." The fact of these last three kings having been idolaters, though one reformed, and their having all three been buried apparently in the city, proves what importance the Jews attached to the locality of the sepulchre, but also tends to show that burial within the city, or the enclosure of a dwelling, was not so repulsive to their feelings as is generally supposed. It is just possible that the rock-cut sepulchre under the western wall of the present Church of the Holy Sepulchre may be the remains of such a cemetery as that in which the wicked kings were buried.

For the sepulchres of the Maccabees, see MODIN. For the modern or traditional "Tombs of the Kings" near Jerusalem, see below.

3. *The "Tombs of the Prophets."*—The neighborhood of Jerusalem is thickly studded with tombs, many of them of great antiquity. A succinct but valuable account of them is given in Porter's *Hand-book* (p. 143 sq.); but it is only necessary in this article to refer to two or three of the most celebrated. The only important hypogeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier, or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mount of Olives. See OLIVER. "Through a long descending gallery, the first part of which is winding, we enter a circular chamber about twenty-four feet in diameter and ten high, having a hole in its roof. From this chamber two parallel galleries, ten feet high and five wide, are carried southwards through the rock for about sixty feet; a third diverges south-east, extending forty feet. They are connected by two cross galleries in concentric curves, one at their extreme end, the other in the middle. The outer one is 115 feet long and has a range of thirty niches on the level of its floor, radiating outwards. Two small chambers with similar niches also open into it." This tomb, or series of tombs, has every appearance of having originally been a natural cavern improved by art, and with an external gallery some 140 feet in extent, into which twenty-seven deep or Jew-

ish loculi open. Other chambers and loculi have been commenced in other parts, and in the passages there are spaces where many other graves could have been located, all which would tend to show that it had been disused before completed, and consequently was very modern. But, be this as it may, it has no architectural mouldings, no sarcophagi or shallow loculi, nothing to indicate a foreign origin, and may therefore be considered, if not an early, at least as the most essentially Jewish of the sepulchral excavations in this locality—every other important sepulchral excavation being adorned with architectural features and details betraying most un-

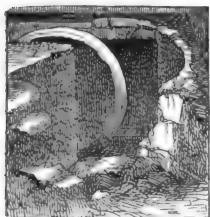

mistakably their Greek or Roman origin, and fixing their date, consequently, as subsequent to that of the Maccabees; or, in other words, like every other detail of pre-Christian architecture in Jerusalem, they belong to the 140 years that elapsed from the advent of Pompey till the destruction of the city by Titus.

4. *The "Tombs of the Kings."*—The most important of the great groups in the vicinity of Jerusalem is that known as *Kebûr es-Sultan*, or the *Royal Caverns*, so called because of their magnificence, and also because that name is applied to them by Josephus, who, in describing the third wall, mentions them (*σπήλαια βασιλικά* [*War*, v, 4, 2]). By some, however, they are identified with the *Monument of Herod* (*ibid.* 3, 2; 12, 2); by others, as Robinson and Porter, with the tomb of Helena, the widowed queen of Monobazus, king of Adiabene. She became a proselyte to Judaism, and fixed her residence at Jerusalem, where she relieved many of the poor during the famine predicted by Agabus in the days of Claudius Cæsar (Acts xi, 28), and built for herself a tomb, as we learn from Josephus (*Ant.* xx, 2, 1 sq.; 4, 3; *War*, v, 2, 2; 4, 2; Pausan. viii, 16, 5; Euseb. ii, 12; Jerome, *Epit. Paulæ*). See JERUSALEM. Into the question of the origin of these tombs it is, however, unnecessary to enter; but their structure claims our attention. They are excavated out of

Façade of the Entrance to the "Tombs of the Kings."

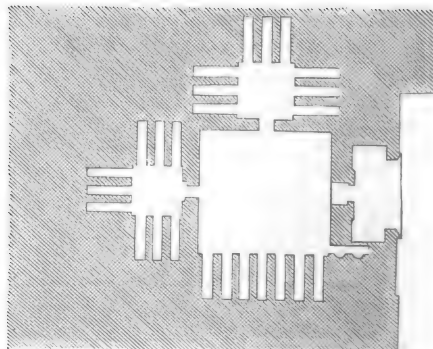

the rock. The traveller passes through a low arched doorway into a court ninety-two feet long by eighty-seven wide. On the western side is a vestibule or porch thirty-nine feet wide. The open front was supported by two columns in the middle. Along the front extend a deep frieze and cornice, the former richly ornamented. At the southern side of the vestibule is the entrance to the tomb. The architecture exhibits the same ill-understood Roman-Doric arrangements as are found in all these tombs, mixed with bunches of grapes, which first appear on Maccabean coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of any age. Its connection, however, with that of the tombs of Jehoshaphat and the Judges fixes it to the same epoch. The entrance doorway of this tomb is below the level of the ground, and concealed, so far as anything can be said to be which is so architecturally adorned; and it is remarkable as the only instance of this quasi-concealment at Jerusalem. It is closed

Rolling Stone at the Door of the "Tombs of the Kings."

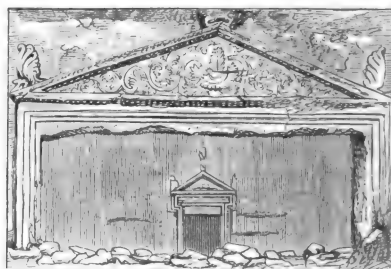

by a very curious and elaborate contrivance of a rolling stone, often described, but very clumsily answering its purpose. This, also, is characteristic of its age, as we know from Pausanias that the structural marble monument of queen Helena of Adiabene was remarkable for a similar piece of misplaced ingenuity. Within, the tomb consists of a vestibule or entrance-hall about twenty feet square, from which three other square apartments open, each surrounded by deep loculi. These again possess a peculiarity not known in any other tomb about Jerusalem, of having a square apartment either beyond the head of the loculus or on one side: as, for instance, A A have their inner chambers, A' A', within, but B and B', at B' B', on one side. What the purpose of these was it is difficult to guess, but, at all events, it is not Jewish. But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagus chamber D, in which two sarcophagi were found, one of which was brought home by De Saulcy, and is now in the Louvre.

5. *The "Tombs of the Judges."*—The hypogeum now known by this name is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories

Plan of the "Tombs of the Judges."

with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground: the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character. The latter, as before stated, is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it. It might, of course, be difficult to prove

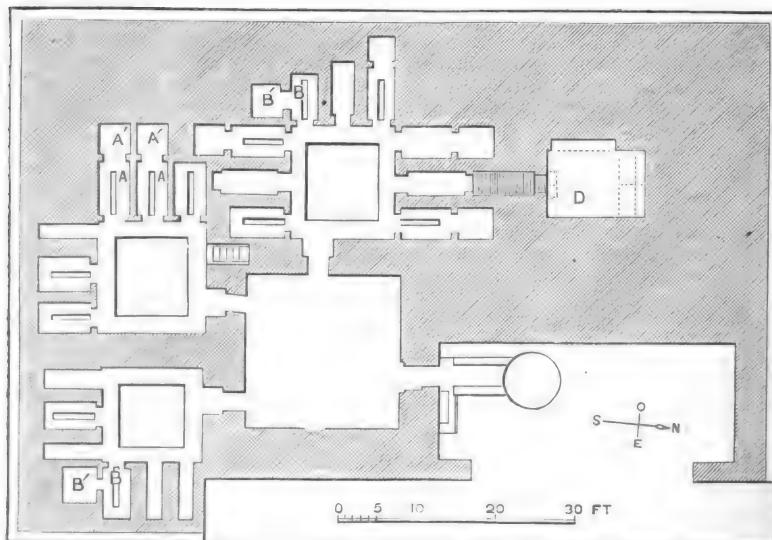

Facade of the "Tombs of the Judges."

this, as we know so little of what Jewish architecture really is; but we do know that the pediment is more essentially a Greek invention than any other part of their architecture, and was introduced at least not previously to the age of the Cypselide, and this peculiar form not till long afterwards, and this particular example not till after an age when the debased Roman of the Tomb of Absalom had become possible.

6. *Tombs in the Valley of Jehoshaphat.*—There are three conspicuous sepulchres here, which we briefly describe in the order in which they occur, beginning at the south. See JEHOSEPHAT, VALLEY OF.

(1.) The so-called "Tomb of Zechariah," said to have been constructed in honor of Zechariah, who was slain "between the temple and the altar" in the reign of Joash (2 Chron. xxiv, 21; Matt. xxiii, 35), is held in great veneration by the Jews. It is doubtful, however,

Plan of the "Tombs of the Kings."

"Tomb of Zechariah."

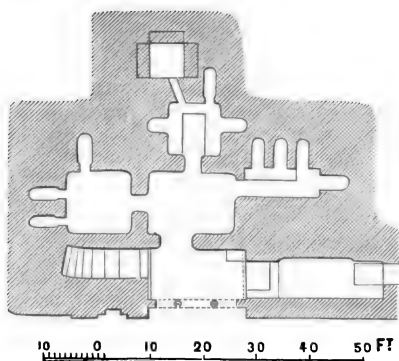

whether it be a tomb at all, and the style of architecture can scarcely be earlier than our æra. It bears a considerable resemblance to the so-called Tomb of Absalom, the northernmost of the three. It consists of a square solid basement, measuring eighteen feet six inches each way, and twenty feet high to the top of the cornice. On each face are four engaged Ionic columns between antæ, and these are surmounted, not by an Egyptian cornice, as is usually asserted, but by one of purely Assyrian type, such as is found at Khorsabad.

Section of Stylabate at Khorsabad.

As the Ionic or voluted order came also from Assyria, this example is, in fact, a purer specimen of the Ionic order than any found in Europe, where it was always used by the Greeks with a quasi-Doric cornice. Notwithstanding this, in the form of the volutes—the egg-and-dart moulding beneath, and every detail—it is so distinctly Roman that it is impossible to assume that it belongs to an earlier age than that of their influence. Above the cornice is a pyramid rising at rather a sharp angle, and hewn, like all the rest, out of the solid rock. It may further be remarked that only the outward face, or that fronting Jerusalem, is completely finished, the other three being only blocked out (De Saulcy, ii, 303), a circumstance that would lead us to suspect that the works may have been interrupted by the fall of Jerusalem, or some such catastrophe; and this may possibly also account for there being no sepulchre on its rear, if such be really the case. To call this building a tomb is evidently a misnomer, as it is absolutely solid—hewn out of the living rock by cutting a passage around it. It has no external chambers, nor even the semblance of a doorway. From what is known of the explorations carried on by M. Renan about Byblus, we should expect that the tomb, properly so called, would be an excavation in the passage behind the monolith—but none such has been found (probably it was never looked for)—and that this monolith is the stelé or indicator of that fact. If it be so, it is very singular, though very Jewish, that any one should take the trouble to carve out such a monument without putting an inscription or symbol on it to mark its destination or to tell in whose honor it was erected.

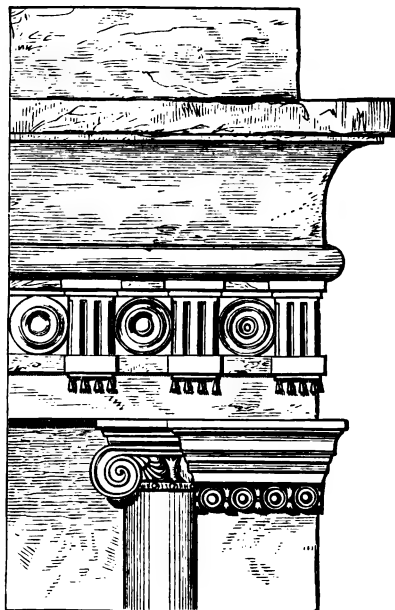

(2.) The middle tomb of this group, called that of St. James, is of a very different character. It consists of a veranda with two Doric pillars in *antis*, which may be characterized as belonging to a very late Greek order rather than a Roman example. Behind this screen

Plan of the "Tomb of St. James."

are several apartments, which in another locality we might be justified in calling a rock-cut monastery appropriated to sepulchral purposes, but in Jerusalem we know so little that it is necessary to pause before applying any such designation. In the rear of all is an apartment, apparently unfinished, with three shallow loculi, meant for the reception of sarcophagi, and so indicating a post-Jewish date for the whole, or at least for that part of the excavation.

(3.) The remaining or so-called Tomb of Absalom is somewhat larger, the base being about twenty-one feet square in plan, and probably twenty-three or twenty-four to the top of the cornice. Like the other, it is of the Roman-Ionic order, surmounted by a cornice of Ionic type; but between the pillars and the cornice a frieze, unmistakably of the Roman-Doric order, is introduced, so Roman as to be in itself quite sufficient to fix its epoch. It is by no means clear whether it had originally a pyramidal top like its neighbor. The existence of a square blocking above the cornice would lead us to suspect it had not; at all events, either at the time of its excavation or subsequently this was removed, and the present very peculiar termination erected, raising its height to over sixty feet. At the time this was done a chamber was excavated in the base, we must assume for sepulchral purposes, though how a body could be introduced through the narrow hole above the cornice is by no means clear, nor, if inserted,

Angle of the "Tomb of Absalom."

how disposed of in the two very narrow loculi that exist. The great interest of this excavation is, that immediately in rear of the monolith we do find just such a sepulchral cavern as we should expect. It is called the Tomb of Jehoshaphat, with about the same amount of discrimination as governed the nomenclature of the others, but is now closed by the rubbish and stones thrown by the pious at the Tomb of the Undutiful Son, and consequently its internal arrangements are unknown; but externally it is crowned by a pediment of considerable beauty, and in the same style as that of the Tombs of the Judges, mentioned above—showing that these two, at least, are of the same age, and that this one, certainly, must have been subsequent to the excavation of the monolith; so that we may feel perfectly certain that the two groups are of one age, even if it should not be thought quite clear what that age may be. See ABSALOM'S PILLAR.

7. *Other Græco-Roman Tombs.*—Besides the tombs above enumerated, there are around Jerusalem, in the valleys of Hinnom and Jehoshaphat, and on the plateau to the north, a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain that they are all of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The proof of this would be easy if it were not that, like everything Jewish, there is a remarkable absence of inscriptions which can be assumed to be original. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern, the inscriptions being all of Christian import, and of such a nature as to render it extremely doubtful whether the chambers were sepulchral at all, and not rather the dwellings of ascetics, and originally intended to be used for this purpose. These, however, are neither the most important nor the most architectural—indeed, none of those in that valley are so remarkable as those in the other localities just enumerated. The most important of those in the Valley of Hinnom is that known as the "Retreat-place of the Apostles." It is an unfinished excavation of extremely late date, and many of the others look much more like dwellings for the living than resting-places of the dead.

In the village of Siloam there is a monolithic cell of singularly Egyptian aspect, which De Saulcy (*Voyage autour de la Mer Morte*, ii, 306) assumes to be a chapel of Solomon's Egyptian wife. It is probably of very much more modern date, and is more Assyrian than Egyptian in character; but as he is probably quite correct in stating that it is not sepulchral, it is only necessary to mention it here in order that it may not be confounded with those that are so. It is the more worthy of remark, as one of the great difficulties of the subject arises from travellers too readily assuming that every cutting in the rock must be sepulchral. It may be so in Egypt, but it certainly was not so at Cyrene or Petra, where many of the excavations were either temples or monastic establishments; and it certainly was not universally the case at Jerusalem, though our information is frequently too scanty to enable us always to discriminate exactly to which class the cutting in the rock may belong.

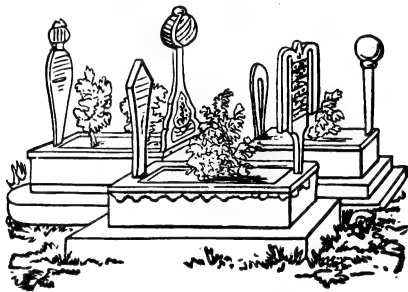

The same remarks as are above made respecting the "Tombs of the Judges" apply to the tomb without a name, and merely called "a Jewish tomb," in their neighborhood, with bevelled facets over its façade, but with late Roman-Doric details at its angles, sufficient to indicate its epoch; but there is nothing else about these tombs requiring especial mention (see Thomson, *Land and Book*, ii, 492).

The comparative lateness of the so-called sepulchre of Gamaliel and other rabbins at Meirôn is proved by the presence of sarcophagi still within them (Thomson, *Land and Book*, i, 433).

Since the destruction of Jerusalem by Titus, none of the native inhabitants have been in a position to in-

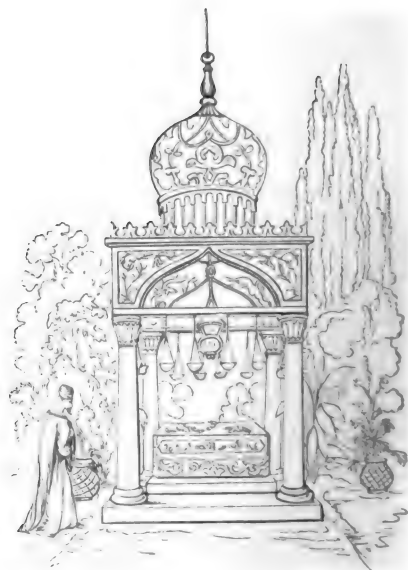

dulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogæa, and no structural monuments that arrest attention in modern times.

IV. *Comparison with Modern Oriental Tombs.*—The style of the public cemeteries around the cities of ancient Palestine in all probability resembled that of the present burying-places of the East, of which Dr. Shaw gives the following description: "They occupy a large space, a great extent of ground being allotted for the purpose. Each family has a portion of it walled in like a garden, where the bones of its ancestors have remained undisturbed for many generations. For in these enclosures the graves are all distinct and separate; each of them having a stone placed upright, both at the head and feet, inscribed with the name or title of the deceased; while the intermediate space is either planted with flowers, bordered round with stone, or paved with tiles." Examples of these tombs are given in the ac-

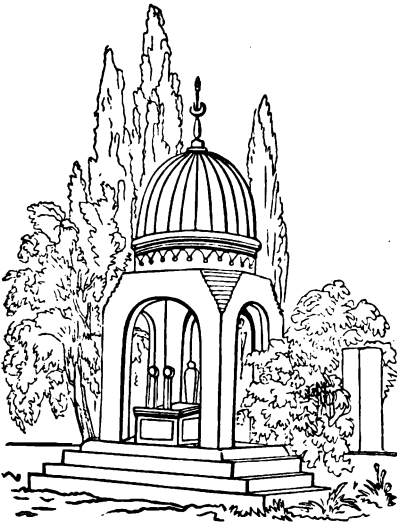

Modern Syrian Tombs.

companying cuts. By these it is seen that, as among people in good circumstances, the monumental stones are placed upon quadrangular tombs, in the centre of which evergreen or flowering shrubs are often planted, and tended with much care. There were other sepulchres which were private property, erected at the expense and for the use of several families in a neighborhood, or provided by individuals as a separate burying-place for themselves. These were situated either in some conspicuous place, as Rachel's on the highway to Bethlehem (Gen. xxxv, 19), or in some lonely and sequestered spot, under a wide-spreading tree (ver. 8) in a field or a garden. Over such garden tombs, especially when the tomb is that of some holy person, lamps

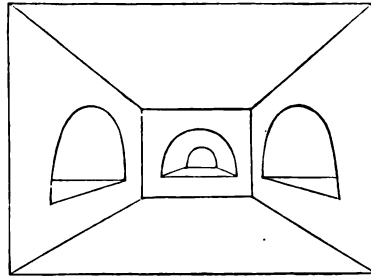

Oriental Garden Tomb.

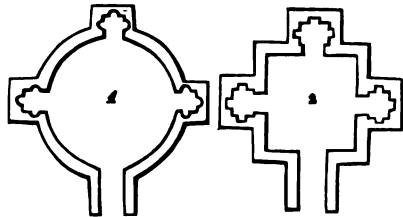

Oriental Domed Sepulchre.

are sometimes hung and occasionally lighted. The graves of the most eminent Mohammedan saints are each covered with a stone or brick edifice called *wely*. It has a dome or cupola over it, varying in height from eight to ten feet. Within lamps are often hung, and the grave proper is covered with carpet and strings of beads. Sometimes more costly ornamentation is used. In common cases, sepulchres were formed by digging a small depth into the ground. Over these, which were considered an humble kind of tomb, the wealthy and great often erected small stone buildings, in the form of a house or cupola, to serve as their family sepulchre. These are usually open at the sides. Sometimes, however, these interesting monuments are built up on all sides, so that the walls are required to be taken down, and a breach made, to a certain extent, on each successive interment. "This custom," says Carne, "which is of great antiquity, and particularly prevails in the lonely parts of Lebanon, may serve to explain some passages of Scripture. The prophet Samuel was buried in his own house at Ramah, and Joab was buried in his house in the wilderness. These, it is evident, were not their dwelling-houses, but mansions for the dead, or family vaults which they had built within their own precincts." Not unfrequently, however, those who had large establishments, and whose fortunes enabled them to command the assistance of human art and labor, purchased,

Interior of Sepulchre at Tyre.

like Abraham, some of the natural caverns with which Palestine abounded, and converted them by some suitable alterations into family sepulchres; while others, with vast pains and expense, made excavations in the solid rock (Matt. xxvii, 60). These, the entrance to which was either horizontal or by a flight of steps, had their roofs, which were arched with the native stone, so high as to admit persons standing upright, and were very spacious, sometimes being divided into several distinct apartments; in which case the remoter or innermost chambers were dug a little deeper than those that were nearer the entrance, the approach into their darker solitudes being made by another descending stair. Many sepulchres of this description are still found in Palestine; but the descent into them is so choked up with the rubbish of ages that they are nearly inaccessible, and have been explored only by a few indefatigable hunters after antiquities. Along the sides of those vast caverns niches were cut, or sometimes shelves ranged one above another, on which were deposited the bodies of the dead, while in others the ground-floor of the tomb was raised so as to make different compartments, the lowest place in the family vaults being reserved for the servants. Some of those found near Tyre, and at Alexandria, are of the round form shown in Fig. 1, but these seem exceptions; for the tombs at Jerusalem, in

Ground-plans of Oriental Sepulchres.

Asia Minor, and generally in Egypt and the East, offer the arrangements shown in Fig. 2.

On modern Oriental usages, see Hackett, *Illustrations of Scripture*, p. 97-100; De Sauley, *Dead Sea*, ii, 103-165, 170; Thomson, *Land and Book*, i, 148 sq.; Van Lennep, *Bible Lands*, p. 579 sq.; Lane, *Modern Egyptians*, i, 267, 359, etc.; and on ancient sepulture, the monographs cited by Volbeding, *Index Programmatum*, p. 49, 66, 67; and Hase, *Leben Jesu*, p. 217; and those referred to under FUNERAL.

SEPULCHRE OF CHRIST. This has been alluded to in the foregoing article, but the interest of the subject demands a fuller treatment. The traditional site is now occupied by the "Church of the Holy Sepulchre," and the question of the identity of the locality is fully discussed under CALVARY; GOLGOTHA. Its general position is sufficiently indicated under JERUSALEM, and in the maps accompanying that article and PALESTINE. A full description of the build-

Modern Sheikh's Tomb.

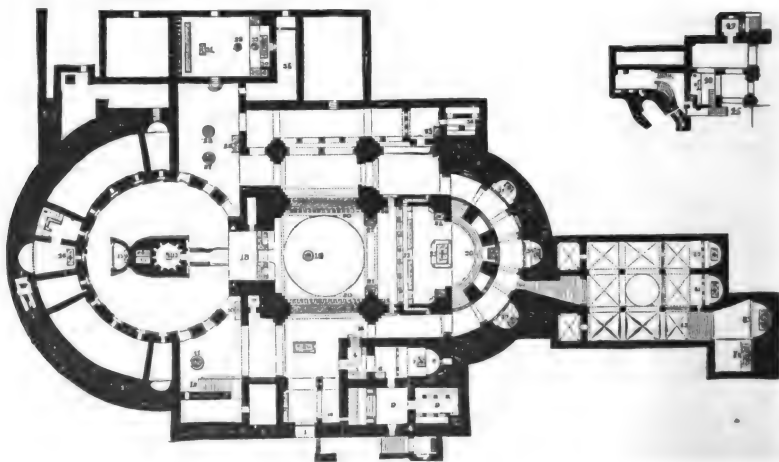

ing is given by Porter, *Hand-book for Palestine*, p. 155 sq.; also in the various books of travels in the Holy Land. We have only space for a brief outline of this extensive and interesting structure, which will be intelligible by the aid of the annexed plan.

1. *Exterior*.—The approach to it from every direction lies through narrow, filthy lanes, and small bazaars generally filled with ragged Arab women, the venders of vegetables and snails, the latter of which are much eaten here, especially during Lent. After many crooked turnings we arrive in the large square court in front of the church. Here the scene exhibited, in the height of the pilgrim season, is of the most motley and extraordinary appearance. On the upper raised steps are tables spread with coffee, sherbet, sweetmeats, and refreshments; throughout the court are seated peddlers and the Bethlehemite venders of holy merchandise, such as crosses, beads, rosaries and amulets, and mother-of-pearl shells, which are generally brought from the Red Sea, and engraved with religious subjects chiselled in relief; models of the Holy Sepulchre in wood inlaid with mother-of-pearl, and drinking-cups from the deposits of the Jordan, with verses from the Bible engraved on them; they are nearly as black as ebony, and take a fine polish. Through these wares hundreds of persons pass and repass—pilgrims of many nations in their different costumes; Latin, Armenian, Russian, Greek, and Coptish friars, with Turkish, Arnaout, and Arab soldiers—all forming the most extraordinary scene that could be found in any spot upon the globe; and a polyglot language is heard such as few other places in the world could exhibit.

The key of the church is kept by the governor of the city; the door is guarded by a Turk, and opened only at fixed hours, and then only with the consent of the three convents and in the presence of the several dragomans, an arrangement which often causes great and vexatious delays to such as desire admittance. This formality was probably intended for solemnity and effect, but its consequence is exactly the reverse; for as soon as the door is opened the pilgrims, who have almost all been kept waiting for some time and have naturally become impatient, rush in, struggling with each other, overturning the dragomans, and are thumped by the Turkish doorkeeper, and driven, like a herd of wild animals, into the body of the church.

2. *First Interior Room*.—Supposing, then, the rush over, and the traveller to have recovered from its effects, he will find himself in a large apartment, forming a sort of vestibule; on the left, in a recess in the wall, is a large divan, cushioned and carpeted, where the Turkish doorkeeper is usually sitting with half-a-dozen of his friends, smoking the long pipe and drinking coffee, and always conducting himself with great dignity and propriety. Directly in front, within the body of the church, having at each end three enormous wax candles more than twenty feet high, and a number of silver lamps suspended above it of different sizes and fashions—gifts from the Catholic, Greek, and Armenian convents—is a long flat stone called the "Stone of Unction," and on this it is said the body of our Lord was laid when taken down from the cross and washed and anointed in preparation for sepulture. This is the first object that arrests the pilgrims on their entrance, and here they prostrate themselves in succession, the old and the young, women and children, the rich man and the beggar, and all kiss the sacred stone. It is a slab of polished white marble, and only does duty as a substitute for the genuine stone, which is said to be beneath it: but this consideration in no degree affects the multitude or the fervor of the kisses it receives. As you advance towards the stone you have Mount Calvary immediately on your right hand.

Beyond the Stone of Unction the traveller finds himself in the body of the church, a space of about 300 feet in length and 160 in breadth. In front his progress is arrested by the southern exterior of the Greek Chapel, which occupies more than half the great area; on his left, at the western end, is a circular space about 100 feet in diameter, surrounded by clumsy square columns, which support a gallery above, and a dome 150 feet high, of imposing appearance and effect. This is the Latin Chapel, in the centre of which, immediately below the aperture that admits light through the dome, rises a small oblong building of marble, twenty feet long, twelve broad, and about fifteen feet in height, surmounted by a small cupola standing on columns. This little building is circular at the back, but square and finished with a platform in front. Within it is what passes for the Holy Sepulchre. We reserve its description for the last.

3. *Holy Objects in Detail.*—Leaving for a moment the throng that is constantly pressing at the door of the sepulchre, let us make the tour of the church, beginning from the south-west and proceeding by the north to the east, and so round to our starting-point. The church, be it observed, faces the four cardinal points.

The first object we have to notice is an iron circular railing, in the shape of a large parrot's cage, having within it a lamp, and marking the spot where Mary watched the crucifixion "afar off." In the arcades round the Latin dome are small chapels for the Syrians, Maronites, and other sects of Christians, who have not, like the Catholics, Greeks, and Armenians, large chapels in the body of the church. The poor Copts have nothing but a nook, about six feet square, in the western end of the sepulchre, which is tawdrily adorned in the manner of the Greeks. The Syrians have a small and very shabby recess, containing nothing but a plain altar; in the side there is a small door opening to a dark gallery, which leads, as the monks say, to the tombs of Joseph and Nicodemus, between which and that of the Saviour there is a subterranean communication. The tombs are excavated in the rock which here forms the floor of the chamber.

Farther on, and nearly in range of the front of the sepulchre, is a large opening, forming a sort of court to the entrance of the Latin Chapel. On one side is a gallery containing a fine organ; and the chapel itself is neat enough, and differs but little from those in the churches of Italy. The chapel in which the organ stands is called the "Chapel of the Apparition," where Christ appeared to the Virgin. Within the door on the right, in an enclosure completely hidden from view, is the Pillar of Flagellation, to which our Saviour was tied when he was scourged, before being taken into the presence of Pontius Pilate. As in this instance the holy object cannot be reached by the lips of the faithful, it is deemed equally efficacious to kiss it through another medium. A monk stands near the rail, and, touching the pillar with a long stick that has a piece of leather at the point of it, like a billiard-cue, stretches it towards the lips that are ready pouting to receive it. Only half the pillar is here; the other half is in one of the churches in Rome, where may also be seen the table on which our Saviour ate his last supper with his disciples, and the stone on which the cock crowed when Peter denied his Master.

Leaving the Chapel of the Apparition and turning to the left with our faces due east, we have on the right hand the outside of the Greek Chapel, which occupies the largest space in the body of the church, and on the left is a range of chapels and doors, the first of which leads to the prison where they say our Saviour was confined before he was led to the crucifixion. In front of the door is an unintelligible machine, described as the stone on which he was placed when put in the stocks.

In the semicircle at the eastern part of the church there are three chapels: one of these contains the stone on which our Lord rested previously to ascending Mount Calvary; another is the place where the soldiers parted his raiment among them; and the third marks the spot where Longinus, the soldier who pierced his side, passed the remainder of his days in penance. Beneath one of the altars lies a stone having a hole through it, and placed in a short trough, so that it seems impossible for anything but a spectre to pass through the hole. Nevertheless, the achievement was a customary penance among the Greeks, and called by them "purgatory;" but latterly the Turks have in mercy guarded the stone by an iron grating.

In this part also is the entrance to one of the most holy places in the church, the Chapel of the Cross. Descending twenty-eight broad marble steps, the visitor comes to a large chamber eighteen paces square, dimly lighted by a few distant lamps; the roof is supported by four short columns with enormous capitals. In front of the steps is the altar, and on the right a seat on which the empress Helena, advised by a dream where the true cross was to be found, sat and watched the workmen who were digging below. Descending again fourteen steps, another chamber is reached, darker and more dimly lighted than the first, and hung with faded red tapestry; a marble slab, having on it a figure of the cross, covers the mouth of the pit in which the true cross was found.

On reascending into the body of the church and ap-

The "Tomb of Christ."

proaching the vestibule through which we first entered, we find Mount Calvary on our left. This we ascend by a narrow marble staircase of eighteen steps, formed of a single stone, a fact to which the pilgrim's attention is solicited by the monks as a proof that the chapel at the top is really founded on the natural rock. But this fact would prove nothing; for there is a staircase in the Ruspoli Palazzo at Rome of one hundred and twenty steps, cut from a single block of white marble. Every visible part of the chapel is a manifest *fabric*. To this objection it is answered that "the stone-work cases the rock," which may or may not be true; but wherever examination might be allowed it seems to be purposely withheld. The chapel is about fifteen feet square, paved with marble in mosaic, and hung on all sides with silken tapestry and lamps dimly burning; it is divided by two short pillars, hung also with silk and supporting quadrangular arches. At the extremity is a large altar, ornamented with paintings and figures, and under the altar a circular silver plate with a hole in the centre, indicating the spot in which rested the step of the cross. Behind the altar and separated from it by a thin wall is a chapel, in the centre of which is a stone marking the exact spot where Abraham was about to sacrifice Isaac; and the monks state that when the cross was laid down, before it was raised, our Lord's head rested upon this point; they seem to consider the establishment of this fact necessary to the complete fulfilment of the type.

Descending to the floor of the church, we are shown another rent in the rock, said to be a continuation of the one above, but so guarded by an iron grating that examination is out of the question, as it can only be examined by thrusting a taper through the bars. Directly opposite the fissure is a large monument over the head of—Adam.

The little chapel on the spot where Mary stood when St. John received our Lord's dying injunction to protect her as his mother is an appendage to Mount Calvary.

4. *The Tomb itself.*—The reader will probably think that all these things are enough, and more than enough, to be comprised under one roof. Having finished the tour of the church, let us return to the great object of the pilgrimage to Jerusalem—the Holy Sepulchre. Taking off the shoes on the marble platform in front, the visitor is admitted by a low door, on entering which the proudest head must needs do reverence. In the centre of the first chamber is the stone which was rolled away from the mouth of the sepulchre—a square block of marble cut and polished; and, though the Armenians have lately succeeded in establishing the genuineness of the stone in their chapel on Mount Zion (the admission by the other monks, however, being always accompanied by the assertion that they stole it), yet the infatuated Greek still kisses and adores the block of marble as the very stone on which the angel sat when he announced to the women, "He is not dead; he is risen; come and see the place where the Lord lay." Again bending the head, and lower than before, the visitor enters the inner chamber, the holiest of holy places. The sepulchre "hewn out of the rock" is a marble sarcophagus, somewhat resembling a common bathing-tub, with a lid of the same material. Over it hang forty-three lamps, which burn without ceasing night and day. The sarcophagus is six feet one inch long, and occupies about one half the chamber; and, one of the monks being always present to receive the gifts or tribute of the pilgrims, there is only room for three or four at a time to enter. The walls are of a greenish marble, usually called verd-antique, and this is all. It will be borne in mind that all this is in a building above ground, standing on the floor of the church.

SEPULCHRE, CHURCH OF THE HOLY. See the preceding article and JERUSALEM.

SEPULCHRE, THE EASTER, a representation of the

entombment of our Saviour, set up in Roman Catholic churches at Easter, on the north side of the chancel, near the altar. In England, previous to the Reformation, it was most commonly a wooden erection, and placed within a recess in the wall or upon a tomb; but several churches still contain permanent stone structures that were built for the purpose, some of which are very elaborate, and are ornamented with a variety of decorations, as at Navenby and Heckington, Lincolnshire, and Hawton, Nottinghamshire, all of which are beautiful speci-

Easter Sepulchre, Stanton St. John's, Oxfordshire.

mens of the Decorated style. Sepulchres of this kind also remain in the churches at Northwold, Norfolk; Holcombe Burnell, Devonshire, and several others. The crucifix was placed in the sepulchre with great solemnity on Good-Friday, and continually watched from that time till Easter-day, when it was taken out and replaced upon the altar with especial ceremony.

SEPULCHRE, ECCLESIASTICAL, a receptacle for the blessed sacrament which is reserved, among the Latins, from the mass of Maundy-Thursday. There is a good example of an Eastern sepulchre in the north chapel of the Church of St. Mary, Haddenham, in Buckinghamshire, England.

SEPULCHRE, REGULAR CANONS OF, a religious order said to have been founded by Godfrey on the capture of Jerusalem in 1099. Many of these canons journeyed into Europe; but the order was suppressed by pope Innocent VIII, and its revenues were ultimately bestowed on the Knights of St. John of Jerusalem. According to Broughton, the suppression of the order did not extend to Poland.

Sepulveda, JUAN GINEZ DE, a Spanish writer, was born at Cordova in 1491 (or 1490). He assisted cardinal Cajetan at Naples in the revision of the Greek Testament. In 1529 he went to Rome, and in 1536 was appointed chaplain and historiographer to Charles V. He is memorable for writing a *Vindication of the Cruelties of the Spaniards against the Indians*. Charles V suppressed the publication of the work in his dominions, but it was published in Rome. He died at Salamanca in 1572. He was the author of various works besides the one mentioned, in particular of some *Latin Letters*:—*A Translation from Aristotle, with Notes*:—*A Life of Charles V and Philip. II.*, printed together at Madrid (1780, 4 vols. 4to).

Sequence. 1. The later name of the *pneuma*, a melodious and varied prolongation of the Hallelujah. 2. The announcement of the Gospel of the day when taken from the middle of the Gospels, but called *initium* when the opening words were to follow. On the four days of Holy Week the words "The Passion of our Lord Jesus Christ" replaced the ordinary sequence, or initial. 3. The name for a hymn in metre. See PROSE; SEQUENCES.

Sequences. In chanting the *Graduale* in the Mass it was customary to prolong the last syllables of the Hallelujah through a succession of notes without words, which were termed *sequences*, when considered in their combination, and *jubila* or *jubilations* with reference to their character. They were intended to indicate that feeling had reached a point at which it was too strong for expression. The difficulty of retaining a long series of notes in the memory led to efforts for devising mnemonic helps, which eventually resulted in the adoption of suitable rhythmical language in Latin *prose* to fit the music—Notker Balbulus (q. v.; died 912), a monk of St. Gall, being especially distinguished in accomplishing this kind of work. The idea was suggested to him by some verses which were modulated or fitted to the series of tones in an antiphonarium belonging to a fugitive priest of Gimedia. He attempted to improve on them, and with such success that his teacher, Marcellus, a Scotchman, had his verses collected and sung by his pupils; and also persuaded Notker to dedicate his work to some prominent personage and give it to the world. Notker thus became the originator of an edifying element of worship, which was approved by the popes and speedily introduced into wider circles; and as he not only used the succession of tones already current—the *metten-sis major* and *minor*, the *Romana* and *Amena*—but also composed new series of notes, he became the creator of an elevating, melodious choir music which was inserted in the Mass. Each piece was divided into several parts and provided with an appropriate conclusion; and, in like manner, the text, which was everywhere adapted to the melody, consisted of a number of shorter or longer sections. A poetic character was thus naturally given to the text, and such compositions were consequently called “hymns”—a term that is not misplaced when applied to those written by Notker. They were hymns of praise in which the leading features of a festival, the faithful support of the Almighty God, the Redeemer’s merits, the dignity of the Blessed Virgin, etc., are fervently presented; while in their intent they were a continuation of the Hallelujah in the Gradual, though they might also be separately employed.

These sequences were introduced into use in Germany, England, France, and other countries. Notker’s works became the type, and imitations in great number followed, until they were employed to edify the people at every festival; and more than one hundred were contained in the mass-books. The revised Roman Missal contains but five—viz. one to the Paschal lamb, intended for Easter; one for Pentecost (*Veni Sancte Spiritus*); one for Corpus-Christi Day (*Lauda, Sion, Salvatorem*, by Thomas Aquinas); one intended to glorify the Mater Dolorosa (the celebrated *Stabat Mater*; by Jacoponus); and one for use in masses *pro defunctis*, Thomas de Celano’s judgment-hymn *Dies Irae*. The last two are most unlike the early sequences, as the Hallelujah could not be chanted with them; but they are at bottom jubilee hymns like the others.

Sequentiälè is the name given to the book in which the sequences (q. v.) were contained. It was necessary to the Church so long as a complete missal comprehending all parts of the mass was not in use; after this had been provided the *sequentiale* was required only by the singers.

Sequestration, a term employed to signify the separating or setting-aside of a thing in controversy from the possession of both parties who contend for it. It is twofold—voluntary and necessary. *Voluntary* sequestration is that which is done by consent of each party; *necessary* is that which the judge, of his own authority, does, whether the party consents or not. Sequestration is also a kind of execution for debt on a benefice, issued by the bishop, by which the profits are to be paid to the creditor.

SEQUESTRATION, ENGLISH. When a judgment

has been obtained against a beneficed clergyman, and that judgment remains unsatisfied, the party entitled to the fruits of the judgment is obliged to levy the sum recovered by an execution. In the first instance he issues the ordinary writ of execution, called a *fi. fi. facias*, to which all persons are subject, directing the sheriff to levy the amount upon the goods and chattels of the defaulter. If the sheriff is able to do so, the amount is levied, and there is an end of the matter; if, on the other hand, he cannot find goods and chattels sufficient, he returns the writ to the court, stating his inability, and certifying that the individual has a rectory or other ecclesiastical benefice, as the case may be, in the county. Upon this return a writ of sequestration, called either a *levari facias de bonis ecclesiasticis*, or a *sequestrari facias*, according to the mode in which it is drawn up, issues to the bishop of the diocese, requiring him to levy the amount upon the ecclesiastical goods of the clergyman. Upon this writ the bishop or his officer makes out a sequestration, directed to the church-wardens or persons named by the bishop, or, upon proper security, to persons named by the party who issues the writ, requiring them to sequester the tithes and other profits of the benefice; which sequestration should be forthwith published, not by reading it in church during divine service (a ceremony which is, in our opinion, abolished by the second section of 7 William IV, and 1 Victoria, c. 45), but by affixing a notice of its contents at or near the church door before the commencement of the service, as required by that statute. The sequestration is a continuing charge upon the benefice, and the bishop may be called upon from time to time to return to the court an account of what has been levied under it. The court has the same power over the bishop that it has over a sheriff in respect of ordinary writs of execution; and if the bishop is negligent in the performance of his duty, or returns an untrue account of the proceedings under the writ, he is liable, in the same way as the sheriff is liable, to an action at the suit of the party damnified thereby. Sequestration is also a process of the ecclesiastical courts. When a benefice is full, the profits may be sequestered if the incumbent neglects his cure; and if there be a vacancy, the profits are to be sequestered, and to be applied so far as necessary in providing for the service of the cure during the vacancy, the successor being entitled to the surplus.

Se’rah (Heb. *Se’rach*, שֶׁרָח, perhaps *overflow*; Sept. in Gen. Σάρα [v. r. Σοπέ], but in Chron. Σαρά [v. r. Σαάρ]; also written “Sarah” [q. v.] in Numb. xxvi, 46, the daughter of Asher, son of Jacob (Gen. xlv, 17; Numb. xxvi, 46; 1 Chron. vii, 30). B.C. cir. 1864. The mention of a female in a list of this kind, in which no others of her sex are named, and contrary to the usual practice of the Jews, seems to indicate something extraordinary in connection with her history or circumstances. This has sufficed to excite the ever-active imaginations of the rabbins, and the Jews fable that she was very remarkable for piety and virtue, and was therefore privileged to be the first person to tell Jacob that his son Joseph was still living (Gen. xlv, 26), on which account she was translated alive (like Enoch) to paradise, where, according to the ancient book Zohar, are four mansions or palaces, each presided over by an illustrious woman, viz. Sarah, daughter of Asher, the daughter of Pharaoh who brought up Moses; Jochebed, mother of Moses; and Deborah the prophetess.

Sera’iah (Heb. *Serayah*, שֶׁרָיָה [once in the prolonged form, *Seraya’hu*, שֶׁרָיָהּ, Jer. xxxvi, 26], *warrior of Jehovah*; Sept. Σαράιας or Σαεία, but with many v. rr.), the proper name of eight men.

1. Second-named son of Kenaz, and father of a Joab who was head of a family of the tribe of Judah in the valley of the Charashim (1 Chron. iv, 13, 14). B.C. cir. 1560.

2. The scribe or secretary of David (2 Sam. viii, 17). B.C. cir. 1015. This person's name is in other places corrupted into *Sheya'*, שֵׁיָא; A. V. "Sheva" (2 Sam. xx, 25), "Shisha", שִׁשָּׁה (1 Kings iv, 3), and "Shavsha", שָׁוְשָׁה (1 Chron. xviii, 16).

3. Son of Asiel and father of Josibiah of the tribe of Simeon (1 Chron. iv, 35). B.C. ante 720.

4. The son of Azriel, and one of the persons charged with the apprehension of Jeremiah and Baruch (Jer. xxxvi, 26). B.C. 606.

5. The son of Neriah and brother of Baruch (Jer. li, 59, 61). He held a high office in the court of king Zedekiah, the nature of which is somewhat uncertain. In the A. V. we have, "This Seraiah was a *quiet prince*," שֵׁרָיָה נְיָרָה, which, according to Kimchi, means a *chamberlain*, or one who attended the king when he retired to rest (i. e. prince of rest); but better, perhaps, according to Gesenius, "chief of the quarters" for the king and his army, that is, *quartermaster-general*, after the meaning of *menuchâh* as a halting-place of an army (Numb. x, 33). The suggestion of Maurer, adopted by Hitzig, has more to commend it, that he was an officer who took charge of the royal caravan on its march, and fixed the place where it should halt. Hiller (*Onomast.*) says Seraiah was prince of Menuchah, a place on the borders of Judah and Dan, elsewhere called Manahath. This Seraiah was sent by Zedekiah on an embassy to Babylon, probably to render his submission to that monarch, about four years before the fall of Jerusalem. B.C. 594. He was charged by Jeremiah to communicate to the Jews already in exile a book in which the prophet had written out his prediction of all the evil that should come upon Babylon (Jer. li, 60-64). It is not stated how Seraiah acquitted himself of his task; but that he accepted it at all shows such respect for the prophet as may allow us to conclude that he would not neglect the duty which it imposed.

6. The high-priest at the time that Jerusalem was taken by the Chaldeans. B.C. 588. He was sent prisoner to Nebuchadnezzar at Riblah, who put him to death (2 Kings xxv, 18; 1 Chron. vi, 14; Jer. lii, 24; Ezra vii, 1).

7. The son of Tanhumeth the Netophathite, and one of those to whom Gedaliah promised security (2 Kings xxv, 23; Jer. xl, 8). B.C. 587.

8. A priest, the son of Hilkiah, who returned from exile (Ezra ii, 2; Neh. x, 2; xl, 11; xlii, 12). He is called Azariah (q. v.) in Neh. vii, 7. B.C. 536.

Seraphic Doctor. See BONAVENTURA.

Seraphic Hymn, the *Ter-sanctus*, or "Holy, holy, holy," which concludes the preface in the communion service. Its basis is found in Isa. vi, 3. The hymn itself occurs in every ancient liturgy. It must not be confounded with the *Trisagion* (q. v.).

Ser'aphim (Heb. *Seraphim'*, שֵׁרָפִים; Sept. Σεραφίμ, or *Seraphs*; the plural of the word שֵׁרָפָה, *sarâph*), celestial beings described in Isa. vi, 2-6 as an order of angels or ministers of God, who stand around his throne, having each six wings, and also hands and feet, and praising God with their voices. They were therefore of human form, and, like the Cherubim, furnished with wings as the swift messengers of God. Some have indeed identified the Cherubim and Seraphim as the same beings, but under names descriptive of different qualities: *Seraphim* denoting the burning and dazzling appearance of the beings elsewhere described as *Cherubim*. It would be difficult either to prove or disprove this; but there are differences between the Cherubim of Ezekiel and the Seraphim of Isaiah which it does not appear easy to reconcile. The "living creatures" of the former prophet had four wings; the "Seraphim" of the latter, six; and while the Cherubim had four faces, the Seraphim had but one (comp. Isa. vi, 2, 3; Ezek. i, 5-12). If the figures were in all cases purely sym-

bolic, the difference does not signify (see Hendewerk, *De Seraph. et Cherub. non Diversis* [Reg. 1836]). See CHERUBIM. There is much symbolical force and propriety in the attitude in which the Seraphim are described as standing, while two of their wings were kept ready for instant flight in the service of God; with two others they hid their face to express their unworthiness to look upon the Divine Majesty (see Exod. iii, 6; 1 Kings xix, 13; comp. Plutarch, *Quæst. Rom.* vol. x), and with two others they covered their feet, or the whole of the lower part of their bodies—a practice which still prevails in the East when persons appear in a monarch's presence (see Lowth, *ad loc.*). Their occupation was twofold—to celebrate the praises of Jehovah's holiness and power (Isa. vi, 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antiphonal chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of the throne. As the Seraphim are nowhere else mentioned in the Bible, our conceptions of their appearance must be restricted to the above particulars, aided by such uncertain light as etymology and analogy will supply. We may observe that the idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at Mourghaub, in Persia, we meet with a representation of a man with two pairs of wings springing from the shoulders and extending, the one pair upwards, the other downwards, so as to admit of covering the head and the feet (Vaux, *Nin. and Persep.* p. 322). The wings in this instance imply deification; for speed and ease of motion stand, in man's imagination, among the most prominent tokens of divinity. The meaning of the word "seraph" is extremely doubtful; the only word which resembles it in the current Hebrew is *sarâph*, שֵׁרָפָה, "to burn," whence the idea of *brilliance* has been extracted. Such a sense would harmonize with other descriptions of celestial beings (e. g. Ezek. i, 13; Matt. xxviii, 3); but it is objected that the Hebrew term never bears this secondary sense. Gesenius (*Thesaur.* p. 1341) connects it with an Arabic term signifying *high* or *exalted*, and this may be regarded as the generally received etymology; but the absence of any cognate Hebrew term is certainly worthy of remark. It may be seen in the article SERPENT that a species of serpent was called *saraph*, and this has led some to conceive that the Seraphim were a kind of basilisk-headed Cherubim (Bauer, *Theolog. A. T.* p. 189); or else that they were animal forms with serpent's heads, such as we find figured in the ancient temples of Thebes (Gesen. *Comment. in Jes.*). Hitzig and others identify the Seraphim with the Egyptian Serapis; for although it is true that the worship of Serapis was not introduced into Egypt till the time of the Ptolemies (Wilkinson, *Anc. Egypt.* iv, 360 s. q.), it is known that this was but a modification of the more ancient worship of Kneph, who was figured under the form of a serpent of the same kind, the head of which afterwards formed the crest of Serapis. But we can hardly conceive that the Hebrews would have borrowed their imagery from such a source. Knobel's conjecture that Seraphim is merely a false reading for *sharathim* (שָׂרָתִים), "ministers," is ingenious, but the latter word is not Hebrew. See the *Studien und Kritiken*, 1844, ii, 454. See ANGEL; CHERUB; LIVING CREATURE; TERAPHIM.

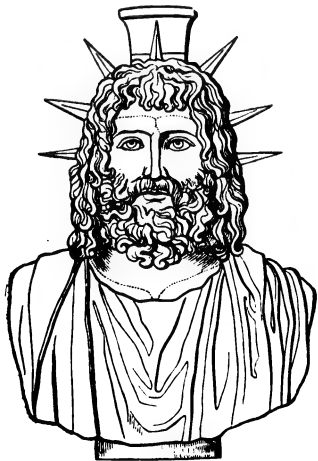

Seraphina, a keyed wind instrument, the tones of which are produced by the play of wind upon metallic reeds, as in the accordeon. It consists, like the organ, of a key-board, wind-chest, and bellows.

Serapion, bishop of Thumeos, in Egypt, called *Scholasticus* because of his eloquence and dialectical keenness, is said by Rufinus to have been abbot of numerous monasteries, and to have exercised rule over some ten thousand hermits, whom he employed in reaping at harvest-time, in order that their earnings might aid in

supporting impoverished Christians about Alexandria. Antonius and Athanasius are reported to have been his intimate friends and counsellors, the latter having secured his elevation to the bishopric. In 348 Serapion attended the Council of Sardica, and helped to procure the acquittal of Athanasius from the charges under which he lay; and when the latter had again fallen under the displeasure of the emperor Constantius, Serapion was one of the five bishops who were delegated to attempt his restoration to favor. He died A.D. 358. See Socrates, *Hist. Eccles.* iv, 23.

Chrysostom's deacon at Constantinople, under Honorius and Arcadius, was another Serapion, who aided that father in enforcing a thorough discipline among the clergy, of whom he said that only the utmost strictness could secure their improvement. The clergy were exasperated by his words and actions, and sought to excite the opposition of the populace against both reformers, but in vain; and Chrysostom ultimately made Serapion bishop of Heraclea in Thrace.

Serāpis, in Egyptian mythology, was a highly venerated god of Alexandria, whose origin was rather Grecian, however, than Egyptian. He was the Greek god of the underworld—Pluto, the giver of blessings—on whose head was placed a bushel, to denote that the ruler of the underworld causes man's nourishment to spring from the earth. He was transferred to Alexandria in the time of the Ptolemies, and unwillingly accepted by the inhabitants; but eventually forty-two temples of Serapis were enumerated in Egypt. The following fable in relation to his importation was in circulation: A beautiful youth appeared to Ptolemy I in a dream, and commanded the king to bring his statue from Sinope, revealing, at the same time, that he was Serapis, the god who gives blessings or curses. After the surmounting of many difficulties, the enterprise was at length accomplished—the god contributing to that result by going from his temple to the ship. The city of Alexandria erected to him a temple in the place Rhacotis. Political reasons may have determined this transfer from Asia to Egypt—e. g. the importance of making the new capital the central seat of religion; and this latter end was completely realized, inasmuch as Serapis took the place of Osiris, with the exception that he was never conceived of as suffering and dying. He was regarded as consort to Isis, as the sun and Nile god, and as the supreme god. The sick, also, invoked his aid, with the result that he was, in the end, confounded with Æsculapius. A marble bust in the Vatican represents him as a bearded, earnest man, with rays surrounding, and a grain-measure surmounting, his head.

Head of Serapis.

Serarius, NICHOLAS, a learned Jesuit and commentator on the Scriptures, was born in 1555 at Rambervillers, in Lorraine. After studying the languages, he taught ethics, philosophy, and theology at Würzburg and Mentz, in which last city he died, May 20, 1610, leaving many works, of which the following are the principal: *De Phariseorum, Sadduceorum, et Esenorum Sectis* (Franker, 1603; Mentz, 1604):—*Commentarius in Libros Jos., Jud., Ruth., Reg., et Paralip.* (ibid. 1609–10, 2 pts. fol.):—*Prolegomena Biblica* (ibid. 1612):—*Rabbin et Herodes* (ibid.):—*Opuscula Theologica* (3 tom. fol.):—and others which are collected in 16 vols. fol. See Fürst, *Bibl. Jud.* iii, 316; Winer, *Handbuch der theol. Literatur*.

Ser'ed (Heb. *id.* סֶרֶד, *fear*; Sept. Σέρῃδ v. r. Σαπέδ), the first named of three sons of Zebulon (Gen. xli, 14), and head of the family of the *Sardites* (Numb. xxvi, 26). B.C. cir. 1864.

Serestus, in Greek mythology, was a companion of Æneas, who gathered up the armor of Hæmonides, the priest of Apollo whom Æneas had slain, and who erected a column of victory to Mars Gradivus.

Serge (Lat. *cereus*, a wax taper). Those in a low basin were called mortars, and burned during matins at the choir door. Lyndwood says that in very many churches the two (i. e. on the altar) were furnished by the curate.

Sergeant (ῥαβδοῦχος, literally *rod-holder*, Acts xvi, 35), properly a Roman *licitor*, the public servant who bore a bundle of rods before the magistrates of cities and colonies as insignia of their office, and who executed the sentences which they pronounced.

Roman Coins exhibiting the Licitors with their *Fasces*.

Sergeant, JOHN, a Congregational minister, was born in Newark, N. J., in 1710. He graduated at Yale College in 1729, and was appointed tutor in 1731. The Commissioners for Indian Affairs having found the Indians living at *Skatehook* and *Unahktukook*, on the Housatonic River, disposed to receive a missionary, chose Mr. Sergeant for that position; and he went in October, 1734, to examine his field of labor. In August, 1735, he was ordained at Deerfield, and labored with the Indians until his death, July 27, 1749. He translated into the native language parts of the Old and all the New Test. excepting the book of Revelation. During his life one hundred and twenty-nine savages were baptized, and forty-two became members of the Church. See Sprague, *Annals of the Amer. Pulpit*, i, 388.

Sergestus, in Grecian mythology, was a companion of Æneas, who is named in connection with the sailing-match instituted by Æneas. His vessel stuck fast on a rock; but he was nevertheless rewarded with the gift of a female slave from the hero (Virgil, *Æneid*, i, 510; v, 121, etc.).

Sergiots (SERGIETS, or SERGISTS), a section of the Paulicians who held in veneration the memory and writings of one Sergius, who lived at the beginning of the 9th century. His efforts led to a division—his followers being known as Sergiots, and his opponents Baanites, after the name of their leader, Baanes. See PAULICIANS.

Ser'gius PAULUS (Græcized Σέργιος Παῦλος, a Latin name), a Roman proconsul in command at Cyprus who was converted by the preaching of Paul and Barnabas (Acts xiii, 7). A.D. 44. Sergius is described by the

evangelist as a "discreet" or "intelligent" man; by which we are probably to understand that he was a man of large and liberal views, and of an inquiring turn of mind. Hence he had entertained Elymas, and hence also he became curious to hear the new doctrine which the apostle brought to the island. The strongest minds at that period were drawn with a singular fascination to the occult studies of the East; and the ascendancy which Luke represents the "sorcerer" as having gained over Sergius illustrates a characteristic feature of the times. For other examples of a similar character, see Conybeare and Howson, *Life and Epistles of St. Paul*, i, 177 sq. But Sergius was not effectually or long deceived by the arts of the impostor; for, on becoming acquainted with the apostle, he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth. Nothing of his history subsequent to his conversion is known from Scripture. There is no reason to suppose that he abandoned his post as governor of Cyprus; but the legends assert that he did so, and followed Paul; and that eventually he went with the apostle into Spain, and was left by him at Narbonne, in France, of which he became the bishop, and died there.

The title (inaccurately rendered "deputy" [q. v.]) given to this functionary exhibits one of those minute accuracies which, apart from their inspiration, would substantiate the sacred book as a genuine and contemporary record. Cyprus was originally a *prætorian* province (*στρατηγική*), and not *proconsular*; but it was left by Augustus under the senate, and hence was governed by a *proconsul* (*ἀνθύπατος*), as stated by the evangelist (Acts xiii, 6, 8, 12; see Dion Cass. liv, 523; Kuinöl, on Acts viii, 7. For the value of this attestation to Luke's accuracy, see Lardner, *Credibility of the Gospel Narrative*, i, 32 sq.). Coins, too, are still extant on which this very title, ascribed in the Acts to Sergius Paulus, occurs as the title of the Roman governors of Cyprus (see Akerman, *Numismatic Illustrations*, p. 41; Conybeare and Howson, *Life and Epistles of St. Paul*, i, 176, 187). See CYPRUS.

Sergius, St. Several saints and martyrs occur who bear this name.

1. One is usually associated with a martyr named Bacchus, like himself a native of Rome. It is related that they were accused of being Christians, and exiled by the emperor Maximian. When nothing could induce them to sacrifice to idols, Bacchus was tortured to death and his body thrown to wild beasts, who, however, would not harm it. Sergius was then taken to Rosaph, in Syria, and tortured, but comforted by an apparition of Bacchus, while his wounds were healed by an angel. He was beheaded in 290; and the emperor Justinian is credited with having changed the name of Rosaph to Sergiopolis, while the martyr's relics were preserved in the church of that town. Oct. 7 was set apart for the commemoration of Sergius and Bacchus.

2. Another Sergius, whose day occurs on Jan. 23, is said to have been martyred under Diocletian; and a third was a monk in the Convent of Mar Saba, in Palestine, and, together with other monks, was attacked and slain by robbers in the year 797. His day is on March 30.

3. Sergius, surnamed *the Confessor*, was born at Constantinople, lived in the former half of the 9th century, and wrote *De Rebus in Re Publica et Ecclesia Gestis*—a history of the iconoclastic controversy from the Romish point of view, which embraced the period from Constantine Copronymus to Michael II Balbus, but is now lost. He was taken prisoner while defending the worship of images (according to some statements, in the reign of Leo the Isaurian; according to others, in that of Theophilus), deprived of his goods, and exiled; for which reason Photius termed him the Confessor. The saints' calendar of the Greek Church assigns May 13 as his day. See *Ausführl. Heiligen-Lexikon nebst beigelegt. Heil.-Kalender* (Cologne and Frankfurt, 1719), p. 2006 sq.

Sergius, the name of several Roman Catholic saints.

I, pope from 687 to 701, contemporary with venerable Bede, was born at Antioch and reared in Rome. The most noteworthy event of his administration was a dispute with the Eastern Church, which ultimately led to the separation of the East from the West. The emperor Justinian II had convoked an ecumenical council (*Concilium Quinsectum*) at Constantinople, and legates were sent to attend it by Sergius, who issued decrees; but, as six decrees had been passed which were contrary to the practice of Rome (e. g. omitting all the Latin councils and papal decretals from the list of authentic sources of Church law, acknowledging the validity of the whole eighty-five *canones apostolici*, pronouncing the celibacy of the clergy, prohibiting marriages on Saturdays during Quadragesima, making the patriarch of Constantinople equal to the pope, etc.), he forbade their promulgation. The emperor ordered the imprisonment of the refractory pope, but was dethroned after a revolt in his army. Rome refused to reject this council, and this occasioned the schism which subsequently divided the Church. Sergius succeeded, on the other hand, in restoring the communion with Rome of the churches which had been severed through the *Controversy of the Three Chapters*, and other prominent incidents of his pontificate were the founding of the bishopric of Utrecht by Willibrord, the issuing of an ordinance by which the Mass was required to be sung three times before the elevation in the service of the mass. Oct. 9 was set apart for the commemoration of this pope.

II, pope from 844 to 847. He contributed nothing to the exaltation of the papacy by daring to resist the requirement of seeking the confirmation of his election and consecration by the civil power, but maintaining his position in the face of the protest by the emperor Lothaire against this infractio of the law of the realm. The controversy of Paschasius Radbertus respecting the Lord's supper was begun in his reign.

III, pope from 904 to 911, who owed his election to the influence of the shameless Theodora and her shameless daughters Marozia and Theodora, the rulers of the time in Rome. He was grossly debauched and lived in licentious relations with Marozia, and had several children, among them the future pope John XI, though the latter statement is denied by respectable authorities. The only noteworthy event of his pontificate was his approval of the fourth synod of the emperor Leo Philosophus, which a synod at Constantinople (920) condemned, and the renewed introduction of the Benedictine rule at Monte Cassino by the abbot Berno.

IV, pope from 1009 to 1012, previously bishop of Alba. With him began the custom that the pope should adopt a new name on assuming the papacy; and the story has it that Sergius was formerly called *Porco*, i. e. swine's snout. Being ashamed of this, he assumed that of Sergius, and thus introduced the custom which has been followed by all subsequent popes.

Seripandi, GIROLAMO, an Italian theologian, born at Naples, May 6, 1493. On the death of his father, he entered the order of the Augustines, and made such rapid progress in study that he was appointed reader at Sienna in 1515, professor of theology at Bologna in 1517, and vicar-general in 1523. He gave himself to preaching with great success. In 1539 he was elected general of his order, and was re-elected. He declined the bishopric offered to him in 1551; but was drawn from retirement by the emperor from the city of Naples to the emperor in 1555, upon he was appointed archbishop of Salerno. He was made cardinal, and designated as one of the papal legates to the Council of Trent, where he died in 1563, worn out with toil. His character was

singular piety, benevolence, and modesty. He wrote a number of ecclesiastical works and sermons, besides a commentary on Romans and Galatians. See Hoefler, *Nouv. Biog. Générale*, s. v.

Serjeants, servants in monastic offices: those of the church, the guest-house, refectory, and infirmary were subordinate officers. The first was the bell-ringer, except for high mass, vespers, matins, and obits. The candle-lighter, except round the high-altar (he also laid out the vestments for the celebrant at the high-altar), was the chandler, who made all the wax candles, and assisted the subsacrist in baking the hosts. The serjeant of the infirmary was the barber, and, with the clerk and cook, waited on the monks who were sick or aged.

Sermon (Lat. *sermo*, "a discourse"), a discourse delivered in public religious services. In the early Church sermons were called *tractates* (expository), *disputations* (argumentative and controversial), *allocutions*, and by the Greeks *διδασκαλίαι* (doctrinal), or *homilies* (familiar addresses). The place of the sermon in the service was immediately after the reading of the psalms and lessons out of the Scriptures, before the catechumens were dismissed. The person whose duty it was to deliver the sermon was the bishop, when he was present, or one of his presbyters in any church from which he was absent: then it was considered as the bishop preaching by proxy. In some cases a special commission was given to a layman to deliver a sermon, and then he might do it by the authority of the bishop's commission for that time. This applied to the public services in the churches, and was not necessary when laymen did it in a private way as catechists in their catechetical schools, as at Alexandria and elsewhere. Sometimes it happened that two or three sermons would be preached in the same assembly, first by the presbyters and then by the bishop. Or, if more than one bishop were present, several of them would preach one after another, reserving the last place for the most honorable person. In some places sermons were preached every day, especially in Lent and the festival-days of Easter. In larger towns and cities, it seems probable that two sermons were delivered on Sunday; but this custom did not prevail in the country parishes. The sermon was either, 1, an exposition of Scripture; 2, a panegyric discourse upon some saint or martyr; 3, a sermon upon some particular time, occasion, festival; or, 4, a sermon upon a particular doctrine, against heresy, or to recommend the practice of virtue. All of these have examples in the sermons of Chrysostom and Augustine. Origen appears to have been the first to deliver his sermons extempore, it having been the general practice to carefully compose and write them beforehand. It was customary to introduce the sermon with a short prayer for divine assistance for the preacher and his hearers; and sometimes, if occasion required, this prayer was said in the middle of the discourse. It was usual in many places, before beginning the sermon, for the preacher to use the common salutation *Pax vobis*, "Peace be unto you," or "The Lord be with you." There was no general rule as to the length of the sermon, that being doubtless determined by the circumstances of the occasion, e.g. whether one or more sermons were to be delivered. Scarcely any of them would take an hour in delivery, and many of them not more than half that time. It was not considered, by many in the ancient Church, to be improper for the preacher to deliver a sermon prepared by another person, they holding that it is "lawful for a man to preach the compositions of more eloquent men, provided he compose his own life answerable to God's Word." The sermon was always concluded with a doxology to the Holy Trinity. The posture of preacher and hearers was generally the reverse of that prevalent now, for then the preacher sat and his hearers stood. It was a peculiar custom in the African Church, when the preacher chanced to cite some remarkable text of Scripture in

the middle of his sermon, for the people to join with him in repeating the remainder of it. This was, no doubt, done to encourage the people to hear, read, and remember the Scriptures. It was a very general custom for the people to show their appreciation of the sermon by public applause, manifested by words (as "orthodox"), or signs, or clapping of hands. We notice also the custom, prevailing among many ancient hearers, of writing down the sermons, word for word, as they were delivered, and by this means some extempore discourses were handed down to posterity. See Bingham, *Christ. Antig.* p. 705 sq.; Walcott, *Sacred Archaeol.* s. v.

SERMON ON THE MOUNT, the common name of a discourse delivered by Jesus to his disciples and a multitude on a mountain near Capernaum, A.D. 27, perhaps in May, early in the second year of his public ministry. It is a complete system of the moral law, in the spiritual form which it assumes under the Christian dispensation, and has deservedly been made the subject of much study and learned exposition (Matt. v, vi, vii; Luke vi, 20 sq. Comp. Mark ix, 47 sq.; Matt. xviii, 8, 9). The best complete exposition is certainly that of Tholuck, *Bergpredigt* (4th ed. 1856). An earlier edition has been translated into English (1843, 2 vols.). See also Valenti, *Commentar iib. d. Bergpred.* (Basel, 1849); Mackintyre, *Expos. of the Sermon on the Mount* (Lond. 1854); Pitman, *Comment. on the Sermon on the Mount* (ibid. 1852); Todd, *id.* (ibid. 1856); Trench, *Expos. of the Sermon on the Mount* (ibid. 1851); and the literature cited by Volbeding, *Index Programmatum*, p. 32; and Hase, *Leben Jesu*, p. 121. See JESUS.

SERMON ON THE MOUNT, THE, and the Talmud. In the essay prepared by the late E. Deutsch entitled *The Talmud*, among other daring statements we find also the following: "We need not urge the priority of the Talmud to the New Test. . . . To assume that the Talmud has borrowed from the New Test. would be like assuming that Sanscrit sprang from Latin, or that French was developed from the Norman words found in English." Similar is the remark of Rénan: "It is sometimes supposed that, the compilation of the Talmud being posterior to that of the Gospels, appropriations might have been made by the Jewish compilers from the Christian morality. But that is inadmissible; there was a wall of separation between the Church and the synagogue" (*Life of Jesus*, p. 108). Statements like these have been, and will be, taken as true, especially by those who have not taken the pains of examining for themselves; but sober-minded scholars have arrived at different results. Says Mr. Farrar: "Some excellent maxims—even some close parallels to the utterances of Christ—may be quoted, of course, from the Talmud, where they lie imbedded like pearls in 'a sea' of obscurity and mud. It seems to me indisputable, and a matter which every one can now verify for himself, that these are amazingly few, considering the vast bulk of national literature from which they are drawn. And, after all, who shall prove to us that these sayings were always uttered by the rabbins to whom they are attributed? Who will supply us with the faintest approach to a proof that, when not founded on the Old Test., they were not directly or indirectly due to Christian influence or Christian thought?" (*Life of Christ*, ii, 486.) According to our judgment, there is only one way of arriving at a just estimate as to which copied, and this is to give the parallel passage of the Talmud with the author who uttered the sentence, and the time in which he lived. The date of the author must settle the question once for all, and this is our purpose in the sequel.

Matt. v, 3: "Blessed are the poor in spirit."—*Sanhedrin*, fol. 43 b: "R. Joshua ben-Levi [A.D. 219-279] said, Behold, how acceptable before the Lord are the humble. While the temple stood, meat-offerings and sacrifices were offered in expiation for sins committed; but an humble spirit, such a one as immolates the desires of the flesh and the inclination of the heart on

ings of mine, and doeth them, I will liken him unto a wise man, which built his house upon a rock," etc.—*Pirke Aboth*, iii, 17: "R. Eliezer ben-Azariah [d. A.D. 82] said, He whose knowledge surpasses his good deeds may be compared to a tree with many branches and a scanty root—every wind shakes and uproots it. But he whose good deeds excel his knowledge may be compared to a tree with a few branches and strong roots: if all the hurricanes in the world should come and storm against it, they could not move it from its place."

Aboth di R. Nathan, c. xxiv, Elisha ben-Abuyah [cir. A.D. 138] said: "A man who studies the law, and acts in accordance with its commandments, is likened unto a man who builds a house the foundation of which is made of freestone, and the superstructure of bricks. Storm and flood cannot injure the house. But he who studies the law, but is destitute of good actions, is likened unto the man who builds the foundation of his house of brick and mortar and raises the upper stories with solid stone. The flood will soon undermine and overturn the house."

From these parallels, which could be, perhaps, somewhat increased, the impartial critic will make his own inferences. From the nature of the case, it would be impossible to give a parallel to each sentence of the Sermon on the Mount; for, in the first place, it contains many allusions to the manner in which Pharisaism discharged the religious duties, and, in the second place, our aim was to give the authority of the parallel passage in order to fix the chronology. The date added to each rabbi is the same as that fixed by the Jewish historian Dr. Grätz; and the claim that the New Test. copied the Talmud must accordingly be stigmatized, once for all, as a vain glorification of reformed Judaism, which, on the one hand, rejects the Talmud as a religious code, but, on the other, makes use of it for controversial purposes. (B. P.)

Sermonizing, the act or system of constructing sermons. While other forms of religious address have had their successive periods of predominance, the sermon has maintained the rank of pre-eminent importance since the time when our Lord delivered his sermon on the Mount.

I. History of the Subject.—The age of the Church fathers was that in which the homily most prevailed. The mediæval period was that of postils. During both these periods the quality and character of religious discourses greatly declined, and the true idea of Christian preaching became at length nearly lost. To speak in the most guarded manner, it was overshadowed amid the ceremonials of worship and the abounding spirit of worldliness.

The reformers availed themselves of preaching as the means of combating the errors and superstitions into which the Church had fallen. They set themselves diligently to proclaiming the essential truths of God's Word, and by them the sermon was restored to its original importance. That importance has been so fully recognised in modern times that the sermon has come to be generally regarded as the correlate of preaching itself. The exhortation and the homily still have a place among religious addresses, but it is not said of ministers of the Gospel that they preach exhortations or homilies. If they preach, in any proper sense, they preach sermons. Hence none who regard themselves the subjects of the Saviour's injunctions, "As ye go, preach," "Preach the Gospel to every creature," and of the apostolic precept "Preach the Word," can be indifferent as to the best methods of constructing sermons.

II. Rules.—Sermonizing may be said to embrace the two important particulars of plan and style.

1. Plan.—Little is hazarded in saying that a good plan is essential to a good sermon. It is by no means essential that the plan be formally stated or even made perceptible to the hearer, but it is needed to guide the thought and accomplish the aim of the speaker. The preacher who has no plan is liable to wander from his

proper line of thought, to repeat himself, to confuse his hearers, and to fail in all the important objects of a sermon. Superficial readers have imagined, and sometimes asserted, that the sermons of Christ and his apostles were uttered without plan. Careful analysis will, however, reveal in every instance an underlying or pervading plan well adapted to the object in view. Still it is proper to acknowledge, judging from the reports that have come down to us, that not only during the New-Test. period, but during the early Christian centuries, but little, if any, attention was given to artificial or minutely drawn plans. The style of preaching during the patristic age being for the greater part expository, preachers were naturally held to the order of the portions of Scripture expounded. To whatever extent panegyrics were introduced in the 4th and 5th centuries, in imitation of the Greek orators, the order of narration was naturally followed. Rarely were the formal parts of an oration, as described by the Greek and Roman rhetoricians, distinctly developed in sermons. It was reserved for the schoolmen of the 12th century and later to apply the minutæ of ancient rhetoric and logic to the framework of sermons. That application was, however, so ingeniously made by them as to project its influence downward through successive centuries. That influence may be traced in the preaching of both Catholics and Protestants of various countries even down to the present time. The prevailing fault of what may be termed the scholastic method of sermonizing has been that of excess in detail. By not a few authors it has been drawn out into a minuteness of division and subdivision, and, in short, an extreme of artificiality sufficient to destroy all freedom of thought and expression. Not only professed scholastics, but various writers of comparatively recent date, have bewildered themselves and their readers with their tedious and multiplied schemes of suggestion and division. Whoever has the curiosity to see this statement illustrated may find ample material in a joint comparison of bishop Wilkins's *Gift of Preaching*, Claude's *Essay on the Composition of a Sermon*, and G. W. Hervey's *Christian Rhetoric*. While it may be said that in some sense these three books represent England, France, and the United States of America, and also the 17th, the 18th, and the 19th centuries, it would be more proper to say that they represent an antique fashion, together with the action of a certain class of minds, of which more or less appear in every age.

Wilkins, seeking to simplify the detailed processes of preceding writers, so as to enable preachers to "teach clearly, convince strongly, and persuade powerfully," gives schemes of explication, confirmation, and application which cover six continuous duodecimo pages.

Claude, in order to help preachers avoid "poor, dry, and spiritless observations," and also to reduce "obscure matters to a natural, popular, and modern air," prescribes twenty-seven different sources of observations, designed to aid thought and facilitate invention. They are practically copied from the *Loci Communes*, or *Commonplaces*, of Aristotle, one only of his twenty-eight being omitted.

Hervey, in the modest endeavor to do what he thinks all other American writers have failed to do—namely, "to find the true groundworks of homiletics, and to reduce the science to something like a clear and sufficient system"—not only repeats the twenty-seven topics of Claude, but, on his own account, enumerates and exemplifies forty-one kinds of topical division!

It is not surprising that such excesses have called forth both opposition and ridicule, and have even provoked some minds to the rejection, if not of all plans, yet of all divisions of a sermon. Fénelon, archbishop of Cambray, represented the opposition of his period to the scholastic system in his *Dialogues concerning Eloquence*. He said, "For the most part, divisions give only a seeming order, while they really mangle and clog a discourse by separating it into two or three parts, which must interrupt the orator's action and the effect

it ought to produce. There remains no true unity after such divisions, seeing they make two or three different discourses, which are joined into one only by an arbitrary connection. Three sermons preached at different times, if they be formed upon some regular concerted plan, make one piece or entire discourse as much as the three points of any of these sermons make one whole by being joined and delivered together." That Fénelon, in the above quotation, was arguing against the abuses of division, rather than against proper plans of discourse, is sufficiently obvious from his own subsequent directions as to the plan and development of a sermon. "We ought," said he, "at first to give a general view of our subject, and endeavor to gain the favor of the audience by a modest introduction, a respectful address, and the genuine marks of candor and probity. Then we should establish those principles on which we design to argue, and in a clear, easy, sensible manner, propose the principal facts we are to build on, insisting chiefly on those circumstances of which we intend to make use afterwards. From these principles and facts we must draw just consequences, and argue in such a clear and well-connected manner that all our proofs may support each other, and so be the more remembered. Every step we advance, our discourse ought to grow stronger, so that the hearers may gradually perceive the force and evidence of the truth; and then we ought to display it in such lively images and movements as are proper to excite the passions." A following sentence discloses more definitely the view of Fénelon: "We ought to choose some method, but such a method as is not discovered and promised in the beginning of our discourse." In this he admits the importance, if not the necessity, of a plan, but denies the propriety of stating the plan in advance. In respect to the latter item, it is safe to believe that different subjects and occasions may make different requisitions of the preacher—circumstances not seldom occurring in which a lucid statement of plan may conduce greatly to the appropriate objects of a sermon. At other times and on other subjects, it may be better to carry the hearers insensibly along to conclusions, without disclosing the processes or marking the steps by which the conclusions are reached. The governing principle in this matter should be that of adaptation. Hence any attempt to fix arbitrary and unvarying rules must result in failure. But the preacher should not, on this account, make the mistake of attempting to prepare and deliver sermons without plan. He should rather accustom himself to habits and forms of close logical analysis and synthesis, studying carefully the adaptation of the most available forms to different classes of subjects and occasions. By this means, he may rise above the necessity of loading down his mind with numerous rules, and attain not only facility, but correctness of mental action in shaping his addresses to the comprehension and the persuasion of his hearers. On this plan, an essential and ever-increasing variety, both in the form and matter of his discourses, may be secured; while without it, or some similar mode of procedure, there is great danger of falling into ruts or grooves of thought which, however easy to the preacher, become trite and wearisome to hearers. If, then, his logical plans be set on fire with evangelical love and a consuming zeal in behalf of the souls of men, he will be able to produce sermons of the highest rhetorical power.

According to all the best authorities, a sermon should have an organic structure—at least an introduction, an argument, and a conclusion. In cases of extreme brevity, the beginning and end of the argument may serve as the introduction and conclusion of the sermon. Whether and to what extent the principal and essential parts of a sermon should be marked with divisions and subdivisions should be determined with reference to the probability of oratorical effect. If they can be made to secure greater attention on the part of hearers, and to fasten clearer and deeper impressions on their minds, it

would be prudery to reject them. If, on the other hand, they would break the course of thought or mar the unity of the sermon, it would be folly to employ them. So of any style of division, if found helpful and auxiliary to good results, it is to be cultivated. If it seem artificial, redundant, or otherwise a hindrance to oratorical power, let it be sternly rejected.

2. *Style*.—The impracticability of prescribing fixed and arbitrary rules as to the language to be employed in preaching is quite as great as in reference to plans of discourse. Nevertheless, there are not wanting important principles to guide the composers of sermons, whether written or oral.

(1.) The language of a sermon should be prose, and not poetry.

(2.) All the essential qualities of a good prose style should be found in every sermon. Summarily stated, those qualities are purity, precision, perspicuity, unity, harmony, and strength. The lack of any one of those qualities may justly be counted as a defect in the style of any sermon. It belongs to the science of rhetoric to define and illustrate them severally, and also to give suggestions as to their attainment, their laws, and their special uses.

(3.) Superadded to the general qualities of a good style, a few special characteristics may be named as highly desirable in the style of sermons, although with some variation of degree in accordance with subjects and occasions.

No discriminating criticism of sermons can be made, apart from a proper classification of each particular sermon, on the basis of its subject or special design. By such a classification, sermons are usually distributed into five classes, viz. expository, hortatory, doctrinal, practical, and miscellaneous or occasional. The last-named class requires a somewhat extended subclassification with reference to special topics and occasions, e. g. *a*, missions; *b*, education; *c*, temperance; *d*, charity; *e*, funerals; *f*, ordinances; *g*, festivals, etc.

To a thoughtful mind, the law of adaptation will hardly fail to suggest important, though not easily described, variations in the style to be employed in treating topics so different in character. Yet a sermon on any one of these subjects, or, in fact, on any subject appropriate for discussion in a Christian pulpit, will fall short of the highest excellence if lacking in such qualities of style as the following:

i. A combination of simplicity with dignity. It is essential that a sermon embody such a choice of language as will tend to make wise the simple; yet, in his effort to be plain, the preacher must avoid triviality. He must employ words and present images corresponding to the grandeur of the truth which he preclaims, and which may also be understood by the unlearned. Simplicity in the sense recommended is opposed to the affectation of elegance and the straining after pompous words and unusual expressions. It employs the language of the people, but makes it the instrument of elevating their thoughts and ennobling their character.

ii. It is incumbent on preachers to make frequent use of scriptural quotations and allusions as a means of declaring and illustrating God's message in its proper form and spirit. Hence the style of their sermons should be in harmony with the tenor and spirit of the Holy Scriptures. The peculiar quality hereby indicated, and which the quotations themselves do not supply, is sometimes called scriptural congruity. It is the picture or framework of silver in which the apples of gold may be fully set.

iii. Another peculiar quality of style demanded in sermons is directness of address. It is the province of poetry to sweep circles and various curvilinear lines of beauty through the realms of thought. Its objects may be well accomplished by exciting admiration and emotions of pleasure. True preaching has a higher aim, and consequently needs to focalize its power in order to produce conviction in the mind and proper emotions in

the heart. Hence a good pulpit style tolerates neither the indirectness of an essay nor any rhetorical embellishments which are not auxiliary to directness of address. It rejects circumlocutions and demands those forms of expression that make hearers feel that they are personally the objects of the sacred message. As a good portrait looks every person calmly in the eye, so a good sermon seems to speak directly to every hearer. When, in connection with a just reference to the principles above stated, preachers severally maintain their individuality of thought and expression, they will find sermonizing not only a fascinating engagement, but one full of encouragement from the happy results following.

So far as this subject has a literature, it is found in works on homiletics and preaching (q. v.). (D. P. K.)

Se'ron (Σήρων; in Syr. and one Gr. MS. "Ἡρων; Vulg. *Seron*), a general of Antiochus Epiphanes, in chief command of the Syrian army (1 Macc. iii, 13, ὁ ἀρχὼν τῆς δυνάμεως Συρίας), who was defeated at Beth-horon by Judas Maccabæus (B.C. 166), as in the day when Joshua pursued the five kings "in the going-down of Beth-horon" (1 Macc. iii, 24; Josh. x, 11). According to Josephus, he was the governor of Cœle-Syria and fell in the battle (Ant. xii, 7, 1), nor is there any reason to suppose that his statements are mere deductions from the language of 1 Macc.—Smith.

Serosh, in Persian mythology, was one of the mightiest of Ormuzd's genii, king of the earth, and director of all things in it. He was not, however, one of the seven amshaspands, but only an assistant to Ardibehesht, one of their number.

Serpent. The frequent mention of this creature in the Bible, together with the important part which it plays in early mythology, justifies a fuller treatment of the subject here than could well be given under the special terms by which the several species are designated. To these, however, we also refer as affording further details on certain points.

I. Bible Names.—The following are the Heb. and Gr. words by which either the serpent in general or some particular kind is represented in the A. V. with great variety and little precision.

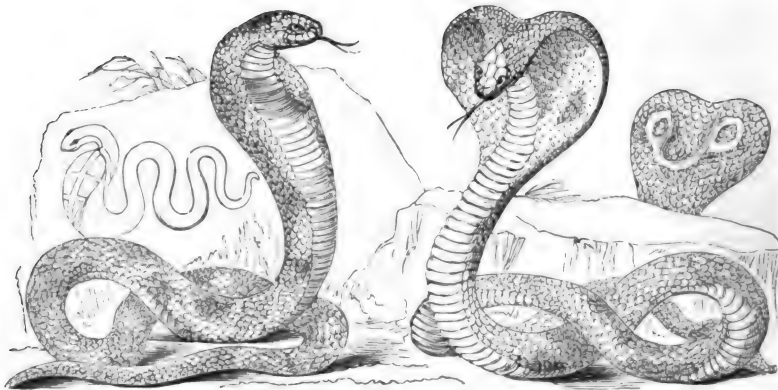

1. *Nachâsh* (נָחָשׁ), so called probably from its *hissing*; Sept. and New Test. ὄφις), the generic name of any serpent, occurs frequently in the Old Test. The following are the principal Biblical allusions to this animal: Its subtlety is mentioned in Gen. iii, 1; its wisdom is alluded to by our Lord in Matt. x, 16. The poisonous properties of some species are often mentioned (see Psa. lviii, 4; Prov. xxiii, 32); the sharp tongue of the serpent, which it would appear some of the ancient Hebrews believed to be the instrument of poison, is mentioned in Psa. cxi, 3; Job xx, 16, "the viper's tongue shall slay him;" although in other places, as in Prov. xxiii, 32; Eccles. x, 8, 11; Numb. xxi, 9, the venom is correctly ascribed to the bite, while in Job xx, 14 the gall is said to be the poison. The habit serpents have of lying concealed in hedges is alluded to in Eccles. x, 8, and in holes of walls, in Amos v, 19; their dwelling in dry, sandy places, in Deut. viii, 15. Their wonderful mode of progression did not escape the observation of the author of Prov. xxx, who expressly mentions it as "one of the three things which were too wonderful for him" (ver. 19). The oviparous nature of most of the order is alluded to in Isa. lix, 5, where the A. V., however, has the unfortunate rendering of "cockatrice." The art of taming and charming serpents is of great antiquity, and is alluded to in Psa. lviii, 5; Eccles. x, 11; Jer. viii, 17, and doubtless intimated by James (iii, 7), who particularizes serpents among all other animals that "have been tamed by man." See SERPENT-CHARMING.

2. *Sarâph* (סָרָפִי, prob. *burning* [see SERAPH]; Sept. ὄφις or ὀφάκων; A. V. "fiery") occurs generally in connection with the above term (Numb. xxi, 6; Deut. viii,

15), but occasionally alone (Numb. xxi, 8; Isa. xiv, 29; xxx, 6), as some peculiarly venomous species.

Much has been written on the question of the "fiery serpents" (הַנִּשְׁרָפִים הַשָּׂרָפִים) of Numb. xxi, 6, 8, with which it is usual to identify the "fiery flying serpent" of Isa. xxx, 6 and xiv, 29. In the transaction recorded (Numb. loc. cit.; Deut. viii, 15) as having occurred at the time of the Exodus, when the rebellious Israelites were visited with a plague of serpents, there is not a word about their having been "flying" creatures; there is therefore no occasion to refer the venomous snakes in question to the kind of which Niebuhr (*Descript. de l'Arab.* p. 156) speaks, and which the Arabs at Basra denominate *heie sursurie*, or *heie thiare*, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date-trees they inhabit. Besides these are tree-serpents (*dendrophidæ*), a harmless family of the colubrine snakes, and therefore quite out of the question. The Heb. term rendered "fiery" by the A. V. is by the Alexandrine edition of the Sept. represented by *Σαραφῶντες*, "deadly." Onkelos, the Arabic version of Saadiah, and the Vulg. translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to the bright color of the serpents. It is impossible to point out the species of poisonous snake which destroyed the people in the Arabian desert. Niebuhr says that the only truly formidable kind is that called *betan*, a small slender creature spotted black and white, whose bite is instant death, and whose poison causes the dead body to swell in an extraordinary manner (see Forskål, *Descript. Animal.* p. 15). It is obvious that either the *cerastes* or the *naja haje*, or any other venomous species frequenting Arabia, may denote the "serpent of the burning bite" which destroyed the children of Israel. See Ziegler, *De Serpentina Ignitis* (Jena, 1732).

The "fiery flying serpent" of Isaiah (loc. cit.) can have no existence in nature if taken in strict literalness, though it is curious to notice that Herodotus (ii, 75; iii, 108) speaks of serpents with wings whose bones he imagined he had himself seen near Buto in Arabia. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures; it is probable that some kind of flying lizard (*Draco*, *Dracocella*, or *Dracunculus*) may have been the "flying serpent" of which Herodotus speaks; and perhaps, as this animal, though harmless, is yet calculated to inspire horror by its appearance, it may denote the flying serpent of the prophet, and may have been regarded by the ancient Hebrews as an animal as terrible as a venomous snake. Accordingly, Hamilton Smith is disposed to take the *sarâph*, or supposed winged serpent, to be a *haje*, one of the more Eastern species or varieties of the cobra or *naja*, which have the faculty of actually distending the hood, as if they had wings at the side of the head, and are the same as, or nearly allied to, the well-known spectacle-snake of India; and this interpretation seems to accord with the words of Moses, *the serpents, the burning ones* (Numb. xxi, 6). The serpent may exhibit this particular state of irritation when it stands half erect with its hood distended, or it may be that variety which is possessed of this faculty to the greatest extent. *Naja reflectrix*, the *poof* or *spook adder* of the Cape colonists, is reported by Dr. Smith to be scarcely distinct from the Egyptian *naja haje*. With regard to the faculty of flying, the lengthened form, the muscular apparatus, the absence of air-cells, and the whole osteological structure are all incompatible with flight or the presence of wings: hence Herodotus, in his search for flying serpents at Buto, may have observed heaps of exuvie of locusts cast on shore by the sea—a phenomenon not unfrequent on that coast—but most assuredly not heaps of bones and ribs of serpents. As for those of Plutarch, they may have been noxious sand-flies. Flying serpents are only found represented in the symbolical pictures of

Naja haje; and the form of *Kneph*; from the Egyptian monuments.

Naja tripudians and *Cobra-de-capello*, or Hooded and Spectacled Snakes.

Egypt, where they occur with birds' wings. Those of history, and of barbarous nations excessively habituated to figurative forms of speech, are various; some being so called because of their rapid motion, others on account of a kind of spring they are said to make at their victims, and a third class because they climb trees, and are reported to swing themselves from thence upon their victims, or to other trees. Now, many species of serpents are climbers; many hang by the tail from slender branches of low trees in highly heated glens, snapping at insects as they wheel around them; but all are delicately jointed, and if any should swing further than merely to change their hold, and should miss catching a branch, they would most certainly be dislocated, and, if not killed, very seriously injured. From personal experiments, we can attest that serpents are heavy in proportion to their bulk, and without the means of breaking their fall; that few, large or small, could encounter the shock of twelve or fourteen feet elevation without fracturing many spinous processes of their vertebrae, and avoid being stunned for a length of time, or absolutely crushed to death. Being instinctively conscious of the brittleness of their structure, nearly all snakes are timid, and desirous of avoiding a contest unless greatly provoked. This remark applies, we believe, to all innoxious serpents, the great boas perhaps excepted, and to most of the poisonous, exclusive of several species of viper and cobra-de-capello (comp. Thomson, *Land and Book*, ii, 333). Of the so-called flying, or rather darting, serpents, Niebuhr found near Basra a venomous species called *heie sursurie* and *heie thiäre*—that is, "flying serpent"—because it was said to fling itself from one tree to another. Admiral Anson heard, at the island of Quibo, of snakes flying without wings: we may notice the *Acontias* and *Prester*, that fell like arrows from the tops of trees, and the green *Ætula* of Ceylon, said to spring from trees at the eyes of cattle—an accusation repeated of more than one species in tropical America. Next we have the *uler tampang hari*, seen in a forest near the river Pedang Bessie, somewhere, we believe, in the Australasian islands, under circumstances that most certainly require confirmation; since this fiery serpent, so called from the burning pain and fatal effect of its bite, swung itself from one tree to another, 240 feet distant, with a declination to the horizon of only about fifteen degrees! We may thus refer the "winged" or "flying" serpent to the *Naja tripudians*, in one of its varieties, because, with its hood dilated into a kind of shining wing on each side of the neck, standing, in undulating motion, one half or more erect, rigid, and fierce in attack and deadly poisonous, yet still denominated "good spirit," and in Egypt ever figured in combination with the winged globe, it may well have received the name of *sarâph*, and may thus meet all the valid objections and conciliate seemingly opposite comments (see Numb. xxi, 6, 8; Deut. viii, 15; Isa. xvi, 29; xxx, 6; and Pax-

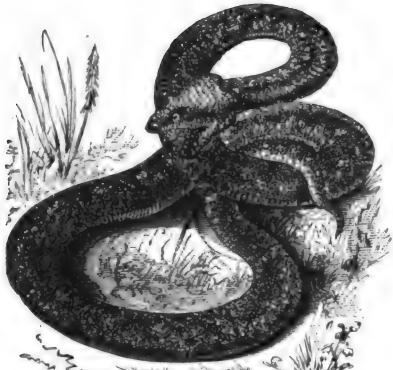

ton's *Illustrations*), excepting the authority of Herodotus, Pausanias, and Bochart, which, with all the respect due to their names, is not now sufficient to establish the existence of a kind of serpent whose structure is contrary to the laws of zoological organization. In Isa. xiv, 29, and xxx, 6, the epithet *נִפְּזֵי*, *neophêph*, vibrating (rendered "flying" in the A. V.), is another form for "winged," and occurs in passages unconnected with the events in Exodus. Both bear metaphorical interpretations. A further confirmation of the "fiery serpents," or "serpents of the burning bite," being *najas*, occurs in the name *Ras om-Haye* (Cape of the Haje serpents), situated in the locality where geographers and commentators agree that the children of Israel were afflicted by these reptiles. Should it be objected that these are the haje and not the spectacle-snake, it may be answered that both Arabs and Hindus confound the species.

3. *Akshûb* (אַכְשׁוּב, Sept. ἀσπίς, A. V. "adder") is found only in Psa. cxi, 3, "They have sharpened their tongues like a serpent; adders' poison is under their lips." The latter half of this verse is quoted by Paul from the Sept. in Rom. iii, 13 ("asp"). The poison of venomous serpents is often employed by the sacred writers in a figurative sense to express the evil tempers of ungodly men; that malignity which, as bishop Horne says, is "the venom and poison of the intellectual world" (comp. Deut. xxxii, 33; Job xx, 14, 16).

It is not possible to say with any degree of certainty what particular species of serpent is intended by the Hebrew word; the ancient versions do not help us at all, although nearly all agree in some kind of serpent, with the exception of the Chaldee paraphrase, which understands a *spider* by *akshûb*, interpreting this Hebrew word by one of somewhat similar form (אַכְבִּישׁ, *akkabish*). The etymology of the term is not ascertained with sufficient precision to enable us to refer the animal to any determinate species. Gesenius derives it from two Hebrew roots (כָּשַׁב, *akâsh*, "to turn backward," and כָּבַד, *akâb*, "to lie in wait"), the combined meaning of which is "rolled in a spire and lying in ambush;" a description which would apply to almost any kind of serpent.

The number of poisonous serpents with which the Jews were acquainted was in all probability limited to some five or six species, and it is not improbable that the *akshûb* may be represented by the *Toxicou* of Egypt and North Africa. At any rate, it is unlikely that the Jews were unacquainted with this kind, which is common in Egypt and probably in Syria. See ADDER.

4. *Pêthen* (פֶּתֶן, from an obsolete root prob. signifying to twist or to be strong; Sept. ἀσπίς, ῥάκων, βασιλικός). The Hebrew word occurs in the six following passages: Deut. xxxii, 33; Psa. lviii, 5; xci, 13; Job xx, 14, 16;

The *Toxicoa* (*Echis arenicola*) of Egypt.

Isa. xi, 8. It is expressed in the passages from the Psalms by "adder" in the text of the A. V. and by "asp" in the margin; elsewhere the text of the A. V. has "asp" as the representative of the original word *péthen*.

That some kind of poisonous serpent is denoted by the Hebrew word is clear from the passages quoted above. We further learn from Psa. lviii, 5 that the *péthen* was a snake upon which the serpent-charmers practiced their art. In this passage the wicked are compared to "the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely;" and from Isa. xi, 8, "the sucking child shall play on the hole of the asp," it would appear that the *péthen* was a dweller in holes of walls, etc. The question of identity is one which it is by no means easy to determine. Bochart contributes nothing in aid to a solution when he attempts to prove that the *péthen* is the *asp* (*Hieroz.* iii, 156), for this species of serpent, if a species be signified by the term, has been so vaguely described by authors that it is not possible to say what known kind is represented by it. The term *asp* in modern zoology is generally restricted to the *Vipera aspis* of Latreille; but it is most probable that the name, among the ancients, stood for different kinds of venomous serpents. Solinus (c. xxvii) says, "plures diversæque sunt aspidum species;" and Elian (*N. Anim.* x, 31) asserts that the Egyptians enumerate sixteen kinds of *asp*. Bruce thought that the *asp* of the ancients should be referred to the *cerastes*, while Cuvier considered it to be the Egyptian cobra (*Naja haje*). Be this, however, as it may, there can be little doubt that the Hebrew name *péthen* is specific, as it is mentioned as distinct from *akshûb*, *shephiphon*, *tsiphoni*, etc., names of other members of the *Ophidia*.

Oedman (*Vermisch. Samml.* x, 81) identifies the *péthen* with the *Coluber lebetinus*, Linn., a species described by Forskål (*Desc. Anim.* p. 15). Rosenmüller (*Not. ad Hieroz.* iii, 156), Dr. Lee (*Heb. Lex.* s. v. אֲשֵׁפָה), Dr. Harris (*Nat. Hist. of Bible*, art. "Asp"), Col. H. Smith (*Encyc. Bib. Lit.* art. "Serpent"), believe that the *péthen* of Scripture is to be identified with the *Coluber betan* of Forskål. Oedman has no hesitation in establishing an identity between the *C. lebetinus* and the *C. betan*; but from Forskål's descriptions it is most probable that the two species are distinct. The whole argument that seeks to establish the identity of the *C. betan* with the *péthen* of Scripture is based entirely upon a similarity of sound. Rosenmüller thinks that the Arabic word *betan* ought to be written *pætan*, and thinks there can be no doubt that this species represents the *péthen* of Scripture. Oedman's argument, also, is based on a similarity of sound in the words, though he adduces an additional proof in the fact that, according to the Swedish naturalist quoted above, the common people of Cyprus bestow the epithet of *kouphé* (κοῦφη), "deaf," upon the *C. lebetinus*. He does not, however, believe that this species is

absolutely deaf, for he says it can hear well. This epithet of deafness attributed to the *C. lebetinus* Oedman thinks may throw light on the passage in Psa. lviii, 5, about "the deaf adder." As regards the opinion of Rosenmüller and others who recognise the *péthen* under the *betan* of Forskål, it may be stated that, even if the identity is allowed, we are as much in the dark as ever on the subject, for the *C. betan* of Forskål has never been determined. If *C. betan* be the same as *C. lebetinus*, the species denoted may be the *Echis arenicola* (*Toxicoa*) of Egypt (*Catalogue of Snakes in Brit. Mus.* i, 29). Probably all that naturalists have ever heard of the *C. betan* is derived from two or three lines of description given by Forskål. "The whole body is spotted with black and white; it is a foot in length, and of the thickness of two thumbs; oviparous; its bite kills in an instant, and the wounded body swells." The evidence afforded by the *deaf* snake of Cyprus, and adduced in support of his argument by Oedman, is of no value whatever; for it must be remembered that audition in all the *Ophidia* is very imperfect, as all the members of this order are destitute of a tympanic cavity. The epithet "deaf," therefore, so far as relates to the power all serpents possess of hearing ordinary sounds, may reasonably be applied to any snake. Vulgar opinion in many countries attributes "deafness" to the adder; but it would be very unreasonable to infer from thence that the common adder (*Pelias berus*) is identical with the "deaf adder" of the 58th Psalm. Vulgar opinion in Cyprus is of no more value in the matter of identification of species than vulgar opinion elsewhere. A preliminary proof, moreover, is necessary for the argument. The snake of Cyprus must be demonstrated to occur in Egypt or the Holy Land: a fact which has never yet been proved, though, as was stated above, the snake of Cyprus (*C. lebetinus*) may be the same as the *Echis arenicola* of North Africa.

Very absurd are some of the explanations which commentators have given of the passage concerning the "deaf adder that stoppeth her ears;" the rabbi Solomon (according to Bochart, iii, 162) asserts that "this snake becomes deaf when old in one ear; that she stops the other with dust, lest she should hear the charmer's voice." Others maintain that "she applies one ear to the ground and stops the other with her tail." That such errors should have prevailed in former days, when little else but foolish marvels filled the pages of natural history, is not to be wondered at, and no allusion to them would have been made here if this absurd error of "the adder stopping her ears with her tail" had not been perpetuated in our own day. In Bythner's *Lyre of David*, p. 165 (Dee's translation, 1847), the following explanation of the word *péthen*, without note or comment, occurs: "A *asp*, whose deafness marks the venom of his malice, as though impenetrable even to charms; it is deaf of one ear, and stops the other with dust or its tail, that it may not hear incantations." Dr. Thomson also (*Land and Book*, i, 221) seems to give credence to the fable when he writes: "There is also current an opinion that the adder will actually stop up his ear with his tail to fortify himself against the influence of music and other charms." It is not then needless to observe, in confutation of the above error, that no serpent possesses external openings to the ear. The true explanation of Psa. lviii, 5 is simply as follows: There are some serpents, individuals of the same species perhaps, which defy all the attempts of the charmer—in the language of Scripture such individuals may be termed *deaf*. The point of the rebuke consists in the fact that the *péthen* was capable of hearing the charmer's song, but refused to do so. The individual case in question was an exception to the rule. If, as some have supposed, the expression "deaf adder" denoted some species that was incapable of hearing, whence it had its specific name, how could there be any force in the comparison which the psalmist makes with wicked men? Serpents, though, comparatively speaking, deaf to ordinary sounds, are no doubt capable of hearing the sharp, shrill sounds which the charmer pro-

duces either by his voice or by an instrument; and this comparative deafness is, it appears to us, *the very reason* why such sounds as the charmer makes produce the desired effect in the subject under treatment. As the Egyptian cobra is more frequently than any other species the subject upon which the serpent-charmers of the Bible-lands practice their science, as it is fond of concealing itself in walls and in holes (Isa. xi, 8), and as it is not impossible that the derivation of the Hebrew word *péthen* has reference to the expanding powers of this serpent's neck when irritated, it appears to us to have at least as good a claim to represent the *péthen* as the very doubtful species of *Coluber batan*, which on such slender grounds has been so positively identified with it. See SERPENT-CHARMING.

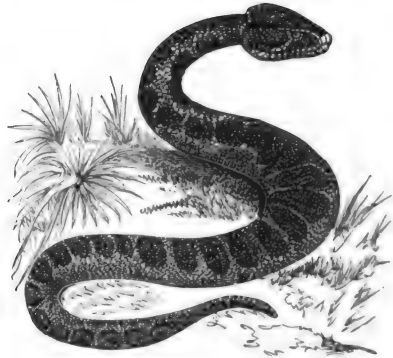

5. *Ephéh* (עֶפֶה; Sept. *ῥῑς, ἄσπις, βασιλίσκος*) occurs in Job xx, 16; Isa. xxx, 6; and lix, 5, in all of which passages the A. V. has "viper." There is no scriptural allusion by means of which it is possible to determine the species of serpent indicated by the Heb. term, which is derived from a root which signifies "to hiss." Shaw (*Trav.* p. 251) speaks of some poisonous snake which the Arabs call *leffah* (*el-effah*): "it is the most malignant of the tribe, and rarely above a foot long." Jackson also (*Morocco*, p. 110) mentions this serpent; from his description it would seem to be the Algerine adder (*Echidna arietans* var. *Mauritanica*). The snake (*ἐχίδνα*) that fastened on Paul's hand when he was at Melita (Acts xxviii, 3) was probably the common viper (*Pelias berus*), which is widely distributed throughout Europe and the islands of the Mediterranean, or else the *Vipera aspis*, a not uncommon species on the coasts of the same sea. See VIPER.

6. *Tsepha*, or *Tsiphoni* (צֶפֶה, צִפְּוֹנִי; Sept. *ἐκγόνα ἀσπίδων, κεράστης*), occurs five times in the Hebrew Bible. In Prov. xxiii, 32 it is translated "adder," and in the three passages of Isaiah quoted above, as well as in Jer. viii, 17, it is rendered "cockatrice." The derivation of the word from a root which means "to hiss" does not help us at all to identify the animal. From Jeremiah we learn that it was of a hostile nature, and from the parallelism of Isa. xi, 8 it appears that the *tsiphoni* was considered even more dreadful than the *péthen*. Bochart, in his *Hieroz.* (iii, 182, ed. Rosenmüller), has endeavored to prove that the *tsiphoni* is the *basilisk* of the Greeks (whence Jerome in Vulg. reads *regulus*), which was then supposed to destroy life, burn up grass, and break stones by the pernicious influence of its breath (comp. Pliny, *H. N.* viii, 33); but this is explaining an "ignotum per ignotus."

The whole story of the basilisk is involved in fable, and it is in vain to attempt to discover the animal to which the ancients attributed such terrible power. It is curious to observe, however, that Forskål (*Descr. Animal.* p. 15) speaks of a kind of serpent (*Coluber holleik* is the name he gives it) which he says produces irritation on the spot touched by its breath; he is quoting, no doubt, the opinion of the Arabs. Is this a relic of the basiliskian fable? This creature was so called from a mark on its head, supposed to resemble a kingly crown. Several serpents, however, have peculiar markings on the head—the varieties of the spectacle-cobras of India, for example—so that identification is impossible. As the Sept. makes use of the word *basilisk* (Isa. xc, 13; xci, 13 A. V.), it was thought desirable to say this much on the subject. The basilisk of naturalists is a most forbidding-looking yet harmless lizard of the family *Iguanidae*, order *Sauria*. In using the term, therefore, care must be taken not to confound the mythical serpent with the veritable Saurian. Basilisk is an indefinite English name, which belongs to no identified serpent, and now appears only in the works of ancient compilers and heralds, where it is figured with a crest, though there is no really crested or frilled species known to exist in the whole Ophidian order. Crested serpents occur, it is true, on Greek and Etruscan vases; but they

are invariably mythological representations, probably derived from descriptive rumors of the hooded *najus*, *cerastes*, and perhaps *murenæ*; the first of these having what may be likened to a turbaned, the other to a coronated head, and the third fins at the operculum. But it is from the apparently crowned form that the denominations of basilisk and *regulus* were derived. See BASILISK.

It is possible that the *tsiphoni* may be represented by the Algerine adder (*Clotho Mauritanica*), but it must be confessed that this is mere conjecture. Dr. Harris, in his *Natural History of the Bible*, erroneously supposes it to be identical with the *Rajah zephen* of Forskål, which, however, is a fish (*Trigon zephen*, Cuv.), and not a serpent. See COCKATRICE.

Algerine Adder (*Clotho Mauritanica*).

7. *Shephiphôn* (שֶׁפִּיפּוֹן; Sept. *ἐγκαθήμενος*) occurs only in Gen. xlix, 17, where it is used to characterize the tribe of Dan: "Dan shall be a serpent by the way, an adder in the path, that biteth the horse's heels, so that his rider shall fall backwards." Various are the readings of the old versions in this passage: the Samaritan interprets *shephiphôn* by "lying in wait;" the Targums of Jonathan, of Onkelos, and of Jerusalem, with the Syriac, "a basilisk" (ܚܪܝܬܝܢ, *churmôn, destructive*). The Arabic interpreters Erpenius and Saadias have "the horned snake;" and so the Vulg. *cerastes*. The Sept., like the Samaritan, must have connected the Hebrew term with a word which expresses the idea of "sitting in ambush." The original word comes from a root (שָׁפַץ) which signifies "to prick," "pierce," or "bite."

The habit of the *shephiphôn* alluded to in Jacob's prophecy—namely, that of lurking in the sand and biting at the horse's heels—suits the character of a well-known species of venomous snake, the celebrated horned viper, the asp of Cleopatra (*Cerastes Hasselquistii*), which is found abundantly in the sandy deserts of Egypt, Syria, and Arabia. The Hebrew word *shephiphôn* is no doubt identical with the Arabic *sifon*. If the translation of this Arabic word by Golius be compared with the description of the *cerastes* in the British Museum, there will appear good reason for identifying the *shephiphôn* of Genesis with the *cerastes* of

Horned Cerastes (*Cerastes Hasselquistii*).

naturalists: "*Siffon*, serpentis genus leve, punctis maculisque distinctum"—"a small kind of serpent marked with dots and spots" (Goliuss, *Arab. Lex.* s. v.). "The *cerastes* (*Cerastes Hasselquistii*) is brownish white, with pale-brown, irregular unequal, spots" (*Catalogue of Snakes in Brit. Mus.* i, 29). It is not pretended that the mere fact of these two animals being spotted affords sufficient ground, when taken alone, for asserting that they are identical, for many serpents have this character in common; but when taken in connection with what has been adduced above, coupled with the fact that this spotted character belongs only to a very few kinds common in the localities in question, it does at least form strong presumptive evidence in favor of the identity of the *shephiphon* with the *cerastes*. The name of *cerastes* is derived from a curious horn-like process above each eye in the male (and occasionally, it would seem, in the female likewise), which gives it a formidable appearance. Bruce, in his *Travels in Abyssinia*, has given a very accurate and detailed account of these animals. He observes that he found them in great numbers in those parts which were frequented by the jerboa, and that in the stomach of a *cerastes* he discovered the remains of a jerboa. He kept two of these snakes in a glass vessel for two years without any food. Another circumstance mentioned by Bruce throws some light on the assertions of ancient authors as to the movement of this snake. Ælian (*De Anim.* xv, 13), Isidorus, Ætius, have all recorded of the *cerastes* that, whereas other serpents creep along in a straight direction, this one and the *hemorrhous* (no doubt the same animal under another name) move sideways, stumbling, as it were, on either side (and comp. Bochart). Let this be compared with what Bruce says, "The *cerastes* moves with great rapidity and in all directions, forwards, backwards, *sideways*; when he inclines to surprise any one who is too far from him, he *creeps with his side towards the person*," etc. The words of Ibn-Sina, or Avicenna, are to the same effect. It is right, however, to state that nothing unusual has been observed in the mode of progression of the *cerastes* in the gardens of the Zoological Society; but, of course, negative evidence in the instance of a specimen not in a state of nature does not invalidate the statement of so accurate an observer as Bruce. The celebrated John Ellis seems to have been the first Englishman who gave an accurate description of the *cerastes* (see *Philosoph. Transact.* 1760). Hasselquist minutely describes it (*Itin.* p. 241, 365). The *cerastes* is extremely venomous; Bruce compelled one to scratch eighteen pigeons upon the thigh as quickly as possible, and they all died nearly in the same interval of time. It averages from twelve to fifteen inches in length, but is occasionally found larger. It belongs to the family *Viperide*, order *Ophidia*. This is a dangerous species, usually burrowing in sand near the holes of jerboas, and occasionally in the cattle-paths; for there are now few or no ruts of cart-wheels, where it is pretended they used to conceal themselves to assault unwary passers. It is still common in Egypt and Arabia.

Another kind of horned serpent is the *Eryx cerastes* of Daudin, also small, having no movable poison-fangs, but remarkable for two very long back teeth in the lower jaw, which pass through the upper jaw, and appear in the shape of two white horns above its surface. It is known to the Egyptian Arabs by the name of *harbagi*, which may be a distortion of *οὐβαιοι* in Horapollo, and is classed by Hasselquist among slow-worms, because in form the tail does not taper to a point. Its colors are black and white marblings, and the eyes are lateral and very near the snout. See ASP.

8. *Tsinmaon* (תִּנְמָאן, Deut. viii, 15) appears to be a serpent, though rendered by "drought" in the A. V. and others, so called because of the intolerable thirst occasioned by its bite. If this translation be correct,

it will form in modern nomenclature one of the genus *Hurria*, and subgenus *Dipsas* or *Bongarus*. But no species of this division of snakes has yet been found in Western Asia, albeit there are several in India; and Avicenna locates the *Torrída dipsas* in Egypt and Syria; whereupon Cuvier remarks that Gesner's figure of *Dipsas* belongs precisely to the subgenus here pointed out. As one of the colubrine family, it should not be venomous; but the last-mentioned writer remarks that several of these are regarded in their native localities with great dread; and on examination it is found that, although they have no erectile tubercular fangs, with a poison-bag at the roots, there is on the long back teeth a groove, and a large gland at the base of the maxilla, which it is not unlikely contains, in some at least, a highly venomous poison. See DROUGHT.

9. *Zochél* (זֹחֶל, literally a *crawler*) occasionally stands (Deut. xxxii, 24, "serpent;" Mic. vii, 7, "worm") as a general term for the serpent tribe. See WORM.

10. *Tannin* (תַּנִּין, "serpent," Exod. vii, 9, 10, 12; elsewhere usually "dragon") seems in the above instances to denote a venomous reptile (Deut. xxxii, 33); but of a vague character. See SEA-MONSTER.

11. The usual and proper term for "serpent" in the New Test. is *ὄφις*, a *snake* of any kind; but once (James iii, 7) *ἑρπύρον* (elsewhere "creeping thing") is thus rendered. More specific terms, noticed above, are *ἀσπίς*, *ἐχίδνα*, *δράκων*.

II. *Scientific Classification and Characteristics*.—1. Systematical nomenclators and travellers enumerate considerably more than forty species of serpents in Northern Africa, Arabia, and Syria. Of these it is scarcely possible to point out with certainty a single one named in the Bible, where very few descriptive indications occur beyond what in scientific language would now be applied generically. It is true that, among the names of the list, several may be synonyms of one and the same species; still none but the most recent researches give characters sufficient to be depended upon, and as yet nothing like a complete herpetology of the regions in question has been established. For, snakes being able to resist a certain degree of cold, and also the greatest heat, there are instances of species being found, such as the *hajes*, precisely the same, from the Ganges to the Cape of Good Hope; others, again, may be traced from Great Britain to Persia and Egypt, as is instanced in the common viper and its varieties. Instead, therefore, of making vain efforts at identifying all the serpents named, it will be a preferable course to assign them to their proper families, with the exception of those that can be pointed out with certainty; and in so doing it will appear that even now species of importance mentioned by the ancients are far from being clearly established.

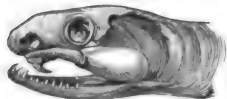

Serpents may be divided generally into two very distinct sections—the first embracing all those that are provided with movable tubular fangs and poison-bags in the upper jaw; all regarded as ovo-viviparous, and called by contraction *vipers*: they constitute not quite one fifth of the species hitherto noticed by naturalists. The second section, much more numerous, is the *colubrine*, not so armed, but not therefore always entirely innocuous, since there may be in some cases venomous secretions capable of penetrating into the wounds made by their fixed teeth, which in all serpents are single points, and in some species increase in size as they stand back in the jaws. The greater part, if not all, of these comparatively innocuous species are oviparous, including the largest or giant snakes, and the *pelamis* and *hydrophis*, or water-serpents, among which several are venomous.

If we are right in the above identification, one class of serpents, the cobra tribe, may be regarded as the type of the most venomous in the East. The genus *Naja*—*Haridi* (?) of Savary—is distinguished by a plaited head, large, very venomous fangs, a neck dilatable un-

der excitement, which raises the ribs of the anterior part of the body into the form of a disk or hood, when the scales, usually not imbricated, but lying in juxtaposition, are separated, and expose the skin, which at that time displays bright iridescent gleams, contrasting highly with their brown, yellow, and bluish colors. The species attain at least an equal, if not a superior, size to the generality of the genus viper; are more massive in their structure; and some possess the faculty of self-inflation to triple their diameter, gradually forcing the body upwards into an erect position, until, by a convulsive crisis, they are said suddenly to strike backwards at an enemy or a pursuer. Capt. Stevens, of the Royal Marines, in order to ascertain the truth of the universal report concerning the mode of striking back ascribed to the serpent, had a quill introduced into the vent of one lying dead on the table, and blown into. The skin distended till the body rose up nearly all its length; he then caused the experiment to stop, from the alarming attitude it assumed.

2. Among the various tribes of animals which are inimical to man, there is none that can compare with the venomous snakes for the deadly fatality of their enmity: the lightning stroke of their poison-fangs is the unerring signal of a swift dissolution, preceded by torture the most horrible. The bite of a vigorous serpent has been known to produce death in two minutes. Even where the consummation is not so fearfully rapid, its delay is but a brief prolongation of the intense suffering. The terrible symptoms are thus described: A sharp pain in the part, which becomes swollen, shining, hot, red, then livid, cold, and insensible. The pain and inflammation spread, and become more intense; fierce shooting pains are felt in other parts, and a *burning fire pervades the body*. The eyes water profusely; then come swoonings, sickness, and bilious vomitings, difficult breathing, cold sweats, and sharp pains in the loins. The skin becomes deadly pale or deep yellow, while a black watery blood runs from the wound, which changes to a yellowish matter. Violent headache succeeds, and giddiness, faintness, and overwhelming terrors, *burning thirst*, gushing discharges of blood from the orifices of the body, intolerable fetor of breath, convulsive hiccoughs, and death.

The agent of these terrible results is an inodorous, tasteless, yellow fluid, secreted by peculiar glands seated

Poison-bag and Fang of Cobra.

on the cheeks, and stored for use in membranous bags, placed at the side of each upper jaw, and enveloping the base of a large, curved, pointed tooth, which is tubular. These

two teeth, or fangs, are capable of being erected by a muscular apparatus under the power of the animal, when they project at nearly a right angle from the jaw.

The manner in which the deadly blow is inflicted is remarkable, and is alluded to in Scripture. When the rage of the snake is excited, it commonly throws its body into a coil more or less close, and raises the anterior part of its body. The neck is now flattened and dilated, so that the scales, which ordinarily lie in close contact, are separated by wide interspaces of naked skin. The neck is bent more or less back, the head projecting in a horizontal position. In an instant the whole fore part of the animal is launched forward towards the object of its anger, the erected tooth is forcibly struck into the flesh, and withdrawn with the velocity of a thought. No doubt the rage which stimulates the action calls forth an increased action of the poison-glands, by which the store-sac is filled with the secretion. The muscular contraction which gives the rapid blow compresses at the same instant the sac; and as the acute point of the fang enters the flesh, the venom is forced through the tubular centre into the wound.

III. *Scripture History*.—It was under the form of a serpent that the devil seduced Eve; hence in Scripture

Satan is called "the old serpent" (Rev. xii, 9, and comp. 2 Cor. xi, 3). On this metaphorical use of the word, see the *Jour. of Sac. Lit.* Jan. 1852, p. 351 sq.; comp. *Biblioth. Sacra*, Jan. 1864.

The part which the serpent played in the transaction of the fall must not be passed over without some brief comment, being full of deep and curious interest. First of all, then, we have to note the subtlety ascribed to this reptile, which was the reason for its having been selected as the instrument of Satan's wiles, and to compare with it the quality of wisdom mentioned by our Lord as belonging to it, "Be ye wise as serpents" (Matt. x, 16). It was an ancient belief, both among Orientals and the people of the Western world, that the serpent was endued with a large share of sagacity. The Hebrew word *חָכָם*, translated "subtile," though frequently used in a good sense, implies, it is probable, in this passage, "mischievous and malignant craftiness," and is well rendered by Aquila and Theodotion by *πανούργος*, and thus commented upon by Jerome, "Magis itaque hoc verbo calliditas et versutia quam sapientia demonstratur" (see Rosenmüller, *Schol.* ad loc.). The ancients give various reasons for regarding serpents as being endued with wisdom, as that one species, the *cerastes*, hides itself in the sand and bites the heels of animals as they pass, or that, as the head was considered the only vulnerable part, the serpent takes care to conceal it under the folds of the body. Serpents have in all ages been regarded as emblems of cunning craftiness. The particular wisdom alluded to by our Lord refers, it is probable, to the sagacity displayed by serpents in avoiding danger. The disciples were warned to be as prudent in not incurring unnecessary persecution.

It has been supposed by many commentators that the serpent, prior to the fall, moved along in an erect attitude, as Milton (*P. L.* ix, 496) says—

"Not with indented wave
Prone on the ground, as since, but on his rear,
Circular base of rising folds that tower'd
Fold above fold, a surging maze."

Comp. also Josephus (*Ant.* i, 1, 4), who believed that God now for the first time inserted poison under the serpent's tongue, and deprived him of the use of feet, causing him to crawl low on the ground by the undulating inflections of the body (*κατὰ τῆς γῆς λυσιπύμενον*). Patrick (*Comment.* ad loc.) entertained the extraordinary notion that the serpent of the fall was a winged kind (*saraph*), and Adam Clarke has been the laughing-stock of exegetes ever since for maintaining that the serpent of the garden was an *orang-outang* (*Comment.* ad loc.).

It is quite clear that an erect mode of progression is utterly incompatible with the structure of a serpent, whose motion on the ground is so beautifully effected by the mechanism of the vertebral column and the multitudinous ribs, which, forming as it were so many pairs of levers, enable the animal to move its body from place to place; consequently, had the snakes before the fall moved in an erect attitude, they must have been formed on a different plan altogether. It is true that there are saurian reptiles, such as the *Sauropsis tetradactylus* and the *Chamaesaura anguina* of South Africa, which in external form are very like serpents, but with quasi-feet; indeed, even in the boa-constrictor, underneath the skin near the extremity, there exist rudimentary legs. Some have been disposed to believe that the snakes before the fall were similar to the *Sauropsis*. Such a hypothesis, however, is untenable, for all the fossil *Ophidia* that have hitherto been found differ in no essential respects from modern representatives of that order: it is, moreover, beside the mark, for the words of the curse, "upon thy belly shalt thou go," are as characteristic of the progression of a saurophoid serpent before the fall as of a true ophidian after it. There is no reason whatever to conclude, from the language of Scripture, that the serpent underwent any

change of form on account of the part it played in the history of the fall. The sun and the moon were in the heavens long before they were appointed "for signs and for seasons, and for days and for years." The typical form of the serpent and its mode of progression were, in all probability, the same before the fall as after it; but subsequent to the fall its form and progression were to be regarded with hatred and disgust by all mankind, and thus the animal was cursed "above all cattle," and a mark of condemnation was forever stamped upon it. There is no necessity to show how that part of the curse is literally fulfilled which speaks of the "enmity" that was henceforth to exist between the serpent and mankind; and though, of course, this has more especial allusion to the devil whose instrument the serpent was in his deceit, yet it is perfectly true of the serpent. Few will be inclined to differ with Theocritus (*Id.* xv, 58)—

τὸν ψυχρὸν ὄφιν ταμίαιστα δεδιώκω
ἔκ παιδός.

Serpents are said in Scripture to "eat dust" (see Gen. iii, 14; Isa. lxxv, 25; Mic. vii, 17); these animals, which, for the most part, take their food on the ground, do consequently swallow with it large portions of sand and dust (see Thomson, *Land and Book*, ii, 332).

IV. *Mythology*.—As already seen, scriptural evidence attests the serpent's influence on the early destinies of mankind; and this fact may be traced in the history, the legends, and creeds of most ancient nations. It is far from being obliterated at this day among the pagan, barbarian, and savage tribes of both hemispheres, where the most virulent and dangerous animals of the viviparous class are not uncommonly adored, but more generally respected, from motives originating in fear; and others, of the oviparous race, are suffered to abide in human dwellings, and are often supplied with food, from causes not easily determined, excepting that the serpent is ever considered to be possessed of some mysterious superhuman knowledge or power. Hence, besides real species, ideal forms, taken from the living, but combining other or additional properties, occur, at the most early periods, as metaphorical types, in fable and history, and in the hieroglyphics and religious paintings of many nations. Such are the innumerable fables in Hindû lore of Nagas and Naga kings; the primeval astronomy which placed the serpent in the skies, and called the Milky Way by the name of Ananta and Sesa Naga; the pagan obscure yet almost universal record of the deluge typified by a serpent endeavoring to destroy the ark, which astronomy has likewise transferred to the skies in the form of a dragon about to devour the moon, when, in an eclipsed state, it appears in the form of an amphipromnos, or crescent-shaped boat; and, strange as it may seem, lunar eclipses still continue to be regarded in this character, and to excite general apprehension in Central Africa as well as in China, in the South Sea Islands as well as in America. See DRAGON. The nations of the North once believed in the Jormunds Gander, or Kater serpent of the deep; and they, together with the Celts and Basques and all Asia, had legends of the Orm, the Paystha, the dragon guardian of riches, brooding on gold in caverns deep below the surface of the earth, or lying in huge folds on dreary and extensive heaths. These fables were a residue of that antique dragon-worship which had its temples from High Asia and Colchis to the north of Great Britain, and once flourished both in Greece and Northern Africa—structures with avenues of upright stones of several miles in length, whereof the ruins may still be traced at Carnak in Brittany, Abury in Wiltshire, and Redruth in Cornwall—the two last mentioned more particularly showing their connection with the circle constituting a form of the mundane egg, which again was an emblem of the deluge and the ark. The Hesperian, Colchian, and Lernaean dragons are only Greek legends of the same doctrine, still more distorted, and affording ample proof how far the pagan world had departed from

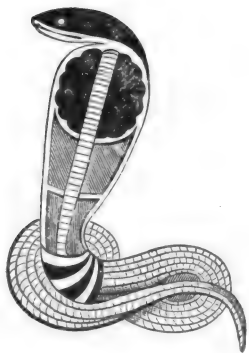

the simplicity of scriptural truth, from the excessive use of metaphorical descriptions and fanciful symbols. In Egypt, the early centre of ophiolatry, this debasing service was so deeply rooted that a Christian sect of heretics, called Ophitæ, or, according to Clemens Alexandrinus, Ophiani, arose in the 2d century of our æra. As an emanation of the Gnostics, their errors are particularly noticed by Tertullian, and form a signal instance of human perverseness ingeniously misleading itself and others by the abuse of symbols; yet, when the anguine type did not pass into long, distorted legends, it is evident, from the brazen serpent raised by Moses in the wilderness, that it was correctly appreciated by the people as a sign, not in itself a power, of divine aid; and that its true symbolical meaning did not escape even pagan comprehension appears from profane history, in Meissi, the good serpent, being likewise properly understood by the Egyptians, until idolatry distorted all the national reminiscences, and the promise of what was not fully revealed till the Saviour appeared on earth was obliterated. Ob, Oub, the Coptic Hof, Obion in Kircher, was, however, the general name for serpents in Egypt; and Kneph, or Cnuphis, or Ih-Nuphi, the good genius, always figured as the Nachash or Thermuth, is, therefore, the same as Naga Sahib, or lord-serpent of India, and still a personification of the vanquisher of the deluge—Vishnu and many others being pagan denominations of Noah. In this sense the good genius Cnuphis was a type of the Saviour of men, and called by them the spirit pervading nature, the creator from whose mouth proceeded the mundane egg; being referred, after the loss of the true interpretation, to any typical form of the patriarch, the events of the deluge and the creation, thus confounding the operations of the Almighty with the ministry of his servant. (See Deane, *The Worship of the Serpent traced throughout the World* [Lond. 1833].) See SERPENT-WORSHIP.

There was, however, another idolized snake of the great destroyer Python tribe, which devour even each other; it is represented on Egyptian monuments bearing a mummy figure on its tail, and gliding over a seated divinity with an egg on the head, while human sacrifice by decapitation is performed before it. This serpent is so carefully drawn that we recognise the Thaibanne, *Ophites Thebanus*, which grows to twelve or more feet in length, is still found in Upper Egypt, and is a congener, if not the same as *Python tigris albicans*, the great snake even at present worshipped in Cutch: it may be the Apophis of the Egyptians. To descend further on this subject would lead us too far from our purpose; but the Egyptian Python here noticed, changing its character from being a type of the deluge to that of an emblem of the ark carrying the spirit of human life within or upon it, was not without its counterpart in England, where lately, in digging out the deep, black mud of a ditch, a boat-shaped Python, carrying the eight Eones (?) or Noachidæ, has been discovered, with emblems that denote them to be the solar regenerators of mankind. Thus, as is ever the case in polytheistical legends, the type disappears through multiplied transitions and the number of other symbols and personifications characterized by the same emblem. It was so in this instance, when the snake form was conferred also on abstractions bearing the names of divinities, such as Ranno, Hoph, Bai, Hoh or Hih, and others.

The asserted longevity of the serpent tribe may have suggested the representation of the harmless house-snake biting its tail as typical of eternity; and this same quality was, no doubt, the cause why this animal, entwined round a staff, was the symbol of health and the distinctive attribute of the classical Æsculapius and Hygeia. There are species of this genus common to Palestine and the southern parts of continental Europe. They were domesticated in Druidical and other pagan sanctuaries, and were employed for omens and other impostures; but the mysterious Ag or Hagstone

was asserted to be produced by the venomous viper species. With such powers of destroying animal life, and with an aspect at once terrible and resplendent, it may easily be imagined how soon fear and superstition would combine, at periods anterior to historical data, to raise these monsters into divinities, and endeavor to deprecate their wrath by the blandishments of worship; and how design and cupidity would teach these very votaries the manner of subduing their ferocity, of extracting their instruments of mischief, and making them subservient to the wonder and amusement of the vulgar by using certain cadences of sound which affect their hearing, and exciting in them a desire to perform a kind of pleasurable movement that may be compared to dancing. Hence the Nagas of the East, the Hagworms of the West, and the Haje have all been deified, styled *agathodæmon*, or good spirit; and figures of them occur wherever the superstition of pagan antiquity has been accompanied by the arts of civilization.

"Almost throughout the East," writes Kalisch (*Hist. and Crit. Comment. Gen. iii.*, 1), "the serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phœnicians adored that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven (*tien-hoangs*) bodies of serpents.

Kneph Agathodæmon, denoting Immortality (see Horapollo, i, 1).

Some other nations fluctuated in their conceptions regarding the serpent. The Egyptians represented the eternal spirit Kneph, the author of all good, under the mythic form of that reptile; they understood the art of taming it, and embalmed it after death; but they applied the same symbol for the god of revenge and punishment (Tithrambo), and for Typhon, the author of all moral and physical evil; and in the Egyptian symbolical alphabet the serpent represents subtlety and cunning, lust and sensual pleasure. In Greek mythology it is certainly, on the one hand, the attribute of Ceres, of Mercury, and of Æsculapius, in their most beneficent qualities; but it forms, on the other hand, a part of the terrible Furies, or Eumenides: it appears in the form of a Python as a fearful monster, which the arrows of a god only were able to destroy; and it is the most hideous and most formidable part of the impious giants who despise and blaspheme the power of Heaven. The Indians, like the savage tribes of Africa and America, suffer and nourish, indeed, serpents in their temples, and even in their houses. They believe that they bring happiness to the places which they in-

habit; they worship them as the symbols of eternity; but they regard them also as evil genii, or as the inimical powers of nature, which is gradually depraved by them, and as the enemies of the gods, who either tear them to pieces or tread their venomous head under their all-conquering feet. So contradictory is all animal-worship. Its principle is, in some instances, gratitude, and in others fear; but if a noxious animal is very dangerous, the fear may manifest itself in two ways—either by the resolute desire of extirpating the beast, or by the wish of averting the conflict with its superior power: thus the same fear may, on the one hand, cause fierce enmity, and, on the other, submission and worship." See, on the subject of serpent-worship, Vossius, *De Orig. Idol.* i, 5; Bryant, *Mythology*, i, 420–490: it is well illustrated in the apocryphal story of "Bel and the Dragon;" comp. Steindorff, *De 'Ophiolatris*; Winer, *Bib. Realwört.* ii, 488.

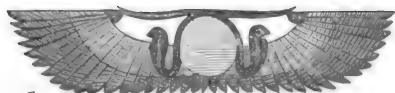

From a modification, perhaps, of this idea of a tutelary genius, in Egypt and other Oriental countries a serpent was the common symbol of a powerful monarch. It was embroidered on the robes of princes and blazoned on their diadems to signify their invincible might; and that, as the wound inflicted by them is incurable, so the fatal effects of royal displeasure were neither to be averted nor endured.

The evil spirit in the form of a serpent appears in the Ahriman, or lord of evil, who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile (*Zendavesta* [ed. Kleuk.], i, 25; iii, 84; see Rus, *De Serpente Seductore non Naturali sed Diabolo* [Jen. 1712], and Grapius, *De Tentatione Evæ et Christi a Diabolo in Assumpto Corpore Facta* [Rostoch. 1712]). But compare the opinion of Dr. Kalisch, who (*Comment. on Gen. iii.*, 14, 15) says "the serpent is the reptile, not an evil dæmon that had assumed its shape. . . . If the serpent represented Satan, it would be extremely surprising that the former only was cursed, and that the latter is not even mentioned. . . . It would be entirely at variance with the divine justice forever to curse the animal whose shape it had pleased the evil one to assume." According to the Talmudists, the name of the evil spirit that beguiled Eve was Sammaël (שַׁמַּאֵל): "R. Moses ben-Majemon scribit in More (lib. ii, c. 30), Sammaelem inequitas serpenti antiquo et seduxisse Evam. Dicit etiam nomen hoc absolute usurpari de Satana, et Sammaelem nihil aliud esse quam ipsum Satanam" (Buxtorf, *Lex. Talm.* col. 1495).

It is of more importance to remark that in the traditions of most pagan nations, which have been embodied in their mythology, the serpent appears as the enemy of man, and a triumph over this enemy is usually described as the greatest achievement of a popular deity. The Egyptian Horus is frequently represented piercing the head of some terrific serpent with his spear. From this source the Greeks and Romans adopted the fable of Apollo and the serpent Python, which is thus narrated by Ovid:

"Of new monsters earth created more
Unwillingly, but yet she brought to light
Thee, Python, too, the wondering world to fright
And the new nations with so dire a sight:
So monstrous was his bulk, so large a space
Did his vast body and long train embrace.
Him Phœbus basking on a bank espied,
And all his skill against the monster tried:
Though every shaft took place, he spent the store
Of his full quiver, and 'twas long before
The expiring serpent wallowed in his gore."

Lok, one of the favorite heroes of the Northern mythology, is represented as a destroyer of serpents, and a legend similar to the classic story just quoted represents him as destroying a monstrous serpent with his hammer

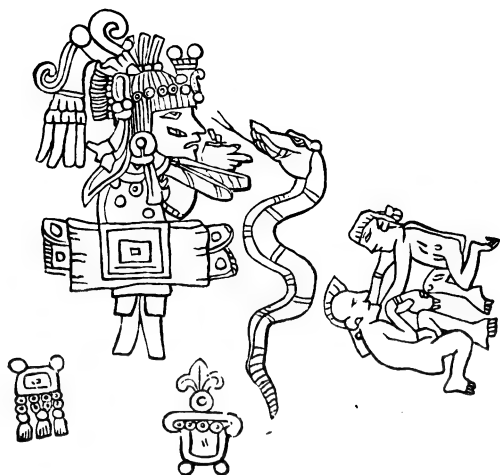

a

or mace. The similarity of all these accounts to the scriptural narrative is obvious; but a still more striking parallel has been discovered in the Mexican mythology by baron Humboldt. He says:

"The group represents the celebrated serpent-woman Chiuacohuati, called also Quilazli, or Tonacacihua, 'Woman of our flesh;' she is the companion of Tonacatenetli. The Mexicans considered her as the mother of the human race, and after the god of the celestial paradise, Ometeneti, she held the first rank among the divinities of Anahuatl. We see her always represented with a great serpent. Other paintings exhibit to us a feather-headed snake cut in pieces by the great spirit Tezcatlipoca, or by the sun personified, the god Tonatiuh. These allegories remind us of the ancient traditions of Asia. In the woman and serpent of the Aztecs we think we perceive the Eve of the Shemitic nations, in the snake cut in pieces the famous serpent Raliya, or Kalinaga, conquered by Vishnu when he took the form of Krishna. The Tonatiuh of the Mexicans appears also to be identical with the Krishna of the Hindus, recorded in the *Bhagavata-Purāna*, and with the Mithras of the Persians. The most ancient traditions of nations go back to a state of things when the earth, covered by bogs, was inhabited by snakes and other animals of gigantic bulk. The beneficent luminary, by drying up the soil, delivered the earth from these aquatic monsters. Behind the serpent, who appears to be speaking to the goddess Chiuacohuati, are two naked figures; they are of different color, and seem to be in the attitude of contending with each other. We might be led to suppose that the two vases which we see at the bottom of this contention. The serpent-woman was considered at Mexico as the mother of two twin children. These naked figures are, perhaps, the children of Chiuacohuati. They remind us of the Cain and Abel of Hebrew tradition."

An extraordinarily clear tradition of the agency of the serpent in the fall has lately been brought to light in the Assyrian tablets, being the story of the water-dragon as read by the late George Smith (*Chaldean Account of Genesis*, p. 91):

"The dragon, which in the Chaldean account of the creation leads man into sin, is the creature of Tiamat, the living principle of the sea and of chaos, and he is the embodiment of the spirit of chaos, or disorder, which was

Sacred Tree, Seated Figure on each side, and Serpent in the background. (From an early Babylonian cylinder.)

opposed to the deities at the creation of the world. It is clear that the dragon is included in the curse after the fall, and that the gods invoke on the head of the human race all the evils which inflict humanity. Wisdom and knowledge shall injure him (line 22); he shall have family quarrels (line 23); he shall submit to tyranny (line 24); he will anger the gods (line 25); he shall not eat the fruit of his labor (line 26); he shall be disappointed in his desires (line 27); he shall have trouble of mind and body (line 29 and 31); he shall commit future sin (line 32). No doubt subsequent lines continue these topics, but again our narrative is broken, and it only reopens where the gods are preparing for war with the powers of evil, which are led by Tiamat, which war probably arose from the part played by Tiamat in the fall of man."

See SNAKE.

SERPENT, CHRISTIAN SYMBOLISM OF. As a symbol, the serpent was used by the early Christians in three different senses.

1. To signify the victory of Jesus Christ over the devil. This was represented by a coiled serpent at the foot of the monogram on the cross to show "ut qui in ligno vincebat, in ligno quoque vinceretur." Antique gems bearing this device have been discovered, but their date cannot be earlier than the time of Constantine. The type is somewhat altered on medals of this emperor, having a dragon pierced by the staff of the labarum.

Ancient iconography often represented the saints as treading upon the serpent to express their victory over the spirit of darkness.

2. The figure of the serpent was also employed to signify the virtue of prudence or wisdom as commanded by Christ, "Be ye wise as serpents;" and as it was supposed that bishops should exemplify this virtue in its highest form (1 Tim. iii. 2), we often find the pictures of early bishops surrounded by a serpent as by a frame. For the same reason, in the early Latin Church the pastoral staff was terminated at the top by a serpent's head.

3. The serpent was used as a symbol of the cross and of Christ himself. These allegories have been developed by Gretzer and Giacomo Bosio in their works on this subject (*De Cruce* and *De Cruce Triumphale*). This use of the symbol, derived from the teachings of Christ (John iii. 14), soon degenerated into a worship of the serpent itself. This reached its climax among the Ophites (q. v.), who set it in the place of Christ himself (Augustine, *De Hæres.* c. 17, 46).

In times of persecution, when the exhibition of the cross was interdicted, the early Christians made use in its stead of the emblem of the serpent, as of the lamb, the good shepherd, and many others. These they wore as amulets and in other ways to show their confidence in the Saviour which they typified. They are found made of precious stones, on some of which is cut the figure of Moses, a rod in his hand, and an enormous serpent before him; a second person on the other side of the serpent represents the Jewish people.

In the commentary upon the 37th Psalm, Ambrose makes use of the type of the serpent principally as a symbol of the resurrection and of immortality.

Serpent of Brass (סֵרְפִינְתַּן הַבְּרָזָה; Sept. *ὄφις ὁ χαλκοῦς*, Numb. xxi. 9; 2 Kings xviii. 4). In addition to the treatment of this subject under BRAZEN SERPENT and NEHUSHTAN, some important particulars may here be enumerated. The familiar history of the brazen serpent need not be repeated here. The nature of the fiery snakes by which the Israelites were attacked has been discussed under SERPENT. The scene of the history, determined by a comparison of Numb. xxi. 3 and xxxiii. 42, must have been either Zalmonah or Punon. The names of both places probably conceal themselves with it, Zalmonah as meaning "the place of the image," Punon as probably identical with the *Φαινοί* mentioned by Greek writers as famous for its copper-mines, and therefore possibly supplying the materials (Bochart, *Litroz.* ii, 3, 13). See PUNON; ZALMONAH. The chief

interest of the narrative lies in the thoughts which have at different times gathered round it. We meet with these in four distinct stages, embodied in as many widely separated passages of Scripture. We have to ask by what associations each was connected with the others.

1. *The Formation of the Object* (Numb. xxi, 8, 9).—The truth of the history will, in this place, be taken for granted. Those who prefer it may choose among the hypotheses by which men halting between two opinions have endeavored to retain the historical and to eliminate the supernatural element. The theory which ascribes the healing to mysterious powers known to the astrologers or alchemists of Egypt may be mentioned, but hardly calls for examination (Marshall, *Can. Chron.* p. 148, 149; R. Tirza, in Deyling, *Exercitt. Sac.* ii, 210). Unbelievers may look on the cures as having been effected by the force of imagination, which the visible symbol served to heighten, or by the rapid rushing of the serpent-bitten from all parts of the camp to the standard thus erected, curing them, as men are said to be cured of the bite of the tarantula by dancing (Bauer, *Heb. Gesch.* ii, 520; Paulus, *Comm. IV*, i, 198). They may see in the serpent the emblematic sign-post, as it were, of the camp-hospital to which the sufferers were brought for special treatment, the form in this instance, as in that of the rod of Æsculapius, being a symbol of the art of healing (Hoffmann, in Scherer, *Schrift. Forsch.* i, 576). Leaving these conjectures on one side, it remains for us to inquire into the fitness of the symbol thus employed as the instrument of healing. To most of the Israelites it must have seemed as strange then as it did afterwards to the later rabbins that any such symbol should be employed. One of the Jewish interlocutors in the dialogue of Justin Martyr with Trypho (p. 322) declares that he had often asked his teachers to solve the difficulty, and had never found one who explained it satisfactorily. Justin himself, of course, explains it as a type of Christ.

The second commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. Now the colossal serpent (the narrative implies that it was visible from all parts of the encampment), made, we may conjecture, by the hands of Bezaleel or Aholiab, was exposed to their gaze, and they were told to look to it as gifted with a supernatural power. What reason was there for the difference? In part, of course, the answer may be that the second commandment forbade, not all symbolic forms as such, but those that men made for themselves to worship; but the question still remains, Why was this form chosen?

It is hardly enough to say, with Jewish commentators, that any outward means might have been chosen, like the lump of figs in Hezekiah's sickness, the salt which healed the bitter waters, and that the brazen serpent made the miracle yet more miraculous, inasmuch as the glare of burnished brass, the gaze upon the serpent form, were, of all things, most likely to be fatal to those who had been bitten (Gem. Bab. *Yoma*; Aben-Ezra and others, in Buxtorf, *Hist. Æn. Serp.* c. 5). The fact is doubtful, the reason inadequate. Another view, verging almost on the ludicrous, has been maintained by some Jewish writers. The serpent was set up in terror, as a man who has chastised his son hangs up the rod against the wall as a warning (Otho, *Lexic. Rabbin.* s. v. "Serpens").

It is hardly enough again to say, with most Christian interpreters, that it was intended to be a type of Christ. Some meaning it must have had for those to whom it was actually presented; and we have no grounds for assuming, even in Moses himself, still less in the multitude of Israelites slowly rising out of sensuality, unbelief, rebellion, a knowledge of the far-off mystery of redemption. If the words of our Lord in John iii, 14, 15, point to the fulfilment of the type, there must yet have been another meaning for the symbol. Taking its part

in the education of the Israelites, it must have had its starting-point in the associations previously connected with it. Two views, very different from each other, have been held as to the nature of those associations. On the one side it has been maintained that, either from its simply physical effects, or from the mysterious history of the temptation in Gen. iii, the serpent was the representative of evil. To present the serpent-form as deprived of its power to hurt, impaled as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been overcome, and thus help to strengthen the weak faith of the Israelites in a victory over both. The serpent, on this view, expressed the same idea as the dragon in the popular representations of the archangel Michael and St. George (Ewald, *Geschichte*, ii, 228). To some writers, as to Ewald, this has commended itself as the simplest and most obvious view. It has been adopted by some orthodox divines who have been unable to convince themselves that the same form could ever really have been at once a type of Satan and of Christ (Jackson, *Humiliation of the Son of God*, ch. xxxi; Patrick, *Comm.* ad loc.; Espagnæus, Burmann, Vitringa, in Deyling, *Observatt. Sac.* ii, 15). Others, again, have started from a different ground. They raise the question whether Gen. iii was then written, or, if written, known to the great body of the Israelites. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they find there that it was worshipped as an *agathodæmon*, the symbol of health and life (comp. SERPENT, and, in addition to the authorities there referred to, Wilkinson, *Anc. Egyptians*, ii, 184; iv, 395; v, 64, 238; Kurtz, *Hist. of the Old Covenant* [Eng. transl.], iii, 348; Witsius, *Ægyptiaca*, in Ugolino, i, 852). This, for them, explains the mystery. It was as the known emblem of a power to heal that it served as the sign and sacrament on which the faith of the people might fasten and sustain itself.

Contrasted as these views appear, they have, it is believed, a point of contact. The idea primarily connected with the serpent in the history of the fall, as throughout the proverbial language of Scripture, is that of wisdom (Gen. iii, 1; Matt. x, 16; 2 Cor. xi, 3). Wisdom, apart from obedience to a divine order, allying itself to man's lower nature, passes into cunning. Man's nature is envenomed and degraded by it. But wisdom, the self-same power of understanding, yielding to the divine law, is the source of all healing and restoring influences, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be such to them in proportion as they ceased to be sensual and rebellious. There were facts in the life of Moses himself which must have connected themselves with this twofold symbolism. When he was to be taught that the divine wisdom could work with any instruments, his rod became a serpent (Exod. iv, 1-5). (Comp. Cyril. Alex. *Schol.* 15; *Glaphyra in Exod.* ii. The explanation given by Cyril is, as might be expected, more mystical than that in the text. The rod transformed into a serpent represents the Divine Word taking on himself the likeness of sinful flesh.) When he and Aaron were called to their great conflict with the perverted wisdom of Egypt, the many serpents of the magicians were overcome by the one serpent of the future high-priest. The conqueror and the conquered were alike in outward form (Exod. vii, 10-12).

2. *The Destruction of the Object* (2 Kings xviii, 4).—The next stage in the history of the brazen serpent shows how easily even a legitimate symbol, retained beyond its time, after it had done its work, might become the occasion of idolatry. It appears in the reign of Hezekiah as having been, for some undefined period, an object of worship. The zeal of that king leads him to destroy it. It receives from him, or had borne before, the name Nehushtan (q. v.). We are left to conjecture when the worship began, or what was its locality. Ewald's conjecture (*Geschichte*, iv, 622) that till then the

serpent may have remained at Zalmonah, the object of occasional pilgrimages, is probable enough. It is hardly likely that it should have been tolerated by the reforming zeal of kings like Asa and Jehoshaphat. It must, we may believe, have received a fresh character and become more conspicuous in the period which preceded its destruction. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development, that it thus became the object of a marked aversion to the iconoclastic party who were prominent among the counsellors of Hezekiah. Intercourse with countries in which ophiolatry prevailed—Syria, Assyria, possibly Egypt also—acting on the feeling which led him to bring together the idolatries of all neighboring nations, might easily bring about this perversion of the reverence felt for the time-honored relic.

Here we might expect the history of the material object would cease, but the passion for relics has prevailed even against the history of the Bible. The Church of St. Ambrose at Milan has boasted for centuries of possessing the brazen serpent which Moses set up in the wilderness. The earlier history of the relic, so called, is matter for conjecture. Our knowledge of it begins in the year A.D. 971, when an envoy was sent by the Milanese to the court of the emperor John Zimisces at Constantinople. He was taken through the imperial cabinet of treasures and invited to make his choice, and he chose this, which, the Greeks assured him, was made of the same metal as the original serpent (Sigonius, *Hist. Regn. Ital.* bk. vii). On his return it was placed in the Church of St. Ambrose, and popularly identified with that which it professed to represent. It is, at least, a possible hypothesis that the Western Church has in this way been led to venerate what was originally the object of the worship of some Ophite sect.

3. *The Apocryphal Notices of the Object.*—When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the book of Wisdom, in the elaborate contrast which he draws between true and false religions in their use of outward signs, sees in it a *σύμβολον σωτηρίας, εἰς ἀνάμνησιν ἐντολῆς νόμου σου*; “he that turned himself was not saved by the thing that he saw (*ὅτι τὸ θεωρουμένον*), but by thee that art the Saviour of all” (Wis. xvi, 6, 7). The Targum of Jonathan paraphrases Numb. xxi, 8, “He shall be healed if he direct his heart unto the Name of the Word of the Lord.” Philo, with his characteristic taste for an ethical, mystical interpretation, represents the history as a parable of man’s victory over his lower, sensuous nature. The metal, the symbol of permanence and strength, has changed the meaning of the symbol, and that which had before been the emblem of the will, yielding to and poisoned by the serpent pleasure, now represents *σωφροσύνη, the ἀντιπαῖς ἀκολασίας φάρμακον* (*De Agric. cult.*). The facts just stated may help us to enter into the bearing of the words of John iii, 14, 15. If the paraphrase of Jonathan represents, as it does, the current interpretation of the schools of Jerusalem, the devout rabbi to whom the words were spoken could not have been ignorant of it. The new teacher carried the lesson a step further. He led him to identify the “Name of the Word of the Lord” with that of the Son of man. He prepared him to see in the lifting-up of the crucifixion that which should answer in its power to heal and save to the serpent in the wilderness.

4. *Our Lord’s Allusion to the Object* (John iii).—A full discussion of the typical meaning here unfolded belongs to exegesis rather than to a dictionary. It will be enough to note here that which connects itself with facts or theories already mentioned. On the one side the typical interpretation has been extended to all the details. The pole on which the serpent was placed was not only a type of the cross, but was itself crucial in form (Just. Mart. *Dial. c. Tryph.* p. 322). The serpent

was nailed to it as Christ was nailed. As the symbol of sin, it represented his being made sin for us. The very metal, like the fine brass of Rev. i, 15, was an emblem of the might and glory of the Son of Man (comp. Lampe, *ad loc.*). On the other, it has been maintained (Patrick and Jackson, *ut supra*) that the serpent was from the beginning, and remains still, exclusively the symbol of evil; that the lifting-up of the Son of man answered to that of the serpent because on the cross the victory over the serpent was accomplished. The point of comparison lay not between the serpent and Christ, but between the look of the Israelite to the outward sign and the look of a justifying faith to the cross of Christ. It will not surprise us to find that in the spiritual, as in the historical interpretation, both theories have an element of truth. The serpent here also is primarily the emblem of the “knowledge of good and evil.” To man, as having obtained that knowledge by doing evil, it has been as a venomous serpent, poisoning and corrupting. In the nature of the Son of Man it is once more in harmony with the divine will, and leaves the humanity pure and untainted. The crucifixion is the witness that the evil has been overcome by the good. Those who are bitten by the serpent find their deliverance in looking to him who knew evil only by subduing it, and who is therefore mighty to save. Well would it have been for the Church of Christ if it had been content to rest in this truth. Its history shows how easy it was for the old perversion to reproduce itself. The highest of all symbols might share the fate of the lower. It was possible even for the cross of Christ to pass into a Nehushtan (comp. Stier, *Words of the Lord Jesus*, on John iii, and Kurtz, *Hist. of the Old Covenant* [Eng. transl.], iii, 344–358).

What, then, are the particulars in which these acts in the Old and in the New Test. correspond; or what are the points of resemblance implied in our Lord’s words—as and even so? In our answer we must avoid the error of trying to reckon up a number of these resemblances; and, indeed, we must look to essential correspondence, not to any fanciful likeness on the surface. This we must do in agreement with the principle that the relation is the same between the bitten Israelites and the serpent lifted up for them to look at as between perishing sinners and the crucified Saviour who is offered to them. There are three such correspondences: (1) There is “the serpent” which Moses lifted up in the wilderness, and there is “the Son of Man,” lifted up in due time on the cross. It is in stating this point of resemblance, however, that there have been most extravagance and error, which have disgusted some sober thinkers, and induced them to deny it altogether—a denial which we think unwarrantable, when we observe the manner in which the two objects are singled out and placed together. The reference is certainly not at all to heathenish notions of the serpent as possessed of a healing power. Nor even is it directly to the old serpent, on whom Christ has inflicted a fatal wound, and made a show of him openly, triumphing over him in his cross. It is better to say that the brazen serpent had the form indeed of the serpents that actually wrought the mischief, but yet a serpent destitute of venom and impotent for evil; and that so God sent his Son in the likeness of sinful flesh, yet without sin. We prefer, however, to say that the brazen serpent seemed a most improbable means of curing the serpents’ bites; and so he who was condemned and crucified as a malefactor seemed most unsuitable to save condemned and perishing men. (2) There is the lifting-up of the serpent upon the pole, no doubt in such a way as to render it conspicuous to the farthest extremities of the camp, which would be the more easily effected on account of its metallic brilliancy. Corresponding to this there is the lifting-up of the Son of man, who says, “Look unto me and be ye saved, all the ends of the earth” (Isa. xlv, 22); as the apostle says to those who have heard the Gospel, “Before whose eyes Jesus Christ hath been evi-

dently set forth, crucified among you" (Gal. iii, 1). It is impossible to overlook this comparison, except by misinterpreting the expression "the Son of Man must be lifted up;" though there is no room for mistake when we have our Lord's own words, "And I, if I be lifted up from the earth, will draw all men unto me," by which phrase he signified the manner of his death, and was understood as doing so (John xii, 32-34). (3) There is the healing of the physical wound by the bodily eye looking to the serpent, and the corresponding spiritual healing by looking to the crucified Son of Man with the eye of faith—the natural life in the one case having that relation to the everlasting life in the other which the type always bears to the antitype.

Serpent-charming. There can be no question at all of the remarkable power which from time immemorial has been exercised by certain people in the East over poisonous serpents. The art is most distinctly mentioned in the Bible [see CHARM], and probably alluded to by St. James (iii, 7). The usual species operated upon, both in Africa and India, are the hooded snakes (*Naja tripudians*, and *Naja haje*) and the horned *cerastes*. The skill of the Italian *marsi* and the Libyan *psylli* in taming serpents was celebrated throughout the world; and to this day, as we are told by Sir G. Wilkinson (Rawlinson, *Herodotus*, iii, 124, note, ed. 1862), the snake-players of the coast of Barbary are worthy successors of the *psylli* (see Pliny, viii, 25; xi, 25; and especially Lucan's account of the *psylli* [*Pharsal*, ix, 892]). See numerous references cited by Bochart (*Hieroz*, iii, 164, etc.) on the subject of serpent-taming. Multitudes of modern observers have described the practices of the snake-charmers in such terms as to leave no doubt of the fact. One instance may suffice for illustration. Mr. Gogerly, a missionary in India, says that some persons, being incredulous on the subject, after taking the most careful precautions against any trick or artifice being played, sent a charmer into the garden to prove his powers: "The man began to play upon his pipe, and, proceeding from one part of the garden to another for some minutes, stopped at a part of the wall much injured by age, and intimated that a serpent was within. He then played quicker, and his notes were louder, when almost immediately a large cobra-de-capello put forth its hooded head, and the man ran fearlessly to the spot, seized it by the throat, and drew it forth. He then showed the poison-fangs, and beat them out; afterwards it was taken to the room where his baskets were left and deposited among the rest. . . . The snake-charmer," observes the same writer, "applies his pipe to his mouth and sends forth a few of his peculiar notes, and all the serpents stop as though enchanted; they then turn towards the musician, and, approaching him within two feet, raise their heads from the ground, and, bending backward and forward, keep time with the tune. When he ceases playing, they drop their heads and remain quiet on the ground." That the charmers frequently, and perhaps generally, take the precaution of extracting the poison-fangs before the snakes are subjected to their skill there is much probability for believing, but that this operation is not always attended to is clear from the testimony of Bruce and numerous other writers. "Some people," says the traveller just mentioned, "have doubted that it was a trick, and that the animals so handled had been first trained and then disarmed of their power of hurting, and, fond of the discovery, they have rested themselves upon it without experiment, in the face of all antiquity. But I will not hesitate to aver that I have seen at Cairo a man . . . who has taken a *cerastes* with his naked hand from a number of others lying at the bottom of the tub, has put it upon his bare head, covered it with the common red cap he wears, then taken it out, put it in his breast, and tied it about his neck like a necklace, after which it has been applied to a hen and bit it, which has died in a few minutes." Dr. Davy, in his *Interior of Ceylon*, speaking of the snake-charmers, says on this subject: "The ignorant vulgar

believe that these men really possess a charm by which they thus play without dread, and with impunity, from danger. The more enlightened, laughing at this idea, consider the men impostors, and that in playing their tricks there is no danger to be avoided, it being removed by the abstraction of the poison-fangs. The enlightened in this instance are mistaken, and the vulgar are nearer the truth in their opinion. I have examined the snakes I have seen exhibited, and have found their poison-fangs in and uninjured. These men do possess a charm, though not a supernatural one, viz. that of confidence and courage. . . . They will play their tricks with any hooded snakes (*Naja tripudians*), whether just taken or long in confinement, but with no other kind of poisonous snake." (See also Tennent, *Ceylon*, 3d ed. i, 199.) Some have supposed that the practice of taking out or breaking off the poison-fangs is alluded to in *Psa.* lviii, 6, "Break their teeth, O God, in their mouth." The ser-

Modern Oriental Serpent-charmers.

pent-charmer's usual instrument is a flute. Shril sounds, it would appear, are those which serpents, with their imperfect sense of hearing, are able most easily to discern; hence it is that the Chinese summon their tame fish by whistling or by ringing a bell. The reader will find much interesting matter on the art of serpent-charming, as practiced by the ancients, in Bochart (*Hieroz*, iii, 161); in the dissertation by Böhmer entitled *De Psyllorum, Marsorum, et Ophiogenum aduersus Serpentes Virtute* (Lips. 1745); and in Kämpfer, *Amnitates Exotica*, III, ix, 565; see also Broderip, *Notebook of a Naturalist*, and *Anecdotes of Serpents*, published by Chambers; Lane, *Modern Egyptians*, ii, 106. Those who professed the art of taming serpents were called by the Hebrews *menachashim* (מְנַחָשִׁים), while the art itself was called *láchash* (לַחָשׁ), *Jer.* viii, 17; *Eccles.* x, 11; but these terms were not always used in this restricted sense. See DIVINATION.

In general, these serpent-charmers were, and are, distinct tribes of men in their several countries, professing the power they claim to be an inherent and natural function. The most famous serpent-charmers of antiquity were the *Psylli*, a people of Cyrenaica; and that theirs was believed to be a natural power appears from the story told by Pliny, that they were accustomed to try the legitimacy of their new-born children by exposing them to the most cruel and venomous serpents, who dared not molest or even approach them unless they were illegitimate. He thinks their power resided in some peculiar odor in their persons, which the serpents abhorred (*Hist. Nat.* vii, 2). Lucan says the same; and the passage in which that poet speaks of them affords a complete exposition of the ancient belief concerning the charming of serpents. He chiefly describes the measures which they took to protect the Roman camp. When the encampment was marked

out, they marched around it chanting their charms, the "mystic sound" of which chased the serpents far away. But not trusting entirely to this, they kept up fires, of different kinds of wood, beyond the farthest tents, the smell of which prevented the serpents from approaching. Thus the camp was protected during the night. But if any soldier, when abroad in the daytime, happened to be bitten, the Psylli exerted their powers to effect a cure. First they rubbed the wounded part around with saliva, to prevent, as they said, the poison from spreading while they assayed their arts to extract it (*Pharsalia*, ix). See ENCHANTMENT.

In this account we find the voice repeatedly mentioned; and it is to "the voice of the charmer" that the Psalmist refers. We may suppose that, as in the passage we have quoted, the charmers use a form of words—a charm—or else chanted a song in some peculiar manner. So Eusebius, in mentioning that Palestine abounded in serpent-charmers in his time, says that they usually employed a verbal charm. This is still one of the processes of the Oriental serpent-charmers. Roberts says that the following is considered in India the most potent form of words against serpents: "Oh, serpent! thou who art coiled in my path, get out of my way; for around thee are the mongoos, the porcupine, and the kite in his circles is ready to take thee!" The Egyptian serpent-charmer also employs vocal sounds and a form of words to draw the venomous creatures from their retreats. Mr. Lane says, "He assumes an air of mystery, strikes the walls with a short palm-stick, whistles, makes a clucking noise with his tongue, and spits upon the ground; and generally says, 'I adjure you by God, if ye be above, or if ye be below, that ye come forth; I adjure ye by the most great name, if ye be obedient, come forth; and if ye be disobedient, die! die! die!'" (*Modern Egyptians*, ii, 104). See ADDER.

With regard to the manipulation of serpents by the Egyptian magicians (*Exod.* iv), we may remark that in modern times the psylli, or charmers, by a particular pressure on the neck of the cobra or *haje*, have the power of rendering the inflation of the animal—which is a character of the genus—so intense that the serpent becomes rigid, and can be held out horizontally as if it were a rod. This practice explains what the soothsayers of Pharaoh could perform when they were opposing Moses, and reveals one of the names by which the Hebrews knew the species; for although the text (*Exod.* iv, 3) uses, for the rod of Aaron converted into a serpent, the word נָחָשׁ, *nachâsh*, and subsequently (vii, 15) תַּנִּין, *tannîn*, it is plain that, in the second passage, the word indicates "monster," as applied to the *nachâsh* just named—the first being an appellative, the second an epithet. That the rods of the magicians of Pharaoh were of the same external character is evident from no different denomination being given to them; therefore we may infer that they used a real serpent as a rod—viz. the species now called *haje*—for their imposture, since they no doubt did what the present serpent-charmers perform with the same species by means of the temporary *asphyxiation*, or suspension of vitality, before noticed, and producing restoration to active life by liberating or throwing down. Thus we have the miraculous character of the prophet's mission shown by his real rod becoming a serpent, and the magicians' real serpents merely assuming the form of rods; and when both were opposed, in a state of animated existence, by the rod devouring the living animals, conquering the great typical personification of the protecting divinity of Egypt. See SERPENT.

Serpentinians. See OPHITES.

Serpent-worship. The extent to which this species of idolatry has prevailed is very remarkable. From the fact that Satan assumed the form of a serpent,

in his temptation of our first parents, it has been adopted as the symbol of Typhon, or the evil deity of the ancient Egyptians; of Ahriman among the Persians; and of the spirit of evil in the hieroglyphics of the Chinese and Mexicans. The serpent whose head the Messiah was to crush was transformed, in heathen fable, into the hydra which Hercules vanquished, and in India into that over which Krishna triumphed; into *Horus* in Egypt, *Siegfried* among the Germans, and *Crac* in Poland. We have also the serpent Python slain by Apollo, and the hundred-headed snake destroyed by Jupiter. The serpent was anciently worshipped in Chaldaea and in several other nations of the East. Servius tells us that the ancient Egyptians called serpents good demons. The asp was the emblem of the goddess Ranno, and was supposed to protect the houses, or the gardens, of individuals, as well as the infancy of a royal child. This serpent was called *Thermuthis*, and with it the statues of Isis were crowned as with a diadem. The snake Bai also appears to have figured as a goddess; and another snake-headed goddess had the name of Hoh or Hih. The Typhon of the Egyptians had the upper part of his person decorated with a hundred heads like those of a serpent or dragon.

In the religions of all the Asiatic nations the serpent is regarded as a wicked being who brought evil into the world. As such it became, in course of time, an object of religious worship in almost every part of heathendom, the worship being inspired rather by the desire to avert evil than to express reverence or gratitude. The Hindû serpent is the type and emblem of the evil principle in nature; and as such we see it wrestling with the goddess Parvati, or writhing under the victorious foot of Krishna, when he saves from its corrupting breath the herds that pasture near the waters of the Yamuna. "As a further illustration of this view, it is contended that many Hindûs, who feel themselves constrained to pay religious worship to the serpent, regard it, notwithstanding, as a hideous reptile, whose approach inspires them with a secret awe and insurmountable horror." In the symbolic language of antiquity the serpent occupies a conspicuous place. In *Gen.* iii, 1 we are told that "the serpent was more subtle than any beast of the field which the Lord God had made." In consonance with this view the Chinese regard *Long*, or the winged dragon, as the being who excels in intelligence. The supreme god of the Chaldeans, *Bel*, was adored under the form of a serpent or dragon; hence the Apocryphal book *Bel* and the Dragon. To represent the Almighty upholding the world by his powerful Word, the Hindûs describe it as resting upon a serpent which bites its own tail; and the Phenicians entwine the folds of a serpent around the cosmic egg. On the Egyptian monuments Kneph is seen as a serpent carried upon two legs of a man, or a serpent with a lion's head. The Siamese, while they are afraid of venomous serpents, never dare to injure them; but, on the contrary, they consider it a lucky omen to have them in or near their houses. Among the Chinese the serpent is a symbolic monster, dwelling in spring above the clouds to give rain, and in autumn under the waters.

Among the North American Indians the serpent was formerly held in great veneration; the Mohicans paying the highest respect to the rattlesnake, which they called their grandfather. Many primitive nations, however, looked upon the serpent as the personification of the evil principle. Among the idolatrous nations who descended from Ham this species of idolatry was universally practiced, and has sometimes been alleged to have been the most prevalent kind of worship in the antediluvian world. See Fergusson, *Tree and Serpent Worship* (Lond. 1869, 4to). See SERPENT.

Serrad, GIOVANNI ANDREA, an Italian prelate, was born at Castel Monardo (now Filadelfia), Feb. 4, 1731, and studied for the priesthood twelve years at Rome under the best teachers. He reorganized the Seminary of Tropea in 1759, and then went to Naples in connec-

tion with marquis Fraggianni, whose life he wrote, and also with abbé Genovesi, who procured him the chair of history in the Royal University, and afterwards that of theology in the College of the Saviour (1768). He was appointed bishop of Potenza in 1782, but was not consecrated till a year later, owing to some technical opposition. At the reorganization of the Royal Academy of Naples in 1778, he was chosen one of its perpetual secretaries. He was massacred Feb. 24, 1799, during the revolution which followed the French army. He wrote several works on local ecclesiastical history, in Latin and Italian, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Serres (Lat. *Serranus*), JEAN DE, a French Protestant historian and theologian, was born at Villeneuve de Berg about 1540, and educated at Lausanne, especially in ancient languages and philosophy. He early distinguished himself by his learned historical writings. In 1578 he was called to Nismes as rector of the academy and principal of the College of Arts. He was very active and conspicuous in the ecclesiastical affairs of the times, especially by his writings and the part he took in public religious bodies. He died at Geneva, May 31, 1598. For his extensive works, chiefly embracing Church history and polity, see Hoefer, *Nouv. Biog. Générale*, s. v.

Serry, FRANÇOIS JACQUES HYACINTHE, a French theologian, was born at Toulon in 1659. He early entered the Order of St. Dominic, and was sent to Paris for an education, where he applied himself to philosophy and began preaching. In 1690 he went to Rome, and became theologian to cardinal Altieri, and was engaged on the *Index*. He returned to Paris in 1696, and the next year took the degree of doctor, and was called as professor of theology to Padua, where he died, March 12, 1738. His works on ecclesiastical history and theology are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v. Among them are, *De Christo ejusque Virgine Matre* (Venice, 1719):—*Historia Congregationum de Aux. Div. Grat. sub Summis Pontiff. Clem. VIII et Paulo V* (in 4 libr. distributa, Louvain, 1700; Antw. 1709, fol.). See *Fürst, Bibl. Jud.* iii, 317; *Winer, Handbuch der theol. Literatur*.

Se'rug (Heb. *Serug'*, שֶׁרוּג, *branch* [Gesen.], or *strength* [Fürst]; Sept. Σερουγ; New Test. Σαρουχ, "Saruch," Luke iii, 35; Josephus Σερουγος, *Ant.* i, 6, 5), one of the postdiluvian patriarchs, being the son of Reu, and the father of Nahor the grandfather of Abraham (*Gen.* xi, 20; 1 *Chron.* i, 6). B.C. 2352–2122. His age is given in the Hebrew Bible, at the above passages, as 230 years—thirty years before he begat Nahor and two hundred years afterwards. But in the Sept. 130 years are assigned to him before he begat Nahor (making his total age 330), being one of its systematic variations in the ages of the patriarchs between Shem and Terah. See CHRONOLOGY. Bochart (*Phaleg*, II, cxiv) conjectures that the town of *Seruj*, a day's journey from Charre, in Mesopotamia, was named from this patriarch. Suidas and others ascribe to him the deification of dead benefactors of mankind. Epiphanius (*Adv. Hæres.* i, 6, 8), who says that his name signifies "provocation," states that, though in his time idolatry took its rise, yet it was confined to pictures; and that the deification of dead men, as well as the making of idols, was subsequent. He characterizes the religion of mankind up to Serug's days as Scythic; after Serug and the building of the Tower of Babel, the Hellenic or Greek form of religion was introduced, and continued to the writer's time (see Petavius, *Anim. adv. Epiph. Oper.* ii, 13). The account given by John of Antioch is as follows: Serug, of the race of Japhet, taught the duty of honoring eminent deceased men, either by images or statues (εἰκόνες and ἀνδριάντες, which, however, may here be used of pictures), of worshipping them on certain anniversaries as if still living, of preserving a record of their actions in the sacred books of the priests, and of calling them

gods as being benefactors of mankind. Hence arose polytheism and idolatry (see *Fragm. Historic. Græc.* iv, 345, and note). It is in accordance with his being called of the race of Japhet that Epiphanius sends Phaleg and Reu to Thrace (*Epist. ad Descr. Paul.* § ii).—Smith. There is, of course, little or no historical value in any of these statements, beyond the fact that the charge of idolatry brought against Terah and the fathers beyond the Euphrates in Josh. xxiv, 2.

Seruk MENACHEM. See SARUK.

Serunner, in Norse mythology, was the beautiful hall in Freya's dwelling of Folkwang, where she gathered about herself, in the service of love and for the enjoyment of all the pleasures of life, half the heroes of the earth. The abode of all the Einherjars is either here or in the Valhalla.—Vollmer, *Wörterb. d. Mythol.* s. v.

Servant (usually שֶׁפָּרַד, *ebed*, δούλος, which are invariably rendered thus in the A. V. or else "bondman;" but "servant" is occasionally the rendering of שֶׁפָּרַד, *na'ar*, properly a *lad* or "young man;" or מְשָׁרֵת, *mesarêth* [*Exod.* xxxiii, 11; *Numb.* xi, 28; 2 *Sam.* xiii, 17, 18; *Prov.* xxix, 12], a *minister*, as elsewhere rendered; Gr. in like manner sometimes παῖς, *diakonos*, etc.). See EBED. The Hebrew terms *na'ar* and *mesarêth*, which alone answer to our "servant," in so far as this implies the notions of liberty and voluntariness, are of comparatively rare occurrence. On the other hand, *ebed*, which is common in the A. V., properly means a *slave*. In many passages the correct reading would add considerable force to the meaning—e. g. in *Gen.* ix, 25, "Cursed be Canaan; a slave of slaves shall he be unto his brethren;" in *Deut.* v, 15, "Remember that thou wast a slave in the land of Egypt;" in *Job* iii, 19, "The slave is free from his master;" and particularly in passages where the speaker uses the term of himself, as in *Gen.* xviii, 3, "Pass not away, I pray thee, from thy slave." Slavery was, in point of fact, the normal condition of the underling in the Hebrew commonwealth, while the terms above given refer to the exceptional cases of young or confidential attendants. Joshua, for instance, is described as at once the *na'ar* and *mesarêth* of Moses (*Exod.* xxxiii, 11); Elisha's servant sometimes as the former (2 *Kings* iv, 12; v, 20), sometimes as the latter (iv, 43; vi, 15). Amnon's servant was a *mesarêth* (2 *Sam.* xiii, 17, 18), while young Joseph was a *na'ar* to the sons of Bilhah (*Gen.* xxxvii, 2, where instead of "the lad was with," we should read "he was the servant-boy to" the sons of Bilhah). The confidential designation *mesarêth* is applied to the priests and Levites in their relation to Jehovah (*Ezra* viii, 17; *Isa.* lxi, 6; *Ezek.* xliv, 11), and the cognate verb to Joseph after he found favor with Potiphar (*Gen.* xxxix, 4), and to the nephews of Ahaziah (2 *Chron.* xxii, 8). In 1 *Kings* xx, 14, 15, we should substitute "servants" (*na'ar*) for "young men." See HIRELING; SLAVE.

SERVANT OF JEHOVAH (שֶׁפָּרַד הַיְהוָה, δούλος τοῦ Κυρίου, "servant of the Lord," also in the phrase "my servant," etc.), a term used tropically in several senses.

1. A *worshipper* of God (*Neh.* i, 10); so the Israelites in general (*Ezra* v, 11), and Daniel in particular (*Dan.* vi, 21). In this sense it is applied as an epithet to the pious: e. g. to Abraham (*Psa.* cv, 6, 42), Joshua (*Josh.* xxiv, 29; *Judg.* ii, 8), Job (*Job* i, 8, etc.), David (*Psa.* xviii, 1, etc.), Eliakim (*Isa.* xxii, 20), Zerubbabel (*Hag.* ii, 24), and to saints in general (*Psa.* xxxiv, 23, etc.; *Isa.* liv, 17, etc.). See SAINT.

2. A *minister* or ambassador of God, called and sent to perform any service (*Isa.* xlix, 6), e. g. Nebuchadnezzar, whom God used as his instrument in chastising his people (*Jer.* xxvii, 6; xliii, 10); but usually some favorite servant, as the angels (*Job* iv, 18), or prophets (*Amos* iii, 7; *Jer.* vii, 25, etc.; *Dan.* ix, 6; *Ezra* ix, 11), especially Moses (*Deut.* xxxiv, 5; *Josh.* i, 1, 13, 15; *Psa.* cv, 26), and Isaiah (*Isa.* xx, 3). Sometimes the two ideas of a pious worshipper of God and a special messen-

ger sent by him seem to have coalesced, as in the passages relating to Abraham and Moses, and particularly in those where Israel or Jacob, i. e. the people of Israel, is addressed by this honorable and endearing appellation (as Isa. xli, 8, etc.; Jer. xxx, 10, etc.; Ezek. xxviii, 25; xxxvii, 26; comp. Hos. xi, 1).

3. Particularly the *Messiah* is thus typified, especially in the latter chapters of Isaiah (more particularly xlii, 1; lii, 13; comp. Matt. xii, 13), as pre-eminently Jehovah's chosen servant for accomplishing the work of redemption. See Gesenius, *Comment. in Jesa.* ad loc.; Stier, *Words of the Lord Jesus*, ii, 566 [Am. ed.]; Steudel, *De עֶבֶר* (Tüb. 1829); Umbreit, *Der Knecht Gottes* (Hamb. 1840); Schmutz, *Le Serviteur de Jehovah* (Strasb. 1858); Oehler, *Knecht Jehovah's* (Stuttg. 1865); Urwick, *The Servant of Jehovah* (Edinb. 1877). See DOUBLE SENSE.

Servants. See SLAVES.

Servātor, in Roman mythology, was a surname of Jupiter, signifying *the preserver*.

Server, one who assists the priest at the celebration of the holy eucharist by lighting the altar-tapers, arranging the books, bringing bread, wine, and water for the sacrifice, and by making the appointed responses in the name and behalf of the assembled congregation. He was sometimes called "adjutor." The Clugniacs allowed one server, but the Cistercians, in obedience to pope Soter's injunction and the plural wording of the *Dominus vobiscum*, required always two.

Servetus, MICHAEL (*Serveto*, surnamed *Reves*, known in France as *Michel de Villeneuve*), unquestionably the leading Antitrinitarian in the period of the Reformation, was born at Villaneuva, in Arragon, in 1509 or 1511, and belonged to an ancient Christian family of prominence, perhaps of noble rank. His father was a jurist and notary, and Michael was sent at an early age to Toulouse in preparation for a similar career; but his impetuous and imaginative spirit was not attracted by the dry study of jurisprudence, and turned with preference towards theological investigations, prompted, perhaps, by the fact that at Toulouse he first became acquainted with the Bible. The above statements are taken from his own testimony at the Geneva trial, and are probably truthful in the main; but it is difficult to harmonize them with his declarations at Vienne, according to which he entered the service of father Quintana, the confessor of Charles V, at the early age of perhaps fourteen or fifteen years, and with his master accompanied the court to Italy on the occasion of the emperor's coronation at Bologna, and to Germany on its return. The further statement that he remained with Quintana in Germany until the death of the latter in 1532 is known to be positively untrue, since he was at Basle, and alone, by the close of the summer of 1530; and the Geneva testimony recites that he came to Basle direct from Toulouse, by way of Lyons and Geneva, without referring in any way to travels in Italy or Germany.

When Servetus came to Basle he was without experience in the Christian life, and his moral consciousness was undeveloped. Religion was not to him an answer to the questionings of the human heart—a dissolving of doubts in the field of morals, a deliverance from internal conflicts. The unmistakably speculative tendency of his mind led him to conceive of Christianity as being first of all a system of doctrine, and he had already developed a scheme in which the doctrines of God and of his manifestation in Christ, in their speculative aspects, were regarded as constituting its essential basis. The object of his visit was to find a publisher for the book in which he had embodied his views, and to secure the favorable regards of the Swiss reformers in behalf of the modifications he proposed to introduce into the teaching of the Reformation. (Ecolampadius, however, found his statements of doctrinal views ob-

scure and misleading, contrary to the Scriptures, and even blasphemous, as being directed against the eternal godhead of Christ; and when the book finally appeared in 1531 from the press of Conrad Rous, of Hagenau and Strasburg (under the title *De Trinitatis Erroribus Libri Septem*, etc., 15 sheets, 8vo), it was condemned on every hand. Bucer declared its author to be deserving of death; and when Servetus brought a portion of the edition to Basle, it would seem that the town-council confiscated the book and required from him a retraction of its teachings. A second work from the same press in 1532 (*Dialog. de Trinit. Libr. II, de Just. Regni Christi Capit. IV*, 8 sheets, 8vo) begins with a retraction of the former book, but on the ground of its immaturity rather than substantial error. This work produced no impression whatever, and Servetus was obliged to renounce the hope of exercising a determining influence over the progress of the Reformation in Germany. He withdrew to France, assumed the name of De Ville-neuve, and entered on the study of mathematics and medicine, and also that of philosophy, particularly of theosophic Neo-Platonism, at Paris. At this time he first sought the acquaintance of Calvin, but failed to attend an interview granted at his solicitation by the latter. The life of Servetus while in France was unsettled; the first six years being spent in Paris, Orleans, Lyons, Paris again, where he taught mathematics in the Lombard College, Avignon, and Charlieu; and it was disturbed with frequent disputes, which occasionally involved serious consequences for him. One of these quarrels determined him to leave Paris forever. He had acquired considerable knowledge in medical science—as is attested by his observation of the circulation of the blood, long before Harvey's discovery—and was a zealous student of astrology; but his vanity led him to speak disparagingly of other physicians, and brought on him the opposition of the medical faculty and of the entire university. He was condemned by the Parliament to destroy all the copies of an apology which he had written to substantiate his position, and to abstain from meddling with astrology except in so far as the *natural* influence of the stars upon human affairs might be concerned. He ultimately settled at Vienne in response to the invitation of his patron and former pupil, the archbishop P. Paulmier, and spent twelve years in that town in the practice of medicine and in intercourse with the leading clergy; but he still found time for learned labors, both in the line of his own profession and in other departments, one of the results being a new edition of the Latin version of the Bible by Sanctes Pagninus (Lugd. ap. Hug. a Porta, 1542, fol.), with notes. This work was but carelessly done; the few notes from his pen being chiefly attached to the Messianic prophecies, and aiming to show that such prophecies invariably referred in the minds of the prophets to historical personages and events in the immediate future, and that they had only a typical reference to Christ. The work was accordingly placed in Spain and the Netherlands on the *Index Expurgandorum*. Servetus had by no means given up his theological speculations, though he accommodated his habits in all respects to his Roman Catholic surroundings. He believed himself called to effect a restoration of true Christianity, which had been obscured and even lost to the world since the beginning of the 4th century, and to promote his ends he opened a correspondence with the Reformed leaders Viret and Calvin. The latter responded, and at first with moderation; but as Servetus assumed a depreciatory attitude, and persisted in the endeavor to contradict the responses made to his inquiries, the reformer eventually refused to continue the correspondence, and referred to his *Institutes* for further information. Servetus now resolved to bring before the public the work in which he had laid down the results of his long-continued cogitations, and, in utter disregard of the warnings already received from Calvin, as well as of the dangers clearly recognised as impending by his own mind, he carried forward the

project to its conclusion. The rashness and almost fanatical tenacity of his natural temper are well illustrated in this undertaking; but the method by which it was accomplished serves to show with equal clearness that he was not above the use of caution, artifice, and even duplicity, when needed to secure himself against the consequences of his action. The bookseller Arnoullet, of Vienne, was secured by the use of money and the false assurances of a friend; the printing was conducted with the utmost secrecy and haste, and immediately on its completion the book was sent to Lyons, Chatillon, Geneva, and Frankfort, without the knowledge of persons resident in Vienne. It appeared early in 1553, and bore the title *Christianismi Restitutio*, etc. The author's name is indicated at the end by the letters "M. S. V." and the name of the publisher and the place of printing are not given.

This most extensive of the works of Servetus (734 pp. 8vo) presents no thorough elaboration and systematic statement of his ideas, but consists rather of a series of disconnected papers, some of them new and others emanations of earlier productions from his pen. It contains seven books *De Trinitate Divina*; three books *De Fide et Justitia Regni Christi, et de Caritate*; five books *De Regeneratione et Manducatione Superna et de Regno Antichristi*; *Epistolæ Triginta ad Jo. Calvinum*; *Signa Scaginata Regni Antichristi et Revelatio ejus jam nunc Præsens*; and *De Mysterio Trinitatis et Veterum Disciplina ad Ph. Melancthonem, etc., Apologia*. The attitude of the author towards the dogma of God, the Father, Son, and Spirit, as held by the Church, is that of uncompromising hostility. He regards it as of necessity involving tritheism and polytheism, and even atheism; or, on the other hand, as inconceivable; and he finds it significant that this doctrine began to prevail at the very time from which the Church must date its growing degeneracy. But, while rejecting a trinity of essence in the Godhead, he insists on a trinity of manifestation; the fundamental principle that God is one and undivided leads to a second principle—namely, that everything which comes to pass in or with the divine nature is but a *disposition*, which does not affect the divine essence, but must be regarded somewhat as one of its accidents. God is able to dispose and manifest himself because he is not an abstract unit, a bare mathematical point, but rather an infinite Spirit, an infinite ocean of substance which fashions all forms and bears them within itself. His manifestation of himself results from the act of his will, rather than from any necessity lying in his nature, and takes place because without such revelation of himself he could not be known by his creatures. The mode of manifestation is likewise wholly subject to his will, and he is by no means limited to only two revelations of himself; his incorporation in Christ was determined simply by the needs of the world he has chosen to create and those of the human race. It pleased him, consequently, to dispose himself to a twofold manifestation, the one a *mode of revelation by the Word*, the other a *mode of impartation by the Spirit*. The Word, however, was not merely an empty articulate sound, but, in harmony with the nature of God, an uncreated light. The Logos is the Eternal Thought, the Eternal Reason, the Ideal World, the Archetype of the world in which the original types of all things are contained. In this Divine Light was already manifested the form of the future Christ, not ideally alone, but actually and visibly; and from this original type and mode of divine revelation proceed all the modifications of the Deity. The creation of the world, for example, was the necessary condition for the incarnation of the Christ who was preformed in the Eternal Light, which incarnation had been decreed by the will of God; so that the world came into being through Christ, and solely to admit of his becoming man, and it has no significance aside from him who should appear in it and reign. But as a vapor rises with the utterance of a word, so the spirit of God came forth on the utterance of the Creative Word, and the sec-

ond mode of revelation and disposition was given, in intimate combination with the first. That spirit is more immediately the spirit of natural life, which moves on the waters and breathes in the air—the world-soul, by which in respiration the living soul is first given to man. The incarnation of Christ was delayed and obscured by man's fall into sin, but he nevertheless revealed himself in many though imperfect forms. Adam was created in *his* image; angels and theophanies were his shadows, the cloud of light in the wilderness was the reflection of the heavenly light. The spirit, too, was in the world, but only as a spirit of law and terror. The truth, and God himself, attained to a full manifestation and revelation for the first time in the *man* Jesus, in whom the Eternal Word became incarnate in time. The generation of this *man* is to be conceived of as literal, the Deity which formed the substance of the Logos in the Uncreated Light taking the place of the paternal seed, and the three superior elements contained in that light—fire, air, and water—combined with the Christ-idea and the Life-spirit, uniting with the blood and earth-substance of the Virgin to form a real man; but the man is so penetrated by the Deity that he becomes God in his flesh and blood, his body, soul, and spirit; he was such while in the embryo, and continues to bear the substantial form of the Godhead when in the grave. The Word, accordingly, did not assume flesh, but became flesh. By virtue of this nature Christ is the Son of God—the only Son, especially the only eternal Son. The eternal generation of the Son within the Godhead is a simple monstrosity, since generation is a function of the flesh alone; an ante-mundane *person* is conceivable only as it signifies the image or form of Christ as the pre-existing Word, who first became the actual Son of God, however, when he appeared in time and in the nature of man. The manifestation of the divine glory in the person of Christ was, moreover, a gradual process, not fully realized so far as his body is concerned until the resurrection, when he returned into the divine idea as he had previously come out from that idea into corporeal existence. He is now Jehovah—not Elohim, the God who may appear—and as such is seen by the eye of faith and participates in all the creative power, honor, and dominion of God, with whom he is identified. The *Holy Ghost*, too, is dependent on the resurrection of Christ for the consummation of his character and his truth. The fulness of the Divine Spirit was imparted in connection with the Word to the soul of Christ on his becoming incarnate, the two constituting but a single and indivisible substance; but the soul included corruptible elements of blood and created light down to the experience of the resurrection. In that experience he was, so to speak, born again; the creature element was laid aside: his human spirit was wholly absorbed into the Spirit of God, and the resultant combination forms the true *Holy Spirit*, the principle of all regeneration, which proceeds from the mouth of Christ. In this way the real Trinity is constituted—a trinity not of things or so-called persons in the divine essence, but a threefold manifestation of himself by the one and indivisible God.

Such was the teaching which Servetus presented to the world as the restored truth of Christianity. He was incapable, from the tendency of his mind, of admitting the importance of the element of practical ethics in the scheme of Christianity, and regarded the latter as pre-eminently a system of doctrine. He speaks constantly of the person of Christ, but rarely of his work of redemption. Faith is represented as the central and fundamental element, but rather in the character of apprehension and assent than of trust. The ideas of sin and guilt are scarcely recognised, and are confined to wicked actions; and the results of such actions are held to be not unto death in the case of persons under twenty years of age. The baptism of children is accordingly condemned, and is even characterized as being a principal source of the corruption of the Church. Baptism should not be conferred until persons have reached the age of

thirty years, and have been prepared by preaching, careful instruction, repentance, and faith. The Lord's supper should be administered immediately after baptism, since the new man will at once require sustenance. Good works and holy living do not necessarily spring from faith, but they are not beyond the ability of mankind, even in the heathen state. By them a higher degree of blessedness may be attained, and they are useful to strengthen faith and guard against reactions of the flesh; for which reason such works as will subdue the flesh are recommended, and such others as will *satisfy* the claims of justice (prayer, almsgiving, voluntary confession, etc.) so far as to wholly or partially deliver from the *purgatorial fires* which await even the faithful and the baptized in the region of the dead.

The measures by which it was hoped to conceal the author of this book proved insufficient, and Servetus was denounced to the archiepiscopal tribunal of Lyons. Evidence to substantiate the charge was obtained, and the governor-general of Dauphiny ordered his apprehension and trial; and having allowed himself to be entrapped into an acknowledgment of the offence, he was on June 17 condemned to death by fire. He was enabled to effect an escape before the conclusion of the trial, evidently through the assistance of powerful friends, and was accordingly burned in effigy. The sentence of the spiritual court was not pronounced until after his death.

The first intention of Servetus was to escape into Spain, but he soon turned towards Switzerland in the hope of being ultimately able to reach Naples. He arrived at Geneva in the middle of July, and remained about a month in the public hostelry, when Calvin learned of his presence and caused him to be apprehended (Aug. 13). As the laws required that a civilian should appear as the accuser, Nicholas de la Fontaine, Calvin's pupil and amanuensis, acted in that relation, and charged Servetus with having disseminated grossly erroneous teachings, on account of which he had already been imprisoned and was now a fugitive. Thirty-eight articles were attached to this charge, which had been drawn up by Calvin, and to which the accused was required to render categorical answers. Servetus bore himself quietly, and answered with considerable frankness, but the council nevertheless ordered the case to proceed to trial. In a subsequent examination, the accused conceded his rejection of certain orthodox doctrines, and claimed the privilege of publicly and in the Church convincing Calvin, in whom he recognised his principal antagonist, that such doctrines were unscriptural and erroneous. The action of Philibert Berthelier, a declared enemy to Calvin and leader of the libertine party, who openly sought to protect Servetus, led the reformer to declare himself the real accuser, and he was accordingly admitted to the sessions of the court and allowed to take part in the proceedings. The presence of Calvin, and his own confidence in the protection of powerful supporters, influenced Servetus to display more arrogance in his replies, until in the heat of argument he gave utterance to strong and unequivocally pantheistic assertions. It now appeared that his guilt in the principal matter was proved, and the determination of his punishment alone remained to be settled. The procurator-general (Aug. 23) brought forward thirty new questions relating to the circumstances of the prisoner's life, his designs, and his intercourse with other theologians, and the warnings he had received from them, to which Servetus responded with greater moderation, though not without doing violence to the truth. He also petitioned that he might be discharged from trial under criminal process, since such action had never been usual in matters concerning the faith before the time of Constantine, and was the more unreasonable in his case, as his views had been made known to a few scholars only, and he had nothing in common with the rebellious Anabaptists; and he requested, further, that he be furnished with legal counsel as especially neces-

sary to a stranger in his situation. His petition was denied on the recommendation of the procurator-general, to which it is supposed that Calvin was no stranger; but his earlier request for a discussion with Calvin was granted, with the modification that it should take place before the council rather than in the Church. Servetus, however, suddenly changed his tactics, and instead of entering on a discussion with Calvin at their meeting on Sept. 1, he proceeded to deny the competency of civil tribunals to deal with questions of faith; and on the ground that the Church of Geneva could not impartially determine in matters at issue between Calvin and himself, he appealed to the judgment of the churches in other places. As this appeal corresponded with a resolution already reached in the council, it was entertained, and the matter referred to the authorities of the four evangelical cities of Switzerland; and it was determined that all further transactions should be conducted in writing and in the Latin language. Calvin accordingly extracted from the works of Servetus their most hurtful teachings, and submitted them, accompanied with remarks intended to show their blasphemous and dangerous character, on Sept. 5. Servetus responded with complaints about the treatment he was obliged to undergo, and appealed from the smaller council to the Council of the Two Hundred, many of whose members, as he knew, were hostile to Calvin; but finding it necessary to reply to Calvin's allegations, he permitted himself the use of violent attacks and reproaches against his opponent, while at the same time presenting more clearly, and with less dissimulation than before, the meaning and tendencies of his views. A comprehensive reply by Calvin and his colleagues was met with further insult, though a private communication intended to instruct the former in certain principles of philosophy and other matters was written in a spirit of greater moderation. A messenger from the council conveyed the writings exchanged between the respective parties, and a copy of the principal work written by Servetus to the councillors and the clergy of Zurich, Berne, Basle, and Schaffhausen. Calvin did not neglect to influence his friends by means of his private correspondence in the endeavor to secure an approval of his course; and Servetus, in the meantime, directed a complaint against Calvin as a false accuser, and demanded that he should be imprisoned and tried, the prosecution to continue until one of the antagonists should be sentenced to suffer death or some other punishment.

The opinions of the cities had all been received by Oct. 22, and were unanimous in condemning the false teachings of Servetus as not to be tolerated in the Church. The Council of Berne especially urged the use of severe measures to prevent the introduction of such errors, while the clergy of that city sought to moderate the force of that recommendation by a warning against indiscretion. Calvin and his associates were decidedly of the opinion that the penalty of death should be inflicted on the accused, and so expressed themselves, though averse to death by fire as involving unnecessary cruelty. When the council met to determine the penalty to be imposed (Oct. 23), opinions were divided, and several councillors were absent. A recess was therefore taken until Oct. 26. The syndic A. Perrin, a zealous opponent of Calvin, then proposed, first, an acquittal of the accused, and afterwards a reference of the matter to the Council of the Two Hundred, but in each case without success. The sentence of death by fire was pronounced in conformity with the laws of the empire. The condemned man was profoundly moved, and pleaded earnestly for mercy, but he could not be persuaded to recant. He died Oct. 27, 1553, without having changed his views in any important particular, but not without exhibiting the marks of a Christian spirit.

It is not possible to regard the character of Servetus as favorably as it has been described by the opponents of Calvin. He was not pure and great, and though he

ultimately died for his convictions, he was by no means a martyr for the truth. He concealed his beliefs and attended mass in France during more than twenty years at a time when multitudes chose death or the loss of country and prospects rather than deny their faith. He availed himself unhesitatingly of falsehood and perjury, especially in the trial at Vienne. He certainly did not possess a high degree of moral earnestness. As a thinker, he was noticeable for originality and ingenuity, for speculative depth and a wealth of ideas, though the very number of ideas prevented him from presenting them with adequate clearness. His theological and christological system rested to a much greater extent than he imagined upon hypotheses and theories in natural philosophy, and to a much smaller extent upon the Bible. His one-sided intellectualism, finally, afforded no satisfaction to the religious sense in man, while his strongly pantheistic leanings and his irreverent polemics necessarily offended the religious consciousness. His pyre unfortunately did more to enlighten the world than all his books. His teachings were scarcely understood until the most recent times. His so-called followers, the later Antitrinitarians, failed to comprehend either their organic unity or their fullness and depth, and, while they appropriated surface ideas, were unable to appreciate what is really speculative in his books. Gribaldo and Gentile, for example, sensualize the twofold manifestation of God into an essentialization of subordinate deities, and Socinus degrades the real Sonship and Deity of Christ as taught by Servetus until nothing beyond his essential manhood remains.

The course pursued by Calvin in the trial of Servetus has been the subject of incessant dispute from his own day until now. His contemporaries already condemned his action, though the most eminent orthodox thinkers and theologians approved his course; and though the argument has been renewed as often as occasion offered, the Christian world is not yet able to agree upon a judgment which shall afford universal satisfaction. The facts upon which a decision must be based are as follows:

1. Calvin was thoroughly convinced that the welfare of the Church demanded the death of Servetus as an incorrigible heretic, and never hesitated to acknowledge that conviction. When Servetus requested that Calvin should protect him during a proposed visit to Geneva, the latter refused, and wrote to Farel, under date of Feb. 7, 1546, "If he [Servetus] should come hither, I will not permit him to escape with his life, if my authority has any weight" (Henry, *Leben J. Calvin's*, iii, 66, appendix). His views upon the subject never changed, as appears from his correspondence while the trial was in progress, e. g. the letter of Sept. 14, 1553 (*Ep. et Resp.* fol. 127), in which Bullinger urges Calvin not to leave Geneva even though Servetus should not be punished with death. The absence of such facts from the records of the trial is sufficiently explained by the consideration that they were not matter for public record; and the *Fidelis Expositio Errorum M. Serveti*, etc., written to explain his conduct in that unhappy business, does not justify the argument sometimes based on it to show that Calvin did not desire the death of Servetus, since the book was intended to show, first, that incorrigible heretics ought to be punished by the secular arm; and, second, that Servetus was such a heretic.

2. In obedience to such convictions, Calvin caused the imprisonment of Servetus as soon as he learned that the latter was in Geneva, and personally directed the prosecution of the trial. Both statements rest on his own repeated acknowledgments in letters to his friends and in his *Refutatio*, and are substantiated by the public records.

3. While Calvin wished Servetus to die, he did not favor his being burned at the stake (comp. the letter to Farel of Aug. 20, 1553 [*Ep. et Resp.* fol. 114], and Beza, *Joan. Calv. Vita*).

It is no longer possible to undertake an unconditional defence of the opinions by which Calvin was governed in this matter, nor of the action which resulted. Unbiased minds are compelled to see that the reformer not only failed in this respect to rise above the errors of his time, but that in his management of the case he was guilty of evasions and exaggerations which form a real blot on his record; but there is no reason to doubt that his course was dictated by his sense of the duty he owed to God, to the Church in general, and to the Church of Geneva in particular; and this forms the only explanation which will justify his action in any degree to candid minds. His failure to save his antagonist from the cruel death by fire was doubtless owing to his difficult position at this very time. The ruling party in Geneva was opposed to Calvin, and had neutralized his measures in some instances inasmuch that he declared his intention of leaving that city unless such action should cease; the Council of the Two Hundred was strongly hostile to him; and in the smaller council, before which Servetus was tried, measures were passed of which Calvin did not approve (e. g. the resolution to consult with the authorities of other cities), and direct efforts were made to save the accused from his impending doom. He could not suggest before the council that a different form of capital punishment from that prescribed by law should be inflicted, lest his own sincerity should be impugned by his opponents; and it is not difficult to discover reasons which may have neutralized whatever private efforts he employed. There is, at all events, no sufficient reason for doubting his own explicit statements on the matter.

Servia (Turkish, *Sırb Vilayeti*), a state of Europe, bounded north by Slavonia and Hungary proper, east by Roumania and Bulgaria, south by Roumelia, and west by Bosnia. Until 1878, Servia was a dependency of Turkey, but in that year the treaty of Berlin established its entire independence. The Servian nationality extends far beyond the boundaries of the principality of Servia. Servians constitute nearly the entire population of Montenegro, Bosnia, and Herzegovina; they constitute ninety-five per cent. of the population in the former kingdom of Croatia and Slavonia, ninety per cent. in Dalmatia, and eighty per cent. in the former military frontier. Including all these districts, the Servians occupy a territory of about 69,000 square miles, with a compact population numbering more than 6,000,000 persons. The majority of all the Servians belong to the Orthodox Eastern (or Greek) Church. The following article refers to the principality of Servia exclusively. See also AUSTRIA; HUNGARY; MONTENEGRO; TURKEY.

1. *Area, Population, etc.*—Servia contained before the treaty of Berlin 16,817 square miles. Its population in 1885 was 1,902,419, all Serbs of Slavic origin, excepting about 140,000 Wallachs, 25,000 Gypsies, and 15,000 Turks, Bulgarians, Jews, Germans, and Hungarians. By the treaty of Berlin in 1878 a territory formerly belonging to Turkey was annexed to Servia, and the area

of the principality raised to 18,687 square miles, with a population of 1,720,000 inhabitants. The country is mountainous and densely wooded. From the interior numerous chains proceed northward, forming massive barriers both on the eastern and western frontiers, and sloping pretty steeply towards the swampy plains along the Save and the Danube. The principal rivers are the Morava and Timok, affluents of the Danube, and the Kolubara, an affluent of the Save, which itself falls into the Danube at Belgrade. The principal towns are Belgrade (the capital), Kraguyevatz, Semendria, Uzhitza, and Shabatz, and in the new districts Nish and Vrnja. The climate is temperate and salubrious, but somewhat cold in the higher regions. The soil in the valleys is fertile, and cereals are raised in abundance. The mountains are believed to be rich in valuable minerals, but mining is almost unknown, and manufacturing industry is in the most backward condition. There is no nobility, and the peasants are free householders.

II. *Church History.*—The original inhabitants of Servia were principally Thracians. Conquered, shortly before Christ, by the Romans, it formed part of Illyricum, under the name of *Moesia Superior*. Overrun by the Huns, Ostrogoths, Longobards, etc., it came under Byzantine rule about the middle of the 6th century, but was wrested therefrom early in the 7th century by the Avars. These latter were driven out by the Serbs, then living north of the Carpathians, who themselves spread over the country in great numbers. About the middle of the 9th century they were converted to Christianity by missionaries sent by the emperor Basil. For about 200 years they were almost constantly at war with the neighboring Bulgarians, but in 1043 Stephen Bogislas broke their power. His son Michael (1050–80) took the title of king, and was recognised as such by pope Gregory VII. A struggle of nearly a hundred years resulted in the maintaining of their independence, and in 1165 Stephen Nemanja founded a dynasty which lasted for two centuries. During this period the kingdom attained the acme of its power and prosperity, embracing, under Stephen Dushan (1336–56), the whole of Macedonia, Albania, Thessaly, Northern Greece, and Bulgaria. At the request of king Stephen II, son of Stephen Nemanja, the bishops of Servia were in 1221 authorized by the patriarch of Constantinople to elect their metropolitan on condition that he be confirmed by the patriarch. The brother of the king, St. Sabbas, became the first archbishop of Uzhitza and all Servia. Stephen Dushan, in 1351, convoked the synod at Seres, which raised the metropolitan of Servia to the dignity of a patriarch, and declared him independent of the patriarch of Constantinople. The jurisdiction of the Servian patriarch extended not only over Servia and Bulgaria, but also over a large portion of Macedonia. He had his residence near Ipek, at the termination of the *Streta Gora* Mountains in Albania. In consequence of this measure, the patriarch of Constantinople pronounced the anathema against the Servian patriarch, but this was revoked in 1379.

The progress of the Turkish arms proved fatal to the welfare of Servia. In 1389 Lazarus I was defeated at Kosovopolje, and his son and successor, Stephen, became a vassal of Turkey. In 1459 Mohammed II incorporated Servia with Turkey, excepting Belgrade, which was held by the Hungarians until 1521. By the treaty of Passarowitz (1718) a considerable portion of the country was made over to Austria, but in 1739 it reverted to Turkey. During all this time the Turkish government had allowed the patriarchate to continue. Even when, in 1690, patriarch Arsenius III, after the failure of the Servian insurrection which the Austrians had instigated against Turkish rule, had emigrated with 37,000 Servian families to Austrian territory, the patriarchate of Ipek was not interfered with, but the appointment was always conferred upon a Greek, who purchased the position from the divan of Constantinople. In 1765 (according to another statement in 1769) this patriarchate

was abolished and united with that of Constantinople. The last patriarch (Basil) fled to Russia, where he died, in St. Petersburg. Four metropolitans, generally Greeks, were now appointed for Servia, the sees of whom were Belgrade, Nish, Uzhitza, and Novi-Bazar, and none of whom had a suffragan. After sixty years of oppression, the people, under George Czerny, rebelled, and, with the assistance of Russia, triumphed, and Czerny was elected by the people prince of Servia. Deserted by Russia and France, the Turks again became masters of the country (1813). But two years after, under Milosh Obrenovitch, the people won back their liberties. Milosh was chosen prince of Servia (1817), and subsequently recognised by the sultan. After the election of Czerny, the metropolitan of Carlovitz, in Austria, had been recognised as the head of the Servian Church; but in 1830 Milosh again appointed a metropolitan for Servia. In 1834 Turkey restored six Servian districts which she had retained since 1813, and in the spring of 1872 relinquished a few additional localities, though not all that Servia claimed as her own. The seat of the legislature, which had always been at Kraguyevatz, was removed to Belgrade in October, 1875.

III. *Religion, etc.*—The inhabitants nearly all belong to the Greek Church, but are independent of the patriarch of Constantinople.

The hierarchy of the Church of Servia consists at present (1879) of a metropolitan and five bishops. The metropolitan is elected by the prince and the Servian bishops. He resides at Belgrade, and, according to the regulations of 1839, is assisted in the government of the Church by a titular bishop and several protopresbyters and presbyters. The titular bishop and the other diocesan bishops constitute, at the same time, the Synod of the Metropolitan, to which are referred all marriage affairs, as well as all complaints of the administration and government of the Church by the metropolitan. The metropolitan receives fees for the ordination of presbyters, the consecration of churches, etc., and a fixed annual income of 6000 florins (about \$2400). He also possesses some real estate, especially vineyards near Semendria. The bishops are elected by the people, under the superintendence and guidance of the minister of justice, and ordained by the metropolitan. They have an unlimited jurisdiction in all matters purely ecclesiastical. All churches and ecclesiastical institutions are under the superintendence of the minister of justice, who makes the necessary arrangements conjointly with the elders of the Church. Servia has now five diocesan bishops, namely, the bishop of Shabatz, the bishop of Uzhitza (who resides at Karanovatz), the bishop of Negotin, and in the districts annexed in 1878 to Servia the bishops of Nish and Vrnja. Each of them has a fixed income of 4000 florins (about \$1600). He also receives fees for ordinations, consecration, and other ecclesiastical functions. In regard to fees for burials, the bishop has to come to an understanding with the family of the deceased. All other fees were abolished in 1822, although voluntary gifts are still frequently made and accepted. The bishops have to pay from their income their archdeacons and secretaries. The secular clergy number about nine hundred members. The clergymen in the town receive fixed salaries, while those in the rural districts only receive fees. Every parish priest is obliged to keep accurate lists of births, marriages, and deaths.

Servia has many convents, most of which, however, have only a small number of inmates. Many of the convents have been wholly abandoned; others are hermitages, near which lodging-houses are erected at the time of pilgrimages. The convent *Sweti Kral* (*holy king*) at Studenitza contains the bones of king Stephen Nemanja, by whom it was founded, and who in 1200 died as monk of one of the convents on Mount Athos. His son Rastka, better known in Servian history as St. Sabbas, the first archbishop of Uzhitza, transferred the bones of his father in 1203 to the Convent of

Studenitz, which after the cloister name of king Stephen is sometimes called the Laura of St. Simon.

A Roman Catholic bishopric was established by pope Innocent X in 1644 at Belgrade. In 1728 the see was transferred from Belgrade to Semendria, and the name of the diocese is now Belgrade and Semendria. The bishop is a suffragan of the archbishop of Antivari, in Albania. The number of Roman Catholics is small. In 1861 some accounts claimed a population of 80,000, but the Roman statistician Petri (*Prospetto della Gerarchia Episcopale* [Rome, 1850]) says nothing of the Roman Catholic population of the diocese. The official statistical bureau of Belgrade gave the number of Roman Catholics in 1874 as 4161. In 1852, the papal nuncio of Vienna, Viale Praela, visited Belgrade in order to reorganize the diocese, but no account of the results of his mission has ever been published. The Protestants numbered in 1874, according to the official statistical report of the government, 463, the Jews 2049, and the Mohammedans 6306. In the districts annexed in 1878 there are estimated to be 75,000 Mohammedans. Secession from the State Church is rigorously forbidden, but otherwise all the other religious denominations enjoy entire religious liberty.

Education is making rapid progress in Servia. Fifty years ago there was no public primary school; now education is compulsory, and for its management a special ministry of education has been organized. In 1874 there were 517 public schools, with 23,000 pupils. The first gymnasium was established in 1830, and in 1874 the principality had two complete gymnasia and five progymnasia, with an aggregate attendance of 2000 students. A normal school was established in 1872. The high school in Belgrade contains three faculties, and has about 200 students.

IV. *Character*.—The Servians are distinguished for the vigor of their frame, their personal valor, love of freedom, and glowing poetical spirit. Their manners and mode of life are exceedingly picturesque, and strongly prepossess a stranger in their favor. They rank among the most gifted and promising members of the Slavic family. See Ranke, *Die serbische Revolution* (Hamburg, 1829; 2d ed. 1844); Milutinovitch, *Gesch. Serbiens von 1389–1815* (Leipsic, 1837); Cunibet, *Essai Historique sur les Révolutions et l'Indépendance de la Serbie depuis 1804 jusqu'à 1850* (ibid. 1855, 2 vols.); Hilferding, *Gesch. der Serben und Bulgaren* (Bautzen, 1856); Denton [Rev. W.], *Servia and the Servians* (Lond. 1862); Elodie Lawton Mijatovics (Wm. Tweedie), *Hist. of Modern Servia* (ibid. 1874); Saint-René Taillandier, *La Serbie au 19e Siècle*, Kara George et Milosch (Paris, 1875); Grieve, *The Church and People of Servia* (Lond. 1864); Jakshich, *Recueil Statistique sur les Contrées Serbes* (Belgrade, 1875).

Servian Version. See SLAVONIC VERSIONS.

Service (properly עֲבֹדָה, δουλεία, i. e. *bondage*; but the rendering in the A. V. in many places of less severe words, as שָׂרָר, צָבָה, διακονία, λατρεία, etc.). See SERVITUDE.

SERVICE, THE. See LORD'S SUPPER.

SERVICE OF THE CHURCH. It appears that there was a daily celebration of divine worship in the time of Cyprian; and it has been supposed that the practice of offering public prayer every morning and evening was established during the 3d century. The order of the daily morning and evening services, as they undoubtedly obtained in the 4th century, was as follows: The morning service began with the reading of Ps. lxi.iii, followed by prayers for the catechumens, energumens, candidates for baptism, and penitents; for the faithful, the peace of the world, and the state of the Church. Then followed a short prayer for preservation during the day, the bishop's commendation or thanksgiving, the imposition of hands, or bishop's benediction, concluding with the dismissal of the congregation with

the usual form, Προἴαθε ἐν εἰρήνῃ, "Depart in peace." The evening service (called *hora lucernaris*, because it began at the time of lighting candles) was in most parts the same with that of the morning, except with such variation of psalms, hymns, and prayers as were proper to the occasion. 1. The psalm was the one hundred and forty-first; 2. Proper prayer for the evening; 3. The evening hymn. In some churches the Lord's Prayer was always made a part of the daily worship both morning and evening (see Bingham, *Christ. Antiq.* xiii, 10, 11). At the Reformation, in order to supply the absence of a vain and idolatrous worship by a scriptural and reasonable service, it was appointed that the "morning and evening service" should be "said daily throughout the year." This order is observed in cathedral and collegiate churches, in the universities, and in some parishes, but has not been generally followed in parochial churches.

Service-book, a book of devotion, of prayer.

That of the Church of England contains the Book of Common Prayer, Administration of the Sacraments, and other rites and ceremonies of the Church. See COMMON PRAYER.

The service-books of the Latin Church include the Missal, the Pontifical, the Day Hours, the Breviary, the Ritual, the Processional, the Ceremonial for Bishops, the Benedictional.

Those of the Greek Church are, (1) the Euchologion, corresponding to the Missal; (2) the Menece, answering to the Breviary, without the ferial offices, and full of ecclesiastical poetry in measured prose; (3) Paracletice, or great Octœchus, the ferial office for eight weeks, mainly the work of Joseph of the Studium; (4) Triodion, the Lent volume, from the Sunday before Septuagesima to Easter; and (5) the Pentecostarion, the office for Eastertide.

Services, an ecclesiastical name for arrangements of the Canticles, *Te Deum*, *Benedictus*, *Benedicite*, *Magnificat*, and *Nunc Dimittis*, and the psalms sung by substitution for them, consisting of a succession of varied airs, partly verse and partly chorus, sung in regular choirs, of which, probably, the germ is to be found in the Ambrosian *Te Deum*, a succession of chants which is mentioned first by Boethius, who lived a century after Augustine. The simplified notation of this music, as used in the Salisbury and Roman breviaries, was composed by Marbecke. Tallis's service is an imitation, rather than an adaptation, of the original arrangement. Probably the first was the setting of the *Venite* by Causton in the time of Henry VIII. In 1641 complaint was made of "singing the *Te Deum* in prose after a cathedral-church way." There are two classes: (1) full services, which have no repetitions, and are sung with an almost regular alternation by the two choirs; (2) verse services, which have frequent repetitions, no regular alternations, and are full of verses, either solos or passages sung in slower time by a selected number of voices.

SERVICES, DOMESTIC. The domestic officers (*servitia*) of a monastery were the cook, baker, brewer, laundryman, and tailor. At Rochester these were appointed by the bishop.

Serving Dress or Robe. See SURPLICE.

Serving Tables, one of the parts of the Presbyterian sacramental service. Where the Presbyterians have not adopted the Congregational mode of partaking of the sacrament, the following is the order: "The table on which the elements are placed, being decently covered, the bread in convenient dishes, and the wine in cups, and the communicants orderly and gravely sitting around the table or in their seats before it, the minister sets the elements apart by prayer and thanksgiving," etc. The whole of the communicants not partaking at once, it is found necessary to continue the distribution of the elements, with intervals of psalm-

singing; during which those who have eaten leave the table to give place to a fresh set of communicants. The distribution of the bread and wine and the delivery of an address are what constitutes *servicing the table*. The number of tables varies from four to eight, and each address occupies ten minutes or a quarter of an hour. The minister of the place serves the first table; the rest are served by his assisting brethren.

Servites, or **SERVANTS OF THE BLESSED VIRGIN MARY**, an order of monks in the Roman Catholic Church founded (1233) in Florence by seven rich Florentine merchants. Their main object was to propagate devotion to the Virgin Mary. They lived at first as hermits, but, becoming a monastic order, adopted the rule of St. Augustine and obtained from pope Martin V the privileges of a mendicant order. The order having become relaxed, it was re-established in 1593 in its original strictness as "Servites Eremites." This order has produced a large number of distinguished men, among whom may be mentioned father Paul Sarpi, author of the *History of the Council of Trent*, and St. Philip Benizi (died 1285), one of the apostles of Western Europe in the 13th century. The Servites were extremely popular during the 16th century because of their many works of charity. Their dress was a cassock of serge, a cloak, a scapular, and an alms-bag.

There were also female Servites, who were never very numerous, and a large body of Tertiarians (q. v.). The order, in 1870, was divided into twenty-seven provinces, the central house being the monastery of the Annunziata in Florence. They were involved in the decrees suppressing religious orders in Italy and Germany. They were introduced into the United States in 1870 by bishop Melcher of Green Bay, Mich. There was a similar order founded in Naples in 1243.

Servitor (מְשָׁרֵת, *mesharêth*, a minister, as elsewhere rendered), a personal attendant, but not in a menial capacity (2 Kings iv, 43). See **SERVANT**.

Servitude (עֲבָדוּת). The servants of the Israelites were slaves, and usually foreigners (1 Chron. ii, 34), who yet were required to be circumcised (comp. Gen. xvii, 23, 27). Servants of both sexes were acquired (comp. Mishna, *Kiddushin*, i, 2 sq.), sometimes as prisoners of war, whose lives were spared (comp. Numb. xxxi, 26 sq.), sometimes by purchase in peace (these were called *miknath keseph*, "purchased," Judith iv, 10; comp. Livy, xli, 6; see Gen. xvii, 23; Exod. xxi, 7; xxii, 2; Lev. xxv, 44; and on their purchase in Abyssinia now, see Russegger, *Reis.* i, 156). But foreign servants who had escaped could neither be enslaved nor given up to their masters (Deut. xxiii, 15 sq.). The children of slaves were of course the property of the master (comp. Gen. xvii, 23; Exod. xxi, 4). These were generally considered most faithful (Horace, *Ep.* ii, 2, 6). At the legal valuation, perhaps an average, thirty silver shekels were given for a servant (Exod. xxi, 32), while a free Israelite was valued at fifty (Lev. xxvii, 3 sq.). On the price of remarkable servants in Egypt under the Ptolemies, see Josephus (*Ant.* xii, 4, 9). A moderate price for a Jewish slave was one hundred and twenty drachms (*ibid.* xii, 2, 3). An Israelite could become by purchase the property of another (Exod. xxi, 2; Deut. xv, 12) if he was compelled by poverty to sell himself (Lev. xxv, 39); but he could not, according to the law, be treated as a slave, and in any case he obtained his freedom again, without ransom, after six years of service, or in the year of jubilee (Exod. xxi, 2 sq.; Lev. xxv, 39, 40 sq.), if he were not ransomed earlier (ver. 48 sq.). Perhaps the case was different with him who was sold for theft (Exod. xxii, 3). Even this sale was always to an Israelite (Josephus, *Ant.* xvi, 1, 1), though whether to the injured man or to the highest bidder is doubtful (*ibid.* iv, 8, 27). It seems that hard creditors could sell insolvent debtors or their families (2 Kings iv, 1; Isa. i, 1; Neh. v, 5; Matt. xviii, 25), but perhaps not legally, as some-

times among the Greeks (Becker, *Charik.* ii, 32). Parents were permitted to sell daughters (Exod. xxi, 7), but the law showed much favor to such servants (ver. 8 sq.), for, though there is difficulty in the statements, it is plain that they were protected against violence (see Hengstenberg, *Pentat.* ii, 438 sq., whom Kurtz, *Mos. Opfer*, p. 216, contradicts without reason). It is plain that servants could not have been dispensed with among a people where almost every man was an agriculturist, and where there were few of a lower class to work for hire (yet comp. Lev. xix, 13; Deut. xxiv, 14; Job vii, 2; also Josephus, *Ant.* iv, 8, 38); and, indeed, the ancestors of the Israelites, the nomadic patriarchs, had numbered slaves among their valuable possessions (Gen. xii, 16; xxiv, 35; xxx, 43; xxxii, 5). These were very numerous (xiv, 14), and, in case of need, served as an army for defence (ver. 14 sq.). When a daughter of the family married a stranger, a female servant accompanied her to her new home (xxix, 24, 29). The Mosaic law sought to establish on just principles a permanent relation between master and servant, and conferred many favors on the servants. They not only enjoyed rest from all work every seventh day (Exod. xx, 10); not only was it forbidden to punish a slave so severely that he should die on the spot (xxi, 20), or to mutilate him (ver. 26 sq.), on penalty, in the former case, of suffering punishment (not death, perhaps, as the rabbins say; comp. Koran, ii, 179); in the latter, of the freedom of the slave (less protection than this was given to the Greek and Roman slaves; see Becker, *Charik.* ii, 48; *Röm. Alter.* II, i, 58 sq.); not only were they to be admitted to certain festivals (Deut. xii, 12, 18; xvi, 11, 14; comp. Athen. xiv, 639; Buttmann, *Myth.* ii, 52 sq.), but every slave of Hebrew descent obtained his freedom after six years' servitude (Exod. xxi, 2 sq.; Deut. xv, 12; comp. Josephus, *Ant.* xvi, 1, 1; including females, Deut. xv, 12); yet without wife or child, if these had come to him in the house of his master (Exod. xxi, 3 sq.); and the year of jubilee emancipated all slaves of Hebrew descent (Lev. xxv, 41; Jer. xxxiv, 8 sq.; comp. Josephus, *Ant.* iii, 12, 3). If a slave would not make use of the legal freedom granted him in the seventh year, but wished to remain in his master's house, then he was led to the judge, and his ear was bored (Exod. xxi, 6; Deut. xv, 17). So the *bored ears* among other nations were a proof of servitude—as the Arabians [Petrone, *Satir.* 102], the Lydians, Indians, and Persians [Xenoph. *Anab.* iii, 1, 31; Plutarch, *Sympos.* ii, 1, 4]; yet comp. Rosenmüller, *Morgenl.* ii, 70 sq., and on the symbolic customs at manumission by the Romans, see Becker, *Röm. Alter.* II, i, 66 sq. Plautus [*Pæn.* v, 2, 21] shows that the wearing of ear-rings was a mark of a slave). There is no other kind of manumission mentioned in the Old Test. (see Mishna, *Maus. Shen.* v, 14). It was at least allowed to slaves of Israelitish descent to acquire some property (Lev. xxv, 49; comp. Arvieux, iv, 3 sq.); and though, on the whole, the servants were required to labor diligently (Job vii, 2; Sir. xxxiii, 26, 28), and the masters required attention and obedience in service (Psa. cxxiii, 2), inflicting corporal punishment when necessary (Prov. xxix, 19, 21; Sir. xxxiii, 10; xxxiii, 10), yet the lot of Israelitish servants seems to have been more tolerable than that of those in Rome (Becker, *Gallus*, i, 128 sq.) and of the modern slaves in the East; yet the latter, even among the Turks, are not treated so inhumanely as is often thought (comp. Arvieux, iii, 385; Burckhardt, *Reise durch Arabien u. Nubien*, p. 232 sq.; Wellsted, i, 273; Russegger, II, ii, 524. On the mild treatment of slaves in ancient India, see Von Bohlen, *Indien*, ii, 157 sq.). Hebrew slaves sometimes married their masters' daughters (1 Chron. ii, 35; see Rosenmüller, *Morgenl.* iii, 253 sq.). It was more usual for the masters to give Israelitish slaves as wives to their sons, by which they acquired the rights of daughters (Exod. xxi, 9; comp. Gen. xxx, 3; Chardin, *Voyage*, ii, 220). The relation of chief servant, or head of the house, in whom the master reposed full confidence, may have continued

in the more important families from patriarchal times (Gen. xxiv, 2; comp. xv, 2; xxxix, 2; and for a modern parallel, Arvieux, iv, 30); and slaves seem even to have been employed to educate the sons of the house (παῖδα-γωγοί, Gal. iii, 24 sq.; see Wachsmuth, *Hellen. Alterth.* ii, 368). The common slaves were required to do field and house work (Luke xvii, 7 sq.), and, especially the females, to turn the handmill, and to take off or carry the master's sandals, etc. None but the Essenes, among the Jews, rejected all slavery, as contradicting the natural freedom of men (Philo, *Opp.* ii, 458, etc.; so the Therapeutæ, *ibid.* ii, 482).

It is well known that in war with foreign nations many Jews were sold abroad as slaves (Joel iii, 11; Amos i, 6, 9; 1 Macc. iii, 41; 2 Macc. viii, 11, comp. Deut. xxviii, 68). This happened especially in the wars with Egypt (Josephus, *Ant.* xii, 2, 3) and Syria, then with Rome; and after the destruction of Jerusalem ninety-seven thousand Jews fell into the power of the victorious enemy (*id.* War, vi, 9, 2). The Jewish community at Rome consisted, in great measure, of freed slaves. See, in general, Pignoria, *De Servis et eor. ap. Vel. Minister.* (Patav. 1694, and often); Mos. Maimon. *De Servis et Ancillis* (tract. c. vers. et not. Kall, Hafn. 1744); Abicht, *De Servor. Hebr. Aquis. atq. Serv.* (Lips. 1704); Altling, *Opp.* v, 222 sq.; Mieg, *Constitut. Servi Hebr. ex Script. et Rabbin. Collect.* (Herborn, 1785); Michaelis, *Mos. Rit.* ii, 358 sq.; *Am. Bib. Repos.* 2d Ser. xi, 302 sq. See NETHINIM; SLAVE.

Servus Servorum DEI (*Servant of the servants of God*), an official title of the Roman pontiffs, in use since the time of Gregory the Great, by whom, according to his biographer, Paul the Deacon, it was assumed as a practical rebuke of the ambitious assumption of the title of "Œcumenical (or universal) Patriarch" by John, surnamed Nestentes, or the Faster, contemporary patriarch of Constantinople. Other Christian bishops previous to Gregory had employed this form, but he was doubtless the first of the bishops of Rome to adopt it as a distinctive title. It is found in all the letters of Gregory preserved by the Venerable Bede in his history.

Sescuplum (*taken once and a half*), that sort of usury which consisted in making loans at fifty per cent. interest. Being a grievous extortion and great oppression, it was condemned in the clergy by the councils of Nice and Laodicea, under the name of ἡμολία; and also in laymen by the law of Justinian, which allows nothing above centesimal interest in any case. See Bingham, *Christ. Antiq.* vi, 2, 6. See USURY.

Sesha is, in Hindū mythology, the great king of the serpent race, on whom Vishnu reclines on the primeval waters. He has a thousand heads, which serve as a canopy to Vishnu; and he upholds the world, which rests on one of his heads. His crest is ornamented with jewels. Coiled-up, Sesha is the emblem of eternity. He is often also called *Vāsuki* or *Ananta*, "the eternal."

Se'sis (Σεσις v. Σεσεϊς), a Græcized form (1 Esdr. ix, 34) of the name SHESHAI (q. v.), in the Hebrew list (Ezra x, 40).

Session of CHRIST, the perpetual presence of our Lord's human nature in the highest glory of heaven. The statement of the fact appears in all the Latin forms of the Creed, its earlier words being "Sedet ad dexteram Patris," which developed into "Sedet ad dexteram Dei Patris Omnipotentis" at some time not later than the 6th century. The article does not appear in the Creed of Nicea, but in the Constantinopolitan expansion of that formulæ it is given in words which are similar to those of the ancient Latin Church, καθέζομενον ἐκ δεξιῶν τοῦ Πατρὸς. Naturally two questions suggest themselves for consideration:

1. What does this exaltation of Christ's human nature imply? We answer, An actual translation of his body and soul to heaven and their actual continued abode

there, and that in uninterrupted identity with the body and soul which had been born of Mary. This identity was historically established by the chosen witnesses of the resurrection, who saw his ascension and heard the words of the angels, "This same Jesus, which is taken up from you into heaven," etc. (Acts i, 11); and not long after by the declaration of Stephen (vii, 56). Although the body of Christ has doubtless undergone a change so that it is a spiritual body, yet locality may be predicated of it now as well as previous to his death. It is an error, therefore, to suppose that the bodily presence of Christ is that of the omnipresent Deity, as is maintained by the Ubiquitarians (q. v.). Because of this local bodily presence Christ sends his Holy Spirit to men.

2. What is the result of this exaltation? It was accomplished partly with reference to the glory of his own person, and partly with reference to his work as the Saviour of mankind. The human nature which, united with the divine nature, accomplished the purpose of God was fittingly raised up to the highest glory—"Wherefore God highly exalted him," etc. The ultimate object of the Incarnation was to bring us to God, into the divine presence. By this exaltation of our nature in the person of Christ a capacity was originated for its exaltation in ourselves. And, being the first-born among many brethren, he carried our humanity into heaven as the "Forerunner" of those who are united to him, as he said, "that where I am, there ye may be also" (John xiv, 2, 8). See Herzog, *Real-Encyclop.* s. v. "Stand Christi;" Blunt, *Dict. of Doct. Theology*, s. v. See INTERCESSION; RESURRECTION.

Ses'thel (Σεσθήλ), a corrupt form (1 Esdr. ix, 31) of the Hebrew name BEZALEEL (q. v.), of the "sons" of Pahath-moab (Ezra x, 30).

Sesuto (or **Sisuta**) **Version of the Holy Scriptures**. The Sesuto belongs to the African languages, and is spoken by the Basutos, who form a part of the Bechuana nation, dwelling between the Winterberg mountains and the higher branches of the Yellow River. For this people of South Africa the Gospel of Matthew was translated and printed in 1837. In 1839 the gospels of Mark and Luke, as translated by the French missionaries Pelissier, Arbousset, and Casalis, were printed in Cape Town, to which in 1849 the Gospel of John was added. Since that time not only the rest of the New Test., but also parts of the Old Test. have been added, and it is hoped that very soon this people will have the whole Bible in their own vernacular. Up to March 30, 1878, about 25,532 copies of portions of the Scriptures had been circulated among them. See *The Bible of Every Land*, but more especially the annual reports of the British and Foreign Bible Society since 1860. (B. P.)

Seth (Heb. *Shêth*, שֵׁת, i. e. *compensation*; Sept. and New Test. Σῆθ; Josephus, Σῆθος [Ant. i, 2, 8]; A. V. "Sheth" in 1 Chron. i, 1; Numb. xxiv, 7), the third son of Adam (born B.C. 4042), and the father of Enos (when 105 years old); he died at the age of 912 (Gen. iv. 25, 26; v, 3-8; 1 Chron. i, 1; Luke iii, 38). The significance of his name (given in Gen. iv, 25) is "appointed" or "put" in the place of the murdered Abel, and Delitzsch speaks of him as the second Abel; but Ewald (*Geack.* i, 353) thinks that another signification, which he prefers, is indicated in the text, viz. "seedling," or "germ." The phrase "children of Sheth" (Numb. xxiv, 17) has been understood as equivalent to all mankind, or as denoting the tribe of some unknown Moabitish chieftain: but later critics, among whom are Rosenmüller and Gesenius (*Theaur.* p. 846), bearing in mind the parallel passage (Jer. xlviii, 45), render the phrase "children of noise, tumultuous ones," i. e. hostile armies. See SETH.

In the 4th century there existed in Egypt a sect calling themselves Sethians, who are classed by Neander (*Ch. Hist.* ii, 115, ed. Bohn) among those Gnostic

sects which, in opposing Judaism, approximated to paganism. (See also Tillemont, *Mémoires*, ii, 818.) Irenæus (i, 30; comp. Massuet, *Dissert.* i, 3, 14) and Theodoret (*Hæret. Fab.* xiv, 306), without distinguishing between them and the Ophites, or worshippers of the serpent, say that in their system Seth was regarded as a divine effluence or virtue. Epiphanius, who devotes a chapter to them (*Adv. Hær.* i, 3, 39), says that they identified Seth with our Lord. See Quandt, *De Christo in Nomine Sethi Adumbrato* (Regiom. 1726).

SETH, TRADITIONS CONCERNING. There are many traditions concerning Seth (q. v.), not only in Rabbinic, but also in Christian, writings. According to the Rabbinic traditions, Seth was one of the thirteen who came circumcised into the world. The rest were Adam, Enoch, Noah, Shem, Terak, Jacob, Joseph, Moses, Samuel, David, Isaiah, and Jeremiah (*Midrash Tillim*, fol. 10, col. 2). The book *Shene Luchdth* says that the soul of the righteous Abel passed into the body of Seth, and afterwards this same soul passed into Moses; thus the law, which was known to Adam and in which Abel had been instructed, was not new to Moses (Eisenmenger, *Neuentdecktes Judenthum*, i, 645). Josephus relates that after the things that were to take place had been revealed to Seth—how the earth was to be destroyed, first with water and then with fire—lest those things which he had discovered should perish from the memory of his posterity, he set up two pillars, one of brick, the other of stone, and he wrote thereon all the science he had acquired, hoping that, in the event of the brick pillar perishing by the rain, the stone would endure (*Ant.* i, 2). Suidas (s. v. Σήθ) says, "Seth was the son of Adam: of him it is said the sons of God went in unto the daughters of men—that is to say, the sons of Seth went in unto the daughters of Cain; for in that age Seth was called God, because he had discovered Hebrew letters and the names of the stars, but especially on account of his great piety, so that he was the first to bear the name of God." Anastasius Sinaita (q. v.) in his *Ὁδηγός*, p. 269 (ed. Gretser [Ingolst. 1606]), says that when God created Adam after his image and likeness, he breathed into him grace and illumination and a ray of the Holy Spirit. But when he sinned this glory left him, and his face became clouded. Then he became the father of Cain and Abel. But afterwards, it is said in Scripture, "he begat a son in his own likeness, after his image, and called his name Seth," which is not said of Cain and Abel; and this means that Seth was begotten in the likeness of unfallen man, and after the image of Adam in paradise; and he called his name Seth—that is, by interpretation, "resurrection," because in him he saw the resurrection of his departed beauty and wisdom and glory, and radiance of the Holy Spirit. And all those then living, when they saw how the face of Seth shone with divine light, and heard him speak with divine wisdom, said, "He is God." Therefore his sons were commonly called the sons of God. That Seth means "resurrection" is also the opinion of Augustine (*De Civitate Dei*, xv, 17, 18): "Ita Seth, quod interpretatur resurrectio."

The most remarkable of the traditions, however, is undoubtedly the one which we read in the Apocryphal Gospel of Nicodemus, c. 19:

"While John, therefore, was thus teaching those in Hades, the first-created and forefather Adam heard and said to his son Seth, My son, I wish thee to tell the forefathers of the race of men and the prophets all that thou heardest from Michael, the archangel, when I sent thee to the gates of Paradise to implore God that he might send thee his angel to give thee oil from the tree of mercy, with which to anoint my body when I was sick. Then Seth said, Prophets and patriarchs, hear. When my father Adam, the first-created, was about to fall, once upon a time, into death, he sent me to make entreaty to God, very close by the gate of Paradise, that he would guide me by an angel to the tree of compassion, and that I might take oil and anoint my father, and that he might rise up from his sickness, which thing, therefore, I then did. And after the prayer an angel of the Lord came and said to me, What, Seth, dost thou ask? Dost thou ask oil which

raiseth up the sick, or the tree from which this oil flows, on account of the sickness of thy father? This is not to be found now. Go, therefore, and tell thy father that after the accomplishing of 5500 years from the creation of the world, then shall come into the world the only-begotten Son of God, being made man; and he shall anoint him with this oil, and shall raise him up, and shall baptize with water and with the Holy Spirit both him and those out of him, and then shall he be healed of every disease; but now this is impossible. When the prophets and the patriarchs heard these words, they rejoiced greatly."

In the Apocryphal literature Seth plays a prominent rôle, and even in *Reynard the Fox* Seth is mentioned as seeking for the oil of compassion:

"Die drei gegrabenen Namen
Brachte Seth der Fromme vom Paradiese hernieder,
Als er das Oel der Barmherzigkeit suchte."

See Fabricius, *Cod. Pseudepigr. V. T.* i, 139 sq.; ii, 49 sq.; Syncellus, *Chronogr.* p. 10; Selden, *Dias. de Horto Hedenis* in his *Otia Theolog.* p. 600; Baring-Gould, *Legends of the Patriarchs and Prophets*, p. 81 sq. (B. P.)

Sethians, or Sethites, a sect of the Ophites (q. v.), of the 2d century, who paid divine honor to Seth, believing him to have reappeared in the person of Jesus Christ. They taught that Seth was made by a third divinity, and substituted in the room of the two families of Abel and Cain, destroyed by the deluge. They were thus distinguished from the Cainites (q. v.), who assigned the highest place to Cain. The Sethians regarded Cain as a representative of the Hylie, Abel of the Psychical, and Seth, who was finally to reappear in the person of the Messiah, of the Pneumatic principle. See Neander, *Church Hist.* (Torey), i, 448.

Se'thur (Heb. *Sethur'*, סֶתוּר, *hidden*; Sept. Σαδοὺρ), the son of Michael, of the tribe of Asher, and one of the twelve spies sent by Moses to view the promised land (Numb. xiii, 13). B.C. 1657. See Van Sarn, *Obs. Light-footiana de Nomine Sethur* (in the *Miscell. Duisb.* i, 482 sq.).

Set-off (or **Offset**), the part of a wall, etc., which is exposed horizontally when the portion above it is reduced in thickness. Set-offs are not unfrequently covered, and in great measure concealed, by cornices or projecting mouldings, but are more usually plain. In the latter case, in classical architecture, they are generally nearly or quite flat on the top, but in Gothic architecture are sloped, and in most instances have a projecting drip on the lower edge to prevent the wet from running down the walls: this is especially observable in the set-offs of buttresses.

Cockington,
Devon.

Se ton aphtthiton MONARCHEN (Σὲ τὸν ἀφθίτον μονάρχην, *Thee the Everlasting King*) is the beginning of a hymn written εἰς Χριστόν (to Christ) by Gregory of Nazianzum (q. v.). The first few lines of this hymn run thus in Mrs. Charles's version:

"Hear us now, Eternal Monarch,
Grant us now to hymn and praise thee—
Thee the King, and thee the Master!
By whom are our hymns and praises,
By whom are the choirs of angels,
By whom flow the ceaseless ages,
By whom only shines the sun,
By whom walks the moon in brightness,
By whom smile the stars in beauty,
By whom all the race of mortals
Have received their godlike reason,
And thine other works outshone."

For the original Greek, together with a German translation, comp. Bissler, *Auswahl altchristlicher Lieder*, p. 10, 156; Rambach, *Anthologie christlicher Gesänge*, i, 48 sq.; Fortlage, *Gesänge christlicher Vorzeit*, p. 23, 361;

Mrs. Charles, *The Voice of Christian Life in Song*, p. 62 sq. (B. P.)

Seton, ELIZABETH ANN, founder of the Sisters of Charity in the United States, was born in New York city, Aug. 28, 1774. She was the daughter of Dr. Richard Bayley, and in her twentieth year married William Seton, whom she accompanied to Italy in 1803. Upon his death, in Pisa, in 1804, she returned to New York and entered the Roman Catholic Church, March 14, 1805. Left, by her husband's misfortunes, without resources, she opened a school in Baltimore in 1805-08. With her sisters-in-law, Harriet and Cecilia Seton, she took the veil as Sister of Charity, Jan. 1, 1809, at Emmettsburg, Md. (being the first members of that order in the United States). A conventual establishment was opened at Emmettsburg, July 30, 1812, with "Mother Seton" as superior-general. She died at Emmettsburg, Jan. 4, 1821. See White, *Life of Eliz. A. Seton* (N. Y. 1853; 5th ed. Baltimore, 1865); Seton [Rev. Robert], *Memoir, Letters, etc., of E. A. Seton* (N. Y. 1869, 2 vols.). See SISTERS OF CHARITY.

Settlements, Violent, took place when a patron in Scotland presented a clergyman whom the people would not have, but whom the ecclesiastical courts were determined, in spite of all opposition, to ordain. In such cases the parish sometimes rose to oppose the settlement by force, and obstructed the presbytery. The military were occasionally called to protect the presbytery. Such scenes happened in many parts of the country.

Seven (שֶׁבַע, *shéba*). The frequent recurrence of certain numbers in the sacred literature of the Hebrews is obvious to the most superficial reader; and it is almost equally obvious that these numbers are associated with certain ideas, so as in some instances to lose their numerical force, and to pass over into the province of symbolic signs. This is more or less true of the numbers three, four, seven, twelve, and forty; but seven so far surpasses the rest, both in the frequency with which it recurs, and in the importance of the objects with which it is associated, that it may fairly be termed the *representative* symbolic number. It has hence attracted considerable attention, and may be said to be the keystone on which the symbolism of numbers depends. The origin of this symbolism is a question that meets us at the threshold of any discussion as to the number seven. Our limits will not permit us to follow out this question to its legitimate extent, but we may briefly state that the views of Biblical critics may be ranged under two heads, according as the symbolism is attributed to theoretical speculations as to the internal properties of the number itself, or to external associations of a physical or historical character. According to the former of these views, the symbolism of the number seven would be traced back to the symbolism of its component elements three and four, the first of which = Divinity, and the second = Humanity, whence seven = Divinity + Humanity, or, in other words, the union between God and man, as effected by the manifestations of the Divinity in creation and revelation. So again the symbolism of twelve is explained as the symbolism of 3×4 , or a second combination of the same two elements, though in different proportions, the representative number of Humanity, as a multiplier, assuming a more prominent position (Bähr, *Symbolik*, i, 187, 201, 224). This theory is seductive from its ingenuity and its appeal to the imagination, but there appears to be little foundation for it. For (1) we do not find any indication, in early times at all events, that the number seven was resolved into three and four, rather than into any other arithmetical elements, such as two and five. Bengel notes such a division as running through the heptads of the Apocalypse (*Gnomon*, at Rev. xvi, 1), and the remark undoubtedly holds good in certain instances, e. g. the trumpets, the three latter being distinguished from the four former by the triple "woe" (Rev. viii, 13);

but in other instances, e. g. in reference to the promises (*Gnomon*, at Rev. ii, 7), the distinction is not so well established; and even if it were, an explanation might be found in the adaptation of such a division to the subject in hand. The attempt to discover such a distinction in the Mosaic writings—as, for instance, where an act is to be done on the third day out of seven (Numb. xix, 12)—appears to be a failure. (2) It would be difficult to show that any associations of a sacred nature were assigned to three and four previously to the sanctity of seven. This latter number is so far the sacred number *κατ' ἐξοχήν* that we should be less surprised if, by a process the reverse of the one assumed, sanctity had been subsequently attached to three and four as the supposed elements of seven. But (3) all such speculations on mere numbers are alien to the spirit of Hebrew thought; they belong to a different stage of society, in which speculation is rife, and is systematized by the existence of schools of philosophy.

We turn to the second class of opinions, which attribute the symbolism of the number seven to external associations. This class may be again subdivided into two, according as the symbolism is supposed to have originated in the observation of purely physical phenomena, or, on the other hand, in the peculiar religious enactments of Mosaism. The influence of the number seven was not restricted to the Hebrews; it prevailed among the Persians (Esth. i, 10, 14), among the ancient Indians (Von Bohlen, *Alt. Indien*, ii, 224 sq.), among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, etc. (Ideler, *Chronol.* i, 88, 178; ii, 473). Cicero calls it the knot and cement of all things, as being that by which the natural and spiritual world are comprehended in one idea (*Tusc. Quæst.* i, 10). The wide range of the word *seven* is in this respect an interesting and significant fact: with the exception of "six," it is the only numeral which the Shemitic languages have in common with the Indo-European; for the Hebrew *shéba* is essentially the same as *ἑπτά*, *septem*, *seven*, and the Sanscrit, Persian, and Gothic names for this number (Pott, *Etym. Forsch.* i, 129). In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon or to the supposed number of the planets. The Hebrews are held by some writers to have borrowed their notions of the sanctity of seven from their heathen neighbors, either wholly or partially (Von Bohlen, *Introd. to Gen.* i, 216 sq.; Hengstenberg, *Balaam* [Clark's ed.], p. 393); but the peculiarity of the Hebrew view consists in the special dignity of the *seventh*, and not simply in that of *seven*. Whatever influence, therefore, may be assigned to astronomical observation or to prescriptive usage, in regard to the original institution of the week, we cannot trace back the peculiar associations of the Hebrews further than to the point when the seventh day was consecrated to the purposes of religious rest.

Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of *religious periodicity*. The Sabbath, being the seventh day, suggested the adoption of seven as the *coefficient*, so to say, for the appointment of all sacred periods; and we thus find the seventh month ushered in by the Feast of Trumpets, and signaled by the celebration of the Feast of Tabernacles and the great Day of Atonement; seven weeks as the interval between the Passover and the Pentecost; the seventh year as the sabbatical year; and the year succeeding 7×7 years as the jubilee year. From the idea of periodicity it passed, by an easy transition, to the *duration* or *repetition* of religious proceedings; and thus seven days were appointed as the length of the feasts of Passover and Tabernacles; seven days for the ceremonies of the consecration of priests; seven days for the interval to elapse between the occasion and the removal of various kinds of legal uncleanness, as after childbirth, after contact with a corpse, etc.; seven

times appointed for aspersion either of the blood of the victim (e. g. Lev. iv, 6; xvi, 14) or of the water of purification (xiv, 51; comp. 2 Kings v, 10, 14); seven things to be offered in sacrifice (oxen, sheep, goats, pigeons, wheat, oil, wine); seven victims to be offered on any special occasion, as in Balaam's sacrifice (Numb. xxiii, 1), and especially at the ratification of a treaty, the notion of seven being embodied in the very term (שבעה) signifying to swear, literally meaning to do seven times (Gen. xxi, 28; comp. Herod. iii, 8 for a similar custom among the Arabians). The same idea is further carried out in the vessels and arrangements of the Tabernacle—in the seven arms of the golden candlestick, and the seven chief utensils (altar of burnt-offerings, laver, showbread table, altar of incense, candlestick, ark, mercy-seat).

The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a *cyclical* number, with the subordinate notions of perfection or completeness. It hence appears in cases where the notion of satisfaction is required, as in reference to punishment for wrongs (Gen. iv, 15; Lev. xxvi, 18, 28; Psa. lxxix, 12; Prov. vi, 31), or to forgiveness of them (Matt. xviii, 21). It is again mentioned in a variety of passages too numerous for quotation (e. g. Job v, 19; Jer. xv, 9; Matt. xii, 45) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness. To the same head we may refer the numerous instances in which persons or things are mentioned by sevens in the historical portions of the Bible—e. g. the seven kine and the seven ears of corn in Pharaoh's dream, the seven daughters of the priest of Midian, the seven sons of Jesse, the seven deacons, the seven sons of Sceva, the twice seven generations in the pedigree of Jesus (Matt. i, 17); and, again, the still more numerous instances in which periods of seven days or seven years are combined with the repetition of an act seven times; as, in the taking of Jericho, the town was surrounded for seven days, and on the seventh day it fell at the blast of seven trumpets borne round the town seven times by seven priests; or, again, at the flood, an interval of seven days elapsed between the notice to enter the ark and the coming of the flood, the beasts entered by sevens, seven days elapsed between the two missions of the dove, etc. So, again, in private life, seven years appear to have been the usual period of a hiring (Gen. xxix, 18), seven days for a marriage-festival (ver. 27; Judg. xiv, 12), and the same, or in some cases seventy days, for mourning for the dead (Gen. l, 3, 10; 1 Sam. xxxi, 13).

The foregoing applications of the number seven become of great practical importance in connection with the interpretation of some of the prophetic portions of the Bible, and particularly of the Apocalypse. For in this latter book the ever-recurring number seven both serves as the mould which has decided the external form of the work, and also, to a certain degree, penetrates into the essence of it. We have but to run over the chief subjects of that book—the seven churches, the seven seals, the seven trumpets, the seven vials, the seven angels, the seven spirits before the throne, the seven horns and seven eyes of the Lamb, etc.—in order to see the necessity of deciding whether the number is to be accepted in a literal or a metaphorical sense—in other words, whether it represents a number or a quality. The decision of this question affects not only the number seven, but also the number which stands in a relation of antagonism to seven, viz. the half of seven, which appears under the form of forty-two months, = $3\frac{1}{2}$ years (Rev. xiii, 5); twelve hundred and sixty days, also = $3\frac{1}{2}$ years (xi, 3; xii, 6); and, again, a time, times, and half a time, = $3\frac{1}{2}$ years (xii, 14). We find this number frequently recurring in the Old Test., as in the forty-two stations of the wilderness (Numb. xxxiii); the three and a half years of the famine in Elijah's time (Luke

iv, 25); the "time, times, and the dividing of time," during which the persecution of Antiochus Epiphanes was to last (Dan. vii, 25), a similar period being again described as "the midst of the week," i. e. the half of seven years (ix, 27); "a time, times, and a half" (xii, 7); and again, probably, in the number of days specified in Dan. viii, 14; xii, 11, 12. If the number seven express the notion of completeness, then the number half-seven = incompleteness and the secondary ideas of suffering and disaster: if the one represent divine agency, the other we may expect to represent human agency. Mere numerical calculations would thus, in regard to unfulfilled prophecy, be either wholly superseded, or, at all events, take a subordinate position to the general idea conveyed. See *Journal of Sacred Literature*, Oct. 1851, p. 134 sq.; *New-Englander*, No. 1858. See NUMBER.

Seven Capital Sins. See SEVEN DEADLY SINS.

Seven Chief Virtues, THE. According to the teaching of the Roman Catholic Church, these virtues are faith, hope, charity, prudence, temperance, chastity, and fortitude.

Seven Days After, the term by which the octave of a festival is described in the Book of Common Prayer. Thus the proper prefaces in the communion service, except that for Trinity Sunday, are to be said upon certain days, and, likewise, during seven days afterwards.

Seven Deadly Sins, THE, as defined by the Romish Church, are pride, anger, envy, sloth, lust, covetousness, and gluttony.

Seven Dolors OF THE BLESSED VIRGIN MARY, Feast of, a modern festival of the Roman Catholic Church, which, although bearing the name of devotion to the Virgin Mary, in reality regards those incidents in the life and passion of Christ with which his mother is most closely associated. This festival is celebrated on the Friday preceding Palm-Sunday (q. v.). The "Dolors," or sorrows, of the Blessed Virgin, have long been a favorite theme of Roman Catholic devotion, of which the pathetic *Stabat Mater Dolorosa* is the best-known and most popular expression; and the festival of the Seven Dolors is intended to individualize the incidents of her sorrows, and to present them for meditation. The seven incidents referred to under the title of "Dolors" are: 1. The prediction of Simeon (Luke ii, 34); 2. The flight into Egypt; 3. The loss of Jesus in Jerusalem; 4. The sight of Jesus bearing his cross towards Calvary; 5. The sight of Jesus upon the cross; 6. The piercing of his side with the lance; 7. His burial. This festival was instituted by pope Benedict XIII in 1725.

Seven Heroes OF THEBES. See THEBES, SEVEN HEROES OF.

Seven Sacraments. The Council of Trent, session 7, canon 1, says, "If any one shall say that the sacraments of the new law were not all instituted by Jesus Christ our Lord, or that they are more or less than seven—to wit, baptism, confirmation, the eucharist, penance, extreme unction, orders, and matrimony—or even that any one of these seven is not truly and properly a sacrament, let him be anathema." See SACRAMENT.

Seven Sleepers, the heroes of a celebrated legend, first related by Gregory of Tours at the close of the 6th century (*De Glor. Martyrum*, c. 96); but the date of which is assigned to the 3d century and to the persecution of the Christians under Decius. According to the narrative, seven Christians of Ephesus took refuge in a cave near the city, where they were discovered by their pursuers, who walled up the entrance in order to starve them to death. A miracle, however, was interposed in their behalf: they fell into a preternatural sleep, in which they lay for nearly two hundred years. The concealment is supposed to have taken place in 250 or

251, and the sleepers to have been reanimated in 447. Their sleep seemed to them to have been for only a night, and they were greatly astonished, on going into the city, to see the cross exposed upon the church-tops, which but a few hours ago, as it appeared, was the object of contempt. Their wonderful story told, they were conducted in triumph into the city; but all died at the same moment.

Seven Spirits AND ORDERS OF THE CLERGY. The Roman Catholics of the Western Church, in general, abide firmly by the principle established by the schoolmen, that the priesthood is to consist of *seven* classes, corresponding to the seven spirits of God. Of these the three who are chiefly employed in the duties of the ministerial office compose the superior order [see CLERGY, 3]; and the four whose duty it is to wait upon the clergy in their ministrations, and to assist in conducting public worship, belong to the inferior order. See Coleman, *Christ. Antiq.* p. 73.

Sevenfold Gifts, the gifts of the Holy Spirit; so called from their enumeration in Isa. xi, 1-6. There is an allusion to them in the hymn *Veni, Creator Spiritus* in the Ordinal (q. v.), thus—

"Come, Holy Ghost, our souls inspire,
And lighten with celestial fire:
Thou the anointing Spirit art,
Who dost thy sevenfold gifts impart."

In a prayer of the Order of Confirmation these gifts are specified as follows: "Daily increase in them thy manifold gifts of grace—the spirit of *wisdom* and *understanding*, the spirit of *counsel* and *ghostly strength*, the spirit of *knowledge* and *true godliness*; and fill them, O Lord, with the spirit of thy holy fear."

Seventh-day. See SABBATH.

Seventh-day Baptists. See BAPTISTS.

Seventh-day Baptists (GERMAN). See BAPTISTS.

Seventy (שִׁבְעִים, *shivim*), as being the multiple of the full number seven and the perfect number ten, shares in the sacredness or conventionality of the former in Scripture. See SEVEN. They are sometimes put in contrast in the complete phrase "seventy times seven" (Gen. iv, 24; Matt. xviii, 21). Some of the most remarkable combinations of this number are specified below.

SEVENTY DISCIPLES OF OUR LORD (Luke x, 1, 17). These seem to have been appointed in accordance with the symbolism of the seventy members of Jacob's household (Exod. i, 5) and, likewise, the seventy elders of the Jews (xxiv, 1; Numb. xi, 16). See SANHEDRIM. The following is the traditional list of their names (see Townsend, *New Test.*; and the monographs cited by Danz, *Wörterb.* s. v. "Lucas," Nos. 60-63; and by Hase, *Leben Jesu*, p. 165):

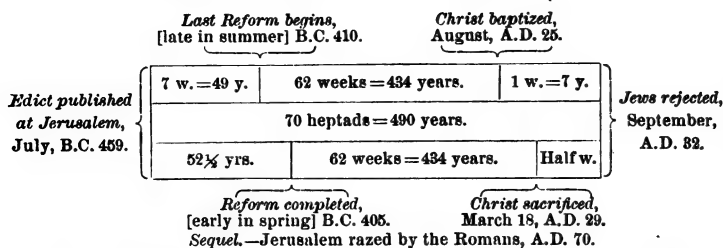

1. Agabus the prophet.
2. Amphiaraus of Odessus, sometimes called Amphiatrus.
3. Ananias, who baptized Paul, bishop of Damascus.
4. Andronicus of Pannonia, or Spain.
5. Apelles of Smyrna, or Heraclea.
6. Apollo of Cæsarea.
7. Aristarchus of Apamea.
8. Aristobulus of Britain.
9. Artemas of Lystra.
10. Asyncretus of Hyrcania.
11. Barnabas of Milan.
12. Barnabas of Heraclea.
13. Caesar of Dyrrachium.
14. Caius of Ephesus.
15. Corpus of Berytus in Thrace.
16. Cephas, bishop of Konia.
17. Clemens of Sardinia.
18. Cleophas of Jerusalem.
19. Crescens of Chalcodon in Galatia.
20. Damus, a priest of Idols.
21. Epenetus of Carthage.
22. Epaphroditus of Andriace.
23. Erastus of Paneas, or of the Philippians.
24. Evodius of Antioch.
25. Hermas of Philippi, or Philippopolis.

26. Hermes of Dalmatia.
27. Hermogenes, who followed Simon Magus.
28. Hermogenes, bishop of the Megarenes.
29. Herodion of Tarsus.
30. James, the brother of our Lord, at Jerusalem.
31. Jason of Tarsus.
32. Jesus Justus, bishop of Eleutheropolis.
33. Linus of Rome.
34. Luke the Evangelist.
35. Lucius of Laodicea in Syria.
36. Mark, who is also John, of Bibliopolis, or Biblus.
37. Mark the Evangelist, bishop of Alexandria.
38. Mark, the nephew of Barnabas, bishop of Apollonia.
39. Matthias, afterwards the apostle.
40. Narcissus of Athens.
41. Nicanor, who died when Stephen suffered martyrdom.
42. Nicolaus of Samaria.
43. Olympius, a martyr at Rome.
44. Onesiphorus, bishop of Corone.
45. Parmenas of the Soli.
46. Patrobulus, the same with Patrobas (Rom. xvi, 14) of Puteoli, or, according to others, of Naples.
47. Philemon of Gaza.
48. Philemon, called in the Acts Philip, who baptized the eunuch of Candace, of Trallium, in Asia.
49. Philologus of Sinope.
50. Philegon, bishop of Marathon.
51. Phigellus of Ephesus, who followed Simon Magus.
52. Prochorus of Nicomedia, in Bithynia.
53. Pudens.
54. Quartus of Berytus.
55. Rhodion, a martyr at Rome.
56. Rufus of Thebes.
57. Silas of Corinth.
58. Sylvanus of Thessalonica.
59. Sosipater of Iconium.
60. Soesthenes of Colophon.
61. Stachys of Byzantium.
62. Stephen, the first martyr.
63. Tertius of Iconium.
64. Thaddæus, who carried the epistle of Jesus to Edessa, to Abgarus.
65. Timon of Bostra of the Arabians.
66. Trophimus, who suffered martyrdom with Paul.
67. Tychicus, bishop of Chalcedon, of Bithynia.
68. Tychicus of Colophon.
69. Urbanus of Macedonia.
70. Zenas of Diospolis.

SEVENTY WEEKS OF DANIEL'S PROPHECY (Dan. ix, 25-27). This is so important a link in sacred prediction and chronology as to justify its somewhat extensive treatment here. We first give an exact translation of the passage.

"Seventy heptads are decreed [to transpire] upon thy nation, and upon thy holy city, for [entirely] closing the [punishment of] sin, and for sealing up [the retributive sentence against their] offences, and for expiating guilt, and for bringing in [the state of] perpetual righteousness, and for sealing up [the verification of] vision and prophet, and for anointing holy of holies. And thou shalt know and consider, [that] from [the time of] a command occurring for returning and building [i. e. for rebuilding] Jerusalem till [the coming of] Messiah prince, [shall intervene] seven heptads, and sixty and two heptads; [its] street shall return and be built [i. e. shall be rebuilt], and [its] fosse, and [that] in distress of the times. And after the sixty and two heptads, Messiah shall be cut off, and nothing [shall be left] to him; and people of the coming prince shall destroy the city and the holy [building] and his end [of fighting shall come] with [or, like] a flood, and until the end of warring [shall occur the] decreed desolations. And he shall establish a covenant towards many [persons during] one heptad, and [at the] middle of the heptad he shall cause to cease sacrifice and offering; and upon [the topmost] corner [of the Temple shall be reared] abominations [i. e. idolatrous images] of [the] desolator, and [that] till completion, and a decreed [one] shall pour out upon [the] desolator."

In ver. 24 we have a general view of the last great period of the Jewish Church (see the middle line in the diagram). It was to embrace four hundred and ninety years, from their permanent release from Babylonian bondage till the time when God would cast them finally off for their incorrigible unbelief. See WEEK. Within this space Jehovah would fulfil what he had predicted, and accomplish all his designs respecting them under their special relation. The particulars noted in this cursory survey are, first, the conclusion of the then existing exile (expressed in three variations, of which the last phrase, "expiating guilt," explains the two former, "closing the sin" and "sealing up offences"); next, the fulfilment of ancient prophecy by ushering in the religious prosperity of Gospel times;

and, lastly, as the essential feature, the consecration of the Messiah to his redeeming office.

The only "command" answering to that of ver. 25 is that of Artaxerxes Longimanus, issued in the seventh year of his reign, and recorded in the seventh chapter of Ezra, as Prideaux has abundantly shown (*Connection*, s. a. 409), and as most critics agree. At this time, also, more Jews returned to their home than at any other, and the literal as well as spiritual "rebuilding of Jerusalem" was prosecuted with unsurpassed vigor. The period here referred to extends "till the Messiah" (see the upper line of above diagram); that is, as far as his public recognition as such by the voice at his baptism, the "anointing" of the previous verse; and not to his death—as is commonly supposed, but which is afterwards referred to in very different language—nor to his birth, which would make the entire compass of the prophecy vary much from four hundred and ninety years. The period of this verse is divided into two portions of "seven heptads" and "sixty-two heptads," as if the "command" from which it dates were renewed at the end of the first portion; and this we find was the case. Ezra, under whom this reformation of the state and religion began, was succeeded in the work by Nehemiah, who, having occasion to return to Persia in the twenty-fifth year after the commencement of the work (Neh. xiii, 6), returned "after certain days," and found that it had so far retrograded that he was obliged to institute it anew. The length of his stay at court is not given, but it must have been considerable to allow so great a backsliding among the lately reformed Jews. Prideaux contends that his return to Judea was after an absence of twenty-four years; and we have supposed the new reform then set on foot by him to have occupied a little over three years, which is certainly none too much time for the task (see the lower line of the diagram). The "rebuilding of the streets and intrenchments in times of distress" seems to refer, in its literal sense, to the former part especially of the forty-nine years (comp. Neh. iv), very little having been previously done towards rebuilding the city, although former decrees had been issued for repairing the Temple; and in its spiritual import it applies to the whole time, and peculiarly to the three years of the last reform.

The "sixty-two weeks" of ver. 26, be it observed, are not said to commence at the end of the "seven weeks" of ver. 25, but, in more general terms, after the "distressing times" during which the reform was going on; hence they properly date from the end of that reform, when things became permanently settled. It is in consequence of a failure to notice this variation in the limits of the two periods of sixty-two weeks referred to by the prophet (comp. the middle portions of the upper and of the lower line in the diagram) that critics have thrown the whole scheme of this prophecy into disorder, in applying to the same event such irreconcilable language as is used in describing some of its different elements. By the ravaging invasion of foreigners here foretold is manifestly intended the destruction of Jerusalem by the Roman troops, whose emperor's son, Titus, is here styled a "prince" in command of them. The same allusion is also clear from the latter part of the following verse. But this event must not be included within the seventy weeks; because, in the first place,

the accomplishment would not sustain such a view—from the decree, B.C. 459, to the destruction of Jerusalem, A.D. 70, being five hundred and twenty-eight years; secondly, the language of ver. 24 does not require it—as it is not embraced in the purposes for which the seventy weeks are there stated to be appointed to Jerusalem and its inhabitants; and, lastly, the Jews then no longer formed a link in the chain of ecclesiastical history in the divine sense—Christian believers having become the true descendants of Abraham. At the close of the verse we have the judgments with which God would afflict the Jews for cutting off the Messiah: these would be so severe that the prophet (or, rather, the angel instructing him) cannot refrain from introducing them here in connection with that event, although he afterwards adverts to them in their proper order. What these sufferings were, Josephus narrates with a minuteness that chills the blood, affording a wonderful coincidence with the prediction of Moses in Deut. xxviii, 15-68; they are here called a "flood," the well-known Scripture emblem of terrible political calamities (as in Isa. viii, 7, 8; Dan. xi, 10, 22; Nah. i, 8).

Ver. 27 has given greater trouble to critics than any other in the whole passage; and, indeed, the common theory by which the seventy weeks are made to end with the crucifixion is flatly contradicted by the cessation of the daily sacrificial offerings at the Temple "in the middle of the week." All attempts to crowd aside this point are in vain; for such an abolition could not be said to occur in any pertinent sense before the offering of the great sacrifice, especially as Jesus himself, during his ministry, always countenanced their celebration. Besides, the advocates of this scheme are obliged to make this last "week" encroach upon the preceding "sixty-two weeks," so as to include John the Baptist's ministry, in order to make out seven years for "confirming the covenant;" and when they have done this, they run counter to the previous explicit direction, which makes the first sixty-nine weeks come down "to the Messiah," and not end at John. By means of the double line of dates exhibited in the above diagram, all this is harmoniously adjusted; and, at the same time, the only satisfactory interpretation is retained—that, after the true atonement, these typical oblations ceased to have any meaning or efficacy, although before it they could not consistently be dispensed with, even by Christ and his apostles.

The seventy weeks, therefore, were allotted to the Jews as their only season of favor or mercy as a Church, and we know that they were not immediately cast off upon their murder of Christ (see Luke xxiv, 27; Acts iii, 12-26). The Gospel was specially directed to be first preached to them; and not only during our Saviour's personal ministry, but for several years afterwards, the invitations of grace were confined to them. The first instance of a "turning to the Gentiles" proper was the baptism of the Roman centurion Cornelius, during the fourth year after the resurrection of Christ. In this interval the Jewish people had shown their determined opposition to the new "covenant" by imprisoning the apostles, stoning Stephen to death, and officially proscribing Christianity through Sanhedrim. Soon after this martyrdom occurred the conversion of Saul, who "was a chosen vessel to bear God's name to the Gentiles;" and about two years after this event the door was thrown wide open for their admission into the covenant relation of the Church, instead of the Jews, by the vision of Peter and the conversion of Cornelius. Here we find a marked epoch, fixed by the finger of

God in all the miraculous circumstances of the event, as well as by the formal apostolical decree ratifying it, and obviously forming the great turning-point between the two dispensations. We find no evidence that "many" of the Jews embraced Christianity after this period, although they had been converted in great numbers on several occasions under the apostles' preaching, not only in Judæa, but also in Galilee, and even among the semi-Jewish inhabitants of Samaria. The Jews had now rejected Christ as a nation with a tested and incorrigible hatred; and having thus disowned their God, they were forsaken by him, and devoted to destruction, as the prophet intimates would be their retribution for that "decision" in which the four hundred and ninety years of this their second and last probation in the promised land would result. It is thus strictly true that Christ personally and by his apostles "established the covenant" which had formerly been made, and was now renewed, with many of the chosen people for precisely seven years after his public appearance as a teacher; in the very *middle* of which space he superadded forever the sacrificial offerings of the Mosaic ritual by the one perfect and sufficient offering of his own body on the cross.

In the latter part of this verse we have a graphic outline of the terrible catastrophe that should fall upon the Jews in consequence of their rejection of the Messiah—a desolation that should not cease to cover them but by the extinction of the oppressing nation: it forms an appendix to the main prophecy. Our Saviour's language leaves no doubt as to the application of this passage, in his memorable warning to his disciples that when they should be about to "see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place," they should then "flee into the mountains" (Matt. xxiv, 15, 16; comp. xxiii, 36, 38).

In the scheme at the head of preceding page, several chronological points have been partially assumed which entire satisfaction with the results obtained would require to be fully proved. A minute investigation of the grounds on which all the dates involved rest would occupy too much space for the present discussion; we therefore content ourselves with determining the two boundary dates of the entire period, trusting the intermediate ones to such incidental evidences of their correctness as may have been afforded in the foregoing elucidation, or may arise in connection with the settlement proposed (see Browne, *Ordo Sæclorum*, p. 96–107, 202). If these widely distant points can be fixed by definite data independently of each other, the correspondence of the *interval* will afford strong presumption that it is the true one, which will be heightened as the subdivisions fall naturally into their prescribed limits; and thus the above coincidence in the character of the events will receive all the confirmation that the nature of the case admits.

1. *The Date of the Edict.*—We have supposed this to be from the time of its taking effect at Jerusalem rather than from that of its nominal issue at Babylon. The difference, however (being only four months), will not seriously affect the argument. Ezra states (vii, 8) that "he arrived at Jerusalem in the fifth month [*Ab*, our July–August] of the seventh year of the king;" Artaxerxes. Ctesias, who had every opportunity to know, makes Artaxerxes to have reigned forty-two years; and Thucydides states that an Athenian embassy sent to Ephesus in the winter that closed the seventh year of the Peloponnesian war was there met with the news of Artaxerxes's death: *πυθόμενοι . . . Ἀραξέρξην . . . νεωστὶ τεθνηκότα (κατὰ γὰρ τοῦτον τὸν χρόνον ἐτελεύτησεν)* (*Bell. Pelop.* iv, 50). Now this war began in the spring of B.C. 431, as all allow (Thuc. ii, 2), and its seventh year expired with the spring of B.C. 424; consequently, Artaxerxes died in the winter introducing this latter calendar year, and his reign began some time in B.C. 466. The same historian also states that Themistocles, in his flight to Asia, having been driven by a

storm into the Athenian fleet, at that time blockading Naxos, managed to get safely carried away to Ephesus, whence he despatched a letter of solicitation to Artaxerxes, then lately invested with royalty, *νεωστὶ βασιλεύοντα* (*Bell. Pelop.* i, 137). The date of the conquest of that island is B.C. 466, which is, therefore, also that of the Persian king's accession. It is now necessary to fix the *season* of the year in which he became king. If Ctesias means that his reign lasted forty-two *full* years, or a little over rather than under that length, the accession must be dated prior to the beginning of B.C. 466; but it is more in accordance with the usual computation of reigns to give the number of *current* years, if nearly full, and this will bring the date of accession down to about the beginning of summer, B.C. 466. This result is also more in accordance with the simultaneous capture of Naxos, which can hardly have occurred earlier in that year. I may add that it likewise explains the length assigned to this reign (forty-one years) by Ptolemy, in his astronomical canon, although he has misled modern compilers of ancient history by beginning it in B.C. 465, having apparently himself fallen into some confusion, from silently annexing the short intermediate periods of anarchy, sometimes to the preceding and at others to the ensuing reign. The "seventh year" of Artaxerxes, therefore, began about the summer of B.C. 460, and the "first [Hebrew] month" (Nisan) occurring within that twelve-month gives the following March–April of B.C. 459 as the time when Ezra received his commission to proceed to Jerusalem for the purpose of executing the royal mandate.

2. *The Date of the Conversion of Cornelius.*—The solution of this question will be the determination of the distance of this event from the time of our Saviour's Passion; the absolute date of this latter occurrence must, therefore, first be determined. This is ascertained to have taken place in A.D. 29 by a comparison of the duration of Christ's ministry with the historical data of Luke iii, 1–23; but the investigation is too long to be inserted here. See CHRONOLOGY. A ready mode of testing this conclusion is by observing that this is the only one of the adjacent series of years in which the calculated date of the equinoctial full moon coincides with that of the Friday of the crucifixion Passover, as any one may see—with sufficient accuracy for ordinary purposes—by computing the mean lunations and the week-day back from the present time. This brings the date of Christ's baptism to A.D. 25; and the whole tenor of the Gospel narratives indicates that this took place in the latter part of summer.

The following are special treatises on this prophecy: Hulsius, *Abrahamæ Com. in LXX Heb. Confut.* (Breda, 1653); Calov, *De LXX Septimanis* (Vitemb. 1663); Sosimann, *De LXX Hebd. Dan.* (Lugd. 1678); Schönwald, *Diss. de LXX Hebd.* (Jen. 1720); Marshall, *Treatise on the 70 Weeks of Daniel* (Lond. 1725); Markwick, *Calculation of the LXX Weeks of Daniel* (ibid. 1728); Pfaff, *Diss. de LXX Hebd.* (Tüb. 1734); Pagendorn, *Diss. de Hebd. Danielis* (Jen. 1745); Ayrolus, *Liber LXX Hebdomatum Resignatus* (Rom. 1748); Offerhaus, *De LXX Septimanis Danielis* (Groning. 1756); Parry, *On Daniel's 70 Weeks* (Northampton, 1762); Michaelis, *Versuch über d. 70 Wochen Daniels* (Gött. 1771); also *Epistolæ de LXX Hebdomadibus* (Lond. 1773); Hasenkamp, *Neue Erklär. d. 70 W.* (Lemgo, 1772); Kluit, *Explicatio LXX Hebd.* (Middelb. 1774); Jung, *Chronologia LXX Hebd.* (Heidelb. 1774); Blayney, *Dissertation on the 70 W.* (Oxf. 1775); Winter, *Sermons on the 70 W.* (Lond. 1777); Lorenz, *Interpret. Nov. LXX Hebd.* (Argent. 1781); Wiesner, *Inquis. in LXX Hebd.* (Wircb. 1787); Vri, *Interpret. LXX Hebd.* (Oxon. 1788); Butt, *Commentary on the 70 W.* (Lond. 1807); Faber, *Dissertation on the 70 W.* (ibid. 1811); Stonard, *Dissertation on the 70 W.* (ibid. 1825); Scholl, *Comment. de LXX Hebd.* (Francf. 1829); Steudel, *Disq. de LXX Hebd.* (Tüb. 1833); Wieseler, *Die 70 W. erörtert* (Gött. 1839);

Hoffmann, *Die 70 Jahrwochen* (Nuremb. 1836); Denny, *Charts of the 70 W.* (Lond. 1849); Blackley, *The 70 W. Explained* (ibid. 1850). See also the *Stud. und Krit.* 1834, ii, 270; 1858, iv; (Gettysb.) *Evangel. Rev.* April, 1867, iii; Goode, *Warburton Lect. for 1854-58* (Lond. 1860). See DANIEL.

SEVENTY YEARS is a frequent number in Scripture, both symbolical and literal; e.g. the seventy years of Tyre's depression after its capture by Nebuchadnezzar till its relief by the downfall of Babylon (Isa. xxiii, 15-17); and especially the seventy years of the Jewish captivity at Babylon (Jer. xxv, 11; xxix, 10). See CAPTIVITY.

Severally. In the office for the baptism (Protestant Episcopal Church) of those of riper years, the questions proposed by the minister to the candidates are to be considered as addressed to them *severally*, and the answers to be made accordingly. By this rubric every candidate is to view himself as isolated and alone, although the minister is not obliged to distinctly propose the questions to every individual. In the Order of Confirmation there is a rubric somewhat analogous. The candidates "kneeling before the bishop, he shall lay his hands upon the head of *every one severally*, saying," etc.

Severans, an old term not now in use, which seems to have signified a kind of cornice, or string-course.

Severians, a sect of Encratite Gnostics, successors of the Tatianists, whose complicated system of *Æons* they abandoned, but whose Encratite notions of creation they developed or heightened. The Severians held that the well-known Gnostic power Ialdabaoth was a great ruler of the powers; that from him sprang the Devil; that the Devil, being cast down to the earth in the form of a serpent, produced the vine, whose snake-like tendrils indicate its origin; that the Devil also created woman and the lower half of man. Eusebius states that the Severians made use of the law and prophets and Gospels, giving them a peculiar interpretation, but abused the apostle Paul and rejected his epistles, as also the Acts of the Apostles (Euseb. *Hist. Eccl.* iv, 29). Augustine, on the other hand, states that they rejected the Old Test. (Aug. *Hær.* xxiv). The tenet of the creation of the world by an inferior Demiurge presupposes the inherent evil of matter, and it is a natural deduction from this to deny the resurrection of the body. The Severians followed out their principle to this conclusion, according to Augustine (*Hær.* xxiv), while Natalis Alexander denies the probability of Augustine's report. The Severians were Docetæ, as were the Tatianists. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v. "Monophysites;" Hagenbach, *Hist. of Doct.* i, 280; Neander, *Ch. Hist.* iii, 170. See ENCRATITES; MONOPHYSTES.

Severianus, bishop of Gabala, in Syria. The historical appearance of this personage is interwoven with the life and fortunes of John Chrysostom. During a protracted absence of the latter in Asia Minor, Severianus acted as his representative, and availed himself of the opportunity to intrigue against Chrysostom, for which he was expelled from Constantinople. Being soon recalled by his patroness, the empress Eudoxia, he became reconciled to Chrysostom; but he afterwards renewed his intriguing efforts in connection with Theophilus of Alexandria. His later history is unknown. Six sermons on the history of the creation, together with other sermons by this man, are published in the works of Chrysostom in the Montfaucon ed. i, vi, and the Mechitarists of Venice published certain of his homilies in 1827. On his life, see Palladius, *De Vita S. Joh. Chrysostom.*; Socrates, *Hist. Eccl.* vi, 18; Sozomen, *Hist. Eccl.* viii, 6.

Severinus, Sr., the apostle of Noricum. The records of his early life are scanty, but indicate that he was

born of Christian parents in Italy early in the 5th century. He chose a hermit's life in early youth, and settled in the East in pursuance of that purpose, but soon returned to the West in order to devote himself to the active propagation of Christianity among the heathen, establishing himself first in Pannonia, but afterwards in Noricum. The latter was an imperial province lying between the river Danube and the Alps, and was intersected with Roman roads on which were located not only flourishing native towns, but numerous Roman colonies, municipalities, and camps, which contained a Roman population (comp. Strabo, iv, 206, and vii, 304, 313; Tacitus, *Ann.* ii, 63; id. *Hist.* i, 11, 70; Pliny, xxi, 7, 20; Ptolemy, ii, 1, 12; viii, 6, 2, 7; 1, 8, 2; Zosimus, iv, 35). The population had also adopted the Roman language, culture, and customs, and carried on an active trade with the Italian cities, particularly Rome and Aquileia. Christianity had, consequently, been long introduced when Severinus settled in Noricum; but it had failed to subdue the prevailing paganism, so that in the middle of the 4th century St. Valentine was repeatedly expelled from the country because of his attempts to preach the Gospel. A complete recognition was not accorded to Christianity until after Theodosius the Great had issued a general edict prohibiting all idolatry throughout the empire (in 392 [*Cod. Theod. de Paganis*, i, 7, 9, 11 sq.]); and an additional difficulty was encountered in the convulsions which grew out of the migration of Eastern nations then in progress.

Severinus fixed his residence in the neighborhood of Faviana, a town on the Danube near where the modern Pöchlarn stands, and engaged in the practice of a rigid asceticism. He also founded a monastery and gathered a large number of pupils, whom he trained, by precept and example, to imitate the virtues of the early Christians and to avoid the corrupt manners of the world. He never partook of food before sundown except on feast-days, walked constantly with bare feet, and always slept on a *cilicium* spread on the bare floor of his chamber. But, not content with fulfilling his vow in the most faithful manner, he also frequently traversed the country to preach the Gospel, to comfort the Christian communities, who were incessantly ravaged by the predatory assaults of barbarous hordes, and to admonish them to avert the threatening dangers by prayers and good works, and to faithfully pay tithes for the support of the poor. He was also indefatigable in laboring to secure the liberation of imprisoned Christians, in healing the sick, and in entertaining and aiding helpless fugitives. Being endowed with the ability to form a correct estimate of existing conditions, he was frequently able to point out the places which were exposed to attacks from the enemy, and he never failed to give timely warning of danger and to suggest proper measures of defence. His reputation accordingly increased more and more, so that he was barely able to attend to all the requests addressed to him for instruction, counsel, comfort, and aid. Even the famous Odoacer, leader of the Rugians and Herulians, did not disdain to seek him and ask for his counsel and blessing when about to engage in his expedition to Italy in A.D. 476.

The zeal displayed by Severinus for the outward welfare of the people and for the success of Christianity led several congregations to make him their bishop; but he declined the office on the ground that he preferred his solitude. The later years of his life were disturbed by the incursions of the Alemanni and the Rugians. One of the latest acts of his life was an attempt to persuade the Rugian king Fava, or Feletheus, and his cruel queen, Gisa, to refrain from hostilities against the Noricans. He died Jan. 8, 482, and was eventually buried in Italy, first at Monte Feltre, and afterwards on a small island near Naples, where a costly tomb had been erected for him by a noblewoman. Christianity had been firmly established in Noricum during his life; the bishopric of Lohr, subsequently transferred to Passau, had already

been founded (*Vita S. c.* 30), and three others (Teurnia, or Tiburnia, Celleia, now Cilley, and Amona, now Laybach, whose bishops are recorded among the members of a synod held at Grado in 579) were established in the course of the next century.

Literature.—Eugippus, *Vita S. Severini*, in M. Welsari *Opp. Hist. et Phil.* (Norimb. 1672), p. 631 sq., and in Pez, *Scriptt. Rer. Austr.* i, 62 sq.; the Bollandists' *Acta SS.* ad Jan. 8. See also Mannert, *Geogr. d. Griechen u. Römer*, iii, 528 sq.; Forbiger, *Handb. d. alt. Geogr.* iii, 455 sq.; Muchar, *Das röm. Noricum*, etc. (Grätz, 1825, 2 pts. 8vo); Mascou, *Gesch. d. Teutschen*, etc., II, ii, 2, and xiii, 36; Stritter, *Memorie Populorum olim ad Danub.*, etc. (St. Petersburg, 1771–74, 2 vols. 4to); Mosheim, *De Rebus Christ.* etc., p. 211 sq.; Fleury, *Hist. Eccles.* vi, 839 sq.; Schröckh, *Christliche Kirchengeschichte*, xvi, 261 sq.; Rettberg, *Kirchengesch. Deutschlands* (Gött. 1846), i, 8, 21, 34.

Severinus, pope from 638 to 640, and successor of Honorius I. The Monothelite troubles led to the postponing of his confirmation by the emperor Heraclius until 640, when it was obtained on the pledge of his legates that the Roman clergy should subscribe to the emperor's *Ecthesis* (q. v.). He was enthroned May 28, and died Aug. 1 following. He condemned the *Ecthesis*, and consequently the Monothelite doctrine.—Herzog, *Real-Encyklop.* s. v.

Severites. See ANGELITES.

Severus, founder of the Gnostic sect named after him Severians (q. v.). He came from Sozopolis to Pisidia, and while a pagan was a lawyer. Receiving baptism at Tripoli, in Phœnicia, he became a monk and united himself with a society of zealous Monophysites. Banished, he came to Constantinople to seek protection from the emperor. He told him that the defence of the Chalcedonian Council was the cause of all the disturbances, and sought to introduce a certain addition to the old and venerated Church song the *Trisagion* which might serve as the basis of a coalition between the opposing parties. Later, in the reign of Justin, Severus, who had managed to become patriarch of Antioch, saved his life by fleeing to Egypt. He returned to Constantinople with Anthimus, under the protection of the empress Theodora; but Justinian, finding that he had been imposed upon by the Monophysites, deposed Anthimus, and decreed that "the writings of Severus should be burned, and none should be permitted either to own or transcribe them." See Neander, *Ch. Hist.* ii, 531 sq.

Severus, SULPICIOUS, *St.*, was born about 363, of a prominent family, and in manhood shone for a time as a forensic orator. He married the daughter of a wealthy consul; but she died about 392, and he spent the remainder of his life in monastic seclusion with a few like-minded persons, in Aquitaine. He was an admirer of Martin of Tours, whom he repeatedly visited. Gennadius states that he was gained over to Pelagianism when in his old age, and that he had expressed himself in favor of that system; but that, having discovered his error, he imposed on himself perpetual silence as a penance. He died at Marseilles, whither he had retired, soon after A.D. 410. The writings of Severus are, *Vita S. Martini Turonensis*, with legendary embellishments;—*Historia Sacra*, or *Chronica Sacra*, containing Jewish and Church history to A.D. 400, interspersed with marvels, but written in a flowing style;—*Dialogi Tres*, written about A.D. 405, and treating in part of the monastic life and virtues, in part of the merits of Martin of Tours; finally, some letters of no importance and doubtful authenticity (see Bähr, *Christl. röm. Theol.* p. 218–222). The works of Severus have been separately published in various editions; the best complete edition is that of Hieronymus de Prato (Verona, 1751–54), without the letters. A reprint from this ed. with the letters added is given in Gallandi, *Bibl. Patrum*, viii, 355 sq.—Herzog, *Real-Encyklop.* s. v.

Severy (also *Severey*, *Severie*, *Civery*), a bay or compartment of a vaulted ceiling.

Seville, COUNCILS OF (*Concilium Hispalense*). I. The first Council of Seville was held Nov. 4, 590, composed of eight bishops, St. Leander, bishop of Seville, presiding. It was decided that the donations and alienations of Church property made by the bishop Gaudenius were uncanonical and void; nevertheless, it was decreed that the serfs who had been freed by him should remain free, although still subject to the Church, and should be prohibited from leaving their property to any persons except their children, who should remain, in perpetuity, subjects of the Church; also, authority was given to the lay judges to separate the clergy from their wives or mistresses. See Mansi, *Concil.* v, 1588.

II. The second council was held in November, 618, by St. Isidore, the archbishop, at the head of seven other bishops, against the Acephalists, who denied the two natures in one person. Various regulations, chiefly relating to the particular circumstances of their Church, were also drawn up. All the acts of the council are contained in thirteen chapters.

1. Theodulphus, bishop of Malaga, having complained of the conduct of the bishops of his neighborhood, who, during the confusion consequent upon the war, had appropriated to themselves much of his territory, it was ordered that all should be restored to him.

4. Forbids the ordination of clerks who had married widows, and declares such to be void.

5. Orders the deposition of a priest and two deacons, ordained under the following circumstances: The bishop, who labored under an affection of the eyes, had merely laid his hands upon them, while a priest pronounced the benediction.

7. Relates to the conduct of Agapius, bishop of Cordova, who, being little skilled in ecclesiastical discipline, had granted permission to certain priests to erect altars and consecrate churches in the absence of the bishop. The council forbids all such proceedings for the future.

10 and 11. Confirm the recent establishment of certain monasteries in the province of Betica, and forbid the bishops, under pain of excommunication, to take possession of their property; also allows monks to take charge of property appertaining to nunneries, upon condition that they dwell in distinct houses, and abstain from all familiar intercourse with the nuns.

13 and 14. Assert the doctrine of two natures in our Lord Jesus Christ united in one person.

See Mansi, v, 1663.

Sewafoll, in Norse mythology, was the dwelling-place of the beautiful and strong Sigrun. It is believed to be Mount Sæva, in West Gothland, Sweden.

Sewall, Joseph, D.D., a Congregational minister, was born at Boston, Aug. 15, 1688 (O. S.). He graduated at Harvard College in 1707, and was ordained Sept. 16, 1713, colleague pastor of the Old South Church, where he spent his life, having declined the presidency of Harvard College, which was urged upon him in 1724. In 1728 he accepted a fellowship and served until 1765, when he resigned, and died June 27, 1769. He was made D.D. by the University of Glasgow in 1781. Dr. Sewall's publications were, *The Holy Spirit Convincing the World of Sin, of Righteousness, and of Judgment*:—*Four Sermons* (1741):—and a large number of *Occasional Sermons*. See Sprague, *Annals of the Amer. Pulpit*, i, 278.

Sewall, Jotham, a Congregational minister, was born at York, Me., Jan. 1, 1760. Shortly after he attained his majority he migrated to the Kennebec and worked at his trade (mason). In 1783 his mind first took a permanent religious direction, and he found peace. He was licensed to preach May 8, 1798, and ordained as an evangelist June 18, 1800. For a short time he had charge of the Church in Chesterville, where he resided; but the greater part of his subsequent life was spent in missionary labor, chiefly in Maine. He labored till near the close of his life, preaching only three weeks before his death, which took place Oct. 3, 1850. He was a man of fervid, massive strength. See Sprague, *Annals of the Amer. Pulpit*, ii, 430.

Sewall, Samuel, chief-justice of the supreme court of Massachusetts, was born at Bishopstoke, England, March 28, 1652. His father established himself in the United States in 1661, when Samuel was nine years old. In his childhood the latter was under the instruction of Mr. Parker, of Newbury. He was graduated at Harvard College in 1671, and afterwards preached for a short time. In 1688 he went to England. He returned to the United States in 1689. In 1692 he was appointed in the new charter one of the council, in which station he continued till 1725. He was made one of the judges in 1692, and chief-justice of the superior court in 1718. Sharing in the then general belief in witchcraft, he concurred in its condemnation in 1692; but at a public fast, Jan. 14, 1697, he acknowledged his wrong. In 1699 he was chosen one of the commissioners of the society in England for the propagation of the Gospel in New England. He died Jan. 1, 1730. By his wife he received a large fortune, thirty thousand pounds, which he employed for the glory of God and the advantage of men. Eminent for piety, wisdom, and learning, in all the relations of life he exhibited the Christian virtues and secured universal respect. For a long course of years he was a member of the Old South Church and one of its greatest ornaments. Judge Sewall's writings are, *Answer to Queries respecting America* (1690):—*Prospects touching the Accomplishment of Prophecies* (Boston, 1713, 4to):—*Memorial relating to the Kennebec Indians* (1721, 4to):—*Phænomena quædam Apocalyptica ad Aspectum Novi Orbis Configurata* (2d ed. 1727, 4to).

Sewall, Thomas, D.D., a distinguished minister of the Methodist Episcopal Church, was born in Essex, Mass., April 28, 1818. He was educated at Wilbraham, and graduated from the Wesleyan University, Middletown, Conn., 1837. He united with the Baltimore Conference in 1838, but in 1841 was returned supernumerary, and spent a year in Europe and the East. He entered upon active work when he returned, but on account of ill-health located in 1848. He was readmitted in 1849 and given a superannuated relation, which he retained until 1853, when he resumed pastoral work. In 1866 he was transferred to New York East Conference and stationed in Brooklyn, and was retransferred in 1869, taking a supernumerary relation. He died Aug. 11, 1870. In 1860 Dr. Sewall was a delegate to the General Conference. He was a man of refined tastes and scholarly culture, a born orator, and a successful minister. See *Minutes of Annual Conferences*, 1871, p. 19.

Sewall, William (1), the historian of the Quakers, was the son of Jacob Williamson Sewall, and was born at Amsterdam in 1650. His grandfather left his native country, England, that, as a Brownist, he might enjoy more freedom in Holland. William Sewall lost both his parents in early life, but, having been instructed by them in the principles of the Quakers, he adhered to them during life. He was a student of unwearied application, attaining a knowledge of Greek, Latin, English, French, and High Dutch. He is chiefly noted for his *History of the People called Quakers*, written first in Low Dutch, and afterwards by himself in English. One principal object with the author was a desire to correct what he conceived to be gross misrepresentations in Gerard Croese's *History of Quakerism*. The work seems to have been first published in 1722, folio, and reprinted in 1725.

Sewall, William (2), an English clergyman, was born in the Isle of Wight about 1805. The son of a solicitor, he was educated at Harrow and Oxford, became fellow of Exeter College, and incumbent of Carisbrooke Castle chapel, Isle of Wight. He was public examiner in the university from 1836 to 1841, and in 1852 was appointed principal of St. Peter's College at Radley. He was a supporter of the tractarian movement. His published works are, *Horæ Philologicæ*:—*Conjectures*

on the Structure of the Greek Language (1830):—*Sacred Thoughts in Verse* (1831; 2d ed. 1842):—*Christian Vestiges of Creation* (1861):—besides *Sermons*, and tracts on Christian morals and politics, etc.

Sewell, William D., a Methodist Episcopal minister, was born in Chesterville, Me., July 15, 1813. He was converted in 1831, entered the itinerancy on Sidney Circuit September, 1836, under the presiding elder; admitted on trial in 1837, and served two years on Kilmarnock and Harmony circuits; was received into full connection in 1839, and appointed to Vassalborough Circuit, where he pursued his labors with great zeal and success until near the time of his death, which occurred April 24, 1840. He possessed a good and well-cultured mind. His attachment to the doctrines and institutions of the Church was strong and unwavering. See *Minutes of Conferences*, iii, 145.

Sexagesima, the Sunday which, in round numbers, is sixty days before Easter.

Sexes, SEPARATION OF, IN CHURCHES. The rules of the primitive churches required the separation of the sexes in the churches, and this was generally observed. The men occupied the *left* of the altar on the south side of the church, and the women the *right* on the north. They were separated from each other by a veil or lattice. In the Eastern churches the women and catechumens occupied the galleries above, while the men sat below. In some churches a separate apartment was also allotted to widows and virgins. See Coleman, *Christ. Antiq.* s. v.

Sext, a name given to the noonday service (q. v.) of the early Christian Church because it was held at the *sixth* hour.

Sexton, a corruption of *sacristan* (q. v.). This officer was anciently the attendant and waiter on the clergy. His duties at the present day in the Church of England is to keep the church, dig graves, provide the necessities for service—as for baptism and the Lord's supper—under the direction of the church-wardens. The office may be held by a woman, and the salary usually depends on the annual vote of the parishioners. In Scotland the sexton, whose duties are much the same as in England, is usually called the beadle, from the Saxon *bydde*, to cry, or to make proclamation. The appointment to office in the Established Church is with the heritors.

Sextry. See SACRISTY.

Sextus, a term, in the ancient canon law, to signify a collection of decretals made by pope Boniface VIII; thus called from the title, *Liber Sextus*, and being an addition to the five volumes of decretals collected by Gregory IX. The persons reputed to have been commissioned to draw it up were William de Mandegotte, archbishop of Ambrun; Berenger, bishop of Béziers; and Richard, bishop of Sienna.

Seymour, TRUMAN, a minister of the Methodist Episcopal Church, was born in Albany, N. Y., Jan. 25, 1799, and united with the Church there at the age of seventeen. In 1829 he joined the New York Conference, and was a member of this, and, later, of the Troy Conference, until his death, Nov. 15, 1874. See *Minutes of Annual Conferences*, 1875, p. 64.

Seys, JOHN, D.D., a minister of the Methodist Episcopal Church, was born in Santa Cruz Island, West Indies, March 30, 1799. In 1821 he joined the Wesleyan Church in the island of St. Eustatius. Notwithstanding much opposition from friends, he continued in this Church, and in 1825 was licensed a local preacher. He was ordained in 1829, and, coming to the United States, joined the Oneida Conference. In 1833 he was a missionary among the Oneida Indians, and in 1834 sailed for Liberia as superintendent of the Methodist Episcopal Church Missions in West Africa. He returned in 1841,

and in 1842 he was appointed to Wilkesbarre, Pa. The following year he went again to Liberia, from which he returned in 1845, when he resigned his connection with the mission and joined the New York Conference. In 1850 he became travelling agent of the Maryland Colonization Society, locating at Baltimore, where he remained six years. He was then appointed agent for the Colonization Society of Ohio, Indiana, and Illinois, and moved to Springfield, O. The same year he went to Africa and located a settlement, and from this time to 1870 was associated with Africa and the improvement of the colored race. He also acted as United States agent for recaptured slaves, and as United States consul and minister resident in Liberia. On his return to the United States, he became, by request, a member of the Cincinnati Conference. He died Feb. 9, 1872. See *Minutes of Annual Conferences, 1872*, p. 107.

Sforno, OBADIAH. See OBADIAH BEN-JACOB DE SFORNO.

Shaäl'ab'bin (Heb. *Shaalabbin'*, שַׁאֲלָבִין; but many MSS. *Shaalabbin'*, שַׁאֲלָבִין, *city of foxes*; Sept. Σαλαβιν v. r. Σαλαμειν; Vulg. *Selebin*), a town in the tribe of Dan (Josh. xix, 42, where it is named between Ir-shemesh and Ajalon); probably the same elsewhere (Judg. i, 35; 1 Kings iv, 9) called SHAALBIM (q. v.).

Shaäl'bim (Heb. *Shaalbim'*, שַׁאֲלָבִים, according to Furst=שַׁאֲלָבִים, *house* [i. e. place] of foxes; Sept. Σαλαβιν, Σαλαβειμ, v. r. Θαλαβειν, Βηθλαμει, and even αἱ ἀλώπεκες) "occurs in an ancient fragment of history inserted in Judg. i, enumerating the towns of which the original inhabitants of Canaan succeeded in keeping possession after the general conquest. Mount Heres, Ajalon, and Shaalbim were held against the Danites by the Amorites (ver. 35) till, the help of the great tribe of Ephraim being called in, they were at last compelled to succumb. It is mentioned with Ajalon again in Josh. xix, 42 (Shaalabbin), and with Beth-shemesh both there and in 1 Kings iv, 9, in the last passage as making up one of Solomon's commissariat districts. By Eusebius and Jerome it is mentioned in the *Onomasticon* (s. v. 'Selab') as a large village in the district of Sebaste (i. e. Samaria), and as then called *Selaba*. But this is not very intelligible, for, except in the statement of Josephus (*Ant.* v, 1, 22) that the allotment of the Danites extended as far north as Dor (Tantura), there is nothing to lead to the belief that any of their towns were at all near Samaria (see Schwarz, *Palest.* p. 140), while the persistent enumeration of Shaalbim with Ajalon and Beth-shemesh, the sites of both which are known with tolerable certainty as within a radius of fifteen miles west of Jerusalem, is strongly against it. It is also at variance with another notice of Jerome, in his commentary on Ezek. xlviii, 22, where he mentions the 'towers of Ailon and Selebi and Emaus-Nicopolis,' in connection with Joppa, as three landmarks of the tribe of Dan." Shaalbim may possibly be identified with the modern village *Beit Sira*, a village a little north of Yalo, on the south side of Wady Suleiman; or, perhaps (so Furst), rather with *Selbit*, a ruined village north of the wady (Robinson, *Researches*, 1852, iii, 144, notes). See SHAALBONITE.

Shaal'bonite (Heb. *Shaalboni'*, שַׁאֲלָבִי; Sept. Σαλαβωνιτης, v. r. Σαλαβωνι, Σωμει, and even Όμει; Vulg. *Salabonites, de Salboni*), an epithet of Eliabha (q. v.), one of David's thirty-seven chief heroes (2 Sam. xxiii, 32; 1 Chron. xi, 33); evidently as being a native of *Shaalbon*, a place otherwise unknown, unless identical with Shaalbim (q. v.).

Sha'aph (Heb. שַׁאֲפַי, Gesenius *division*, but Furst *union*; Sept. Σαγάφ, v. r. Σαγαιέ, Σέφ, Σαάφ), the name of two men.

1. Last named of six sons of Jahdai, of the tribe of Judah (1 Chron. ii, 47). B.C. prob. post 1612.

2. Third named of four sons of Maachah, concubine

of Caleb, of the tribe of Judah; he was the "father" (i. e. founder) of Madmannah (1 Chron. ii, 49). B.C. post 1612.

Shaära'im (Heb. *Shaara'yim*, שַׁאֲרָאִים, *two gates*; Sept. in Josh. Σακαρίμ, in Sam. αἱ πόλεις, in Chron. Σεωρεῖμ [v. r. Σαρίμ]; Vulg. *Saraim, Saarim*), a town in the "valley" or maritime plain of Judah (Josh. xv, 36, A. V. "Sharaim," where it is named between Azekah and Adithaim). Its occurrence among the cities of Simeon (1 Chron. iv, 31) is probably a clerical error for *Sharuh* (Josh. xix, 6). "It is mentioned again in the account of the rout which followed the fall of Goliath, where the wounded fell down on the road to Shaaraim and as far as Gath and Ekron (1 Sam. xvii, 52). These two notices are consistent with each other. Goliath probably fell in the Wady es-Sumt, on opposite sides of which stand the representatives of Socoh and Jarmuth; Gath was at or near Tell es-Safieh, a few miles west of Socoh at the mouth of the same wady; while Ekron (if 'Akir be Ekron) lies farther north. Shaaraim is probably therefore to be looked for somewhere west of Shuweikeh, on the lower slopes of the hills, where they subside into the great plain" (Smith). "The valley of Elah runs down among the hills for some distance, and then forks below Tell-Zakariah; one branch, or rather side valley, running to Gath (Tell es-Safieh), and the other to the plain of Ekron. Perhaps the town of Shaaraim may have been situated at the fork, and may have taken its name from the 'two passes' (see Porter, *Hand-book for Sin. and Pal.* p. 264)" (Kitto). It is probably identical with the *Ir-Tarain* of the Talmud (*Tosephthah, Ahaloth*, s. f.), for the Chaldee *tarain* has the same meaning, *gates* (Schwarz, *Palest.* p. 102). From the associated localities it must be sought in the vicinity of the modern *Shahmek*, a village with traces of ruins about two and a half miles south of Ekron (Van de Velde, *Memoir*, p. 114). Lieut. Conder at first proposed *Tell Zakariah* as a suitable position for Shaaraim (*Quar. Statement of "the Pal. Explor. Fund,"* 1875, p. 194), but M. Ganneau suggests the ruin *Sa'ireh* (*ibid.* p. 182), mentioned in Dr. Robinson's list (Append. to vol. iii, 1st ed. of *Researches*) between Shuweikeh and Beit-Netif, in which Lieut. Conder seems finally to coincide (*Tent Work in Pal.* ii, 339).

Shaash'gaz (Heb. *Shaashgaz'*, שַׁאשְׁגַּז, Persian, *servant of the beautiful*; Sept. Γατ), the appropriate name of a Persian eunuch, the keeper of the concubines in the court of Xerxes (Esth. ii, 14). B.C. cir. 525. See HEGAI.

Shabbath. See SABBATH; TALMUD.

Shab'bethai [many *Shabbeth'ai*, some *Shabbeth-a't*] (Heb. *Shabbethai'*, שַׁבְּתַי, *Sabbatical*, i. e. born on the Sabbath; Sept. Σαββαθαι v. r. Σαβαθαι and Καββαθαι; in Neh. viii, 7 Σαββαθαιοσ), one of the chief Levites, who was active in the reformation and restoration under Ezra and Nehemiah (Ezra x, 15; Neh. viii, 7; xi, 16). B.C. cir. 450.

Shablul. See SNAIL.

Shachal. See LION.

Shachaph. See CUCKOO.

Shachi'a [many *Schach'ia*] (Heb. *Shokyah'*, שְׂכִיָּה [so the margin], *accusation* [Gesenius] or *announcement* [Furst]; but the text has *Shokyah'*, שְׂכִיָּה, *captivity*; Sept. Σεβιά v. r. Σαβιά and Ζαβιά; Vulg. *Sechia*), the sixth named of the seven sons of Shaha-ram (q. v.), of the tribe of Benjamin, by his wife Hodesh (1 Chron. viii, 10). B.C. post 1612.

Shadanana, in Hindû mythology, is a surname of the god *Kartikeya*, signifying "the head with six faces."

Shad'dai (Heb. *Shadday'*, שַׁדְּדַי, in pause שִׁדְּדַי), an ancient name of God, rendered "Almighty" everywhere in the A. V. In all passages of Genesis except one (xlix,

25), in Exod. vi, 3, and in Ezek. x, 5, it is found in connection with אֱל, *él*, "God," El Shaddai being there rendered "God Almighty," or "the Almighty God." It occurs six times in Genesis (xvii, 1; xxviii, 3; xxxv, 11; xliii, 14; xlviii, 3; xlix, 25), once in Exodus (vi, 3), twice in Numbers (xxiv, 4, 16), twice in Ruth (i, 20, 21), thirty-one times in Job, twice in the Psalms (lxviii, 14 [15]; xcii, 1), once in Isaiah (xliii, 6), twice in Ezekiel (i, 24; x, 5), and once in Joel (i, 15). In Genesis and Exodus it is found in what are called the Elohist portions of those books, in Numbers in the Jehovistic portion, and throughout Job the name Shaddai stands in parallelism with Elohim, and never with Jehovah. By the name or in the character of El Shaddai, God was known to the patriarchs—to Abraham (Gen. xvii, 1), to Isaac (xxviii, 3), and to Jacob (xliii, 14; xlviii, 3; xlix, 25)—before the name Jehovah, in its full significance, was revealed (Exod. vi, 8). By this title he was known to the Midianite Balaam (Numb. xxiv, 4, 16), as God the Giver of Visions, the Most High (comp. Psa. xci, 1), and the identity of Jehovah and Shaddai, who dealt bitterly with her, was recognised by Naomi in her sorrow (Ruth i, 20, 21). Shaddai, the Almighty, is the God who chastens men (Job v, 17; vi, 4; xxiii, 16; xxvii, 2); the just God (viii, 3; xxxiv, 10), who hears prayer (viii, 5; xxii, 26; xxvii, 10); the God of power who cannot be resisted (xv, 25), who punishes the wicked (xxi, 20; xxvii, 13), and rewards and protects those who trust in him (xxii, 23, 25; xxix, 5); the God of providence (xxii, 17, 23; xxvii, 11) and of foreknowledge (xxiv, 1), who gives to men understanding (xxxii, 8) and life (xxxiii, 4): "excellent in power, and in judgment, and in plenty of justice," whom none can perfectly know (xi, 7; xxxvii, 23). The prevalent idea attaching to the name in all these passages is that of strength and power, and our translators have probably given to "Shaddai" its true meaning when they rendered it "Almighty."

In the Targum throughout, the Hebrew word is retained, as in the Peshito-Syriac of Genesis and Exodus, and of Ruth i, 20. The Sept. gives ἰκανός, *isxurós*, *Θεός, Κύριος, παντοκράτωρ, Κύριος παντοκράτωρ, ὁ τὰ πάντα ποιῶν* (Job viii, 3), *ἰσχυρόν* (Psa. lxviii, 14 [15]), *ὁ Θεὸς τοῦ οὐρανοῦ* (Psa. xci, 1), *σαδδὰι* (Ezek. x, 5), and *ταλαυπρία* (Joel i, 15). In Job xxix, 5 we find the strange rendering *ὕψωδος*. In Genesis and Exodus "El Shaddai" is translated *ὁ Θεός μου*, or *σου*, or *αὐτῶν*, as the case may be. The Vulgate has *omnipotens* in all cases except *Dominus* (Job v, 17; vi, 4, 14; Isa. xliii, 6), *Deus* (Job xxii, 3; xl, 2), *Deus celi* (Psa. xci, 1), *sublimis Deus* (Ezek. i, 24), *celestis* (Psa. lxviii, 14 [15]), *potens* (Joel i, 15), and *digne* (Job xxxvii, 23). The Veneto-Greek has *καταύς*. The Peshito-Syriac, in many passages, renders "Shaddai" simply "God," in others *chasiño*, "strong, powerful" (Job v, 17; vi, 4; etc.), and once *eloyo*, "Most High" (ver. 14). The Samaritan version of Gen. xvii, 1 has for "El Shaddai" "powerful, sufficient," though in the other passages of Genesis and Exodus it simply retains the Hebrew word; while in Numb. xxiv, 4, 16, the translator must have read אֶדֶה, *sádeh*, "a field," for he renders "the vision of Shaddai" "the vision of the field," i. e. the vision seen in the open plain. Aben-Ezra and Kimchi render it "powerful."

The derivations assigned to Shaddai are various. We may mention, only to reject, the Rabbinical etymology which connects it with שָׁדַי, *dai*, "sufficiency," given by Rashi (on Gen. xvii, 1), "I am he in whose Godhead there is sufficiency for the whole creation;" and in the Talmud (*Chagiga*, fol. 12, col. 1), "I am he who said to the world, Enough!" According to this, שָׁדַי = שֶׁדַּי = שֶׁדַּי, "He who is sufficient," "the all-sufficient One;" and so "He who is sufficient in himself," and therefore self-existent. This is the origin of the *ικανός* of the Sept., Theodore, and Hesychius, and of the Arabic *alkafi* of

Saadias, which has the same meaning. Gesenius (*Gram.* § 86, and *Jesaja xliii*, 6) regards שָׁדַי, *shaddai*, as the plural of majesty, from a singular noun, שָׁד, *shad*, root שָׁדַד, *shaddád*, of which the primary notion seems to be "to be strong" (*Fürst, Handwb.*). It is evident that this derivation was present to the mind of the prophet from the play of words in Isa. xliii, 6. Ewald (*Lehrb.* § 155 c, 5th ed.) takes it from a root שָׁדַד = שֶׁדַּד, and compares it with דָּבַי, *davvai*, from דָּוָה, *daváh*, the older termination "ד" being retained. He also refers to the proper names יִשָּׁהי, *Yishai* (Jesse), and בָּרְכָהי, *Barvai* (Neh. iii, 18). Rödiger (*Gesen. Thesaur.* s. v.) disputes Ewald's explanation, and proposes, as one less open to objection, that *Shaddai* originally signified "my powerful ones," and afterwards became the name of God Almighty, like the analogous form *Adonai*. In favor of this is the fact that it is never found with the definite article, but such would be equally the case if Shaddai were regarded as a proper name. On the whole there seems no reasonable objection to the view taken by Gesenius, which Lee also adopts (*Gram.* § 139, 6).

Shaddai is found as an element in the proper names Ammishaddai, Zurishaddai, and possibly also in Shedeur there may be a trace of it.

Shade, JACOB B., a minister of the German Reformed Church, was born in Montgomery County, Pa., April 25, 1817. He began his studies in Marshall College, Mercersburg, Pa., in May, 1839; and finished his theological studies in the seminary located in the same place. Full of zeal, he preached, while in the seminary, in destitute places among the mountains west of Mercersburg, and was the means of organizing several congregations. He was licensed and ordained in May, 1843, and continued his labors for a short time in the mountains where he had preached before. At the close of the same year he became colporteur in Berks County, Pa., for the American Tract Society, spending one year in that field. In 1844-45 he spent a year in the same work in Alabama. On his return his health had entirely failed, and he died Jan. 6, 1846. With ordinary natural abilities, he was possessed of extraordinary zeal and devotion to the work of Christ. He preached in German and English.

Shadford, GEORGE, a minister of the Methodist Episcopal Church, was born at Scotter, in Lindsley, Lincolnshire, England, Jan. 19, 1739. At the age of sixteen he received his first communion in the Established Church, and for a time was very serious and punctual in the discharge of religious duties; but he fell back into sin. He enlisted in the militia while still a youth, and became quite desperate in wickedness. He was hopefully converted May 5, 1762, and within two weeks became a member of the Methodist Society. In 1768 he united with the Conference, and was appointed to labor in the west of Cornwall. He was sent in the spring of 1773 to America; and labored for a month in New Jersey, four months in New York city, and four or five months in Philadelphia. He was stationed in 1776 in Virginia, and in 1777 at Baltimore. Not being willing to take the test-oath during the Revolutionary war, he returned in 1778 to Great Britain. There he resumed his labors, and continued them with unabated diligence and fidelity till disease and infirmity obliged him to retire. He died March 11, 1816. Mr. Shadford had a Christian character that was decidedly marked. He was a man of prayer, of Christian temper, and godly conversation. As a preacher he was not above mediocrity, and yet his labors were very successful. See Simpson, *Cyclop. of Methodism*, s. v.; Sprague, *Annals of the Amer. Pulpit*, vii, 34.

Shadow (צֶל, *tsél*, or צֶלֶל, *tsélel*; σκία, either simply or in composition), the privation of light by an object interposing between a luminary and the surface on which the shadow appears. The light of the sun may

be obscured; but "with the Father of light there is no parallax nor tropical shadow;" no interposing bodies can change his purposes or for a moment intercept and turn aside his truth, because he is equally present everywhere (James i, 17). A shadow falling on a plate follows the course of the body which causes it; and, as it is often extremely rapid, the fleetness of human life is often compared to it (1 Chron. xxix, 15; Job xiv, 2). Shadow is also used in the sense of darkness, gloom, "the shadow of death"—i. e. *death-shade*, a season of severe trial, heavy sorrow (Psa. xxiii), or depicting a state of ignorance and wretchedness (Matt. iv, 16; Luke i, 79). Hackett (*Illust. of Script.* p. 46 sq.) thinks that David's image of the valley of death's shadow may have been suggested by such wild, dreary ravines as the Wady Aly. Shadow is also used for covering and protection from the heat for repose, where the word *shade* would be preferable. The Messiah "is as the shade of a great rock in a weary land" (Isa. xxii, 2; xlix, 2; Sol. Song ii, 3; Psa. xvii, 8; lxxiii, 7; xci, 1) (comp. Hackett, *Illust. of Script.* p. 50 sq.). Shadow is used to indicate that the Jewish economy was an adumbration, or a shadowing-forth, of the things future and more perfect in the Christian dispensation (Heb. viii, 5; x, 1; Col. ii, 17). On the curative power of Peter's shadow (Acts v, 15), see Engelschall, *De Umbra Petri* (Lips. 1725); Krakewitz, *id.* (Rost. 1704).

Sha'drach (Heb. *Shadrak'*, שַׁדְרָךְ; Sept. Σαδράκ v. r. Σαδράχ; Vulg. *Sidrach*), the Chaldee name of Hananiah, the chief of the "three children" who were Daniel's companions (Dan. i, 7, etc.). His song, as given in the Apocryphal Daniel, forms part of the service of the Church of England, under the name of "Benedicite omnia opera." A long prayer in the furnace is also ascribed to him in the Sept. and Vulgate; but this is thought to be by a different hand from that which added the song. The history of Shadrach, or Hananiah, is briefly this. He was taken captive with Daniel, Mishael, and Azariah at the first invasion of Judah by Nebuchadnezzar, in the fourth, or, as Daniel (i, 1) reckons, in the third, year of Jehoiakim, at the time when the Jewish king himself was bound in fetters to be carried off to Babylon. B.C. 606. Being, with his three companions, apparently of royal birth (ver. 3), of superior understanding, and of goodly person, he was selected, with them, for the king's immediate service; and was for this end instructed in the language and in all the learning and wisdom of the Chaldeans as taught in the college of the magicians. Like Daniel, he avoided the pollution of the meat and wine which formed their daily provision at the king's cost, and obtained permission to live on pulse and water. When the time of his probation was over, he and his three companions, being found superior to all the other magicians, were advanced to stand before the king. When the decree for the slaughter of all the magicians went forth from Nebuchadnezzar, we find Shadrach uniting with his companions in prayer to God to reveal the dream to Daniel; and when, in answer to that prayer, Daniel had successfully interpreted the dream and been made ruler of the province of Babylon and head of the college of magicians, Shadrach was promoted to a high civil office. But the penalty of Oriental greatness, especially when combined with honesty and uprightness, soon had to be paid by him, on the accusation of certain envious Chaldeans. For refusing to worship the golden image he was cast with Meshach and Abed-nego into the burning furnace. But his faith stood firm; and his victory was complete when he came out of the furnace with his two companions unhurt, heard the king's testimony to the glory of God, and was "promoted in the province of Babylon." We hear no more of Shadrach, Meshach, and Abed-nego in the Old Test. after this; neither are they spoken of in the New Test. except in the pointed allusion to them in the Epistle to the Hebrews, as having "through faith quenched the violence of fire" (Heb. xi, 33, 34). But

there are repeated allusions to them in the later Apocryphal books, and the martyrs of the Maccabæan period seem to have been much encouraged by their example. See 1 Macc. ii, 59, 60; 3 Macc. vi, 6; 4 Macc. xiii, 9; xvi, 3, 21; xviii, 12. Ewald (*Geschichte*, iv, 557) observes, indeed, that next to the Pentateuch no book is so often referred to in these times, in proportion, as the book of Daniel. The apocryphal additions to Daniel contain, as usual, many supplementary particulars about the furnace, the angel, and Nebuchadnezzar, besides the introduction of the prayer of Shadrach and the hymn. Theodore Parker observes with truth, in opposition to Bertholdt, that these additions of the Alexandrine prove that the Hebrew was the original text, because they are obviously inserted to introduce a better connection into the narrative (Josephus, *Ant.* x, 10; Prideaux, *Connect.* i, 59, 60; Parker's *De Wette's Introd.* ii, 483-510; Grimm, on 1 Macc. ii, 60; Hitzig [who takes a thoroughly sceptical view], on Dan. iii; Ewald, iv, 106, 107, 557-559; Keil, *Einleit. Daniel*). See DANIEL.

As to the etymology, "this name is identified by some with *Hadrach*, חֲדָרַךְ (Zech. ix, 1), the name of a Syrian god who represents the seasons (חֲדָרַךְ = חֲדָר, 'to turn,' 'wind'). The interchange of ח with sibilants is not without parallel. Others profess to trace the name to a Babylonian source, and connect it with the Assyrian *Sadhiru* or *Sadru*, 'the great scribe' (שֹׁטֵר), with the non-Assyrian guttural termination, or with *sed* (comp. Sept. Σαδ-), the Assyrian equivalents of *mas* (comp. Meshech, and the analogy suggested by חֲנִיכִי), followed by the insertion of the *r* (frequent in Assyrian) before the guttural" (*Speaker's Commentary*). According to Bohlen, the name is Persian, and signifies *rejoicing in the way*; according to Benfey, it is Zend, meaning *royal*.

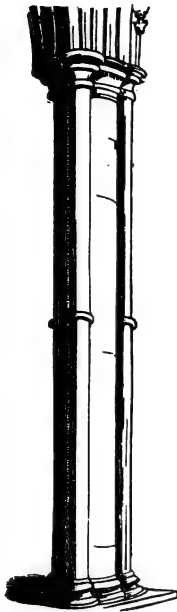

Shady-trees, in Job xl, 21, 22, is the rendering of the Hebrew *tselim*, צֵלִים (Sept. and Vulg. render at random), which perhaps means properly the *prickly lotus-bushes*. See TREE.

Shaffer, HIRAM M., a minister of the Methodist Episcopal Church, was born in Carroll County, O., in 1804, and graduated as a physician when but eighteen years of age. He afterwards studied law, and was admitted to the bar at Sidney. He joined the Church in 1831, was licensed to preach in 1832, and entered the Ohio Conference the same year. In this and the Central Ohio Conference he passed his ministerial life. He was several times elected delegate to the General Conference. He died near Richwood, O., Dec. 29, 1871. He published a work on *Infant Baptism* (N. Y. 1856, 12mo). See *Minutes of Annual Conferences*, 1872, p. 92.

Shaft appears in a few passages of the A. V. in two senses as the rendering of (a) שֵׁף, *chêts* (Isa. xlix, 2), an *arrow* (as often elsewhere); (b) יָרֵךְ, *garék*, properly a *thigh* (as often); hence the *shank* of the golden candelabrum in the Tabernacle, where the stem (שֵׁף) separated into the three feet (Exod. xxv, 31; xxxvii, 17; Numb. viii, 4). See CANDLESTICK.

SHAFT, the body of a column or pillar; the part between the capital and base. In Middle-Age architecture the term is particularly applied to the small columns which are clustered round pillars, or used in the *jamb*s of doors and windows, in arcades, and various other situations. They are sometimes cut on the same stones as the main body of the work to which they are attached, and sometimes of separate pieces. In the latter case they are very commonly of a different material from the rest of the work, and are not unfrequently polished: this mode of construction appears to have been first introduced towards the end of the Norman style. In Early Norman work they are circular, but later in the style they are occasionally octagonal, and are sometimes ornamented with zigzags, spiral mouldings, etc. In the

Early English style they are almost always circular, generally in separate stones from the other work to which they are attached, and very often banded; in some instances they have a narrow fillet running up them. In the Decorated style they are commonly not set separate, and are frequently so small as to be no more than vertical mouldings with capitals and bases; they are usually round and filleted, but are sometimes of other forms. In the Perpendicular style they are cut on the same stones with the rest of the work. They are most generally round, and are sometimes filleted; in some cases they are polygonal, with each side slightly hollowed. The part of a chimney-stack between the base and cornice is called the shaft.

Salisbury Cathedral, cir. 1250.

Shaftesbury, ANTHONY

ASHLEY COOPER, the third earl of, was born in London, Feb. 26, 1671. He was educated under the supervision of Locke, entered Parliament in 1693, from which he withdrew on account of delicate health, and took up his residence in Holland in 1698 or 1699. He entered the House of Lords in 1700, supporting the measures of William III, and retiring upon the king's death. He was noted as a philanthropist, was stigmatized as a freethinker, and wrote a *Letter on Enthusiasm* (1708) in defence of the rights of the French Prophets:—*The Moralists* (1709), a philosophical rhapsody:—*Sensus Communis* (1710):—*A Soliloquy, or Advice to an Author* (1710). He died at Naples, Feb. 5, 1713. His principal work, *Characteristics of Men, Matters, Opinions, and Times*, was posthumously published (1713–23, 3 vols.).

Sha'gè (Heb. *Shage'*, שָׁגַע, *erring*; Sept. Σαγή v. r. Σωλά), a "Hararite," appears as the father of Jonathan, one of David's captains (1 Chron. xi, 34). B.C. cir. 1050. In the parallel list of 2 Sam. xxiii, 33, he is called SHAMMAH (q. v.), unless, as seems probable, there is a confusion between Jonathan the son of "Shage the Hararite," Jonathan the son of Shammah, David's brother, and "Shammah the son of Agee the Hararite."

Shahar. See ALJELETH-SHAHAR.

Shahara'im (Heb. *Shachara'yim*, שַׁחֲרָיִם, *double dawn*, i. e. the morning and evening twilight; Sept. Σααρήμ v. r. Σααρίν and Σααρήλ; Vulg. *Saharaim*), a person named among the descendants of Benjamin as the father of several children in the land of Moab by two wives (1 Chron. viii, 8). B.C. ante 1612. Considerable confusion appears to have crept into the text where this name occurs (ver. 3–11), which may perhaps be removed by transposition of the middle clause of ver. 8 and the whole of ver. 6 after ver. 7, and rendering as follows: "And there were sons (born) to Bela, Addar, and Gera, and Abihud, and Abishua, and Naaman, and Achoach [or Achiah], and Gera [repeated by error], and Shephuphan [spuriously inserted], and Huram [spuriously inserted likewise from the sons of Becher]; and (their father) himself banished Naaman, and Achiah [or Achoach], and Gera; and after his dismissal of them, he begot Uzza and Achichud. And these are the descendants of Echud [i. e. Achiah, otherwise Acharah], chiefs of the progenitors of the inhabitants of Geba [afterwards] exiled to Manachath: Shacharayim begot (children) in the land of Moab of his two wives Hushim and Baara [or Chodesh]—namely, of the latter, Yobah, and Tsibya, and

IX.—Q q

Meysa, and Malkam, and Yeuts, and Shobyā [v. r. Shokyah], and Mirmah, chieftains of their lineage; and of the other, Abitub and Elpaal." See JACOB.

Shahaz'imah [some *Shahazi'mah*] (Heb. *Shachats'imah*, שַׁחֲצִימָה [so the marg., but the text has *Shachatzu'mah*, שַׁחֲצִימָה], *towards the heights* [for the word is plur. with the ה local added]; Sept. Σαλειμ κατὰ θάλασσαν [taking the last syllable for סָהַר, *to the sea*], v. r. Σασιμά; Vulg. *Seesima*), a place in the tribe of Issachar, between Mount Tabor and the Jordan (Josh. xix, 22). A trace of the name may yet remain in the village of *Sirin*, north of Wady Sherar, near where it joins Wady Bireh, south-east of Tabor.

Shaked. See ALMOND.

Shakers, the popular name of an American communistic sect who call themselves "The United Society of Believers in Christ's Second Appearing."

I. *History.*—The Shakers arose as a distinct body in the first half of the 18th century, but are accustomed to trace their origin back to the Camisards (q. v.), or French Prophets. Three of their number went to England about 1705 and propagated the prophetic spirit so rapidly that in the course of the year there were two hundred or three hundred of these prophets in and about London. The great subject of prediction was the near approach of God's kingdom and the millennial state. In 1747 James Wardley, originally a Quaker, headed a party who had no established creed or particular mode of worship and professed to be governed as the spirit of God should dictate. In 1757 Ann Lee (Mrs. Standley) adopted Wardley's views, joined the society, and became its head, the society adopting its distinguishing name of Shakers. "The work," they said, "which God promised to accomplish in the latter day was eminently marked out by the prophets to be a work of shaking." From this time till 1770 Ann Lee professed to have received by special manifestation of divine light those revelations in virtue of which her followers have ever since called her Mother Lee, and have regarded her as the equal of Jesus Christ, head of all women, as he was head of all men. She lived apart from her husband from that time, and he took another wife. See LEE, ANN.

In 1774, obeying what she believed to be a divine command, Ann Lee sailed from Liverpool and came to the United States. Their first settlement was in the town of Watervliet, N. Y., seven miles from Albany, where they remained in retirement till the spring of 1780. In 1779 a religious revival took place, chiefly among the Baptists, at New Lebanon, Columbia Co., N. Y., accompanied by remarkable physical manifestations, and in the spring of 1780 some of those most affected visited mother Lee, and there, as they believed, found a key to their experiences. Mother Lee travelled from place to place preaching and advising; in Massachusetts she appears to have remained two years, and, it is asserted, performed miracles in several places. Mother Lee died in 1784, having already broached the idea of community of property, and having formed her little family into a model for Shaker organizations. Mother Ann was succeeded in her rule over the society by elder James Whittaker, who had come from England with her. He was called Father James, and under his ministry was erected (1785) "the first house for public worship ever built by the society." He died in July, 1787. In the same year Joseph Meachem, formerly a Baptist preacher and a convert of mother Lee, collected her followers in a settlement in New Lebanon, which still remains as a common centre of union. In the course of five years, under the administration of Meachem, eleven Shaker settlements were founded—viz. at New Lebanon and Watervliet, N. Y.; at Hancock, Tyringham, Harvard, and Shirley, Mass.; at Enfield, Conn.; at Canterbury and Enfield, N. H.; and at Alfred and New Gloucester, Me. There were no other

societies formed till 1805, when three missionaries from New Lebanon established the following: Union Village, Watervliet, White Water, and North Union in Ohio; and Pleasant Hill and South Union in Kentucky. They number from six thousand to eight thousand souls.

II. *Theological Doctrines.*—The Shakers hold: 1. That God has given to man four revelations. "They believe that the *first* light of salvation was given or made known to the patriarchs by promise; and that these believed in the promise of Christ, and were obedient to the command of God made known unto them as the people of God; and were accepted by him as righteous or perfect in their generation, according to the measure of light and truth manifested unto them; which were as waters to the *ankles*, signified by Ezekiel's vision of the holy waters (ch. xlvii). The *second* light of dispensation was the law that was given of God to Israel by the hand of Moses, which was a further manifestation of that salvation, as water to the *knees* (ver. 4). The *third* light of dispensation was the gospel of Christ's first appearance in the flesh, which was as water to the *loins* (ver. 4). The *fourth* light of dispensation is the second appearance of Christ, or final and last display of God's grace to a lost world, in which the mystery of God will be finished and a decisive work accomplished, to the final salvation or damnation of all the children of men; which, according to the prophecies, rightly calculated and truly understood, began in the year of our Saviour 1747." In the first revelation God was only known as a Great Spirit. In the second, or Jewish, period he was revealed as the Jehovah, he, she, or a dual being, male and female. In the third cycle God was made known as the Father; and in the last cycle, commencing with 1770, God is revealed as an Eternal Mother, the bearing spirit of the creation of God. Christ they also believe to be dual, male and female, a supermundane being, making in his first appearance a revelation to Jesus, a divinely instructed and perfect man, and who by virtue of his anointing became Jesus Christ.

2. The new revelation teaches the doctrines of the soul's immortality and its resurrection, which they believe to be the quickening of the germ of a new and spiritual life, denying a bodily resurrection. Those who marry and indulge in the earthly procreative relation they term "the children of this world." They do not condemn them, but believe themselves called to lead

spiritual and holy lives, free from lust and carnal indulgence, and therefore refrain from marriage. Thus, like the Egyptian hermits in the 3d century, they place holiness in a life of celibacy. They hold that Christ revealed to Jesus the doctrines of non-resistance and non-participation in any earthly government.

3. The second appearing of Christ the Shakers believe to have taken place through mother Ann Lee in 1770, who, by strictly obeying the light in her, became righteous even as Jesus was righteous. The necessity for this appearing of Christ in the female form resulted from the dual nature of Christ and of deity. This second appearing of Christ is the true resurrection state, and a physical resurrection is to be repudiated as repugnant to science, reason, and Scripture.

4. The Shakers assign to each revelation or cycle its heavens and hells. The first revelation was to the antediluvians, and its heaven and hell were for the good and bad among them; the wicked of that cycle being "the spirits in prison" (1 Pet. iii, 19). To the second hell, Gehenna, they consign the Jews and heathen who died before the coming of Jesus; the second heaven being Paradise, which was promised to the thief on the cross. The third dispensation is that of the Church of the first appearing of Christ, and to its heaven Paul was caught up. The fourth heaven is now forming; in it Jesus and mother Ann reside, and to it all will go who have resisted temptation until all their evil propensities and lusts are destroyed. It is the heaven of heavens, and to it will be gathered all who accept the doctrines of the Shakers here, and all in the lower hells and heavens who shall yet accept them.

5. They hold to oral confession of sin as necessary to receive power to overcome it. They also believe in the power of some of their members to heal diseases by prayer and dietetics. They believe themselves to be under the immediate guidance of the Holy Spirit, and maintain that it is unlawful to take oaths, to use compliments, or to play at games of chance.

6. The Shakers are spiritualists in a practical sense. They hold Swedenborg to be the angel of spiritualism mentioned in Rev. xviii, and regard the spiritualistic movement as a preparation of the people to receive their doctrines. For a study of their peculiar views we refer the reader to *A Selection of Hymns*, etc. (Watervliet, O., 1833); *Millennial Hymns* (Canterbury, N. H. 1847); *Fifteen Years in the Senior Order of Shakers*

Shaker Worship—the Dance.

Shaker Costumes.

A Holy, Sacred, and Divine Roll and Book, etc. (1843); *The Divine Book of Holy and Eternal Wisdom* (Canterbury, N. H., 1849).

III. *Worship*.—In their mode of worship they are remarkable for their habit of dancing to express the joy they have in the Lord. They enter their house of worship and kneel in silent prayer, then rise and form in regular columns, the men on one side and the women on the other. Several men and women then commence a tune, while every other person dances, keeping time admirably for at least half an hour. The hymns or "spiritual songs" which they sing are believed by the Shakers to be brought to them, almost without exception, from the "spirit-land;" also the airs to which these songs are sung. When dancing is over, the seats are placed and an exhortation begins, then, rising, they sing a hymn, another exhortation follows, and the meeting concludes. They neither practice baptism nor observe the Lord's supper, holding that these ceased with the apostolic age. They hold general fasts, and have no order of persons regularly educated for the ministry.

IV. *Temporalities*.—The Shakers have a ministry composed of two brethren and two sisters, who have the oversight of from one to four societies; also each family in every society has four elders, two brethren and two sisters, who have charge of the family. There are three classes of members: (1.) Novitiates: those who accept the doctrines of the society, but do not enter into temporal connection with it, remaining with their own families and controlling their own property. (2.) Juniors: those who become members of the community and unite in labor and worship, but who have not surrendered their property to the society, or, if so, only conditionally, and with the privilege of receiving it back, though without interest. (3.) Seniors. those who, after a satisfactory probation, enter into a contract to consecrate themselves, their services, and their property to the society, never to be reclaimed by them or their legal heirs. Before joining the society the candidate must pay all debts, discharge all bonds and trusts, renounce all contracts, and, in short, separate honorably from the world. The Shakers are republican in their ideas of government, never vote nor accept office from the government. They are orderly, temperate, and frugal, cultivating the soil with great success, and also engaging in other branches of trade. They have published since 1870 the *Shaker and Shakeress*, a monthly, edited by F. W. Evans and Antoinette Doolittle (Mount Lebanon, N. Y.). See Burder, *Hist. of Religions*; Gard-

ner, *Faiths of the World*; *Harper's Magazine*, xv, 146 sq.; Marsden, *Dict. of Churches*; Nordhoff, *Communist Societies of the United States* (N. Y. 1875), p. 117 sq.

Shakli, in Hindû mythology, is the consort of Siva, whom he loved so greatly that despair led him to pull out one of his hairs on the occasion of her death. Her father had offended Siva, and she resented the insult to such an extent that she laid aside the body she had received from him, and was born again as Parvati.

Shakra, in Hindû mythology, is Vishnu's celebrated weapon—a circular plate endowed with reason, inflicting mortal wounds and returning to the god after performing its mission of punishment. The inhabitants of the mountainous sections of Northern India still use a similar weapon, which becomes terrible in their hands. It is a plate of hardened steel, two lines thick in the centre and keen-edged about the circumference. It may be thrown a distance of two hundred feet, and will penetrate the most approved armor.

Shaktus, a principal Hindû sect, the worshippers of Bhuguvatee, or the goddess Dûrga. They are chiefly Brahmins, but have their peculiar rites, marks on their bodies, formulas, priests, and festivals. They reject animal food, but sometimes partake of spirituous liquors presented to their goddess. None of them become mendicants. See Ward, *History of the Hindoos*.

Shalak. See CORMORANT.

Shalal. See MAHER-SHALAL-HASH-BAZ.

Sha'lem (Heb. *Shalem*, שָׁלֵם, *safe*; Samar. שָׁלֵם; Sept. Σαλήμ, Vulg. *Salem*) appears in the A. V. as the name of a place near Shechem, to which Jacob came on his return from Mesopotamia (Gen. xxxiii, 18). It seems more than probable, however, that this word should not here be taken as a proper name, but that the sentence should be rendered "Jacob came safe to the city of Shechem" (יָבֹא רַעְבָּן שָׁלֵם עִיר שֶׁכֶם). Our translators have followed the Sept., Peshito-Syriac, and Vulg. among ancient, and Luther's among modern, versions, in all of which Shalem is treated as a proper name, and considered as a town dependent on or related to Shechem. And it is certainly remarkable that there should be a modern village bearing the name of *Salim* in a position to a certain degree consistent with the requirements of the narrative when so interpreted, viz. three miles east of Nablûs (the ancient Shechem), and therefore between it and the Jordan valley, where the preceding verse (ver. 17) leaves Jacob settled (Robinson, *Bib. Res.* ii, 279;

Wilson, *Bible Lands*, ii, 72; Van de Velde, *Syr. and Pal.*, ii, 302, 334; Schwarz, *Palest.* p. 151). But there are several considerations which weigh very much against this being more than a fortuitous coincidence. See JACOB.

1. If Shalem were the city in front of which Jacob pitched his tent, then it certainly was the scene of the events of ch. xxxiv; and the well of Jacob and the tomb of Joseph must be removed from the situation in which tradition has so appropriately placed them to some spot farther eastward and nearer to Salm. Eusebius and Jerome felt this, and they accordingly make Sychem and Salem one and the same (*Onomast.* under both these heads). See SYCHEM.

2. Though east of Nablûs, Salm does not appear to lie near any actual line of communication between it and the Jordan valley. The road from Sakût to Nablûs would be either by Wady Maleh, through Teyasir, Tubas, and the Wady Bidân, or by Kerawa, Yanûn, and Beit-Furk. The former passes two miles to the north, the latter two miles to the south, of Salm, but neither approaches it in the direct way which the narrative of Gen. xxxiii, 18 seems to denote that Jacob's route did. But see Tristram, *Land of Israel*, p. 146. See SHECHEM.

3. With the exceptions already named, the unanimous voice of translators and scholars is in favor of treating *shalem* as a mere appellative. Among the ancients, Josephus (by his silence, *Ant.* i, 21), the Targums of Onkelos and Pseudo-Jonathan, the Samaritan Codex, the Arabic Version; among the moderns, the Veneto-Greek Version, Rashi, Junius and Tremellius, Meyer (*Annot. on Seder Olam*), Ainsworth, Reland (*Palest.* and *Dissert. Misc.*), Schumann, Rosenmüller, J. D. Michaelis (*Bibel für Ungelehrte*), Tuch, Baumgarten, Gesenius (*Thesaur.* p. 1422), Zunz (24 *Bücher*, and *Handwb.*), De Wette, Luzzatto, Knobel, Kalisch, Keil, Lange, Philippon—all these take *shalem* to mean "safe and sound," and the city before which Jacob pitched to be the city of Shechem.—Smith. This view is also confirmed by the evident allusion in this term to the fulfilment of the condition of Jacob's vow (Gen. xxviii, 21). Hitzig (*on Jer.* xli, 5) would make Shalem the name of the tower of Shechem (*Judge.* ix, 46). Comp. Hackett, *Illustrations of Script.* p. 193 sq. See PEACE.

4. This question is somewhat complicated with the position of the Shalim of the New Test. (John iii, 21); but the two places are not necessarily the same. See SALIM.

Sha'lim (Heb. *Sha'lim*, שְׁאֵלִים, region of foxes; Sept. Σααλίμ, v. r. Σααλείμ, Ἐσακίμ), a region (שְׁאֵלִים, "land") through which Saul, the son of Kish, went in search of his father's asses (1 Sam. ix, 4). It is identified by Schwarz (*Palest.* p. 155) with *Shual*, near Ophrah (1 Sam. xiii, 17). "It appears to have lain between the 'land of Shalisha' and the 'land of Yemini' (probably, but by no means certainly, that of Benjamin). In the uncertainty which attends the route—its starting-point and termination no less than its whole course—it is very difficult to hazard any conjecture on the position of Shalim. The spelling of the name in the original shows that it had no connection with Shalem or with the modern Salm east of Nablûs (though between these two there is probably nothing in common except the name). It is more possibly identical with the 'land of Shual' (q. v.), the situation of which appears, from some circumstances attending its mention, to be almost necessarily fixed in the neighborhood of Taiyibeh, i. e. nearly six miles north of Michmash, and about nine from Gibeah of Saul." See RAMAH.

Shal'isha [some *Shali'sha*] (Heb. *Shalishah*, שְׁלִישָׁה, perhaps triangle; Sept. Σαλίσσα v. r. Σελχά), a district (שְׁלִישָׁה, "land") traversed by Saul when in search of the asses of Kish (1 Sam. ix, 4). It apparently lay between "Mount Ephraim" and the "land of Shaa-lim," a specification which, with all its evident preciseness, is irrecongnisable, because the extent of Mount

Ephraim is so uncertain; and Shaalim, though probably near Taiyibeh, is not yet definitely fixed there. The difficulty is increased by locating Shalisha at *Sâris* or *Khirbet Sâris*, a village a few miles west of Jerusalem. south of Abu Gosh (Tobler, *Dritte Wand*, p. 178), which some have proposed. If the land of Shalisha contained, as it not impossibly did, the place called Baal-shalisha (2 Kings iv, 42), which, according to the testimony of Eusebius and Jerome (*Onom.* s. v. "Beth Salisha"), lay fifteen Roman (or twelve English) miles north of Lydd, then the whole disposition of Saul's route would be changed. The words *Eglath Shalishiyah* in Jer. xlviii, 34 (A. V. "a heifer of three years old") are by some translators rendered as if denoting a place named Shalisha. But even if this be correct, it is obvious that the Shalisha of the prophet was on the coast of the Dead Sea, and therefore by no means appropriate for that of Saul. Lieut. Conder proposes (*Tent Work in Palest.* ii, 339) to identify Shalisha with *Kefr Thilth*, a ruined village on the western slope of Mount Ephraim, situated on the south side of Wady Azzun, which runs into the river Kanah (Robinson, *Later Researches*, p. 136, note); but there is nothing special to recommend the site except a considerable correspondence in the names. See RAMAH.

Shal'lecheth [some *Shalle'cheth*] (Heb. *Shalle'keth*, שְׁלַלְכֶּת, overthrow; Sept. παροφθόριον), the name of a gate on the west of Solomon's temple, which fell to the lot of the porters Shuppim and Hosah (1 Chron. xxvi, 16). As it led to Mount Zion by the "causeway" (later the bridge), it probably was that called *Kippinos* (Caponius) in the Talmud (*Middoth*, i, 3). It is probably also identical with the gate *Sur* (2 Kings xi, 6) or that of the "Foundation" (2 Chron. xxiii, 5). If, however, the causeway be the same as that by which the water is now conveyed to the Haram, the gate in question may have been at the present *Bab Silsileh*, much farther north. See TEMPLE.

Shal'lum (Heb. *Shallum*, שְׁלֹמ, retribution; Sept. usually Σελλούμ), the name of at least twelve Hebrews.

1. The youngest son of Naphtali (1 Chron. vii, 13), called also SHULEM (Gen. xlv, 24). B.C. 1874.

2. The third in descent from Simeon, son of Shaul and father of Mibsam (1 Chron. iv, 25). B.C. ante 1618.

3. Son of Sisamai and father of Jekamiah, of the house of Sheshan and tribe of Judah (1 Chron. ii, 40, 41). B.C. post 1300.

4. Son of Kore, and chief of the porters of the sanctuary in David's time (1 Chron. ix, 17 sq., 31). B.C. cir. 1050. He seems to be the same Shallum whose descendants returned from captivity (Ezra ii, 42; x, 24; Neh. vii, 45). He is apparently elsewhere called *Meshullum* (xii, 25), *Meshelemiah* (1 Chron. xxvi, 1), and *Shelmiah* (ver. 14). He was perhaps also the same with the "father" of Maaseiah in Jer. xxxv, 4.

5. Son of Zadok and father of Hilkiah, a high-priest (1 Chron. vi, 12, 13; ix, 11), and an ancestor of Ezra the scribe (Ezra vii, 2). B.C. post 950. He is called *Sol-lumus* by Josephus (Σάλλουμος, *Ant.* x, 8, 6). He is the Meshullam of 1 Chron. ix, 11; Neh. xi, 11. See HIGH-PRIEST.

6. The sixteenth king of Israel. His father's name was Jabesh. In the troubled times which followed the death of Jeroboam II (B.C. 781), the latter's son Zechariah was slain in the presence of the people by Shallum (B.C. 769), who by this act extinguished the dynasty of Jehu, as was predicted (2 Kings x, 30). See JEHU; ZECHARIAH. Shallum then mounted the throne, but occupied it only one month, being opposed and slain by Menahem, who ascended the throne thus vacated (xv, 10-15). See ISRAEL, KINGDOM OF.

7. The father of Jehizkiah, which latter was one of the leading Ephraimites in the time of Ahaz and Pekah (2 Chron. xxviii, 12). B.C. ante 740.

8. The son of Tikvah and husband of the prophetess

Huldah (2 Kings xxii, 14). B.C. cir. 680. He appears to have been the custodian of the sacerdotal wardrobe (2 Chron. xxxiv, 22). He was probably the same with Jeremiah's uncle (Jer. xxxii, 7).

9. King of Judah, son of Josiah (Jer. xxii, 11), better known as Jehoahaz II (q. v.). Hengstenberg (*Christology of the Old Test.* ii, 400, Eng. transl.) regards the name as symbolical, "the recompensed one," and given to Jehoahaz in token of his fate, as one whom God recompensed according to his deserts. This would be plausible enough if it were only found in the prophecy; but a genealogical table is the last place where we should expect to find a symbolical name, and Shallum is more probably the original name of the king, which was changed to Jehoahaz when he came to the crown. Upon a comparison of the ages of Jehoikim, Jehoahaz or Shallum, and Zedekiah, it is evident that of the two last Zedekiah must have been the younger, and therefore that Shallum was the *third*, not the *fourth*, son of Josiah, as stated in 1 Chron. iii, 15.

10. A priest of the descendants of Bani, who had taken a strange (i. e. idolatrous) wife, and was compelled by Ezra to put her away (Ezra x, 42). B.C. 457.

11. One of the Levitical porters who did the same (Ezra x, 24). B.C. 457.

12. Son of Halohesh and "ruler of the half part of Jerusalem," who, with his daughters, aided in building the walls (Neh. iii, 12). B.C. 445.

Shal'lun (Heb. *Shallun'*, שַׁלְלֹן, another form of *Shallum*, retribution; Sept. Σαλωμών), son of Col-hozeh, and ruler of a district of the Mizpah; he assisted Nehemiah in repairing the spring gate and "the wall of the pool of Has-shelach" (A.V. "Siloah") belonging to the king's garden, "even up to the stairs that go down from the city of David" (Neh. iii, 15). B.C. 445.

Shal'mai (Heb. margin in Ezra *Shalmcy'*, שַׁלְמַי, *my thanks*; text *Shumlay'*, שַׁמְלַי; Sept. Σαλαμί; in Neh. *Salmai'*, שַׁלְמַי, *my garments*; Sept. Σελμεί), one of the head Nethinim whose descendants returned with Zerubbabel from Babylon (Ezra ii, 46; Neh. vii, 48). B.C. ante 536.

Shal'man (Heb. *Shalman'*, שַׁלְמָן, perhaps Persian, *fire-worshipper*; Sept. Σαλαμάν; Vulg. *Salmana*), a name occurring but once (Hos. x, 14, "as Shalman spoiled Beth-arbel in the day of battle"). It appears to be an abbreviated form of Shalmaneser (q. v.). Ewald, however, speaks of Shalman as an unknown king, but probably the predecessor of Pul (*Die Propheten*, i, 157; see Simson, *Der Prophet Hosea*, p. 287). The Sept. reading בִּשְׁמָן בִּשְׁמָן, "as he spoiled," renders ὡς ἀρχων, and the Vulgate, confounding Shalman with the Zalmunnah of Judges (ch. viii), gives, from another misreading, *a domo ejus qui judicavit Bual*, so that Newcome ventures to translate "Like the destruction of Zalmunnah by the band of Jerubbaal" (Gideon). Indeed, the Vatican edition of the Sept. has ἐκ τοῦ οἴκου τοῦ Ἱεροβοάμ, and the Alexandrian has ἐκ τοῦ οἴκου Ἱεροβάαλ—misreadings of the word Beth-arbel. The Targum of Jonathan and Peshito-Syriac both give "Shalma;" the former for בֵּית אֶרְבֵּל reading בֵּית אֶרְבֵּל, "by an ambush," the latter בֵּית אֶל, "Beth-el." The Chaldee translator seems to have caught only the first letters of the word "Arbel," while the Syrian only saw the last two. The Targum possibly regards "Shalman" as an appellative, "the peaceable," following in this the traditional interpretation of the verse recorded by Rashi, whose note is as follows: "As spoilers that come upon a people dwelling in peace, suddenly by means of an ambush, who have not been warned against them to flee before them, and destroy all." See BETH-ARBEL.

Shalmane'ser (Heb. *id.* שַׁלְמַנֶּסֶר, signif. uncertain [according to Von Bohlen, *fire-worshipper*, with which Gesenius agrees]; on the monuments *Salman-uzzur*, or *Salman-user*; Sept. Σαλμανασάρ, but in

Tobit *Ἐνεμίσσαρος* by some error; Josephus, Σαλμανασάρης; Vulg. *Salmanassar*) was the Assyrian king who reigned immediately before Sargon, and probably immediately after Tiglath-pileser. He was the fourth Assyrian monarch of the same name (Rawlinson, *Ancient Monarchies*, ii, 135 sq.). Very little is known of him, since Sargon, his successor, who was of a different family, and most likely a rebel against his authority, seems to have destroyed his monuments. He was contemporary with So of Egypt (2 Kings xvii, 4). He can scarcely have ascended the throne earlier than B.C. 730, and may possibly not have done so till a few years later. See TIGLATH-PILESER. It must have been soon after his accession that he led the forces of Assyria into Palestine, where Hoshea, the last king of Israel, had revolted against his authority (ver. 3). No sooner had he come than Hoshea submitted, acknowledged himself a "servant" of the great king, and consented to pay him a fixed tribute annually. Shalmaneser upon this returned home; but soon afterwards he "found conspiracy in Hoshea," who had concluded an alliance with the king of Egypt, and withheld his tribute in consequence. In B.C. 728 Shalmaneser invaded Palestine for the second time, and, as Hoshea refused to submit, laid siege to Samaria. The siege lasted to the third year (B.C. 720), when the Assyrian arms prevailed; Samaria fell; Hoshea was taken captive and shut up in prison, and the bulk of the Samaritans were transported from their own country to Upper Mesopotamia (ver. 4-6; xviii, 9-11). It is uncertain whether Shalmaneser conducted the siege to its close, or whether he did not lose his crown to Sargon before the city was taken. Sargon claims the capture as his own exploit in his first year; and Scripture, it will be found, avoids saying that Shalmaneser took the place. In xvii, 6, the expression is simply "the king of Assyria took it." In xviii, 9, 10, we find, still more remarkably, "Shalmaneser, king of Assyria, came up against Samaria and besieged it; and at the end of three years they took it." Perhaps Shalmaneser died before Samaria, or perhaps, hearing of Sargon's revolt, he left his troops, or a part of them, to continue the siege, and returned to Assyria, where he was defeated and deposed (or murdered) by his enemy. According to Josephus, who professes to follow the Phœnician history of Menander of Ephesus, Shalmaneser engaged in an important war with Phœnicia in defence of Cyprus (*Ant.* ix, 14, 2). It is possible that he may have done so, though we have no other evidence of the fact; but it is perhaps more probable that Josephus or Menander made some confusion between him and Sargon, who certainly warred with Phœnicia and set up a memorial in Cyprus. Ewald (*Isr. Gesch.* iii, 315) supposes these events to have preceded even Hoshea's alliance with Egypt, but this is improbable (Knobel, *Jesa*, p. 139 sq.). According to Layard (*Nineveh and Babylon*, p. 48), he was perhaps the same with Sargon, but this is doubtful. It may yet turn out, however, that he was only a deputy or viceroy, and in that case the discrepancies in this part of the history will receive a ready solution. See SARGON.

Sha'ma (Heb. *Shama'*, שָׁמָא, *obedient*; Sept. Σαμμά v. r. Σαμμαθά), the first named of two sons of Hothan, who were valiant captains in the body-guard of David (1 Chron. xi, 44). B.C. cir. 1020. See DAVID.

Shamana, in Hindû mythology, is the surname of the god of the underworld, signifying "the stream of hell."

Shamanism (a corruption of Sanscr. *çramana*) is the ancient religion of the Tartar, and of some of the other Asiatic tribes, and is one of the earliest phases of religious life. It is a belief in sorcery, and a propitiation of evil dæmons by sacrifices and frantic gestures. The adherents of this religion acknowledge the existence of a supreme God, but do not offer him any worship. Indeed, they worship gods of no description, but only dæmons, whom they suppose to be cruel, revengeful,

and capricious, and who are worshipped by bloody sacrifices and wild dances. The Shamanists have no regular priesthood. The priests, or magicians, are men or women, married or single, and affect to understand the secret of controlling the actions of evil spirits. When they are officiating, they wear a long robe of elk-skin, hung with small and large brass and iron bells. They also carry staves carved at the top into the shape of horses' heads, also hung with bells; and with the assistance of these staves they leap to an extraordinary height. They have neither altars nor idols, but perform their sacrifices in a hut raised on an open space in a forest or on a hill. Nor are there fixed periods for the performance of their ceremonies; births, marriages, sickness, uncommon calamities, etc., are generally the occasions which call for them. The animal to be sacrificed is generally fixed upon by the Shaman or donor, and is killed by tearing out its heart. The officiating magician or priest works himself into a frenzy, and pretends or supposes himself to be possessed of the daemon to whom worship is being offered. After the rites are over, he communicates to those who consult him the information he has received. In Siberia the Shaman affected to cure dangerous diseases, hurts, etc., sucking the part of the body the most affected by pain; and finally taking out of his mouth a thorn, a bug, a stone, or some other object, which he shows as the cause of the complaint. Very many of its votaries have passed over to Lamaism, which is, in a measure, a kind of Shamanism, but infused with Buddhistic doctrines. See *Chambers's Encyclop.* s. v.; Gardner, *Faiths of the World*, s. v.

Shamans, a Hindû name given to pious persons among the worshippers of Buddha; a term which passed over from them to the Tartars and inhabitants of Siberia, and became the title of their priests, magicians, and physicians. Hence Shamanism is the name given to the religion of most of the tribes of Northern Asia, from Tartary to Kamchatka. By means of enchantments they professed to be able to cure diseases, avert calamities, and acquaint people with the purposes, etc., of the demons. By these arts they acquired a great ascendancy over the people. See SHAMANISM.

Shamari'ah (2 Chron. xi, 19). See SHEMARIAH.

Shambles (μάκελλον, from the Lat. *macellum*, a meat-market). Markets for the sale of meat appear to have been unknown in Judæa previous to the Roman conquest. We learn from the Talmud that most of the public butchers under the Romans were Gentiles, and that the Jews were forbidden to deal with them because they exposed the flesh of unclean beasts for sale. Hence Paul, dissuading the Corinthian converts from adopting Jewish scruples, says, "Whatsoever is sold in the shambles, that eat, asking no questions for conscience' sake" (1 Cor. x, 25). See ALISGEMA.

Shame (usually בֹּשָׁת, αἰσχύνη), a painful sensation, occasioned by the quick apprehension that reputation and character are in danger, or by the perception that they are lost. It may arise, says Dr. Cogan, from the immediate detection, or the fear of detection, in something ignominious. It may also arise from native diffidence in young and ingenuous minds, when surprised into situations where they attract the especial attention of their superiors. The glow of shame indicates, in the first instance, that the mind is not totally abandoned; in the last, it manifests a nice sense of honor and delicate feelings, united with inexperience and ignorance of the world. See MODESTY.

Sha'med, or rather SHEMER (Heb. *She'mer*, שֹׁמֵר, in "pause" *Sha'mer*, שֹׁמֵר, keeper [but some copies have שֹׁמֵר]; Sept. Σημήρ v. r. Σημής and Σαμής; Vulg. *Samed*), the third named of the three sons of Elpaal, and builder of Ono and Lod. He was of the tribe of Benjamin (1 Chron. viii, 12). B.C. post 1618.

Shamel, in Hindû mythology, is the angel who bears the prayers of men to God.

Sha'mer (Heb. *She'mer*, שֹׁמֵר, "in pause" *Sha'mer*, שֹׁמֵר, keeper; Sept. Σημήρ v. r. Σωμήρ and Σεμήρ respectively), the name of several men. See also SHAMED; SHEMER.

1. The second named of four children of Heber (1 Chron. vii, 32), and father of Ahi and others (ver. 34). B.C. perhaps ante 1658. In the first of these passages he is called SHOMER (q. v.).

2. The son of Mahli and father of Bani, of the tribe of Levi (1 Chron. vi, 46). B.C. perhaps cir. 1658.

Sham'gar (Heb. *Shamgar*, שָׁמְגָר, possibly sword [comp. *Samgar*]; Sept. Σαμεγάρ, Josephus Σαμάγαρος), son of Anath, and third judge of Israel. B.C. 1429. It is possible, from his patronymic, that Shamgar may have been of the tribe of Naphtali, since Bethanath is in that tribe (Judg. i, 33). Ewald conjectures that he was of Dan—an opinion in which Bertheau (*On Judg.* iii, 31) does not coincide. Since the tribe of Naphtali bore a chief part in the war against Jabin and Sisera (Judg. iv, 6, 10; v, 18), we seem to have a point of contact between Shamgar and Barak. It is not known whether the only exploit recorded of him was that by which his authority was acquired. It is said that he "slew of the Philistines six hundred men with an ox goad" (iii, 31). It is supposed that he was laboring in the field, without any other weapon than the long staff armed with a strong point used in urging and guiding the cattle yoked in the plough [see GOAD], when he perceived a party of the Philistines, whom, with the aid of the husbandmen and neighbors, he repulsed with much slaughter. The date and duration of his government are not stated in Scripture (Josephus [*Ant.* v, 4, 3] says it lasted less than one year), but may be probably assigned to the end of that long period of repose which followed the deliverance under Ehud. He is not expressly called a judge, nor does he appear to have effected more than a very partial and transient relaxation of the Philistine oppression under which Israel groaned; and the next period of Israel's declension is dated, not from Shamgar's, but from Ehud's ascendancy (Judg. iv, 1); as if the agency of Shamgar were too occasional to form an epoch in the history. The heroic deed recorded of him was probably a solitary effort, prompted by a kind of inspiration at the moment, and failing of any permanent result from not being followed up either on his own part or that of his countrymen. In Shamgar's time, as the Song of Deborah informs us (v, 6), the condition of the people was so deplorably insecure that the highways were forsaken, and travellers went through by-ways, and, for the same reason, the villages were abandoned for the walled towns. Their arms were apparently taken from them, by the same policy as was adopted later by the same people (iii, 31; v, 8; comp. with 1 Sam. xiii, 19–22). From the position of "the Philistines" in 1 Sam. xii, 9, between "Moab" and "Hazor," the allusion seems to be to the time of Shamgar. See JUDGES.

Shamhusai, in Hindû mythology, is an angel who resisted the creation of man, and was therefore cast out from God.

Sham'huth (Heb. *Shamhuth*, שָׁמְחֻת, prob. desolation; Sept. Σαμαθ v. r. Σαλαωθ; Vulg. *Samaoth*), the fifth captain for the fifth month in David's arrangement of his army (1 Chron. xxvii, 8). B.C. 1020. His designation הַיִּזְרָח, *hay-yizrâch*, i. e. the Yizrâch, is perhaps for הַזִּרְחִי, *haz-zarchi*, the Zarhite, or descendant of Zerah, the son of Judah. From a comparison of the lists in 1 Chron. xi, xxvii, it would seem that Shamhuth is the same as Shammoth (q. v.) the Harorite.

Shamir. See BRIER, DIAMOND.

Sha'mir (Heb. *Shamir*, שֹׁמֵר, a sharp point, as of

a thorn [text in Chron. *Shamur'*, שָׁמֹר, *tried*]; Sept. *Σαμῖρ*, v. r. [in Josh.] *Σαφείρ*, [in Judg.] *Σαμαρεία*, [in Chron.] *Σαμῖρ*), the name of two places and of a man.

1. A town in the mountain district of Judah (Josh. xv, 48), where it is named in connection with Jattir and Socoh, in the group in the extreme south of the tribe, west of south from Hebron. Keil (*Comment. ad loc.*) suggests that it may be the ruined site *Um Schaumerah* mentioned by Robinson (*Bib. Res.* 1st ed. iii, Append. p. 115), which is perhaps the *Somerah* suggested by Lieut. Conder (*Tent Work in Palestine*, ii, 339), although the position of neither is exactly indicated. We venture to suggest its possible identity with the ruined village *Simieh* south-west of Hebron (Robinson, *ibid.* p. 116), and in the immediate vicinity required, being three miles west of Juttah.

2. A place in Mount Ephraim, the residence and burial-place of Tola the judge (Judg. x, 1, 2). It is singular that this judge, a man of Issachar, should have taken up his official residence out of his own tribe. We may account for it by supposing that the plain of Esdraelon, which formed the greater part of the territory of Issachar, was overrun, as in Gideon's time, by the Canaanites or other marauders, of whose incursions nothing whatever is told us—though their existence is certain—driving Tola to the more secure mountains of Ephraim. Or, as Manasseh had certain cities out of Issachar allotted to him, so Issachar, on the other hand, may have possessed some towns in the mountains of Ephraim. Both these suppositions, however, are but conjecture, and have no corroboration in any statement of the records.

Shamir is not mentioned by the ancient topographers. Schwarz (*Palest.* p. 151) proposes to identify it with *Sannir*, a place of great natural strength (which has some claims to be Bethulia), situated in the mountains, half way between Samaria and Jenin, about eight miles from each. Van de Velde (*Memoir*, p. 348) proposes *Khirbet Sammer*, a ruined site in the mountains overlooking the Jordan valley, ten miles east-southeast of Nablus. There is no connection between the names Shamir and Samaria, as proposed in the Alex. Sept. (see above), beyond the accidental one which arises from the inaccurate form of the latter in that version and in our own, it being correctly Shomron.

3. A Kohathite Levite, son of Michah, and a servant in the sanctuary in David's time (1 Chron. xxiv, 24). B.C. cir. 1020.

SHAMIR IN JEWISH TRADITION. In the *Pirke Aboth*, v, 8, we read that "ten things were created on the eve of the Sabbath," among which was also the "Shamir." According to Jewish tradition, the Shamir was a little worm by the aid of which Moses fitted and polished the gems of the ephod and the two tables of the law, Solomon the stones of the Temple. On 1 Kings vi, 7, "there was neither hammer nor axe, nor any tool of iron, heard in the house while it was in building," D. Kimchi writes thus: "By means of a worm called Shamir, when placed on a stone, it split. Although not larger than a barleycorn, the Shamir was so strong that by its touch mountains were removed from their places, and the hardest stones were easily split and shaped. By means of this worm Solomon prepared the stones for the building of the Temple. But who gave it to him? An eagle brought it to him from the Paradise, as it is written, 'He spake of beasts and of fowl' (1 Kings iv, 33). But what did he speak to the fowl? He asked where the Shamir was. The eagle went and fetched the Shamir from Eden. By means of this Shamir Moses prepared the stones of the ephod and the first and the second tables. This is the tradition." As to the tradition to which Kimchi refers, so far as Solomon is concerned, the Talmud (*Tr. Gittin*, fol. 68, col. 1) contains a pretty story, which is a fine specimen of Jewish legendary lore. The story runs as follows:

"Solomon asked the rabbins, How shall I build (the Temple without the use of iron)? They referred him to the worm Shamir which Moses had employed. How could it be found? They replied, Tie a he and she devil together: perhaps they know it and will tell thee. This being done, they said, We do not know it; perhaps Asmodeus, the king of the devils, will tell thee. But where is he to be found? They answered that on a certain mountain he had dug a hole, filled it with water, covered it with a stone, and sealed it with his ring. Every day he also ascends on high and learns in the school above; then he comes down to study in the school below. He then goes and examines his seal, opens the hole, and drinks; after this he seals it up again and goes away. He (Solomon) then sent Benaiiah, the son of Jehoiada, and gave him a chain on which was inscribed *Shem hammephorash* (i.e. the Tetragrammaton), and a ring upon which was also inscribed the name, and a little wool and wine. When Benaiiah had come to the mountain, he made a pit under that of Asmodeus, made the water run off, and stopped the hole with the wool. He then made a pit above the first, poured some wine into it, covered it, and climbed on a tree. When Asmodeus came back, examined his seal, and opened the pit and found the wine, he said, It is written (Prov. xx, 1) 'Wine is a mocker, strong drink is raging: and whosoever is deceived thereby is not wise'; and it is also written (Hos. iv, 11) 'Whoredom and wine and new wine take away the heart,' and did not drink. But being very dry, he could not restrain himself, drank, became drunk, lay down and went to sleep. Benaiiah then descended from the tree, put the chain around him and fastened it. When Asmodeus woke up, he was almost raging, but Benaiiah said, The name of thy Lord is upon thee, the name of thy Lord is upon thee! After this the two set out. On their way they came to a date-tree, which Asmodeus broke; then to a house, which he overturned; then to a widow's cottage, which he would have destroyed also, were it not for the poor woman that came out and entreated him. When he crossed over to the other side, he broke a bone and said, So is it written (Prov. xxv, 15), 'A soft tongue breaketh a bone.' When they had come to the palace, he was not brought before the king for three days. On the first day Asmodeus asked why the king did not let him come before him. They said, He has been drinking too much. At this he took a brick and set it upon another, and they went to Solomon and told him what Asmodeus had done. The king said, 'Go and give him more to drink.' On the second day he asked again why he was not brought before the king. They answered, because he had eaten too much. At this he took the bricks down and placed them on the ground. When the king heard this, he told the servants to give him little to eat. On the third day Asmodeus was brought before the king, took a measure, meted out four cubits, threw it away, and said to the king, When thou diest, thou wilt have but four cubits in the world. Thou hast conquered the whole world, and art not satisfied till thou hast subdued me also. Solomon replied, I want nothing of thee: I will build the Temple, and need for it the Shamir. Asmodeus answered, It is not mine, but belongs to the chief of the sea, which he only gives to the wild cock that is faithful to him because of the oath. But what does he do with it? He takes it up to the mountains, where none dwell, puts it on the mountain rocks and splits the mountain, and then takes it away. He then takes the seed of trees, throws it there, and a dwelling-place is prepared: hence he is called a mountain artificer (*naggar tura*). When they had found the nest of the wild cock containing young ones, they covered the nest with glass. When the parent bird came and could not get in, he went and fetched the Shamir and put it on the glass. But Benaiiah shouted so loud that the bird dropped the Shamir, which Benaiiah then took. The bird went away and hanged himself for having violated the oath."

(B. P.)

Sham'ma (Heb. *Shamma'*, שָׁמָא, *astonishment or desolation*; Sept. *Σαμμά* v. r. *Σαμά* and *Σεμά*), the eighth named of the eleven sons of Zophah of the tribe of Asher (1 Chron. vii, 37). B.C. post 1658.

Sham'mah (Heb. *Shammah'*, שָׁמַח, *astonishment or desolation*), the name of four or five Hebrews.

1. (Sept. *Σομέ* v. r. in Chron. *Σομμέ*.) Son of Reuel and head of a family among Esau's descendants (Gen. xxxvi, 13, 17; 1 Chron. i, 37). B.C. ante 1850.

2. (Sept. *Σαμά* v. r. *Σαμμά*.) The third son of Jesse and brother of king David (1 Sam. xvi, 9; xvii, 13). From these two passages we learn that he was present at David's anointing by Samuel, and that with his two elder brothers he joined the Hebrew army in the valley of Elah to fight with the Philistines. B.C. 1068. He is elsewhere, by a slight change in the name, called SHIMEA [q. v.] (1 Chron. xx, 7), SHIMEAH (2 Sam. xiii, 3, 32), and SHIMMA (1 Chron. ii, 13).

3. (Sept. Σαμαία v. r. Σαμμεάς.) The son of "Agee the Hararite," and one of the three chief of the thirty champions of David. B.C. 1061. The exploit by which he obtained this high distinction, as described in 2 Sam. xxiii, 11, 12, is manifestly the same as that which in 1 Chron. xi, 12-14 is ascribed to David himself, assisted by Eleazar, the son of Dodo. The inference, therefore, is that Shammah's exploit lay in the assistance which he had thus rendered to David and Eleazar. It consisted in the stand which the others had enabled David to make, in a cultivated field, against the Philistines. Shammah also shared in the dangers which Eleazar and Jashobeam incurred in the chivalric exploit of forcing a way through the Philistine host to gratify David's thirst for the waters of Bethlehem (2 Sam. xxiii, 16). — Kitto. The scene of Shammah's exploit is said in Samuel to be a field of lentils (לְחִילִים), and in 1 Chron. a field of barley (שְׂעִירִים). Kennicott proposes in both cases to read "barley," the words being in Hebrew so similar that one is produced from the other by a very slight change and transposition of the letters (*Dissert.* p. 141). It is more likely, too, that the Philistines should attack and the Israelites defend a field of barley than a field of lentils. In the Peshito-Syriac, instead of being called "the Hararite," he is said to be "from the king's mountain," and the same is repeated at ver. 25. The Vat. MS. of the Sept. makes him the son of Asa (ὁ υἱὸς Ἀσά), where Ἀρουαῖος was perhaps the original reading). Josephus (*Ant.* vii, 12, 4) calls him *Cesabeus* the son of Ilus (Ἰλὺς μὲν υἱὸς Κησαβαῖος δὲ δνομα).

4. (Sept. Σαμά v. r. Σαμμαί.) The Harodite, one of David's mighty men (2 Sam. xxiii, 25). He is called "Shammoth the Harorite" in 1 Chron. xi, 27, and in xxvii, 8 "Shamruth the Izrahite." Kennicott maintained the true reading in both to be "Shamboth the Harodite" (*Dissert.* p. 181). He is evidently different from the preceding, as still ranking among the lower thirty.

5. (Sept. Σαμνάν v. r. Σαμνάς.) In the list of David's mighty men in 2 Sam. xxiii, 32, 33, we find "Jonathan, Shammah the Hararite;" while in the corresponding verse of 1 Chron. xi, 34 it is "Jonathan, the son of Shage the Hararite." Combining the two, Kennicott proposes to read "Jonathan, the son of Shamha, the Hararite," David's nephew who slew the giant in Gath (2 Sam. xxi, 21). Instead of "the Hararite," the Peshito-Syriac has "of the Mount of Olives;" in xxiii, 33, and in 1 Chron. xi, 34, "of Mount Carmel;" but the origin of both these interpretations is obscure. The term "Hararite" (q. v.) may naturally designate a *mountaineer*, i. e. one from the mountains of Judah. Not only is the name Shammah here suspicious, as having already been assigned to two men in the list of David's heroes, but the epithet "Shage" is suspiciously similar to "Agee," and "Harorite" to "Hararite" given above. See DAVID.

Sham'mai [many *Sham'mai*] (Heb. *Shammay'*, שַׁמַּי, *desolate*; Sept. 1 Chron. ii, 28 Σαμμαί; but ver. 32 Ἀχισαμμά [combining *Ahi* with *Shammai*]; ver. 44 Σαμαί; iv, 17 Σαμμαί, v. r. Σαμμαά, Σαμαί, Σεμέ), the name of three men.

1. The elder of two sons of Onam, of the tribe of Judah (1 Chron. ii, 28, 32). B.C. cir. 1618.

2. Son of Rekem and father (founder) of Maon, of the tribe of Judah (1 Chron. ii, 44, 45). B.C. post 1618.

3. Sixth child of Ezra, of the tribe of Judah, by a first wife (1 Chron. iv, 17). B.C. post 1618. He was possibly the same called Shimon (q. v.) in ver. 20. "Rabbi D. Kimchi conjectures that these were the children of Mered by his Egyptian wife Bithiah, the daughter of Pharaoh. See MERED. The Sept. makes Jether the father of all three. The tradition in the *Quest. in Libr. Paral.* identifies Shammah with Moses, and Ishbah with Aaron."

Shammai OF SHAMMAI was the colleague of Hillel

the Great (q. v.), with whom he is as closely associated in Jewish history as are the names of Castor and Pollux in Greek and Roman mythology. But comparatively little is known of him. Though one of his maxims was "Let the study of the law be fixed, say little and do much, and receive every one with the aspect of a fair countenance" (*Aboth*, i, 15), yet he is said to have been a man of a forbidding and uncompromising temper, and in this respect, as in others, the counterpart of his illustrious companion, of whom, both in their dispositions and divisions on a multitude of Rabbinical questions, he was, as we may say, the antithesis. This antithesis is especially shown in the famous controversy carried on between Hillel and Shammai concerning the egg laid on the Sabbath, and which lent its title, *Beza*, i. e. the egg, to a whole Talmudic treatise of 79 pages. Very graphically does dean Stanley describe the disputes of both these sages, in the following words: "The disputes between Hillel and Shammai turn, for the most part, on points so infinitely little that the small controversies of ritual and dogma which have vexed the soul of Christendom seem great in comparison. They are worth recording only as accounting for the obscurity into which they have fallen, and also because churches of all ages and creeds may be instructed by the reflection that questions of the modes of eating and cooking and walking and sitting seemed as important to the teachers of Israel—on the eve of their nation's destruction, and of the greatest religious revolution that the world has seen—as the questions of dress or posture, or modes of appointment, or verbal formulas have seemed to contending schools of Christian theology" (*Jewish Church*, iii, 501). Though each gave often a decision the reverse of the other, yet, by a sort of fiction in the practice of schools, these contrary decisions were held to be co-ordinate in authority, and, if we may believe the Talmud, were confirmed as of like authority by a *Bath-Kol* (or voice from heaven); or, at least, while a certain conclusion of Hillel's was affirmed, it was revealed that the opposite one of Shammai was not to be denied as heretical. אלו ואלו אומרים דבריו אלהים, "Both these and these speak the words of the living God." This saying passed for law, and the contradictory sayings of both these rabbins are perpetuated in the Talmud to this day. And although both were rabbinically one, yet their disciples formed two irreconcilable parties, like the Scotists and Thomists of the Middle Ages, whose mutual dissidence manifested itself not only in the strife of words, but also in that of blows, and in some cases in that of bloodshed. So great was the antagonism between them that it was said that "Elijah the Tishbite would never be able to reconcile the disciples of Shammai and Hillel." Even in Jerome's times this antagonism between these two schools lasted, for he reports (*Comment. in Esaiam*, viii, 14) that the Jews regarded them with little favor, for Shammai's school they called the "Scatterer," and Hillel's the "Profane," because they deteriorated and corrupted the law with their inventions. See Jost, *Gesch. des Judenthums*, i, 259 sq.; Grätz, *Gesch. d. Juden*, iii, 178, 186, 205; Edersheim, *Hist. of the Jewish Nation*, p. 137; Rule, *Hist. of the Karaite Jews*, p. 33 sq.; Bartolucci, *Biblioth. Magna Rabbinica*, s. v. חז"ל; Pick, *The Scribes Before and in the Time of Christ* (Lutheran Quarterly, Gettysburg, 1878), p. 272. (B. P.)

Shammar, ʾin Lamaism, is the name of three chiefs of the sect of Red-bonnets among the worshippers of the Lama, nearly equal to the Dalai-Lama in exalted dignity. The first of them lives in a large convent at Tassisor, the capital of Bootan. A numerous clergy are subordinated to these princes of the Church, all of whose members are celibates and live in convents. They are of different grades, inconceivably numerous and widely extended, as well as highly venerated. The instruction of the young is altogether in their hands. Their convents are very numerous, Lhasa, the capital of Thibet, alone containing 3000.—Vollmer, *Wörterb. d. Mythol.* s. v.

Shammatta (שַׁמַּטָּה), the highest form of excommunication among the Jews. See ANATHEMA.

Sham'moth (Heb. *Shammoth*, שַׁמּוֹת, *desolation*; Sept. Σαμῶθ, v. r. Σαμῶθ, Σαμῶθ), the name of a person entitled "the Harorite," one of David's guard (1 Chron. xi, 27); apparently the same with "Shammah the Harodite" (2 Sam. xxiii, 25), and with "Shamhuth" (1 Chron. xxvii, 8).

Shammu'ā (Heb. *id.* שַׁמּוּא, *renowned*; Sept. Σαμωὴλ in Numb. xiii, 4; Σαμμουά in 2 Sam. v, 14; Σαμμαού in 1 Chron. xiv, 4, v. r. Σαμαά; Σαμαίου in Neh. xi, 17, v. r. Σαμουί), the name of four men.

1. The son of Zaccur and the representative of the tribe of Reuben among those first sent by Moses to explore Canaan (Numb. xiii, 4). B.C. 1657.

2. One of the sons of David, by his wife Bathsheba, born to him in Jerusalem (1 Chron. xiv, 4). B.C. cir. 1045. In the A. V. of 2 Sam. v, 14 the same Heb. name is Anglicized "Shammuah," and in 1 Chron. iii, 5 he is called SHIMEA (q. v.). In all the lists he is placed first among the four sons of Bathsheba; but this can hardly have been the chronological order, since Solomon appears to have been born next to the infant which was the fruit of her criminal connection with David (2 Sam. xii, 24).

3. A Levite, the grandson of Jedulthun, son of Galal, and father of Abda (Neh. xi, 17). B.C. ante 450. He is the same as SHEMALAH the father of Obadiah (1 Chron. ix, 16).

4. The representative of the priestly family of Bilgah, or Bilgai, in the days of the high-priest Joiakim (Neh. xii, 18). B.C. cir. 500.

Shammu'ah (2 Sam. v, 14). See SHAMMUA.

Sham'sherai [usually *Shamshera'i*] (Heb. *Shamshera'y*, שַׁמְשֵׁרַי, *sunlike*; Sept. Σαμσαρία v. r. Σαμσαρι), the first named of six sons of Jeroham, of the tribe of Benjamin, resident at Jerusalem (1 Chron. viii, 26). B.C. post 1500.

Shamyl, or **Schamyl** (i. e. *Samuel*), a celebrated leader of the Caucasus, was born at Aul-Himry, in Northern Daghestan. He belonged to a wealthy Lesghian family of rank, and early became a zealous disciple of Kasi-Mollah, the great apostle of Muridism, who brought together the various Caucasian tribes, and led them against the heretical Russians. After the assassination of Hamzad Bey, the successor of Kasi-Mollah (1834), Shamyl was unanimously elected imam; and being absolute temporal and spiritual chief of the tribes which acknowledged his authority, he made numerous changes in their religious creed and political administration. His military tactics, consisting of surprises, ambuscades, etc., brought numerous successes to the mountaineers. In 1837 he defeated general Ivelitch; but in 1839 the Russians succeeded in hemming Shamyl into Akulgo, in Daghestan, took the fortress by storm, and it was supposed that he perished, as the defenders were put to the sword. But he suddenly reappeared, preaching more vigorously than ever the "holy war against the heretics." In 1843 he conquered all Avares, besieged Mozdok, foiled the Russians in their subsequent campaign, and gained over to his side the Caucasian tribes which had hitherto favored Russia. In 1844 he completed the organization of his government, made Dargo his capital, and established a code of laws and a system of taxation and internal communication. The fortunes of war changed till 1852, when Bariatinsky compelled Shamyl to assume the defensive, and deprived him of his victorious prestige. Religious indifference and political dissensions began to undermine his power, and at the close of the Crimean war Russia again attempted the subjection of the Caucasus. For three years Shamyl bravely held out, although for several months he was a mere guerilla chief, hunted from fastness to fastness. At last (Sept. 6, 1859), he was sur-

prised on the plateau of Ghunib, and, after a desperate resistance, was taken prisoner. His wives and treasure were spared to him, and he was taken to St. Petersburg, where he met with a gracious reception from Alexander II. After a short stay, he was assigned to Kaluga, receiving a pension of 10,000 rubles. From here he removed (December, 1868) to Kief, and in January, 1870, to Mecca, remaining a parole prisoner of the Russian government. He died in Medina, Arabia, in March, 1871.

Shan. See BETH-SHAN.

Shane, John Dabney, a Presbyterian minister, was born in Cincinnati, O., in 1812. He graduated at Hampden Sidney College, Prince Edward Co., Va., and studied theology at the Union Theological Seminary in that state. He was licensed by the Cincinnati Presbytery on May 31, 1842, and shortly after ordained by the West Lexington Presbytery, laboring until 1855 at North Middleton, Ky., and with other churches in that region of country. He returned to Cincinnati in 1857, and afterwards preached as occasion presented in the bounds of the Cincinnati Presbytery. He died Feb. 7, 1864. Mr. Shane, from his earliest years, revealed a passion for collecting and hoarding everything that had any direct or indirect bearing upon the planting and history of the Presbyterian Church in the Mississippi valley. To carry out the great objects of his life, he declined the pastoral office, as he had that of the family relation, so that he could roam untrammelled over that broad land. After his death, his collections were sold at auction, and realized about \$3000. A large portion of them were secured through the attention of Mr. Samuel Agnew, of Philadelphia, for the Presbyterian Historical Society. See Wilson, *Presb. Hist. Almanac*, 1865, p. 119. (J. L. S.)

Shane, Joseph, a minister of the Methodist Episcopal Church, was born in Jefferson County, O., April 9, 1834, and united with the Church when about seventeen years old. He was licensed as a local preacher April 25, 1857, and in 1859 was received into the Pittsburgh Conference. In the spring of 1865 he was compelled to resign his charge, and after a few months of illness, died in Apollo, Armstrong Co., Pa., Jan. 16, 1866. See *Minutes of Annual Conferences*, 1866, p. 21.

Shang-té, a deity of the Chinese, often spoken of in terms which seem to point him out as, in their view, the Supreme Being, the only true God. This is, however, a much-disputed point. Mr. S. C. Malan, in his work *Who is God in China?* argues in favor of Shang-té as identical with the God of the Christians. Others (and among them Rev. Mr. M'Letchie) maintain that Shang-té is not a personal being distinct from matter, but a soul of the world. The word is often used by Chinese classical writers to denote the power manifested in the various operations of nature, but is never applied to a self-existent Almighty Being, the Creator of the universe. In the sacred book *Shoo-king* there are no fewer than thirty-eight allusions to a great power or being called Shang-té. The name itself, as we learn from Mr. Hardwick, imports august or sovereign ruler. To him especially is offered the sacrifice Loöë, and the six Tsong, beings of inferior rank, appear to constitute his retinue. In the *Shoo-king* it is stated, and perhaps with reference to the nature of Shang-té, "Heaven is supremely intelligent: the perfect man imitates him (or it), the ministers obey him (or it) with respect, the people follow the orders of the government." Others maintain that in the very oldest products of the Chinese mind no proper personality has ever been ascribed to the supreme power. Heaven is called the father of the universe, but only as earth is called the mother. Both are said to live, to generate, to quicken; are made the objects of prayer and sacrifice. Heaven is a personification of ever-present law, order, and intelligence. By these writers Shang-té is believed to be nothing more than a great "Anima mundi,"

mergizing everywhere in all the processes of nature, and binding all the parts together in one mighty organism.

Shani. See CRIMSON; SCARLET.

Shank, JOSEPH, a minister of the Methodist Episcopal Church, was born in Schoharie, N. Y., about 1818, and professed conversion at the age of twenty. He was licensed to preach in 1841, and soon after joined the Oneida Conference. In 1864 he was transferred to the Detroit Conference, but his health failed him in 1866. After a trip to the sea-coast, he returned to Fentonville, Mich., where he died Sept. 30, 1867. See *Minutes of Annual Conferences*, 1868, p. 174.

Shanks, ASBURY H., a minister of the Methodist Episcopal Church, South, was born in South Carolina in 1808. He joined the Church in 1830, and entered the itinerant ministry in 1831. His ordination of deacon was received in 1833, and that of elder in 1835. After fourteen years of labor, he located, studied law, and graduated from the law department of the Transylvania University. In 1849 he went to Texas, and engaged in the practice of his profession. He was admitted into the East Texas Conference in 1858, but owing to ill-health was obliged to superannuate in 1859, and held that relation until his death, Oct. 20, 1868. He was a preacher of great power, a sound theologian, and in the practice of law never compromised his ministerial character. See *Minutes of Annual Conferences of M. E. Ch. South*, 1868, p. 283.

Sha'pham (Heb. *Shapham'*, שַׁפְּחָם, *bold* [Gesén.] or *vigorous* [Fürst]; Sept. Σαφάμ v. r. Σαφάρ), the chief second in authority among the Gadites in the days of Jotham (1 Chron. v, 12). B.C. cir. 750.

Sha'phan (Heb. *Shaphan'*, שַׁפְּחָן, *coney*; Sept. Σαφάν v. r. Σαφάν, and Σαφφάν in 2 Kings xxii), the scribe or secretary of king Josiah, and the father of another of his principal officers. B.C. cir. 628. He was the son of Azaliah (2 Kings xxii, 3; 2 Chron. xxxiv, 8), father of Ahikam (2 Kings xxii, 12; 2 Chron. xxxiv, 20), Elashah (Jer. xxix, 3), and Gemariah (xxxvi, 10-12), and grandfather of Gedaliah (xxxix, 14; xl, 5, 9, 11; xli, 2; xliii, 6), Michaiah (xxxvi, 11), and probably of Jaazaniah (Ezek. viii, 11). There seems to be no sufficient reason for supposing, as many have done, that Shaphan the father of Ahikam, and Shaphan the scribe, were different persons. The history of Shaphan brings out some points with regard to the office of scribe which he held. He appears on an equality with the governor of the city and the royal recorder, with whom he was sent by the king to Hilkiah to take an account of the money which had been collected by the Levites for the repair of the Temple and to pay the workmen (2 Kings xxii, 4; 2 Chron. xxxiv, 9; comp. 2 Kings xii, 10). Ewald calls him minister of finance (*Gesch.* iii, 697). It was on this occasion that Hilkiah communicated his discovery of a copy of the law, which he had probably found while making preparations for the repair of the Temple. Shaphan was intrusted to deliver it to the king. Whatever may have been the portion of the Pentateuch thus discovered, the manner of its discovery, and the conduct of the king upon hearing it read by Shaphan, prove that for many years it must have been lost and its contents forgotten. The part read was apparently from Deuteronomy, and when Shaphan ended, the king sent him with the high-priest Hilkiah, and other men of high rank, to consult Huldah the prophetess. Her answer moved Josiah deeply, and the work which began with the restoration of the decayed fabric of the Temple quickly took the form of a thorough reformation of religion and revival of the Levitical services, while all traces of idolatry were for a time swept away. Shaphan was then probably an old man, for his son Ahikam must have been in a position of importance, and his grandson Gedaliah was already born, as we may infer from the fact that thirty-

five years afterwards he was made governor of the country by the Chaldeans, an office which would hardly be given to a very young man. Be this as it may, Shaphan disappears from the scene, and probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elishama was scribe (Jer. xxxvi, 12). There is just one point in the narrative of the burning of the roll of Jeremiah's prophecies by the order of the king which seems to identify Shaphan the father of Ahikam with Shaphan the scribe. It is well known that Ahikam was Jeremiah's great friend and protector at court, and it was therefore consistent with this friendship of his brother for the prophet that Gemariah the son of Shaphan should warn Jeremiah and Baruch to hide themselves, and should intercede with the king for the preservation of the roll (xxxvi, 12, 19, 25).

Shaphan. See CONEY.

Sha'phat (Heb. *Shaphat'*, שַׁפְּחָט, *judge*; Sept. Σαφάρ, v. r. Σωφάρ, Σαφάτ, etc.), the name of five men.

1. The son of Hori and spy from the tribe of Simeon on the first exploration of Canaan (Numb. xiii, 5). B.C. 1657.

2. A son of Adlai, who had charge of king David's herds in the valleys (1 Chron. xxvii, 29). B.C. cir. 1020.

3. The father of Elisha the prophet (1 Kings xix, 16, 19; 2 Kings iii, 11; vi, 31). B.C. ante 900.

4. A Gadite who dwelt in Bashan in Jotham's time (1 Chron. v, 12). B.C. cir. 750.

5. One of the descendants of king David, through the royal line (1 Chron. iii, 22). He seems to have lived as late as B.C. 350, for he was the brother of Neariah (q. v.).

Sha'pher (Heb. *She'pher*, שַׁפְּרָה, *brightness*, as in Gen. xlix, 21; always occurring "in pause" *Sha'pher*, שַׁפְּרָה; Sept. Σαφάρ v. r. Σαφσαφάρ), the name of a mountain at which the Israelites encamped during their sentence of extermination in the desert; situated between Kehelathah and Haradah (Numb. xxxiii, 23, 24). Hitzig (*Philist.* p. 172) regards it as identical with Mount Halak (Josh. xi, 16); but the latter appears to have lain farther north-east. It is, perhaps, the present *Araif'en-Nakah*, about in the middle of the upper portion of the plateau Et-Tih. See EXODE. For a different identification, see WANDERINGS IN THE WILDERNESS.

Shapira Manuscript is the name given by Bär and Delitzsch to a Hebrew codex which Jacob *Shapira* or *Sappir*, a Jewish rabbi from Jerusalem, brought from Arabia, and sold to the public library at Paris in 1868. It is written on parchment, and, according to Delitzsch in his preface to his edition of the book of Isaiah in connection with S. Bär (Leips. 1872), it is "pervetustum, integrum et omniuo exitium." This codex contains some very valuable readings, of which we note e. g. the following:

1 Kings xx, 83, it reads in the text ירחלנו תמנני, and in the margin in the Keri ירחלנוה ממנו ירח.

Isa. x, 15, וְאֶת־מִרְיָמוֹ (Van der Hooght אֶת־מִרְיָמוֹ), which is also supported by a great many MSS. and printed editions, as the Complut.: Venice, 1518, 1521; Münster's, 1534, 1546; Stephan's, Hutter's, 1587; Venice, 1678, 1690, 1730, 1739; Mantuan, 1742, etc.

Isa. xv, 2, גִּירֻדָּה (Van der Hooght גִּירֻדָּה), which is in accordance with the Masorah, and which is also found in Jer. xlviii, 37.

Isa. lxiii, 11, רָעַי (Van der Hooght רָעַי), so many MSS. and editions.

Psa. lxxviii, 51, בְּאֶת־לִירָם (V. d. Hooght בְּאֶת־לִירָם), which is also found in 2 codd. Kermic (No. 97, 133).

(B. P.)

Shara Malachai (*Yellow-bonnets*), the party of Lamaites who reject the Bogdo-Lama (chief of the Red-bonnets) and recognise the Dalai-Lama alone as an infallible spiritual head.

Sharab. See MIRAGE.

Sha'rai [many *Shar'ai*, some *Shara'i*] (Heb. *Sharay*, שָׂרַי, *releaser*; Sept. Σαρίου v. r. 'Αποί), one of the "sons" of Bani, who had married strange wives after the captivity (Ezra x, 40). B.C. cir. 457.

Shara'im (Josh. xv, 30). See SHAARAIM.

Sha'rar (Heb. *Sharar*, שָׂרָר, *strong*; Sept. 'Απαί v. r. Σαράρ), the father of Ahiam the Hararite, one of David's mighty men (2 Sam. xxiii, 33). B.C. cir. 1040. In the parallel passage (1 Chron. xi, 35) he is called SACAR, which is, perhaps, the better reading (Kennicott, *Dissert.* p. 208). See DAVID.

Sharasandha, in Hindū mythology, was a powerful king who ruled over the entire southern part of India, and the most dangerous enemy of Krishna, with whom he disputed the sovereignty in seventeen battles and in a duel.

Share is the rendering in 1 Sam. xiii, 20 of שָׁרֵת, *macharësheth* (from שָׁרַת, *to scratch or cut*), an agricultural instrument requiring to be sharpened; probably some implement essentially corresponding to a modern *hoe*. See MATTOCK.

Share'zer (Heb. *Share'tser*, שָׁרְעֵזֶר, Persian for *prince of fire*; Sept. Σαφαζάρ v. r. Σαπαζά), the name of two men.

1. A son of Sennacherib (q. v.), who, with his brother Adrammelech, murdered their father in the house of the god Nisroch (2 Kings xix, 37; Isa. xxxvii, 38). B.C. post 711. "Moses of Chorene calls him *Sanasar*, and says that he was favorably received by the Armenian king to whom he fled, and given a tract of country on the Assyrian frontier, where his descendants became very numerous (*Hist. Armen.* i, 22). He is not mentioned as engaged in the murder, either by Polyhistor or Abydenus, who both speak of Adrammelech."

2. A messenger sent along with Regem-melech (q. v.), in the fourth year of Darius, by the people who had returned from the captivity to inquire concerning fasting in the fifth month (Zech. vii, 2, A.V. "Sherez"). B.C. 519.

Shariver, in Persian mythology, is one of the seven good spirits created by Ormuzd to make war on Ahriman, and who had control over metals.

Sha'ron (Heb. *Sharon*, שָׂרֹן, *a plain*; Sept. usually Σαρόν [comp. Acts ix, 35], Σαρωνίς), the name, apparently, of three places in Palestine. See also SHARONITE. In the treatment of these we adduce the elucidations of modern critical and archaeological research.

1. The district along the Mediterranean is that commonly referred to under this distinctive title. See also SARON.

1. *The Name.*—This has invariably, when referring to this locality (1 Chron. xxvii, 29; Cant. ii, 1; Isa. xxxiii, 9, xxxv, 2; lxx, 10), the definite article, שָׂרֹן הַיָּם, *hash-Sharon*; and this is represented, likewise, in the Sept. renderings ὁ Σαρόν, ὁ ἐρημός, τὸ πεδῖον. Two singular variations of this are found in the Vat. MS. (Mai), viz. 1 Chron. v, 16, Ἐρεάμ; and xxvii, 29, Ἀσειδῶν, where the A is a remnant of the Hebrew definite article. It is worthy of remark that a more decided trace of the Hebrew article appears in Acts ix, 35, where some MSS. have Ἀσσαρωνά. The *Lasharon* (q. v.) of Josh. xii, 18, which some scholars consider to be Sharon with a preposition prefixed, appears to be more probably correctly given in the A. V. The term thus appears to be denominative of a peculiar place, like "the Arabah," "the Shephelah," "the Ciccar," "the Pisgah," etc. See TOPOGRAPHICAL TERMS.

Sharon is derived by Gesenius (*Thesaur.* p. 642) from שָׁרַי, *to be straight or even*—the root, also, of *Mishor*, the name of a district east of Jordan. The application to it, however, by the Sept., by Josephus (*Ant.* xv, 13, 3; *War.*

i, 13, 2), and by Strabo (xvi, p. 758) of the name Ἀρμύς, or Ἀρμύοι, "woodland," is singular. It does not seem certain that that term implies the existence of wood on the plain of Sharon. Reland has pointed out (*Palest.* p. 190) that the Saronicus Sinus, or Bay of Saron, in Greece, was so called (Pliny, *H. N.* iv, 5) because of its woods, *σάπωνες* meaning an oak. Thus it is not impossible that Ἀρμύς was used as an equivalent of the name Sharon, and was not intended to denote the presence of oaks or woods on the spot. May it not be a token that the original meaning of Saron, or Sharon, is not that which its received Hebrew root would imply, and that it has perished except in this one instance? The Alexandrine Jews who translated the Sept. are not likely to have known much either of the Saronic Gulf or of its connection with a rare Greek word. The thickets and groves of the region are proverbial (see below).

2. *Description.*—According to Acts ix, 15, this district was the level region adjacent to Lydda. Eusebius and Jerome (*Onomast.* s. v. "Saron"), under the name of *Saronus*, specify it as the region extending from Caesarea to Joppa. This is corroborated by Jerome in his comments on the three passages in Isaiah, in one of which (*on lxx*, 10) he appears to extend it as far south as Jamnia. He elsewhere (*Comm. on Isa.* xxxv, 2) characterizes it in words which admirably portray its aspects even at the present: "Omnis igitur candor [the white sand-hills of the coast], cultus Dei [the wide crops of the finest corn], et circumcisionis scientia [the well-trimmed plantations], et loca uberrima et campestris [the long gentle swells of rich red and black earth], quæ appellatur Saron." It is that broad, rich tract of land which lies between the mountains of the central part of the Holy Land and the Mediterranean—the northern continuation of the Shephelah. From the passages above cited we gather that it was a place of pasture for cattle, where the royal herds of David grazed (1 Chron. xxvii, 29); the beauty of which was as generally recognised as that of Carmel itself (Isa. xxxv, 2), and the desolation of which would be indeed a calamity (xxxiii, 9), and its re-establishment a symbol of the highest prosperity (lxx, 10). The rose of Sharon (q. v.) was a simile for all that a lover would express (Cant. ii, 1). Add to these slight traits the indications contained in the renderings of the Sept., τὸ πεδῖον, "the plain," and ὁ ἐρημός, "the wood," and we have exhausted all that we can gather from the Bible of the characteristics of Sharon. There are occasional allusions to wood in the description of the events which occurred in this district in later times. Thus, in the chronicles of the Crusades, the "Forest of Saron" was the scene of one of the most romantic adventures of Richard (Michaud, *Histoire*, viii); the "Forest of Assur" (i. e. Arsuf) is mentioned by Vinsauf (iv, 16). To the south-east of Kaisariyeh there is still "a dreary wood of natural dwarf pines and entangled bushes" (Thomson, *Land and Book*, ch. xxxiii). The orchards and palm-groves round Jimzu, Lydd, and Ramleh, and the dense thickets of *dōm* in the neighborhood of the two last, as well as the mulberry plantations in the valley of the Aujeh, a few miles from Jaffa—an industry happily increasing every day—show how easily wood might be maintained by care and cultivation (see Stanley, *Sinai and Pal.* p. 1260, note). It was famous for *Saronite wine* (Mishna, *Nidda*, ii, 7; comp. *Chilaim*, ii, 6), for roses, anciently (Mariti, *Voyage*, p. 350; Chateaubriand, *Trav.* ii, 55, comp. Russegger, iii, 201, 287) as well as now (Thomson, *Land and Book*, ii, 269). In its midst, between Lydda and Arsuf, according to some, lay the village of Sharon (see Mariti, *loc. cit.*), once a city. (This is meant, perhaps, in Josh. xii, 18, Acts ix, 35.) But later travellers do not mention it, and it is not certain that the passages adduced refer to a city. There are many villages still on the plain (Berggren, *Reis.* iii, 162). The district has lost much of its ancient fertility, but it is yet good pasture land; there are still flocks to be found grazing on it, though few in comparison with former days. Like the plain of

Esdraelon, Sharon is very much, we might say entirely, deserted. Around Jaffa, indeed, it is well cultivated, and as you move northward from that town you are encompassed with groves of orange, olive, fig, lemon, pomegranate, and palm; the fragrance is delicious, almost oppressive. But farther north, save in a few rich spots, you find but little cultivation. Yet over all the undulating waste your eye is refreshed by the profusion of wild flowers scattered everywhere. Like many of the spots famed anciently for beauty and fertility, it only gives indications of what it might become (see Porter, *Hand-book for Pal.* p. 380).

2. The Sharon of 1 Chron. v, 16 is distinguished from the western plain by not having the article attached to its name. It is also apparent from the passage itself that it was some district on the east of Jordan in the neighborhood of Gilead and Bashan (see Bachiene, II, iii, 233). Reland objects to this (*Palæst.* p. 371), but on insufficient grounds. The expression "suburbs" (בְּנֵי שָׂרֵן) is in itself remarkable. The name has not been met with in that direction, and the only approach to an explanation of it is that of Prof. Stanley (*Sinai and Pal.* App. § 7), that Sharon may here be a synonym for the *Mishor*—a word, probably, derived from the same root, describing a region with some of the same characteristics and attached to the pastoral plains east of the Jordan.

3. Another Sharon is pointed out by Eusebius (*ut sup.*) in North Palestine, between Tabor and the Sea of Tiberias; and Döpke would understand this to be meant in Cant. ii, 1, because this book so often refers to the northern region of the Jordan. But this is very doubtful.

Sha'ronite (Heb. *Sharoni*, שָׂרֹנִי, a Gentile adj. from *Sharon*; Sept. Σαρωνίτης), the designation (1 Chron. xxvii, 29) of Shitrai, David's chief herdsman in the plain of Sharon, where he of course resided.

Sharp, Daniel, D.D., a Baptist preacher, was born at Huddersfield, Yorkshire, England, Dec. 25, 1788. He was the son of a Baptist preacher and received early religious training. He originally joined an Independent Church; but subsequently, as the result of inquiry and conviction, became a Baptist. Engaged in a large commercial house in Yorkshire, he came to the United States as their agent, arriving in New York Oct. 4, 1805. He soon decided to enter the ministry, and began his theological studies under Rev. Dr. Stoughton, of Philadelphia. He was set apart as pastor of the Baptist Church at Newark, N. J., May 17, 1809; and was publicly recognised as pastor of the Third Church, Boston, April 20, 1812. He became an active member of the Massachusetts Baptist Missionary Society; was for several years associate editor of the *American Baptist Magazine*; and upon the formation of the "Society for the Propagation of the Gospel in India," he, as its secretary, conducted the correspondence. For many years he was president of the acting board of the General Convention of the Baptist denomination; and in 1814 was one of the originators of an association which resulted in the Northern Baptist Education Society. He was closely identified with the origin of the Newton Theological Seminary, and was for eighteen years president of its board of trustees. In 1828 he was chosen a fellow of Brown University, and held the office till the close of his life. He received his degree of D.D. from Harvard University in 1828, of whose board of officers he was appointed a member in 1846. He died in Baltimore, June 23, 1852. Mr. Sharp published seventeen *Sermons and Discourses* (1824-52):—also *Recognition of Friends in Heaven* (4 editions):—and a *Tribute of Respect to Mr. Ensign Lincoln* (1832). See Sprague, *Annals of the Amer. Pulpit*, vi, 565.

Sharp, David, a minister of the Methodist Episcopal Church, was born in New Jersey Sept. 5, 1787, and removed with his parents to Virginia, and in 1800 to

Logan County, O. Of Quaker parentage, he united with the Methodist Episcopal Church in 1807, and in 1810 he was licensed to preach. He entered the Ohio Conference in September, 1813, and in 1819 was transferred to the Missouri Conference, where he served five years as presiding elder. In 1825 he was transferred to the newly organized Pittsburgh Conference, in which he labored twenty-four years; and was then (1849) transferred back to the Ohio Conference. Upon its division (1852) he fell into the Cincinnati Conference, and in 1860 received a superannuated relation. He died April 21, 1865. Mr. Sharp was an efficient, acceptable, and successful minister. See *Minutes of Annual Conferences*, 1865, p. 162.

Sharp, Elias C., a Presbyterian minister, was born in Willington, Conn., March 18, 1814. He was left an orphan in early years, but by patient effort was able to attend Amherst College, where he graduated; studied divinity in the Western Reserve Theological Seminary, Hudson, O.; was licensed by Cleveland Presbytery Sept. 1, 1840; and ordained by Portage Presbytery, June 1, 1842, as pastor of the First Congregational Church of Atwater, Portage Co., O. This was his only charge. Here he labored for a quarter of a century, and died Jan. 5, 1867. Mr. Sharp possessed ability, both natural and acquired. As a minister he was eminently successful; and while pastor of his only charge, nearly two hundred connected themselves with the Church of God. See Wilson, *Presb. Hist. Almanac*, 1868, p. 226. (J. L. S.)

Sharp, Granville, a Christian philanthropist and writer, was born in 1734. He was educated for the bar, but, leaving the legal profession, he obtained a place in the Ordnance Office, which he resigned at the commencement of the American war, the principles of which he did not approve. He then took chambers in the Temple, and devoted himself to a life of study. He first became known to the public by his interest in a poor and friendless negro brought from the West Indies, and turned out in the streets of London to beg or die. Sharp befriended the negro, not only feeding him and securing him a situation, but also defending him against his master, who wished to reclaim him as a runaway slave. But the decision of the full bench was with Sharp, that the negro was under the protection of English law and no longer the property of his former owner. Thus Sharp emancipated forever the blacks from slavery while on British soil, and, in fact, banished slavery from Great Britain. He now collected a number of other negroes found wandering about the streets of London and sent them back to the West Indies, where they formed the colony of Sierra Leone. He was also the institutor of the "Society for the Abolition of the Slave-trade." Sharp was led to oppose the practice of marine impressment; and on one occasion obtained a writ of *habeas corpus* from the Court of King's Bench to bring back an impressed citizen from a vessel at the Nore, and by his arguments obliged the court to liberate him. He became the warm advocate of "parliamentary reform," arguing the people's natural right to a share in the legislature. Warmly attached to the Established Church, he was led to recommend an Episcopal Church in America, and introduced the first bishops from this country to the archbishop of Canterbury for consecration. Sharp died July 6, 1813. He was an able linguist, deeply read in theology, pious and devout. He published sixty-one works, principally pamphlets upon theological and political subjects and the evils of slavery. The following are the most important: *Remarks on a Printed Paper entitled a Catalogue of the Sacred Vessels restored by Cyrus*, etc. (Lond. 1765, 1775, 8vo):—*Remarks on Several very Important Prophecies* (1768, 1775, 8vo, 5 parts):—*Slavery in England* (1769, 8vo; with appendix, 1772, 8vo):—*Declaration of the People's Natural Rights*, etc. (1774, 1775, 8vo):—*Remarks on the Uses of the Definite Article in the Greek Text of the New Testament* (Durham, 1798,

8vo; 2d ed. with an appendix on Christ's divinity, 1802, 12mo):—*On Babylon* (1805, 12mo):—*Case of Saul* (1807, 12mo):—*Jerusalem* (1808, 8vo). See Hoare, *Memoirs and Correspondence of Granville Sharp* (1820, 4to; 2d ed. 1828, 2 vols. 8vo); Stuart, *Memoirs of Granville Sharp* (N. Y. 1836, 12mo).

Sharp, James, archbishop of St. Andrew's, was the son of William Sharp, sheriff-clerk of Banffshire, and was born in the castle of Banff, May, 1618. He was educated for the Church at the University of Aberdeen, but on account of the Scottish Covenant retired to England in 1638. Returning to Scotland, he was appointed professor of philosophy at St. Andrew's, through the influence of the earl of Rothes, and soon after minister of Crail. In 1656 he was chosen by the moderate party in the Church to plead their cause before the Protector against the Rev. James Guthrie, a leader of the extreme section (the Protestors, or Remonstrators). Upon the eve of the Restoration Sharp was appointed by the moderate party to act as its representative in the negotiations opened up with Monk and the king. In this matter he is believed to have acted with perfidy, receiving as a compensation, after the overthrow of Presbyterian government by Parliament, the archbishopric of St. Andrew's, to which he was formally consecrated at London by the bishop of London and three other prelates. His government of the Scottish Church was tyrannical and oppressive, and, in consequence, he became an object of hatred and contempt. He had a servant, one Carmichael, who by his cruelty had rendered himself particularly obnoxious to the Presbyterians. Nine men formed the resolution of waylaying the servant in Magus Muir, about three miles from St. Andrew's. While they were there waiting, Sharp appeared in a coach with his daughter, and was immediately despatched despite her tears and entreaties, May 3, 1679. In defence of Sharp, the utmost that can be said is that he was simply an ambitious ecclesiastic who had no belief in the "divine right" of Presbytery, and who thought that if England were resolved to remain Episcopalian it would be very much better if Scotland would adopt the same form of Church government.

Sharp, John, D.D., an English prelate, was born at Bradford, Yorkshire, 1644. He was admitted to Christ College, Cambridge, from which he graduated in December, 1663. In 1667 he took the degree of M.A., was ordained both deacon and priest, and became domestic chaplain to Sir Heneage Finch, through whose influence he was appointed, in 1672, archdeacon of Berkshire. Three years later he was preferred to a prebend of Norwich, to the rectory of St. Bartholomew's, Royal Exchange, London, and to the rectory of St. Giles's in the Fields. In 1679 he took the degree of D.D. and accepted the lectureship at St. Lawrence Jury, which he resigned in 1683. He was promoted by Sir H. Finch to the deanery of Norwich in 1681. Because of the firm position he took, May 2, 1686, against popery, he was suspended, but was reinstated in January, 1687. He was installed dean of Canterbury, Nov. 25, 1689, and was consecrated archbishop of York, July 5, 1691. On the accession of queen Anne, Mr. Sharp became a member of her privy council and her lord almoner. He died at Bath, Feb. 2, 1714. Bishop Sharp was a man of amiable disposition and unshaken integrity, a faithful and vigilant governor. He published a number of separate sermons which were collected into 7 vols. 8vo, 1709; also 1715, 1728, 1729, 1735, 1749, and in 7 vols. 12mo in 1754 and 1756. They were republished under title of *Works* (Oxford, 1829, 5 vols. 8vo). See his *Life*, by Thomas Sharp, D.D. (Lond. 1825, 2 vols. 8vo).

Sharp, John M'Clure, a minister of the Methodist Episcopal Church, was born in Rush County, Ind., 1825, and united with the Church in 1841. He received license to preach in 1854, and was admitted into

the South-eastern Indiana Conference in 1860. In 1865 he was obliged to retire from the work, and Sept. 15, 1866, he died. See *Minutes of Annual Conferences*, 1866, p. 204.

Sharp, Lionel, D.D., an English clergyman, was chaplain to Henry, Prince of Wales; also rector of Malpas, minister of Tiverton, and in 1605 archdeacon of Berks. He died in 1630. His published works are, *Oratio Funebris in Hon. Hen. Wall. Principis* (Lond. 1612, 4to):—*Novum Fidei Symbolum, sive de Novis* (1612, 4to); *Speculum Papæ*, etc. (1612, 4to); Nos. 2 and 3 were translated into English and published under the title of *A Looking-glass for the Pope* (1623, 4to). He also published a *Sermon* (1603, 8vo):—and other sermons. See Bliss's *Wood's Fasti Oxon.* i, 385; also Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Sharp, Samuel M., a missionary of the Presbyterian Church, was born in West Middletown, Pa., Nov. 23, 1834. He received a thorough Christian training at the hands of his parents, graduated at Jefferson College, Pa., in 1855, and at the Western Theological Seminary at Allegheny City, Pa., in 1858, was licensed and ordained as an evangelist in the spring of the same year, and sailed for Bogotá, South America, June 18, 1858. Arriving there July 20, he at once commenced his great life-work. His wife (being the daughter of Rev. Jesse M. Jamieson, one of the missionaries to India) was his helpmeet and adviser, and their prospects for eminent usefulness were indeed bright; but in the midst of their labors he was taken ill with fever, and died at the mission-house in Bogotá, Oct. 30, 1860. Mr. Sharp was a good man and a devoted missionary, of earnest and consistent piety. See Wilson, *Presb. Hist. Almanac*, 1862, p. 117. (J. L. S.)

Sharp, Solomon, a minister of the Methodist Episcopal Church, was born in Carolina County, Md., April 6, 1771. His parents were pioneer Methodists. In 1791, when about twenty years old, he began to travel "under the presiding elder." In 1792 he was admitted to the conference and sent to Milford Circuit, Del.; and he continued in the service, occupying almost all important appointments in New Jersey, Delaware, and Pennsylvania down to 1835, when he was reported superannuated. He died at Smyrna, Del., March 13, 1836. Mr. Sharp was an original, an eccentric, but a mighty man. "His sermons were powerful, and delivered with a singular tone of authority, as if he were conscious of his divine commission." He was noted for his courage, and it is believed that he was hardly capable of feeling fear. See *Minutes of Conferences*, ii, 409; Stevens, *Hist. of the M. E. Church*, iii, 413-415; Sprague, *Annals of the Amer. Pulpit*, vii, 217; Manship, *Thirteen Years in the Itinerancy*, p. 49; Simpson, *Cyclopædia of Methodism*, s. v. (J. L. S.)

Sharp, Thomas, a younger son of John Sharp (q. v.), and also an English prelate, was born in 1693, entered Trinity College, Cambridge, 1708, and took his B.A. in 1712 and M.A. in 1716. He was a fellow of the college, and took the degree of D.D. in 1729. At first chaplain to archbishop Dawes, he was, July, 1720, colated to the rectory of Rothbury, Northumberland. He held the prebend of Southwell, and afterwards that of Wistow, in York Cathedral, and in 1722 he became archdeacon of Northumberland. In 1755 he succeeded Dr. Manges in the officiality of the dean and chapter. He died March 6, 1758, and was interred in Durham Cathedral. He published a *Concio ad Clerum* when he took his doctor's degree:—*The Rubric in the Book of Common Prayer* (1753):—*Sermons* (1763, 8vo):—*Two Dissertations on the Hebrew Words Elohim and Berith* (1751, 8vo).

Sharpe, Gregory, D.D., an English clergyman, was born in Yorkshire, in 1713, and, after passing some time at the grammar-school of Hull, went to Westminster, where he studied under Dr. Freind; but in 1731 he was settled

with principal Blackwell in Aberdeen. Here he remained until he had finished his studies, when he returned to England, and in a few years entered into orders. He was appointed minister of the Broadway chapel, in which he continued till the death of Dr. Nicholls of the Temple, when he was declared the doctor's successor, and in this station he continued until his death, which occurred in the Temple-house, Jan. 8, 1771. His works were, a *Defence* of the late Dr. Samuel Clarke (Lond. 1774, 8vo):—two *Dissertations: Upon the Origin, etc., of Languages*; and *Upon the Original Powers of Letters* (ibid. 1751, 8vo):—two *Arguments in Defence of Christianity* (ibid. 1755-62, 8vo):—*The Rise and Fall of the Holy City and Temple of Jerusalem* (ibid. 1765-66, 8vo):—besides various *Letters* and *Sermons*.

Sharpness OF DEATH are, in the *Te Deum*, the pains and agonies suffered by the Redeemer on the cross, but which he overcame at his resurrection, God having raised him up, "having loosed the pains of death, because it was not possible that he should be holden of it" (Acts ii, 24).

Sharrock, ROBERT, an English clergyman, was born at Adstock, in Buckinghamshire, in the 17th century, and was sent from Winchester School to New College, Oxford, where he was admitted perpetual fellow in 1649. In 1660 he took the degree of doctor of civil law, was prebendary and archdeacon of Winchester, and rector of Bishop's Waltham, in Hampshire. He died July 11, 1684, having the character of a good divine, civilian, and lawyer. His works are, *History of the Propagation, etc., of Vegetables*, etc. (Oxon, 1666 and 1672, 8vo):—*Hypothesis de Officiis secundum Humanæ Rationis Dictata*, etc. (ibid. 1660, 8vo, and 1682):—also ten sermons on the *Ends of the Christian Religion* (4to).

Sharu'hen [some *Shar'uhen*] (Heb. *Sharuchen'*, שָׂרֻחֵן, *refuge of grace*; Sept. ἀρροί αὐτῶν [probably reading שְׂרִיחַ]), a town originally in Judah, afterwards set off to Simeon (Josh. xix, 6); hence in the Negeb, or "south country." See JUDAH. It seems to be the same elsewhere called SHILHIM (Josh. xv, 32), or SHAAIRAİM (1 Chron. iv, 31), but probably by erroneous transcription, in the latter case at least. Knobel (*Exeg. Handb.* on Josh. xv, 32) suggests, as a probable identification, *Tell Sheri'ah*, about ten miles west of Bir-es-Seba, at the head of Wady Sheri'ah (the "watering-place"). Wilton locates it near Ruhaibah (Rehoboth), but his reasons are uncritical (*The Negeb*, p. 217 sq.). See SIMEON.

Shashabigna, in Hindû mythology, is a surname of *Buddha*, denoting "the possessor of the six sciences."

Sha'shai [many *Shash'ai*, some *Shasha'i*] (Heb. *Shashay'*, שָׁשַׁי, *whitish* [Gesenius], or *noble* [Fûrst]; Sept. Σασή), one of the "sons" of Bani who divorced his Gentile wife after the captivity (Ezra x, 40). B.C. 457. See SHESHAI.

Sha'shak (Heb. *Shashak'*, שָׁשָׁק, *longing*; Sept. Σωσῆς), a Benjamite, son of Beriah, descendant of Elpaal, and father of Ishpan and many others (1 Chron. viii, 14, 25). B.C. post 1618.

Shastamuni, in Hindû mythology, is a surname of *Buddha*, signifying "the instructor of the Munis."

Shastava, in Hindû mythology, is a surname of *Siva*, denoting "the avenger."

Shastras, or **Shasters**, **The Great** (from the Sanscrit *sās*, "to teach"), the sacred books of the Hindûs. They are all of them written in the Sanscrit language, and believed to be of divine inspiration. They are usually reduced to four classes, which again are subdivided into eighteen heads. The first class consists of the four Vedas, which are accounted the most ancient and the most sacred compositions. The second class consists of the four *Upa-vedas*, or sub-Scriptures, and

the third class of the six *Ved-angas*, or bodies of learning. The fourth class consists of the four *Up-angas*, or appended bodies of learning. The first of these embraces the eighteen Purānas, or sacred poems. Besides the Purānas, the first *Up-anga* comprises the *Ramayāna* and *Mahabhārata*. The second and third *Up-angas* consist of the principal works on logic and metaphysics. The fourth and last *Up-anga* consists of the body of law, in eighteen books, compiled by Manu, the son of Brahma, and other sacred personages.

Shatrani, in Hindû mythology, was the wife of the man Shutri, or Kshetri, whom Brahma formed out of his right arm, and who became the ancestor of the Kshetri, or warrior caste. Shatrani was created by Brahma out of his left arm.

Sha'ul (Heb. *Shaūl'*, שָׁאֻל, *asked*; Sept. Σαούλ), the name of three men thus designated in the A. V. For others, see SAUL.

1. The son of Simeon by a Canaanitish woman (Gen. xlii, 10; Exod. vi, 15; Numb. xxvi, 13; 1 Chron. iv, 24), and founder of the family of the Shaulites. B.C. cir. 1880. The Jewish traditions identify him with Zimri, "who did the work of the Canaanites in Shittim" (Targ. Pseudo-Jon. on Gen. xlii).

2. Shaul of Rehoboth by the river was one of the kings of Edom, and successor of Samlah (1 Chron. i, 48, 49). In the A. V. of Gen. xxxvi, 37 he is less accurately called Saul (q. v.).

3. A Kohathite, son of Uziah (1 Chron. vi, 24). B.C. cir. 1030.

Sha'ulite (Heb. *Shaūlī*, שְׁאֻלִי; Sept. Σαουλίδ), a designation of the descendants of Shaul 1 (Numb. xxvi, 13).

Sha'veh (Heb. *Shaveh'*, שָׁוֶה, *plain*; Sept. Σαυή v. r. Σαήν and Σαβή; Vulg. *Sare*), a name found thus alone in Gen. xiv, 17 only, as that of a place where the king of Sodom met Abraham. It occurs also in the name Shavehkiriathaim (q. v.). The Samar. Codex inserts the article, הַשָּׁוֶה; but the Samaritan Version has מִשְׁכַּנָּה. The Targum of Onkelos gives the same equivalent, but with a curious addition, "the plain of *Mefana*, which is the king's place of racing," recalling the ἵπποδρόμος so strangely inserted by the Sept. in Gen. xlviii, 7. It is one of those archaic names with which this venerable chapter abounds—such as Bela, En-mishpat, Ham, Hazezon-tamar—so archaic that many of them have been elucidated by the insertion of their more modern equivalents in the body of the document by a later but still very ancient hand. If the signification of *Shaveh* be "valley," as both Gesenius and Fûrst assert, then its extreme antiquity is involved in the very expression "the Emek-shaveh," which shows that the word had ceased to be intelligible to the writer, who added to it a modern word of the same meaning with itself. It is equivalent to such names as "Puente de Alcantara," "the Greenes Steps," etc., where the one part of the name is a mere repetition or translation of the other, and which cannot exist till the meaning of the older term is obsolete. In the present case the explanation does not throw any very definite light upon the locality of Shaveh: "The valley of Shaveh, that is the valley of the king" (xiv, 17). True, the "valley of the king" is mentioned again in 2 Sam. xviii, 18 as the site of a pillar set up by Absalom; but this passage again conveys no clear indication of its position, and it is by no means certain that the two passages refer to the same spot. The extreme obscurity in which the whole account of Abraham's route from Damascus is involved has already been noticed under SALEM. A notion has long been prevalent that the pillar of Absalom is the well-known pyramidal structure which forms the northern member of the group of monuments at the western foot of Olivet. This is apparently first mentioned by Benjamin of Tudela (A.D. 1160), and next by Maundeville (1323), and is perhaps originally founded on the statement of Josephus

(*Ant.* vii, 10, 3) that Absalom erected (ἔστηκε) a column (στήλη) of marble (λίθου μαρμαρίνου) at a distance of two stadia from Jerusalem. But neither the spot nor the structure of the so-called "Absalom's tomb" agrees either with this description or with the terms of 2 Sam. xviii, 18. The "valley of the king" was an *Emek*—that is, a broad, open valley, having few or no features in common with the deep, rugged ravine of the Kedron, unless, perhaps, in its lower part. See VALLEY. The pillar of Absalom—which went by the name of "Absalom's hand"—was set up, erected (בָּנָה), according to Josephus, in marble, while the lower existing part of the monument (which alone has any pretension to great antiquity) is a monolith not erected, but excavated out of the ordinary limestone of the hill, and almost exactly similar to the so-called "tomb of Zechariah," the second from it on the south. Yet even this cannot claim any very great age, since its Ionic capitals and the ornaments of the frieze speak with unflinching voice of Roman art. Nevertheless, in the absence of any better indication, we are perhaps warranted in holding this traditional location. See KING'S DALE.

Sha'veh-kiriatha'im (Heb. *Shaveh' Kiryatha'im*, שָׁוֵה כִּרְיָתָאִים, *plain of the double city*; Sept. Σανὴ ἡ πόλις), a plain at or near the city of Kiriathaim, occupied by the Emim at the time of Chedorlaomer's invasion (Gen. xiv, 5). Schwarz finds the town (which is known to have been located east of the Jordan) in the ruins of *Kiriât*, one and a half mile south-west from Mount Atara (*Palest.* p. 228), and the dale, or *Shaveh* (q. v.), must have been in the immediate vicinity. See KIRJATHAIM.

Shaving (properly שָׁבַח, *ḥavāw*). The ancient Egyptians were the only Oriental nation who objected to wearing the beard. Hence, when Pharaoh sent to summon Joseph from his dungeon, we find it recorded that the patriarch "shaved himself" (Gen. xli, 14). Shaving was therefore a remarkable custom of the Egyptians, in which they were distinguished from other Oriental nations, who carefully cherished the beard, and regarded the loss of it as a deep disgrace. That this was the feeling of the Hebrews is obvious from many passages (see especially 2 Sam. x, 4); but here Joseph shaves himself in conformity with an Egyptian usage, of which this passage conveys the earliest intimation, but which is confirmed not only by the subsequent accounts of Greek and Roman writers, but by the ancient sculptures and paintings of Egypt, in which the male figure is usually beardless. It is true that in sculptures some heads have a curious rectangular beard, or rather beard-case attached to the chin; but this is proved to be an artificial appendage by the same head being represented sometimes with and at other times without it, and still more by the appearance of a band which passes along the jaws and attaches it to the cap on the head or to the hair. It is concluded that this appendage was never actually worn, but was used in sculpture to indicate the male character. See BEARD.

The practice of shaving the beard and hair, and sometimes the whole body, was observed among the Hebrews only under extraordinary circumstances. The Levites on the day of their consecration, and the lepers at their purification, shaved all the hair off their bodies (Numb. viii, 7; Lev. xiv, 8, 9). A woman taken prisoner in war, when she married a Jew, shaved the hair off her head (Deut. xxii, 12), and the Hebrews generally, and also the nations bordering on Palestine, shaved themselves when they mourned, and in times of great calamity, whether public or private (Isa. vii, 20; xv, 2; Jer. xli, 5; xlviii, 37; Bar. vi, 30). God commanded the priests not to cut their hair or beards in their mournings (Lev. xxi, 5). It may be proper to observe that, among the most degrading of punishments for women is the loss of their hair; and the apostle hints at this (1 Cor. xi, 6): "If it be a shame for a woman to be shorn or shaven," etc. See HAIR.

Modern Orientals shave the head alone, and that only in the case of settled residents in towns (Van Lennep, *Bible Lands*, p. 517). See BARBER.

SHAVING. In the early Church the clergy were exhorted to a decent mean in dress and habits. Thus, for instance, long hair and baldness, by shaving the head or beard, being then generally reputed indecencies in contrary extremes, the clergy were obliged to observe a becoming mediocrity between them. This is the meaning, according to its true reading, of that controverted canon of the fourth Council of Carthage, which says that a clergyman shall neither indulge long hair, nor shave his beard: "Clericus nec comam nutriat, nec barbam radat." Sidonius Apollinaris (lib. iv, ep. 24) describes his friend Maximus Palatinus, a clergyman, as having his hair short and his beard long. Shaving of the monks was performed at certain fixed times, the razors being kept in an ambry close to the entrance to the dormitory (Bingham, *Christ. Antiquities*, VI, iv, 15). Eustathius, the heretic, was for having all virgins shorn or shaven at their consecration, but the Council of Gangra immediately rose up against him and anathematized the practice, passing a decree in these words: "If any woman, under pretence of an ascetic life, cut off her hair, which God hath given her for a memorial of subjection, let her be anathema, as one that disannuls the decree of subjection." Theodosius the Great added a civil sanction to confirm the ecclesiastical decree. See Bingham, *Antiquities of the Christian Church*, VII, iv, 6. See TONSURE.

Shaving-man, the officer—frequently a door-keeper, as at St. Mary Magdalen College, Oxford—whose duty it was to shave the beards of the clerics in a college or religious house.

Shav'sha (Heb. *Shavsha'*, שָׁוֵשָׁא, *nobility* [Furst]; Sept. Σουσα v. r. Σούγ, and even Ἰησοῦς), the royal secretary in the reign of David (1 Chron. xviii, 16). He is apparently the same with SERATAH (2 Sam. viii, 17), who is called Σουρά by Josephus (*Ant.* vii, 5, 4), and Σουρά in the Vat. MS. of the Sept. *Shisha* is the reading of two MSS. and of the Targum in 1 Chron. xviii, 16. In 2 Sam. xx, 25 he is called ΣΙΕΥΑ, and in 1 Kings iv, 3 SHISHA.

Shaw, Addison C., a minister of the Methodist Episcopal Church, was born about 1814, and united with the Church when fourteen years of age. He was licensed as a local preacher when twenty-four years old, and joined the Michigan Conference, becoming a member of the Detroit Conference at its formation. He died at Ypsilanti, Dec. 21, 1875. See *Minutes of Annual Conferences*, 1876, p. 100.

Shaw, Jacob, a minister of the Methodist Episcopal Church, entered the New York Conference in 1831, and occupied various stations and circuits in that and the New York East Conference. In 1858 he retired from itinerancy, but continued to preach as his strength would permit. He died at his residence in Redding, Conn., in April, 1861. He was a man of superior mind and large information, and a preacher of great acceptability. See *Minutes of Annual Conferences*, 1862, p. 81.

Shaw, John (1), an English clergyman, was born at Bedlington, Durham, England, and entered Brasenose College, Oxford, in 1629, aged fifteen years. He was instituted rector of Whalton, Northumberland, in 1645, but was not admitted until 1661. In the interval he served the church of Bolton, Craven, Yorkshire. He died in 1689. His works are, *No Reformation of the Established Reformation* (Lond. 1685, 8vo):—*Portraiture of the Primitive Saints* (4to):—*Origo Protestantium* (ibid. 1677, 4to).

Shaw, John (2), a Methodist Episcopal minister, was born in Waterford, Me., Feb. 12, 1800, was licensed as a local preacher in 1821, commenced travelling on Livermore Circuit, and in June, 1822, was admitted on trial in the travelling connection and appointed to St.

Croix Circuit, in 1823 to Bethel, and in 1824 to Buxton, where he died, Aug. 20, 1825. He was a man of uniform piety, strong in his attachment to the cause of God, and his praise as a preacher was in all the circuits where he labored. See *Minutes of Conferences*, i, 546; Bangs, *Hist. of the M. E. Church*, iii, 359.

Shaw, John (3), a minister of the Methodist Episcopal Church, was born at Bristol, Ontario Co., N. Y., July 11, 1807, and united with the Church at the age of eighteen. He was received into the Genesee Conference in 1831, and ordained deacon in 1833 and elder in 1835. He spent thirty-six years in the effective ministry, was superannuated in 1869, and died Jan. 16 of the same year at Himrods, Yates Co., N. Y. See *Minutes of Annual Conferences*, 1869, p. 282.

Shaw, John B., a Presbyterian minister, was born in Rutland, Vt., May 23, 1798. He graduated at Middlebury College, Vt., studied theology with Rev. Charles Walker, and was licensed by the Rutland Congregational Association. In 1824 he was ordained by Troy Presbytery, and installed pastor of the Congregational Church at South Hartford, Washington Co., N. Y., and subsequently preached as follows: North Granville, Washington Co., N. Y.; Bethel; Utica, N. Y.; Congregational Church, Romeo, Mich.; Norwalk, Conn.; a second time at South Hartford, N. Y.; Presbyterian Church, Fort Ann, N. Y., as a missionary; Congregational Church, Fairhaven, N. Y.; the Reformed Protestant Dutch Church, Buskirk's Bridge, N. Y.; and the Presbyterian Church at Stephentown, Rensselaer Co., N. Y. He died May 8, 1865. Mr. Shaw was a man of unusual Christian devotedness. "His highly evangelical mode of expressing truth, his eminently successful pastoral qualifications, and his Christian gentleness of spirit made him an exceedingly useful man in his day." See Wilson, *Presb. Hist. Almanac*, 1866, p. 224. (J. L. S.)

Shaw, John D., a minister of the Methodist Episcopal Church, South, was born in Londonderry County, Ireland, about 1833, but he emigrated to this country, and joined the Methodist Church at Jackson, La., in February, 1851. He studied at Centenary College, Jackson, entered the ministry about 1852 or 1854, and died in Bolivar County, Miss., Oct. 30, 1866. See *Minutes of Annual Conferences of M. E. Church, South*, 1866, p. 47.

Shaw, John Knox, a minister of the Methodist Episcopal Church, was born in Ireland, April 12, 1800, but while an infant was brought to Washington County, N. Y. He was licensed to preach Nov. 19, 1824, and was received on trial in the Philadelphia Conference in 1825. His active ministerial life lasted until 1858, during which he occupied many important stations, and also served as presiding elder. At the division of the Philadelphia Conference, he became a member of the Newark Conference. He took an active part in the founding of the Pennington Seminary, Pennington, N. J., of which he was a trustee at the time of his death. He died at Newark, N. J., Oct. 4, 1858. See *Minutes of Annual Conferences*, 1859; Simpson, *Cyclop. of Methodism*, s. v.

Shaw, Joseph, LL.D., a minister of the Associate Church of America, was born in the parish of Rattray, Aberdeenshire, Scotland, Dec. 6, 1778. He received his preparatory education in his native village, and entered the University of Edinburgh a little before he had completed his thirteenth year. He graduated in 1794, and immediately entered the Associate Divinity Hall at Whitburn, where he remained five years, and in 1799 was licensed to preach. Application being made by the Walnut Street Church, Philadelphia, for a preacher, Mr. Shaw was appointed to the place. He accepted the appointment, and commenced to serve that people in the fall of 1805. In 1809 his lungs became affected, and in 1810 he terminated his ministry in Philadelphia. In 1813 he became professor of languages in Dickinson College, and in 1815 accepted the similar professorship in the Albany Academy. In 1821 he was honored with

the degree of LL.D. from Union College. He died in August, 1824. He published a *Sermon preached before the Albany Bible Society in 1820* (8vo); and his last sermon, *The Gospel Call*, was published shortly after his death, with a brief biographical notice. See Sprague, *Annals of the Amer. Pulpit*, ix, 85.

Shaw, Levi, a minister of the Methodist Episcopal Church, was born at Frankfort, Me., Sept. 4, 1822. He received regenerating grace Nov. 17, 1842, and soon after united with the Church. He obtained license as a local preacher in 1846, and in 1851 was received on trial in the East Maine Conference. He took, because of ill-health, a superannuated relation in 1860, and held it until his death, at Newburyport, Mass., Aug. 17, 1867. After he had become superannuated, he still continued to labor for shorter or longer periods upon different charges, and also served as a delegate of the Christian Commission. See *Minutes of Annual Conferences*, 1868, p. 142.

Shaw, Samuel, a learned Nonconformist, was born at Repton, Derbyshire, England, in 1635. At the age of fourteen he entered St. John's College, Cambridge. He was master of the Free School at Tamworth in 1656, and in 1658 obtained a presentation from Cromwell to the rectory of Long Whatton, which he was deprived of about a year before the Act of Uniformity. He refused it afterwards on the condition of reordination, as he would not declare his Presbyterian ordination invalid. In 1666 he was chosen master of the Free School at Ashby-de-la-Zouch, which position he retained until his death, Jan. 22, 1696. His works are, *Immanuel, or a Discovery of True Religion* (Lond. 1667, 12mo):—another edition, with memoir, etc. (Leeds, 1804):—*Words Made Visible, or Grammar and Rhetoric* (1679, 8vo):—also several religious *Tracts*.

Shaw, Samuel P., a minister of the Methodist Episcopal Church, was born in New Jersey, Nov. 6, 1798, but was taken to Ohio when a child, his parents settling in Hamilton County. He was licensed to preach when about twenty-two years old, and in 1825 was received on trial into the Ohio Conference, afterwards becoming a member of the North Ohio Conference. For several years he was a missionary among the Wyandots at Upper Sandusky, and also served as presiding elder on several districts. He retired from the pastoral work several years before his death, which occurred near Bucyrus, O., Aug. 19, 1875. See *Minutes of Annual Conferences*, 1875, p. 104.

Shaw, Thomas, an English clergyman and traveller, was born at Kendal, Westmoreland, about 1692, and entered Queen's College, Oxford, Oct. 5, 1711. He took his degree of bachelor of arts July 5, 1716, was made master of arts Jan. 16, 1719, went into orders, and became chaplain to the English factory at Algiers. Here he remained several years, spending much of his time in travelling. He was chosen fellow of his college March 16, 1727, and on his return to England (1733), took the degree of doctor of divinity. In 1740 he became principal of St. Edmund's Hall, and received also the living of Bramley, Hants. He was regius professor of Greek at Oxford till his death, which occurred Aug. 15, 1751. Mr. Shaw published, *Travels, etc., in Barbary and the Levant* (Oxf. 1738):—*Vindication of the Above* (Lond. 1757, 4to), with supplement. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

Shaw, William C., a minister of the Methodist Episcopal Church, was born in Vevay, Ind., Oct. 2, 1833. He became a Christian when seventeen, and three years later entered Asbury University. In 1854 he was licensed to preach, and in 1857 was received into the South-eastern Indiana Conference; but in 1859 he went to Minnesota, and entered the Minnesota Conference. In 1863 he was superannuated, but in 1864 resumed work, was again superannuated in 1872, made effective in 1873, and appointed to Reed's and Wabashaw, his last appointment. He died at Reed's Landing,

Minn., Feb. 16, 1874. See *Minutes of Annual Conferences*, 1874, p. 152.

Shawm. In the Prayer-book version of Psa. xcvi, 7, "with trumpets also and *shawms*" is the rendering of what stands in the A. V. "with trumpets and sound of *cornet*." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarionet. The word occurs in the forms *shalm*, *shalmie*, and is connected with the German *Schalmeie*, a reed-pipe.

"With *shawms* and *trompets*, and with *clarions sweet*." Spenser, *F. Q. I*, xii, 13.

"Even from the shrillest *shawm* unto the *cornamute*." Drayton, *Polyolb*, iv, 366.

Mr. Chappell says (*Pop. Mus.* 1, 35, note b), "The modern clarionet is an improvement upon the shawm, which was played with a reed like the wayte, or hautboy, but, being a bass instrument, with about the compass of an octave, had probably more the tone of a bassoon." In the same note he quotes one of the "proverbis" written about the time of Henry VII on the walls of the Manor House at Leckington, near Beverley, Yorkshire

"A shawme maketh a swete sounde, for he tynnythe the hasse;

It mounthe not to hye, but kepith rule and space.
Yet yf it be blowne with to vehement a wynde,
It makithe it to mysgerve out of his kinde."

From a passage quoted by Nares (*Glossary*), it appears that the shawm had a mournful sound:

"He that never wants a Gilead full of balm
For his elect, shall turn thy woful *shalm*
Into the merry pipe."

G. Tooke, *Belides*, p. 18.

Shayith. See THORN.

Sheaf is the rendering in the A. V. of the following words in the original: 1. *לֶמְבֵּרֶת*, *alummah*, prop. a *bundle* ("sheaf," Gen. xxvii, 7; Psa. xcix, 6); 2. *אֵמֶר*, *amir*, prop. a *handful* (as rendered in Jer. ix, 22); hence a *sheaf* (Amos ii, 13; Mic. iv, 12; Zech. xii, 6); and the equivalent *אֵמֶר*, *omer* ("sheaf," Lev. xxiii, 10, 11, 12, 15; Deut. xxiv, 19; Ruth ii, 7, 15; Job xxiv, 10), as well as the cognate verb *אָמַר* to *bind sheaves* (Psa. cxxix, 7); 3. *אֵמֶרֶת*, *aremah*, prop. a *heap* (as rendered in Ruth iii, 7, etc.); hence a *sheaf* (as rendered in Neh. xiii, 15; improperly "heap" in Can. vii, 2).

The Mosaic statutes contained two prescriptions respecting the sheaves of harvest: 1. One accidentally dropped or left upon the field was not to be taken up, but remained for the benefit of the poor (Deut. xxiv, 19). See GLEAN. 2. The day after the feast of the Passover, the Hebrews brought into the Temple a sheaf of corn as the first-fruits of the barley-harvest, with accompanying ceremonies (Lev. xviii, 10-12). On the fifteenth of Nisan, in the evening, when the feast of the first day of the Passover was ended and the second day begun, the house of judgment deputed three men to go in solemnity and gather the sheaf of barley. The inhabitants of the neighboring cities assembled to witness the ceremony, and the barley was gathered into the territory of Jerusalem. The deputies demanded three times if the sun were set, and they were as often answered, It is. They afterwards demanded as many times if they might have leave to cut the sheaf, and leave was as often granted. They reaped it out of three different fields with three different sickles, and put the ears into three boxes to carry them to the Temple. The sheaf, or rather the three sheaves, being brought into the Temple, were threshed in the court. From this they took a full omer, that is, about three pints of the grain; and after it had been well winnowed, parched, and bruised, they sprinkled over it a log of oil, to which they added a handful of incense; and the priest who received this offering waved it before the Lord, towards the four quarters of the world, and cast part of it on the

IX.—R R

altar. After this every one might begin his harvest. See PASSOVER.

She'al (Heb. *She'al*, שְׁאֵל, *asking*; Sept. Σαῶλ v. r. Σαλονία), one of the "sons" of Bani, who divorced their foreign wives after the captivity (Ezra x, 29). B.C. 457.

Sheäl'tiel (Heb. *Sheältiel*, שְׁאֵלְתִּיֵּל, *asked of God*; Anglicized thus in the A. V. at Ezra iii, 2, 8; v, 2; Neh. xii, 1; Hag. i, 1; but "Salathiel" at 1 Chron. iii, 17; also in the contracted form *Shaltiel*, שְׁלֹתִיֵּל, "Shealtiel," Hag. i, 12, 14; ii, 2; Sept., Apocrypha, Josephus, and N. Test., Σαλαθιήλ; "Salathiel," 1 Esdr. v, 5, 48, 56; vi, 2; 2 Esdr. v, 16; Matt. i, 12; Luke iii, 27), the son of Jechoniah, or Jehoiachin, king of Judah, and father of Zerobabel, according to Matt. i, 12, but son of Neri (Neriah) and father of Zerobabel (Zerubbabel) according to Luke iii, 27; while the genealogy in 1 Chron. iii, 17-19 leaves it doubtful whether he is the son of Assir or Jechoniah, and makes Zerubbabel his nephew. The truth seems to be that he was the son of the captive prince Jechoniah, or Jehoiachin (for the prophecy in Jer. xxii, 30 seems only to mean that he should have no successor on the throne), by a daughter of Neri, or Neriah, of the private line of David; and that having himself no heir, he adopted his nephew Zerubbabel, or perhaps was the father of this last by his deceased brother's widow. B.C. cir. 580. See GENEALOGY OF CHRIST.

Shear'ah (Heb. *Shearyah*, שְׁעָרִיָּה, *valued of Jehovah*; Sept. Σαφαία v. r. Σαπία), the fourth named of the six sons of Aziel of the descendants of Saul (1 Chron. viii, 38; ix, 44). B.C. long post 1000.

Shearing-house (Heb. בֵּית שֶׁכַר הַרְעִים, *Beyth E'ked ha-Roim*; Sept. Βαίσακός [v. r. Βαίσακός] ὡν ποιμένων; Vulg. *Camera pastorum*), a place on the road between Jezreel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 Kings x, 12, 14). The translators of our version have given in the margin the literal meaning of the name—"house of binding of the shepherds," and in the text an interpretation perhaps adopted from Jos. Kimchi. Binding, however, is but a subordinate part of the operation of shearing, and the word *akad* is not anywhere used in the Bible in connection therewith. See SHEEP-SHEARER. The interpretation of the Targum and Arabic version, adopted by Rashi, viz. "house of the meeting of shepherds," is accepted by Simonis (*Onomast.* p. 186) and Gesenius (*Thesaur.* p. 195 b). Other renderings are given by Aquila and Symmachus. None of them, however, seem satisfactory, and it is probable that the original meaning has escaped. By the Sept., Eusebius, and Jerome it is treated as a proper name, as they also treat the "garden-house" of ix, 27. Eusebius (*Onomast.* s. v.) mentions it as a village of Samaria "in the great plain [of Esdraelon] fifteen miles from Legeon." It is remarkable that at a distance of precisely fifteen Roman miles from Lejjün the name of *Beth-Kad* appears in Van de Velde's map (see also Robinson, *Bib. Res.* ii, 316); but this place, though coincident in point of distance, is not on the plain, nor can it either belong to Samaria or be on the road from Jezreel thither, being behind (south of) Mount Gilboa. The slaughter at the well recalls the massacre of the pilgrims by Ishmael ben-Nethaniah at Mizpah, and the recent tragedy at Cawnpore. See BETH-EKED.

Sheär-ja'shub (Heb. *Sheär' Yashub*, שְׁעָרֵי יָשׁוּב, *a remnant shall return*; Sept. ὁ καταλειψείς ἱαούβ), son of the prophet Isaiah, who accompanied his father when he proceeded to deliver to king Ahaz the celebrated prophecy contained in Isa. vii (see ver. 3). B.C. cir. 735. As the sons of Isaiah sometimes stood for sigus

in Israel (Isa. viii, 18), and the name of Maher-shalhash-baz was given to one of them by way of prophetic intimation, it has been conjectured that the somewhat remarkable name of Shear-jashub intimated that the people who had then retired within the walls of Jerusalem should return in peace to their fields and villages (comp. Isa. x, 20-22). Fairbairn's theory that these events occurred only in visions (*On Prophecy*, I, v, 2) is in violation of the plain import of the language.

Sheath (Heb. נֶשֶׁת, *nadán*, 1 Chron. xxi, 27; נֶשֶׁת, *táar*, 1 Sam. xvii, 51; 2 Sam. xx, 8; Ezek. xxi, 3, 4, 5, 30; "scabbard," Jer. xlvii, 6; שֶׁחַב, John xviii, 11), the case in which a dagger or sword blade is carried. See KNIFE; SWORD.

She'ba, the name of several men and places in the Bible, but occurring in two forms in the original: (a) Heb. *Sheba'*, שֶׁבַּא (of uncertain etymology, see below), which is the name of three fathers of tribes in the early genealogy of Genesis, often referred to in the sacred books, one of them located in Ethiopia (No. 1, below), and the other two in Arabia (Nos. 2 and 3 respectively); (b) Heb. *She'ba*, שֶׁבַע, an oath, or seven, which is the name of two men, and also of a place (Nos. 4, 5, and 6, below). See also BEER-SHEBA.

1. (Sept. *Σαβᾶ* v. r. *Σαβάρ*.) First named of the two sons of Raamah, son of Cush (Gen. x, 7; 1 Chron. i, 9). B.C. post 2515. This Sheba settled somewhere on the shores of the Persian Gulf. In the *Marásid* (s. v.) there is found an identification which appears to be satisfactory—that on the island of Awál (one of the "Bahrein Islands") are the ruins of an ancient city called Sebá. Viewed in connection with Raamah, and the other facts which we know respecting Sheba, traces of his settlements ought to be found on or near the shores of the gulf. It was this Sheba that carried on the great Indian traffic with Palestine in conjunction with, as we hold, the other Sheba, son of Jokshan son of Keturah, who, like Dedan, appears to have formed with the Cushite of the same name one tribe—the Cushites dwelling on the shores of the Persian Gulf, and carrying on the desert trade thence to Palestine in conjunction with the nomad Keturahite tribes, whose pasturages were mostly on the western frontier. The trade is mentioned by Ezek. xxvii, 22, 23, in an unmistakable manner, and possibly by Isa. lx, 6, and Jer. vi, 20, but these latter, we think, rather refer to the Joktanite Sheba. The predatory bands of the Sabeans are mentioned in Job i, 15, and vi, 19, in a manner that recalls the forays of modern Bedawin (comp. Joel iii, 8).—Smith. See ARABIA; DEDAN, etc.

2. (Sept. *Σαβᾶ* v. r. *Σαβέυ* and *Σαβάν*.) Tenth named of the thirteen sons of Joktan son of the patriarch Eber (Gen. x, 28; 1 Chron. i, 22). B.C. cir. 2350. He seems to have been the founder and eponymous head of the Sabeans (q. v.), and to have given his name to Sheba or Seba (q. v.), a district in Arabia Felix abounding in frankincense, spices, gold, and precious stones (Isa. lx, 6, Jer. vi, 20; Psa. lxxii, 15). From this region came the queen to see and converse with Solomon (1 Kings, x, 1-13; 2 Chron. ix, 1-12; Matt. xii, 42; Luke xi, 31). The Sabeans were celebrated for their great trade (Psa. lxxii, 10; Ezek. xxvii, 22; Joel iii, 8) and for plundering (Job i, 15; vi, 19; comp. Strabo, xvi, 768-780; Abulfeda, p. 96). In the following detailed treatment of this name we introduce the illustrations of it from modern ethnographical, archaeological, and geographical sources.

It has been shown, in the art. ARABIA and other articles, that the Joktanites were among the early colonists of Southern Arabia, and that the kingdom which they there founded was, for many centuries, called the kingdom of Sheba, after one of the sons of Joktan. They appear to have been preceded by an aboriginal race, which the Arabian historians describe as a people of gigantic stature, who cultivated the land and peopled the deserts alike, living with the Jinn in the "deserted quarter,"

or, like the tribe of Thamúd, dwelling in caves. This people correspond, in their traditions, to the aboriginal races of whom remains are found wherever a civilized nation has supplanted and dispossessed the ruder race. But, besides these extinct tribes, there are the evidences of Cushite settlers, who appear to have passed along the south coast from west to east, and who, probably, preceded the Joktanites and mixed with them when they arrived in the country.

Sheba seems to have been the name of the great South Arabian kingdom and the peoples which composed it, until that of Himyer took its place in later times. On this point much obscurity remains; but the Sabeans are mentioned by Diod. Sic., who refers to the historical books of the kings of Egypt in the Alexandrian library, and by Eratosthenes, as well as Artemidorus, or Agatharchides (iii, 38, 46), who is Strabo's chief authority; and the Homeritæ or Himyerites are first mentioned by Strabo in the expedition of Ælius Gallus (B.C. 24). Nowhere earlier, in sacred or profane records, are the latter people mentioned, except by the Arabian historians themselves, who place Himyer very high in their list, and ascribe importance to his family from that early date. We have endeavored, in other articles, to show reasons for supposing that in this very name of Himyer we have the Red Man and the origin of Erythrus, Erythrean Sea, Phenicians, etc. See ARABIA; RED SEA. The apparent difficulties of the case are reconciled by supposing, as M. Caussin de Perceval (*Essai*, i, 54, 55) has done, that the kingdom and its people received the name of Sheba (Arabic, Sebá), but that its chief and sometimes reigning family or tribe was that of Himyer; and that an old name was thus preserved until the foundation of the modern kingdom of Himyer or the Tubbaas, which M. Caussin is inclined to place (but there is much uncertainty about this date) about a century before our æra, when the two great rival families of Himyer and Kahlan, together with smaller tribes, were united under the former. In support of the view that the name of Sheba applied to the kingdom and its people as a generic or national name, we find in the *Kamús* "the name of Sebá comprises the tribes of the Yemen in common" (s. v. "Sebá"); and this was written long after the later kingdom of Himyer had flourished and fallen. And, further, as Himyer meant the "Red Man," so, probably, did Sebá. In Arabic the verb *sebâ*—said of the sun, or of a journey, or of a fever—means "it altered" a man, i. e. by turning him red; the noun *sebâ*, as well as *sibâ* and *sebe-ah*, signifies "wine" (*Táj el-'Arús* MS.). The Arabian wine was red; for we read "Kumeit is a name of wine, because there is in it blackness and redness" (*Siháh* MS.). It appears, then, that in Sebá we very possibly have the oldest name of the Red Man, whence came *φοινῆξ*, Himyer, and Erythrus.

We have assumed the identity of the Arabic Seba with Sheba (שֶׁבַּא). The plur. form שֶׁבַע corresponds with the Gr. *Σαβαῖοι* and the Lat. *Subæi*. Gesenius compares the Heb. with Ethiop. *Sebe*, "man." The Hebrew *Shin* is, in by far the greater number of instances, *Sin* in Arabic [see Gesen.]; and the historical, ethnological, and geographical circumstances of the case all require the identification.

In the Bible the Joktanite Sheba, mentioned genealogically in Gen. x, 28, recurs as a kingdom, in the account of the visit of the queen of Sheba to king Solomon, when she heard of his fame concerning the name of the Lord, and came to prove him with hard questions (1 Kings x, 1): "And she came to Jerusalem with a very great train, with camels that bare spices, and very much gold, and precious stones" (ver. 2). Again, "She gave the king an hundred and twenty talents of gold, and of spices very great store, and precious stones: there came no more such abundance of spices as these which the queen of Sheba gave to king Solomon" (ver. 10). She was attracted by the fame of Solomon's wisdom, which she had heard in her own land; but the dedica-

tion of the Temple had recently been solemnized, and, no doubt, the people of Arabia were desirous to see this famous house. That the queen was of Sheba in Arabia, and not of Seba the Cushite kingdom of Ethiopia, is unquestionable. Josephus and some of the Rabbinical writers perversely, as usual, refer her to the latter; and the Ethiopian (or Abyssinian) Church has a convenient tradition to the same effect (comp. Josephus, *Ant.* viii, 6, 5; Ludolf, *Hist. Æthiop.* ii, 3; Harris, *Abyssinia*, ii, 105). Aben-Ezra (*on Dan.* xi, 6), however, remarks that the queen of Sheba came from the Yemen, for she spoke an Ishmaelitic, or rather a Shemitic, language. The Arabs call her Bilkis (or Yelkamah or Balkamah; Ibn-Khaldūn), a queen of the later Himyerites, who, if M. Caussin's chronological adjustments of the early history of the Yemen be correct, reigned in the 1st century of our æra (*Essai*, i, 75, etc.); and an edifice at Ma-rib (Mariaba) still bears her name, while M. Fresnel read the name of "Almacah" or "Balmacah" in many of the Himyeritic inscriptions. The Arab story of this queen is, in the present state of our knowledge, altogether unhistorical and unworthy of credit; but the attempt to make her Solomon's queen of Sheba probably arose, as M. Caussin conjectures, from the latter being mentioned in the Koran without any name, and the commentators adopting Bilkis as the most ancient queen of Sheba in the lists of the Yemen. The Koran, as usual, contains a very poor version of the Biblical narrative, diluted with nonsense and encumbered with fables (xxvii, 24, etc.).

The other passages in the Bible which seem to refer to the Joktanite Sheba occur in Isa. lx, 6, where we read "All they from Sheba shall come: they shall bring gold and incense;" in conjunction with Midian, Ephah, Kedar, and Nebaioth. Here reference is made to the commerce that took the road from Sheba along the western borders of Arabia (unless, as is possible, the Cushite or Keturahite Sheba be meant); and again in Jer. vi, 20, it is written "To what purpose cometh there to me incense from Sheba, and the sweet cane from a far country?" (but comp. Ezek. xxvii, 22, 23, and see below). On the other hand, in Psa. lxxii, 10, the Joktanite Sheba is undoubtedly meant; for the kingdoms of Sheba and Seba are named together, and in ver. 15 the gold of Sheba is mentioned. In Job i, 15; vi, 19, the predatory habits of the Keturahite Sabæans have been thought to be referred to, but these were later than our date of that book. We prefer to assign that passage, as well as Joel iii, 8, which speaks of their kidnapping propensities, to the Joktanite tribe, with which the other seems to have coalesced. The fact of the chief and best-ascertained settlement of the Sheba tribe being in the extreme south of the Arabian peninsula sufficiently explains the language used of the queen who came from thence to hear the wisdom of Solomon, that she was a queen of "the south," and "came from the uttermost parts of the earth," i. e. from the extremities of the then known world (Matt. xii, 42; Luke xi, 31). The distance in a straight line could scarcely be under a thousand miles. On the other hand, the fact that this was a queen seems to point to the Cushite Saba, or Meroë, the sovereigns of which are well known to have been chiefly or exclusively females. Later essays on the queen of Sheba's merits have been written by Rost (Bautz, 1782), Zeibich (Viteb, 1774), Schultens (Lugd. 1740), Norberg (Lond. and Goth. 1797). See CANDACE.

The kingdom of Sheba embraced the greater part of the Yemen, or Arabia Felix. Its chief cities, and probably successive capitals, were Sebà, San'ā (Uzal), and Zafār (Sephar). Sebà was probably the name of the city, and generally of the country and nation; but the statements of the Arabian writers are conflicting on this point, and they are not made clearer by the accounts of the classical geographers. Ma-rib was another name of the city, or of the fortress or royal palace in it: "Sebà is a city known by the name of Ma-rib, three nights' journey from San'ā" (Ez-Zejjaj, in the *Tāj-el-'Arūs* MS.). Again, "Sebà was the city of Ma-

rib (*Musharak*, s. v.), or the country in the Yemen, of which the city was Ma-rib" (*Marāsīd*, s. v.). Near Sebà was the famous dike of El-'Arim, said by tradition to have been built by Lukmān the 'Adite, to store water for the inhabitants of the place, and to avert the descent of the mountain torrents. The catastrophe of the rupture of this dike is an important point in Arab history, and marks the dispersion in the 2d century of the Joktanite tribes. This, like all we know of Sebà, points irresistibly to the great importance of the city as the ancient centre of Joktanite power. Although Uzal (which is said to be the existing San'ā) has been supposed to be of earlier foundation, and Zafār (Sephar) was a royal residence, we cannot doubt that Sebà was the most important of these chief towns of the Yemen. Its value, in the eyes of the old dynasties, is shown by their struggles to obtain and hold it; and it is narrated that it passed several times into the hands, alternately, of the so called Himyerites and the people of Hadramaut (Hazarmaveth). Eratosthenes, Artemidorus, Strabo, and Pliny speak of *Mariaba*; Diodorus, Agatharchides, Stephanus Byzant. of *Saba* (Σαβαί [Steph. Byzant.]; Σαβὰς [Agath.]); Ptolemy (vi, 7, § 30, 42), and Pliny (vi, 23, § 34) mention Σάβη. But the first all say that Mariaba was the metropolis of the Sabæi; and we may conclude that both names applied to the same place—one the city, the other its palace or fortress (though probably these writers were not aware of this fact)—unless, indeed, the form Sabota (with the variants Sabatha, Sobatale, etc.) of Pliny (*H. N.* vi, 28, § 32) have reference to Shibām, capital of Hadramaut, and the name, also, of another celebrated city, of which the Arabian writers (*Marāsīd*, s. v.) give curious accounts. The classics are generally agreed in ascribing to the Sabæi the chief riches, the best territory, and the greatest numbers of the four principal peoples of the Arabs which they name—the Sabæi, Ataramitæ (= Hadramaut), Katabeni (= Kahtan=Joktan), and Minæi (for which see DIKLAH). See Bochart (*Phaleg*, xxvi), and Müller (*Geog. Min.*), p. 186 sq.

The history of the Sabæans has been examined by M. Caussin de Perceval (*Essai sur l'Hist. des Arabes*); but much remains to be adjusted before its details can be received as trustworthy, the earliest safe chronological point being about the commencement of our æra. An examination of the existing remains of Sabæan and Himyeritic cities and buildings will, it cannot be doubted, add more facts to our present knowledge; and a further acquaintance with the language, from inscriptions aided, as M. Fresnel believes, by an existing dialect, will probably give us some safe grounds for placing the building or æra of the dike. In the art. ARABIA it is stated that there are dates on the ruins of the dike, and the conclusions are given which De Sacy and Caussin have drawn from those dates and other indications respecting the date of the rupture of the dike, which forms, then, an important point in Arabian history; but it must be placed in the 2d century of our æra, and the older æra of the building is altogether unfixed, or, indeed, any date before the expedition of Ælius Gallus. The ancient buildings are of massive masonry, and evidently of Cushite workmanship or origin. Later temples and palace-temples, of which the Arabs give us descriptions, were probably of less massive character; but Sabæan art is an almost unknown and interesting subject of inquiry. The religion celebrated in those temples was cosmic; but this subject is too obscure and too little known to admit of discussion in this place. It may be necessary to observe that whatever connection there was in religion between the Sabæans and the Sabians, there was none in name or in race. Respecting the latter the reader may consult Chwolson's *Sabier*, a work that may be recommended with more confidence than the same author's *Nabathæan Agriculture*. See NEBAIOTH. Some curious papers have also appeared in the *Journal* of the German Oriental Society of Leipsic, by Dr. Osiander.

3. (Sept. Σαβά v. r. Σαβαί and Σαβίρ.) Elder of the two sons of Jokshan, one of Abraham's sons by Keturah (Gen. xxv, 3; 1 Chron. i, 32). B.C. cir. 1980. He evidently settled somewhere in Arabia, probably on the eastern shore of the Arabian Gulf, where his posterity appear to have become incorporated with the earlier Sabaeans of the Joktanian branch.

4. (Sept. Σαβεί v. r. Ἀβεί; Josephus Σαβαῖος, *Ant.* vii, 11, 7.) The son of Bichri, a Benjamite from the mountains of Ephraim (2 Sam. xx, 1-22), the last chief of the Absalom insurrection. B.C. 1023. He is described as a "man of Belial," which seems [see SHIMEI] to have been the usual term of invective cast to and fro between the two parties. But he must have been a person of some consequence, from the immense effect produced by his appearance. It was, in fact, all but an anticipation of the revolt of Jeroboam. It was not, as in the case of Absalom, a mere conflict between two factions in the court of Judah, but a struggle, arising out of that conflict, on the part of the tribe of Benjamin to recover its lost ascendancy—a struggle of which some indications had already been manifested in the excessive bitterness of the Benjamite Shimei. The occasion seized by Sheba was the emulation, as if from loyalty, between the northern and southern tribes on David's return. Through the ancient custom he summoned all the tribes "to their tents;" and then and afterwards Judah alone remained faithful to the house of David (ver. 1, 2). The king might well say "Sheba the son of Bichri shall do us more harm than did Absalom" (ver. 6). What he feared was Sheba's occupation of the fortified cities. This fear was justified by the result. Sheba traversed the whole of Palestine, apparently rousing the population, Joab following him in full pursuit, and so deeply impressed with the gravity of the occasion that the murder even of the great Amasa was but a passing incident in the campaign. He stayed but for the moment of the deed, and "pursued after Sheba the son of Bichri." The mass of the army halted for an instant by the bloody corpse, and then they also "went on after Joab to pursue after Sheba the son of Bichri." It seems to have been his intention to establish himself in the fortress of Abel-Beth-maacah—in the northernmost extremity of Palestine—possibly allied to the cause of Absalom through his mother, Maacah, and famous for the prudence of its inhabitants (ver. 18). That prudence was put to the test on the present occasion. Joab's terms were the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall and the insurrection ended. See DAVID.

5. (Sept. Σαβεί v. r. Σοβαδί.) A chief Gadite resident in Bashan in the reign of Jeroboam II (1 Chron. v, 13). B.C. 781.

6. (Sept. Σαμαά v. r. Σαβεί.) One of the towns of the allotment of Simeon (Josh. xix, 2). It occurs between Beer-sheba and Moladah. In the list of the cities of the south of Judah, out of which those of Simeon were selected, no Sheba appears apart from Beer-sheba; but there is a *Shema* (xv, 26), which stands next to Moladah and which is probably the Sheba in question. This suggestion is supported by the reading of the Vatican copy of the Sept. The change from *b* to *m* is an easy one both in speaking and in writing, and in their other letters the words are identical. Some have supposed that the name Sheba is a mere repetition of the latter portion of the preceding name, Beer-sheba—by the common error called *homoioteleuton*—and this is supported by the facts that the number of names given in xix, 2-6, including Sheba, fourteen, though the number stated is thirteen; and that in the list of Simeon of 1 Chron. (iv, 28) Sheba is entirely omitted. Gesenius suggests that the words in xix, 2 may be rendered "Beer-sheba, the town, with Sheba, the well;" but this seems forced, and is, besides, inconsistent with the fact that the list is a list of "cities" (*Theocur.*

p. 1355 a, where other suggestions are cited). See SHEMA.

She'bah (Heb. *Shibah'*, שִׁבָּה, fem. of *Sheba*, i. e. *seven* or an *oath*; Sept. accordingly ὅρκος; Vulg. translates less well *abundantia*), the famous well which gave its name to the city of Beer-sheba (Gen. xxvi, 33). According to this version of the occurrence, it was the fourth of the series of wells dug by Isaac's people, and received its name from him, apparently in allusion to the oaths (ver. 31, יִשְׁחָבֵא, *yishhabéu*) which had passed between himself and the Philistine chieftains the day before. It should not be overlooked that according to the narrative of an earlier chapter the well owed its existence and its name to Isaac's father (xxi, 32). Indeed, its previous existence may be said to be implied in the narrative now directly under consideration (xxvi, 23). The two transactions are curiously identical in many of their circumstances—the rank and names of the Philistine chieftains, the strife between the subordinates on either side, the covenant, the adjurations, the city that took its name from the well. They differ alone in the fact that the chief figure in the one case is Abraham, in the other Isaac. Some commentators, as Kalisch (*Genesis*, p. 500), looking to the fact that there are two large wells at *Bir es-Seba*, propose to consider the two transactions as distinct, and as belonging to the one to the one well, the other to the other. Others see in the two narratives merely two versions of the circumstances under which this renowned well was first dug. Certainly in the analogy of the early history of other nations, and in the very close correspondence between the details of the two accounts, there is much to support this. The various plays on the meaning of the name שִׁבָּה, interpreting it as "seven," as an "oath," as "abundance" (so Jerome, as if reading שִׁבְיָה, as "a lion" (such is the meaning of the modern Arabic *Seba*)—are all so many direct testimonies to the remote date and archaic form of this most venerable of names, and to the fact that the narratives of the early history of the Hebrews are under the control of the same laws which regulate the early history of other nations.—Smith. In explanation of the repetition of the names of these wells, it should be noted that the sacred text expressly states that Isaac, after reopening them, "called their names after the names which his father had called them" (Gen. xxvi, 18). A minute description of the wells and vicinity of Beer-sheba is given by Lieut. Conder in the *Quar. Statement* of "The Pal. Explor. Fund" for Jan. 1875, p. 23 sq. See BEER-SHEBA; WELL.

She'bam (Heb. *Sebam'*, שִׁבְמָה, *fragrance*; Sept. Σεβამά, and so the Samar. Cod. שבמה), one of the towns in the pastoral district on the east of Jordan—the "land of Jazer and the land of Gilead"—demanded, and finally ceded to the tribes of Reuben and Gad (Num. xxxii, 3). It is named between Elealeh and Nebo, and is probably the same which, in a subsequent verse of the chapter and on later occasions, appears in the altered forms of SHIRMAH and SIBMAH (q. v.).

Shebani'ah (Heb. *Shebanyah'*, שִׁבְנִיָּה, *increased of Jehovah*; once [1 Chron. xv, 24] in the prolonged form *Shebanya'hu*, שִׁבְנִיָּהּ), the name of four Hebrews.

1. (Sept. Σωβανία v. r. Σοβανία and Σοβανία.) One of the Levitical trumpeters on the removal of the ark from the house of Obed-edom to Jerusalem (1 Chron. xv, 24). B.C. 1043.

2. (Sept. Σαβανία and Σεβανία, v. r. Σεβανία, Σαβανία, etc.) One of Ezra's Levitical attendants, who stood upon the steps and uttered the prayer of confession and thanksgiving (Neh. ix, 4, 5), and joined in the sacred covenant (x, 10). B.C. 459.

3. (Sept. Σεβανία.) Another Levite who joined in the same covenant (Neh. x, 12). B.C. 459.

4. (Sept. Σεβανί, Σεβανία.) A priest who did the same (Neh. x, 4; xii, 14). B.C. 459. He had a son

named Joseph (ver. 14). He is apparently the same elsewhere (ver. 3) called SHECHANIAH (q. v.).

Sheb'arim (Heb. with the art., *hash-Shebarim'*, שֶׁבָּרִים, *the breaches*, as often elsewhere rendered; Sept. *συνέρπων*; Vulg. *Sebarim*) is given in the A. V. as the name of a place to which the Israelites retreated in the first attack of Ai (Josh. vii, 5). "The root of the word has the force of 'dividing' or 'breaking,' and it is therefore suggested that the name was attached to a spot where there were fissures or rents in the soil, gradually deepening till they ended in a sheer descent or precipice to the ravine by which the Israelites had come from Gilgal—"the going down" (דִּמְרוֹרָה) see ver. 5 and the margin of the A. V.). The ground around the site of Ai, on any hypothesis of its locality, was very much of this character. Keil (*Josua*, ad loc.) interprets Shebarim by 'stone quarries;' but this does not appear to be supported by other commentators or by lexicographers. The ancient interpreters (Sept., Targ., and Syr.) usually discard it as a proper name, and render it 'till they were broken up,' etc.—Smith. But this is opposed both to the use of the art. here—which seems to indicate a well-known and specific locality—and to the fact that but few of the Hebrews were slain there. A minute examination of the locality would doubtless reveal some clue to the name. See AI.

Shebat. See SEBAT.

She'ber (Heb. *id.* שֶׁבֶר, *breaking*; Sept. Σεβέρ v. r. *Saβép*), first named of the sons of Caleb (son of Hur) by his concubine Maachah (1 Chron. ii, 43). B. C. post 1856.

Shebiith. See TALMUD.

Sheb'na (Heb. *Shebna'*, שֶׁבְנָא [occasionally *Sheb-nah'*, שֶׁבְנִי, 2 Kings xviii, 18, 26; xix, 2], *vigor*; Sept. Σεβνάς v. r. *Σομνάς*; Josephus, *Σοβναίος* [*Ant.* x, 1, 1]), a person of high position in Hezekiah's court, holding at one time the office of prefect of the palace (Isa. xxii, 15), but subsequently the subordinate office of secretary (xxxvi, 3; 2 Kings xix, 2), his former post being given to Eliakim, B. C. 713. This change appears to have been effected by Isaiah's interposition; for Shebna had incurred the prophet's extreme displeasure, partly on account of his pride (Isa. xxii, 16), his luxury (ver. 18), and his tyranny (as implied in the title of "father" bestowed on his successor, ver. 21), and partly (as appears from his successor being termed a "servant of Jehovah," ver. 20) on account of his belonging to the political party which was opposed to the theocracy and in favor of the Egyptian alliance. From the omission of the usual notice of his father's name, it has been conjectured that he was a *novus homo*. Winer thinks, from the Aramaean form of his name, that he was a foreigner. He is also mentioned in 2 Kings xviii, 37, Isa. xxxvi, 11, 22; xxxvii, 2.

Shebo. See AGATE.

Shebu'el [many *Sheb'u'el*] (Heb. *Shebu'el*, שֶׁבּוּעַל, *captive* [or *renown*] of God; Sept. Σουβαήλ; Vulg. *Sabuel*), the name of two Levites.

1. A leading descendant of Gershom, the son of Moses (1 Chron. xxiii, 16), who was ruler of the treasures of the house of God (xxvi, 24); called also Shubael (xxiv, 20). B. C. 1013. "The Targum of 1 Chron. xxvi, 24 has a strange piece of confusion: 'And Shebuel, that is, Jonathan the son of Gershom the son of Moses, returned to the fear of Jehovah, and when David saw that he was skilful in money matters he appointed him chief over the treasures.' He is the last descendant of Moses of whom there is any trace."

2. One of the fourteen sons of Heman the minstrel, and chief of the thirteenth band of twelve in the temple choir (1 Chron. xxv, 4); also called SHUBAEL (ver. 20). B. C. 1013.

Shebuoth. See TALMUD.

Shecani'ah (1 Chron. xxiv, 11; 2 Chron. xxxi, 15), the same name usually Anglicized SHECHANIAH (q. v.).

Shechani'ah (Heb. *Shekanyah'*, שֶׁכַּנְיָהּ, *dweller* [i. e. *intimate*] with Jehovah, twice in the prolonged form *Shekanya'hu*, שֶׁכַּנְיָהּ [1 Chron. xxiv, 11; 2 Chron. xxxi, 15], which is always Anglicized "Shecaniah" in the A. V.; Sept. Σεχενιας, but Σεχωνιας in 2 Chron. xxxi, 15; Ezra viii, 5; Σεχωνιας in ver. 3; Σεχενια in Neh. xii, 3; Vulg. *Sechenias*, but *Sebenias* in xii, 3), the name of several men, chiefly during the post-exilic period.

1. The chief of the tenth division of priests according to the arrangement under David (1 Chron. xxiv, 11, "Shecaniah"). B. C. 1014.

2. Last named of the priests appointed by Hezekiah to distribute the daily services among the sacerdotal order (2 Chron. xxxi, 15, "Shecaniah"). B. C. 726.

3. One of the "priests and Levites" (but to which of these orders he belonged does not certainly appear, probably the former, however) who returned from Babylon with Zerubbabel (Neh. xii, 3). B. C. 536. In ver. 14 (and perhaps x, 4) he is apparently called SHEBANIAH (q. v.). But he is not the same with the Shecaniah who was tenth in order of the priests in the reign of David; inasmuch as in the lists in Nehemiah his name continually occurs in the seventh or eighth place (see Keil, *ad loc.*).

4. A person apparently mentioned as one of the "sons" of Parush (i. e. Parosh), and father or progenitor of a Zechariah who returned from the exile in the time of Artaxerxes (Ezra viii, 3). B. C. ante 459. As the phraseology, however, is here peculiar, many connect the clause containing this name with the preceding verse (as in the Sept. and 1 Esdr.; but contrary to the Masoretic punctuation), so as to read, "Hattush of the sons of Shechaniah;" thus identifying this person with No. 9. The clause containing this name is perhaps an interpolation from ver. 5. See HATTUSH.

5. Another person similarly mentioned in the same list (Ezra viii, 5) as progenitor of "the son of Jahaziel," who likewise returned from Babylon with Ezra; but as the name Shechaniah itself is not found in the parallel list of Ezra ii, and as the mere patronymic ben-Jahaziel is scarcely a sufficient designation, we may conjecture (comp. ver. 10) that a name (actually supplied in the *Zathoe* of the Sept. and 1 Esdr.; evidently the Zattu of Ezra ii, 8) has dropped out of the Heb. text before "Shechaniah" (Bertheau, *Kurzgef. Handb.* ad loc.). This individual, i. e. Shechaniah, will then appear (in conformity with the phraseology of the adjoining enumerations) as the son of the Zechariah in question, and himself one of the returned exiles. B. C. 459. See ZATTU.

6. A son of Jehiel, of the "sons of Elam," and the one who proposed to Ezra the repudiation of the Gentile wives taken after the return from Babylon (Ezra x, 2). B. C. 458.

7. The father of Shemaiah, which latter was "keeper of the east gate," and repaired part of the wall of Jerusalem under Nehemiah (Neh. iii, 29). B. C. ante 446. He was perhaps identical with No. 9.

8. The son of Arah and father-in-law of Tobiah, the Jews' enemy during the restoration of Jerusalem (Neh. vi, 18). B. C. cir. 434.

9. A descendant of the Davidic line, father of Shemaiah, and apparently the son of Obadiah (1 Chron. iii, 21, 22). B. C. cir. 410. He may also have been the ELIAKIM (Matt. i, 13) or JOSEPH (Luke iii, 26) of our Saviour's ancestry (Strong, *Harm. and Expos.* p. 16, 17). See Nos. 4 and 7.

She'chem (Heb. *Shekem'*, שֶׁכֶם ["in pause" *She'-kem*, שֶׁכֶם, both as a common noun (Psa. xxi, 13) and as a proper name (Numb. xxvi, 31; Josh. xvii, 2; 1 Chron. vii, 19)], *a shoulder*; Sept. Συγχίμ), the name of three men and one place in the Bible.

1. The son of Hamor, prince of the country or district of Shechem in which Jacob formed his camp on

his return from Mesopotamia. B.C. 1906. This young man, having seen Jacob's daughter Dinah, was smitten with her beauty, and deflowered her. This wrong was terribly and cruelly avenged by the damsel's uterine brothers, Simeon and Levi. See DINAH. It seems likely that the town of Shechem, even if of recent origin, must have existed before the birth of a man so young as Hamor's son appears to have been; and we may therefore suppose it a name preserved in the family, and which both the town and the princes inherited. See No. 4 below. Shechem's name is always connected with that of his father, Hamor (Gen. xxxiii, 19; xxxiv; Josh. xxiv, 32; Judg. ix, 28; Acts vii, 16). See JACOB.

2. A son of Gilead, of the tribe of Manasseh, and head of the family of the Shechemites (Numb. xxvi, 31). B.C. post 1856. His family are again mentioned as the Beni-Shechem (Josh. xvii, 2).

3. In the lists of 1 Chron. another Shechem is named among the Gileadites as a son of Shemidah, a younger member of the family of the foregoing (vii, 19). B.C. post 1856. It must have been the recollection of one of these two Gileadites which led Cyril of Alexandria into his strange fancy (quoted by Reland, *Palæst.* p. 1007, from his *Comm. on Hosea*) of placing the city of Shechem on the eastern side of the Jordan.

4. An ancient and important city of Central Palestine, which still subsists, although under a later designation. In our account of it we introduce the copious illustrations by modern explorers.

I. *The Name.*—The Hebrew word, as above seen, means a "shoulder," or, more correctly, the upper part of the back, just below the neck, like the Latin *dorsum*, a ridge (Gesenius, s. v.). The origin of this name is doubtful. Some have supposed it was given to the town from its position on the water-shed lying between the valley of the Jordan, on the east, and the Mediterranean, on the west. But this is not altogether correct, for the water-shed is more than half-way from the city to the entrance of the valley; and, had it been otherwise, the elevation at that point is so slight that it would neither suggest nor justify this as a distinctive title. It has also been made a question whether the place was so called from Shechem, the son of Hamor, head of their tribe in the time of Jacob (Gen. xxxiii, 18 sq.), or whether he received his name from the city. The import of the name favors, certainly, the latter supposition, since its evident signification as an appellative, in whatever application, would naturally originate such a name; and the name, having been thus introduced, would be likely to appear again and again in the family of the hereditary rulers of the city or region. The name, too, if first given to the city in the time of Hamor, would have been taken, according to historical analogy, from the father rather than the son. Some interpret Gen. xxxiii, 18, 19 as showing that Shechem in that passage may have been called also Shalem. But this opinion has no support except from that passage; and the meaning even there more naturally is that Jacob came in *safety* to Shechem (שָׁלֵם, as an adjective, *safe*; comp. Gen. xxviii, 21); or (as recognised in the English Bible) that Shalem belonged to Shechem as a dependent tributary village. See SHALEM. The name is also given in the A. V. in the form of SICHEM (Gen. xii, 6) and SYCHEM (Acts vii, 16), to which, as well as SYCHAR (John iv, 5), the reader is referred. In the Sept., as above stated, it is (as in the New Test. above) usually designated by Συχέμ, but also ἡ Σίκμα in 1 Kings xii, 25; and τὰ Σίκμα, as in Josh. xxiv, 32, which is the form generally used by Josephus and Eusebius (in the *Onomast.*). But the place has also been known by very different names from these variations of the ancient Shechem. To say nothing of *Mabortha* (Μαβορθὰ or Μαβαρθὰ), which Josephus says (*War*, iv, 8, 1) it was called by the people of the country (מִצְרֵתָה, *the thoroughfare or gorge*), and which also appears, with a slight variation (*Mamortha*) in Pliny

(*Hist. Nat.* v, 13), Josephus (*ibid.*) calls it *Neapolis* (Νεάπολις, "New Town"), from its having been rebuilt by Vespasian after the Roman war in Palestine; and this name is found on coins still extant (Enckell, *Doctr. Num.* iii, 433). See NEAPOLIS. This last name it has still retained in the Arab *Nablûs*, and is one of the very few instances throughout the country where the comparatively modern name has supplanted the original.

Coin of Neapolis in Palestine.

II. *Location.*—The scriptural indications of its locality are not numerous. Joshua places it in Mount Ephraim (xx, 7; see also 1 Kings xii, 25). Shiloh was "on the east side of the highway that goeth up from Bethel to Shechem" (Judg. xxi, 19); hence Shechem must have been farther north than Shiloh. In the story of Jotham it is more precisely located under Mount Gerizim (ix, 7); which corresponds with the more full and exact description of Josephus, who places it between Gerizim and Ebal (*Ant.* iv, 8, 44). Further, Shechem, as we learn from Joseph's history (Gen. xxxvii, 12, etc.), must have been near Dothan; and, assuming Dothan to be the place of that name a few miles northeast of Nablûs, Shechem must have been among the same mountains, not far distant. So, too, as the Sychar in John iv, 5 was probably the ancient Shechem, that town must have been near Mount Gerizim, to which the Samaritan woman pointed or glanced as she stood by the well at its foot. The collateral evidences in support of this opinion we may briefly state. 1. The city is not built on an elevated position, as almost all the towns of Palestine are, but at the foot of Gerizim and along the valley, indicating a date anterior to the warlike and unsettled state of the country which led the inhabitants to select a more secure and defensive site for their towns; as also the unwillingness of the people through future generations to change the site of their ancient and renowned city. 2. The advantage which it affords of a good supply of running water—a most important consideration in that climate especially. No spot in this favored locality has such an abundance as the city itself. 3. The road which has connected the valley with the summit of Mount Gerizim through all past ages is the one ascending behind the present town. It is true that there is another path leading up from the valley about half-way between the city and the east end of the valley; but this has never been more than a kind of by-path, used by few except shepherds. 4. The antiquities in and around the city. These are neither numerous nor important in themselves, but as evidence on the subject in question they are of considerable value. They consist of portions of walls, cisterns, fragments of potteries, and such like, all of early date, and some evidently of Hebrew origin. These being either within the walls of the present city, or in its immediate vicinity, and none to be met with in any other part of the valley, seem to be a pretty conclusive proof that the present site is the original one. 5. The narrative of Jotham's parable to the people of Shechem clearly indicates the same spot (Judg. ix, 7-21). He would have stood on one of those large projections of Gerizim that overlook the city; and in no other spot in the valley would the whole story tally so well. Josephus, in relating Jotham's exploit, confirms this beyond all dispute. His words are that Jotham went up to Mount Gerizim, which overhangs the city Shechem (*Ant.* v, 7, 2). We may remark that Josephus usually retains the old name Shechem when speaking of the city, but occasionally adopts the new name, Neapolis (*War*, iv, 8, 1); and

thus clearly identifies Shechem with Nablûs. This was certainly the Jewish opinion, as we read in *Midrash Rabbah* that "Shechem in Mount Ephraim is Napulûs." So, also, the early Christians Epiphanius (*Adv. Hæc.* iii, 1055) and Jerome (*Epit. Paulæ*). The only ancient author that makes a distinction between Shechem and Nablûs is Eusebius, if indeed he means to assert the fact, which seems doubtful from his mode of expression (*Onomast.* s. v. *Τεπέβινθος, Συχέμ*). But his contemporary, the Bordeaux Pilgrim, who visited the place in A.D. 333, not only identifies the two, but also never calls the city by its new name, Neapolis, but only its ancient name, Sychem; and most likely he thus only expressed the general and probably universal opinion that then prevailed among both Jews and Christians.

The ancient town, in its most flourishing age, may have filled a wider circuit than its modern representative. It could easily have extended farther up the side of Gerizim, and eastward nearer to the opening into the valley from the plain. But any great change in this respect, certainly the idea of an altogether different position, the natural conditions of the locality render doubtful. That the suburbs of the town, in the age of Christ, approached nearer than at present to the entrance into the valley between Gerizim and Ebal may be inferred from the implied vicinity of Jacob's well to Sychar in John's narrative (iv, 1 sq.). The impression made there on the reader is that the people could be readily seen as they came forth from the town to repair to Jesus at the well; whereas Nablûs is more than a mile distant, and not visible from that point. The present inhabitants have a belief or tradition that Shechem occupied a portion of the valley on the east beyond the limits of the modern town; and certain travellers speak of ruins there, which they regard as evidence of the same fact. The statement of Eusebius that Sychar lay east of Neapolis may be explained by the circumstance that the part of Neapolis in that quarter had fallen into such a state of ruin when he lived as to be mistaken for the site of a separate town (see *Reiland, Palest.* p. 1004). The portion of the town on the edge of the plain was more exposed than that in the recess of the valley, and, in the natural course of things, would be destroyed first, or be left to desertion and decay. Josephus says that more than ten thousand Samaritans (inhabitants of Shechem are meant) were destroyed by the Romans on one occasion (*War*, iii, 7, 32). The population, therefore, must have been much greater than Nablûs, with its present dimensions, would contain.

III. *History.*—The allusions to Shechem in the Bible are numerous, and show how important the place was in Jewish history. Abraham, on his first migration to the land of promise, pitched his tent and built an altar under the oak (or Terebinth) of Moreh at Shechem. "The Canaanite was then in the land;" and it is evident that the region, if not the city, was already in possession of the aboriginal race (see *Gen.* xii, 6). Some have inferred from the expression "place of Shechem" (*מְקוֹם שֵׁכֶם*) that it was not inhabited as a city in the time of Abraham. But we have the same expression used of cities or towns in other instances (xviii, 24; xix, 12; xxix, 22); and it may have been interchanged here, without any difference of meaning, with the phrase, "city of Shechem," which occurs in xxxiii, 18. A position affording such natural advantages would hardly fail to be occupied as soon as any population existed in the country. The narrative shows incontestably that at the time of Jacob's arrival here, after his sojourn in Mesopotamia (ver. 18; ch. xxxiv), Shechem was a Hivite city, of which Hamor, the father of Shechem, was the head man. It was at this time that the patriarch purchased from that chieftain "the parcel of the field," which he subsequently bequeathed, as a special patrimony, to his son Joseph (xliii, 22; *Josh.* xxiv, 32; *John* iv, 5). The field lay undoubtedly on the rich plain of

the *Mukhna*, and its value was the greater on account of the well which Jacob had dug there, so as not to be dependent on his neighbors for a supply of water. The defilement of Dinah, Jacob's daughter, and the capture of Shechem and massacre of all the male inhabitants by Simeon and Levi, are events that belong to this period (*Gen.* xxxiv, 1 sq.). As this bloody act, which Jacob so entirely condemned (ver. 30) and reprobated with his dying breath (xlix, 5-7), is ascribed to two persons, some urge that as evidence of the very insignificant character of the town at the time of that transaction. But the argument is by no means decisive. Those sons of Jacob were already at the head of households of their own, and may have had the support, in that achievement, of their numerous slaves and retainers. We speak in like manner of a commander as taking this or that city when we mean that it was done under his leadership. The oak under which Abraham had worshipped survived to Jacob's time; and the latter, as he was about to remove to Beth-el, collected the images and amulets which some of his family had brought with them from Padan-aram and buried them "under the oak which was by Shechem" (xxxv, 1-4). The "oak of the monument" (if we adopt that rendering of *אֵלֶּךָ מִצֵּבָה* in *Judg.* ix, 6), where the Shechemites made Abimelech king, marked, perhaps, the veneration with which the Hebrews looked back to these earliest footsteps (the *incunabula gentis*) of the patriarchs in the Holy Land. See *MEONENIM*. During Jacob's sojourn at Hebron his sons, in the course of their pastoral wanderings, drove their flocks to Shechem, and at Dothan, in that neighborhood, Joseph, who had been sent to look after their welfare, was seized and sold to the Ishmaelites (*Gen.* xxxvii, 12, 28). In the distribution of the land after its conquest by the Hebrews, Shechem fell to the lot of Ephraim (*Josh.* xx, 7), but was assigned to the Levites, and became a city of refuge (xxi, 20, 21). It acquired new importance as the scene of the renewed promulgation of the law, when its blessings were heard from Gerizim and its curses from Ebal, and the people bowed their heads and acknowledged Jehovah as their king and ruler (*Deut.* xxvii, 11; *Josh.* ix, 32-35). It was here Joshua assembled the people, shortly before his death, and delivered to them his last counsels (xxiv, 1, 25). After the death of Gideon, Abimelech, his bastard son, induced the Shechemites to revolt from the Hebrew commonwealth and elect him as king (*Judg.* ix). It was to denounce this act of usurpation and treason that Jotham delivered his parable of the trees to the men of Shechem from the top of Gerizim, as recorded at length in *Judg.* ix, 22 sq. The picturesque traits of the allegory, as Prof. Stanley suggests (*Sinai and Palestine*, p. 236; *Jewish Church*, p. 348), are strikingly appropriate to the diversified foliage of the region. In revenge for his expulsion, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (*Judg.* ix, 34-45). It was soon restored, however, for we are told in 1 Kings xii that all Israel assembled at Shechem, and Rehobam, Solomon's successor, went thither to be inaugurated as king. Its central position made it convenient for such assemblies; its history was fraught with recollections which would give the sanctions of religion as well as of patriotism to the vows of sovereign and people. The new king's obstinacy made him insensible to such influences. Here, at this same place, the ten tribes renounced the house of David and transferred their allegiance to Jeroboam (ver. 16), under whom Shechem became for a time the capital of his kingdom. We come next to the epoch of the exile. The people of Shechem doubtless shared the fate of the other inhabitants, and were, most of them at least, carried into captivity (2 Kings xvii, 5, 6; xviii, 9 sq.). But Shalmaneser, the conqueror, sent colonies from Babylonia to occupy the place of the exiles (xvii, 24). It would seem that there was another influx of strangers, at a later period, under Esar-haddon (*Ezra* iv, 2).

The "certain men from Shechem" mentioned in Jer. xli, 5, who were slain on their way to Jerusalem, were possibly Cuthites, i. e. Babylonian immigrants who had become proselytes or worshippers of Jehovah (see Hitzig, *Der Proph. Jer.* p. 331). These Babylonian settlers in the land, intermixed, no doubt, to some extent with the old inhabitants, were the Samaritans, who erected at length a rival temple on Gerizim (B.C. 300), and between whom and the Jews a bitter hostility existed for so many ages (Josephus, *Ant.* xii, 1, 1; xiii, 3, 4). The Son of Sirach (1, 26) says that "a foolish people," i. e. the Samaritans, "dwelt at Shechem" (τὰ Σίχημα). From its vicinity to their place of worship, it became the principal city of the Samaritans, a rank which it maintained at least till the destruction of their temple, about B.C. 129, a period of nearly two hundred years (*ibid.* xiii, 9, 1; *War.* i, 2, 6). From the time of the origin of the Samaritans the history of Shechem blends itself with that of this people and of their sacred mount, Gerizim; and the reader will find the proper information on this part of the subject under those heads. The city was taken and the temple destroyed by John Hyrcanus, B.C. 129 (*Ant.* xiii, 9, 1; *War.* i, 2, 6).

As already intimated, Shechem reappears in the New Test. It is probably the *Sychar* of John iv, 5, near which the Saviour conversed with the Samaritan woman at Jacob's well. *Συχάρ*, as the place is termed there (*Συχάρ* in Rec. Text is incorrect), found only in that passage, was no doubt current among the Jews in the age of Christ, and was either a term of reproach (רִיבָה, "a lie") with reference to the Samaritan faith and worship, or, possibly, a provincial mispronunciation of that period (see Lücke, *Comm. üb. Johan.* i, 577). The Saviour, with his disciples, remained two days at Sychar on his journey from Judæa to Galilee. He preached the Word there, and many of the people believed on him (John iv, 39, 40). In Acts vii, 16, Stephen reminds his hearers that certain of the patriarchs (meaning Joseph, as we see in Josh. xxiv, 32, and following, perhaps, some tradition as to Jacob's other sons) were buried at Sychem. Jerome, who lived so long hardly more than a day's journey from Shechem, says that the tombs of the twelve patriarchs were to be seen there in his day. The anonymous city in Acts viii, 5, where Philip preached with such effect, may have been Sychem, though many would prefer that narrative to Samaria, the capital of the province.

We have seen that not long after the times of the New Test. the place received the name of Neapolis, which it still retains in the Arabic form of Nablûs, being one of the very few names imposed by the Romans in Palestine which have survived to the present day. It had probably suffered much, if it was not completely destroyed, in the war with the Romans (see Rambach, *De Urbe Sichem Sale Conspersa* [Hal. 1730]), and would seem to have been restored or rebuilt by Vespasian, and then to have taken this new name; for the coins of the city, of which there are many, all bear the inscription *Flavia Neapolis*—the former epithet no doubt derived from Flavius Vespasian (Mionnet, *Méd. Antiq.* v, 499). The name occurs first in Josephus (*War.* iv, 8, 1), and then in Pliny (*Hist. Nat.* v, 14), Ptolemy (*Geog.* v, 16). As intimated above, there had already been converts to the Christian faith at this place under our Saviour, and it is probable that a Church had been gathered here by the apostles (John iv, 30-42; Acts viii, 25; ix, 31; xv, 3). Justin Martyr was a native of Neapolis (*Apolog.* ii, 41). The name of Germanus, bishop of Neapolis, occurs in A.D. 314; and other bishops continue to be mentioned down to A.D. 536, when the bishop John signed his name at the synod of Jerusalem (Reland, *Palæst.* p. 1009). When the Moslems invaded Palestine, Neapolis and other small towns in the neighborhood were subdued while the siege of Jerusalem was going on (Abulfeda, *Annal.* i, 229). After the taking of Jerusalem by the Crusaders,

Neapolis and other towns in the mountains of Samaria tendered their submission, and Tancred took possession of them without resistance (Will. Tyr. ix, 20). Neapolis was laid waste by the Saracens in A.D. 1113; but a few years after (A.D. 1120) a council was held here by king Baldwin II to consult upon the state of the country (Fulcher, p. 424; Will. Tyr. xii, 13). Neapolis was not made a Latin bishopric, but belonged probably to that of Samaria, and the property of it was assigned to the abbot and canons of the Holy Sepulchre (Jac. de Vitriacus, ch. lviii). After some disasters in the unquiet times which ensued, and after some circumstances which show its remaining importance, the place was finally taken from the Christians in A.D. 1242 by Abu Ali, the colleague of sultan Bibars, and has remained in Moslem hands ever since.

IV. *Description*.—1. The natural features of the neighborhood are the two mountains Gerizim and Ebal, standing in front of each other like two giants, with the little valley running between, and on the eastern side the noble plain of Mukhna stretching from north to south. The two mountains run in parallel ranges from east to west—Ebal on the north and Gerizim on the south—and both reach an elevation of some 2500 feet above the level of the Mediterranean, and 800 feet above the valley itself. From the town to the eastern opening of the valley, a distance of about a mile and a half, where the two mountain ranges have their starting-points, and to which parts the names of Gerizim and Ebal are confined, both mountains rise immediately from the valley in steep and mostly precipitous declivities to the height stated; and both, as seen from the valley, are equally naked and sterile. But immediately behind the city, and there only, Gerizim has the advantage, owing to a copious stream that flows through a small ravine at the west side of the town. Here are several orchards and gardens, producing abundantly. On Ebal also, opposite the town, there are several gardens and cultivated plots—some old, but the majority of late planting—and all in a comparatively thriving condition, but these can never equal those on the Gerizim side on account of the deficiency of water. The valley itself stands at an elevation of some 1700 feet above the Mediterranean, running from east to west, and extending from the eastern abutments of the two mountains as far as Sebastieh (Samaria) westward. A portion of this only belongs to our present notice, namely, from its eastern opening to the town of Nablûs, a distance of about a mile and a half. Its width varies. At its commencement it measures somewhat more than half a mile; but near half-way to the town it contracts to about half that width. But as we proceed towards the city the mountains again recede, and the valley widens to its former width; but again, at the city, contracts to its narrowest dimension. It is hardly in any part a flat level, but rather a gradual slope of the two mountains, until they dovetail into each other. Just at the commencement of the valley, on either side, are Jacob's well and Joseph's tomb. (See below.) A little farther on, and near the centre of the valley, stands the hamlet Balata, the remains of a town of the same name mentioned by Parchi (Kapht va-Phe-rach), but of no historical importance. Near half-way up the valley is the highest ground, forming the watershed between the valley of the Jordan and the Mediterranean. The valley thus far is almost without trees of any kind, but the part nearest the town is well wooded. The principal kind of tree is the olive, as it seems to have been in the days of Jotham (Judg. ix, 8). The town itself is surrounded by orchards and gardens, where figs, mulberries, grapes, almonds, oranges, apricots, and other fruit grow luxuriantly.

One of the great and peculiar features of this valley is the abundance of water. Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water within and around the city. He gives the names of twenty-seven of the principal of them. Within some two miles' radius from thirty to forty

copious springs exist. But within the area now under notice they are more copious than numerous. There is not a single spring on the Ebal side till we have passed the city for some distance. On the Gerizim side, outside the city, there are three. The first, rising near the water-shed, dries up in summer. The next, 'Ain Dafna (the *Δάφνη* of the Roman period of the city), a very large stream, issues out near the road and runs in an open channel past Jacob's well, turning a mill on its way, and emptying itself to water the plain. 'Ain Balata, named from the little village whence it flows, is the other, issuing from a subterranean chamber supported by three pillars, and sufficiently copious to supply a large population. Within the city itself the principal supply is derived from a stream descending from a ravine on the western side of the town, which is made to flow in abundance along the channels of some of the streets. The fountains are numerous. The most remarkable, 'Ain el-Kerun, is under a vaulted dome, and is reached by a flight of steps. The water is conveyed hence by conduits to two of the principal mosques and some private houses, and afterwards serves to water the gardens below. The various streams run on the northern side of the town into one channel, which serves to turn a corn-mill that is kept going summer and winter.

On the eastern side of the valley, as already mentioned, lies the extensive plain of the Mukhna, stretching for many miles from north to south, and hemmed in on both sides by mountain chains, the slopes of which support several villages and hamlets. In Scripture it is called *Sadeh* (שָׂדֶה), a smooth or level cultivated open land (Gen. xxxiii, 19), to which our Saviour pointed when he said, "Say ye not, There are yet four months, and then cometh harvest?" etc. (John iv, 35).

The situation of the town is one of surpassing beauty. "The land of Syria," said Mohammed, "is beloved by Allah beyond all lands, and the part of Syria which he loveth most is the district of Jerusalem, and the place which he loveth most in the district of Jerusalem is the mountain of Nablûs" (*Fundgr. des Orients*, ii, 139). Its appearance has called forth the admiration of all travellers who have any sensibility to the charms of nature. It lies in a sheltered valley, protected by Gerizim on the south and Ebal on the north. The feet of these

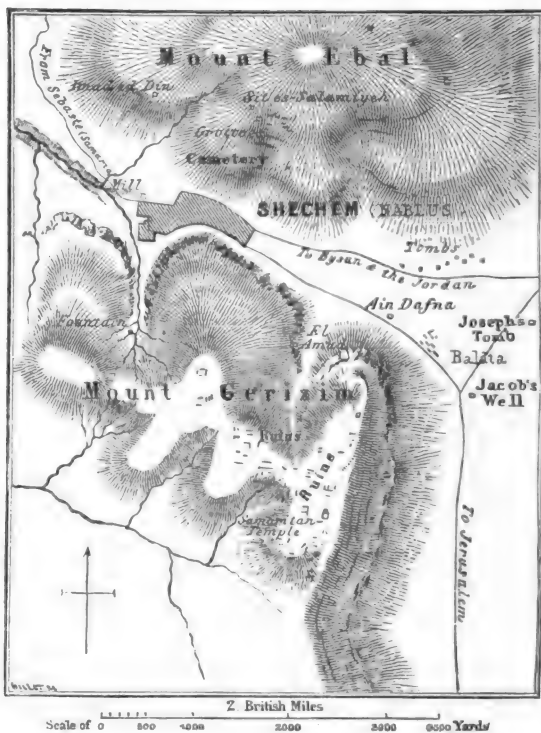

mountains, where they rise from the town, are not more than five hundred yards apart. The bottom of the valley is about 1800 feet above the level of the sea, and the top of Gerizim 800 feet higher still. Those who have been to Heidelberg will assent to Von Richter's remark that the scenery, as viewed from the foot of the hills, is not unlike that of the beautiful German town. The site of the present city, which we believe to have been also that of the Hebrew city, occurs exactly on the water-summit; and streams issuing from the numerous springs there flow down the opposite slopes of the valley, spreading verdure and fertility in every direction. Travellers vie with each other in the language which they employ to describe the scene that bursts here so suddenly upon them on arriving in spring or early summer at this paradise of the Holy Land. The somewhat sterile aspect of the adjacent mountains becomes itself a foil, as it were, to set off the effect of the verdant fields and orchards which fill up the valley. "There is nothing finer in all Palestine," says Dr. Clarke, "than a view of Nablûs from the heights around it. As the traveller descends towards it from the hills, it appears luxuriantly embosomed in the most delightful and fragrant bowers, half concealed by rich gardens and by stately trees collected into groves, all around the bold and beautiful valley in which it stands." "The whole valley," says Dr. Robinson, "was filled with gardens of vegetables and orchards of all kinds of fruits, watered by fountains which burst forth in various parts and flow westward in refreshing streams. It came upon us suddenly, like a scene of fairy enchantment. We saw nothing to compare with it in all Palestine. Here, beneath the shadow of an immense mulberry-tree, by the side of a purling rill, we pitched our tent for the remainder of the day and the night. . . . We rose early, awakened by the songs of nightingales and other birds, of which the gardens around us were full." "There is no wilderness here," says Van de Velde (i, 386), "there are no wild thickets, yet there is always verdure, always shade, not of the oak, the terebinth, and the caroub-tree, but of the olive-grove, so soft in color, so picturesque in form, that, for its sake, we can willingly dispense with all other wood. There is a singularity about the vale of Shechem, and that is the peculiar coloring which objects assume in it. You know that wherever there is water the air becomes charged with watery particles,

The Valley and Town of Nablûs, the ancient Shechem, from the south-western flank of Mount Ebal, looking westward. The mountain on the left is Gerizim. The Mediterranean is discernible in the distance.

and that distant objects beheld through that medium seem to be enveloped in a pale-blue or gray mist, such as contributes not a little to give a charm to the landscape. But it is precisely those atmospheric tints that we miss so much in Palestine. Fiery tints are to be seen both in the morning and the evening, and glittering violet or purple-colored hues where the light falls next to the long, deep shadows; but there is an absence of coloring, and of that charming dusky hue in which objects assume such softly blended forms, and in which also the transition in color from the foreground to the farthest distance loses the hardness of outline peculiar to the perfect transparency of an Eastern sky. It is otherwise in the vale of Shechem, at least in the morning and the evening. Here the exhalations remain hovering among the branches and leaves of the olive-trees, and hence that lovely bluish haze. The valley is far from broad, not exceeding in some places a few hundred feet. This you find generally enclosed on all sides; here, likewise, the vapors are condensed. And so you advance under the shade of the foliage, along the living waters, and charmed by the melody of a host of singing birds—for they, too, know where to find their best quarters—while the perspective fades away and is lost in the damp, vapory atmosphere." Apart entirely from the historic interest of the place, such are the natural attractions of this favorite resort of the patriarchs of old, such the beauty of the scenery, and the indescribable air of tranquillity and repose which hangs over the scene, that the traveller, anxious as he may be to hasten forward in his journey, feels that he would gladly linger, and could pass here days and weeks without impatience.

2. The modern city, as already observed, is situated in the valley, about a mile and a half from its eastern opening. It stands at the foot of Gerizim, and stretches from east to west in an irregular form. Just where the city stands there is scarcely any flat ground, the gradual slopes of the two mountains dovetailing into each other. The roads leading to the town from all parts are in a most primitive and wretched condition, and the town itself is surrounded by all kinds of filth. The city is encompassed by a wall of very common structure, and in a most dilapidated condition. The two principal gates—one in the eastern and the other in the western end of the town—are in keeping with the walls, and would not give so much trouble to a conqueror as in the time of Abimelech. Notwithstanding, they are of no small importance in the economy of the town. Here we still find a faint emblem of what gates were in ancient times—the great emporiums where all the public affairs of the city were transacted. The gates of Nablûs retain their importance in part. At the western gate the revenue department is still located, and all who pass through with any commodities to sell, and purchasers, are charged a certain toll according to the value of the articles. The main street, following the line of the valley from east to west, runs almost in a straight line the whole length of the town, connecting the two gates. Most of the other streets cross this quite irregularly, and are, almost without exception, narrow and dirty. Nearly all of them have a channel along the centre, in which runs a stream of water. In the winter season these streams are full, but diminish during the summer months, and several are dried up. This arrangement of the water causes the town to be very damp during the winter: and, however pleasant it may be in summer, it certainly forms anything but a good element in the sanitary condition of the place. This state of the streets, together with the fact of some of them being arched, makes the town uncommonly sombre and dull. But when we speak of streets, our read-

Map of the Vicinity of Shechem.

ers must not imagine them to be similar to European streets, formed by the front of lines of houses, private or public; but the streets of Nablûs, like those of other Oriental towns, are only passages between dead walls, except where the bazaars break the monotony. These are the Eastern shops or market-places—a kind of recesses in the walls—and are comparatively numerous in Nablûs. They are grouped according to the merchandise they contain, and are situated principally in the main street.

With regard to the buildings, we may remark that all the houses are built of stone, and are heavy and sombre. They are entered from the street through a ponderous strong door, barred on the inside (2 Sam. xiii, 18); a large iron knocker is attached, and two or three blows with this will suffice to bring one of the inmates to ask, "Who is there?" (Acts xii, 13). From the inside it will be found that each house stands detached from its neighbor, and consists of detached vaulted rooms, all built of stone, and all opening into the court, which is uncovered, but screened from the observation of all but the inmates by the high walls of the house on all sides. Every house has one dome or more; but the roof is flat, with battlements surrounding it, to prevent any one falling into the street or court (Deut. xxii, 8). In the better sort of houses a kind of family saloon is built on a portion of the roof of the house, much more spacious and airy than the other rooms, and preserved principally for the entertainment of guests who are to be treated with marked respect. This is the *ahyah*, אֹהֶל, of the Old Test. (1 Kings xvii, 19), and the "larger upper room" (ἀνώγαυον μέγα) of the New (Mark xiv, 15). The windows of the houses are sometimes only square holes in the wall (Acts xx, 9); but generally finished with lattice-work as of old (Judg. v, 28; Cant. ii, 9).

There are no public buildings worth mentioning. The *Keniseh*, or synagogue of the Samaritans, is a small edifice, in the interior of which there is nothing remarkable, unless it be an alcove, screened by a curtain,

in which their sacred writings are kept. The structure may be three or four centuries old. A description and sketch plan of it are given in Mr. Grove's paper *On the Modern Samaritans, in Vacation Tourists* for 1861. Nablûs has five mosques, two of which, according to a tradition in which Mohammedans, Christians, and Samaritans agree, were originally churches. One of them, it is said, was dedicated to John the Baptist; its eastern portal, still well preserved, shows the European taste of its founders. The domes of the houses and the minarets, as they show themselves above the sea of luxuriant vegetation which surrounds them, present a striking view to the traveller approaching from the east or the west.

There are a few small portions of the town remaining, in all probability, from ancient times. The arched passage in the Samaritan quarter seems to be partly of this class, comprising levelled stones of Jewish style. Similar ones are in other parts of the town. The marble troughs used at the principal streams are probably Israelitish remains. These are five in number, dug up in the plain on the eastern side of Gerizim, and originally the sarcophagi of the dead. Rosen, during his stay at Nablûs, examined anew the Samaritan inscriptions found there, supposed to be among the oldest written monuments in Palestine. He has furnished, as Prof. Rödiger admits, the best copy of them that has been taken (see a fac-simile in *Zeitschr. der deutschen morgenl. Gesellschaft*, 1860, p. 621). The inscriptions, on stone-tablets, distinguished in his account as No. 1 and No. 2, belonged originally to a Samaritan synagogue which stood just out of the city, near the Samaritan quarter, of which synagogue a few remains only are now left. They are thought to be as old at least as the age of Justinian, who (A.D. 529) destroyed so many of the Samaritan places of worship. Some, with less reason, think they may have been saved from the Temple on Gerizim, having been transferred afterwards to a later synagogue. One of the tablets is now inserted in the wall of a minaret; the other was discovered not long ago in a heap of rubbish not far from it. The inscriptions consist of brief extracts from the Samaritan Pentateuch, probably valuable as palæographic documents. Similar slabs are to be found built into the walls of several of the sanctuaries in the neighborhood of Nablûs; as at the tombs of Eleazar, Phinehas, and Ithamar at Awertah.

3. To complete our survey of Shechem and its neighborhood, we must take a brief glance at the traditional monuments that exist there. The most interesting by far are the Well of Jacob and the Tomb of Joseph. These stand at the eastern opening of the valley, the former near the foot of Gerizim, and the latter near the foot of Ebal, as if keeping guard over the parcel of field bought by the patriarch of the children of Hamor.

(1.) With regard to the first of these, we may observe that the language in the original is remarkably descriptive of the spot. Had Jacob bought a portion of the valley, we should have had *emek*, עֵמֶק, but here it is a part of the *sadêh*, שָׂדֵה, the level cultivated land, the plain of Mukhna already described; and to no other part of the country could this term be applied. This, in connection with the unbroken tradition of the spot, renders its genuineness beyond all doubt. The well is not an *'ain*, אֵין, a fountain of living water; but a *beër*, בְּעַר, a cistern to hold rain-water. Hence our Saviour's contrast, with the Samaritan woman, between the *cistern* (φύσας) which Jacob gave them and the *fountain* (πηγην) which he should give them (John iv, 12, 14). Faithful to the language of Scripture, the natives never call it *'Ain Yakub*, but always *Bir Yakub*, Jacob's Well. The native Christians of Nablûs frequently call it *Bir Samariyeh*, the Samaritan Well; but the Samaritans themselves only call it *Bir Yakub*.

"A low spur projects from the base of Gerizim in a north-eastern direction, between the plain and the opening of the valley. On the point of this spur is a little

mound of shapeless ruins, with several fragments of granite columns. Beside these is the well. Formerly there was a square hole opening into a carefully built vaulted chamber, about ten feet square, in the floor of which was the true mouth of the well. Now a portion of the vault has fallen in and completely covered up the mouth, so that nothing can be seen above but a shallow pit half filled with stones and rubbish. The well is deep—seventy-five feet when last measured, and there was probably a considerable accumulation of rubbish at the bottom. Sometimes it contains a few feet of water, but at others it is quite dry. It is entirely excavated in the solid rock, perfectly round, nine feet in diameter, with the sides hewn smooth and regular" (Porter, *Hand-book*, p. 340). The well is fast filling up with the stones thrown in by travellers and others. At Maundrell's visit (1697) it was 105 feet deep, and the same measurement is given by Dr. Robinson as having been taken in May, 1838. But, five years later, when Dr. Wilson recovered Mr. A. Bonar's Bible from it, the depth had decreased to "exactly seventy-five" (Wilson, *Lands*, ii, 57). Maundrell (March 24) found fifteen feet of water standing in the well. It appears now to be always dry.

"It has every claim to be considered the original well, sunk deep into the rocky ground by 'our father Jacob.'" This, at least, was the tradition of the place in the last days of the Jewish people (John iv, 6, 12). Its position adds probability to the conclusion, indicating, as has been well observed, that it was there dug by one who could not trust to the springs so near in the adjacent vale—the springs of Ain Balata and 'Ain Dafna—which still belonged to the Canaanites. Of all the special localities of our Lord's life, this is almost the only one absolutely undisputed. "The tradition, in which, by a singular coincidence, Jews and Samaritans, Christians and Mohammedans, all agree, goes back," says Dr. Robinson (*Bib. Res.* ii, 284), "at least to the time of Eusebius, in the early part of the 4th century. That writer indeed speaks only of the sepulchre; but the Bordeaux Pilgrim, in A.D. 333, mentions also the well; and neither of these writers has any allusion to a church. But Jerome, in *Epitaphium Paula*, which is referred to A.D. 404, makes her visit the church erected at the side of Mount Gerizim around the Well of Jacob, where our Lord met the Samaritan woman. The church would seem, therefore, to have been built during the 4th century; though not by Helena, as is reported in modern times. It was visited and mentioned, as around the well, by Antoninus Martyr near the close of the 6th century; by Arculfus a century later, who describes it as built in the form of a cross; and again by St. Willibald in the 8th century. Yet Saewulf, about A.D. 1103, and Phocas in 1185, who speak of the well, make no mention of the church; whence we may conclude that the latter had been destroyed before the period of the Crusades. Brocardus speaks of ruins around the well, blocks of marble and columns, which he held to be the ruins of a town, the ancient Thebez; they were probably those of the church, to which he makes no allusion. Other travellers, both of that age and later, speak of the church only as destroyed, and the well as already deserted. Before the days of Eusebius there seems to be no historical testimony to show the identity of this well with that which our Saviour visited; and the proof must therefore rest, so far as it can be made out at all, on circumstantial evidence. I am not aware of anything, in the nature of the case, that goes to contradict the common tradition; but, on the other hand, I see much in the circumstances tending to confirm the supposition that this is actually the spot where our Lord held his conversation with the Samaritan woman. Jesus was journeying from Jerusalem to Galilee, and rested at the well, while 'his disciples were gone away into the city to buy meat.' The well, therefore, lay apparently before the city, and at some distance from it. In passing along the eastern plain, Jesus had halted at the

well, and sent his disciples to the city situated in the narrow valley, intending, on their return, to proceed along the plain on his way to Galilee, without himself visiting the city. All this corresponds exactly to the present character of the ground. The well, too, was Jacob's Well, of high antiquity, a known and venerated spot, which, after having already lived for so many ages in tradition, would not be likely to be forgotten in the two and a half centuries intervening between John and Eusebius."

It is understood that the well, and the site around it, have lately been purchased by the Russian Church, not, it is to be hoped, with the intention of erecting a Church over it, and thus forever destroying the reality and the sentiment of the place. A special fund has recently been raised in England for the purpose of surveying the premises and cleaning out the well. See JACOB'S WELL.

(2.) The second of the spots alluded to is the Tomb of Joseph. It lies about a quarter of a mile north of the well, exactly in the centre of the opening of the valley between Gerizim and Ebal. It is a small square enclosure of high whitewashed walls, surrounding a tomb of the ordinary kind, but with the peculiarity that it is placed diagonally to the walls, instead of parallel, as usual. A rough pillar used as an altar, and black with the traces of fire, is at the head, and another at the foot of the tomb. In the left-hand corner as you enter is a vine, whose branches "run over the wall," recalling exactly the metaphor of Jacob's blessing (Gen. xlix, 22). In the walls are two slabs with Hebrew inscriptions. One of these is given by Dr. Wilson (*Lands*, etc. ii, 61), and the interior is almost covered with the names of pilgrims in Hebrew, Arabic, and Samaritan. Beyond this there is nothing to remark in the structure itself. It purports to cover the tomb of Joseph, buried there in the "parcel of ground" which his father bequeathed especially to him his favorite son, and in which his bones were deposited after the conquest of the country was completed (Josh. xxiv, 32).

The local tradition of the tomb, like that of the well, is as old as the beginning of the 4th century. Both Eusebius (*Onomast.* Συγχρη) and the Bordeaux Pilgrim mention its existence. So do Benjamin of Tudela (1160-79) and Maundeville (1322), and so—to pass over intermediate travellers—does Maundrell (1697). All that is wanting in these accounts is to fix the tomb which they mention to the present spot. But this is difficult. Maundrell describes it as on his right hand, in leaving Nablûs for Jerusalem; "just without the city"—a small mosque, "built over the sepulchre of Joseph" (March 25). Some time after passing it he arrives at the well. This description is quite inapplicable to the tomb just described, but perfectly suits the Wely at the north-east foot of Gerizim, which also bears (among the Moslems) the name of Joseph. When the expressions of the two oldest authorities cited above are examined, it will be seen that they are quite as suitable, if not more so, to this latter spot as to the tomb on the open plain. On the other hand, the Jewish travellers, from hap-Parchi (cir. 1320) downwards, specify the tomb as in the immediate neighborhood of the village el-Balata. See the itineraries entitled *Jichus hat-Tsadikim* (A.D. 1561) and *Jichus ha-Aboth* (1537), in Carmoly, *Itinéraires de la Terre-Sainte*. Stanley states, after Buckingham, that it is said by the Samaritans to be thus called after a rabbi Joseph of Nablûs (*Sin. and Pal.* p. 241, note). But this identification seems to be a mistake, probably a Mohammedan legend, and imposed upon inquisitive travellers by unscrupulous guides. The present Samaritans know of no Joseph's tomb but the generally accepted one; and to it does the Jewish as well as the Samaritan tradition bear testimony. Hap-Parchi, who spent some years exploring Palestine, fixes Joseph's Tomb fifty yards north of Balata (*Kapht. va-Pherach*).

In this conflict of testimony, and in the absence of

any information on the date and nature of the Moslem tomb, it is impossible to come to a definite conclusion. There is some force, and that in favor of the received site, in the remarks of a learned and intelligent Jewish traveller (Löwe, in the *Allg. Zeitung des Judenthums* [Leipsig, 1839], No. 50) on the peculiar form and nature of the ground surrounding the tomb near the well, the more so because they are suggested by the natural features of the spot, as reflected in the curiously minute, the almost technical, language of the ancient record, and not based on any mere traditional or artificial considerations. "The thought," says he, "forced itself upon me, how impossible it is to understand the details of the Bible without examining them on the spot. This place is called in the Scripture neither *emek* ('valley') nor *shephelah* ('plain'), but by the individual name of *Chelkath hus-Sadeh*; and in the whole of Palestine there is not such another plot to be found—a dead level, without the least hollow or swelling in a circuit of two hours. In addition to this, it is the loveliest and most fertile spot I have ever seen." See JOSEPH'S TOMB.

(3.) About half-way between Jacob's Well and the city, and nestling in a bend of Mount Gerizim, is the mosque *Sheik el-Amud* (the Saint of the Pillar), so called from a Mussulman saint. This saint, however, is only a modern invention of the Mohammedans. By the Samaritans the place is simply called *El-Amud*, the Pillar, their tradition identifying it with the pillar of stone set up by Joshua, as noticed above. They also believe that the celebrated oak of Moreh stood on the same spot. The Mohammedans come here occasionally to pray, but no great honor is paid to the place if we may judge from its present dilapidated state.

(4.) About one third of the way up the side of Mount Ebal, in front of the town, is a bold perpendicular rock, some sixty feet high, called, after a Mohammedan female saint, *Sû es-Salamiyeh*. In front of the rock stands a small building, consisting of two chambers and a *wely* for prayer, but all in a dilapidated state. This part of the mountain is called by the saint's name.

(5.) A little farther westward, and about midway to the summit, stands the only edifice now remaining on Mount Ebal. This is called *'Imad ed-Din*—the Column of Religion. According to the current tradition, this building was erected over the tomb of a Mohammedan saint, honored by the above name (and the building, of course, receiving its name from the saint), who flourished some five hundred years ago. The building is used as a mosque, but the native Christians say that originally it was a Christian church. It consists of two apartments, the floor of the first still partly paved with fragments of very beautiful mosaic-work, wrought in marble of red, blue, and white. On the middle of the inner room stands a large wooden lamp-stand in imitation of a tree, with a goodly number of branches, on which a number of oil-lamps are hanging, together with a formidable array of filthy rags placed there by pilgrims in honor of the saint, whose tomb, they say, is in the northern wall, indicated by a marble slab placed against it. This part of the mount is frequently called by the natives after the saint, *'Imad ed-Din*.

4. The present inhabitants of Nablûs, with very few exceptions, are Arabs. It is difficult to say with exactness what is the number of its population, inasmuch as no census is taken. About 10,000 is near the mark. Of these there are about 100 Jews, 150 Samaritans, from 500 to 600 native Christians; the remaining 9400 are Mohammedans—the most bigoted and unruly, perhaps, in Palestine. The enmity between the Samaritans and Jews is as inveterate still as it was in the days of Christ.

Being, as it is, the gateway of the trade between Jaffa and Beirût on the one side, and the transjordanic districts on the other, and the centre also of a province so rich in wool, grain, and oil, Nablûs becomes, necessarily, the seat of an active commerce, and

of a comparative luxury to be found in very few of the inland Oriental cities. It produces, in its own manufactories, many of the coarser woollen fabrics, delicate silk goods, cloth of camel's hair, and especially soap, of which last commodity large quantities, after supplying the immediate country, are sent to Egypt and other parts of the East. The ashes and other sediments thrown out of the city, as the result of the soap manufacture, have grown to the size of hills, and give to the environs of the town a peculiar aspect. The olive, as in the days when Jotham delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, pomegranates, are abundant. The valley of the Nile itself hardly surpasses Nablûs in the production of vegetables of every sort.

See Robinson, *Palestine*, ii, 94–136; Olin, *Travels*, ii, 339–365; *Narrative of the Scottish Deputation*, p. 208–218; Schubert, *Morgenland*, iii, 136–154; Lord Nugent, *Lands Classical and Sacred*, ii, 172–180; Hackett, *Illustrations of Scripture*, p. 193 sq.; Thomson, *Land and Book*, ii, 203; Conder, *Tent Work in Palestine*, i, 61 sq. Dr. Rosen, in the *Zeitschr. der deutschen morgenländ. Gesellschaft* for 1860 (p. 622–639), has given a careful plan of Nablûs and the environs, with various accompanying remarks. See also SAMARITANS, MODERN.

She'chemite (Heb. with the art. and collectively *hash-Shikmî*, שִׁכְמִי, a patronymic, Sept. ὁ Συχημί), a family designation of the descendants of Shechem (q. v.), the son of Shemidah of the tribe of Manasseh (1 Chron. vii, 19).

Shechi'nah [some *Shech'inah*; also written *Shekinah*] (in Chaldee and Neo-Hebrew *Shekinah*, שְׁכִינָה, strictly residence, i. e. of God, his visible presence, from שָׁכַן, to dwell), a word not found in the Bible, but used by the later Jews, and borrowed by Christians from them, to express the visible majesty of the Divine Presence, especially when resting or dwelling between the cherubim on the mercy-seat in the tabernacle and in the Temple of Solomon; but not in Zerubbabel's temple, for it was one of the five particulars which the Jews reckon to have been wanting in the second Temple (Castell, *Lexic. s. v.*; Prideaux, *Connect.* i, 138).

1. *Rabbinical Import.*—The use of the term is first found in the Targums, where it forms a frequent periphrasis for God, considered as dwelling among the children of Israel, and is thus used, especially by Onkelos, to avoid ascribing corporeity to God himself, as Castell tells us, and may be compared to the analogous periphrasis so frequent in the Targum of Jonathan, "the Word of the Lord." Many Christian writers have thought that this threefold expression for the Deity—the Lord, the Word of the Lord, and the Shechinah—indicates the knowledge of a trinity of persons in the Godhead, and accordingly, following some Rabbinical writers, identify the Shechinah with the Holy Spirit. Others, however, deny this (Calmet, *Dict. of the Bible*; Saubert [Joh.], *On the Logos*, § xix, in *Critic. Sacr.*; Glass, *Philolog. Sacr.* v, 1; vii, etc.).

Without stopping to discuss this question, it will most conduce to give an accurate knowledge of the use of the term Shechinah by the Jews themselves if we produce a few of the most striking passages in the Targums where it occurs. In Exod. xxv, 8, where the Hebrew has "Let them make me a sanctuary that I may dwell (וַיִּשְׁכְּנִי) among them," Onkelos has "I will make my Shechinah to dwell among them." In xxix, 45, 46, for the Hebrew "I will dwell among the children of Israel," Onkelos has "I will make my Shechinah to dwell," etc. In Psa. lxxiv, 2, for "this Mount Zion wherein thou hast dwelt" the Targum has "wherein thy Shechinah hath dwelt." In the description of the dedication of Solomon's Temple (1 Kings viii, 12, 13) the Targum of Jonathan runs thus: "The Lord is pleased to make his Shechinah dwell in Jerusalem. I

have built the house of the sanctuary for the house of thy Shechinah forever," where it should be noticed that in ver. 13 the Hebrew שָׁכַן is not used, but זָבַל and יָשַׁב. In 1 Kings vi, 13, for the Hebrew "I will dwell among the children of Israel" Jonathan has "I will make my Shechinah dwell," etc. In Isa. vi, 5 he has the combination "the glory of the Shechinah of the King of ages, the Lord of hosts;" and in the next verse he paraphrases "from off the altar" by "from before his Shechinah on the throne of glory in the lofty heavens that are above the altar" (comp. also Numb. v, 3; xxxv, 34; Psa. lxxviii, 17, 18; cxxxv, 21; Isa. xxxiii, 5; lvii, 15; Joel iii, 17, 21, and numerous other passages). On the other hand, it should be noticed that the Targums never render "the cloud" or "the glory" by Shechinah, but by שְׁכִינָה and יְהוָה, and that even in such passages as Exod. xxiv, 16, 17; Numb. ix, 17, 18, 22; x, 12, neither the mention of the cloud nor the constant use of the verb שָׁכַן in the Hebrew provokes any reference to the Shechinah. Hence, as regards the use of the word *Shechinah* in the Targums, it may be defined as a periphrasis for God whenever he is said to dwell on Zion among Israel or between the cherubims, and so on, in order, as before said, to avoid the slightest approach to materialism. Far most frequently this term is introduced when the verb שָׁכַן occurs in the Hebrew text; but occasionally, as in some of the above-cited instances, where it does not, but where the paraphrast wished to interpose an abstraction corresponding to presence to break the bolder anthropopathy of the Hebrew writer.

Our view of the Targumistic notion of the Shechinah would not be complete if we did not add that, though, as we have seen, the Jews reckoned the Shechinah among the marks of the divine favor which were wanting to the second Temple, they manifestly expected the return of the Shechinah in the days of the Messiah. Thus Hag. i, 8, "Build the house, and I will take pleasure in it, and I will be glorified, saith the Lord" is paraphrased by Jonathan "I will cause my Shechinah to dwell in it in glory." Zech. ii, 10, "Lo, I come, and I will dwell in the midst of thee, saith the Lord" is paraphrased "I will be revealed, and will cause my Shechinah to dwell in the midst of thee;" and viii, 3, "I am returned unto Zion, and will dwell in the midst of Jerusalem," is paraphrased "I will make my Shechinah dwell in the midst of Jerusalem;" and, lastly, in Ezek. xliii, 7, 9, in the vision of the return of the glory of God to the Temple, Jonathan paraphrases thus: "Son of man, this is the place of the house of the throne of my glory, and this is the place of the house of the dwelling of my Shechinah, where I will make my Shechinah dwell in the midst of the children of Israel forever. . . . Now let them cast away their idols, . . . and I will make my Shechinah dwell in the midst of them forever" (comp. Isa. iv, 5, where the return of the pillar of cloud by day and fire by night is foretold as to take place in the days of the Messiah).

The rabbins affirm that the Shechinah first resided in the tabernacle prepared by Moses in the wilderness, into which it descended on the day of its consecration in the figure of a cloud. It passed thence into the sanctuary of Solomon's Temple on the day of its dedication by this prince, where it continued till the destruction of Jerusalem and the Temple by the Chaldeans, and was not afterwards seen there.

2. *Biblical History.*—As regards the visible manifestation of the Divine Presence dwelling among the Israelites to which the term Shechinah has attached itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light enveloped in a cloud, and usually concealed by the cloud so that the cloud itself was for the most part alone visible; but on particular occasions the glory (in Heb. קְדוֹר, in Chald. קִדְרָא) appeared. Thus, at the

Exodus, "the Lord went before" the Israelites "by day in a pillar of cloud . . . and by night in a pillar of fire to give them light." Again, we read that this pillar "was a cloud and darkness" to the Egyptians, "but it gave light by night" to the Israelites. But in the morning watch "the Lord looked unto the host of the Egyptians through the pillar of fire and of the cloud, and troubled the host of the Egyptians"—i. e. as Philo (quoted by Patrick) explains it, "the fiery appearance of the Deity shone forth from the cloud," and by its amazing brightness confounded them. So, too, in the *Pirke Eliezer* it is said, "The blessed God appeared in his glory upon the sea, and it fled back," with which Patrick compares *Psa. lxxvii, 16*, "The waters saw thee, O God, the waters saw thee; they were afraid," where the Targum has "They saw thy Shechinah in the midst of the waters." In *Exod. xix, 9*, "the Lord said to Moses, Lo, I come unto thee in a thick cloud," and accordingly in *ver. 16* we read that "a thick cloud" rested "upon the mount," and in *ver. 18* that "Mount Sinai was altogether on a smoke, because the Lord descended upon it in fire." This is further explained in *xxiv, 16*, where we read that "the glory of the Lord abode upon Mount Sinai, and the cloud covered it (i. e. as Aben-Ezra explains it, the glory) six days." But upon the seventh day, when the Lord called "unto Moses out of the midst of the cloud," there was a breaking-forth of the glory through the cloud, for "the sight of the glory of the Lord was like devouring fire on the top of the mount in the eyes of the children of Israel" (*ver. 17*). So, again, when God, as it were, took possession of the Tabernacle at its first completion (*xl, 34, 35*), "the cloud covered the tent of the congregation (externally), and the glory of the Lord filled the tabernacle (within), and Moses was not able to enter into the tent of the congregation" (rather, of *meeting*); just as at the dedication of Solomon's Temple (*1 Kings viii, 10, 11*) "the cloud filled the house of the Lord so that the priests could not stand to minister because of the cloud, for the glory of the Lord had filled the house of the Lord." In the tabernacle, however, as in the Temple, this was only a temporary state of things, for throughout the books of Leviticus and Numbers we find Moses constantly entering into the tabernacle. When he did so, the cloud which rested over it externally, dark by day and luminous at night (*Numb. ix, 15, 16*), came down and stood at the door of the tabernacle, and the Lord talked with Moses inside, "face to face, as a man talketh with his friend" (*Exod. xxxiii, 7-11*). It was on such occasions that Moses "heard the voice of one speaking unto him from off the mercy-seat that was upon the ark of testimony, from between the two cherubim" (*Numb. vii, 89*), in accordance with *Exod. xxv, 22*; *Lev. xvi, 2*. But it does not appear that the glory was habitually seen either by Moses or the people. Occasionally, however, it flashed forth from the cloud which concealed it, as *Exod. xvi, 7, 10*; *Lev. ix, 6, 23*, when "the glory of the Lord appeared unto all the people" according to a previous promise, or as *Numb. xiv, 10*; *xvi, 19, 42*; *xx, 6*, suddenly to strike terror in the people in their rebellion. The last occasion on which the glory of the Lord appeared was that mentioned in *xx, 6*, when they were in Kadesh in the fortieth year of the Exodus, and murmured for want of water; and the last express mention of the cloud as visibly present over the tabernacle is in *Deut. xxxi, 15*, just before the death of Moses. The cloud had not been mentioned before since the second year of the Exodus (*Numb. x, 11, 34*; *xii, 5, 10*); but as the description in *ix, 15-23*; *Exod. xl, 38*, relates to the whole time of their wanderings in the wilderness, we may conclude that, at all events, the cloud visibly accompanied them through all the migrations mentioned in *Numb. xxxiii* till they reached the plains of Moab and till Moses died. From this time we have no mention whatever in the history either of the cloud, or of the glory, or of the voice from between the cherubim, till the dedication of Solomon's Temple. But since it is

certain that the ark was still the special symbol of God's presence and power (*Josh. iii, iv, vi*; *1 Sam. iv*; *Psa. lxxviii, 1 sq.*; comp. with *Numb. x, 35*; *Psa. cxxxii, 8*; *lxxx, 1*; *xcix, 1*), and since such passages as *1 Sam. iv, 4, 21, 22*; *2 Sam. vi, 2*; *Psa. xcix, 7*; *2 Kings xix, 15*, seem to imply the continued manifestation of God's presence in the cloud between the cherubim, and inasmuch as *Lev. xvi, 2* seemed to promise so much, and as more general expressions, such as *Psa. ix, 11*; *cxxxii, 7, 8, 13, 14*; *lxxvi, 2*; *Isa. viii, 18*, etc., thus acquire much more point, we may perhaps conclude that the cloud did continue, though with shorter or longer interruptions, to dwell between "the cherubim of glory shadowing the mercy-seat" until the destruction of the Temple by Nebuchadnezzar.

The allusions in the New Test. to the Shechinah are not unfrequent. Thus, in the account of the nativity, the words "Lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them" (*Luke ii, 9*), followed by the apparition of "the multitude of the heavenly host," recall the appearance of the divine glory on Sinai, when "He shined forth from Paran, and came with ten thousands of saints" (*Deut. xxxiii, 2*; comp. *Psa. lxxviii, 17*; *Acts vii, 53*; *Heb. ii, 2*; *Ezek. xliii, 2*). The "God of glory" (*Acts vii, 2, 55*), "the cherubim of glory" (*Heb. ix, 5*), "the glory" (*Rom. ix, 4*), and other like passages, are distinct references to the manifestations of the glory in the Old Test. It appeared at the baptism and transfiguration of Jesus, and is called the excellent glory by Peter (*2 Pet. ii, 10*). When we read in *John i, 14* that "the Word was made flesh, and dwelt among us (*ἐσκήνωσεν ἐν ἡμῖν*), and we beheld his glory," or in *2 Cor. xii, 9* "that the power of Christ may rest upon me" (*πίσσω νόσῳ ἐπ' ἐμέ*); or in *Rev. xxi, 3*, "Behold the tabernacle of God is with men, and he will dwell with them" (*ἡ σκηνή τοῦ Θεοῦ . . . καὶ σκηνώσει μετ' αὐτῶν*), we have not only references to the Shechinah (the Greek *σκηνή* being itself, perhaps, an echo of the Heb. שִׁכְנָה, *shukán*), but are distinctly taught to connect it with the incarnation and future coming of Messiah, as type with antitype. Nor can it be doubted that the constant connection of the second advent with a cloud, or clouds, and attendant angels points in the same direction (*Matt. xxvi, 64*; *Luke xxi, 27*; *Acts i, 9, 11*; *2 Thess. i, 7, 8*; *Rev. i, 7*).

It should also be specially noticed that the attendance of angels is usually associated with the Shechinah. These are most frequently called (*Ezek. x, xi*) cherubim; but sometimes, as in *Isa. vi, seraphim* (comp. *Rev. iv, 7, 8*). In *Exod. xiv, 19* "the angel of God" is spoken of in connection with the cloud, and in *Deut. xxxiii, 2* the descent upon Sinai is described as being "with ten thousands of saints" (comp. *Psa. lxxviii, 17*; *Zech. xiv, 5*). The predominant association, however, is with the cherubim, of which the golden cherubim on the mercy-seat were the representation. This gives force to the interpretation that has been put upon *Gen. iii, 24* (*Jerus. Targum*) as being the earliest notice of the Shechinah, under the symbol of a pointed flame, dwelling between the cherubim, and constituting that local presence of the Lord from which Cain went forth, and before which the worship of Adam and succeeding patriarchs was performed (see *Hale, Chronol. ii, 94*; *Smith, Sac. Annal. i, 173, 176, 177*). Parkhurst went so far as to imagine a tabernacle containing the cherubim and the glory all the time from Adam to Moses (*Heb. Lex. p. 623*). It is, however, pretty certain that the various appearances to Abraham and that to Moses in the bush were manifestations of the Divine Majesty similar to those later ones to which the term Shechinah is applied (see especially *Acts vii, 2*).

3. From the tenor of these texts it is evident that the Most High, whose essence no man hath seen or can see, was pleased anciently to manifest himself to the eyes of men by an external visible symbol. As to the

precise nature of the phenomenon thus exhibited we can only say that it appears to have been a concentrated glowing brightness, a preternatural splendor, an effulgent something, which was appropriately expressed by the term "glory;" but whether in philosophical strictness it was material or immaterial it is probably impossible to determine. A luminous object of this description seems intrinsically the most appropriate symbol of that Being of whom, perhaps in allusion to this very mode of manifestation, it is said that "he is light" and that "he dwelleth in light unapproachable, and full of glory." The presence of such a sensible representation of Jehovah seems to be absolutely necessary in order to harmonize what is frequently said of "seeing God" with the truth of his nature as an incorporeal and essentially invisible spirit. While we are told in one place that "no man hath seen God at any time," we are elsewhere informed that Moses and Aaron and the seventy elders "saw the God of Israel" when called up to the summit of the holy mount. So, also, Isaiah says of himself (vi, 1, 5) that "in the year that king Uzziah died he saw the Lord sitting upon his throne," and that, in consequence, he cried out, "I am undone: for mine eyes have seen the Lord of hosts." In these cases it is obvious that the object seen was not God in his essence, but some external, visible symbol which, because it stood for God, is called by his name.

But of all these ancient recorded theophanies the most signal and illustrious was undoubtedly that which was vouchsafed in the pillar of cloud that guided the march of the children of Israel through the wilderness on their way to Canaan. A correct view of this subject clothes it at once with a sanctity and grandeur which seldom appear from the naked letter of the narrative. There can be little doubt that the columnar cloud was the seat of the Shechinah. We have already seen that the term *shechinizing* is applied to the abiding of the cloud on the summit of the mountain (Exod. xxiv, 16). Within the towering aerial mass, we suppose, was enfolded the inner effulgent brightness to which the appellation "glory of the Lord" more properly belonged, and which was only *occasionally* disclosed. In several instances in which God would indicate his anger to his people it is said that they looked to the cloud and beheld the "glory of the Lord" (Numb. xiv, 10; xvi, 19, 42). So when he would inspire a trembling awe of his majesty at the giving of the law, it is said the "glory of the Lord appeared as a devouring fire" on the summit of the mount. Nor must the fact be forgotten in this connection that when Nadab and Abihu, the two sons of Aaron, offended by strange fire in their offerings, a fatal flash from the cloudy pillar instantaneously extinguished their lives. The evidence would seem, then, to be conclusive that this wondrous pillar-cloud was the seat or throne of the Shechinah, the visible representative of Jehovah dwelling in the midst of his people.

Arc. Fæd.* ch. xi; Wells, *The Shechinah* (in *Help for Understanding the Scripture*, p. 4); (Am.) *Evang. Review*, Jan. 1860. See also CHERUB; CLOUD; PILLAR.

Shedd, WILLIAM, a Congregational minister, was born at Mount Vernon, N. H., in 1798, graduated at Dartmouth College in 1819, and ordained an evangelist in 1823. He was minister for one year at Abington, Mass., where he died in 1830. He wrote *Letters to W. E. Channing on the Existence and Agency of Fallen Spirits*, by *Canonicus* (Boston, 1828, 8vo).

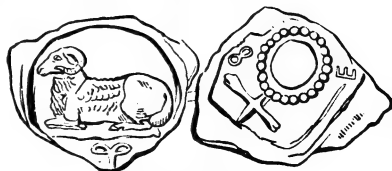

Sheddian, SAMUEL SHARON, D.D., a Presbyterian minister, was born in Northumberland County, Pa., Sept. 13, 1810. His ancestors came from Scotland and settled

on the Susquehanna River in that county, where the homestead of his family remains. He was prepared for college in the Milton Academy, Pa. He entered Jefferson College in 1830, and graduated therefrom in two years. He afterwards pursued his theological studies in Princeton Seminary, and was licensed to preach in the fall of 1834. The first fifteen years of his ministry were spent in connection with the churches of Williamsport, Murray, and Warrior Run, the latter place being the home of Dr. Sheddian's childhood. His father and grandfather were ruling elders in this Church. From Warrior Run he was unanimously called to the pastorate of the First Presbyterian Church of Rahway, N. J. The life of Dr. Sheddian was a most laborious and useful one. During his ministry at Warrior Run he united the office of teacher with that of pastor, and, by unremitting toil, carried on successfully both his school and his Church. From among the young men he prepared for college, more than a dozen became ministers of the Gospel. He was a wise counsellor and warm friend of the young men studying for the ministry. He was eminently judicious as an adviser in the matter of new Church enterprises in the bounds of the Presbytery of Elizabeth, and his services will be held in grateful remembrance. Dr. Sheddian remained as pastor of the Rahway Church twenty-two years. The position he held among his ministerial brethren in the community where he labored and throughout the State of New Jersey is shown by the profound impression produced by his death, and the tribute of respect paid to his memory by the synod then in session, which appointed a committee to attend his funeral. He was for several years one of the directors of the Princeton Theological Seminary. He died in Rahway, N. J., Oct. 18, 1874. (W. P. S.)

Shed'etir (Heb. *Shedeir*, שְׁדֵי'אֵתִיר, *darter of light*; Sept. Σεδεϊούρ v. r. Ἐδιούρ), father of Elizur, which latter was chief of the tribe of Reuben at the time of the Exode (Numb. i, 5; ii, 10; vii, 30, 35; x, 18). B.C. ante 1658.

Sheep. The following Hebrew words occur as the names of sheep: צֹאן, *tsón* (varieties צֹאנֹן, *tsenón*, צֹנֶה, *tsoneh*, or צֹנֶה, *tsoneh*), a collective noun to denote "a flock of sheep or goats," to which is opposed the noun of unity, שֶׁה, *seh*, "a sheep" or "a goat," joined to a masculine where "rams" or "he-goats" are signified, and with a feminine when "ewes" or "she-goats" are meant, though even in this case sometimes to a masculine (as in Gen. xxxi, 10): אֵיִל, *dyl*, "a ram," רֹחֵל, *rachél*, "a ewe;" כֶּבֶשׂ, *kébes*, or כֶּבֶשׂ, *késh* (fem. כֶּבֶשֶׁת, or כֶּבֶשֶׁת), "a lamb," or rather "a sheep of a year old or above," opposed to תֵּלֶה, *taléh*, "a sucking or very young lamb;" כֶּרֶ, *kar*, is another term applied to a lamb as it *skips* (כָּרַר) in the pastures. The Chald. אִמְמָר, *immár* (Ezra vi, 9, 17; vii, 17), is a later word, apparently indicating *lambs* intended for sacrifice, while צֹאֲדִיר, *attúdr*, rendered "ram" in Gen. xxxi, signifies a *he-goat*. See EWE, LAMB; RAM.

The term כֶּסֶיטָה, *kesitáh* (literally something weighed out, A. V. "piece of money," Gen. xxxiii, 19; Job xlii, 11; "piece of silver," Josh. xxiv, 32), has been supposed by many to denote a coin stamped with the figure of a lamb; but Gesenius suggests (*Thesaur.* p. 1241) that specimens of that sort are probably only those of Cyprus, which bore that mark. See KESITAH.

Supposed Kesitah.

This well-known domestic animal has, from the earliest period, contributed to the wants of mankind. Sheep were an important part of the possessions of the ancient Hebrews and of Eastern nations generally. The first mention of sheep occurs in Gen. iv, 2. The following are the principal Biblical allusions to these animals. They were used in the sacrificial offerings, both the adult animal (Exod. xx, 24; 1 Kings viii, 63; 2 Chron. xxix, 33) and the lamb, *קֶרֶבֶט*, i. e. "a male from one to three years old;" but young lambs of the first year were more generally used in the offerings (see Exod. xxix, 38; Lev. ix, 3; xii, 6; Numb. xxviii, 9, etc.). No lamb under eight days old was allowed to be killed (Lev. xxii, 27). A very young lamb was called *טֶלֶח*, *talèh* (see 1 Sam. vii, 9; Isa. lxxv, 25). Sheep and lambs formed an important article of food (1 Sam. xxi, 18; 1 Kings i, 19; iv, 23; Psa. lxxiv, 11; etc.), and ewe's milk is associated with that of the cow (Isa. vii, 21, 23). The wool was used as clothing (Lev. xiii, 47; Deut. xxii, 11; Prov. xxxi, 13; Job xxxi, 20, etc.). See WOOL. Trumpets may have been made of the horns of rams (Josh. vi, 4), though the rendering of the A. V. in this passage is generally thought to be incorrect. "Rams' skins dyed red" were used as a covering for the tabernacle (Exod. xxv, 5). Sheep and lambs were sometimes paid as tribute (2 Kings iii, 4). It is very striking to notice the immense numbers of sheep that were reared in Palestine in Biblical times: see, for instance, 1 Chron. v, 21; 2 Chron. xv, 11; xxx, 24; 2 Kings iii, 4; Job xlii, 12. Especial mention is made of the sheep of Bozrah (Mic. ii, 12; Isa. xxxiv, 6), in the land of Edom, a district well suited for pasturing sheep. "Bashan and Gilead" are also mentioned as pastures (Mic. vii, 14). "Large parts of Carmel, Bashan, and Gilead," says Thomson (*Land and Book*, i, 304), "are at their proper seasons alive with countless flocks" (see also p. 331). "The flocks of Kedar" and "the rams of Nebaioth," two sons of Ishmael (Gen. xxv, 13) that settled in Arabia, are referred to in Isa. lx, 7. Sheep-shearing is alluded to in Gen. xxxi, 19; xxxviii, 13; Deut. xv, 19; 1 Sam. xxv, 4; Isa. liii, 7; etc. Sheep-dogs were employed in Biblical times, as is evident from Job xxx, 1, "the dogs of my flock." From the manner in which they are spoken of by the patriarch it is clear, as Thomson (*ibid.* i, 301) well observes, that the Oriental shepherd-dogs were very different animals from the sheep-dogs of our own land. The existing breed are described as being "a mean, sinister, ill-conditioned generation, which are kept at a distance, kicked about, and half starved, with nothing noble or attractive about them." They were, however, without doubt, useful to the shepherds, more especially at night, in keeping off the wild beasts that prowled about the hills and valleys (comp. Theocrit. *Id.* v, 106). Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (comp. John x, 4; Psa. lxxvii, 20; lxxx, 1), though they also drove them (Gen. xxxiii, 13). See SHEPHERD. It was usual among the ancient Jews to give names to sheep and goats, as we do to our dairy cattle (see John x, 3). This practice prevailed among the ancient Greeks (see Theocrit. *Id.* v, 103):

Οὐκ ἀπὸ τῆς ἀνδρὸς οὐτος ὁ Κῶναρος, ἢ τε Κνωαῖδα;

The following quotation from Hartley (*Researches in Greece and the Levant*, p. 321) is so strikingly illustrative of the allusions in John x, 1-16 that we cannot do better than quote it: "Having had my attention directed last night to the words in John x, 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it was, and that the sheep obeyed the shepherd when he called them by their names. This morning I had an opportunity of verifying the truth of this remark. Passing by a flock of sheep, I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then bade him call one of his sheep; he did so, and it instantly left its pasturage and its companions and ran up to the

hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that 'a stranger will they not follow, but will flee from him.' The shepherd told me that many of his sheep were still wild, that they had not yet learned their names, but that by teaching them they would all learn them." See also Thomson (i, 301): "The shepherd calls sharply from time to time to remind the sheep of his presence. They know his voice and follow on; but if a stranger call, they stop short, lift up their heads in alarm, and if it is repeated they turn and flee, because they know not the voice of a stranger." Henderson, in Iceland, notices a shepherdess with a flock of fifty sheep, every one of which she professed to know by name (*Iceland*, i, 189).

Domestic sheep, although commonly regarded as the progeny of one particular wild species, are probably an instance, among many similar, where the wisdom of Providence has provided subsistence for man in different regions by bestowing the domesticating and submissive instincts upon the different species of animals which the human family might find in their wanderings; for it is certain that even the American *argali* can be rendered tractable, and that the Corsican *musum* will breed with the common sheep. The normal animal, from which all or the greater part of the Western domestic races are assumed to be descended, is still found wild in the high mountain regions of Persia, and is readily distinguished from two other wild species bordering on the same region. What breeds the earliest shepherd tribes reared in and about Palestine can now be only inferred from negative characters; yet they are sufficient to show that they were the same, or nearly so, as the common horned variety of Egypt and continental Europe: in general white, and occasionally black, although there was on the Upper Nile a speckled race; and so early as the time of Aristotle the Arabians possessed a rufous breed, another with a very long tail, and, above all, a broad-tailed sheep, which at present is commonly denominated the Syrian. These three varieties are said to be of African origin, the red hairy in particular having all the characteristics to mark its descent from the wild *Ovis tragelaphus* or *barbatus*, or *kebsk* of the Arabian and Egyptian mountains. Flocks of the ancient breed, derived from the Bedawin, are now extant in Syria, with little or no change in external characters, chiefly the broad-tailed and the common horned white, often with black and white about the face and feet, the tail somewhat thicker and longer than the European.

The sheep of Syria and Palestine are the broad-tail (*Ovis laticaudatus*), and a variety of the common sheep of this country (*Ovis aries*) called the *Bidowin*, accord-

Broad-tailed Sheep.

ing to Russell (*Aleppo*, ii, 147). The broad-tailed kind has long been reared in Syria. Aristotle, who lived more than 2000 years ago, expressly mentions Syrian sheep with tails a cubit wide. This or another variety of the species is also noticed by Herodotus (iii, 113) as occurring in Arabia. The fat tail of the sheep is probably alluded to in Lev. iii, 9; vii, 3, etc., as the fat and the whole rump that was to be taken: off hard by the backbone, and was to be consumed on the altar. "The carcass of one of these sheep, without including the head, feet, entrails, and skin, generally weighs from fifty to sixty pounds, of which the tail makes up fifteen pounds; but some of the largest breed, that have been fattened with care, will sometimes weigh 150 pounds, the tail alone composing a third of the whole weight. This tail—a broad and flattish appendage—has the appearance of a large and loose mass of flesh or fat upon the rump and about the root of the tail; and from the odd motion which it receives when the animal walks, one would suppose it connected to the animal's body only by the skin with which it is covered. . . . In the Egyptian variety this tail is quite pendulous and broad throughout, but in the Syrian variety the tail narrows almost to a point towards the end, and the extremity is turned up. This is a great convenience to the animal. The sheep of the extraordinary size mentioned before are very rare, and usually kept in yards, so that they are in little danger of injuring the tail as they walk. But in the fields, in order to prevent injury from the bushes, the shepherds in several places of Syria fix a thin piece of board on the under-part (which is not, like the rest, covered with wool), and to this board small wheels are sometimes added. . . . The tail is entirely composed of a substance between marrow and fat, serving very often in the kitchen in the place of butter, and, cut into small pieces, makes an ingredient in various dishes; when the animal is young it is little inferior to the best marrow" (Kitto, *Phys. Hist. of Palest.* p. 306; see also Thomson, *ut sup.* i, 178).

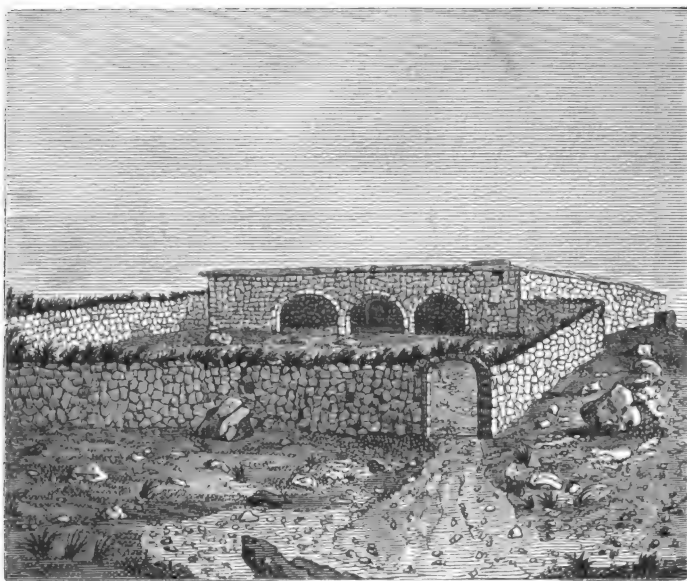

The whole passage in Gen. xxx which bears on the subject of Jacob's stratagem with Laban's sheep is involved in considerable perplexity, and Jacob's conduct in this matter has been severely and uncompromisingly condemned by some writers. We touch upon the question briefly in its zoological bearing. It is altogether impossible to account for the complete success which attended Jacob's device of setting peeled rods before the ewes and she-goats as they came to drink in the watering-troughs, on natural grounds. The Greek fathers, for the most part, ascribe the result to the direct operation of the Deity, whereas Jerome and the Latin fathers regard it as a mere natural operation of the imagination, adducing as illustrations in point various devices that have been resorted to by the ancients in the cases of mares, asses, etc. (see Oppian, *Cyneg.* i, 327, 357; Pliny, *H. N.* vii, 10, and the passages from Quintilian, Hippocrates, and Galen, as cited by Jerome, Grotius, and Bochart). None of the instances cited by Jerome and others are exact parallels with that in question. The quotations adduced, with the exception of those which speak of painted images set before Spartan women *inter concipiendum*, refer to cases in which living animals themselves, and not reflections of inanimate objects, were the cause of some marked peculiarity in the fetus. Rosenmüller, however (*Schol.* ad. loc.), cites Hastfeer (*De Re Oviaria*, German version, p. 17, 30, 43, 46, 47) as a writer by whom the contrary opinion is confirmed. Even granting the general truth of these instances, and acknowledging the curious effect which peculiar sights through some nervous influence do occasionally produce in the fetus of many animals, yet we must agree with the Greek fathers and ascribe the production of Jacob's spotted sheep and goats to divine agency. The whole question has been carefully considered by Nitschmann (*De Corylo Jacobi*, in *Thes. Nov. Theol. Phil.* i, 202–206), from whom we quote the following passage: "Fatetur itaque, cum Vossio aliisque piis viris, illam

IX.—S s

pecudum imaginationem tantum fuisse causam adjuvantem, ac plus in hoc negotio divinæ tribuendum esse virtuti, quæ suo concursu sic debilem causæ secundæ vim adauxit ut quod ea sola secundum naturam præstare non valeret id divina benedictione supra naturam præstaret;" and then Nitschmann cites the passage in Gen. xxxi, 5–13, where Jacob expressly states that his success was due to divine interference; for it is hard to believe that Jacob is here uttering nothing but a tissue of falsehoods, which appears to be the opinion of Kalisch (*Hist. and Crit. Comment. Gen. xxx and xxxi*), who represents the patriarch as "unblushingly executing frauds suggested by his fertile invention, and then abusing the authority of God in covering or justifying them." We are aware that a still graver difficulty in the minds of some persons remains, if the above explanation be adopted; but we have no other alternative, for, as Patrick has observed, "let any shepherd now try this device, and he will not find it do what it did then by a divine operation." The greater difficulty alluded to is the supposing that God would have directly interfered to help Jacob to act fraudulently towards his uncle. But are we quite sure that there was any fraud fairly called such in the matter? Had Jacob not been thus aided, he might have remained the dupe of Laban's niggardly conduct all his days. He had served his money-loving uncle faithfully for fourteen years; Laban confesses his cattle had increased considerably under Jacob's management, but all the return he got was unfair treatment and a constant desire on the part of Laban to strike a hard bargain with him (Gen. xxxi, 7). God vouchsafed to deliver Jacob out of the hands of his hard master, and to punish Laban for his cruelty, which he did by pointing out to Jacob how he could secure to himself large flocks and abundant cattle. God was only helping Jacob to obtain that which justly belonged to him, but which Laban's rapacity refused to grant. "Were it lawful," says Stackhouse, "for any private person to make reprisals, the injurious treatment Jacob had received from Laban, both in imposing a wife upon him and prolonging his servitude without wages, was enough to give him both the provocation and the privilege to do so. God Almighty, however, was pleased to take the determination of the whole matter into his own hands." This seems to us the best way of understanding this disputed subject.

The relation of the sheep to man, in a pastoral country, gave rise to many beautiful symbols and interesting illustrations. Jehovah was the shepherd of his people, and Israel was his flock (Psa. xxiii, 1; lxxx, 1; lxxxix, 13; Isa. xl, 11; Jer. xxiii, 1, 2; Ezek. xxxiv, and often elsewhere); the apostasy of sinners from God is the straying of a lost sheep (Psa. cxix, 176; Isa. liii, 6; Jer. i, 6); and the ever-blessed Son of God coming down to our world is a shepherd seeking his sheep which were lost (Luke xv, 4–6). He is the only shepherd; all who do not own him are thieves and robbers (John x, 8); wolves in sheep's clothing (Matt. vii, 15). He is the good shepherd, who gave his life for the sheep (John x, 11); and now he gives them his own life in resurrection, and this is *eternal* life (ver. 28; Rom. vi, 9–11; Col. ii, 12). As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our blessed Lord (Isa. liii, 7; Acts viii, 32, etc.).

In the vision of the prophet Daniel, recorded in ch. viii, the Medo-Persian monarchy was seen under the figure of a ram with two unequal horns, which was overthrown by a one-horned he-goat, representing the Macedonian power. We have already remarked on the propriety of the latter symbol [see GOAT], and the former is no less correct. There is abundant evidence that the ram was accepted as the national emblem by the Persian people, as the he-goat was by the Macedonians. Ammianus Marcellinus states that the king of Persia wore a ram's head of gold set with precious stones, instead of a diadem. The type of a ram is seen on ancient Persian

Oriental Sheepfold of Stone.

coins, as on one of undoubted genuineness in Hunter's collection, in which the obverse is a ram's head and the reverse a ram couchant. Rams' heads, with horns of unequal height, are still to be seen sculptured on the pillars of Persepolis.

Sheepcote (or **Sheepfold**) is designated by several Heb. terms. **נֶיֶה**, *navéh* (a habitation or dwelling-place, as usually rendered, "sheepcote," 2 Sam. vii, 8; 1 Chron. xvii, 1; "fold," Isa. lxxv, 10; Jer. xxiii, 3; Ezek. xxxiv, 14; "stable," xxv, 5), means, in a general sense, a place where flocks repose and feed; and, as the Orientals do not usually fold their flocks at night, it must be left to the context to determine whether we are to understand "pastures" or "sheepfolds." A more distinctive term is **גֶּדֶרָה**, *gederáh*, an enclosure, "cote" (1 Sam. xxiv, 3; "fold," Numb. xxxii, 16, 24, 36; Zeph. ii, 6; elsewhere "hedge" or "wall"), which means a built pen or safe structure, such as adjoins buildings, and used for cattle as well as sheep. Special terms are **מִקְלָה**, *mikláh* (a pen for flocks; "fold," Psa. i, 9; lxxviii, 70; Hab. iii, 17), and **מִשְׁפֶּתַיִם**, *mishpetháyim* (the dual form of which indicates double rows, as of stalls for cattle or sheep; "sheepfolds," Judg. v, 16; "two burdens," Gen. xlix, 14). It is to be observed that the Oriental flocks, when they belong to nomads, are constantly kept in the open country, without being folded at night. This is also the case when the flocks belonging to a settled people are sent out to feed, to a distance of perhaps one, two, or three days' journey, in the deserts or waste lands, where they possess or claim a right of pasturage. This seems to have been the case with the flocks fed by David. As such flocks are particularly exposed to the depredatory attacks of the regular nomads, who consider the flocks of a settled people as more than even usually fair prey, and contest their right to pasture in the deserts, the shepherds, when they are in a district particularly liable to danger from this cause, or from the attacks of wild beasts, and doubt whether themselves and their dogs can afford adequate protection, drive their flocks at night into caves, or, where there are none, into uncovered enclosures, which have been erected for the purpose at suitable distances. These are

generally of rude construction, but are sometimes high and well-built enclosures or towers (generally round), which are impregnable to any force of the depredators when once the flock is within them. Such towers also occur in districts where there are only small dispersed settlements and villages, and serve the inhabitants not only for the protection of their flocks, but as fortresses in times of danger, in which they deposit their property, and, perhaps, when the danger is imminent, their females and children. When no danger is apprehended, or none from which the protection of the shepherds and dogs is not sufficient, the flocks are only folded when collected to be shorn. They are then kept in a walled, but still uncovered, enclosure, partly to keep them together, but still

more under the impression that the sweating and evaporation which result from their being crowded together previously to shearing improve the quality of the wool. Those poor villagers who have no large flocks to send out to the wilderness pastures, with a proper appointment of shepherds, but possess a few sheep and cattle, which feed during the day in the neighboring commons, under the care of children or women, and who cannot provide the necessary watch and protection for them at night, drive them home, and either fold them in a common enclosure, such as we have mentioned, in or near the village, or pen them separately near their own dwellings. Pens or cotes of this class serve also for the lambs and calves, while too young to be kept out with the flocks or to be trusted in a common enclosure. They usually are near the dwellings, which are merely huts made of mats on a framework of palm-branches; these we conceive to answer well to the "tabernacles" (booths), "shepherds' cottages," and other humbler habitations noticed in Scripture. Such villages are of a class belonging to a people (Arabs) who, like the Israelites, have relinquished the migratory life, but who still give their principal attention to pasturage, and do some little matters in the way of culture. It is possible that the villages of the He-

Arab Huts and Sheepcotes near Bushire.

brews, when they first began to settle in Palestine, were of a very similar description. See Kitto, *Pict. Bible*, note at 1 Chron. xvii, 2.

Sheepgate (שַׁעַר הַצֹּאֵן, *Sha'ar hats-Tsón*; Sept. ἡ πύλη ἡ προβατική; Vulg. *Porta gregis*), one of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii, 1, 32; xii, 39). It stood between the tower of Meah and the chamber of the corner (iii, 1, 32) or gate of the guard-house (xii, 39, A. V. "prison-gate"). It is probably the same with the προβατική (sc. πύλη) of John v, 2; A. V. inaccurately, "sheep-market". Bertheau (*Exeg. Handbuch*, on Nehemiah, p. 144) is right in placing it on the east side of the city, but is wrong in placing it at the present St. Stephen's Gate (so also Keil, after Tobler), since no wall existed north of the Temple enclosure nearly so far to the east as that point till after the death of Christ. See JERUSALEM. Barclay locates it in a presumed old wall beyond the precincts of the Temple on the east (*City of the Great King*, p. 116); but it is doubtful whether any such separate wall existed. The adjoining localities would seem to fix it in the eastern wall of Ophel, opposite the present Fountain of the Virgin. See BETHESDA.

Sheep-market (John v, 2). The word "market" is an interpolation of our translators, possibly after Luther, who has *Schafhaus*. The words of the original are ἐν τῇ προβατικῇ, to which should probably be supplied not *market*, but *gate* (πύλη), as in the Sept. version of the passages in Nehemiah quoted in the foregoing article (q. v.). The Vulgate connects the προβατική with the κολυμβήθρα, and reads *Probatice piscina*; while the Syriac omits all mention of the sheep, and names only a "place of baptism."

Sheep-master (נֹקֵד, *nokéd*), properly a *shepherd* (q. v.) or sheep-breeder (2 Kings iii, 4); hence a "herdman" in general (Amos i, 1).

Sheepshanks, WILLIAM, a learned English clergyman, was born at Linton, Craven, Yorkshire, March 18, 1740. Educated in the grammar-school of his own parish, he was admitted in 1761 to St. John's College, Cambridge. He took the degree of B.A. in January, 1766, and in 1767 was elected fellow and took the degree of M.A. In 1771 and 1772 he served the university in the office of moderator. He accepted the rectory of Ovington, Norfolk, in 1773, and, having settled in Grassington, he received a limited number of pupils into his house. In 1777 he was presented to the living of Seberham, Cumberland. In 1783 was appointed to the valuable cure of St. John's, Leeds; and in 1792 was collated to a prebend in Lincoln, which he exchanged in 1794 or 1795 for a much more valuable stall at Carlisle. He died at Leeds, July 26, 1810, and was interred in his own church.

Sheep-shearer (זֹּזֵז, *gozéz*, 2 Sam. xiii, 23, 24; fully with זֹזֵז, *tsón*, added, Gen. xxxviii, 12). The time of sheep-shearing was, among the Hebrews, a season of great festivity (xxxi, 19; 1 Sam. xxv, 4, 8, 36; 2 Sam. xiii, 23-28; 2 Kings x, 12, 14; Isa. liii, 7).

Sheer-Thursday (spelled also *Chare*, *Shere*, or *Shier*) is also known as *Maunday* (q. v.) or *Shrift Thursday*. These are names given in England to the Thursday of Passion Week. It is known in the Romish Church as *Quinta Feria Dominica in Ramis Palmarum*, and its institution is attributed to Leo II about 682. But the day was observed as early as the 5th century by the celebration of the Lord's supper in connection with the washing of feet. It has had several appellations in allusion to events commemorated or ceremonies observed, such as *Dies Cæne Dominica*, the Day of the Lord's Supper; *Dies Natalis Eucharistiæ*, the Birthday of the Eucharist; *Natalis Culicis*, the Birthday of the Cup; *Dies Panis*, the Day of Bread; *Dies Lucis*, the Day of Light, with allusion perhaps to the lights used

at the Lord's supper; *Dies Viridium*, a title of doubtful meaning. It was also called *Capitularium*, because the heads (*capita*) of catechumens were washed that day preparatory to baptism. The name given to it in England was derived from the custom of men polling their beards on this day as a token of grief for our Lord's betrayal: "for that in old fathers' days the people would that day *shere* their heedes, and clypp theyr bordes, and pool theyr heedes, and make them honest ayent Easter-day." In Saxony it is called Good-Thursday, and in the north of England Kiss-Thursday, in allusion to the Judas kiss. Among the observances of the day were the silence of all bells from this day till Easter-eve; the admission of penitents who had been excluded from religious services at the beginning of Lent; and the consecration of the elements by the pope below the altar of the Lateran. Oil for extreme unction, for chrism, and for baptism was consecrated on this day. After vespers on this day two acolytes strip the altars of all their ornaments, and cover them with black trimmings, while in many places the altars are washed with wine and water, and rubbed with herbs.

Sheet stands in the A. V. for the Heb. סָדִין, *sadin* (Judg. xiv, 12, 13; "fine linen," Prov. xxxi, 24; Isa. iii, 23; comp. σινδών), and the Gr. ὁσόνη (Acts x, 11; xi, 5), which both mean properly a *linen cloth*; hence the former a *shirt* (as in the marg.), and the latter a *sail*. See LINKEN.

Shelog, WILLIAM A., a minister of the Methodist Episcopal Church, South, was born in Rutherford County, N. C., Nov. 8, 1821. He professed religion in 1843, was licensed to preach about 1850, and in 1853 was admitted into the Alabama Conference. He located in 1857; was readmitted into the Alabama Conference in 1859, and in 1860 was transferred to the Texas Conference. He labored in Texas until shortly before his death, April 28, 1864. See *Minutes of Ann. Conferences of M. E. Ch. South*, 1864, p. 525.

Shebari'ah (Heb. שְׁבַרְיָה, *shecharyah*, *dawning of Jehovah*; Sept. Σαβάρια, v. r. Σαπαία and Σααρία), second named of the six sons of Jeroham, Benjamites resident in Jerusalem at the captivity (1 Chron. viii, 26). B.C. 588.

Sheik (Arabic for *elder*), a title of reverence, applied chiefly to a learned man or a reputed saint, but also used sometimes as an ordinary title of respect, like the European Mr., Herr, etc., before the name. It is, however, only given to a Moslem. The term is also applied to heads of Mohammedan monasteries, and to the higher order of religious preachers. The sheik of Mecca, by virtue of his supposed descent from the prophet, levies a kind of tribute on all the pilgrims to the Kaaba.

SHEIK AL-GEHAL (*Ancient of the Mountain*) is the name of the prince of the Assassins, or those Ispahelites of Irak who undertook to assassinate all those whom their chief would pronounce to be his enemies.

SHEIK EL-ISLAM, one of the titles of the grand-mufti of Constantinople, who is president of the *Ulema*, or College of the Professors of the Mohammedan Law. The title is supposed to have been assumed first by Mohammed II in 1453, when Constantinople became the seat of his empire.

Sheiri, tutelary spirits of the Caribs, who are the protectors of the male sex among men.

Shekalim. See TALMUD.

She'kel [many *shek'el*] (Heb. שֶׁקֶל, *shekel*, from שָׁקַל, *to weigh out*), the Hebrew standard of valuation, as the cubit was of mensuration. See METROLOGY.

I. Scriptural Description.—The shekel was properly a certain *weight* according to which the quantity and price of things were determined; e. g. bread (Ezek. iv, 10); hair (1 Sam. xiv, 26), especially metals, as brass, iron, silver, gold; and articles made of metal, as arms

vessels, etc. (Exod. xxxviii, 24, 25, 29; Numb. vii, 13 sq.; xxxi, 52; 1 Sam. xvii, 5, 7; Josh. vii, 21; 1 Chron. iii, 9). Especially did the Hebrews use silver weighed by the shekel as money, and often it was actually weighed out, although they may early have had pieces or bars of silver marked with the weight (Gen. xxiii, 16; Lev. v, 15; xxvii, 3-7; 2 Sam. xxiv, 24; Jer. xxxii, 9, 10; Ezek. xxi, 32). From the common shekel is distinguished the *sacred shekel* (שֶׁקֶל הַקֹּדֶשׁ, "shekel of the sanctuary"), somewhat heavier, it would seem, or at least of just and full weight, according to which all contributions and tribute for sacred purposes were to be reckoned (Exod. xxx, 13, 24; xxxviii, 24; Lev. v, 15; xxvii, 3, 25; Numb. iii, 47, 50; vii, 13; xviii, 16; xix, 25); but whether the shekel of the king's weight (שֶׁקֶל הַמֶּלֶךְ, 2 Sam. xiv, 26) is still different, cannot be determined. Nor can the exact weight of the shekel be fully ascertained. The sacred shekel contained twenty *gerahs*, beans, carrot-corns, as some suppose (Exod. xxx, 13; Lev. xxvii, 25; Numb. iii, 47; xviii, 16; Ezek. xlv, 12). More to the purpose is the specification of the rabbins that the shekel was equal to 320 barley-grains; since this accords tolerably well with the actual weight of the Maccabæan shekels still preserved. In the time of the Maccabees (1 Macc. xv, 6) silver coins were struck, each weighing one shekel, and stamped with the words שֶׁקֶל יִשְׂרָאֵל, a shekel of Israel (see Bayer, *De Nummis Hebræo-Samaritanis* [Valent. 1781, 4to], p. 171 sq.; Eckhel, *Doctr. Numor. Vet.* I, iii, 465 sq.). Some of the specimens still extant, though worn by age, weigh 266 or 270 Paris grains; so that the full Maccabæan shekel must have been at least about 274 grains, and thus equivalent to the *didrachm* of Ægina. Hence the Sept. renders the word sometimes σίκλος, and sometimes διδραχμον or διδραχμα. But Josephus and later writers give the value at four Attic drachmæ (*Ant.* iii, 8, 2; Hesych. s. v.; Jerome, *Ad Ezech.* p. 43, ed. Vallars.). In their time, however, the Attic drachma had depreciated, and was reckoned as equal to the Roman *denarius*, i. e. 7½d. sterling, or 15 cents (Pliny, *Hist. Nat.* xxi, 109). The Maccabæan shekel, therefore, may be estimated at 2s. 6d. sterling, or 60 cents. (See Böckh, *Metrol. Untersuch.* p. 55-57, 62, 63, 299; Smith, *Dict. of Class. Antig.* s. v. "Denarius"). Hence the half-shekel, which was to be paid yearly to the Temple (Exod. xxxviii, 26), is called διδραχμον in Matt. xvii, 24. Some suppose that the earlier common shekel was less than the Maccabæan by one half (Böckh, *ut sup.* p. 63; Bertheau, *Abhandl.* p. 26). At Ephesus a shekel of gold was in use, according to Alexander Ætolus (*ap. Macrobi. Sat.* v, 22). Some understand such a coin in 1 Chron. xxi, 25; but the words imply rather weight.

In silver shekels were paid the contributions to the Temple (Exod. xxx, 13), the fines for offences (xxi, xxii; Deut. xxii, 19, 29; Lev. v, 15), taxes exacted by kings or governors (2 Kings xv, 20; Neh. v, 15), the price of articles (2 Sam. xxiv, 24; 2 Kings vii, 1), etc. In some cases large sums were weighed together (Gen. xxiii, 16; Jer. xxxii, 9), though it is certain that there were pieces of different denominations—both half and quarter shekels (Exod. xxx, 13, 15; 1 Sam. ix, 8, 9). In many instances relating to purchases, a word is omitted in the Hebrew, and the rendering is always "a thousand," or the like, "of silver." The term "pieces" has been supplied in the A. V., but there is not much doubt that "shekels" is the word understood in all cases. See SILVER, PIECE OF. In Neh. v, 15 mention is made of forty shekels of silver paid to the governors, and probably these shekels may have been the silver coin circulating in Persia called σίκλος. This coin has generally been considered a kind of shekel; but as, according to Xenophon (*Anab.* i, 5, 6), it was equal to 7½ Attic oboli, and an obolus weighed 11.25 grains (11.25 × 7.5 = 84.375), giving a Persian silver coin of 84 grains, it is clear that the σίκλος can have no connection with the σίκλος (weighing 220 grains), except in name. (See

Leake, *Num. Hell. Europe*, p. 21; Madden [F. W.], *Hist. Jeur. Coin.* p. 20.) But at this time there were coins also current in Persia of the same standard as the shekel (Mionnet, *Descrip. de Méd.* v, 645, No. 30-40; viii, 426, No. 29-33). See also Schickard, *De Numis Hebr.* p. 15; Bayer, *Siclus Sacer et Profan.* (Lips. 1667); Iseling, *De Siclis Ebræor.* (Basil. 1708). For further information on this question, consult the remarks of the abbé Cave-doni (*Le Princ. Consul. riguardanti la Num. Giud. Definitiv. Decise* [Modena, 1864]), Madden (*Num. Chron.* v, 191), and Plumptre (*Bible Educator*, iii, 96 sq.). See COIN.

II. *Extant Specimens.*—1. *Rabbinical Notices.*—Our attention is, in the first place, directed to the early notices of these shekels in Rabbinical writers. It might be supposed that in the Mishna, where one of the treatises bears the title of "*Shekalim*," or *Shekels*, we should find some information on the subject. But this treatise, being devoted to the consideration of the laws relating to the payment of the half-shekel for the Temple, is of course useless for our purpose.

Some references are given to the works of Rashi and Maimonides (contemporary writers of the 12th century) for information relative to shekels and the forms of Hebrew letters in ancient times; but the most important Rabbinical quotation given by Bayer is that from *Ramban*, i. e. *Rabbi Moses Bar-Nachman*, who lived about the commencement of the 13th century. He describes a shekel which he had seen, and of which the *Cuthæans* read the inscription with ease. The explanation which they gave of the inscription was, on one side *Shekel ha-Shekalim*, "The Shekel of Shekels," and on the other, "Jerusalem the Holy." The former was doubtless a misinterpretation of the usual inscription, "The shekel of Israel;" but the latter corresponds with the inscription on our shekels (Bayer, *De Nummis*, p. 11). In the 16th century R. Azarias de Rossi states that R. Moses Basula had arranged a Cuthæan, i. e. Samaritan, alphabet from coins, and R. Moses Alaskar (of whom little is known) is quoted by Bayer as having read on some Samaritan coins "In such a year of the consolation of Israel, in such a year of such a king." The same R. Azarias de Rossi (or de Adumim, as he is called by Bartolucci, *Bibl. Rabb.* iv, 158), in his מֵאֵר עֵינַיִם, "The Light of the Eyes" (not *Fons Oculorum*, as Bayer translates it, which would require מֵעֵינַיִם, not מֵאֵר), discusses the Translucidal or Samaritan letters, and describes the above-mentioned shekel of Israel; he also determines the weight, which he makes about half an ounce.

We find, therefore, that in early times shekels were known to the Jewish rabbins with Samaritan inscriptions corresponding with those now found (except in one point, which is probably an error), and corresponding with them in weight. These are important considerations in tracing the history of this coinage.

2. *Later Notices.*—We pass on now to the earliest mention of these shekels by Christian writers. We believe that W. Postell is the first Christian writer who saw and described a shekel. He was a Parisian traveller who visited Jerusalem early in the 16th century. In a curious work published by him in 1538, entitled *Alphabetum Duodecim Linguarum*, the following passage occurs. After stating that the Samaritan alphabet was the original form of the Hebrew, he proceeds thus:

"I draw this inference from silver coins of great antiquity which I found among the Jews. They set such store by them that I could not get one of them (not otherwise worth a quincunx) for two gold pieces. The Jews say they are of the time of Solomon, and they added that, hating the Samaritans, as they do, worse than dogs, and never speaking to them, nothing endears these coins so much to them as the consideration that these characters were once in their common usage, nature, as it were, yearning after the things of old. They say that at Jerusalem, now called *Chus* or *Chusembarich*, in the masonry and in the deepest part of the ruins, these coins are dug up daily."

Postell gives a very bad wood-cut of one of these shekels,

but the inscription is correct. He was unable to explain the letters over the vase, which soon became the subject of a discussion among the learned men of Europe, that lasted for nearly two centuries. Their attempts to explain them are enumerated by Bayer in his treatise *De Nummis Hebræo-Samaritanis*, which may be considered as the first work which placed the explanation of these coins on a satisfactory basis. But it would obviously be useless here to record so many unsuccessful guesses as Bayer enumerates.

The work of Bayer, although some of the authors nearly solved the problem, called forth an antagonist in Prof. Tychsen, of Rostock, a learned Orientalist of that period. Several publications passed between them which it is unnecessary to enumerate, as Tychsen gave a summary of his objections in a small pamphlet entitled *O. G. Tychsen. De Numis Hebraicis Diatribe, qua simul ad Nuperas ill. F. P. Bayerii Objectiones Respondetur* (Rostochii, 1791). His first position is, that (1) either all the coins, whether with Hebrew or Samaritan inscriptions, are false; or (2) if any are genuine, they belong to Bar-cocheba (p. 6). This he modifies slightly in a subsequent part of the treatise (p. 52, 53), where he states it to be his conclusion (1) that the Jews had no coined money before the time of our Saviour; (2) that during the rebellion of Bar-cocheba (or Bar-coziba), Samaritan money was coined either by the Samaritans to please the Jews, or by the Jews to please the Samaritans, and that the Samaritan letters were used in order to make the coins desirable as amulets! and (3) that the coins attributed to Simon Maccabæus belong to this period. Tychsen has quoted some curious passages, but his arguments are wholly untenable. In the first place, no numismatist can doubt the genuineness of the shekels attributed to Simon Maccabæus, or believe that they belong to the same epoch as the coins of Bar-cocheba. But as Tychsen never saw a shekel, he was not a competent judge. There is another consideration, which, if further demonstration were needed, would supply a very strong argument. These coins were first made known to Europe through Postell, who does not appear to have been aware of the description given of them in Rabbinical writers. The correspondence of the newly found coins with the earlier description is almost demonstrative. But they bear such undoubted marks of genuineness that no judge of ancient coins could doubt them for a moment. Postell quotes, e. g., the following passage from the Jerusalem Talmud: **מטבע שמרר** (מחלל), **כגון בן כוזיבא אינו מחלל** (שמרר), "Revolution (Samaritan) money, like that of Ben-Coziba, does not defile." The meaning of this is not very obvious, nor does Tychsen's explanation appear quite satisfactory. He adds, "does not defile if used as an amulet." We should rather inquire whether the expression may not have some relation to that of "defiling the hands," as applied to the canonical books of the Old Test. (see Ginsburg, *Commentary on the Song of Songs*, p. 3). The word for polluting is different, but the expressions may be analogous. But, on the other hand, these coins are often perforated, which gives countenance to the notion that they were used as amulets. The passage is from the division of the Jerusalem Talmud entitled **שני משכר שני**, *Maaser Shenî*, or "The Second Tithe."

It may here be desirable to mention that although some shekels are found with Hebrew letters instead of Samaritan, these are undoubtedly all forgeries. It is the more needful to make this statement, as in some books of high reputation, e. g. Walton's *Polyglot*, these shekels are engraved as if they were genuine. It is hardly necessary to suggest the reasons which may have led to this series of forgeries. But the difference between the two is not confined to the letters only; the Hebrew shekels are much larger and thinner than the Samaritan, so that a person might distinguish them merely by the touch, even under a covering. The char-

acter nearly resembles that of Samaritan MSS., although it is not quite identical with it. The Hebrew and Samaritan alphabets appear to be divergent representatives of some older form, as may be inferred from several of the letters. Thus the *Beth* and several other letters are evidently identical in their origin. Also the **ש** (*Shin*) of the Hebrew alphabet is the same as that of the Samaritan: for if we make the two middle strokes of the Samaritan letter coalesce, it takes the Hebrew form. We may add that Postell appears to have arranged his Samaritan alphabet from the coins which he describes.

In the course of 1862 a work of considerable importance was published at Breslau by Dr. M. A. Levy, entitled *Geschichte der jüdischen Münzen*. It appears likely to be useful in the elucidation of the questions relating to the Jewish coinage which have been touched upon in the present article. There are one or two points on which it is desirable to state the views of the author, especially as he quotes coins which have only become known lately. Some coins have been described in the *Revue Numismatique* (1860, p. 260 sq.), to which the name of Eleazar coins has been given. A coin was published some time ago by De Saulcy which is supposed by that author to be a counterfeit. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar (the son of Simon), who was a priest, and Simon ben-Giora, were at the head of large factions. It is suggested by Dr. Levy that money may have been struck which bore the names of both these leaders; but it seems scarcely probable, as they do not appear to have acted in concert. Yet a copper coin has been published in the *Revue Numismatique* which undoubtedly bears the inscription of "Eleazar the priest." Its types are—

Obverse. A vase with one handle and the inscription **אלעזר הכהן**, "Eleazar the Priest," in Samaritan letters.

Reverse. A bunch of grapes with the inscription **שנתא** **רח** **לגאלית ישראלי**, "Year one of the Redemption of Israel."

Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins.

These coins, as well as some that bear the name of Simon or Simeon, are attributed by Dr. Levy to the period of this first rebellion. It is quite clear, however, that some of the coins bearing similar inscriptions belong to the period of Bar-cocheba's rebellion (or *Barcocheba's*, as the name is often spelled) under Hadrian, because they are stamped upon denarii of Trajan, his predecessor. The work of Dr. Levy will be found very useful, as collecting together notices of all these coins, and throwing out very useful suggestions as to their attribution; but we must still look to further researches and fresh collections of these coins for full satisfaction on many points. The attribution of the shekels and half-shekels to Simon Maccabæus may be considered as well established, and several of the other coins described in the article MONEY offer no grounds for hesitation or doubt. But still this series is very much isolated from other classes of coins, and the nature of the work hardly corresponds in some cases with the periods to which we are constrained, from the existing evidence, to attribute the coins. We must therefore still look for further light from future inquiries.

3. *Characteristics and Classification.*—The average weight of the silver coins is about 220 grains troy for the shekel, and 110 for the half-shekel. Among the symbols found on this series of coins is one which is considered to represent that which was called *Lulab* by the Jews. This term was applied (see Maimonides on the section of the Mishna called *Rosh Hashanah*, or

Commencement of the Year, vii, 1, and the Mishna itself in *Succah*, סוכה, or *Booths*, iii, 1, both of which passages are quoted by Bayer, *De Num.* p. 129) to the branches of the three trees mentioned in Lev. xxiii, 40, which are thought to be the palm, the myrtle, and the willow. These, which were to be carried by the Israelites at the Feast of Tabernacles, were usually accompanied by the fruit of the citron, which is also found in this representation. Sometimes two of these *Lulabs* are found together. At least such is the explanation given by some authorities of the symbols called in the article *MONEY* by the name of *Sheaves*. The subject is involved in much difficulty and obscurity, and we speak, therefore, with some hesitation and diffidence, especially as experienced numismatists differ in their views. This explanation is, however, adopted by Bayer (*De Num.* p. 128, 219, etc.), and by Cavedoni (*Bibl. Num.* p. 31, 32, of the German translation), who adds references to 1 Macc. iv, 59; John x, 22, as he considers that the *Lulab* was in use at the Feast of the Dedication on the twenty-fifth day of the ninth month as well as at that of Tabernacles. He also refers to 2 Macc. i, 18; x, 6, 7, where the celebration of the Feast of Tabernacles is described, and the branches carried by the worshippers are specified. The symbol on the reverse of the shekels, representing a twig with three buds, appears to bear more resemblance to the buds of the pomegranate than to any other plant.

The following list is substantially that given by Cavedoni (p. 11 of the German translation) as an enumeration of all the coins which can be attributed with any certainty to Simon Maccabæus. See *NUMISMATICS*.

A. *SILVER*.—I. Shekels of three years, with the inscription שֶׁקֶל יִשְׂרָאֵל, *Shekel Israel* ("Shekel of Israel"), on the obverse, with a vase, over which appears (1) an א, *Aleph* [first year]; (2) the letter ש, *Shin* [for שְׁנָה, *Shenath*, "year"], with a ב, *Beth* [year 2]; (3) the letter ש, *Shin*, with a ג, *Gimel* [year 3].

On the reverse is the twig with three buds, and the inscription יְרוּשָׁלַם קְדוּשָׁה, *Jerusalem Kedushah*, or קְדוּשָׁה הַקְדוּשָׁה, *Hak-kedushah* ("Jerusalem the Holy"). The spelling varies with the year. The shekel of the first year has only יְרוּשָׁלַם קְדוּשָׁה; while those of the second and third years have the fuller form, יְרוּשָׁלַם הַקְדוּשָׁה. The second י of the Jerusalem is important, as showing that both modes of spelling were in use at the same time.

Silver Shekel of Simon Maccabæus. (From the British Museum.)

Obverse. Vase, with date above it, "Year 3;" legend, "Shekel of Israel."
Reverse. Branch bearing three flowers; legend, "Jerusalem the Holy."

II. The same as above, only half the weight, which is indicated by the word חֲצִי, *chatsi*, "a half." These occur only in the first and second years.

Silver Half-shekel of Simon Maccabæus. (From the British Museum.)

Obverse. Vase, with date above it, "1;" legend, "Half-shekel."
Reverse. Branch bearing three flowers; legend, "Jerusalem Holy."

B. *COPPER*.—I. לְגֻלָּתָהּ צִיּוֹן, *Ligullath Tsion*, "Of the Liberation of Zion." The vase as on the silver shekel and half-shekel.

On the reverse, שְׁנָה אַרְבַּע, *Shenath Arba*, "The Fourth Year." לֻלָּב between two citrons.

Copper Shekel of Simon Maccabæus. (From Mr. Wigan's collection.)

Obverse. Vase, with legend "Of [the] Liberation of Zion."
Reverse. Sheaf [!] between two fruits; legend, "Year four."

II. שְׁנָה אַרְבַּע חֲצִי, *Shenath Arba Chatsi*, "The Fourth Year, a Half." A citron between two *Lulabs*.

On the reverse, לְגֻלָּתָהּ צִיּוֹן, *Ligullath Tsion*, "Of the Liberation of Zion." A palm-tree between two baskets of fruit.

III. שְׁנָה אַרְבַּע רְבִיעִי, *Shenath Arba, Rebia*, "The Fourth Year, a Fourth." Two *Lulabs*.

On the reverse, לְגֻלָּתָהּ צִיּוֹן—as before. Citron-fruit.

Copper Quarter-shekel of Simon Maccabæus. (From Mr. Wigan's collection.)

Obverse. Two sheaves [!], with the legend "Year four, a Quarter."
Reverse. A fruit, with the legend "Of the Liberation of Zion."

She-kia, a name given to *Buddha* (q. v.) among the Chinese. He is also called *Fo*.

Shekinah. See *SHECHINAH*.

She-king, one of the sacred books of the Chinese. It contains 311 odes and other lyrics, chiefly of a moral tone and character, including several pieces which were probably composed twelve centuries before Christ. It is believed to be a selection from a larger number which were extant in the time of Confucius, and by him collected and published.

She'lah (Heb. *Shelah*, שֶׁלָּה, a petition, as in 1 Sam. i, 17; or rather perhaps *peace*, i. q. *Shiloh*; Sept. Σηλῶμ or Σηλῶν v. r. Σηλῶ), the youngest son of Judah by the daughter of Shuah the Canaanite (Gen. xxxviii, 5, 11, 14, 26; xlv, 12, 1 Chron. ii. 2). B.C. ante 1873. His descendants, some of whom are enumerated in 1 Chron. iv, 21-23, were called (*Numb.* xxvi, 20) *Shelanites* (q. v.). For *Sheluch* (A. V. "Shelah," 1 Chron. i, 18), the son of Arphaxad, see *SELA*.

She'lanite (Heb. collectively in the sing. and with the art., *hash-Shelani*, הַשְּׁלָנִי, an irregular patronymic from *Shelah*, as if *Shelan* [comp. *Shiloh*, *Shilonite*]; Sept. ὁ Σηλωνι) a designation of the descendants of *Shelah* (q. v.), the son of Judah (*Numb.* xxvi, 20).

Shelden, FRANCIS F., a Methodist Episcopal minister, was born in Monroe County, N. Y., March 16, 1814, admitted on trial by the Indiana Conference in 1840, and filled the following appointments: Noblesville, Franklin, Versailles, Greenfield, Belleville, Springville, and Leesville. In 1848, owing to declining health, he received a superannuated relation, and died Jan. 16, 1850. Mr. Shelden was a good English scholar, possessed an investigating mind, and was a fluent preacher. See *Minutes of Annual Conferences*, iv, 533.

Sheldon, GILBERT, archbishop of Canterbury, was the youngest son of Roger Sheldon, of Stanton, in Staffordshire, England, and was born there July 19, 1598. He was admitted a commoner of Trinity College, Oxford, in 1613; was made Bachelor of Arts Nov. 27, 1617, and Master of Arts May 20, 1620; was elected fellow of All-Souls College in 1622, and about the same time entered holy orders. He became domestic chaplain of the lord keeper of Coventry, who gave him a prebend of Gloucester. He was some time rector of Ickford, in Bucks, and was presented to the rectory of Newington by archbishop Laud. He received the degree of Bachelor of Divinity Nov. 11, 1628, and was presented by the king to the vicarage of Hackney, in Middlesex. On June 25, 1634, he was made Doctor of Divinity, and in March, 1635, was elected warden of All-Souls. Dr. Sheldon became chaplain in ordinary to Charles I, and was afterwards clerk of the closet. During the rebellion, he adhered to the royal cause, and in February, 1644, was sent to attend the king's commissioners at the treaty of Uxbridge. In April, 1646, he attended the king at Oxford, and was witness to the vow made by him to restore to the Church all impropriations, lands, etc., if it pleased God to re-establish his throne. While the king was at Newmarket in 1647, Dr. Sheldon attended him as one of his chaplains. He was ejected from his wardenship by the Parliament visitors on March 30, 1647 (or 1648), and imprisoned. He was set at liberty on Oct. 24, 1648, and retired to Snelston, in Derbyshire. Soon after the king's return, he was made dean of the Royal Chapel, and on Oct. 28, 1660, was consecrated bishop of London. The Savoy Conference (q. v.) was held (1661) at his lodgings. He was elected to the see of Canterbury, Aug. 11, 1663, and on Dec. 20, 1667, chancellor of Oxford, but resigned that office July 31, 1669. He died at Lambeth, Nov. 9, 1677.

Sheleml'ah (Heb. *Shelemyah'*, שְׁלֵמְיָהוּ; but [except in Ezra x, 39; Neh. iii, 30; xiii, 13; Jer. xxxvii, 3, 13] in the prolonged form, *Shelemya'hu*, שְׁלֵמְיָהוּ הוּ, *repaid of Jehovah*; Sept. Σελμια or Σελμιας), the name of nine Hebrews.

1. A Levite appointed to guard the east entrance to the tabernacle under David, while his son Zechariah had the northern gate (1 Chron. xxvi, 14). B.C. 1043. In 1 Chron. ix, 21; xxvi, 1, 2, he is called MESHELEMI-AH; in Neh. xii, 25, MESHULLAM; and in 1 Chron. ix, 17, 31, SHALLUM.

2. Son of Cushi and father of Nethaniah, which latter was father of the Jehudi whom the princes sent to Baruch with an invitation to read Jeremiah's roll to them (Jer. xxxvi, 14). B.C. much ante 605.

3. Father of Jehucal or Jucal, which latter Zedekiah ordered to request Jeremiah to intercede for the city (Jer. xxxvii, 3; xxxviii, 1). B.C. ante 589.

4. Son of Hananiah and father of Irijah, which latter arrested Jeremiah as he was leaving the city (Jer. xxxvii, 13). B.C. ante 589.

5. Son of Abdeel and one of those ordered to apprehend Baruch and Jeremiah (Jer. xxxvi, 26). B.C. 604.

6. One of the "sons" of Bani who renounced their Gentile wives after the captivity (Ezra x, 39). B.C. 458.

7. Another of the "sons" of Bani who did the same (Ezra x, 41). B.C. 458.

8. Father of the Hananiah who repaired part of the walls of Jerusalem (Neh. iii, 30). B.C. ante 446. He is perhaps the same as "one of the apothecaries," i. e. manufacturers of the sacred incense, who is mentioned in Neh. iii, 8 as the father of Hananiah.

9. A priest appointed by Nehemiah as commissary of the Levitical tithes (Neh. xiii, 13). B.C. cir. 434.

She'leph (Heb. *id.* שֶׁלֶף, but always occurring "in pause" as *Sha'leph*, שֶׁלֶף, *a drawing-forth*; Sept. Σαλήφ v. r. Σαλήζ, etc.), the second named of the thirteen sons

of Joktan (Gen. x, 26; 1 Chron. i, 20). B.C. much post 2515. The tribe which sprang from him has been satisfactorily identified, both in modern and classical times, as well as the district of the Yemen named after him. It has been shown in other articles [see ARABIA; JOKTAN, etc.] that the evidence of Joktan's colonization of Southern Arabia is indisputably proved, and that it has received the assent of critics. Sheleph is found where we should expect to meet with him, in the district (Mikh-láf, as the ancient divisions of the Yemen are called by the Arabs) of *Sulaf* (*Marásid*, s. v.), which appears to be the same as Niebuhr's *Sälfe* (*Descr.* p. 215), written in his map *Selfia*, with the vowels, probably, *Sulaf-yeh*. Niebuhr says of it, "Grande étendue de pays gouvernée par sept *schechs*." It is situate in N. lat. 14° 30', and about sixty miles nearly south of San'a. Besides this geographical trace of Sheleph, we have the tribe of *Shelif*, or *Shulaf*, of which the first notice appeared in the *Zeitschrift d. deutschen morgenländischen Gesellschaft*, xi, 153, by Dr. Osiander, and to which we are indebted for the following information. Yakût, in the *Moajam*, s. v., says, "Es-Selif or Es-Sulaf is an ancient tribe of the region of Yemen; Hishám Ibn-Mohammed says they are the children of Yuktán [Joktan], and Yuktán was the son of Eber the son of Salah the son of Arphaxad the son of Shem the son of Noah. . . . And a district in El-Yemen is named after the Sulaf." El-Kalkasander (in the British Museum Library) says, "El-Sulaf, called also Benies-Silfán, a tribe of the descendants of Kahtán [Joktan]. . . . The name of their father has remained with them, and they are called Es-Sulaf: they are children of Es-Sulaf, son of Yuktán, who is Kahtán. . . . Es-Sulaf originally signifies one of the little ones of the partridge, and Es-Silfán is its plural; the tribe was named after that on account of translation." Yakût also says (s. v. "Muntabik") that El-Muntabik was an idol belonging to Es-Sulaf. Finally, according to the *Kamús* (and the *Lubb-el-Lubáb*, cited in the *Marásid*, s. v.), Sulaf was a branch-tribe of Dhul-Kiláa [a Himyeritic family or tribe (Caussin, *Essai*, i, 113), not to be confounded with the later king, or Tubbaa of that name]. This identification is conclusively satisfactory, especially when we recollect that Hazarmaveth (Hadrarnaut), Sheba (Seba), and other Joktanitic names are in the immediate neighborhood. It is strengthened, if further evidence were required, by the classical mention of the Σαλαπῖνοι, *Salapeni*, also written Ἀλαπῖνοι, *Alapeni* (Ptolemy, vi, 7). Bochart puts forward this people with rare brevity (*Opera*, i, 99). The more recent researches in Arabic MSS. have, as we have shown, confirmed in this instance his theory; for we do not lay much stress on the point that Ptolemy's Salapeni are placed by him in N. lat. 22°.—Smith. Forster endeavors (*Geogr. of Arabia*, i, 109) to identify the descendants of Sheleph with the *Meteir* tribe, whose chief residence is in Kasim, in the province of Nejd (Burckhardt, *Bedouin*, p. 233); but for this there appears to be no sufficient evidence.

She'lesh (Heb. *id.* שְׁלֵשׁ, *triad* [Gesenius], or *might* [Fürst]; Sept. Σελήε v. r. Ζεμί), third named of the four sons of Ehem the brother of Shamer, or Shomer, an Asherite (1 Chron. vii, 35). B.C. apparently cir. 1015.

Shel'omi [some *Shelo'mi*] (Heb. *Shelomi'*, שְׁלֹמִי, *peaceful*; Sept. Σελμι), father of Ahihud, which latter was the Asherite commissioner to distribute the land east of the Jordan (Numb. xxxiv, 27). B.C. ante 1618.

Shel'omith [some *Shelo'mith*] (Heb. *Shelomith'*, שְׁלֹמִית, or [Ezra viii, 10] שְׁלֹמִית, *peaceful* [strictly a fem. form of *Shelomi*]; twice *Shelomoth'*, שְׁלֹמֹת [1 Chron. xxiii, 9; xxvi, 25], in both which places, however, the Keri has שְׁלֹמִית [ver. 26]), the name of four or five Hebrews and two or three Hebrewesses.

1. (Sept. Σαλωμειδ.) A Danite female, daughter of Dibri, wife of an Egyptian, and mother of the man who

was stoned for blasphemy (Lev. xxiv, 11). B.C. ante 1658. The Jewish rabbins have overlaid these few simple facts with a mass of characteristic fable. "They say that Shelomith was a very handsome and virtuous woman, who was solicited and tempted to criminal conversation by an Egyptian, an overseer of the Hebrews' labors, without complying with him. He at last found an opportunity, by night, of slipping into the house and bed of Shelomith, in the absence of her husband, and abused her simplicity. The day following, when this woman discovered the injury, she bitterly complained of it to her husband when he returned. He at first thought of putting her away, but kept her some time to see if she should prove with child by the Egyptian. After some months, her pregnancy becoming evident, he sent her away, and with words he assaulted the officer who had done this outrage. The Egyptian abused him still further, both by words and blows. Moses, coming hither by chance and hearing of this injury done by the Egyptian to the Israelite, took up his defence, killed the Egyptian, and buried him in the sand. The brethren of Shelomith, seeing their sister put away like an adulteress, pretended to call her husband to account for it and to make him take her again. He refused, and they came to blows. Moses happened to be there again, and wished to reconcile them; but the husband of Shelomith asked him what he had to do in the matter? who had made him a judge over them? and whether he had a mind to kill him, also, as yesterday he killed the Egyptian? Moses, hearing this, fled from Egypt into the country of Midian. The blasphemer stoned in the wilderness (Lev. xxiv, 10, 11) was, say the Jews, the son of Shelomith and this Egyptian. The officer who inspected the Hebrews' labor is he of whom Moses speaks in Exod. ii, 11, 12; and the husband of Shelomith is intimated in the same place (ver. 13, 14)."

2. (Sept. Σαλουμός v. r. Σαλωμός.) A Levite, chief of the sons of Ishar in the time of David (1 Chron. xxiii, 18). B.C. 1013. He is elsewhere (xxiv, 22, 23) called SHELOMOTH (q. v.).

3. (Sept. Σαλωμός.) A Levite descended from Eliezer the son of Moses, and put in charge of the Temple treasury under David (1 Chron. xxvi, 25, 26, 28). B.C. 1013.

4. (Sept. Σαλωμί v. r. Ἀωθίμ.) First named of the three sons of Shimei, chief of the Gershonites in the time of David (1 Chron. xxiii, 9). B.C. 1013. In ver. 10 his name should probably be read instead of Shimei (q. v.).

5. (Sept. Σελημός.) The last named of the three children of Rehoboam by his second wife, Maachah, but whether a son or a daughter is uncertain (2 Chron. xi, 20). B.C. cir. 970.

6. (Sept. Σαλωμεδί v. r. Σαλωμί.) A daughter of Zerubbabel (1 Chron. iii, 19). B.C. post 536.

7. (Sept. Σαλειμού v. r. Σελιμού.) According to the present text of Ezra viii, 10, the sons of Shelomith, with the son of Josiphiah at their head, returned from Babylon with Ezra to the number of eighty males, B.C. ante 459. There appears, however, to be an omission, which may be supplied from the Sept., and the true reading is probably "Of the sons of Bani, Shelomith the son of Josiphiah." See also 1 Esdr. viii, 36, where he is called "Assalimoth son of Josaphias." See Keil, *ad loc.*

Shelomoh. See SOLOMON.

Shel'omoth [some *Shelo'moth*] (Heb. *Shelomoth*, שְׁלֹמֹת, *peaceful* [strictly a plur. fem. of שְׁלֵמָה, *peace*]; Sept. Σαλωμός), one of the descendants of Izhar the grandson of Levi (1 Chron. xxiv, 22, 23); elsewhere (xxiii, 18) called SHELOMITH (q. v.).

Shelper, CHARLES, a minister of the Methodist Episcopal Church, was born in Bovenden, kingdom of Hanover, Jan. 10, 1800. In 1836 he emigrated to the

United States, and settled in Wheeling, W. Va. The following year he was converted and joined the Church. Soon after he entered the travelling ministry, among his countrymen. He labored until April, 1860, when he had a paralytic stroke. His effective relation to the Conference then ceased. In March, 1865, he had a second paralytic stroke, and in July a third stroke followed. He died Sept. 4, 1865, being at the time a member of the Central German Conference. See *Minutes of the Annual Conferences*, 1866, p. 181.

Shelton, PHILLO, an Episcopal clergyman, was born at Ripton (now Huntington), Conn., May 5, 1754. He graduated at Yale College in 1775, and studied theology, probably with Rev. James Scoville, of Waterbury. He was ordained deacon Aug. 3, 1785, and priest on September 16. On February 24 preceding, he received a call from Fairfield, North Fairfield, and Stratfield, which he accepted. Here he labored until he entered into rest, Feb. 22, 1825. Mr. Shelton "was distinguished for simplicity, integrity, and an honest and earnest devotion to the interests of pure and undefiled religion." He was one of the clergymen who were instrumental in securing a charter for Trinity College, Hartford, which was accomplished by a union with a political party, then in the minority. See Sprague, *Annals of the Amer. Pulpit*, v, 349.

Shelu'miel (Heb. *Shelumiel*, שְׁלֹמִיֵּאל, *friend of God*; Sept. Σαλαμὴλ), son of Zurishaddai (Numb. ii, 12) and phylarch of Simeon (x, 19), appointed to number his people at the Exode (i, 6), who then amounted to 59,800 males (ver. 7). B.C. 1057. He made his offering for the tabernacle like the rest (vii, 36, 41).

Shem (Heb. *id.* שֵׁם, *name*; Sept. [and New Test. Luke iii, 39] Σῆμ, Josephus Σήμας [Ant. i, 4, 1]; Vulg. *Sem*), the son of Noah, born (Gen. v, 32) when his father had attained the age of 500 years. B.C. 2613. He was 98 years old, married, and childless, at the time of the flood. After it he, with his father, brothers, sisters-in-law, and wife, received the blessing of God (ix, 1), and entered into the covenant. Two years afterwards he became the father of Arphaxad (xi, 10), and other children were born to him subsequently. With the help of his brother Japheth he covered the nakedness of their father, which Canaan and Ham did not care to hide. In the prophecy of Noah which is connected with this incident (ix, 25-27), the first blessing falls on Shem. He died at the age of 600 years. B.C. 2013.

Assuming that the years ascribed to the patriarchs in the present copies of the Hebrew Bible are correct, it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. Again, when Shem died Abraham was 148 years old, and Isaac had been nine years married. There are, therefore, but two links—Methuselah and Shem—between Adam and Isaac. Thus the early records of the creation and the fall of man which came down to Isaac, would challenge (apart from their inspiration) the same confidence which is readily yielded to a tale that reaches the hearer through two well-known persons between himself and the original chief actor in the events related. See LONGEVITY. There is, indeed, no chronological improbability in that ancient Jewish tradition which brings Shem and Abraham into personal conference. See MELCHIZEDEK.

The portion of the earth occupied by the descendants of Shem (Gen. x, 21-31) intersects the portions of Japheth and Ham, and stretches in an uninterrupted line from the Mediterranean Sea to the Indian Ocean. Beginning at its north-western extremity with Lydia (according to all ancient authorities, though doubted by Michaelis [see Gesenius, *Thesaur.* p. 745]), it includes Syria (Aram), Chaldaea (Arphaxad), parts of Assyria (Asshur), of Persia (Elam), and of the Arabian peninsula (Joktan). See ETHNOLOGY; SHEMITIC LANGUAGES. The servitude of Canaan under Shem, predicted by

Noah (Gen. ix, 26), was fulfilled primarily in the subjugation of the people of Palestine (Josh. xxiii, 4; 2 Chron. viii, 7, 8). It is doubtful whether, in ver. 27, God or Japheth is mentioned as the dweller in the tents of Shem. In the former sense the verse may refer to the special presence of God with the Jews, and to the descent of Christ from them; or, in the latter sense, to the occupation of Palestine and adjacent countries by the Romans, and, spiritually understood, to the accession of the Gentiles to the Church of God (Ephes. iii, 6). See Pfeiffer *Opera*, p. 40; Newton, *On the Prophecies*, Diss. i.

Buttmann has conjectured (from the resemblance of שֵׁם (שֵׁמִים) that Shem was the original of Saturn or Uranus (*Abhandl. d. Berliner Akad.* 1816, 1817, p. 150 sq.; *Philos. Clusse und im Mythol.* i, 221 sq.); but there is no good ground for such a fancy.

Comparative Ages of Noah's Sons.—In Gen. x, 21 occurs a statement on this point, but the original is unfortunately ambiguous: וְשֵׁם יָדָה בְּרִיתָא אֲבִי כָל בְּנֵי יָפֶתְחָה; "And to Shem [there] was born—also [to] him—[a son], [the] father of all [the] sons of Eber, [the] brother of [the] elder Japheth," or "[the] elder brother of Japheth." The English A. V. adopts the former rendering ("brother of Japheth the elder"), following the Sept. (ἀδελφῷ Ἰάφεθ τοῦ μεζζονος [Vat. and Alex.; Sin. is wanting]), Symmachus, the Targum of Onkelos (אַחֵי יָפֶתְחָה רִבְּנָה), and the Masoretic accents (as given above); and this view is also taken by Rashi, Aben-Ezra, Luther, Junius, Piscator, Mercer, Montanus, Le Clerc, J. D. Michaelis, Mendelssohn, De Sola, Jervis, and other eminent Hebraists. The other rendering is adopted by the Samaritan Codex, the Latin Vulgate ("fratre Japheth majore"), the Peshito-Syriac, the Arabic of Saadiah, and most modern commentators (Rosenmüller, Turner, Bush, Philippson, Kalisch, Conant, Lange, Tayler Lewis, Keil, Murphy, etc.). To our mind both the diplomatic and the linguistic arguments are conclusive for the common English rendering.

(I.) *Chronological Considerations.*—These may be briefly stated as follows:

1. Noah had a son born when he was himself 500 years old (Gen. v, 32). This must have been either his oldest or his youngest son, for it would be entirely nugatory to say that the middle one of his three sons was then born, unless that middle one were Shem himself.

2. The son then born was not Shem, for

a. In that case he would have been 99 years old at the beginning of the flood (Gen. vii, 11; in Noah's 600th year, not when he was 600 years old), or 100 years old at its close (viii, 13).

b. On the contrary, Shem was not 100 years old till two years after the flood (Gen. xi, 10).

3. Nor was Ham the son there referred to, for

a. Shem himself, we have seen, was not born so early as when Noah was 500 years old.

b. Much less could Ham, who was younger than Shem (Gen. ix, 24), have been born so early.

4. It hence necessarily follows that Japheth was the son then born, and that he was the oldest of the three.

5. The three sons are not mentioned in the order of age, but of familiarity and importance to the Hebrews. Hence Ham, although the youngest, is named second. So likewise Arphaxad, although the first-born (Gen. xi, 10), is named third (x, 22). A precisely analogous case appears in the family of Terah (xi, 26), where the second son, Abram, is named first, as being the most important, and the oldest, Haran, last, as having died early.

6. The efforts of commentators to evade the force of these considerations betray the weakness of their cause. They all proceed upon the unfounded assumption that the numbers in the texts above considered are merely vague statements ("round numbers"), and may therefore be neglected in an exact calculation. They espe-

cially dwell upon the fact that all three sons are assigned to the same year (Noah's 500th), whereas that expression evidently refers to the oldest, or the heir, only, as the foregoing comparisons show; in any other sense the assertion would be irrelevant or absurd.

(II.) *Grammatical Considerations.*—On this point most later commentators and translators seem content to follow implicitly the views of Rosenmüller (*Schol.* ad loc.): "In this clause the word וְשֵׁם, 'the elder,' is ambiguous as to whether it should be joined with Japheth, thus indicating him as the senior, or with Shem. The former has seemed to many interpreters probable chiefly because, inasmuch as Noah is said to have begotten the first of his sons who survived the flood in the one hundredth year before the flood (Gen. v, 32), and Shem is said to have lived his one hundredth year two years after the flood (xi, 10), therefore the latter could not have been the first-born. But since it is not at all likely that Noah begot in one and the same year the three sons mentioned in v, 32, it is credible that in that passage round numbers only are named, as often occurs, and that the five hundredth year is set down in the same connection instead of the five hundred and second, as that in which Noah began to be a father. Hence it does not appear from this passage that Japheth was the oldest son. On the contrary, since in the preceding context the sons of Noah are six times mentioned in such order that Shem is set in the first place, Ham in the second, and Japheth in the third (v, 32; vi, 10; vii, 13; ix, 16, 23; x, 1)—passages so clear as to admit of no doubt—it follows that in the present passage likewise the term 'the elder' is to be joined to אָחִי, 'the brother of,' so as to make Shem the oldest. But there is also another grammatical reason. If the writer in this place had wished to say that Japheth was the oldest son of Noah, he would doubtless have written וְשֵׁם יָדָה בְּרִיתָא, 'the older son of Noah'; for וְשֵׁם, 'the elder,' thus placed nude, nowhere else occurs (with reference to a person's age), but is always joined either with בֶּן, 'son,' or with אָחִי, 'brother.' All this has been fully set forth by F. F. Schelling in his monograph entitled *Ueber die Geburtsfolge der Söhne Noah*, at the beginning of part xvii of his *Repertorium Biblicæ et Orientalis Literature*." These points, however, are not well taken; for

1. It is not usual for the sacred writers to employ round numbers in chronological accounts. In this *Cyclopædia* we have thoroughly examined every date in the Bible, and find no such instance. Each definite number is susceptible of explanation as being precisely correct, except a very few corruptions of the text. In this case, particularly, all the leading chronologers—from Usher, Jackson, Hales, and Clinton down to Browne and the author of *Palmoni*—take the date as being exact. It is a superficial evasion of a difficulty to resort to this slur upon the accuracy of Scripture chronology.

2. The sacred writer might indeed have said, if he had chosen, "the brother of Japheth the elder son of Noah;" but this is a tedious and awkward phrase, and would have been just as ambiguous as the one he has employed, its sense entirely depending upon the inter-punctuation.

3. וְשֵׁם does occur in as "nude a form" as here in at least one passage (Ezek. xxi, 14 [Heb. 19]), as noticed below. It is true the adj. there does not refer to comparative age, but that makes no difference in the grammatical construction. The assertion that וְשֵׁם does not occur (in the sense of age) without the addition of בֶּן or אָחִי expressed is not true, as may be seen from Gen. xxix, 16; xlv, 2, and other instances where one of these nouns is merely implied, precisely as in the case before us. In fine, the adj. is not here "nude" or independent at all; it regularly belongs to the second noun, "brother of the elder Japheth."

4. The argument from the order of the names is

amply refuted (as above) by the analogous cases of Arphaxad (Gen. xi, 22), Abraham (ver. 27), and, indeed, almost every other patriarch. They were arranged in the order of proximity and importance to the Hebrews. Among the arguments on the other side, we may note—

a. The chronological point is irrefragable, except by the evasion above noticed.

b. The position of the words, although ambiguous, certainly allows the construction of the Authorized Version. We append a few instances of the same adj. qualifying a noun after a construct:

Numb. xxxv, 28, <i>bis</i>	מִיתָה הַבְּנֵי הַגִּדְלִי
Josh. xx, 6.....	הַשָּׁמָיִם הַשָּׁמָיִם
Isa. xxxvi, 13.....	הַבְּנֵי הַמִּלְכָּה הַגִּדְלִי
Ezek. xlvii, 9.....	הַבְּנֵי הַיָּם הַגִּדְלִי
Dan. x, 4.....	יְרֵךְ הַקָּהָר הַגִּדְלִי

Had the word **יָרֵךְ** preceding the qualifying adj. in the passage in question not been a proper name, it would have taken the article, as in these instances, and thus all ambiguity would have been avoided. An instance strictly parallel is Ezek. xxi, 14 [Heb. 19], **חָרֵב חָלָל**, where the adj., being masc., must belong to the second noun, though neither has the art. Others similar doubtless occur, if not with **גִּדְלִי** or **קָטָן**, yet with other adjectives.

c. Had the sacred writer intended the adj. in the passage in question to apply to the last noun, he could scarcely have expressed his meaning in any other way than he has. On the other hand, had he meant it to refer to the former, he would undoubtedly have added **מִמֶּנֶּה**, as in Judg. i, 13; iii, 9 (**הָאֲחֵרִי כָּלֵב הָקָטָן מִמֶּנֶּה**), which are the only strictly parallel cases of usage under that view (the adj. being **קָטָן**, however, instead of **גִּדְלִי**). Judg. ix, 5 (**בְּיָרֵךְ בִּצְלָל הָקָטָן**) is not a case in point, as there could be no ambiguity there.

d. The Masoretic accents are clearly for the old rendering. In all the above instances the adj. is connected by a conjunctive with the noun immediately preceding, and the first noun (though in the construct) is separated by a disjunctive. In cases of the other construction the reverse interpunction prevails invariably, so far as we have examined. The authority of the Masorites countervails that of all modern scholars, most of whom seem to have given the subject but a cursory examination. The criticism of Keil (*Commentary on the Pentateuch*, i, 156, Clark's ed.) is particularly lame. Josephus (*Ant.* i, 6, 4) calls "Shem the third son of Noah," but elsewhere (i, 4, 1) he names them in a different order, that of relative familiarity ("Shem and Japheth and Ham"). As to the other ancient versions, as above noted, the Sept. (the translator of which in this part was a good Hebraist) refers the adj. to Japheth, although some printed editions have it otherwise, in order to correspond with the Vulg., which reflects the Jewish national pride. The Samaritan, Syriac, and Arabic of course follow the Vulgate, but the Targum of Onkelos has "the brother of Japheth the great." Schelling, whom Rosenmüller (as above) refers to (*Repertorium*, etc. [1785], xvii, 8 sq.), thinks that the lists in Gen. only "mean that Noah had passed his five hundredth year before he had any heir, since in any case the three sons could not have been all born in the same year, to which they are all equally assigned; and that therefore only the round number or approximate date is given" (p. 20).

e. The reason why the sacred writer adds the epithet "elder" brother to the name of Japheth, is precisely to prevent the inference that would otherwise naturally be drawn from the continual mention of Shem first in the lists elsewhere, that *he* was the oldest son, and to explain why the names are here inverted. In the present chapter, however, as usual in detailed genealogies (1 Chron. i, 29 sq.; ii, 1 sq., 42; iii, 1 sq., etc.), the strict order of primogeniture is observed. Had Shem been the oldest, there seems to be no good reason why in this

pedigree the same order should not have been observed as elsewhere. Rosenmüller's remark that this was done "in order that the transition from the lineage of Shem to the history of Abraham might be more easy," does not apply; for the next chapter begins with an account of the Tower of Babel, which is neither Abrahamitic nor Shemitic history in particular, but rather Hamitic (see ver. 10); so that this list of Shem's descendants is thrust in between two portions of Ham's history—arbitrarily. unless for the sake of chronological order.

She'ma (Heb. in three forms, *Shema'*, שֵׁמָעַ, Josh. xv, 26; *She'ma*, שֵׁמָעַ; elsewhere, except "in pause," *Sha'ma*, שָׁמָעַ, 1 Chron. ii, 43—all meaning *rumor*; Sept. *Sapaá*, v. r. *Sapaá*, Σαπάα, *Sapaátas*, etc.), the name of four men and of one place.

1. Last named of the four sons of Hebron, and father of Raham, descendants of Caleb, great-grandson of Judah (1 Chron. ii, 43, 44). B.C. ante 1658.

2. A Benjamite, son of Elpaal, and one of the heads of the fathers of the inhabitants of Aijalon, who drove out the inhabitants of Gath (1 Chron. viii, 18). B.C. post 1618. He is probably the same as Shimhi (ver. 21).

3. Son of Joel and father of Azaz, among the Reubenite chiefs (1 Chron. v, 8). B.C. ante 1090. Perhaps the same with Shemaiah (q. v.) of ver. 4. See JOEL 2.

4. One of those (apparently laymen) who stood at Ezra's right hand while he read the law to the people (Neh. viii, 4). B.C. 458.

5. A town in the south of Judah, named between Amam and Moladah (Josh. xv, 26). The place seems to have no connection with No. 1 above (see Keil, *ad loc.* Chron.). In the parallel list of towns set off from Judah to Simeon (Josh. xix, 2), the name appears as Sheba (q. v.), which is perhaps the more correct, as Shema never elsewhere appears as the appellation of a town. Knobel (in the *Kurzgef. exeg. Handb.* *ad loc.*) suggests that it may be the present ruins *Sameh*, between Milh and Beer-sheba (Van de Velde, *Syria*, ii, 148).

Shema. Of the many prayers now constituting the Jewish ritual, the *Shema*, so called from the first word, שֵׁמָעַ, i. e. *hear*, occurring in it, was the only really fixed form of daily prayer which is mentioned at an early period. Being a kind of confession of faith, every Israelite was to repeat it morning and evening. The *Shema* itself consists of three passages from the Pentateuch: 1, *Shema Israel* (Deut. vi, 4-9); 2, *Vehayah im shamoa* (xi, 13-21); and 3, *Vayomer Jehovah el Mosheh* (Numb. xv, 37-41). In the morning it was preceded by two and succeeded by one, and in the evening both preceded and succeeded by two, prayers, which, although considerably enlarged, are still in use. We quote them (omitting all later additions), as probably in use at the time of our Lord:

Before the Shema, Morning and Evening.—"Blessed art thou, O Lord, King of the world, who formest the light and createst darkness, who makest peace and createst everything; who in mercy givest light to the earth and to those who dwell upon it, and in thy goodness renewest day by day, and continually, the works of creation. Blessed be the Lord our God for the glory of his handiworks, and for the light-giving lights which he hath made for his praise, Selah! Blessed be the Lord who formed the lights!"

Subjecting the second prayer to the same criticism, we read it:

"With great love thou hast loved us, O Lord our God! and with thy great compassion thou hast abundance of pity on us. O our Father! our King! for the sake of our fathers who trusted in thee, to whom thou didst teach the statutes of life, have compassion on us, and enlighten our eyes in thy law, and bind our hearts in thy commandments. O unite our hearts to love and fear thy name, that we may not be ashamed for evermore. For thou art a God who preparest salvation, and us hast thou chosen from among all nations and tongues, and hast in truth brought us near to thy great name, Selah, in order that we in love may praise thee and praise thy unity. Blessed be the Lord who in love chose his people Israel."

Then follows the *Shema*:

"Hear, O Israel: the Lord thy God is one Lord. And

thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might, and these words, which I command thee this day, shall be in thine heart. And thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up. And thou shalt bind them for a sign upon thine hand, and they shall be as frontlets between thine eyes. And thou shalt write them upon the posts of thy house, and on thy gates" (Dent. vi, 4-9). "And it shall come to pass, if ye shall hearken diligently unto my commandments which I command you this day, to love the Lord your God, and to serve him with all your heart and with all your soul, that I will give you the rain of your land in his due season, the first rain and the latter rain, that thou mayest gather in thy corn, and thy wine, and thine oil. And I will send grass in thy fields for thy cattle, that thou mayest eat and be full. Take heed to yourselves that your heart be not deceived, and ye turn aside and serve other gods, and worship them; and then the Lord's wrath be kindled against you, and he shut up the heaven, that there be no rain, and that the land yield not her fruit; and lest ye perish quickly from off the good land which the Lord giveth you. Therefore shall ye lay up these my words in your heart and in your soul, and bind them for a sign upon your hand, that they may be as frontlets between your eyes. And ye shall teach them your children, speaking of them when thou sittest in thine house, and when thou walkest by the way, when thou liest down, and when thou risest up. And thou shalt write them upon the door-posts of thine house, and upon thy gates: that your days may be multiplied, and the days of your children, in the land which the Lord swore unto your fathers to give them, as the days of heaven upon the earth" (Dent. xi, 13-21). "And the Lord spake unto Moses, saying, Speak unto the children of Israel, and bid them that they make them fringes in the borders of their garments throughout their generations, and that they put upon the fringe of the borders a ribband of blue: and it shall be unto you for a fringe, that ye may look upon it, and remember all the commandments of the Lord, and do them; and that ye seek not after your own heart and your own eyes, after which ye used to go astray: that ye may remember and do all my commandments, and be holy unto your God. I am the Lord your God, which brought you out of the land of Egypt, to be your God: I am the Lord your God" (Nmmb. xv, 37-41).

The morning prayers concluded with the following, now in use:

"It is true that thou art the Lord our God, and the God of our fathers; our Redeemer, and the Redeemer of our fathers; our Rock, and the Rock of our salvation. Our Redeemer and Deliverer; this is thy name from everlasting; there is no other God besides thee. A new song did they that were delivered sing to thy name by the seashore, together did all praise and own thee King, and say, Jehovah shall reign world without end! Blessed be the Lord who saveth Israel."

An addition dating from the 2d century inserts before the words "A new song," etc., a particular record of God's past dealings. The additional prayer for the evening is as follows:

"O Lord our God! cause us to lie down in peace, and raise us up, O our King! to a happy life. Oh spread thy pavilion of peace over us, and direct us with good counsel from thy presence; and save us for the sake of thy name. Oh shield us, and remove from us the stroke of the enemy, the pestilence, sword, famine, and sorrow; and remove the adversary from before and behind us, and conceal us under the shadow of thy wings; for thou, O God! art our Guardian and Deliverer; and thou, O God! art a merciful and gracious King. Oh guard us at our going out and coming in, with a happy and peaceable life, from henceforth and for evermore."

Although these prayers were sometimes lengthened or shortened, they were at a very early period in general use among the Hebrews. Like many other things, these prayers were made the subject of casuistic discussions, and the very first pages of the Talmud are crowded with questions and answers as to "how" and "when" the *Shema* is to be read (see treatise *Berachoth*). Women and servants and little children, or those under twelve years, are exempted by the Mishna from this obligation. See Zunz, *Gottesd. Vorträge der Juden*, p. 367, 369-371; Schürer, *Lehrbuch der neutestamentl. Zeitgeschichte*, p. 499 sq.; Prieaux, *Connection* (Wheeler's ed.), i, 331; Etheridge, *Introduction to Hebrew Literature*, p. 93 sq.; Edersheim, *History of the Jewish Nation*, p. 360 sq. See PHYLACTERY. (B. P.)

Shem'aäh (Heb. with the art., *hash-Shemaah*'), שֵׁמְעָה, the rumor; Sept. Ἀρὰ v. r. Σαυὰ), a Ben-

jamite of Gibeah, and father of Abiezer and Joash, who joined David at Ziklag (1 Chron. xii, 3). B.C. ante 1054.

Shemachoth. See TALMUD.

Shemai'ah (Heb. *Shemayah'*, שֵׁמַיָּה, heard [or rumor] of Jehovah [twice in the prolonged form, *Shemaya'hu*, שֵׁמַיָּהוּ, 2 Chron. xi, 2; Jer. xxix, 24]; Sept. Σαμαίας; v. r. Σαμαία, Σεμέι, etc.), the name of a large number of Hebrews.

1. A Reubenite, son of Joel and father of Gog (1 Chron. v, 4). B.C. post 1874. He was perhaps the same as the Shema (q. v.) of ver. 8.

2. Son of Elizaphan, and chief of his house (of two hundred men) in the reign of David, who took part in the ceremonial with which the king brought the ark from the house of Obed-edom (1 Chron. xv, 8, 11). B.C. 1043.

3. A Levite, son of Nethaneel, and also a scribe in the time of David, who registered the divisions of the priests by lot into twenty-four orders (1 Chron. xxiv, 6). B.C. 1014.

4. Eldest of the eight sons of Obed-edom the Levite. He and his four valiant sons and other relatives, to the number of sixty-two, were gate-keepers of the Temple (1 Chron. xxvi, 4, 6, 7). B.C. 1014.

5. A prophet in the reign of Rehoboam who, when the king had assembled 180,000 men of Benjamin and Judah to reconquer the northern kingdom after its revolt, was commissioned to charge them to return to their homes and not to war against their brethren (1 Kings xii, 22; 2 Chron. xi, 2). B.C. 972. His second and last appearance upon the stage was upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak, king of Egypt. B.C. 969. His message was then one of comfort, to assure the princes of Judah that the punishment of their idolatry should not come by the hand of Shishak (xii, 5, 7). From the circumstance that in ver. 1 the people of Rehoboam are called "Israel," whereas in ver. 5, 6 the princes are called indifferently "of Judah" and "of Israel," some have unwarrantably inferred that the latter event occurred before the disruption of the kingdom. Shemaiah wrote a chronicle containing the events of Rehoboam's reign (ver. 15).

6. One of the Levites who in the third year of Jehoshaphat accompanied two priests and some of the princes of Judah to teach the people the book of the law (2 Chron. xvii, 8). B.C. 909.

7. Father of Shimri and ancestor of Ziza, which last was a chief of the tribe of Simeon (1 Chron. iv, 37). B.C. long ante 726. He was perhaps the same with the Shimei (q. v.) of ver. 26, 27.

8. A descendant of Jeduthun the singer who lived in the reign of Hezekiah. He assisted in the purification of the Temple and the reformation of the service, and with Uzziel represented his family on that occasion (2 Chron. xxix, 14). B.C. 726. (See No. 9.)

9. One of the Levites in the reign of Hezekiah who were placed in the cities of the priests to distribute the tithes among their brethren (2 Chron. xxxi, 15). B.C. 726. He was perhaps identical with No. 8.

10. A chief Levite in the reign of Josiah who, with his brethren Conaniah and Nethaneel, contributed sacrifices for the Passover (2 Chron. xxxv, 9). B.C. 628.

11. Father of the prophet Urijah of Kirjath-jearim (Jer. xxvi, 20). B.C. ante 608.

12. Father of Delaiah, which latter was one of the princes who heard Baruch's roll (Jer. xxxvi, 12). B.C. ante 605.

13. A Nehelamite and a false prophet in the time of Jeremiah. B.C. 606. He prophesied to the people of the captivity in the name of Jehovah, and attempted to counteract the influence of Jeremiah's advice that they should settle quietly in the land of their exile, build houses, plant vineyards, and wait patiently for the period of their return at the end of seventy years. His animosity to Jeremiah exhibited itself in the more active form of a letter to the high-priest Zephaniah, urging him to exercise the functions of his office and lay

the prophet in prison and in the stocks. The letter was read by Zephaniah to Jeremiah, who instantly pronounced the message of doom against Shemaiah for his presumption that he should have none of his family to dwell among the people, and that himself should not live to see their return from captivity (Jer. xxix, 24-32). See JEREMIAH.

14. A chief priest who returned from Babylon with Zerubbabel (Neh. xii, 6, 18). B.C. 536. He lived to sign the sacred covenant with Nehemiah (x, 8). B.C. 410.

15. One of the three "last sons" (i. e. supplementary heads of families) of Adonikam who returned with sixty males from Babylon with Ezra (Ezra viii, 13). B.C. 459.

16. One of the "heads" of the Jewish families whom Ezra sent for to his camp by the river of Abava, for the purpose of obtaining Levites and ministers for the Temple from "the place Casiphia" (Ezra viii, 16). B.C. 459.

17. One of the priests of the "sons of Harim" who renounced their Gentile wives after the captivity (Ezra x, 21). B.C. 458. (Comp. No. 18.)

18. An Israelite of the "sons of Harim" who divorced his Gentile wife after the captivity (Ezra x, 31). B.C. 458. (See No. 17.)

19. A priest, son of Mattaniah (q. v.) and father of Jonathan in the lineage of "Asaph" (Neh. xii, 35). B.C. ante 446.

20. Son of Galal and father of the Levite Obadiah (or Abda) who "dwelt in the villages of the Netophathites" after the return from Babylon (1 Chron. ix, 16). B.C. ante 446. He is elsewhere (Neh. xi, 17) called SHAMMUA (q. v.).

21. Son of Shechaniah and keeper of the east gate at Jerusalem, who assisted in repairing the wall after the captivity (Neh. iii, 29). B.C. 446.

22. Son of Delaiah the son of Mehetabel, a prophet in the time of Nehemiah who was bribed by Sanballat and his confederates to frighten the Jews from their task of rebuilding the wall, and to put Nehemiah in fear. In his assumed terror, he appears to have shut up his house and to have proposed that all should retire into the Temple and close the doors (Neh. vi, 10). B.C. 446.

23. Son of Hasshub, a Merarite Levite who lived in Jerusalem after the captivity (1 Chron. ix, 14), and one of those who had oversight of the outward business of the house of God (Neh. xi, 15). B.C. 446.

24. One of the princes of Judah who was in the procession that went towards the south when the two thanksgiving companies celebrated the solemn dedication of the wall of Jerusalem (Neh. xii, 34). B.C. 446.

25. One of the choir who took part in the procession with which the dedication of the new wall of Jerusalem by Ezra was accompanied (Neh. xii, 36). B.C. 446. He appears to have been a Gershonite Levite, and descendant of Asaph, for reasons which are given under MATTANIAH 8.

26. One of the priests who blew with trumpets in the procession upon the newly completed walls of Jerusalem after the captivity (Neh. xii, 42). B.C. 446.

27. The son of Shechaniah and father of five sons among the descendants of Zerubbabel (1 Chron. iii, 22). He was possibly the same with No. 21. Lord Hervey (*Geneal.* p. 107) uncritically proposes to omit the words at the beginning of 1 Chron. iii, 22 as spurious, and to consider Shemaiah identical with Shimei (q. v.), the brother of Zerubbabel (ver. 19). This Shemaiah seems to be the same as the Semei of Luke iii, 26. B.C. cir. 380. See GENEALOGY OF CHRIST.

Shemari'ah (Heb. *Shemaryah'*, שֶׁמַרְיָה, *kept of Jehovah*; or, in the prolonged form [1 Chron. xii, 5], *Shemaryah'hu*, שֶׁמַרְיָהוּ; Sept. *Σαμαρια*, v. r. *Σαμαρία*, *Σαμαρια*, *Σαμορία*), the name of four Hebrews.

1. One of the valiant Benjamites who joined David at Ziklag (1 Chron. xii, 5). B.C. 1054.

2. Middle named of the three sons of Rehoboam by his second wife, Abihail (2 Chron. xi, 19. A. V. "Shamariah"). B.C. cir. 973.

3. A layman of the "sons of Harim" who divorced his Gentile wife after the captivity (Ezra x, 32). B.C. 458.

4. Another layman of the "sons of Bani" who did the same (Ezra x, 41). B.C. 458.

Shemarin. See LEES.

Sheme'ber [many *Shem'ber*] (Heb. *id.* שְׁמַעְבֵּר, *lofty flight* [Gesenius], or *splendor of heroism* [Furst]; Sept. *Σομοβόρ*; Josephus, *Συμὸβορος*, *Ant.* i, 9, 1), the king of Zeboim (q. v.) at the time of the attack of Sodom by Chedorlaomer (Gen. xiv, 2). B.C. cir. 2088.

Shemer (Heb. *id.* שֶׁמֶר, something *kept*, as *lees* of wine; Sept. *Σεμύρ*; Josephus, *Σέμαρος*, *Ant.* viii, 12, 5), the original owner of the hill of Samaria, which derived its name from him. B.C. 917. Omri bought the hill for two talents of silver, and built thereon the city, also called Samaria, which he made the capital of his kingdom (1 Kings xvi, 24). We should rather have expected that the name of the city would have been *Shimron*, from *Shemer*; for *Shomeron* would have been the name given after an owner *Shomer*. This latter form, which occurs in 1 Chron. vii, 32, appears to be that adopted by the Vulgate and Syriac, which read *Somer* and *Shomir* respectively; but the Vatican MS. of the Sept. at that place retains the form "Shomer," and changes the name of the city to *Σεμερών* or *Σεμηρών*. Both names have the same radical meaning, from שָׁמַר, *to watch*, referring, perhaps, by paronomasia, to this conspicuous post of *observation*. See SAMARIA. As the Israelites were prevented by the law (Lev. xxv, 23) from thus alienating their inheritances, and as his name occurs without the usual genealogical marks, it is more than probable that Shemer was descended from those Canaanites whom the Hebrews had not dispossessed of their lands.

Shem hammephorash (שֶׁם הַמְּפֹרָשׁ, *shém hammephorash*, as if the *peculiar Name*; but perhaps factitious). By this expression the Jews meant the name of God written יהוה, but since the time of the Reformation, i. e. from the time that Christians began to study Hebrew, pronounced, according to its accompanying vowel-points, *Jehovah*. Before entering upon the explanation of the word it will be well to review what is said concerning that name of God. Jerome, who was not only acquainted with the language, but also with the tradition, of the Jews, says, in *Prologus Galeatus*: "Nomen Domini tetragrammaton (i. e. יהוה) in quibusdam Græcis voluminibus usque hodie antiquis expressum literis invenimus;" and in the 136th letter to Marcellus, where he treats of the ten names of God, he says: "Nonum (sc. nomen Dei) est tetragrammum, quod ἀνεκφώνητον, i. e. ineffabile, putaverunt, quod his literis scribitur *Iod, E, Vau, E*. Quod quidam non intelligentes propter elementorum similitudinem, quum in Græcis libris repererint, *Pi Pi* legere consueverunt" (*Opp.* ed. Vallarsi, i, 131; iii, 720). Similar is the statement found in a fragment of Evagrius treating of the ten Jewish names of God, that the ineffable Tetragram, which *καταχρηστικῶς* is pronounced by the Jews *ἀδωναι*, by the Greeks *κύριος*, according to Exod. xxviii, 36, was written on the plate of the high-priest: *ἀγίασμα κύριον* ΙΗΘΙ [in some codd. *πi πi*] . . . τοῖς τοῖς γραφόμενον τοῖς στοιχείοις *ωδ εη ουαν ηη πi πi*, ὁ Θεός (cf. Cotelierus, *Monum. Eccl. Græca*, iii, 216, by Vallarsi, iii, 726; Lagarde, *Onomastica Sacra*, p. 205 sq.). Almost the same we find in Origen, *Onomasticon* (cf. Lagarde, *loc. cit.*). From these statements we see that at and before the time of Jerome there were already Greek MSS. of the Old Test. in which the Tetragram was written with Hebrew letters which were regarded as the Greek uncial letters ΙΗΘΙ. Such a mistake was only possible when the Hebrew square alphabet was used. When, in the last quarter of the last century, the attention of the learned was again called to the Syriac

translation of the Sept. by the bishop Paul of Tela, they found in many places the Hebrew name of God, which otherwise is expressed by the Greek *κύριος* and the Syriac *ܕܝܐܗܐ*, represented by *פיה*. It was, however, more surprising that in the main manuscript of this version in the celebrated *Codex Syro-Hezaplariis Ambrosianus* at Milan, in the notes on Isaiah, instead of *יהיה*, the word *יהיה* was found. The connection between the Greek *ΠΙΠΙ* and this *יהיה* was soon perceived, but not in a correct manner, so that in 1835 Middeldorpf, in his edition of *Codex Syro-Hezaplariis*, could but explain it as "ita ut inscius quidam librarius, Cod. Syr. Hexaplaem describens, sed sensum Græci illius *ΠΙΠΙ* haud perspiciebat Græcum characterem *Π* loco Hebraici *ה* positum esse opinaretur, quemadmodum *Ι* loco Hebr. *י*, ideoque Syriace *יהיה* scriberet." Bernstein, in reviewing Middeldorpf's edition, quoted a scholion of Bar-Hebræus, which gives us the following interesting notice: "The Hebrews call the glorious name of God *שם פרוש*, which is *יהיה* (*יהוה*), and dare not to pronounce it with their lips, but read and speak instead, to those who listen, *אדני*. Since the seventy interpreters retained the Hebrew nomenclature, the Greeks fell into an error and believed that these two letters were Greek, and read it from the left to the right, and the name *ΠΙΠΙ* was formed, and thus *יהיה* (*יהוה*), which designates the Eternal Being, was changed into *ΠΙΠΙ*, which yields no sense at all. The *Yod* of the Hebrews is like the *Yod* (*Iota*) of the Greeks, and *He* of the Hebrews has the form of the Greek *Pi* (*Π*). Hence, in the Syriac copies of the Sept. we find everywhere the name *כריא* (i. e. where *כריא* stands for *κύριος* = *יהוה*), with *פיה* written above." On this scholion Bernstein remarks that *שם פרוש* corresponds to the Rabbinic *שם המפוש*, *Shem hammephorash*. In his lexicon, Bernstein writes: "*פרוש* is one who separates, discerns, hence *שם פרוש* is a discerning, separating, or especial name, *nomen separatum, secretum, occultum*. Schroeter, in his edition of Bar-Hebræus, explains *שם פרוש* by *nomen distinctum, singulare*. But Bar-Hebræus tells us only what he found in Jacob of Edessa, who has a whole scholion entitled "*Scholium on the Singular and Distinguished Name which is found in the Syriac Holy Writings translated from the Greek, and which is called among the Jews שם פרוש*." From this scholion, which Nestle published in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, 1878, xxxii, 465 sq., and which purports to give what Jewish tradition believed concerning this name, we see that it means the separated, i. e. singular name of God—a view also adopted by Nestle himself. But a review of the different opinions will show that there is a great difference as to what the meaning of the word *שם פרוש* is. Some translate it by *nomen explicatum*, others by *nomen separatum* (comp. Buxtorf, *Lex. Talm.* s. v.); Petrus Galatinus, *De Arcanis Catholice Veritatis*, ii, 18, by *separatum*, i. e. "sejunctum et distinctum ab aliis omnibus Dei nominibus, et soli Deo proprie conveniens." Reuchlin, in the third book of *De Arte Cabalistica*, explains it by *nomen expositivum*; Munk, *le nom distinctement prononcé*; Geiger, *der ausdrückliche Name*; Levy, *der deutlich ausgesprochene Name*.

In settling the question all must depend on the meaning of *פרוש*, whether it means only "to separate," or whether it occurs also in the sense of "to pronounce distinctly." In the latter sense it occurs very often, especially in the Targum and Talmud, as Dr. Fürst has shown against Dr. Nestle in *Z. d. d. m. G.* 1879, xxxiii, 297, claiming that *פירוש את השם* is only the Aramaized form for *הוכיר את השם*, "to pronounce

distinctly the name of God." In the Mishna (*Yoma*, vi, 2) we are told that both the priests and people, when they heard, on the Day of Atonement, the *שם המפורש*, fell to the ground; and we are also told that the voice of the high-priest, when he pronounced "the name," on the Day of Atonement, was heard as far as Jericho.

Whatever may be the meaning of this word in a philological point of view, Jewish tradition ascribed to it great power. By means of the *Shem hammephorash* Christ is said to have performed his miracles; Moses is said to have slain the Egyptian by the same means. Any one interested in these and other silly stories will find them in Eisenmenger, *Neuentdecktes Judenthum*, i, 154 sq. See, besides the essays of Nestle and Fürst already quoted, also Buxtorf, *Lex. Talm.* (ed. Fischer), p. 1205 sq.; Geiger, *Urschrift der Bibel*, p. 263 sq. See JEHOVAH. (B. P.)

Practically, *Shem-hammephorash* is a cabalistic word among the Rabbinical Jews, who reckon it as of such importance that Moses spent forty days on Mount Sinai in learning it from the angel Saxael. It is not, however, the real word of power, but a representation of it. The rabbins differ as to whether the genuine word consisted of twelve, or forty-two, or seventy-two letters, and try by their *gematria*, or cabalistic arithmetic, to reconstruct it. They affirm that Jesus stole it from the Temple, and by its means was enabled to perform many wonderful works. It is now lost, and hence, according to the rabbins, the lack of power in the prayers of Israel. They declare that if any one were able rightly and devoutly to pronounce it, he would by this means be able to create a world. It is alleged, indeed, that two letters of the word inscribed by a cabalist on a tablet and thrown into the sea raised the storm which, A.D. 1542, destroyed the fleet of Charles V. They say, further, that if you write this name on the person of a prince, you are sure of his abiding favor. The rationale of its virtue is thus described by Mr. Alfred Vaughan in his *Hours with the Mystics*: "The Divine Being was supposed to have commenced the work of creation by concentrating on certain points the primal, universal Light. Within the region of these was the appointed place of our world. Out of the remaining luminous points, or foci, he constructed certain letters—a heavenly alphabet. These characters he again combined into certain creative words, whose secret potency produced the forms of the material world. The word 'Shem-hammephorash' contains the sum of these celestial letters, with all their inherent virtue, in its mightiest combination."

Shemi'da (Heb. *שְׁמִידָה*, *fame of knowing*, i. e. wise; Sept. *Σεμίδα*, v. r. *Σεμίδα*, etc.), one of the sons of Gilead (Josh. xvii, 2), fifth named among the six, and progenitor of the family of the Shemidaïtes (Numb. xxvi, 32). His three "sons" are mentioned (1 Chron. vii, 19, A. V. "Shemidah"). B.C. post 1856.

Shemi'dah (1 Chron. vii, 19). See **SHEMIDA**.

Shemi'daite (Heb. with the art. in the sing. used collectively, *hash-Shemidaï*, *הַשְּׁמִידָי*, patronymic from *Shemida*; Sept. *ὁ Σεμίδαί*), a designation (Numb. xxvi, 32) of the descendants of Shemida (q. v.), the son of Gilead, who obtained their inheritance among the male posterity of Manasseh (Josh. xvii, 2, where they are called "children of Shemida").

Shem'inith (Heb. with the art., *hash-Sheminith*, *הַשְּׁמִינִית*, fem. sing. of *שְׁמִינִי*, *eight*.) The title of *Psa. vi* contains a direction to the leader of the stringed instruments of the Temple choir concerning the manner in which the psalm was to be sung. "To the chief musician on Neginoth upon Sheminith," or "the eighth," as the margin of the A. V. has it, and as the same word is elsewhere rendered (Lev. xxv, 32, etc.). A similar direction is found in the title of *Psa. xii*. The Sept. in both passages renders *ὑπὲρ ἧς ὀργάνου*, and the Vulg.

pro octavâ. The Geneva Version gives "upon the eighth tune." Referring to 1 Chron. xv, 21, we find that certain Levites were appointed by David to play "with harps on the Sheminith," which the Vulgate renders as above, and the Sept. by ἀγασθῆναι, which is merely a corruption of the Hebrew. The Geneva version explains in the margin "which was the eighth tune, over the which he that was the most excellent had charge." As we know nothing whatever of the music of the Hebrews, all conjectures as to the meaning of their musical terms are necessarily vague and contradictory. With respect to Sheminith, most Rabbinical writers, as Rashi and Aben-Ezra, follow the Targum on the Psalms in regarding it as a harp with eight strings; but this has no foundation, and depends upon a misconstruction of 1 Chron. xv, 21. Gesenius (*Thesaur.* s. v. שְׁמִינִי) says it denotes the *bass*, in opposition to Alamoth (1 Chron. xv, 20), which signifies the *treble*. But as the meaning of Alamoth itself is very obscure, we cannot make use of it for determining the meaning of a term which, though distinct from, is not necessarily contrasted with it. Others, with the author of *Shilte Haggibborim*, interpret "the *sheminith*" as the *octave*; but there is no evidence that the ancient Hebrews were acquainted with the octave as understood by ourselves. On comparing the manner in which the word occurs in the titles of the two psalms already mentioned with the position of the terms Ajeleth Shahar, Jonath-clem-rechokim, etc., in other psalms, which are generally regarded as indicating the melody to be employed by the singers, it seems probable that Sheminith is of the same kind, and denotes a certain air known as the eighth, or a certain key in which the psalm was to be sung. Maurer (*Comm. in Psa. vi*) regards Sheminith as an instrument of deep tone like the violoncello, while Alamoth he compares with the violin; and such, also, appears to be the view taken by Junius and Tremellius. See PSALMS.

Shemir'amothe (Heb. *Shemiramoth'*, שְׁמִירָמוֹת, *name of heights*, i. e. Jehovah; Sept. Σειραμωθ, v. r. Σειραμωθ, Σειραμωθ, etc.), the name of two Levites.

1. A musician "of the second degree" in the arrangement of the choral services by David (1 Chron. xv, 18), playing "with psalteries on Alamoth" (ver. 20), and harps (xvi, 5). B.C. 1043.

2. One of those sent by Jehoshaphat to teach the law throughout the land (2 Chron. xvii, 8). B.C. 909.

Shemitic Languages. I. *Name*.—Among the peoples of Hither Asia lay the root-stem of those languages which are now denominated "Shemitic," or "Semitic" according to the French, which is supposed to have been spoken by the descendants of Shem. The ordinary denomination of these languages, in earlier times, was "the Oriental languages." This was employed by Jerome, and is still used to some extent in modern times. As long as the other languages of the East, which do not belong to the Shemitic stock, were not known in the West, this term was perfectly satisfactory, and the more so when Hebrew was viewed as the mother of all languages. Now, however, that an acquaintance with the Eastern languages is more developed, and a scientific study of them has spread so widely and extended itself, especially in the academies, not only to the Persian, but also to the Egyptian, Chinese, Armenian, and especially the Indian (Sanskrit), it naturally follows that all these languages belonging to different stems are comprehended under the name "Oriental," so that this has now become an unsuitable term. The necessity arose to find a proper appellation which would distinguish that stem, forming now the Shemitic languages, from the other Oriental languages; and thus different suggestions were made. Leibnitz, e. g., suggested "Arabic;" Hupfeld (*Hebr. Gram.* p. 2) proposed "Hither-Asiatic" languages; Renan thinks that, in analogy to Indo-European, "Le véritable nom des langues qui nous occupent serait *Syro-arabes*." Neither of these suggestions pre-

valled; but the term "Shemitic," proposed by Schlözer in 1781, and recommended by Eichhorn (*Allgem. Bibl. der bib. Lit.* vi, 50, 772 sq.), has come into use. This latter term is based on the fact that in Gen. x, 21-31 the Hebrews, together with the other tribes belonging to this stem, are derived from Shem. But, like the former terms, the latter was also opposed, especially by Stange in his *Theol. Symmiktä* (1802), pt. i, p. 1-39. "And, indeed," says Bleek, "it must be acknowledged that if we regard this catalogue of nations as its groundwork, there is not quite so much to be said in favor of it. We there read (Gen. x, 22) 'The children of Shem: Elam, and Asshur, and Arphaxad, and Lud, and Aram.' Of these, Arphaxad is described as the grandfather of Eber, and Eber as the father of Peleg and Joktan, the latter of whom is mentioned in the following verses as the head of many Arabian tribes; while Peleg is spoken of in ch. xi as the great-great-grandfather of Terah, the father of Abraham, so that Arphaxad may be regarded as the progenitor of the Hebrews and of other tribes related to them by language. Aram, also, as the progenitor of the Aramæans, would belong to this language-stem. On the other hand, Elam certainly does not belong to it, but to the same stem as the Persians; the same may probably be said of Asshur and also of Lud, whom we may, with Josephus, regard as the parent of the Lydians. On the other side, however, we find the Canaanites and Phœnicians (x, 15-19), the Ethiopians (Cush [ver. 6, 7]), and several Arabian tribes traced up to Ham, although there is no doubt that so far as language is concerned they belong to the same stem as the Hebrews and Aramæans." From Bleek's statement it will be seen that the term "Shemitic" does not serve all purposes. True as this is, yet, in default of a better term, the name *Shemitic languages* has been retained, and is now current, with the distinct understanding of its being a false and merely conventional expression.

II. *Division*.—Viewing the Shemitic languages from a geographical point of view, they may be divided into three principal branches. Thus we have: (a) The Northern or North-eastern branch, the *Aramaic*; (b) The Southern, among which the *Arabic* is the chief dialect, and with which the Ethiopic is also connected; (c) The Middle, the *Hebrew*, with which the *Canaanitic* and *Phœnician* (Punic) nearly coincide. With this division, Renan says, corresponds the one which we may call the historical, according to which the Hebrew would assume the first place, extending from the earliest times of our knowledge of it down to the 6th century B.C., when the Aramaic begins to take the lead, and the field of Hebrew and Phœnician (the chief representatives of Hebrew) becomes more and more restricted. The Aramaic, again, would be followed by the Arabic period, dating from the time of Mohammed, when the Islam and its conquests spread the language of the Koran, not merely over the whole Shemitic territory, but over a vast portion of the inhabited globe. But this division, as M. Renan remarks, "ne doit être prise que dans un sens général, et avec trois restrictions importantes. 1. Les idiomes remplacés par un autre, l'Hebreu par l'Araméen, le Syriaque par l'Arabe, ne disparaissent pas pour cela entièrement: ils restent langue savante et sacrée, et, à ce titre, continuent d'être cultivés longtemps après avoir cessé d'être vulgaires. 2. Cette succession des trois langues Sémitiques ne peut signifier que chacune d'elles ait été parlée en même temps dans toute l'étendue des pays occupés par la race Sémitique; elle signifie seulement que chacun de ces trois dialectes fut tour à tour dominant, et représenta, à son jour, le plus haut développement de l'esprit Sémitique. Toute l'histoire intellectuelle des Sémites, en effet, se partage, comme l'histoire des langues Sémitiques elles-mêmes, en trois phases—Hebraïque, Chaldéo-Syriaque, et Arabe. 3. Cette division, enfin, ne doit point être entendue d'une manière absolue, mais seulement par rapport à l'état de nos connaissances" (*Histoire des Lang. Sém.* p. 108). The writer of the art. *Shemitic Languages* in Kitto's *Cyclopædia*, Mr.

E. Deutsch, seems to have known M. Renan's work and those of others holding the same view; for he says that these authors "had to hedge it in with many and variegated restrictions." But any one reading the remarks of M. Renan will hardly understand the unnecessary zeal exhibited by the writer in Kitto when he says, "But we further protest all the more strongly against it, as it might easily lead to the belief that the one idiom gradually merged into the other."

Out of the three principal branches, in the course of time, others developed themselves. The following table, taken from Prof. M. Müller's *Science of Language*, i, 396 (Amer. ed.), exhibits them in a genealogical way:

Living Languages.		Dead Languages.	Classes.
Dialects of Arabic..	Ethiopic	Himyaritic inscriptions.....	Arabic, or Southern...
		Amharic	
The Jews.....	{	Biblical Hebrew.....	Hebraic, or Middle...
		Samaritan Pentateuch.....	
		Carthaginian—Phœnician inscriptions.....	
Neo-Syriac.....	{	Chaldee, Masora, Talmud, Targum, Biblical Chaldee.....	Aramaic, or Northern.
		Syriac (Peshito, 2d century A.D.).....	
		Cuneiform inscriptions of Babylon and Nineveh.....	

A somewhat more intuitive table is the following, taken from Böttcher, *Ausf. Lehrbuch der hebr. Sprache*, p. 4 (ed. Mühlau):

PRIMITIVE SHEMITIC.

A. Northern Shemitic. (ARAMAIC.)		B. Middle Shemitic. (CANAANITIC.)	C. Southern Shemitic. (ARABIC.)	
1. Assyrian of the cuneiform writings, B.C. 1900-600		3. Phœnician, B.C. 1200 sq.	2. Hebrew, B.C. 1500 sq.	Northern Arabic. Southern Arabic.
8. Syriac, A.D. 180 sq. 4. Chaldee, B.C. 420 sq. 6. Samaritan, B.C. 300 sq. (?) 9. Mishna, A.D. 190 sq. Gemara, A.D. 300 sq.		7. Sinaitic Inscript. of the Nabatheans, B.C. 150-A.D. 150 5. Himyaritic inscriptions, B.C. (?) 11. Written Arabic, A.D. 500 sq. 10. Ethiopic, A.D. 350 sq.		
12. Sabian, A.D. (?)		13. Rabbinitic, A.D. 1000 sq. (Neo-Hebrew.) (Neo-Arabic Dialects.) 14. Amharic, A.D. 1300 sq.		

III. *Characteristics of the Shemitic Languages.*—Not only are all these languages (with the exception of the Ethiopic and Amharic) written from right to left, but they are related to each other in much the same manner as those of the Germanic family (Gothic, Old Northern, Danish, Swedish; High and Low German in the earlier and later dialects), or as those of the Slavic tongues (Lithuanian, Lettish; Old Slavic, Servian, Russian, Polish, Bohemian), bearing in mind, however, that the relationship in the former case is more thorough and complete than in the latter.

In the first place, the whole of the Shemitic dialects agree substantially with regard to the root-words and their meaning; the only difference being that one language, the Arabic, is comparatively far richer than the other dialects. Thus, e.g., the Arabic possesses nearly 6000 roots and about 60,000 words, while in Hebrew only about 2000 roots and 6000 words are known to us. Or, again, the Arabic philologists quote 1000 different terms for a sword, 500 for a lion, 200 for a serpent, 400 for misfortune. But we must take this into consideration, that in the other dialects only a small number of literary records, comparatively speaking, have been preserved; and that the Arabic, as a living language, is known to us in a far later development than the Hebrew. But by far the larger part of the root-words which are found in Hebrew appear also in the other dialects, and in essentially the same or only a slightly modified signification. Besides, in the present form of the language in all these dialects, nearly all the stem-words are composed of three consonants. In all the Shemitic dialects the consonants are seen to be far more essential than the vowels. The former almost alone determine the essential meaning of the word, while the differences of the vowels do no more than give the different references and modifications of this meaning.

Not the less do we find in the whole grammatical construction, as well as in particular instances of grammatical formation and structure, the greatest and most surprising agreement between the various Shemitic languages or dialects; thus we have but two genders, and these are also distinguished in the second and third persons of the verb. In the inflection of verbs they have only two moods (commonly considered to be tenses); but these are strongly contrasted by the position of the marks of the persons at the end or at the beginning: the so-called *perfect* for the completed or actual, and the *imperfect* for the incomplete or hypothetical, without decidedly giving expression to the tenses by peculiar forms. Nouns are not declined by means of case-end-

ings, but the genitive is expressed by closely combining two words, and other cases by using prepositions, while the pronouns have mere suffixes for the oblique cases. Finally, they are characterized by poverty in the particles, and consequently they have their clauses formed with extreme simplicity; and they are defective in the structure of sentences, at least if they are judged by the standard of the Latin and the German languages. Considering all these facts, they plainly show "that one original language lies at the foundation of them all; that in early times—antecedent, however, to all our historical knowledge of them—these nations certainly all spoke one language, which has in later periods, as they separated one from the other, developed into these various dialects" (Bleek).

IV. *Comparison of the Shemitic Languages with One Another.*—When we enter on the consideration of the mutual relation, we find that by far the richest and most developed of the Shemitic languages is that of the South, known to us as

1. *The Arabic.*—Referring the reader to the art. ARABIC LANGUAGE in this *Cyclopædia*, we will only make a few general remarks. Before the time of Mohammed it was confined to Arabia, and scarcely cultivated except in poetry; but along with Islam it has spread itself over the greater part of Asia and Africa, and has unfolded its great wealth in a very comprehensive literature, which extends to almost all the domains of knowledge.

Even in the earliest times it is possible that this dialect was separated from those with which it is allied, though the traces of this are few. The most marked is the form אֶלְמִידָר (Gen. x, 26), the designation of a district of Arabia Felix, having the article prefixed, which has also been preserved elsewhere in some Hebrew documents, as in Prov. xxx, 31, אֶלְקִים; Josh. xv,

30; comp. 1 Chron. iv, 29. We know, also, that already in the time of Solomon the wisdom of the Arabs was highly prized; and that enigmas, and so, at least, the beginning of poetry, were to be found in Yemen, or rather in Sabea (1 Kings iv, 30; x, 1 sq.).

In the beginning it probably had forms which were simpler and more like the Hebrew than those in which it is known to us, which have been cultivated to the very uttermost; but soon the one language fell to pieces, as the many independent tribes formed their several dialects, of which the *Himyeritic* in Yemen was strongly marked by differences from the language of Central Arabia, being simpler, and so more nearly allied to the Hebrew. But when the Himyerite kingdom fell, this dialect was compelled to yield to that of Mecca (the *Modurensitic* or *Koraishitic*), which had become a written form of speech before Mohammed's time, and is in the Koran (Sura xvi, 103) named the *Arabic language*, *kar' iṣṣayn*. In this dialect the entire Arabic literature is composed. Then it was gradually supplanted by the present commonly spoken language, which has not only adopted many foreign words, Turkish especially, but has also lost the variety of forms which it possessed and the very capacity for forming others, and thus has returned nearer to the ancient simplicity as well as to the Hebrew and Aramaic.

From the intimate connection from the earliest times between South Arabia and Ethiopia it has arisen that we have in the Ethiopic language (q. v.) a remnant of the old Himyeritic dialect, lost even to the Arabic itself. In this ancient written language (the *Geez*) we possess a translation of the Bible and other ecclesiastical writings, of which the most important is the translation of the book of Enoch. The language has a simpler character than the more cultivated Arabic, and approaches more to the Hebrew and Aramaic idiom. In the 14th century it was supplanted by *Amharic*, and is now only a learned language.

The literature of the Arabic language being very rich, we shall only mention here, by way of supplement to the article ARABIC LANGUAGE in this *Cyclopædia*, the works published recently in so far as they have come under our observation:

A. *Grammars of both the Ancient and Modern Arabic*.—Bresnier, *Cours Pratique et Théorique de la Langue Arabe*, etc. (Alger, 1855); id. *Grammaire Arabe Élémentaire*, etc. (ibid. 1866); Mohamed Cadi, *La Langue Arabe*, etc. (Cairo, 1862, 3 vols.); Caspari, *Grammatik der arab. Sprache* (Leips. 1866); Fahrat, *Grammaire Arabe* (Beirut, 1865); Faris-el-Shidiak, *A Practical Grammar of the Arabic Language*, etc. (Lond. 1866); Freytag, *Einführung in das Studium der arab. Sprache* (Bonn, 1861); Goldenthal, *Grammaire Arabe écrite en Hébreu*, etc. (Vienna, 1857); Gorguon, *Cours d'Arabe Vulgaire* (Paris, 1864, 2 pts.); Hassan, *Kurzgefasste Grammatik der vulgär-arabischen Sprache* (Vienna, 1869); Leitner, *Introduction to a Philosophical Grammar of Arabic* (Lahore, 1870); Mallout, *Fevay de Charquise, ou Abrégé de Grammaire Arabe*, etc. (Smyrna, 1854); Narul Kira, *Xaif El Yazighy* (Beirut, 1863), an Arabic grammar in Arabic; Newman, *A Handbook of Modern Arabic* (Lond. 1866); Raabe, *Gemeinschaftliche Grammatik der arabischen u. der semitischen Sprachen* (Leips. 1874); Sapeto, *Grammatica Araba Vulgare* (Florence, 1867); Schier, *Grammaire Arabe* (Leips. 1862); Zschokke, *Institutiones Fundamentales Linguae Arabice* (Vienna, 1869); Wolff, *Arabischer Dragoman* (Leips. 1867).

B. *Dictionaries*.—Bocherot, *Dictionnaire Français-Arabe*, etc. (Paris, 1864); Butrus al Bustāny (Beirut, 1866-70, 2 vols. fol.; an abridged edition, ibid. 1867-70), an Arabic dictionary explained in Arabic; Calligaris, *Le Compagnon de Tout, ou Dictionnaire Polyglotte*, etc. (Turin, 1864-70, 2 vols.); Cherbonneau, *Dictionnaire Français-Arabe* (Paris, 1872); Hélot, *Dictionnaire de Poche Français-Arabe et Arabe-Français* (Alger, 1870); Henry, *Dictionnaire Français-Arabe* (Beirut, 1867); Kazimirski, *Dictionnaire Arabe-Français*, etc. (Paris, 1860, 2 vols.); Marcel, *Dictionnaire Français-Arabe des Dialectes Vulgaires* (ibid. 1869); Newman, *A Dictionary of Modern Arabic* (Lond. 1870, 2 vols.); Paulmier, *Dictionnaire Français-Arabe* (Paris, 1872); Roland de Bussy, *Petit Dictionnaire Français-Arabe et Arabe-Français* (Alger, 1867); Schiaparelli, *Vocabolista in Arabico* (Florence, 1871); Wahrmond, *Handwörterbuch der arabischen und deutschen Sprache* (Glessen, 1874, 2 vols.).

C. *Chrestomathies*.—Cherbonneau, *Exercices pour la Lecture de Manuscrits Arabes*, etc. (Paris, 1853); id. *Leçons*

de Lecture Arabe, etc. (ibid. 1864); Combarel, *Cahiers d'Écritures Arabes*, etc. (ibid. 1870).

2. *The Syro-Chaldee*.—That the Arabic in the South was not the most developed of all the Semitic languages we see in the Aramaic language (q. v.). Here, also, we cannot enter upon a minute history of that language, for which the reader is referred to the article in this *Cyclopædia*. Our remarks can only be of a general character.

The countries in the north of Palestine stretching from the Tigris to the Taurus are comprehended in Scripture under the name of *Aram*, or *Highland*. Their inhabitants, the *ʿAramāi* and *ʿAqmāi* of the ancients (Hom. *Il.* ii, 783), were of different nations (even in Scripture they are distinguished as *Aram-Damascus*, אֲרָם דַּמָּשֶׁק; *Padan-Aram*, פָּדָן אֲרָם; *Aram-Zobah*, אֲרָם צוֹבָה, etc.), and they passed historically through the most diversified relations. The common language of these people, in respect of its general character, as it is of all the Semitic dialects the most northerly, so also is the *harshest* (in place of the softer labials ʔ, ʕ, and ʕ, it has ʔ, ʕ, and ʕ, i. e. the *d* and *t* sounds); the *poorest* (it wants a complete vowel-system, hence as verbal form כָּתַב [Heb. כָּתַב], noun-form מִלָּךְ [Heb. מִלָּךְ]); it has corresponding with this a scanty conjugation system; it possesses no vestige of the conjugation *Niphal*, but forms all its passives by the prefix אִתַּ; it does not carefully distinguish the formation of the weaker roots, but interchanges the verbs and nouns, לָא and לָה, ʔ and ʕ, etc., and in general the *least cultivated*.

In the Old Test. we find this dialect denominated, in opposition to the Palestinian, the *Aramaic language* (אֲרָמִית, Isa. xxxvi, 11; 2 Kings xviii, 26). In the time of Isaiah, as appears from the passage just cited, educated Hebrews could speak Aramaic, and conversely, educated Arameans could speak Hebrew (Isa. xxxvi, 4 sq.); while the common people understood only their vernacular dialect. The subsequent transportation of the Jewish people into Babylon contributed to silence more entirely the ancient vernacular in Judæa, and to render the triumph of the Aramean in those parts more general. Finally, during the long exile of the Jews in Babylon, the language of their fatherland appears to have been altogether laid aside, so that those who at the termination of the captivity returned into Palestine brought with them the dialect of Babylon as their customary medium of speech. Among the priesthood and learned men, the Hebrew had, indeed, been retained as the language of literature and religion; but so fully had it passed from the populace in general that we find them, on the reinstitution of public worship at Jerusalem, incapable of understanding the holy writings except as paraphrased in Aramaic (Neh. viii, 8).

This was the tongue which, with a slight intermixture of Persian and Greek (in consequence of the temporary dominion of the Persians and Macedonians in Palestine), had prevailed from the period of the return from Babylon, and was still maintained in popular use at the opening of the Christian dispensation under the name of *Palestinian Aramaic*, or *Palestinian Syriac*.

This Palestinian Syriac is a language, therefore, preeminently interesting to the Christian. "It was sanctified by the lips of the Divine Redeemer. In these forms of speech he conversed with the Virgin-mother, instructed his disciples, and proclaimed to myriads the promises of eternal life. In them he gave forth those sovereign mandates which controlled the tempestuous elements, dispossessed the daemoniac, brought health to the diseased, and a resurrection-life to the dead. In this very tongue we have still the words in which he taught his people the prayer which calls upon the Almighty God as 'our Father in heaven.' Finally, it was in this language that he himself prayed upon earth, and that

the Father spoke audibly to him from the heavens. Thus consecrated, it became a celestial language, a holy tongue, a chosen vehicle which conveyed the thoughts of the uncreated mind and the purposes of eternal love to the sons of men."

The Aramaean language may be said, in general terms, to have been distinguished into the Eastern and Western Aramaic. Of these a full account is given in this *Cyclopaedia* under the respective heads of CHALDEE LANGUAGE and SYRIAC LANGUAGE. We therefore here consider some of the more obscure dialects.

(1.) *The Samaritan*.—This dialect occupies an intermediate position with reference to Hebrew and Aramaic, and is particularly characterized by changes in the guttural, also by containing many non-Shemitic (Cuthaic) words. The Samaritans have no means of distinguishing between the Hebrew letters \aleph and \beth ; they have no *final* or *dilatable* forms, like the Hebrews, for any of the letters, but use the same form under all circumstances. The character used is the most ancient of the Shemitic characters, which the Samaritans retained when the Hebrews adopted the square character. Few remains of this dialect are extant (comp. the articles SAMARITAN LANGUAGE, LITERATURE, etc.).

(2.) *The Sabian or Nazarean*.—This language, known as yet only from the *Codex Nazareus*, also called *The Book of Adam* (edited by M. Norberg, Göttingen, 1815-17, 3 vols.), occupies a place between the Syrian and Chaldaic, makes frequent changes in gutturals and other letters, is in general incorrect in spelling and grammar, and has adopted many Persian words. The MSS. are written in a peculiar character; the letters are formed like those of the Nestorian Syriac, and the vowels are inserted as letters in the text.

(3.) *The Palmyrene*.—Of this dialect no specimens are now extant, except such scanty fragments as are contained in the Palmyrian inscriptions, for an account of which we may refer to R. Wood's *Ruins of Palmyra* (Lond. 1753), interpreted independently by Barthélemy in Paris, and better by Swinton in Oxford. Some more specimens were given by Eichhorn, *Marmora Palmyrena Explicata* (Göttingen, 1827, 4to). The inscriptions are chiefly bilingual—in an Aramaic which is much like the common dialect, and in Greek—the earliest being A.D. 49, but most of them being in the 2d and 3d centuries.

(4.) *The Old Phœnician, together with Punic*.—A document of some size in the old Phœnician was first discovered in 1855, communicated by Dr. Thomson, of Beirut, and purchased by the duc de Luynes for the Louvre. Röddiger, Dietrich, Hitzig, Schlottmann, De Luynes, Ewald, and Munk endeavored to interpret it. More recent is the sacrificial tablet discovered at Marseilles, explained by Movers (Breslau, 1847), Ewald, and A. C. Judas. Of chief importance for the Punic are the Punic passages in the *Penulus* of Plautus, illustrated by Movers and Ewald. The rest of the Phœnician and Punic inscriptions (including those on coins) hitherto discovered have been collected and illustrated by Gesenius in *Mon. Ling. Phœn.* (Lips. 1837, 3 vols.), to which must be added forty-five inscriptions by the abbé Bourgade (Paris, 1852, fol.), deciphered by the abbé Bargès. See PHœNICIA.

Linguistic Literature.—A. Chaldaic.—Passing over the more ancient works, we will only give some of the more modern:

I. *Grammars*.—Harris (W.), *Elements of the Chaldaic Language*, etc. (Lond. 1822); Nolan, *An Introduction to Chaldaic Grammar*, etc. (ibid. 1821); Rigge (E.), *Manual of the Chaldaic Language* (Boston, 1832); Winer-Hackett, *Grammar of the Chaldaic Language* (Andover, 1845); Luzzatto-Krüger, *Grammatik der biblisch-chaldäischen Sprache* (Breslau, 1873); *Chaldaic Reading-Lessons*, with a Grammatical Praxis, etc. (Lond. ed. Bagster).

II. *Lexicons*.—In this department the *Thesaurus* is the great work of Buxtorf, *Lexicon Chaldaicum, Talmudicum, et Rabbinicum* (Basil. 1640; new ed. by Fischer, Leipzig, 1666-74); Schönhak, *Aramäisch-rabbinisches Wörterbuch* (Warsaw, 1869); Levy (I.), *Chaldäisches Wörterbuch über die Targumim* (Leips. 1867); id. *Neuhebr. und chald. Wörterbuch* (ibid.), now in course of publication.

IX.—T T

B. Syriac.—I. *Grammars*.—Cowper [B. H.], *The Principles of the Syriac Grammar* (Lond. 1868); Merx [A.], *Grammatica Syriaca* (Halle, 1867-69); Nolan [F.], *An Introduction to the Syriac Language*, etc. (Lond. 1821); Phillips [S.], *Syriac Grammar* (Cambridge, 1866); Uhlemann-Hutchinson, *Syriac Grammar* (N. Y. 1856); *Syriac Reading-Lessons*, etc. (Lond. ed. Bagster).

II. *Lexicons*.—Frost (M.), *Lexicon Syriacum* (1623); Gutbir [Æg.], *Lexicon Syriacum, continens omnes N. T. Syr. Dictiones et Particulas*, etc. (Hamb. 1667); a neat and improved edition of this *Lexicon* was given by Dr. Henderson (Lond. 1836, Bagster); Bernstein (G. H.), *Lexicon Linguae Syr.* (Berol. 1857, fol. vol. i). Older ones we omit.

C. Samaritan.—See SAMARITAN LANGUAGE, LITERATURE, etc.

D. *The Sabian or Nazarean*.—Norberg [M.], *Onomasticon Codicis Nazarei* (Lund. 1817, 2 vols.); id. *Lexicon Codicis Nazarei* (ibid. 1816).

E. *The Palmyrene*.—Barthélemy, *Réflexions sur l'Alphabet et sur la Langue dont on se servoit autrefois à Palmyre*, in the *Mémoires de l'Académie des Inscriptions*, tom. xxvi.

F. *The Phœnician*.—Levy (Dr. M. A.), *Phönizisches Wörterbuch* (Breslau, 1864); Schröder (P.), *Grammatische Untersuchungen über die phönizische Sprache*, etc. (Halle, 1869); Wuttke [H.], *Entstehung u. Beschaffenheit des phönizisch-hebr. Alphabets*, in the *Zeitschr. d. deutschen morgenl. Gesellschaft* (1857), xi, 75.

3. The third main branch of the Shemitic, the *Mid-Shemitic*, is best known to us as the *Hebrew language* (q. v.). As this is the most important to the student of Sacred Writ, we will give a short outline of the same, following its history through the different stages, till, like the Arabic, it became an object of philological study.

(1.) *Name and Origin*.—The Hebrew language takes its name from Abraham's descendants, the Israelites, who are ethnographically called *Hebreus*,* and who spoke this language while they were an independent people. In the Old Test. it is poetically called the *language of Canaan* (שִׁפְתֵי כְנָעַן, ἡ Χαναανίτις, Isa. xix, 18, "emphatically the language of the holy land consecrated to Jehovah, as contrasted with that of the profane Egypt," as Hävernicks expresses it), and also the *Jews' language* (לְשׁוֹן יְהוּדִים, ἡ Ἰουδαϊστί, 2 Kings xviii, 26; Isa. xxxvi, 11, 18; Neh. xiii, 24), from the kingdom of Judah. The name "Hebrew language" nowhere occurs in the Old Test., since in general there is rarely anything said of the language of the Israelites; it appears in the prologue to Ecclesi., Ἑβραϊστί, and in Josephus (*Ant.* I, i, 2), ἡ ὥντα τῶν Ἑβραίων. In the New Test. Ἑβραϊστί (John v, 2; xix, 13, 17, etc.) and Ἑβραϊς διάλεκτος (Acts xxi, 40; xxii, 2; xxvii, 14) denote the *Aramaic*, which was spoken in the country at the time.† In later Jewish writers (as in the Targumists) the Hebrew language is called לְשׁוֹן קֹדֶשׁ (the sacred tongue), in contrast with the Aramaic (לְשׁוֹן חוֹל). (2.) *Antiquity of the Hebrew Language*.—On this point, and the question whether the Hebrew was the primitive language, there is a great diversity of opinion. "It is clear," says Hävernicks (*Introd.* p. 128), "that this question can be satisfactorily answered only by those who regard the Biblical narrative (viz. Gen. xi, 1 sq.) as true history. Those who, like the mass of recent interpreters, look at it from a mythical point of view cannot possibly obtain any results. Gesenius says that, as respects the antiquity and origin of the Hebrew language, if we do not take this mythical ac-

* There is a controversy as to the origin of this name. Aben-Ezra (d. 1165), Buxtorf (d. 1629), Löschner [F. E.] (d. 1749), Buddeus [J. G.] (d. 1764), Lengerke (d. 1855), Meier [E.] (d. 1866), Ewald (d. 1875), and others derive it from the Shemite Eber (Gen. x, 24; xi, 14 sq.), while most of the rabbins and of the fathers (as Jerome, Theodoret, Origen, Chrysostom), Arias Montanus, Paulus Burgensis, Münster, Luther, Grotius, Scaliger, Eusebius, Walton, Clericus, Rosenmüller, Gesenius, Eichhorn, Hengstenberg, Bleek, and others derive it from עֵבֶר, "beyond," following the Sept., which translates עֵבֶר (xiv, 13) by ὁ περὰν, "the man from beyond," referring to Abraham's immigration.

† The passage in Philo (*De Vita Mosii*, ii, 509, ed. Colon., Young's transl. iii, 82), according to which the original of the Pentateuch was written in Chaldaic, shows how much the Alexandrians of that time had lost the knowledge of the difference of the dialect, and is to be ascribed to Philo's ignorance in this department.

count, we find ourselves *totally deserted by the historian*." Returning, then, to the ancient view of this passage, we find that most of the rabbins,* the fathers,† the older theologians—Buxtorf [John], the son (*Dissert. Phil. Theol.* [Basil. 1662], Diss. i), Walton (*Proleg.* iii, 3 sq.), Pfeiffer [A.] (*Decas Select. Exercit. Bibl.*, in his *Dubia Vexata*, p. 69 sq.), St. Morinus (*De Ling. Primæva* [Ultraj. 1694]), Löscher [Val.] (*De Causis Ling. Hebr.* i, 2, 5), Carpov (*Rit. Sacr.* p. 174 sq.), among the moderns—and, with some limitation, Pareau, Hävernick, Von Gerlach, Baumgarten, and others, believe that Hebrew was the primitive language of mankind, while some contend that if any of the Asiatic tongues may claim the honor of being the ancestral language of our race, the palm should be given to the Sanscrit. Between these two opinions the question now rests, and "it is astonishing," says Prof. Müller (*Science of Language*, i, 133), "what an amount of real learning and ingenuity was wasted on this question during the 17th and 18th centuries. . . . It might have been natural for theologians in the 4th and 5th centuries, many of whom knew neither Hebrew nor any language except their own, to take it for granted that Hebrew was the source of all languages; but there is neither in the Old nor in the New Test. a single word to necessitate this view. Of the language of Adam we know nothing; but if Hebrew, as we know it, was one of the languages that sprang from the confusion of tongues at Babel, it could not well have been the language of Adam, or of the whole earth 'when the whole earth was still of one speech.'" The first who really conquered the prejudice that Hebrew was the source of all language was Leibnitz, the contemporary and rival of Newton. "There is as much reason," he said, "for supposing Hebrew to have been the primitive language of mankind as there is for adopting the view of Serapius, who published a work at Antwerp, in 1550, to prove that Dutch was the language spoken in Paradise." In a letter to Tenzel, Leibnitz writes: "To call Hebrew the primitive language is like calling the branches of a tree primitive branches, or like imagining that in some country hewn trunks would grow instead of trees. Such ideas may be conceived, but they do not agree with the laws of nature and with the harmony of the universe—that is to say, with the Divine Wisdom."

(3.) *Character and Development of the Hebrew Language*.—In relation to the rest of the Semitic languages, the Hebrew, whether regarded as the primitive language or not, has for the most part retained the stamp of high antiquity, originality, and greater simplicity and purity of forms. In its earliest written state it exhibits, in the writings of Moses, a perfection of structure which was never surpassed. As it had, no doubt, been modified be-

tween the time of Abraham and Moses by the Egyptian and Arabic, so in the period between Moses and Solomon it was influenced by the Phœnician, and, down to the time of Ezra, continued to receive an accession of exotic terms which, though tending to enlarge its capabilities as a spoken and written tongue, materially affected the primitive simplicity and purity of a language compared with which none may be said to have been so poor, and yet none so rich. But with the period of the captivity there arose an entirely new literature, strikingly different from the earlier, and this is to be traced to the influence exerted by the Aramaic tongue upon the Hebrew, which had previously been developing itself within restricted limits. This was the introduction to its gradual decay, which did not become fully manifest, however, until the commencement of the Chaldean period. Not only did the intrusion of this powerful Aramaic element greatly tarnish the purity of the Hebrew words and their grammatical formation, older ones having been altered and supplanted by newer ones, which are Aramaic for the most part;* it also obscured the understanding of the old language,† and it enfeebled its instinctive operations, until at length it stifled them. The consequence was that the capacity of observing grammatical niceties in the old pure Hebrew was entirely lost;‡ partly the distinction of prose and poetical diction was forgotten;§ and, finally, as the later writers went back upon the Pentateuch and other older compositions, many elements which had already died out of the language were reproduced as archaisms.||

(4.) *Decay of the Hebrew Language*.—But the great crisis of the language occurs at the time of the captivity of Babylon. Then, as a spoken tongue, it became deeply tinged with Aramaic. The Biblical Hebrew, abiding in the imperishable writings of the prophets, continued to be the study of the learned; it was heard on the lips of the priest in the services of religion, and was the vehicle of written instruction; but as the medium of common conversation it was extensively affected, and, in the case of multitudes, superseded, by the idiom of the nation among whom Providence had cast their lot. So an Aramaized Hebrew, or a Hebraized Aramaean, continued to be spoken by such of them as resettled in Palestine under Ezra and Nehemiah, while the yet greater number who preferred the uninterrupted establishment of their families in Babylonia fell entirely into the use of Aramaic.

This decline of the popular knowledge of pure He-

* This is especially seen in the coining of new words for abstract ideas by means of prefixed letters or syllables added, as *הַמְּבֹרָךְ* for *מְבֹרָךְ* (Psa. cxvi, 12); *הַמְּתִיר* for *מְתִיר* (Ezek. xvi, 18, 20); *הַמְּשִׁיב* (Ezra i, 6; Esth. v, 3, 7, 8), etc.

† This is shown by the increasing use of the *scriptio plena*, as *הַמְּבֹרָךְ* for *מְבֹרָךְ*; the interchange of the weak letters *ה* and *א*—for instance, *הַיָּד* (1 Chron. xiii, 12) for *אֵד* (2 Sam. vi, 9); the resolution of the *dagesh forte* in sharpened syllables by inserting a vowel, as *אֶרֶץ* for *אֶרֶץ* (1 Chron. xi, 81), or by inserting a liquid, *הַמְּשִׁיב* for *מְשִׁיב* (xviii, 5, 6).

‡ Interchange of *א* and *אָ* as the sign of the accusative, and as meaning "with"—for instance, Jer. i, 16; xix, 10; xx, 11, etc.; the use of *ל* to mark the accusative instead of the dative (1 Chron. v, 26; xvi, 37; xxix, 20, 22, etc.); the use of *כֵּן* instead of *כֵּן*; the use of Aramaic forms of inflection, as, *אֶרֶץ* for *אֶרֶץ* (Jer. iv, 30); *תִּי* for *תָּ* (ii, 33; iii, 4, 5; iv, 19), etc.

§ Comp. *בָּלָה* (Piel), "to be afraid" (Ezra iv, 4, elsewhere only the substantive *בְּלָהָה* in poetry); *זָנָה*, "to reject with loathing" (1 Chron. xxviii, 9; 2 Chron. xi, 14; xxxix, 19, earlier only in poets, and in Hos. viii, 3, 5; Zech. x, 6).

|| E. g. *מִיָּין*, "species" (Ezek. xlvii, 10, taken from the Pentateuch); *מִשְׁנֵי־יָד*, "a measure" (1 Chron. xciii, 29); Ezek. iv, 11, 16, etc. (from Lev. xix, 35); *נָכַן*, "to act cunningly" (Mal. i, 14; Psa. cv, 25, from Gen. xxxvii, 18 or Numb. xxv, 18), etc.

* "And all the inhabitants of the earth were [of] one language, and of one speech, and one counsel; for they spake the holy language by which the world was created at the beginning" (Targum on Gen. xi, 1; comp. also Rashi and Aben-Ezra, *ad loc.*).

† The fathers of the Church have never expressed any doubt on this point. Jerome (d. 420), in one of his epistles to Damasus, writes, "The whole of antiquity (*universa antiquitas*) affirms that Hebrew, in which the Old Test. is written, was the beginning of all human speech;" and in his *Comm. in Soph.* c. 3, he says, "Lingua Hebraica omni linguarum esse matrem." Origen (d. 254), in his eleventh homily on the book of Numbers, expresses his belief that the Hebrew language, originally given through Adam, remained in that part of the world which was the chosen portion of God; not left, like the rest, to one of his angels. Chrysostom (d. 404) says, "God left in Eber's house the original language as a perpetual memory of his judgment" (*αὐτός ὁ Ἐβερ ἐμενε τὴν αὐτὴν ἔχων διδασκίαν, ἥνπερ καὶ προτέρως, ἵνα καὶ τούτω σημείων ἐναργὲς γένηται τὴς διαίρεσως*) (Hom. xxx, in Gen. p. 300, ed. Montf.), and Augustine (d. 430), in his *De Civitate Dei*, xvi, 11, "Quæ lingua prius humano generi non immerito creditur fuisse communis, deinceps Hebræa est nuncupata" (i. e. his family [Heber's] preserved that language which is not unreasonably believed to have been the common language of the race; it was on this account thenceforth called Hebrew). Theodoret (d. 452), in *Quest. in Genesim*, p. 60, however, believes, like Delitzsch, that the Syriac was the primitive language, holding that Hebrew was first introduced by God through Moses as a holy language.

brew gave occasion to the appointment of an order of interpreters (*meturgemadin*) in the synagogue for the explication of the Scriptures in this more current dialect, as can be seen from Neh. viii, 8, where we read, "They [the priests and Levites] read in the book, in the law of God *בְּפֶשֶׁת*, and appended thereto the sense, and caused them to understand the reading," where the word means, "with an explanation subjoined," i. e. with an interpretation added, with an explanation in Chaldee, the vulgar tongue, as appears from the context and by a comparison of Ezra iv, 18 and verse 7. Accordingly, the Talmudists have already correctly explained our passage *בְּפֶשֶׁת זֶה הַגִּיטָה*, and so also Clericus, Dathe, etc. See TARGUM.

But while these changes were taking place in the vernacular speech, the Hebrew language itself still maintained its existence. It is a great mistake to call Hebrew a dead language. It has never died, it will never die. In the days to which we are now referring, it was still loved and revered by the Jewish people as the "holy tongue" of their patriarchs and prophets. Not only the remaining canonical Scriptures, but the prayers and hymns of the Temple and synagogue, were, for the most part, written in it; and even the inscriptions of the coinage retained both the language and the more antique characters, in preference to those more recently introduced by Ezra.

(5.) *The Written Hebrew*.—About the time when the language underwent this internal change, it was also changed externally. That we have not the original Hebrew characters in MS. and printed texts of the Bible is evident from a tradition we have in the Talmud that "at first the law was given to Israel in the Hebrew writing and the holy tongue, and again it was given to them in the days of Ezra in the Assyrian writing and the Syrian tongue. They chose for the Israelites the Assyrian writing and the holy tongue, and left to the *Idiote* (i. e. the Samaritans) the Hebrew writing and the Syrian tongue. . . . And although the law was not given by Ezra's hand, yet the writing and language were called the Assyrian" (*Sanhedr.* xxi, 2; xxii, 1).^{*} This Assyrian writing (*כְּתָב אֲשִׁירִי*) is also called "square writing" (*כְּתָב קְרָבָע*), "correct writing" (*כְּתִיבָה הַמְּבִינָה*), and by the Samaritans "Ezra's writing" (*כְּתָב עֲזָרָה*). We must suppose that the square character, which came into use after the exile, only gradually thrust the elder character aside; for in the Maccabæan coinage the ancient Hebrew character was used, and while we may trace back the origin of the new characters nearly to the times of Ezra, certain it is that at a later time it was perfected in its present form, and long before the time of the Talmud, since there we find directions given concerning the writing of the alphabet, of which we will speak farther on.

(6.) *Tradition; Period of the Hebrew Language*.—It is chiefly among the Jews of Palestine that we are to seek the preservation of the knowledge of the Hebrew language. Though the Hebrew ceased to be even a written language, yet for practical ends in the usages of worship the study of the old Hebrew documents became for them an indispensable duty, for which the affinity of the language they used must have offered them peculiar facilities. Hence, as early as the book of Sirach (*Ecclesiasticus*), which was probably written between B.C. 290 and 280, mention is made of the study of Scripture as the chief and fairest occupation of the *γραμματεὺς*, the *διδασκάλους ἐν νόμῳ ὑψίστου*, and *σοφίαν πάντων ἀρχαίων ἀκρίθησιν*, και ἐν προφητείαις ἀσχολεῖσθαι (xxix, 1 sq.). The more erudite study of Hebrew Scripture was prosecuted in Palestine and Babylonia from the days of Ezra, not only by individual

scribes, but also in formal schools and academies, the *ישיבות*, *בתי רבנים*, also *בתי המדרש*, which were established there before the time of Christ. The chief seat of these at first was principally at Jerusalem, then after the destruction of this city by the Romans it was transferred to Jamnia or Jabneh, under Jochanan ben-Zachai (q. v.), till under Gamaliel III ben-Jehudah I (A.D. 193–220) Tiberias became the seat of learning. Among the teachers of Tiberias, rabbi Jehudah the Holy, or hak-Kodesh (q. v.), the compiler of the Mishna, obtained a remarkable reputation in the latter half of the 2d century. After his death, the seat of this scriptural erudition was once more transplanted to Babylonia, where, with reference to this, the schools at certain cities on the Euphrates—Sora, Pumbeditha, and Nahardea—attained pre-eminently to high esteem. Still, along with these, the Palestinian schools subsisted uninterruptedly, especially the school at Tiberias, and to the labors of these schools are due in part the Targums, but principally the Talmud and the Masorah.

The activity of these schools took different shapes at different periods, and into four of these periods it may be divided: 1. The period of the *more ancient Sopherim* (scribes, *רַשְׁינִיִּים סוֹפְרִים*), from the close of the canon to the ruin of the Jewish commonwealth. They settled fixedly the external and internal form of the sacred text (*בִּקְרָא*), the correct writing and reading, the arrangement of the books and their sections, the numbering of the verses, words, and letters, etc. 2. The period of the *Talmudists*, from the 2d to the 6th century of the Christian era. 3. The period of the *Masorites*, from the 6th to the 9th century. 4. The period of the *Grammarians and Expositors*, from the 9th to the 16th century. Following the example of the Arabians, they endeavored to lay a scientific foundation for Hebrew philology and for understanding the text of the Bible, by means of various labors in grammar and lexicography, including the comparison of the Aramaic and Arabic dialects.

For the history of the philological study of the Hebrew language, the reader is referred to the art. *HEBREW LANGUAGE* in this *Cyclopædia*, where he will also find more details.

V. *Relation of the Shemitic Languages to the Indo-European Languages*.—One of the most vexed questions of comparative philology is that of the relation of the Shemitic family to that of the Indo-European. As early as the year 1778 Nathaniel Brassey Halhed, in his *Grammar of the Bengal Language*, said, "I have been astonished to find the similitude of Sanscrit words with those of Arabic [= the Shemitic], and these not in technical and metaphorical terms, which the mutation of refined arts and improved manners might have occasionally introduced, but in the main *groundwork of language*, in monosyllables, in the names of numbers, and the application of such things as would be first discriminated on the immediate dawn of civilization." When the Sanscrit became better known in Europe, scholars like Adelung, Klaproth, Bopp, etc., in their studies on comparative philology, undertook to trace out the affinity between these two families. Untenable as were their theories, yet they paved the way. With greater precaution Gesenius entered upon the arena of comparative philology. Being persuaded that the Hebrew has no relation with the Indo-European languages, the main object of his comparisons was to find out analogies, while in such words as appeared to him to have some similarity with the oldest original languages of Eastern Asia, as *שבע*, *seven*, Sanscrit, *sapta*; *נער*, *a youth*, Sanscrit, *nar*, etc., he either perceived marks of early borrowings or a play of accident. First, however, went a step further, and espoused the unhappy idea of a Sanscrito-Shemitic stem, which divides itself into the Sanscrit, Medo-Persian, Shemitic, Græco-Latin, Germanic, and Slavic families. But the

^{*} Jerome, in *Prolog. Gal.*: "Certum est, Esdram . . . alias literas reperisse, quibus nunc utimur, cum ad illud usque tempus iidem Samaritanorum et Hebræorum characteres fuerint." See also Origen, in Ezra ix, 4; Psal. ii (iii, 539).

advancement in the science of the Indo-European languages has shown that there is no connection whatever between these two languages; and even Delitzsch's endeavor has not been able to prove the contrary, although it must be admitted that he was the first to bring about (in his *Jesurun sive Isagoge in Grammaticam et Lexicographiam Linguae Hebraeae* [Grimmæ, 1838]) some system and method in the comparison of these languages. Of still less value is the endeavor of E. Meier, who, in his *Hebr. Wurzelwörterbuch* (Mannheim, 1845), seeks to trace back the Shemitic trilateral stems to monosyllabic biliteral roots, and from their fundamental meanings to derive the meanings of our Hebrew words in their various modifications. "This," as Bleek remarks, "is an attempt which merits attention, although he certainly brings forward many things which are uncertain, and even improbable." Without enlarging any further upon this question, which is to this very day a matter of dispute, we will only mention those who made the subject a matter of investigation. Among those who believe in a relation between the Shemitic and Indo-European languages we mention Ewald (*Ausf. Lehrb. der hebr. Sprache* [8th ed. 1870], p. 31, Olshausen (*Lehrb. der hebr. Sprache*, 1861, p. 6 sq.); Lassen (*Indische Alterthumskunde* [2d ed.], i, 637 sq.); Lepsius, Schwartz, Benfey, and Bunsen, who, with the help of the Egyptian, tried to bring about the result; M. Müller and Steinthal, who believe not only in the possibility, but also in the probability, of such connection; Eugène Burnouf and Pictet, who admit it with some reserve. To these we may add the names of Ascoli, R. v. Raumer, Renan, and more especially that of Friedrich Delitzsch, who, in his work (the latest, so far as we know) *Studien über indogermanisch-semitische Wurzelverwandschaft* (Leips. 1873), has not only given a *résumé* of the labors of his predecessors and a list of their works, but has also taken up the subject of relationship. Whether his researches will bring more light into the chaos of opinions, and prove themselves more acceptable, is yet to be seen. See PHILOLOGY.

VI. *Literature*.—See, besides the articles "Shemitic Languages" in Kitto's *Cyclop.* and Smith's *Dictionary of the Bible*, the introductions of Bleek, Keil, and Hävernick; Renan, *Histoire Générale et Système Comparé des Langues Sémitiques* (4th ed. Paris, 1863); the literature as given in Delitzsch's *Studien*; the introductions to the Hebrew grammars of Gesenius, Böttcher, Preiswerk, and Bickell (Engl. transl. by Curtiss [Leips. 1877]). The literature on the different languages is found under their respective heads in this *Cyclopædia* and supplemented in this article. The more recent will be found in Friederici's *Bibliotheca Orientalis* (London, 1876-78). (B. P.)

Shemoneh Esreh (שמונה עשרה) is a collection of eighteen benedictions, called *Tephillah*, or prayer *kar'* ἐξοχήν, which every Israelite is bound to say every day. They constitute a very important part of the Jewish liturgy, and in their present form must have originated about A.D. 100, although many parts belong to the ante-Christian period. In the present form there are nineteen instead of eighteen, one having been added by Samuel the Little (q. v.) against the Sadducees, the so-called הצדוקים ברכת המינים, i. e. the prayer against the Minim, a name applied to Christians. These benedictions are as follows:

1. (ברוך) "Blessed art thou, O Lord our God, and the God of our fathers, the God of Abraham, the God of Isaac, and the God of Jacob, the great God! powerful and tremendous, the most high God! bountifully dispensing benefits, the Creator of all things; who, remembering the piety of the fathers, will send a redeemer to their posterity for his name's sake in love. Remember us unto life, O King! thou who delightest in life, and write us in the book of life for thy sake, O God of life. O King, thou art our Supporter, Saviour, and Protector. Blessed art thou, O Lord! the shield of Abraham."

2. (אתה גבור) "Thou, O Lord! art forever powerful; thou restorest life to the dead, and art mighty to save; sustaining by thy benevolence the living, and by thine abundant mercies animating the dead; supporting those that fall, healing the sick, setting at liberty those that are in bonds; and performing thy faithful words unto those that sleep in the dust? Who is like unto thee, O Lord! most mighty? or who may be compared with thee, the King who killeth and again restoreth life, and causeth salvation to flourish? Who is like unto thee, most merciful Father! who rememberest thy creatures to life. Thou art also faithful to revive the dead. Blessed art thou, O Lord, who revivest the dead."

3. (אתה קדוש) "Thou art holy, and holy is thy name, and the saints praise thee daily. Selah. Blessed art thou, O Lord, holy God! We will sanctify thy name in the world, as thy sanctifiers in the heavens above; as it is written by the hands of thy prophet, And one called unto another and said, Holy, Holy, Holy, O Lord of Hosts! the whole earth is full of his glory. And against each other with blessings they say, Blessed be the glory of the Lord, from his place. And in thy holy word thou hast written, saying, the Lord shall reign forever, thy God in Zion, from generation to generation. Praise ye the Lord. Unto all generations we will declare thy greatness, and to all eternity we will sanctify thy holiness; and thy praise, O our God! shall not depart from our mouths, for ever and ever: for thou art Almighty, great and holy King! blessed art thou, O Lord, the God most holy!"

4. (אתה חונן) "Thou favorest mankind with knowledge and teachest them understanding. Thou hast favored us with the knowledge of thy law, and thou hast taught us to perform the statutes of thy will; and thou hast made us a division, O Lord our God! between the holy and the profane, between light and darkness, between Israel and the nations, and between the seventh day and the six days of work. O our Father, our King! let us rest in peace on those days which approach towards us, free from all sins, and clean from all iniquities, and make us steadfast in thy fear. And let us be favored with knowledge, wisdom, and understanding. Blessed art thou, O Lord, the favorer of knowledge."

5. (השביני) "Return us, O our Father! to the observance of thy law, and draw us near, O our King! to thy service; and convert us to thee by perfect repentance. Blessed art thou, O Lord, who vouchsafest repentance."

6. (סלח) "Forgive us, we beseech thee, O our Father! for we have sinned; pardon us, O our King! for we have transgressed; for thou art ready to pardon and to forgive. Blessed art thou, O Lord! who art gracious, and ready to pardon."

7. (רצה) "Oh, look upon our afflictions, we beseech thee, and plead our cause; and redeem us speedily for the sake of thy name; for thou art a mighty Redeemer. Blessed art thou, O Lord! who redeemest Israel."

8. (רפאנו) "Heal us, O Lord! and we shall be healed; save us, and we shall be saved; for thou art our praise. Oh, grant us a perfect cure for all our wounds; for thou art an omnipotent King, a merciful and faithful physician. Blessed art thou, O Lord! who healest the diseases of thy people Israel."

9. (ברך עלינו) "O Lord our God! bless this year for us, as also every species of its fruits for our benefit; and bestow (in winter say, dew and rain for) a blessing upon the face of the earth. Oh, satisfy us with thy goodness, and bless this year as other good and fruitful years. Blessed art thou, O Lord! who blessest the years."

10. (תקע) "Oh, sound the great cornet, as a signal for our freedom; hoist the banner to collect our captives, so that we may all be gathered together from the four corners of the earth. Blessed art thou, O Lord! who gatherest together the outcasts of thy people Israel."

11. (השיבה) "Oh, restore our judges as aforetime, and our counsellors as at the beginning; remove from us sorrow and sighing. O Lord! reign thou alone over us in kindness and mercy; and justify us in judgment. Blessed art thou, O Lord! the King who loveth righteousness and justice."

12. (ולבמלשיננו) "And let there be no hope for the calumniators, let all heretics (Minim) speedily pass away, and let all thine enemies be cut off. Speedily root up, break down, and tear up the wicked, and lay them low speedily, in our days: blessed be the Lord, who breaketh down the enemies, and layeth low the wicked." (This prayer is altered in most editions of the Jewish Prayer-book.)

13. (על הצדוקים) "O Lord our God! may thy tender mercy be moved towards the just, the pious, and the elders of thy people, the house of Israel; the remnant of their scribes, the pious proselytes, as also towards us; and bestow a good reward unto all who faithfully put their trust in thy name; and grant that our portion may ever be with them, so that we may not be put to shame;

for we trust in thee. Blessed art thou, O Lord! who art the support and confidence of the just."

14. ילדו שלם "Oh, be mercifully pleased to return to Jerusalem, thy city; & dwell therein, as thou hast promised. Oh, rebuild it shortly, even in our days, a structure of everlasting fame, and speedily establish the throne of David thereon. Blessed art thou, O Lord! who rebuildest Jerusalem."

15. (אז צמר) "Oh, cause the offspring of thy servant David speedily to flourish, and let his horn be exalted in thy salvation; for we daily hope for thy salvation. Blessed art thou, O Lord! who causet the horn of salvation to flourish."

16. שמע קולנו "Hear our voice, O Lord our God! Oh, have compassion and mercy upon us, and accept our prayers with mercy and favor: for thou art omnipotent. Thou hearkenest to prayers and supplications, and from thy presence, O our King! dismiss us not empty; for thou hearest the prayers of thy people Israel in mercy. Blessed art thou, O Lord! who hearkenest unto prayers."

17. רצוה "Graciously accept, O Lord our God! thy people Israel, and have regard unto their prayers. Restore the service to the inner part of thine house; and accept of the burnt-offerings of Israel, and their prayers with love and favor. And may the service of Israel, thy people, be ever pleasing to thee. Oh that our eyes may behold thy return to Zion with mercy. Blessed art thou, O Lord! who restorest thy divine presence unto Zion."

18. (בידו) "We bow down before thee, because thou art Jehovah, our God, and the God of our fathers for ever and ever. The Rock of our lives, the Shield of our salvation art thou, from generation to generation. We will bless thee, and show forth thy praises for these our lives, which are in thy hand, and for our souls, which we commit to thee, and for thy wondrous works, which we witness every day; for thy marvellous doings and thy mercies at all times—evening, morning, and noon. Gracious God! because thy mercies are without bounds; merciful Lord! because thy kindnesses are never done, we trust in thee to all eternity."

19. (שום שלום) "Oh, grant peace, happiness, and blessing, grace, favor, and mercy unto us, and all thy people Israel; bless us, even all of us together, O our Father! with the light of thy countenance; for by the light of thy countenance hast thou given us, O Lord our God, the law of life, benevolent love, righteousness, blessing, mercy, life, and peace; and may it please thee to bless thy people Israel at all times with thy peace."

In the prayer-books of the so-called Reformed Jews, these benedictions and all such as allude to the bringing back to Jerusalem and to the Messiah have undergone very great changes. The first and last three are considered to be the most ancient. They are undoubtedly of the Sopherite age, and probably belong to the time of Simon the Just. The others belong to five or six epochs, extending over a period of three hundred years. The benedictions are mentioned in the Mishna, *Rosh hash-Shanah*, c. iv; *Berachoth*, iv, 3, *Tosiphta Berachoth*, c. iii; *Jerusalem Berachoth*, c. ii; *Megilla*, 17 a. See Zunz, *Gottesdienstliche Vorträge der Juden*, p. 367 sq.; Schürer, *Lehrbuch der neutestamentlichen Zeitgeschichte*, p. 499 sq. (B. P.)

Shem-Tob (שם טוב, i. e. good name), a name common to many Jewish writers, of whom we mention the following:

1. BEN-ABRAHAM IBN-GAON, a famous Cabalist, born 1283, died about 1332, the author of many Cabalistic works.

2. BEN-SHEM-TOB, who died in 1430, is the author of *ספר האמונות*, or the *Book of Faithfulness*, in which he attacks the Jewish philosophers Aben-Ezra, Maimonides, Levi ben-Gershon, etc., and denounces the students of philosophy as heretics, maintaining, however, that the salvation of Israel depends upon the Cabala. He also wrote *דברי חוריה על החוריה*, or homilies on the Pentateuch, the feasts and fasts, etc., in which the Cabalistic doctrines are fully propounded.

3. ISAAC SHAPRUT, a native of Tudela. He was a celebrated philosopher, physician, and Talmudist, and wrote, under the title of *אבן ברק*, *The Touchstone*, a polemical work against Christianity, inveighing bitterly against the doctrines of the Trinity, incarnation, transubstantiation, etc. One portion of the book consists

of a translation of Matthew's Gospel into Hebrew, said to be so unfairly performed that, among other faults, the names in the genealogy are grossly misspelled, and are therefore of no avail for comparison with the Old Test. To each chapter are subjoined questions for Christians to answer. An appendix to the work is called "Replies to Alfonso the Apostate." The MS. is still in Rome, and dated at Turiasso, Old Castile, 1340. He also wrote *Remarks on Aben-Ezra's Commentary on the Law* under the title *פננת פננת*, and *The Garden of Pomegranates*, *פרי מנין*, explaining the allegories of the Talmud.

See Fürst, *Bibl. Jud.* iii, 259, 265 sq.; De Rossi, *Dizionario Storico*, p. 289, 301 sq.; id. *Bibl. Jud. Antichrist.* p. 103 sq.; Ginsburg, *The Kabbalah*, p. 111, 122; Lindo, *History of the Jews in Spain*, p. 159; Finn, *Sephardim*, p. 308 sq.; Steinschneider, *Jewish Literature*, p. 127; Grätz, *Gesch. d. Juden*, viii, 23 sq.; Cassel, *Lehrbuch der jüd. Gesch. u. Literatur*, p. 283, 257, 302, 304, 316. (B. P.)

Shemu'el (Heb. *Shemu'el*, שְׁמוּאֵל, heard of God, the same as *Samuel* [q. v.]), the name of three Hebrews.

1. (Sept. Σαλαμούλ.) Son of Ammihud and commissioner from the tribe of Simeon, among those appointed by Moses to divide Palestine (Numb. xxxiv, 20). B.C. 1618.

2. (Sept. Σαμουήλ.) A more correct Anglicism (1 Chron. vi, 33) of the name of the prophet Samuel (q. v.).

3. (Sept. 'Ισαμουήλ.) A descendant of Tola, the son of Issachar, among the chiefs of that tribe in David's time (1 Chron. vii, 2). B.C. 1014.

Shen (Heb. with the art., *hash-Shén*, שֵׁן, the tooth; Sept. ἡ παλαία; Vulg. *Sen*), a place mentioned only in 1 Sam. vii, 12, defining the spot at which Samuel set up the stone Ebenezer to commemorate the rout of the Philistines. The pursuit had extended to "below Beth-car," and the stone was erected "between the Mizpah and between the Shen." The Targum has *Shinna*. The Peshito-Syriac and Arabic versions render both Beth-car and Shen by *Beit-Jasan*, evidently following the Sept., which appears to have read יָשָׁן, *yashan*, i. e. old. The name indicates not a village, but merely a sharp rock or conspicuous crag in the vicinity, like *Seneh* (1 Sam. xiv, 4). See EBENEZER.

Shena'zar (Heb. *Shenatstzar*, שְׁנַאצָר, fiery tooth [Gesenius], or splendid leader [Fürst]; Sept. Σαυαζάρ v. r. Σαυαζάρ), fourth named of the seven sons of king Jeconiah, or Jehoiakim, born during his captivity (1 Chron. iii, 18). B.C. post 606.

She'nir (Heb. *Shenir*, שְׁנִיר [so in Deut. iii, 9; Cant. iv, 8, but in 1 Chron. v, 23; Ezek. xxvii, 5, *Senir*, שְׁנִיר], Gesenius, "coat of mail, or cataract;" Fürst, "either a projecting mountain-peak or snow-mountain;" Sept. Σαβίρ v. r. Σεβίρ), the Amoritish name for the mountain in the north of Palestine (Deut. iii, 9; Ezek. xxvii) which the Hebrews called *Hermon*, and the Phœnicians *Sirion*; or perhaps it was a name rather for a portion of the mountain than for the whole. In 1 Chron. v, 23, and Cant. iv, 8, Hermon and it are mentioned as distinct. Abulfeda (ed. Köhler, p. 164, quoted by Gesenius) reports that the part of Antilebanon north of Damascus—that usually denominated *Jebel esh-Shurky*, "the Fast Mountain"—was in his day called *Senir*. The use of the word in Ezekiel is singular. In describing Tyre we should naturally expect to find the Phœnician name (*Sirion*) of the mountain employed, if the ordinary Israelitish name (*Hermon*) were discarded. That it is not so may show that in the time of Ezekiel the name of *Senir* had lost its original significance as an Amoritish name, and was employed without that restriction. The Targum of Joseph on 1 Chron. v, 23 (ed. Beck) renders *Senir* by מִשְׁנִיר פְּרִיז, of which the

most probable translation is "the mountain of the plains of the Perizzites." In the edition of Wilkins the text is altered to *מִן הַהָר הַזֶּה*, "the mountain that corrupteth fruits," in agreement with the Targums on Deut. iii, 9, though it is there given as the equivalent of Sirion. Which of these is the original it is perhaps impossible now to decide. The former has the slight consideration in its favor that the Hivites are specially mentioned as "under Mount Hermon," and thus may have been connected or confounded with the Perizzites; or the reading may have arisen from mere caprice, as that of the Samaritan version of Deut. iii, 9 appears to have done. See *ANTILIBANUS*.

Sheôl, שְׁאוֹל. This Hebrew name for "the place of departed spirits," and the "state of the dead," is used in a variety of senses by the writers of the Old Test., which it is desirable to investigate, referring to the articles *HELL, HADES*, etc., for the general opinions of the Jews respecting the continuance of existence after death.

I. Signification of the Word.—The word is usually said to be derived from *שָׁאַל*, *shaâl*, "to ask or seek," and may be supposed to have the same metaphorical signification as the *orcas rapax* of the Latins, or "the insatiable sepulchre" of English writers. This etymology, however, is rather uncertain, and no aid can be obtained from the cognate Semitic languages, for, though the word occurs in Syriac and Ethiopic, its use is too indeterminate to afford any clue to its origin. We are therefore left to determine its meaning from the context of the most remarkable passages in which it occurs.

The first is (Gen. xxxvii, 35): "And (Jacob) said, I will go down *into the grave* (*שְׁאוֹל*, *sheôlah*) unto my son mourning." The meaning of this passage is obviously given in the translation. There is rather more difficulty in Numb. xvi, 30, where Moses declares that Korah and his company shall go down alive into *sheôl* (*שְׁאוֹל*, *sheôlah*), and in ver. 33, which describes the fulfilment of the prophecy. But on referring to Deut. xxxii, 22, we find that *sheôl* is used to signify "the underworld." "For a fire is kindled in mine anger, and it shall burn to the lowest hell" (*שְׁאוֹל תִּחְיֶה*, *sheôl techi-thith*); to which the sequel gives the following parallelism: "It shall set on fire the foundations of the mountains." Hence it would appear that, in the description of Korah's punishment, *sheôl* simply means the interior of the earth, and does not imply a place of torment. In 2 Sam. xxii, 6 the English version stands thus: "The sorrows of hell compassed me about; the snares of death prevented me." The English word "hell" (from the Saxon *hela*, "to conceal") does not here mean a place of torment, as will at once appear from a literal translation of the passage in which the parallelism of the Hebrew is preserved. "The snares of *sheôl* (*שְׁאוֹל*, *sheôl*) encompassed me;" "The nets of death (*מִקְשֵׁי מָוֶת*, *môkeshéy mâveth*) came upon me." Thus viewed, it appears that "the snares of *sheôl*" are precisely equivalent to "the nets of death." In Job xi, 8, there seems to be an allusion to a belief—common among ancient nations—that there is a deep and dark abyss beneath the surface of the earth, tenanted by departed spirits, but not necessarily a place of torment:

Canst thou explore the deep things of God?
Canst thou comprehend the whole power of the Almighty?
Higher than heaven! What canst thou do?
Deeper than *sheôl*! What canst thou know?

Again (xxvi, 5, 6), in the description of God's omnipotence:

Sheôl is open before him,
And there is no covering for the region of the dead.

In Isa. xiv, 9, "*Sheôl* from beneath is moved for thee to meet thee at thy coming," the meaning of the prophet

is, that when the king of Babylon, whose miserable fate he is predicting, should go down into the underworld, or *sheôl*, the ghosts of the dead would there rise up to meet him with contumely and insult. Our English version in this passage renders *sheôl* "hell;" but, clearly, the place of torment cannot be meant, for it is said in ver. 18 that all the kings of the nations repose *in glory* there—that is, "rest in their sepulchres, surrounded by all the ensigns of splendor which the Eastern nations were accustomed to place around the bodies of deceased kings."

These and many other passages which might be quoted sufficiently prove that a belief in futurity of existence was familiar to the Hebrews, but that it was unfixed and indeterminate. It is difficult, and in some cases impossible, to determine whether the term *sheôl*, when used in a menacing form, implies the idea of future punishment or premature death. Hence, while we are led to conclude, with the Articles of the Church of England, that "the old fathers did not look merely to transitory promises," we see that only through the Gospel were "life and immortality brought to light."

II. Is *Sheôl* a Place?—According to the notions of the Jews, *sheôl* was a vast receptacle where the souls of the dead existed in a separate state until the resurrection of their bodies. The region of the blessed during this interval, or the inferior paradise, they supposed to be in the upper part of this receptacle; while beneath was the abyss, or *Gehenna* (Tartarus), in which the souls of the wicked were subjected to punishment.

The question whether this is or is not the doctrine of the Scriptures is one of much importance, and has, first and last, excited no small amount of discussion. It is a doctrine received by a large portion of the nominal Christian Church; and it forms the foundation of the Roman Catholic doctrine of Purgatory, for which there would be no ground but for this interpretation of the word *Hades*. The question, therefore, rests entirely upon the interpretation of this latter word. At the first view the classical signification would seem to support the sense above indicated. On further consideration, however, we are referred back to the Hebrew *sheôl*; for the Greek term did not come to the Hebrews from any classical source or with any classical meanings, but through the Sept. as a translation of their own word; and whether correctly translating it or not is a matter of critical opinion. The word *Hades* is, therefore, in no wise binding upon us in any classical meaning which may be assigned to it. The real question, therefore, is, what is the meaning which *sheôl* bears in the Old Test. and Hades in the New? A careful examination of the passages in which these words occur will probably lead to the conclusion that they afford no real sanction to the notion of an intermediate place of the kind indicated, but are used by the inspired writers to denote *the grave*—the resting-place of the bodies both of the righteous and the wicked; and that they are also used to signify *hell*, the abode of miserable spirits. But it would be difficult to produce any instance in which they can be shown to signify the abode of the spirits of just men made perfect, either before or after the resurrection.

As already seen, in the great majority of instances *sheôl* is, in the Old Test., used to signify the grave, and in most of these cases is so translated in the A. V. It can have no other meaning in such texts as Gen. xxxvii, 35; xlii, 38; 1 Sam. ii, 6; 1 Kings ii, 6; Job xiv, 13; xvii, 13, 16; and in numerous other passages in the writings of David, Solomon, and the prophets. But as the grave is regarded by most persons, and was more especially so by the ancients, with awe and dread as being the region of gloom and darkness, so the word denoting it soon came to be applied to that more dark and gloomy world which was to be the abiding-place of the miserable. Where our translators supposed the word to have this sense, they rendered it by "hell." Some of the passages in which this has been done may

be doubtful, but there are others of which a question can scarcely be entertained. Such are those (as Job xi, 8; Psa. cxxxix, 8; Amos ix, 3) in which the word denotes the opposite of heaven, which cannot be the grave nor the general state or region of the dead, but hell. Still more decisive are such passages as Psa. ix, 17; Prov. xxiii, 9; in which *sheol* cannot mean any place, in this world or the next, to which the righteous as well as the wicked are sent, but the penal abode of the wicked as distinguished from and opposed to the righteous. The only case in which such passages could, by any possibility, be supposed to mean the grave would be if the grave—that is, extinction—were the final doom of the unrighteous.

In the New Test. the word *ᾗδης* is used in much the same sense as *שְׁאוֹל* in the Old, except that in a less proportion of cases can it be construed to signify "the grave." There are still, however, instances in which it is used in this sense, as in Acts ii, 31; 1 Cor. xv, 55; but in general the Hades of the New Test. appears to be no other than the world of future punishments (e. g. Matt. xi, 23; xvi, 18; Luke xvi, 23).

The principal arguments for the intermediate Hades as deduced from Scripture are founded on those passages in which things "under the earth" are described as rendering homage to God and the Saviour (Phil. ii, 10; Rev. v, 13, etc.). If such passages, however, be compared with others (as with Rom. xiv, 10, 11, etc.), it will appear that they must refer to the day of judgment, in which every creature will render some sort of homage to the Saviour; but *then* the bodies of the saints will have been already raised, and the intermediate region, if there be any, will have been deserted.

One of the seemingly strongest arguments for the opinion under consideration is founded on 1 Pet. iii, 19, in which Christ is said to have gone and "preached to the spirits in prison." These spirits in prison are supposed to be the holy dead—perhaps the virtuous heathen—imprisoned in the intermediate place, into which the soul of the Saviour went at death that he might preach to them the Gospel. This passage must be allowed to present great difficulties. The most intelligible meaning suggested by the context is, however, that Christ by his spirit preached to those who in the time of Noah, while the ark was preparing, were disobedient, and whose spirits were thus in prison awaiting the general deluge. Even if that prison were Hades, yet what Hades is must be determined by other passages of Scripture; and, whether it is the grave or hell, it is still a prison for those who yet await the judgment-day. This interpretation is in unison with other passages of Scripture, whereas the other is conjecturally deduced from this single text. See SPIRITS IN PRISON.

Another argument is deduced from Rev. xx, 14, which describes "death and Hades" as "cast into the lake of fire" at the close of the general judgment—meaning, according to the advocates of the doctrine in question, that Hades should then cease as an intermediate place. But this is also true if understood of the grave, or of the general intermediate condition of the dead, or even of hell, as once more and forever reclaiming what it had temporarily yielded up for judgment—just as we every day see criminals brought from prison to judgment, and, after judgment, returned to the prison from which they came.

It is further urged, in proof of Hades being an intermediate place other than the grave, that the Scriptures represent the happiness of the righteous as incomplete till after the resurrection. This must be admitted; but it does not thence follow that their souls are previously imprisoned in the earth, or in any other place or region corresponding to the Tartarus of the heathen. Although at the moment of death the disembodied spirits of the redeemed ascend to heaven and continue there till the resurrection, it is very possible that their happiness shall be incomplete until they have received

their glorified bodies from the tomb and entered upon the full rewards of eternity.

On this subject, see Dr. Enoch Pond, *On the Intermediate Place, in American Biblical Repository* for April, 1841, whom we have here chiefly followed; comp. Knapp, *Christian Theology*, § 104; Meyer, *De Notione Orci ap. Hebræos* (Lub. 1793); Bahrens, *Freimüthige Unters. über d. Orkus d. Hebräer* (Halle, 1786); Witter, *De Purgatorio Judæorum* (Helms. 1704); *Journ. Sac. Lit.* Oct. 1856.

Shepard, David A., a minister of the Methodist Episcopal Church, was born in Augusta, Oneida Co., N. Y., June 2, 1802. He professed conversion in his sixteenth year, and received license as a local preacher when twenty. In 1824 he was admitted on trial in the Genesee Conference. During his active ministry he served as presiding elder on the Chenango, Cayuga, Susquehanna, and Wyoming districts; and also five years as chaplain to Auburn state-prison. In 1873 he took a superannuated relation, which he held until his death, at Washington, D. C., Oct. 8, 1876. He was for some time previous a member of the Wyoming Conference. See *Minutes of Annual Conferences*, 1877, p. 59.

Shepard, Hiram, a minister of the Methodist Episcopal Church, was born in Turin, Lewis Co., N. Y., July 8, 1804, and at the age of eighteen he made a profession of religion. In 1830 he was licensed to preach, and was admitted into the Black River Conference. He continued to be actively engaged in preaching until his death, which occurred at Malone, N. Y., May 25, 1863. He was an able defender of the truth and an impressive minister. See *Minutes of Annual Conferences*, 1863, p. 115.

Shepard, Lewis Morris, a Presbyterian minister, was born in Potsdam, St. Lawrence Co., N. Y., in 1810. He was converted at the age of sixteen; was educated at the Oneida Institute at Whitesborough, N. Y.; studied theology privately; was licensed to preach by Watertown Presbytery, Aug. 29, 1838, and ordained and installed by the same body at Theresa, Jefferson Co., N. Y., in February, 1839. In that vicinity he preached for twelve years, occupying different localities, at Theresa and Plesis, then at Champion, Smithville, and North Adams. In 1850 he united with the Albany Presbytery and supplied the Church at Tribe's Hill until 1852, when he removed to Monroe, Fairfield Co., Conn., where he labored until 1858, when he became pastor of the Church in Huron, Wayne Co., N. Y. In every place where he labored he had more or less evidence that his work was owned by the Master of the vineyard. He died Oct. 16, 1863. Mr. Shepard was an earnest, diligent, and self-denying minister of Christ. See Wilson, *Presb. Hist. Almanac*, 1865, p. 170. (J. L. S.)

Shepard, Mase, a Congregational minister, was born May 28, 1759. When about twenty-one years of age he was led to Christ, and immediately his thoughts were turned towards the ministry. He prepared for college under the direction of the Rev. William Conant, of Lyme, N. H., entered Dartmouth College in 1781, and graduated in 1785. He then studied theology with Rev. Ephraim Judson, of Taunton, and on Sept. 19, 1787, was settled at Little Compton, R. I. He died in perfect calmness after a short illness, Feb. 14, 1821. See Sprague, *Annals of the Amer. Pulpit*, ii, 265.

Shepard, Samuel (1), M.D., a Baptist minister, was born in Salisbury, Mass., June 22, 1739. He studied medicine, settled as a practicing physician at Brentwood, N. H., and soon became distinguished in his profession. He then turned his attention to preaching, and in 1771 became pastor of three churches, at Stratham, Brentwood, and Nottingham, which he had formed. He was one of the most active and honored ministers of his denomination, and continued his labors until his death, Nov. 4, 1815. He published a number of tracts and pamphlets. See Sprague, *Annals of the Amer. Pulpit*, vi, 135.

Shepard, Samuel (2), D.D., a Congregational minister, was born in Portland, Conn., November, 1772. He graduated at Yale College in 1793, and was ordained, April 30, 1795, pastor in Lenox, Mass., where he remained until the close of his life. He was a member of the corporations of Middlebury and Williams colleges and vice-president of the latter until his death, Jan. 5, 1846. He published a few occasional sermons. See Sprague, *Annals of the Amer. Pulpit*, ii, 364.

Shepard, Thomas, a Congregational minister, was born at Towcester, near Northampton, England, Nov. 5, 1605. His father was a decided Puritan, inasmuch that he removed to another town for the sole purpose of enjoying what he considered an evangelical ministry. Thomas entered Emanuel College, Cambridge, as a pensioner, in 1619, and while in college, after a very severe struggle, found peace in Christ. He took the degree of B.A. in 1623, and completed his course of study in 1625. In 1627, after receiving his M.A., he was appointed lecturer in Earles-Colne, Essex. He remained, laboring with great success, for three years and six months. On Dec. 16, 1630, he was summoned to London to answer before bishop Laud for alleged irregular conduct, and was by him forbidden to exercise any ministerial function in his diocese. Examining the various usages and ceremonies to which he was required to conform, he was less disposed to adhere to the Establishment than ever. Summoned a second time before the bishop, he was required by him to immediately leave the place. He now entered the family of Sir Richard Darley, in Yorkshire, as chaplain, where he remained about a year, and then accepted an invitation to Heddon, Northumberland, where he also remained about a year. Owing to his Nonconformist principles, he was greatly persecuted, with difficulty avoiding arrest, until Aug. 10, 1635, when he and his family embarked for America. He arrived in Boston Oct. 2, 1635, and took up his residence in Newtown (now Cambridge), Mass. Here he became pastor of a newly organized Church, Feb. 1, 1636, of which he continued to be the pastor until his death. Mr. Shepard soon became involved in the famous Antinomian controversy, and was one of the most active members of the noted synod by which the storm was finally quelled. There is also good reason to believe that he had an important agency in originating and carrying forward the measures resulting in the establishment of Harvard College. He died Aug. 25, 1649. Johnson speaks of him as "that gracious, sweet, heavenly-minded, and soul-ravishing minister," which testimony is sustained by that of many others. The following are some of his works: *New England's Lamentation for Old England's Errors* (Lond. 1645, 4to);—*Theses Sabbaticæ* (ibid. 1649);—*Of Liturgies*, etc. (1653).—*Parable of the Ten Virgins Opened and Applied* (1659, fol.). A collective edition of his works, with a memoir, was published by the Doctrinal Tract and Book Society (Boston, 1833, 3 vols. 12mo). For a full list of his works, see Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Sprague, *Annals of the Amer. Pulpit*, i, 59.

She'pham (Heb. *Shepham'*, שֶׁפְּחָם, *fruitful* [Gesen.], or *bare* [Fürst]; Sept. Σαφαμ [running it on into the following word, with the פ directive]), a place mentioned only in the specification by Moses of the eastern boundary of the Promised Land (Numb. xxxiv, 10, 11), the first landmark from Hazer-enan, at which the northern boundary terminated, and lying between it and Riblah. The ancient interpreters (Targ. Pseudo-Jon., Saadia) render the name by *Apameia*; but it seems uncertain whether by this they intend the Greek city of that name on the Orontes, fifty miles below Antioch, or whether they use it as a synonym of Baniyas or Dan, as Schwarz affirms (*Palest.* p. 27). No trace of the name appears, however, in that direction. Porter (*Damascus*, ii, 354) would fix Hazer-enan at Kuretein, seventy miles east-northeast of Damascus,

which would remove Shepham into a totally different region, in which there is equally little trace of it.—Smith. The Riblah mentioned in the above passage was not the city of that name in the land of Hamath (see Keil, *Comment.* ad loc.), but a much more southern one. See RIBLAH. The other more definitely known localities adjoining seem to point out a position for Shepham not far from the later Cæsarea-Philippi (q. v.).

Shephard, PAUL, a Presbyterian minister, was born in Fayette, N. Y., June 3, 1803. He was educated at Oberlin College, studied theology in the same institution, was licensed and ordained by the Oberlin Association in 1839, and preached at the following places: Richmond and Allegan, Mich.; in 1846 at Medina, Mich.; in 1851 at Dover, Mich. In 1856 he visited Kansas Territory and established a Church at Tecumseh, and was one of the original members of Kansas Presbytery. In 1859 he returned to Monroe Presbytery, and was stated supply for the Church at Dover and Clayton, Mich. Here he labored until his death, Nov. 9, 1860. See Wilson, *Presb. Hist. Almanac*, 1862, p. 195.

Shephathi'ah (1 Chron. ix, 8). See SHEPHATHIAH.

Shephati'ah (Heb. *Shephatyah'*, שֶׁפְּתִיָּה [thrice in the prolonged form *Shephutya'hu*, שֶׁפְּטִיָּה, 1 Chron. xii, 5; xxvii, 16; 2 Chron. xxi, 2], *Judged of Jehovah*; Sept. Σαφαρία v. r. Σαφαριας, etc.), the name of a considerable number of Israelites.

1. The Haruphite (or descendant of Hareph), and one of the Benjamite warriors who joined David at Ziklag (1 Chron. xii, 5). B.C. 1054.

2. The fifth son of David, born of his wife Abital during his reign in Hebron (2 Sam. iii, 4; 1 Chron. iii, 3). B.C. cir. 1050.

3. Son of Maachah, and phylarch of the Simeonites in the time of David (1 Chron. xxvii, 16). B.C. 1014.

4. Last named of the six brothers of Jehoram, the son of king Jehoshaphat, whom their father endowed richly (2 Chron. xxi, 2). B.C. 887.

5. Son of Mahalaleel and father of Amariah, ancestors of Athaiah of the family of Pharez, son of Judah (Neh. xi, 4). B.C. long ante 536.

6. Son of Reuel and father of Meshullam, the Benjamite chieftain at the time of the captivity (1 Chron. ix, 5, A. V. "Shephathiah"). B.C. ante 588. See No. 8.

7. Son of Mattan, and one of the princes who advised Zedekiah to put Jeremiah to death (Jer. xxxviii, 1). B.C. 589.

8. An Israelite whose descendants (or perhaps a place whose inhabitants) to the number of three hundred and seventy-two returned with Zerubbabel from Babylon (Ezra ii, 4; Neh. vii, 9). B.C. ante 536. He is apparently the same with him whose descendants to the number of eighty males returned, under the leadership of Zebadiah, with Ezra (Ezra viii, 8). Whether he was identical with No. 6 is uncertain.

9. One of "Solomon's servants" whose descendants returned from Babylon under Zerubbabel (Ezra ii, 57; Neh. vii, 59). B.C. ante 536.

Shephelah, THE (שֶׁפְּלָה, *hash-Shephelah'*, the low; Sept. ἡ Σαφαλά, 1 Macc. xii, 38; Jerome, *Shephela*, in *Onomast.*), the native name for the southern division of the low-lying, flat district which intervenes between the central highlands of the Holy Land and the Mediterranean, the other and northern portion of which was known as Sharon. The name occurs throughout the topographical records of Joshua, the historical works, and the topographical passages in the prophets, always with the article prefixed, and always denoting the same region (Deut. i, 7; Josh. ix, 1; x, 40; xi, 2, 16 a; xii, 8; xv, 33; Judg. i, 9; 1 Kings x, 27; 1 Chron. xxvii, 28; 2 Chron. i, 15; ix, 27; xxvi, 10; xxviii, 18; Jer. xvii, 26; xxxii, 44; xxxiii, 13; Obad. 19; Zech. vii, 7). So absolute is this usage that in the single instance in which the word stands without the article (Josh. xi, 16 b) it evi-

dently does not denote the region referred to above, but the plains surrounding the mountains of Ephraim. In each of the above passages, however, the word is treated in the A. V. not as a proper name, analogous to the *Campagna*, the *Wolds*, the *Carse*, but as a mere appellative, and rendered "the vale," "the valley," "the plain," "the low plains," and "the low country." How destructive this is to the force of the narrative may be realized by imagining what confusion would be caused in the translation of an English historical work into a foreign tongue if such a name as "the Downs" were rendered by some general term applicable to any other district in the country of similar formation. Fortunately the book of Maccabees has redeemed our version from the charge of having entirely suppressed this interesting name. In 1 Macc. xii, 38, the name *Sephela* is found, though even here stripped of the article, which was attached to it in Hebrew, and still accompanies it in the Greek of the passage. Whether the name is given in the Hebrew Scriptures in the shape in which the Israelites encountered it on entering the country, or modified so as to conform it to the Hebrew root שֶׁפֶלָה, *shaphál*, "to be low," and thus (according to the constant tendency of language) bring it into a form intelligible to Hebrews, we shall probably never know. The root to which it is related is in common use both in Hebrew and Arabic. In the latter it has originated more than one proper name—as *Mespila*, now known as *Koyunjik*; *el-Mesfile*, one of the quarters of the city of Mecca (Burckhardt, *Arabia*, i, 203, 204); and Seville, originally *Hi-spalis*, probably so called from its wide plain (Arias Montano, in Ford, *Hand-book for Spain*). The name Shephelah is retained in the old versions, even those of the Samaritans, and rabbi Joseph on Chronicles (probably as late as the 11th century). It was actually in use down to the 5th century. Eusebius, and after him Jerome (*Onomast.* s. v. "Sephela," and *Comm. on Obad.*), distinctly state that "the region round Eleutheropolis on the north and west was so called." In his comment on Obadiah, Jerome appears to extend it to Lydda and Emmaus-Nicopolis; and, at the same time, to extend Sharon so far south as to include the Philistine cities. A careful investigation might not improbably discover the name still lingering about its ancient home even at the present day. See PLAIN.

No definite limits are mentioned to the Shephelah, nor is it probable that there were any. In the list of Joshua (xv, 33-47) it contains forty-three "cities," as well as the hamlets and temporary villages dependent on them. Of these, so far as our knowledge avails us, the most northern was Ekron, the most southern Gaza, and the most eastern Nezib (about seven miles north-northwest of Hebron). A large number of these towns, however, were situated not in the plain, nor even on the western slopes of the central mountains, but in the mountains themselves. See JARMUTH; KEILAH; NEZIB, etc. This seems to show either that, on the ancient principle of dividing territory, one district might intrude into the limits of another, or, which is more probable, that, as already suggested, the name Shephelah did not originally mean a lowland, as it came to do in its accommodated Hebrew form. The Shephelah was, and is, one of the most productive regions in the Holy Land. Sloping, as it does, gently to the sea, it receives every year a fresh dressing from the materials washed down from the mountains behind it by the furious rains of winter. This natural manure, aided by the great heat of its climate, is sufficient to enable it to reward the rude husbandry of its inhabitants, year after year, with crops of corn which are described by travellers as prodigious. Thus it was in ancient times the corn-field of Syria, and as such the constant subject of warfare between Philistines and Israelites, and the refuge of the latter when the harvests in the central country were ruined by drought (2 Kings viii,

1-3). But it was also, from its evenness, and from its situation on the road between Egypt and Assyria, exposed to continual visits from foreign armies, visits which at last led to the destruction of the Israelitish kingdom. In the earlier history of the country the Israelites do not appear to have ventured into the Shephelah, but to have awaited the approach of their enemies from thence. Under the Maccabees, however, their tactics were changed, and it became the field where some of the most hardly contested and successful of their battles were fought. These conditions have scarcely altered in modern times. Any invasion of Palestine must take place through the maritime plain, the natural and only road to the highlands. It did so in Napoleon's case. The Shephelah is still one vast corn-field, but the contests which take place on it are now reduced to those between the oppressed peasants and the insolent and rapacious officials of the Turkish government, who are gradually putting a stop by their extortions to all the industry of this district, and driving active and willing hands to better-governed regions.—Smith. See JUDAH, TRIBE OF.

This tract, as above intimated, comprises not so much the mere maritime plain, but rather the lower range or spurs of the Judean hills on the Mediterranean side. It consists, in fact, of low hills, about five hundred feet above the sea, of white, soft limestone, with great bands of beautiful brown quartz running between the strata. The broad valleys among these hills, forming the entrance to the hill-country proper, produce fine crops of corn, and on the hills olive-groves flourish better than in either of the adjoining districts. This part of the country is also the most thickly populated, and ancient wells, and occasionally fine springs, occur throughout. The villages are partly of stone, partly of mud; the ruins are so thickly spread over hill and valley that in some parts there are as many as three ancient sites to two square miles. All along the base of these hills, commanding the passes to the mountains, important places are to be found, such as Gath and Gezer, Emmaus and Beth-horon, and no part of the country is more rich in Biblical sites or more famous in Bible history (Conder, *Tent Work in Palestine*, i, 10). See TOPOGRAPHICAL TERMS.

Shepherd (usually רֹעֵה, *roêh*, a feeder, ποιμήν; but substantially denoted also by בּוֹקֵר, *bokêr*, a "herdman," Amos vii, 14; and by נֹקֵד, *nokêd*, a "sheep-master," 2 Kings iii, 4; "herdman," Amos i, 1). In a nomadic state of society, every man, from the sheik down to the slave, is more or less a shepherd. As many regions in the East are adapted solely to pastoral pursuits, the institution of the nomad life, with its appliances of tents and camp equipage, was regarded as one of the most memorable inventions (Gen. iv, 20). The progenitors of the Jews in the patriarchal age were nomads, and their history is rich in scenes of pastoral life. The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (xxx, 29 sq.; xxxvii, 12 sq.), but even by their daughters (xxix, 6 sq.; Exod. ii, 19). The Egyptian captivity did much to implant a love of settled abode, and consequently we find the tribes which still retained a taste for shepherd life selecting their own quarters apart from their brethren in the Transjordanic district (Numb. xxxii, 1 sq.). Henceforward in Palestine proper the shepherd held a subordinate position; the increase of agriculture involved the decrease of pasturage; and though large flocks were still maintained in certain parts, particularly on the borders of the wilderness of Judah, as about Carmel (1 Sam. xxv, 2), Bethlehem (xvi, 11; Luke ii, 8), Tekoah (Amos i, 1), and, more to the south, at Gedor (1 Chron. iv, 39), the nomad life was practically extinct, and the shepherd became one out of many classes of the laboring population. The completeness of the transition from the pastoral to the agricultural state is strongly exhibited in those passages which allude to the presence of the shep-

herd's tent as a token of desolation (e. g. Ezek. xxv, 4; Zeph. ii, 6). The humble position of the shepherd at the same period is implied in the notices of David's wondrous elevation (2 Sam. vii, 8; Psa. lxxviii, 70), and again in the self-deprecating confession of Amos (vii, 14). The frequent and beautiful allusions to the shepherd's office in the poetical portions of the Bible (e. g. Psa. xxxiii; Isa. xl, 11; xlix, 9, 10; Jer. xxiii, 3, 4; Ezek. xxxiv, 11, 12, 23), rather bespeak a period when the shepherd had become an ideal character, such as the Roman poets painted the pastors of Arcadia. See PASTURE.

The office of the Eastern shepherd, as described in the Bible, was attended with much hardship and even danger. He was exposed to the extremes of heat and cold (Gen. xxxi, 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sycamore," or Egyptian fig (Amos vii, 14), the "husks" of the carob-tree (Luke xv, 16), or perchance the locusts and wild honey which supported the Baptist (Matt. iii, 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii, 34; Isa. xxxi, 4; Jer. v, 6; Amos iii, 12); nor was he free from the risk of robbers or predatory hordes (Gen. xxxi, 39). To meet these various foes the shepherd's equipment consisted of the following articles: a mantle, made probably of sheep-skin with the fleece on, which he turned inside out in cold weather, as implied in the comparison in Jer. xliii, 12 (comp. Juv. xiv, 187); a scrip or wallet, containing a small amount of food (1 Sam. xvii, 40; Porter, *Damascus*, ii, 100); a sling, which is still the favorite weapon of the Bedawi shepherd (1 Sam. xvii, 40; Burckhardt, *Notes*, i, 57); and, lastly, a staff, which served the double purpose of a weapon against foes and a crook for the management of the flock (1 Sam. xvii, 40; Psa. xxxiii, 4; Zech. xi, 7). If the shepherd was at a distance from his home, he was provided with a light tent (Cant. i, 8; Jer. xxxv, 7), the removal of which was easily effected (Isa. xxxviii, 12). In certain localities, moreover, towers were erected for the double purpose of spying an enemy at a distance and protecting the flock; such towers were erected by Uzziah and Jotham (2 Chron. xxvi, 10; xxvii, 4), while their existence in earlier times is testified by the name Migdal-Eder (Gen. xxxv, 21, A. V. "tower of Eder"; Micah iv, 8, A. V. "tower of the flock"). See TOWER.

The routine of the shepherd's duties appears to have been as follows: in the morning he led forth his flock from the fold (John x, 4), which he did by going before them and calling to them, as is still usual in the East; arrived at the pasturage, he watched the flock with the assistance of dogs (Job xxx, 1), and, should any sheep stray, he had to search for it until he found it (Ezek. xxxiv, 12; Luke xv, 4); he supplied them with water, either at a running stream or at troughs attached to wells (Gen. xxix, 7; xxx, 38; Exod. ii, 16; Psa. xxxiii, 2); at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them "under the roll" as they entered the door of the enclosure (Lev. xxvii, 32; Ezek. xx, 37), checking each sheep as it passed by a motion of the hand (Jer. xxxiii, 13); and, finally, he watched the entrance of the fold throughout the night, acting as porter (John x, 3). We need not assume that the same person was on duty both by night and by day; Jacob, indeed, asserts this of himself (Gen. xxxi, 40), but it would be more probable that the shepherds took it by turns, or that they kept watch for a portion only of the night, as may possibly be implied in the expression in Luke ii, 8, rendered in the A. V. "keeping watch," rather "keeping the watches" (φύλασσοντες φυλακάς). The shepherd's office thus required great watchfulness, particularly by night (Luke ii, 8; comp. Nah. iii, 18). It also required tenderness towards the young and

feeble (Isa. xl, 11), particularly in driving them to and from the pasturage (Gen. xxxiii, 13). In large establishments there were various grades of shepherds, the highest being styled "rulers" (xlvii, 6) or "chief shepherds" (1 Pet. v, 4); in a royal household the title of מַבְרִיר, *abbir*, "mighty," was bestowed on the person who held the post (1 Sam. xxi, 7). Great responsibility attached to the office; for the chief shepherd had to make good all losses (Gen. xxxi, 39); at the same time he had a personal interest in the flock, inasmuch as he was not paid in money, but received a certain amount of the produce (xxx, 32; 1 Cor. ix, 7). The life of the shepherd was a monotonous one; he may perhaps have whiled away an hour in playing on some instrument (1 Sam. xvi, 18; Job xxi, 12; xxx, 31), as his modern representative still occasionally does (Wortabet, *Syria*, i, 234). He also had his periodical entertainments at the shearing-time, which was celebrated by a general gathering of the neighborhood for festivities (Gen. xxxi, 19; xxxviii, 12; 2 Sam. xiii, 23); but, generally speaking, the life must have been but dull. Nor did it conduce to gentleness of manners; rival shepherds contended for the possession or the use of water with great acrimony (Gen. xxi, 25; xxvi, 20 sq.; Exod. ii, 17); nor perhaps is this a matter of surprise, as those who come late to a well frequently have to wait a long time until their turn comes (Burckhardt, *Syria*, p. 63). See SHEEP.

Large flocks of sheep and goats often constituted the chief wealth of patriarchal times. Job possessed seven thousand sheep (Job i, 3), and Nabal three thousand sheep and a thousand goats (1 Sam. xxv, 2). At the present day both sheep and goats usually intermingle in the same flock for pasturage, in the valleys and on the hills of Palestine (Gen. xxx, 35). In one Arab encampment Prof. Robinson saw about six hundred sheep and goats, the latter being the most numerous; and the process of milking was going on at four o'clock in the morning. The Arabs have few cows. In Deut. xxxii, 14, Moses, in his farewell song, represents Jehovah as having fed Israel with "butter of kine and milk of sheep;" and the apostle asks, "Who feedeth a flock, and eateth not of the milk of the flock?" (1 Cor. ix, 7). "It shall come to pass in that day that a man shall nourish a young cow and two sheep; and it shall come to pass, for the abundance of milk that they shall give, that he shall eat butter: for butter and honey shall every one eat that is left in the land" (Isa. vii, 21, 22). Here the milk is the production of the sheep as well as of the cow. See MILK.

The hatred of the Egyptians towards shepherds (Gen. xlvii, 34) may have been mainly due to their contempt for the sheep itself, which appears to have been valued neither for food (Plutarch, *De Is.* 72) nor generally for

Sheep-milking and Butter-making in Egypt.

sacrifice (Herod. ii, 42), the only district where they were offered being about the Natron lakes (Strabo, xvii, 803). It may have been increased by the memory of the shepherd invasion (Herod. ii, 128). Abundant confirmation of the fact of this hatred is supplied by the low position which all herdsmen held in the castes of Egypt, and by the caricatures of them in Egyptian paintings (Wilkinson, ii, 169). See HYKSOS.

The term "shepherd" is applied in a metaphorical sense to princes (Isa. xlii, 28; Jer. ii, 8; iii, 15; xxii, 22; Ezek. xxxiv, 2, etc.), prophets (Zech. xi, 5, 8, 16), teachers (Eccles. xii, 11), and to Jehovah himself (Gen. xlii, 24; Psa. xxiii, 1; lxxx, 1); to the same effect are the references to "feeding" in Gen. xlviii, 15; Psa. xxviii, 9; Hos. iv, 16. The prophets often inveigh against the shepherds of Israel, against the kings who feed themselves and neglect their flocks; who distress, ill-treat, seduce, and lead them astray (see Ezek. xxxiv, 10 sq.; Numb. xxvii, 17; 1 Kings xxii, 17; Isa. xl, 11; xlv, 28; Judith xi, 15). See PASTOR.

Shepherd of HERMAS. A book entitled *The Shepherd*, ascribed to Hermas, who is mentioned by Paul in his Epistle to the Romans, became generally known about the middle of the 2d century. For an account of its contents, credibility, etc., see HERMAS.

Shepherd, ORDER OF THE GOOD. The "Sisters of Our Lady of Charity," or "Eudist Sisters," were founded at Caen, in Normandy, in 1641, by abbé Jean Eudes. In 1835 a modification of the rule enabling them to take charge of penitent women was introduced at Angers, the establishment there becoming known as the "House of the Good Shepherd." They were introduced into the United States in 1849. The "Sisters of Our Lady of the Good Shepherd," and "Sisters of the Good Shepherd," and "Religious of the Good Shepherd," are apparently of the same congregation, which, under one or the other of these names, is reported from fourteen establishments in nine states. These are in New York, Buffalo, and Brooklyn, N. Y.; two in Philadelphia, Pa.; Baltimore, Md.; New Orleans, La.; Cincinnati, Cleveland, and Franklin, O.; Louisville, Ky.; St. Louis, Mo.; Chicago, Ill.; St. Paul, Minn. They have Magdalen asylums for maidens, industrial schools for reclaiming young truant girls, protectories for young girls, reformatories for girls, and parochial schools. The number of sisters, novitiates, and lay-sisters is probably from 350 to 400, with 2500 or more penitents and girls under their charge. The "Third Order of St. Teresa, composed of reformed penitents who remain for life," and reported in New York and St. Louis, appears to be under the supervision and patronage of this community. See Barnum, *Romanism*, etc., p. 328.

Shepherd, Jacob R., a Methodist Episcopal minister, was born near Halifax, Pa., April 3, 1788. He was converted in 1814, admitted into the itinerancy in the Baltimore Conference in 1821, and served the Church effectively until 1830, when his health gave way, and he took a superannuated relation. As his strength permitted, he still went about doing good. He died Sept. 4, 1846. Mr. Shepherd possessed powers of mind above mediocrity, was a good and useful preacher, and died in the faith. See *Minutes of Annual Conferences*, iv, 100.

Shepherd, James, a minister of the Methodist Episcopal Church, was born in Westfield, Mass., Dec. 14, 1802. In 1833 he was received on trial into the New England Conference, was ordained deacon in 1835, and elder in 1837. He continued to labor without intermission until seized with an illness which terminated his life, May 22, 1855. See *Minutes of Annual Conferences*, 1856, p. 41.

Shepherd, John, a minister of the Methodist Episcopal Church, was born in Pennsylvania Nov. 7, 1789. He was licensed to preach in Illinois about 1823, and received on trial into the Illinois Conference in 1836. His ministerial labor lasted twenty-four years; and in 1860 the Southern Illinois Conference granted him a superannuated relation. He died about twenty days

after, in November, 1860. He was "a faithful minister, remarkable for his punctuality, and greatly beloved." See *Minutes of Annual Conferences*, 1861, p. 217.

Shepherd, Moses, a minister of the Methodist Episcopal Church, was admitted into the Illinois Conference in 1851. Of frail health, he husbanded his powers, and was thus able to somewhat extend his labors. He died (while presiding elder of the Jonesborough District, Southern Illinois Conference) Sept. 20, 1862. See *Minutes of Annual Conferences*, 1862, p. 211.

Shepherd, Vincent, a Methodist Episcopal minister, was born in Wantage, Sussex Co., N. J., October, 1808. He was licensed to exhort Nov. 4, 1832; and as local preacher, Feb. 23, 1833. In the same year he was received on trial in the Philadelphia Conference, and appointed to Milford Circuit; in 1834 to Essex, in 1835 to Rockaway, in 1836 to Easton, and in 1837 ordained elder and appointed to Smyrna. In 1838-39 he was transferred to the New Jersey Conference, and stationed in Plainfield; in 1840, Belvidere; in 1841, New Brunswick; in 1842-43, Jersey City; and in 1844-45, Rahway, where his health failed, and he took a supernumerary relation. He died July 1, 1848. Mr. Shepherd was a good preacher, a diligent student, and a faithful pastor. See *Minutes of Annual Conferences*, iv, 320.

Shepherd-kings, a series of foreign rulers in Egypt, whose domination must have occurred about the time of the sojourn of the Hebrews there. The relation of these two classes to each other, and to the other Egyptians, is so interesting, if not intimate, especially to the Biblical student, that our treatment of the subject under EGYPT and HYKSOS requires a somewhat fuller consideration of this topic. The discussion of it began as early as the days of Josephus, who, in fact, gives us, in two controversial passages, nearly all the information we possess on the question. He professes to cite the exact words of Manetho, and says, in substance (*Aptm*, i, 14, 15), that the Hyksos (a name which he etymologically interprets as meaning "Shepherd-kings") were an ignoble people, who invaded Egypt from the East (evidently meaning that they were Arabs) during the reign of Timaüs (a king nowhere else mentioned), and eventually established one of themselves, named Salatis, king at Memphis, who founded a city on the Bubastic arm of the Nile, called Avaris, as a barrier against the Assyrians; but that after a domination of 511 years these people were attacked by "the kings of Thebais and the other parts of Egypt" (language which proves the contemporaneity of the Theban line at least), who, under a king named Alisphragmuthosis, subdued them, and that his son Thummosis finally drove them out of the country. The extract from Manetho further states that these refugees were the builders of Jerusalem, a statement with which Josephus joins issue, as identifying them with the Hebrews; but the language may, perhaps, be referred to the Canaanites who fortified Jebus in the interval between the Exodus and the time of David. Josephus then proceeds to recount the kings of Egypt after the expulsion of the Hyksos, beginning with Tethmosis; and the list is evidently that of Manetho's eighteenth dynasty beginning with Amosis. In the other passage (*ibid*, 26), Josephus cites a story from Manetho to the effect that the Jewish lawgiver, Moses, was the same as a priest, Osarsiph of Heliopolis, whom a degraded leprous caste of the Egyptians made their ruler in an insurrection, and invited the escaped Shepherds back to Egypt, where they ravaged the country and committed all sorts of atrocities. The Egyptian king under whom this revolt occurred is given as Amenophis, the father of Sethos-Rameses, and the son of Rhampses, names which clearly point to Menephtah I, of the nineteenth dynasty. The narrative goes on to state, however, that as soon as Amenophis, who at the time of the outbreak was absent in Ethiopia, returned with his army, he totally defeated and expelled the rebels. This

account, of course, Josephus violently controverts; but there is no occasion to doubt its accuracy except as to the evidently malicious and arbitrary identification of these leprous insurrectionists with the Hebrews. The most casual reader cannot fail, as Josephus intimates, to note the contradiction in Manetho, if he meant to make out an identity of the Jews with both the Hyksos and the rebels, since the Shepherds had been totally expelled long before the date of the lepers, and the Hebrews had but one exodus. In connection with these excerpts from Manetho, Josephus cites passages from Chærenon and others bearing upon the same subject, but they contain nothing of importance to our purpose. We are not concerned here to refute, whether indignantly or coolly, either part of this migration as a garbled account of the departure of the Israelites out of Egypt; our only object is to ascertain, if possible, its chronological position with reference to the Exodus. We know of no positive method for doing this but by a direct comparison of the dates of the two events, as nearly as they can be historically, or rather chronologically, determined. Unfortunately the uncertainty of many of the elements that enter into the settlement of this early portion of both the Egyptian and the Biblical chronology forbids any absolute satisfaction on this point. If, however, we may trust to the accuracy of the conclusions recently arrived at, we may, with tolerable safety, set down the sojourn of the Hebrews in Egypt as continuing B.C. 1874-1658, and the rule of the Hyksos as lasting B.C. 2003-1470; in other words, the entire period of 216 years during which the Hebrews were in Egypt was contemporaneous with that of the Hyksos, and about the middle of the latter. Some writers have claimed (Birch, *Egypt*, p. 131) that the name Raamses (or Rameses), one of the "treasure cities," built by the Israelites in their period of bondage (Exod. i, 11), is conclusive proof that the oppression took place under the Ramessidæ (nineteenth dynasty, B.C. 1302); but this is inconsistent with the fact that Goshen is called "the land of Rameses" (Gen. xlvii, 11) in the time of Joseph (B.C. 1874).

The only information we have of the Hyksos from other ancient writers on Egypt consists of such slight notices in the fragments of Manetho as the following by Africanus: "Fifteenth dynasty—six foreign Phœnician kings, who also took Memphis. They likewise founded a city in the Sethroite nome, advancing from which they reduced the Egyptians to subjection;" "Sixteenth dynasty—thirty other Shepherd-kings;" "Seventeenth dynasty—forty-three other Shepherd-kings, and forty-three Theban Diospolites together." Instead of this Eusebius has simply "Seventeenth dynasty—(four) foreign Phœnician Shepherd-kings (brothers), who also took Memphis. . . . They founded a city in the Sethroite nome, advancing from which they subdued Egypt." There are a few indications in the Biblical records which have been mostly overlooked in this discussion, but which to our mind go far towards confirming this relative position of the two periods. In the first place, we are expressly told that in the time of Joseph "every shepherd was an abomination unto the Egyptians" (Gen. xlv, 34). This shows that the Shepherd invasion had occurred before that date, as it seems to be the only reasonable explanation of so deep an abhorrence. In the second place, however, it is clear, not only from the entire narrative, but especially from the fact that the Israelites were placed in Goshen, evidently as a break-water against these foreign irruptions, that the Hyksos had not yet gained the upper-hand, at least in Memphis, where the capital of Joseph's Pharaoh seems to have been located; and this accords with the language of Josephus above, which implies that the capture of Memphis did not occur till an advanced period in the Shepherd line, perhaps the beginning of the sixteenth dynasty. It is true, Josephus seems to locate the first Shepherd-king at Memphis, but he betrays the inaccuracy of

this expression by adding immediately that the king in question built Avaris as his capital; and the table of dynasties shows that the Memphitic dynasty continued till about the beginning of the Shepherd dynasty XVI. Indeed, the change in the policy of the Egyptians towards the Hebrews (Exod. i, 8), which took place B.C. cir. 1738, singularly accords with the revolution in Lower Egypt at the end of the eighth dynasty (B.C. 1740), or the beginning of the sixteenth (B.C. 1755). Finally, the remark incidentally dropped as a reason by the "new king" for oppressing the Israelites, "Lest, when there falleth out any war, they join themselves unto our enemies, and fight against us, and so get them up out of the land," which at first sight seems most appropriate in the mouth of one of the regular Memphitic line, bears, when more closely examined, strongly in the opposite direction. So far as joining the enemy is concerned, there could be little difference: the Shepherds are supposed by some to have been naturally friendly towards their neighbors and fellow-shepherds the Hebrews; but, on the other hand, we know the Hebrews were closely in alliance with the long-established and apparently legitimate native sovereigns—had been so, in fact, ever since the days of Abraham (Gen. xii, 16); and since the Hebrews had been located, as we have seen above, in Goshen expressly for a purpose adverse to the Hyksos, we can hardly suppose that they had coalesced in sympathy or plans. The tyrant's fear was not so much of the arms of the Hebrews, for they were certainly not formidable soldiers, but rather lest they should seize the opportunity of the existing civil convulsion to *escape from Egypt*. He was not alarmed, it seems, at the prospect of their increasing as an *invading force*, such as were the Hyksos, but only lest their growing numbers should warrant them in migrating bodily to some more comfortable region. This implies that they had already experienced ill-treatment or dissatisfaction. From what source could this have arisen? They had the best possible land for their vocation (Gen. xlvii, 6); they had enjoyed royal patronage to the full; they had never hitherto been oppressed by government. They had always been peaceable and loyal citizens. Why should they now be suspected and distrained? The jealousy, if on the part of the native *régime*, seems inexplicable; and we may add that such a rigorous and illegal course is not in accordance with what we otherwise know of the polity of the legitimate sovereigns of ancient Egypt. We cannot but suspect that bickerings, rivalries, and animosity had long existed between the Hebrews and the lawless, uncultivated Hyksos on their frontier; and raids such as the Israelites afterwards experienced from their Bedawin neighbors in Palestine had, doubtless, often been made upon their quiet domain by these Bene-Kedem, as Josephus virtually styles them. It was this annoyance that had tempted the Hebrews to long for a less exposed situation; and when they saw these freebooters installed as lords, they might well think it high time to decamp. The whole conduct of the Hyksos, as revealed by Josephus, shows them to have been of this domineering, foraging, semi-savage character. They were, in fact, congeners of the Canaanites, with whom the Israelites had henceforth a perpetual enmity, despite the traditional comity of earlier days. No genuine Egyptian monarch seems capable of the barbarity of the Pharaoh of the Exodus; but the atrocities which Josephus states that the Hyksos perpetrated in their later invasion justify the belief that it was they who, in the days of their power, made Egypt known as "the house of bondage." The irritation and vexation caused by this system of petty persecution during the long contact of the Israelites with the Hyksos in Egypt cherished as well as disclosed the early purpose of the former to return to the land of their forefathers (Gen. i, 25), and had been predicted of old (xv, 13); but it was not till the domination of the latter had made it galling to an in-

tolerable degree that the resolve ripened into a fixed determination. Sectional jealousies and tribal animosities of this sort are proverbially hereditary, and are peculiarly inveterate in the East, where they are so liable to be aggravated by blood-feuds. We can trace distinct evidences of such a national grudge in this case from the time when the son of the Egyptian bond-woman—who was, doubtless, no other than a captive from these “Sons of the East” bordering on Egypt—was expelled from the Hebrew homestead for mocking the son of the free-woman (Gen. xxi, 9), till Moses slew the Egyptian task-master (Exod. ii, 12). Hagar naturally retired to the “wilderness of Beersheba” (Gen. xxi, 14), which was part of what was known by the more general name of the desert of Paran, where her childhood had doubtless been spent, and there contracted a marriage for her son among her kindred tribes, called even then part of the land of Egypt (xxi, 21). His descendants, the notorious Ishmaelites, who roved as brigands over the region between Egypt and Canaan, intensified the clannish variance, which became still more sharply defined between the cavalierly Esau and the puritan Jacob in the next generation. These two representative characters, indeed, both went under the common title of shepherds or herdsmen, for flocks and herds constituted the staple of the property of each (xxxiii, 9); but the “cunning hunter of the field” evidently looked with Bedawi disdain upon his “simple tent-dwelling” brother as a Fellah (xxv, 27 sq.). The collisions between the Philistine herdsmen and Jacob’s (ver. 17-22) seem to belong to the same line of difference, and may serve to remind us that Philistia, as the intermediate battle-ground of the expelled Hyksos in later times, retained in its military prowess and panoplied champions traces of their warlike encounters with the arms of Egypt. The iron war-chariots of the Canaanites are especially traceable to the Egyptian use of cavalry, and these could only deploy successfully in the level sea-coast and its connected plains. The fear of encountering these disciplined foes on the part of the Israelites in their departure from Egypt betrays the hereditary hostility between them. The Amalekites who attacked the Hebrews in the desert (Exod. xvii, 8) were evidently a branch of the same roving race of Arabs in the northern part of the peninsula of Sinai, and they repeated the attack at the southern border of Canaan (Numb. xiv, 45). The ban of eventual extermination against them (Exod. xvii, 16) was but the renewal of the old enmity. It was a caravan of these gypsy traders (indifferently called Ishmaelites or Midianites, Gen. xxxvii, 28) who purchased Joseph and carried him to their comrades in Egypt. The second irruption of the Hyksos into Egypt, as narrated by Josephus, manifestly was, when stripped of its apocryphal exaggerations, merely one of the forays which characterized, or rather constituted, the guerilla system seen on various occasions to have prevailed on the southern border of Palestine, such as Saul’s raid against Amalek (1 Sam. xv, 8), David’s expeditions from Ziklag (xxvii, 8), and the later marauds of the Simeonites (1 Chron. v, 18-22). The date assigned to it by Josephus would be about B.C. 1170-50, or during the troubled judgeship of Eli, when the Philistines and other aborigines had everything pretty much their own way. This was some three centuries after the close of the Shepherd rule in Egypt, which ended about B.C. 1492, or during the judgeship of Ehud. As the route of the invading and retreating hordes was, of course, along the sea-coast, they may have marched and countermarched freely at any time prior to David’s reign without disturbing in the least the current of Hebrew annals, which at that period are confined to the mountain backbone of the country and the Jordan valley.

The *Shasus* (whose name seems to be identical with the last syllable of *Hyksos*), with whom the monuments represent the Ramessidæ as warring, were the Shemitic

or Arabs of this period. They sometimes appear in connection with the *Kheta* or *Mittites*, i. e. Syrians.

An interesting confirmation of this chronological position of the Hebrew transmigration is found in the fact that *horses* do not appear on the Egyptian monuments prior to the eighteenth dynasty (Wilkinson, *Ancient Egyptians* [Amer. ed.], i, 386), having, in all probability, been introduced by the Bedawin Hyksos, of whom, however, few, if any, pictorial representations remain. Accordingly, at the removal of the Israelites to Egypt, in the early part of the Shepherd rule, we read only of asses and wagons for transportation (Gen. xiv, 19-23)—the latter, no doubt, for oxen, like those employed in the desert (Numb. vii, 3); but at the Exode, in the latter part of the Shepherd rule, the cavalry, consisting exclusively of chariots, formed an important arm of the military service (Exod. xiv, 7). The incidental mention of horses, however, in Gen. xlvii, 17, as a part of the Egyptian farm-stock in Joseph’s day, shows that they were not unknown in domestic relations at that date.

Shepherds (French insurgents). See PASTOUR-REAUX.

She’phi (Heb. *Shephi*, שֵׁפִי, *bareness*, hence a naked hill; Sept. Σωφί v. r. Σωφάπ), the fourth named of the five sons of Shobal the son of the aboriginal Seir of Edom (1 Chron. i, 40), called in the parallel passage (Gen. xxxvi, 23) Shepho (Heb. *Shepho*, שֵׁפּוֹ, of the same signification; Sept. Σωφάπ), which Burrington (*Genealogies*, i, 49) regards as the preferable reading. B.C. cir. 1920.

Shephiphon. See ADDER.

She’pho (Gen. xxxvi, 23). See SHEPHI.

Shephu’phan (Heb. *Shephuphan*, שֵׁפְחָן, *an adder*; Sept. Σωφάν v. r. Σεφονάμ), next to the last named of the sons of Bela oldest son of Benjamin (1 Chron. viii, 5), elsewhere called (perhaps more properly) *Shephupham* (Numb. xvi, 39, A. V. “Shupham”), *Shup-pim* (1 Chron. vii, 12, 15), and *Mupim* (Gen. xlvii, 21). See JACOB.

She’rah (Heb. *Sheerah*, שְׁעָרָה, *relationship*, i. e. kinswoman [as in Lev. xviii, 17]; Sept. Σαρά v. r. Σαράά), a “daughter” of Ephraim and foundress of the two Beth-horons and also of a town called, after her, Uzen-sheerah (1 Chron. vii, 24). B.C. cir. 1612.

Sherd (Isa. xxx, 14; Ezek. xxiii, 34). See POTSHERD.

Sherebi’ah (Heb. *Sherebyah*, שְׁרֵבִיָּה, *heat* [Fürst, *sprout*] of *Jehorah*; Sept. Σαράβια, v. r. Σαράβιας, Σαράβια, Σαράτα, etc.), a prominent Levite of the family of Mahli the Merarite, who, with his sons and brethren (eighteen in all), joined Ezra’s party of returning colonists at the river Ahava (Ezra viii, 18), and who along with Hashabiah and ten others was commissioned to carry the treasures to Jerusalem (ver. 24, where they are vaguely called “chief of the priests”). B.C. 459. He also assisted Ezra in reading the law to the people (Neh. viii, 7), took part in the psalm of confession and thanksgiving which was sung at the solemn fast after the Feast of Tabernacles (ix, 4, 5), and signed the covenant with Nehemiah (x, 12). He is again mentioned as among the chief of the Levites who belonged to the choir (xii, 8, 24).

She’resh (Heb. *id.* שֵׁרֵשׁ, but occurring only “in pause,” *Sha’resh*, שֵׁרֵשׁ, *root* [Fürst, *union*]; Sept. Σορός v. r. Σοῦρος), second of the two sons of Machir by Maachah, and father of Ulam and Rakem (1 Chron. vii, 16). B.C. ante 1658.

Shherits. See CREEPING THING.

Shere’zer (Zech. vii, 2). See SHAREZER 2.

Sheridan, Andrew J., a minister of the Methodist Episcopal Church, was born in Butler County, O., Feb. 7, 1825, but emigrated early to Indiana. He was

converted and joined the Church in 1841, and licensed to preach in 1852. He was admitted on trial into the North-west Indiana Conference in 1853, after spending four years in the Asbury University. In 1860 he received a superannuated relation, which he changed to that of effective in 1865. He was then appointed to Mechanicsburg Circuit, where he died, Jan. 10, 1867. See *Minutes of Annual Conferences*, 1867, p. 197.

Sheridan, Thomas, D.D., was an Irish clergyman, born in the County of Cavan about 1684. By the help of friends he was educated at Trinity College, Dublin. He afterwards entered into orders, and was named chaplain to the lord-lieutenant. He lost his fellowship by marriage, and set up a school in Dublin, which was at first successful, but was afterwards ruined by negligence and extravagance. His intimacy with Swift procured him a living in the south of Ireland in 1725, worth about £150; but he lost his chaplaincy and all hope of rising by preaching a sermon on the king's birthday from the text "Sufficient unto the day is the evil thereof." He exchanged his living for that of Dunboyne, but gave it up for the free school of Cavan. He soon sold the school for about £400, spent the money rapidly, lost his health, and died Sept. 10, 1738. He was a good-natured, improvident man, continuing to the last to be a punster, a quibbler, a fiddler, and a wit.

Sheridan, William, D.D., an English prelate of the latter part of the 17th century, was bishop of Kilmore and Ardagh in 1681, and was deprived in 1691 for not taking the oath at the Revolution. His works consist of *Sermons*, etc., published in 1665, 4to; 1685, 4to; 1704, 1705, 1706, 3 vols. 8vo; 1720, 3 vols. (of vol. i, 2d ed.) 8vo. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Sherif (Arab. for *noble*) designates, among Moslems, a descendant of Mohammed through his daughter Fatima and Ali. The title is inherited both from the maternal and paternal side; and thus the number of members of this aristocracy is very large. The men have the privilege of wearing the green turban, the women the green veil; and they mostly avail themselves of this outward badge of nobility (the prophet's color), while that of the other Moslems' turbans is white. Many of these sherifs founded dynasties in Africa; and the line which now rules in Fez and Morocco still boasts of that proud designation.

Sheriff occurs only in Dan. iii, 2, 3, as a rendering in the A. V. of the Chald. *šar-pāṣā*, *tiptḥay'* (according to Fürst "a derivation from the old Persic *aitipāiti*=supreme master [Stern, *Monatsnamen*, p. 196];" Sept. *ἐπ' ἱξουσιών*; Vulg. *præfectus*), one of the classes of court officials at Babylon, probably lawyers or jurists, like the present Mohammedan *mufti*, who decides points of law in the Turkish courts.

Sheringham, Robert, a learned fellow of Gonville and Caius College, Cambridge, who was ejected during the Commonwealth and retired to Holland, but was restored in 1662. His works were, *Joma: Codex Talmudicus de Sacrificiis*, etc.:—*Diei Expiationes*, etc. (Lond. 1648, 4to):—*Franquer*, etc. (ibid. 1696, 8vo):—*The King's Supremacy Asserted* (ibid. 1660, 1682, 4to):—*De Anglorum Origine*, etc. (Cantab. 1670, 8vo):—also *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Sherlock, Martin, was an Irish divine and chaplain to the earl of Bristol during the latter part of the last century. He left the following works: *Consiglio ad un Giovane Poeta* (counsel to a young poet) (Naples, 1779, 8vo):—*Lettres d'un Voyageur Anglois* (Geneva, 1779; Neuchâtel, 1781, 8vo; in English [not by the author], Lond. 1780, 4to):—*Letters*, on various subjects (1781, 2 vols. 12mo):—*New Letters from an English Traveller* (1781, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Sherlock, Richard, D.D., an English clergyman, was born at Oxtou, Cheshire, in 1613; and was educated at Magdalen Hall, Oxford, and Trinity College, Dublin. He was minister of several parishes in Ireland, and afterwards became rector of Winwick, England. He died in 1689. His works are, *Answer to the Quakers' Objection to Ministers* (Lond. 1656, 4to):—*Quakers' Wild Questions Answered* (ibid. 1656, 12mo):—*Mercurius Christianus, or The Practical Christian* (ibid. 1673, 8vo):—and *Sermons*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Sherlock, Thomas, an English prelate, was the son of Dr. William Sherlock (q. v.), and was born in London in 1678. He early went to Eton, from which (about 1693) he was removed to Cambridge, and was admitted into Catherine Hall. He took his degree of Bachelor of Arts in 1697, and that of Master of Arts in 1701. Between these dates he entered the ministry, and was appointed to the mastership of the Temple in 1704, which he held until 1753. In 1714 he took his degree of Doctor of Divinity, became master of Catherine Hall and vice-chancellor of the University of Cambridge, and in 1716 was created dean of Chichester. He was created bishop of Bangor in 1728, of Salisbury in 1734; and in 1747 the see of Canterbury was offered to him, but he declined it on account of ill-health. The following year he accepted the see of London. He died in 1761. Bishop Sherlock published, in opposition to Dr. Hoadly in the Bangorian Controversy, *The Use and Intent of Prophecy:—Trial of the Witnesses of the Resurrection of Jesus:—and a collection of his Discourses*. The first complete edition of his works was published (Lond. 1830) in 5 vols. 8vo.

Sherlock, William, D.D., a learned English divine, was born in Southwark, London, in 1641, educated at Eton, and thence removed to Peter House, Cambridge, in May, 1657. He was made rector of St. George's, Botolph Lane, London, in 1669. In 1680 he received the degree of Doctor of Divinity, and in 1681 was collated to a prebend of St. Paul's. He was master of the Temple in 1684, and had the rectory of Therfield, Hertfordshire. Refusing to take the oaths at the Revolution, he was suspended; but complying in 1690, he was restored, and became dean of St. Paul's in the following year. He died at Hampstead, June 19, 1707, and was interred in St. Paul's Cathedral. More than sixty of his publications are given, of which we notice the following: *Discourse concerning the Knowledge of Jesus Christ*, etc. (Lond. 1674, 8vo):—*Defence and Continuation of the same* (ibid. 1675, 8vo):—*The Case of Resistance to the Supreme Powers Stated*, etc. (ibid. 1684, 8vo).

Sherman, Charles, a Methodist Episcopal minister, was born in Woodbury, Conn., Oct. 20, 1803. He was converted in his seventeenth year, licensed as a local preacher in 1823, and admitted into the itinerancy in 1830, laboring successively in Stratford and Burlington in the New York Conference, and Albany and Troy in the Troy Conference, to which he was transferred in 1834. In 1838 he was appointed presiding elder in Albany District, in which he labored four years. In 1842, owing to failing health, he was appointed to Jonesville, a small station in Saratoga County, N. Y.; in 1843 to Troy, where he died, March 10, 1844. Mr. Sherman was an excellent preacher, clear in his method, and forcible in his manner of address. See *Minutes of Annual Conferences*, iii, 582; Sprague, *Annals of the Amer. Pulpit*, vii, 679.

Sherman, John (1), a Congregational minister, was born at Dedham, England, Dec. 26, 1613. He was educated at Emmanuel College, Cambridge. He came to New England in 1634, preached a short time at Watertown, and moved to New Haven, where he was made a magistrate and lived until 1644, when he accepted an invitation to become pastor at Watertown. There he labored until his death, Aug. 8, 1685. See Sprague, *Annals of the Amer. Pulpit*, i, 44.

Sherman, John (2), a Unitarian minister, was born in New Haven, Conn., June 30, 1772, entered Yale College when not far from sixteen years of age, and graduated in 1792. He studied theology partly under president Dwight, but mainly under Rev. David Austin, of Elizabeth, N. J. He was licensed to preach by the New Haven Association in 1796, and was ordained and installed pastor of the First Church, Mansfield, Conn., Nov. 15, 1797. Not long after his settlement he began to doubt the doctrines he had been accustomed to believe and preach, especially that of the Trinity. On Oct. 23, 1805, he received a dismissal from a council called for the purpose, and became pastor of the Reformed Christian Church (Unitarian) at Oldenbarneveld (Trenton village), N. J., March 9, 1806. After preaching a short time, he established an academy in the neighborhood, which occupied his attention for many years. In 1822 he built a hotel at Trenton Falls, into which he removed the next year. He died Aug. 2, 1828. He published, *One God in One Person Only*, etc. (1805, 8vo), the first formal and elaborate defence of Unitarianism that ever appeared in New England:—*A View of Ecclesiastical Proceedings in the County of Windom, Conn.* (1806, 8vo):—*Philosophy of Language Illustrated* (Trenton Falls, 1826, 12mo):—*Description of Trenton Falls* (Utica, 1827, 18mo). See Sprague, *Annals of the Amer. Pulpit*, viii, 326.

Sherrill, Edwin Jenner, a Congregational minister, was born in Shoreham, Vt., Oct. 23, 1806. His preparatory studies were completed in Middlebury, after which he entered Hamilton College, N. Y., whence he was graduated in 1832. He spent two years of study in Yale Theological Seminary, Mass., and one year at Andover Seminary. He was ordained at Eaton, Quebec, June 15, 1838, and continued in the pastoral charge of that church until November, 1873. Though not formally dismissed, he removed to Lee, Mass., in 1875. He died in the city of New York, June 13, 1877. (W. P. S.)

Sherwood, Mary Martha, an English authoress, was born at Stanford, Worcestershire, July 6, 1775. In 1803 she married her cousin, Henry Sherwood, and accompanied him in 1804 to India, where she instructed the children of his regiment. In 1818 they returned to England, and in 1821 settled at Wickwar, county of Gloucester, where they resided for the next twenty-seven years. Mrs. Sherwood's works number ninety volumes, of which mention is made of the following: *Chronology of Ancient History*:—*Dictionary of Scripture Types*. The remainder are largely works of fiction.

Shesh. See LINEN; MARBLE; SILK.

She'shach (Heb. *Sheshak*, שֶׁשַׁח, probably an artificial word; Sept. Σῆσακ v. r. Σῆσάχ), a term occurring only in Jeremiah (xxv, 26; li, 41), who evidently uses it as a synonym either for *Babylon* or for *Babylonia*. According to the Jewish interpreters, followed by Jerome, it represents בָּבֶל, "Babel," on a Cabalistic principle called "Athbash" well known to the later Jews—the substitution of letters according to their position in the alphabet, counting backwards from the last letter, for those which hold the same numerical position counting in the ordinary way. See CABALA. Thus ט represents א, ש represents ז, ר represents ל, and so on. It may well be doubted, however, whether this fanciful practice were as old as Jeremiah's time; and even supposing that were the case, why should he use this obscure term here, when *Babylon* is called by its proper name in the same verse? C. B. Michaelis conjectures that שֶׁשַׁח comes from שֶׁשַׁחֲשִׁי, *shikshak*, "to overlay with iron or other plates," so that it might designate *Babylon* as χαλκόπυλος. Von Bohlen thinks the word synonymous with the Persian *Shih-shah*, i. e. "house of the prince;" but it is doubtful whether, at so early a period as the age of Jeremiah, *Babylon* could have received a Persian name that

would be known in Judea. Sir H. Rawlinson has observed that the name of the moon-god, which was identical, or nearly so, with that of the city of Abraham, Ur (or Hūr), "might have been read in one of the ancient dialects of Babylon as *Shishaki*," and that consequently "a possible explanation is thus obtained of the Sheshach of Scripture" (*Herod.* i, 616). Sheshach may stand for *Ur*; *Ur* itself, the old capital, being taken (as Babel, the new capital, constantly was) to represent the country.

She'shai (Heb. *Sheshay*, שֶׁשַׁי, *whitish* [Gesen.] or *noble* [Fürst]; Sept. Σῆσαι, v. r. Σοῖαι, Σοῦσαι, Σῆσαι, etc.), the second named of the three sons of Anak who dwelt in Hebron (Numb. xiii, 22), and were driven thence and slain by Caleb at the head of the children of Judah (Josh. xv, 14; Judg. i, 10). B.C. 1612.

She'shan (Heb. *Sheshan*, שֶׁשָׁן, *lily* [Gesen.] or *noble* [Fürst]; Sept. Σωσαν v. r. Σωράμ), a "son" of Ishi and "father" of Ahlai or Atlai, among the descendants of Jerahmeel the son of Hezron; being a representative of one of the chief families of Judah, who, in consequence of the failure of male issue, gave his daughter in marriage to Jarha (q. v.), his Egyptian slave, and through this union the line was perpetuated (1 Chron. ii, 31, 34, 35). B.C. post 1856.

Sheshbazz'zar (Heb. *Sheshbatszar*, שֶׁשֶׁבַצְזָר, from the Persian for *worshipper of fire* [Von Bohlen], or the Sanscrit *śaṣṭiṣar* = "distinguished one" [Luzzatto]; Sept. Σῆσαβασάρ v. r. Σαβασάαρ, etc.), the Chaldean or Persian name given to Zerubbabel (q. v.) in Ezra i, 8, 11; v, 14, 16, after the analogy of Shadrach, Meshach, Abednego, Belteshazzar, and Esther. In like manner, also, Joseph received the name of Zaphnath-Paaneah, and we learn from Manetho, as quoted by Josephus (*Apion*, i, 28), that Moses' Egyptian name was Osarsiph. The change of name in the case of Jehoiakim and Zedekiah (2 Kings xxiii, 34; xxiv, 17) may also be compared. That Sheshbazzar means Zerubbabel is proved by his being called the prince (נָשִׂיא) of Judah, and governor (שָׂרָה), the former term marking him as the head of the tribe in the Jewish sense (Numb. vii, 2, 10, 11, etc.), and the latter as the Persian governor appointed by Cyrus, both which Zerubbabel was; and yet more distinctly by the assertion (Ezra v, 16) that "Sheshbazzar laid the foundation of the house of God which is in Jerusalem," compared with the promise to Zerubbabel (Zech. iv, 9), "The hands of Zerubbabel have laid the foundation of this house, his hands shall also finish it." It is also apparent from the mere comparison of Ezra i, 11 with ii, 1, 2 and the whole history of the returned exiles. The Jewish tradition that Sheshbazzar is Daniel is utterly without weight.

Sheshunogunde, in Hindū mythology, is the wife of Waishia, second son of the first man (Puru), from whom the mercantile caste is descended. She was created by Brahma in the lands of the South.

Sheth (Heb. *id.* שֵׁט), the form of two names, one more accurate than that elsewhere, the other doubtful.

1. The patriarch Seth (1 Chron. i, 1).

2. In the A. V. of Numb. xxiv, 17, שֵׁט is rendered as a proper name, but there is reason to regard it as an appellative, and to translate, instead of "the sons of Sheth," "the sons of tumult," the wild warriors of Moab, for in the parallel passage (Jer. xlvi, 45) שֵׁטָאן, *sha'ôn*, "tumult," occupies the place of *shêth*. שֵׁט, *shêth*, is thus equivalent to שֵׁטָאן, *shêth*, as in Lam. iii, 47. Ewald proposes, very unnecessarily, to read שֵׁט, *sêth* = שֵׁטָאן, and to translate "the sons of haughtiness" (*Hochmuthsöhne*). Rashi takes the word as a proper name, and refers it to Seth the son of Adam; and this seems to have been the view taken by Onkelos, who renders "he shall rule all the sons of men." The Jerusalem Targum

gives "all the sons of the East;" the Targum of Jonathan ben-Uzziel retains the Hebrew word *Sheth*, and explains it "of the armies of Gog who were to set themselves in battle array against Israel."

She'thar (Heb. *Shethar'*, שֶׁתָּר, Persic for *star*, like ἀστὴρ [Gesen.], or Zend *shathiao* = "commander" [Fürst]; Sept. Σατραδαῖος v. r. Σαπείσθεος, etc.), second named of the seven princes of Persia and Media, who had access to the king's presence, and were the first men in the kingdom, in the third year of Xerxes (Esth. i, 14). B.C. 483. Comp. Ezra vii, 14 and the ἐντὰ τῶν ἱερῶν ἐπισήμοι of Ctesias (14), and the statement of Herodotus (iii, 84) with regard to the seven noble Persians who slew Smerdis, that it was granted to them as a privilege to have access to the king's presence at all times, without being sent for, except when he was with the women; and that the king might only take a wife from one of these seven families. See CARSHENA; ESTHER.

She'thar-boz'nai (Chald. *Shethar' Bozenay'*, שֶׁתָּר בֹּזַנַי, Persic = *shining star* [comp. Oppert, *Jour. Asiatique*, 1851, p. 400]; Sept. Σαταρ-βουζαναί v. r. -ζαν, etc.), a Persian officer of rank, having a command in the province "on this side the river" under Tatnai (q. v.) the satrap (שַׂרְתָּן), in the reign of Darius Hystaspis (Ezra v, 3, 6; vi, 6, 18). B.C. 520. He joined with Tatnai and the Apharsachites in trying to obstruct the progress of the Temple in the time of Zerubbabel, and in writing a letter to Darius, of which a copy is preserved in Ezra v, in which they reported that "the house of the great God" in Judæa was in process of being built with great stones, and that the work was going on fast, on the alleged authority of a decree from Cyrus. They requested that search might be made in the rolls court whether such a decree was ever given, and asked for the king's pleasure in the matter. The decree was found at Ecbatana, and a letter was sent to Tatnai and Shethar-boznai from Darius, ordering them no more to obstruct, but, on the contrary, to aid, the elders of the Jews in rebuilding the Temple by supplying them both with money and with beasts, corn, salt, wine, and oil, for the sacrifices. Shethar-boznai after the receipt of this decree offered no further obstruction to the Jews. The account of the Jewish prosperity in vi, 14-22 would indicate that the Persian governors acted fully up to the spirit of their instructions from the king. See EZRA.

As regards the name Shethar-boznai, it seems to be certainly Persian. The first element of it appears as the name *Shethar*, one of the seven Persian princes in Esth. i, 14. It is perhaps also contained in the name *Pharna-zathres* (Herod. vii, 65); and the whole name is not unlike *Sati-barzanes*, a Persian in the time of Artaxerxes Mnemon (Ctesias, 57). If the names of the Persian officers mentioned in the book of Ezra could be identified in any inscriptions or other records of the reigns of Darius, Xerxes, and Artaxerxes, it would be of immense value in clearing up the difficulties of that book. "The Persian alliteration of the name in cuneiform characters was probably *Chitrabarshana*, a word which the Greeks would have most properly rendered by Σιτραβαρζάνης (comp. the Σαταρβουζαναί of the Sept.). *Chitrabarshana* would be formed from *chitra*, 'race,' 'family,' and *barshana*, a cognate form with the Zend *berez*, 'splendid' (*Speaker's Commentary*, ad loc.).

She'va (Heb. text *Sheya'*, שֶׁבַע, margin *Sheva'*, שֵׁבַע in Sam.), the name of two Hebrews.

1. (Sept. Σαού v. r. Σαούλ; Vulg. *Sue*.) Last named of the four sons of Caleb ben-Hezron by his concubine Maachah. He was the "father," i. e. founder or chief, of Machbena and Gibeā (1 Chron. ii, 49). B.C. cir. 1612.

2. (Sept. Σουά v. r. Ἰσοῦς.) The scribe or royal

secretary of David (2 Sam. xx, 25); elsewhere called Seraiah (2 Sam. viii, 17), Shisha (1 Kings iv, 3), and Shavsha (1 Chron. xvi, 18).

Shew-bread. See SHOW-BREAD.

Shiahs. See SHI'ITES.

Shib'boleth (Heb. *Shibbo'leth*, שִׁבְבוֹלֶת). After Jephthah had beaten the Ammonites, the men of Ephraim were jealous of the advantage obtained by the tribes beyond Jordan, and complained loudly that they had not been called to that expedition. Jephthah answered with much moderation; but that did not prevent the Ephraimites from using contemptuous language towards the men of Gilead. They taunted them with being only fugitives from Ephraim and Manasseh, a kind of bastards that belonged to neither of the two tribes. A war ensued, and the men of Gilead killed a great number of Ephraimites; after which they set guards at all the passes of Jordan, and when an Ephraimite who had escaped came to the river-side and desired to pass over, they asked him if he were not an Ephraimite? If he said No, they bade him pronounce *Shibboleth*; but he pronouncing it *Sibboleth* (q. v.), substituting שׁ or ס for שִׁ, according to the diction of the Ephraimites, they killed him. In this way there fell 42,000 Ephraimites (Judg. xii). See JEPHTHAH.

The word Shibboleth, which has now a second life in the English language in a new signification, has two meanings in Hebrew: (1) an ear of corn (Gen. xli, etc.); (2) a stream or flood: and it was, perhaps, in the latter sense that this particular word suggested itself to the Gileadites, the Jordan being a rapid river. The word, in the latter sense, is used twice in Psa. lxi, in verses 2 and 15, where the translation of the A. V. is "the floods overflow me," and "let not the water-flood overflow me;" also in Isa. xxvii, 12 ("channel"); Zech. iv, 12 ("branch"). If in English the word retained its original meaning, the latter passage might be translated "let not a shibboleth of waters drown me." There is no mystery in this particular word. Any word beginning with the sound *sh* would have answered equally well as a test.

The above incident should not be passed over without observing that it affords proof of dialectical variations among the tribes of the same nation, and speaking the same language, in those early days. There can be no wonder, therefore, if we find in later ages the same word written different ways, according to the pronunciation of different tribes, or of different colonies or residents of the Hebrew people; whence various pointings, etc. That this continued is evident from the peculiarities of the Galilean dialect, by which Peter was discovered to be of that district (Mark xiv, 70). Before the introduction of vowel-points (which took place not earlier than the 6th century A.D.) there was nothing in Hebrew to distinguish the letters Shin and Sin, so it could not be known by the eye in reading when *h* was to be sounded after *s*, just as now in English there is nothing to show that it should be sounded in the words *sugar*, *Asia*, *Persia*; or in German, according to the most common pronunciation, after *s* in the words *Sprache*, *Spiel*, *Sturm*, *Stiefel*, and a large class of similar words. It is to be noted that the sound *sh* is unknown to the Greek language, as the English *th* is unknown to so many modern languages. Hence in the Sept. proper names commence simply with *s* which in Hebrew commence with *sh*; and one result has been that, through the Sept. and the Vulg., some of these names, such as Samuel, Samson, Simeon, and Solomon, having become naturalized in the Greek form in the English language, have been retained in this form in the English version of the Old Test. Hence, likewise, it is a singularity of the Sept. version that in the passage in Judg. xii, 6 the translator could not introduce the word "Shibboleth" and has substituted one of its translations, σπᾶγχυς, "an ear of corn," which tells the

original story by analogy. It is not impossible that this word may have been ingeniously preferred to any Greek word signifying "stream," or "flood," from its first letters being rather harsh-sounding, independently of its containing a guttural. See Günther, *De Dialect. Tribuum Judæ, Ephraim, et Benjamin* (Lips. 1714). See HEBREW LANGUAGE.

Shib'mah (Numb. xxxii, 38). See **SIBMAH**.

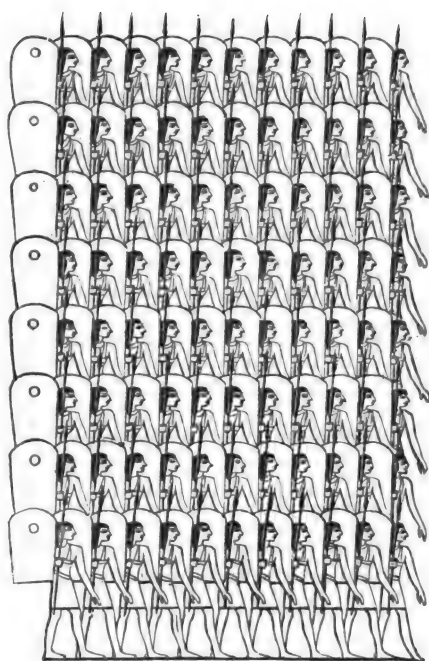

Shi'cron [some *Shic'ron*] (Heb. *Shikron'*, שִׁכְרוֹן, drunkenness [as in Ezek. xxiii, 33; xxxix, 19; but Furst says fruitfulness]; Sept. Σοκρώ v. r. Ἀκκρωνά [imitating the ה directive]), a town near the western end of the northern boundary of Judah, between Ekron and Mt. Baalah towards Jabneel (Josh. xv, 11). It seems to have been in Dan, as it is not enumerated among the cities of Judah (ver. 21-63). The Targum gives it as *Shikaron*, and with this agrees Eusebius (*Onomast.* s. v. Σακρωπάν), though no knowledge of the locality of the place is to be gained from his notice. Neither Schwarz (*Palest.* p. 98) nor Porter (*Handb. for Pal.* p. 275) has discovered any trace of it. It is, perhaps, the present ruined village *Beit Shit*, about half-way between Ekron and Ashdod.

Shidders, in Hindû mythology, is a class of good genii, or *devetus*, not to be identified with the *devs* of the Persians, which are evil genii.

Shield is the rendering in the A. V. of the four following Hebrew words, of which the first two are the most usual and important; likewise of one Greek word.

1. The *tsinnâh* (צִנְחָה, from a root צָנַח, to protect) was the large shield, encompassing (Psa. v, 12) and forming a protection for the whole person. When not in actual conflict, the *tsinnâh* was carried before the warrior (1 Sam. xvii, 7, 41). The definite article in the former passage (*the* shield, not "a shield" as in the A. V.) denotes the importance of the weapon. The word is used with "spear," *rómach* (1 Chron. xii, 8, 14; 2 Chron. xi, 32, etc.), and *chanîth* (1 Chron. xii, 34) as a formula for weapons generally.

2. Of smaller dimensions was the *magên* (מָגֵן, from מָגַן, to cover), a buckler or target, probably for use in hand-to-hand fight. The difference in size between this and the *tsinnâh* is evident from 1 Kings x, 16, 17; 2 Chron. ix, 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the *magên* may be inferred from the notice in xii, 9, 10; and perhaps also from 2 Sam. i, 21. The word is a favorite one with the poets of the Bible (see Job xv, 26; Psa. iii, 3; xviii, 2, etc.). Like *tsinnâh*, it occurs in the formulated expressions for weapons of war, but usually coupled with light weapons, the bow (2 Chron. xiv, 8; xvii, 7), darts, שִׁלָּה (xxxii, 5).

Ancient Egyptian Phalanx. (From the monuments.)

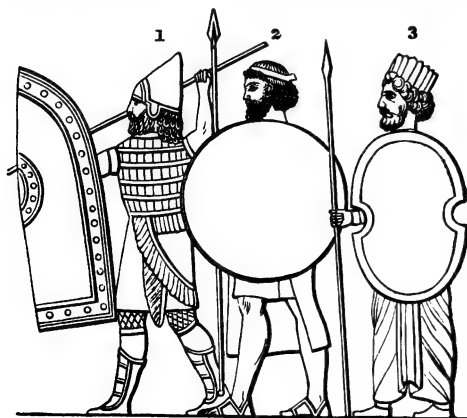

3. What kind of arm the *shélet* (שֵׁלֶט) was it is impossible to determine. By some translators it is rendered a "quiver," by some "weapons" generally, by others a "shield." Whether either or none of these is correct, it is clear that the word had a very individual sense at the time; it denoted certain special weapons taken by David from Hadadezer, king of Zobah (2 Sam. viii, 7; 1 Chron. xviii, 7), and dedicated in the temple, where they did service on the memorable occasion of Joash's proclamation (2 Kings xi, 10; 2 Chron. xxiii, 9), and where their remembrance long lingered (Cant. iv, 4). From the fact that these arms were of gold, it would seem that they cannot have been for offence. In the two other passages of its occurrence (Jer. li, 11; Ezek. xxvii, 11) the word has the force of a foreign arm.

4. In two passages (1 Sam. xvii, 45; Job xxxix, 23) *kidôn* (כִּידוֹן), a dart, is thus erroneously rendered.

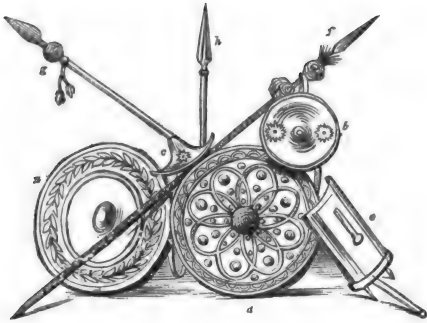

To these we may add *socherâh* (סֹחֶרָה, "buckler"), a poetical term, occurring only in Psa. cxi, 4.

Finally, in Greek, *Σπεός* (probably a *doi*, hence a large shield) occurs metaphorically once (Eph. vi, 16).

Among the Hebrews the ordinary shield consisted of a framework of wood covered with leather; it thus admitted of being burned (Ezek. xxxix, 9). The *magên* was frequently cased with metal, either brass or copper; its appearance in this case resembled gold, when the sun shone on it (1 Macc. vi, 39), and to this rather than to the practice of smearing blood on the shield we may refer the redness noticed by Nahum (ii, 3). The surface of the shield was kept bright by the application of oil, as implied in Isa. xxi, 5; hence, Saul's shield is described as "not anointed with oil," i. e. dusty and gory (2 Sam. i, 21). Oil would be as useful for the metal as for the leather shield. In order to preserve it from the effects of weather, the shield was kept covered except in actual conflict (Isa. xxii, 6; comp. Caesar, *B. G.* ii, 21; Cicero, *Nat. Deor.* ii, 14). The shield was worn on the left arm, to which it was attached by a strap. It was used not only in the field, but also in besieging towns, when it served for the protection of the head, the combined shields of the besiegers forming a kind of *testudo* (Ezek. xxvi, 8). Shields of state were covered with

Ancient Oriental Shields: 1. Assyrian; 2, 3. Persian. (From the monuments.)

Modern Oriental Shields and Spears.

a, large Arabic shield; b, small do.; c, side view of the same; d, large Turkish shield; e, Mameluke shield; f, Arabian spear; g, Turkish; h, Mameluke.

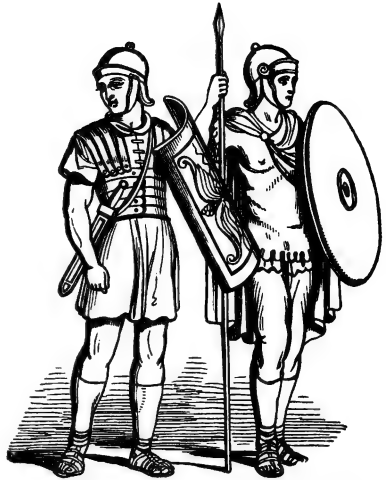

beaten gold. Solomon made such for use in religious processions (1 Kings x, 16, 17); when these were carried off they were replaced by shields of brass, which, as being less valuable, were kept in the guard-room (xiv, 27), while the former had been suspended in the palace for ornament. A large golden shield was sent as a present to the Romans when the treaty with them was renewed by Simon Maccabæus (1 Macc. xiv, 24; xv, 18): it was intended as a token of alliance (*σμβολον τῆς συμμαχίας*, Josephus, *Ant.* xiv, 8, 5); but whether any symbolic significance was attached to the shield in particular as being the weapon of protection is uncertain. Other instances of a similar present occur (Sueton. *Calig.* 16), as well as of complimentary presents of a different kind on the part of allies (Cicero, *Verr.* 2 Act. iv, 29, 67). Shields were suspended about public buildings for ornamental purposes (1 Kings x, 17; 1 Macc. iv, 57; vi, 2). This was particularly the case with the shields (assuming *shêlet* to have this meaning) which David took from Hadadezer (2 Sam. viii, 7; Cant. iv, 4), and which were afterwards turned to practical account (2 Kings xi, 10; 2 Chron. xxiii, 9). The Gammadim similarly suspended them about their towers (Ezek. xxvii, 11). See GAMMADIM. In the metaphorical language of the Bible the shield generally represents the protection of God (e. g. Ps. iii, 3; xxviii, 7); but in xlviii, 9 it is applied to earthly rulers, and in Eph. vi, 16 to faith.

The large shield (*ἀσπίς*, *clipeus*) of the Greeks and Romans was originally of a circular form, and in the Homeric times was large enough to cover the whole body. It was made sometimes of osiers twisted together,

sometimes of wood, covered with ox-hides several folds thick. On the centre was a projection called *ὀμφαλός*, *umbo*, or boss, which sometimes terminated in a spike. After the Roman soldier received pay, the *clipeus* was discontinued for the *scutum*, *ὑπεός*, of oval or oblong form, and adapted to the shape of the body. Significant devices on shields are of great antiquity. Each Roman soldier had his name inscribed on his

Greek Shield.

Roman Shields. (From Trajan's Column.)

shield. Paul (Eph. vi, 16) uses the word *ὑπεός* rather than *ἀσπίς*, because he is describing the armor of a Roman soldier. See Kitto, *Pict. Bible*, note at Judg. v, 8. See ARMOR.

Shields, Alexander, was an English clergyman and minister of St. Andrew's. He was chaplain to the Cameronian Regiment in 1689. In August, 1699, he accompanied the second Darien expedition, and died, "worn out and heart-broken," in Jamaica (see Macaulay, *Hist. of Eng.* [1861], V, xxiv). His published works are, *A Hind Let Loose*; or, *A Historical Representation of the Church of Scotland* (1687, 8vo);—*History of the Scotch Presbytery* (1691, 4to), an epitome of the foregoing;—*Elegy on the Death of James Renwick* (1688):—*An Inquiry into Church Communion* (2d ed. Edinb. 1747, sm. 8vo):—*The Scots Inquisition* (1745, sm. 8vo):—also *Sermons*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Shields, Hugh K., a Presbyterian minister, was born near Elk Ridge Church, Giles County, Tenn., Dec. 10, 1806. He was converted to God in his seventeenth year, and, feeling his call to the work of the ministry, he entered upon a course of study with that object in view. He graduated at an academy near Elk Ridge, then at Jackson College, Columbus, Tenn., studied theology privately, and was licensed by West Tennessee Presbytery in 1836, and ordained by the same in 1837. He subsequently preached at the following places: Bethberei, Hopewell, Savannah, Elk Ridge, Cornersville, Richland, Campbellsville, and Lynnville—all in Tenn. His active ministry lasted twenty-seven years; two years before his death, Sept. 13, 1865, he was disabled from work by a severe accident. Mr. Shields was a zealous and faithful minister of the Gospel, exhibiting to a high degree the characteristics of one who walked with God. See Wilson, *Presb. Hist. Almanac*, 1866, p. 362. (J. L. S.)

Shields, James, a Presbyterian minister, was born in Pittsburgh, Pa., Dec. 11, 1812. He graduated at the Western University of Pennsylvania, at Pittsburgh, in 1830, studied theology four years under the instruction of Revs. Mungo Dick and John Pressly, D.D., was licensed April 2, 1834, by the Associate Reformed Presbytery of Monongahela, and ordained in 1835 as pastor of the congregations of Fermanagh and Tuscarora, Juniata County, Pa. Here he labored with varied success until the spring of 1859, when, on account of failing health, he ceased to preach in the Tuscarora branch of his charge, and gave all his time to the Fermanagh congregation. He died Aug. 19, 1862. Mr. Shields pos-

essed a mind of more than ordinary power, and his exercises were always of a high order. See Wilson, *Presb. Hist. Almanac*, 1864, p. 354. (J. L. S.)

Shier-Thursaday. See SHEER-THURSDAY.

Shie-tsih, gods of the land and grain among the Chinese. There is an altar to these deities in Pekin, which is square, and only ten feet high, being divided into two stories of only five feet each. Each side of the square measures fifty-eight feet. The emperor alone has the privilege of worshipping at this altar, and it is not lawful to erect a similar one in any part of the empire for the use of any of his subjects.

Shigga'ion (Heb. *Shiggayon'*, שִׁגְיֹון; Sept. ψαλμός; Vulg. *Psalmus* [Psa. vii, 1]), a particular kind of psalm, the specific character of which is not now known. In the singular number the word occurs nowhere in Hebrew except in the inscription of the above psalm; and there seems to be nothing peculiar in that psalm to distinguish it from numerous others, in which the author gives utterance to his feelings against his enemies and implores the assistance of Jehovah against them, so that the contents of the psalm justify no conclusive inference as to the meaning of the word. In the inscription to the ode of the prophet Habakkuk (iii, 1), the word occurs in the plural number; but the phrase in which it stands, 'al shiggayonôth, is deemed almost unanimously, as it would seem, by modern Hebrew scholars, to mean "after the manner of the shiggaion," and to be merely a direction as to the kind of musical measures by which the ode was to be accompanied. This being so, the ode is no real help in ascertaining the meaning of shiggaion; for the ode itself is not so called, though it is directed to be sung according to the measures of the shiggaion. Indeed, if it were called a shiggaion, the difficulty would not be diminished; for, independently of the inscription, no one would have ever thought that the ode and the psalm belonged to the same species of sacred poem. And even since their possible similarity has been suggested, no one has definitely pointed out in what that similarity consists, so as to justify a distinct classification. In this state of uncertainty, it is natural to endeavor to form a conjecture as to the meaning of shiggaion from its etymology; but, unfortunately, there are no less than three rival etymologies, each with plausible claims to attention. Gesenius and Fürst (s. v.) concur in deriving it from שִׁגְיָה (the Piel of שִׁגְיָה), in the sense of magnifying or extolling with praises; and they justify this derivation by kindred Syriac words. Shiggaion would thus mean a hymn or psalm; but its specific meaning, if it have any, as applicable to Psa. vii, would continue unknown. Ewald (*Die poetischen Bücher des alten Bundes*, i, 29), Rüdiger (s. v. in his continuation of Gesenius's *Thesaurus*), and Delitzsch (*Commentar über den Psalter*, i, 51), derive it from שִׁגְיָה, in the sense of reeling, as from wine, and consider the word to be somewhat equivalent to a *dithyrambus*; while De Wette (*Die Psalmen*, p. 34), Lee (s. v.), and Hitzig (*Die zwölf kleinen Propheten*, p. 26) interpret the word as a psalm of lamentation, or a psalm in distress, as derived from Arabic. Hupfeld, on the other hand (*Die Psalmen*, i, 109, 199), conjectures that shiggaion is identical with *higgaion* (Psa. ix, 16), in the sense of poem or song, from הִגְיָה, to meditate or compose; but even then no information would be conveyed as to the specific nature of the poem. As to the inscription of Habakkuk's ode, שִׁגְיֹון, the translation of the Sept. is μετὰ ῥόδῃ, which conveys no definite meaning. The Vulgate translates *pro ignorantia*, as if the word had been *shegagôth*, transgressions through ignorance (Lev. iv, 2, 27; Numb. xv, 27; Eccles. v, 6), or *shegiôth* (Psa. xix, 13), which seems to have nearly the same meaning. Perhaps the Vulgate was influenced by the Targum of Jonathan, where *shiggayonôth* seems to

be translated כְּשִׁלְיֹון. In the A. V. of Hab. iii, 1, the rendering is "upon shigionoth," as if shigionoth were some musical instrument. But under such circumstances 'al (עַל) must not be translated "upon" in the sense of playing upon an instrument. Of this use there is not a single undoubted example in prose, although playing on musical instruments is frequently referred to; and in poetry, although there is one passage (Psa. xcii, 3) where the word *might* be so translated, it might equally well be rendered there "to the accompaniment of" the musical instruments therein specified; and this translation is preferable. Some writers even doubt whether 'al signifies "upon" when preceding the supposed musical instruments Gittith, Machalath, Neginah, Nechilôth, Shushan, Shoshannim (Psa. viii, 1; lxxxi, 1; lxxxiv, 1; liii, 1; lxxxviii, 1; lxi, 1; v, 1; lx, 1; xlv, 1; lxix, 1; lxxx, 1). Indeed, all these words are regarded by Ewald (*Poet. Büch.* i, 77) as meaning musical keys, and by Fürst (s. v.) as meaning musical bands. Whatever may be thought of the proposed substitutes, it is very singular, if those six words signify musical instruments, that not one of them should be mentioned elsewhere in the whole Bible. See PSALMS.

Shig'onoth (Hab. iii, 1). See SHIGGAION.

Shigmu, in Chinese mythology, was the mother of Fo. While still a virgin she ate a lotus-flower, found while bathing, and was thus impregnated by some deity.

Shi'hon (Heb. *Shion'*, שִׁיחֹן, ruin; Sept. Σιών v. r. Σειά; Vulg. *Seon*; A. V. originally "Shion"), a town of Issachar, named only in Josh. xix, 19, where it occurs between Haphraim and Anaharath. Eusebius and Jerome (*Onomast.*) mention it as then existing "near Mount Tabor." A name resembling it at present in that neighborhood is the *Khîrbet Shi'in* of Dr. Schulz (Zimmermann, *Map of Galilee*, 1861), one and a half mile north-west of Deburieh. This is probably the place mentioned, by Schwarz (*Palest.* p. 166) as "*Sain* between Duberieh and Jafa." The identification is, however, very uncertain, since Shi'in appears to contain the *Ain*, while the Hebrew name does not.—Smith. On this and other accounts we prefer the position of the modern village *esh-Shajerah*, a little north of Tabor (Robinson, *Researches*, iii, 219, note).

Shi'hor (Heb. *Shichor'*, שִׁיחֹר [thus only in Josh. xiii, 3; 1 Chron. xiii, 5], or שִׁיחֹר [Jer. ii, 18], or שִׁיחֹר [Isa. xxiii, 3], dark; once with the art. הַשִּׁיחֹר, Josh. xiii, 3, and once with the addition "of Egypt," 1 Chron. xiii, 5; Sept. Γηῶν, ἡ αἰοίατος, ὅρια, and μεταβολή; Vulg. *Sihor, Nilus, Auvius turbidus, and aqua turbida*; A. V. "Sihor" in all passages except 1 Chron. xiii, 5), one of the names given to the river Nile, probably arising from its turbid waters, like the Greek Μέλας (Gesen. *Thesaurus*, s. v.). Several other names of the Nile may be compared. Νεῖλος itself, if it be, as is generally supposed, of Iranian origin, signifies "the blue," that is, "the dark" rather than the turbid; for we must then compare the Sanscrit *Nilah*. "blue," probably especially "dark blue," also even "black," as "black mud." The Arabic *azrak*, "blue," signifies "dark" in the name Bahr el-Azrak, or Blue River, applied to the eastern of the two great confluent of the Nile. Still nearer is the Latin *Melo*, from μέλας, a name of the Nile, according to Festus and Servius (*ad Virg. Georg.* iv, 291; *Æn.* i, 745; iv, 246); but little stress can be laid upon such a word resting on no better authority. With the classical writers it is the soil of Egypt that is black rather than its river. So, too, in hieroglyphics, the name of the country, *Kem*, means "the black;" but there is no name of the Nile of like signification. In the ancient painted sculptures, however, the figure of the Nile-god is colored differently according as it represents the river during the time of the inundation, and during the rest of the year; in the former case red, in the latter blue. See NILE.

There are but three occurrences of Shihor unqualified

in the Bible, and but one of Shihor of Egypt, or Shihor-mizraim. In 1 Chron. xiii, 5 it is mentioned as the southern boundary of David's kingdom: "David gathered all Israel, from Shihor of Egypt even unto the entering of Hamath." At this period the kingdom of Israel was at the highest pitch of its prosperity. David's rule extended over a wider space than that of any other monarch who ever sat upon the throne; and, probably, as an evidence of this fact, and as a recognition of the fulfilment of the divine promise to Abraham (Gen. xv, 18)—"Unto thy seed have I given this land, *from the river of Egypt* unto the great river, the river Euphrates"—the sacred historian may here have meant the Nile. Yet, in other places, where the northern boundary is limited to the "entrance of Hamath," the southern is usually "the torrent of Egypt," that is, Wady (נַחַל, נַחֲרָה) el-Arish (Numb. xxxiv, 5; 1 Kings viii, 65). There is no other evidence that the Israelites ever spread westward beyond Gaza. It may seem strange that the actual territory dwelt in by them in David's time should thus appear to be spoken of as extending as far as the easternmost branch of the Nile; but it must be remembered that more than one tribe, at a later period, had spread beyond even its first boundaries, and also that the limits may be those of David's dominion rather than of the land actually fully inhabited by the Israelites. The passage in Josh. xiii, 3 is even more obscure. The sacred writer is describing the territory still remaining to be conquered at the close of his life, and when about to allot the conquered portion to the tribes: "This is the land that yet remaineth: all the borders of the Philistines and all Geshuri, from Shihor which is before עֵל-שִׁנִּי, 'in the face of,' not 'east of,' but rather 'on the front of') Egypt, even unto the borders of Ekron northward." Keil argues that Wady el-Arish, and not the Nile, must here be meant (*Comment.* ad loc.); but his arguments are not conclusive. Joshua may have had the Lord's covenant-promise to Abraham in view; if so, Shihor means the Nile; but, on the other hand, if he had the boundaries of the land as described by Moses in Numb. xxxiii, 5 sq. in view, then Shihor must mean Wady el-Arish. It is worthy of note that, while in all the other passages in which this word is used it is anarthrous, here it has the article. This does not seem to indicate any specific meaning; for it can scarcely be doubted that here and in 1 Chron. xiii, 5 the word is employed in the same sense. The use of the article indicates that the word is, or has been, an appellative—rather the former if we judge only from the complete phrase. It must also be remembered that Shihor-mizraim is used interchangeably with Nahal-mizraim, and that the name Shihor-libnath, in the north of Palestine, unless derived from the Egyptians or the Phœnician colonists of Egypt, on account of the connection of that country with the ancient manufacture of glass, shows that the word Shihor is not restricted to a great river. That the stream intended by Shihor unqualified was a navigable river is evident from a passage in Isaiah, where it is said of Tyre, "And by great waters, the sowing of Shihor, the harvest of the river (יְעֹר, יָאֵר) [is] her revenue" (xxiii, 3). Here Shihor is either the same as, or compared with, Yēôr, generally thought to be the Nile. In Jeremiah the identity of Shihor with the Nile seems distinctly stated where it is said of Israel, "And now what hast thou to do in the way of Egypt to drink the waters of Shihor? or what hast thou to do in the way of Assyria to drink the waters of the river?" i. e. Euphrates (ii, 18). Gesenius (*ut sup.*) considers that Shihor, wherever used, means the Nile; and upon a careful consideration of the several passages, and of the etymology of the word, we are of the opinion that it cannot appropriately be applied to Wady el-Arish, and must therefore be regarded as a name of the river Nile (see Jerome, *ad Isa.* xxiii, 3; Reland, *Palæst.* p. 286). See RIVER OF EGYPT.

Shi'hor-lib'nath (Heb. *Shichor' Libnath'*, שִׁיחֹר לִבְנָת, literally, *black of whiteness*; Sept. ὁ Σειώρ [v. r. Σιών] καὶ Λιβανῶς; Vulg. *Sichor et Libanath*), a locality mentioned only in Josh. xix, 26 as one of the landmarks of the southern boundary of Asher in the vicinity of Carmel and Beth-dagon. By the ancient translators and commentators (as Peshito-Syriac, and Eusebius and Jerome in the *Onomasticon*) the names are taken as belonging to two distinct places. But modern commentators, beginning perhaps with Masius, have inferred from the fact that Shihor alone is a name of the Nile, that Shihor-libnath is likewise a river. Led by the meaning of Libnath as "white," they interpret the Shihor-libnath as the glass river, which they then naturally identify with the *Belus* (q. v.) of Pliny (*H. N.* v, 19), the present *Nahr Naman*, which drains part of the plain of Akka, and enters the Mediterranean a short distance below that city. This theory, at once so ingenious and so consistent, is supported by the great names of Michaelis (*Suppl.* No. 2462) and Gesenius (*Thesaur.* p. 1393); but the territory of Asher certainly extended far south of the Naman. Reland's conjecture of the *Crocodile River*, probably the *Nahr Zerka*, close to Kaisariyeh, is, on the other hand, too far south, since Dor was not within the limits of Asher. The Shihor-libnath, if a stream at all, is more likely to have been the little stream (marked on Van de Velde's *Map* as *Wady Mülheh*, but as *Wady en-Nebra* on the specimen of the Ordnance Survey in the *Pal. Explor. Quarterly* for Jan. 1875) which enters the Mediterranean a little south of Athlit. The sand there is white and glistening, and this, combined with the turbid character of a mountain-stream, agrees well with the name.

Shi'ites (Arab. *Shiah*, *Shiat*, "a party or faction"), the name given to a Mohammedan sect by the Sunnites (q. v.), or orthodox Moslems. The Shi'ites never assume that name, but call themselves *Al-A'aliyah*, "Sect of the Just Ones." The principal difference between the two consists in the belief of the Shi'ites that the *imamat*, or supreme rule, both spiritual and secular, over all Mohammedans was originally vested in Ali Ibn Abi Taleb, and has been inherited by his descendants, to whom it now legitimately belongs. They are subdivided into five sects, to one of which, that of Haidar, the Persians belong. They believe in metempsychosis and the descent of God upon his creatures, inasmuch as he, omnipresent, sometimes appears in some individual person, such as their imams. Their five subdivisions they liken unto five trees with seventy branches; for their minor divisions of opinions, on matters of comparatively unimportant points of dogma, are endless. In this, however, they all agree—that they consider the caliphs Abu-Bekr, Omar, and Othman—who are regarded with the highest reverence by the Sunnites—as unrighteous pretenders and usurpers of the sovereign power, which properly should have gone to Ali direct from the prophet. They also reject the Abbasside caliphs, notwithstanding their descent from Mohammed, because they did not belong to Ali's line.

Shil'hi (Heb. *Shilchi'*, שִׁלְחִי, probably *armed*, from שָׁלַח, *a missile*, Sept. Σαλί, v. r. Σαλαί, Σαλαλά, etc.), the father of Azubah, king Jehoshaphat's mother (2 Kings xxii, 42, 2 Chron. xx, 31). B.C. ante 946.

Shil'him (Heb. *Shilchim'*, שִׁלְחִים, *armed men* [Gesenius], or *fountains* [Fürst]; Sept. Σελείμ v. r. Σαλί), a city in the southern portion of the tribe of Judah, mentioned between Lebaoth and Ain, or Ain-Rimmon (Josh. xv, 32). In the list of Simeon's cities in Josh. xix, *Sharuken* (ver. 6) occupies the place of Shilhim, and in 1 Chron. iv, 31 this is still further changed to *Shaaraim*. It is difficult to say whether these are mere corruptions or denote any actual variations of name. The juxtaposition of Shilhim and Ain has led to the conjecture that they are identical with the Salim and Ænon of John the Baptist; but their position in the south of Judah,

so remote from the scene of John's labors and the other events of the Gospel history, seems to forbid this.

Shil'lem (Heb. *Shillem'*, שִׁלְמַם, *requital*, as in Deut. xxxii, 35; Sept. Σελλάμ, v. r. Σολλάμ, Συλλάμ, etc.), a son of Naphtali (Gen. xlii, 24; Numb. xxvi, 49); elsewhere (1 Chron. vii, 13) called SHALLUM (q. v.).

Shil'lemite (Heb. collectively with the article *hash-Shillemi'*, הַשִּׁלְמִי; Sept. ὁ Σελλήμι), the patronymic title of the descendants of Shillem (q. v.), the son of Naphtali (Numb. xxvi, 49).

Shilo'ah (Isa. viii, 6). See **SILOAM**.

Shi'loh appears in the A. V. as the rendering of two words in the Hebrew, the one apparently a person, and the other certainly a place. In the following treatment of both we bring together the Scriptural and modern archæological information bearing upon them.

1. (Heb. *Shiloh'*, שִׁילֹה; on the meaning and renderings, see below.) This is a peculiar epithet which was applied, in the prophetic benediction of Jacob on his death-bed (Gen. xlix, 10), to a future personage, and which has ever been regarded by Christians and by the ancient Jews as a denomination of the Messiah. The oracle occurs in the blessing of Judah, and is thus worded: "The sceptre shall not depart from Judah, nor a lawgiver [מִשְׁפָּטָר, *a scribe*, recording the decree uttered by the sovereign] from between his feet [the position frequently depicted on the Egyptian monuments as occupied by the secretary of important persons], until Shiloh come [שִׁילֹה בֶרֶכְיָאָה]: and unto him the gathering [יְקִיָּה, *obedience*, as in Prov. xxx, 17] of the people shall be." The term itself, as well as the whole passage to which it belongs, has ever been a fruitful theme of controversy between Jews and Christians, the former, although they admit, for the most part, the Messianic reference of the text, being still fertile in expedients to evade the Christian argument founded upon it. Neither our limits nor our object will permit us to enter largely into the theological bearings of this prediction; but it is, perhaps, scarcely possible to do justice to the discussion as a question of pure philology without at the same time displaying the strength of the Christian interpretation, and trenching upon the province occupied by the proofs of Jesus of Nazareth being the Messiah of the Old-Test. prophecies. See **MESSIAH**.

I. *Etymological and Grammatical Considerations.*—Before entering upon the more essential merits of the question, it may be well to recite the ancient versions of this passage, which are mostly to be referred to a date that must exempt them from the charge of an undue bias towards any but the right construction. Influences of this nature have, of course, become operative with Jews of a later period.

1. The version of the Sept. is peculiar: "A prince shall not fail from Judah, nor a captain out of his loins, ἕως ἂν ἔλθῃ τὰ ἀποκείμενα αὐτῷ, *until the things come that are laid up for him*." In some copies another reading is found, ἕως ἂν ἀποκύρῃ, *for whom it is laid up*, meaning, doubtless, *in the kingdom*—for whom the kingdom is laid up in reserve. This rendering is probably to be referred to an erroneous lection, לוֹ אֲשֶׁר, *whose it is*. Targ. Onk., "One having the principality shall not be taken from the house of Judah, nor a scribe from his children's children, until the Messiah come, whose the kingdom is." Targ. Jerus., "Kings shall not fail from the house of Judah, nor skillful doctors of the law from their children's children, till the time when the king's Messiah shall come." Syriac, "The sceptre shall not fail from Judah, nor an expounder from between his feet, till he come whose it is;" i. e. the sceptre, the right, the dominion. Arabic, "The sceptre shall not be taken away from Judah, nor a lawgiver from under his rule, until he shall come whose it is." Samaritan, "The sceptre shall not be taken away from Judah, nor a leader

from his banners, until the Pacific shall come." Latin Vulgate, "The sceptre shall not be taken away from Judah, nor a leader from his thigh—*donec veniet qui mittendus est*, until he shall come who is to be sent." This is supposed to be founded upon mistaking in the original שִׁילֹה for שִׁילָה, which latter comes from the root שָׁלַח, signifying *to send*; yet it is adopted by some scholars as the truest reading, the present form of the word being owing, in their opinion, to the error of transcribers in substituting ה for ל.

2. Various other etymologies have been assigned to the term, the advocates of which may be divided into two classes—those who consider the word שִׁילָה as a compound, and those who deem it a radical or simple derivation.

(a.) Those of the first class coincide, (1) for the most part, with the ancient interpreters, taking שִׁילָה as equivalent to שָׁלַח, and this to be made up of ש, the contraction of אֲשֶׁר, *who*, and לוֹ, the dative of the third personal pronoun. The rendering, accordingly, in this case, would be *cujus est*, or *cui est*, *whose it is*, to whom it belongs, i. e. the sceptre or dominion. This interpretation is defended by Jahn (*Einh. in d. A. T.* i, 507, and *Vat. Mes.* ii, 179). It is approved also by Hess, De Wette, Krummacher, and others, including Turner (*Companion to Genesis*, ad loc.). The authority of the ancient versions, already alluded to, is the principal ground upon which its advocates rely. But to this sense it is a serious objection that there is no evidence that the abbreviation of אֲשֶׁר into ש was known in the time of Moses. There is no other instance of it in the Pentateuch, and it is only in the book of Judges that we first meet with it. However the rendering of the old translators may be accounted for, there is no sufficient ground for the belief that the form in question was the received one in their time. If it were, we should doubtless find some traces of it in existing manuscripts. But though these copies exhibit the reading שִׁילֹה, not one of them gives שָׁלַח, and but very few שָׁלָה, which Hengstenberg deems of no consequence, as the omission of the Yod was merely a defective way of writing, which often occurs in words of similar structure. An argument for this interpretation has, indeed, been derived from Ezek. xxi, 27, where the words "until he shall come whose is the dominion," אֲשֶׁר לוֹ הַמַּשְׁכָּן, are regarded as an obvious paraphrase of שָׁלַח or שָׁלָה. But to this it may be answered that while Ezekiel may have had the present passage in his eye, and intended an allusion to the character or prerogatives of the Messiah, yet there is no evidence that this was designed as an interpretation of the name under consideration. The reasons, therefore, appear ample for setting aside, as wholly untenable, the explication of the time here propounded, without advertent to the fact that the ellipsis involved in this construction is so unnatural and violent that no parallel to it can be found in the whole Scriptures.

(2.) Another solution proposed by some expositors is, to derive the word שִׁילָה from שָׁלַח, *child*, and the suffix ה for ל. This will yield the reading "until his (Judah's) son or descendant, the Messiah, shall come." Thus the Targ. Jon., "Until the time when the king's Messiah shall come, the little one of his sons." This view is favored by Calvin (*ad loc.*) and by Knapp (*Dogm.* ii, 138), and also by Dathe. There is, however, no such word in known Hebrew, and as a plea for its possible existence reference is made to an Arabic word, *shail*, with the same signification. The only philological defence is (with Luther) to resolve שִׁילָה into a synonym with שָׁלִיָּה, *after-birth* (Deut. xxviii, 57), rendered "young one;" but this requires us to adopt the unnatural supposition that the term properly denoting the *secundines*, or the membrane that encloses the fœtus, is

taken for the fetus itself. Besides, this exposition has an air of grossness about it which prompts its immediate rejection.

(b.) The second class consists of those who consider שִׁילֹה as a radical or simple derivative. Among these, again, there are two principal opinions.

(1.) By translating the word as it is translated everywhere else in the Bible, viz. as the name of the city in Ephraim where the ark of the covenant remained during such a long period, a sufficiently good meaning is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (comp. שִׁילֹה, 1 Sam. iv, 12). The simple translation is, "The sceptre shall not depart from Judah, nor the ruler's staff from between his feet, till he shall go to Shiloh." In this case the allusion would be to the primacy of Judah in war (Judg. i, 1, 2; xx, 18; Numb. ii, 3; x, 14), which was to continue until the Promised Land was conquered, and the ark of the covenant was solemnly deposited at Shiloh. Some Jewish writers (especially Aben-Ezra) had previously maintained that Shiloh, the city of Ephraim, was referred to in this passage; and Servetus had propounded the same opinion in a fanciful dissertation, in which he attributed a double meaning to the words (*De Trinitate*, ii, 61, ed. 1553). But the above translation and explanation, as proposed and defended on critical grounds, was first suggested in modern days by Teller (*Notæ Criticæ et Exegeticæ in Gen. xlix, Deut. xxxiii, Exod. xv, Judg. v* [Hale et Helmstadii, 1766]), and it has since, with modifications, found favor with numerous learned men belonging to various schools of theology, such as Eichhorn, Hitzig, Tuch, Bleek, Ewald, Delitzsch, Rödiger, Kalisch, Luzzatto, and Davidson.

The objections to this interpretation are set forth at length by Hengstenberg (*Christology of the Old Test.*, ii, 1 a, 41, Keith's transl.), and the reasons in its favor, with an account of the various interpretations which have been suggested by others, are well given by Davidson (*Introduction to the Old Test.* i, 199-210). As they are not of a grammatical character, they will be considered below.

(2.) But an exposition of far more weight, both from its intrinsic fitness and from the catalogue of distinguished names which have espoused it, is that which traces the term to the root שָׁלַח, *quievit, to rest, to be at peace*, and makes it equivalent to *pacifactor, peace-maker, or pacifier*, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Isa. ix, 6 is expressly called the "Prince of Peace." This was once the translation of Gesenius, though he afterwards saw reason to abandon it (see his *Lexicon*, s. v.), and it is at present the translation of Hengstenberg in his *Christology of the Old Test.* p. 69, and of the grand rabbi Wogue, in his translation of Genesis, a work which is approved and recommended by the grand rabbins of France (*Le Pentateuque, ou les Cinq Livres de Moïse* [Paris, 1860]).

But, on the other hand, if the original Hebrew text is correct as it stands, there are three objections to this translation, which, taken collectively, seem fatal to it. 1st. The word Shiloh occurs nowhere else in Hebrew as the name or appellation of a person. 2d. The only other Hebrew word, apparently, of the same form, is Giloh (Josh. xv, 51; 2 Sam. xv, 12); and this is the name of a city, not of a person. 3d. The idea conveyed by the proposed interpretation is that of *causing or effecting peace*—an idea for which the Hebrew has an appropriate form of expression, and which, in this word, would normally be מְשַׁלֵּחַ, *meshlêh*. The actual form, however, is diverse from this; and though several examples are adduced by the advocates of this interpretation of analogous derivations from a trilateral root, as כִּדְרוֹ from כָּדַר, כִּישׁוֹר from כָּשַׁר, קִטְוֹר from קָטַר, etc., yet it is certain that the original characteristic of this form

is a *passive* instead of an *active* sense, which שִׁילֹה requires according to the exegesis proposed. We must therefore understand the term as expressing the gentle character of the Messianic sway in general. The other objections will be considered below.

(3.) The next best translation of Shiloh is perhaps that of "rest," from the same root, taken passively. The passage would then run thus: "The sceptre shall not depart from Judah . . . till rest come [till he come to rest], and the nations obey him;" and the reference would be to the Messiah, who was to spring from the tribe of Judah. This translation deserves respectful consideration, as having been ultimately adopted by Gesenius. It was preferred by Vater, and is defended by Knobel in the *Exegetisches Handbuch* (Gen. xlix, 10). This import of the term, however, would rather require a fem. than a masc. form. It likewise remains subject to the objection that Shiloh occurs nowhere else in the Bible in this sense, and that the import thus becomes neither apt nor noteworthy. To say nothing of other objections, one circumstance seems decisive, so clearly decisive that Hofmann has given up this last interpretation and embraced the common one, pronouncing the interpretation which makes Shiloh a city "the most impossible of all." The circumstance is this, that Shiloh, originally Shilon, and making its adjective "Shilonite," belongs to a class of nouns in Hebrew which are never appellatives or common nouns, but always proper names either of persons or of places; and this is unaffected by a variation in the etymology, whether we derive it, with almost all authorities, from שָׁלַח (*shaláh*), or whether, with Rödiger, from the root of Solomon's name, שָׁלָם (*shalám*), reckoning that there has been a change of the letters *m* and *n*.

(4.) A less obvious and more difficult derivation is from שָׂאֵל, with a substitution of *ʾ* for *ʿ*; thus yielding the meaning of the *desired* or *expected* one. This, however, is so much more inapt, that we may say the choice lies between two of the above interpretations, which we accordingly discuss more in detail.

II. *Exegetical and Historical Considerations.*—1. *On the Interpretation of Shiloh as the Well-known Place of that Name.*—The explanation of this, as given by Rödiger, in his continuation of Gesenius's *Thesaurus*, is "that the tribe of Judah should go before the other tribes, and have the supreme command in the war waged with the Canaanites (see Judg. i, 1 sq.; comp. xx, 18; Numb. ii, 1 sq.; x, 14); and that this war could not be said to be finished and the victory to be gained till after the victorious Jews had entered Shiloh, a city standing almost in the centre of the land west of Jordan, and had there set up the sacred ark; then, at length, when the peoples of Canaan had been reduced to obedience, Judah ceased to be leader in the war, and the tranquilized country was portioned out among the tribes." It is not very easy to see how this paraphrase arises out of the words of the text; nor, should we even admit that it does, do we seem to have attained to any very satisfactory meaning. But, apart from any special objections to some particular exposition, we urge against this translation:

(1.) There is no evidence of the existence of the city Shiloh in the time of Jacob, or, if it did exist, it was not improbably known by some other name; for we shall have occasion to suggest that the name of the city was derived from this prophecy. Nay, granting that it existed under the name of Shiloh, it is a gratuitous assertion that Jacob spoke to his sons of a place so entirely unimportant, with which we have no reason to think that he or they ever had any connection. In this respect it stands entirely on a different footing from the city Shechem, to which there is thought to be a reference in Gen. xlviii, 22.

(2.) There is something which requires to be explained in the expression "until he come to Shiloh."

Supposing it to refer to the place to which the tabernacle was brought by Joshua, what had *Judah* to do with this "coming to Shiloh" more than the other tribes, "Judah, of which tribe Moses spake nothing concerning priesthood?" At the very least, it suggests a grave doubt whether Judah really was meant to be the subject of the verb; the more so that it would have been extremely easy to write the sentence so as to leave no room for doubt as to the grammatical construction.

(3.) A violent surprise is given to us by this limitation of Judah's lead or rule to the time anterior to his coming to Shiloh. The prophecy of Jacob was in reference to things which should befall them in *the last days* (Gen. xlix, 1). Whether we incline to a definite or to an indefinite interpretation of this phrase, it is much at variance with a prophecy of Judah's supremacy for forty-five or fifty years, from the Exode till the coming of the tribes to Shiloh; of which period thirty-eight years were spent in a state of suspension from the favor of God, so far as this was manifested by church privileges. Was this all the pre-eminent blessing of Judah? Was a sudden termination to be put to the triumphal progress, "conquering and to conquer," which we anticipated as we read ver. 8, 9? Or, at least, must a veil be thrown over what remained of it subsequent to the arrival at Shiloh?

(4.) So we come to the question, Does this interpretation harmonize in any way with the facts of the case? Delitzsch is well aware that, on this interpretation, the prophecy implies, first, that Judah had "the sceptre and the lawgiver" till it came to Shiloh, and, secondly, that this coming to Shiloh was a turning-point in its history; and it is incomprehensible to us how he persuades himself into affirming these two propositions. As to the former, we have not space for discussing the varieties of translation proposed; but, for the sake of argument, let us concede as much as possible in the way of cutting down and restricting the meaning of these terms. So far as we are aware, the pre-eminence was assigned to Judah only in one respect, during the march through the wilderness—that it took the first place among the tribes in the order of marching (Numb. ii and x); unless we add that the same order was observed in the consecration-offerings at the tabernacle (ch. vii). But in this we see no more than a very limited amount of *honor*; while the *power* and *authority* were first in the hands of Moses and Aaron the Levites, and next in those of Joshua the Ephraimite. Let any one compare the dying blessing of Moses with this blessing of Jacob, and see how brief is the notice of Judah (a tribe certainly the most numerous, but not possessed of any other practical advantage), and how full are the blessings pronounced upon Levi and Joseph. We do not either deny or undervalue the honor of the position assigned to Judah; but we say it was of little value unless taken in connection with this prophecy and regarded as a prognostic or a pledge of its fulfilment in due time, or, at most, a prelude to it and a preparation for it. The proper fulfilment began in David's time; and "the sceptre and the lawgiver" are to be sought for in his line, to which the promises were made of an unending dominion. But before David came to hold the sceptre, the city Shiloh had ceased to be the religious centre of the people of Israel, and its mention in this prophecy would be inexplicable. As to the second proposition involved in this interpretation, there is not even a shadow of evidence that the coming to Shiloh was a turning-point in the relations of the tribe of Judah either to the other tribes or to the heathen. Whatever primacy Judah had enjoyed already, one may plausibly assert that it continued to enjoy, it was the first to be sent to the wars after Joshua's death, yet alone and not commanding the others (Judg. i, 1, 2); it was sent foremost into the battle in the civil war with Benjamin (xx, 18), and it furnished the first of the judges (iii, 9). These are

certainly small matters, but they are quite as great as any which can be named anterior to the arrival at Shiloh. Still they are in perfect harmony with the fact that the time for Judah's sceptre and lawgiving had not yet come, as the age of the judges was the period in which Ephraim was the leading tribe (comp. viii, 1-3; xii, 1-6; Psa. lxxviii).

The difficulties in the way of adopting this translation are, indeed, so very great that in his commentary Tuch suggested a modification which has met with some little support. He supplies an indefinite subject to the verb—"The sceptre shall not depart from Judah . . . as long as [people] come to Shiloh;" that is to say, forever. The objections to this rendering are so overwhelming that we may be sure it never would have been proposed but for the perplexities of those who deny that Shiloh is a person. There is an awkwardness in supplying this subject, there is an entire misapprehension of the meaning of the conjunction; and the use of the phrase "as long as people come to Shiloh," in the sense "forever," has no parallel in Scripture, and appears most unnatural when we look at it in the light of history.

2. *On the Reference of the Name Shiloh to the Messiah.*—The old and simple interpretation is that the sovereignty in Israel belongs to Judah, and that this prerogative shall not be exhausted till the promised Saviour comes, who shall bring all the blessings to the highest perfection.

a. *Arguments in Favor of this Interpretation.*—(1.) The name is now generally admitted to be an adjective meaning "*peaceful*," a title most appropriate to our Saviour, and confirmed by parallels or imitations to which it will be necessary to refer. It is highly probable that there is a close connection between the name of the person here and that of the place which is mentioned in the other texts in which the word occurs; and this connection indicates the circumstance by which many have been led to adopt the explanation which we have rejected, owing to its appearance in all the other texts; they felt that the place Shiloh was not to be thrust out of this text without good reason. Now the fact is not that there is here a reference to the place, for all attempts to make this intelligible and satisfactory have failed, but that in the place there is a reference to this text. Shiloh was the name given to the place where the ark found a place of rest for itself (or, otherwise, the place which already bore this name was selected as the resting-place of the ark), because it expressed the hope of the people that in this place they should find "one greater than the Temple;" Shiloh the *place* reminded them continually of this prophecy of Shiloh the *person*, and kept alive the faith of the people in "him that was to come." Similar to this is the name Jerusalem, "possession of peace," or "foundation of peace," to which the ark was afterwards carried as Jehovah's place of rest forever, which he had desired, and in which the Lord whom they sought should suddenly come to his temple. This reference to the person Shiloh in the name of the place where the people met with God has a parallel in the history of the most prominent persons after the sceptre and the lawgiver actually came to Judah. For David named his son and successor Solomon, a name which in Hebrew bears a much closer analogy to Shiloh than the English reader might suppose, both being also the same in meaning. David had been restrained from building the Temple because he had shed blood abundantly; but he gave the name Solomon to him who was to build it, for he was to be "a man of rest," and the Lord was to give "peace and quietness to Israel in his days" (1 Chron. xxii, 8, 9). This also illustrates the following words of the prophecy, "until the Peaceful One comes, and unto him shall the gathering of the peoples be." The *peoples*, in the plural, are admitted by almost universal consent to be the heathen nations, attracted by this Peaceful One who gives them rest (see Matt. xi, 28-30; xxiii, 37).

This thought comes out more and more beautifully as the precise signification of the *gathering* of the peoples is contemplated; whether it be "attachment," or "trust," or, most simply and probably, "filial obedience," as in Prov. xxx, 17.

(2.) Those alone who acknowledge Shiloh to be a person bring the blessing of Jacob into harmony with the promises in the patriarchal period. There is difference of opinion, of course, as to the clearness with which Christ's person was then revealed. But there is no room for doubting that two subjects were brought prominently forward—the multiplication of their seed, and the prospect that out of them should come a blessing for all the nations of the world. The former subject appears repeatedly in this chapter; but the latter is overlooked entirely in the other interpretation, while full justice is done to it in this one. Nay, the line of blessing had been distinctly marked out in the case of the three *successive* patriarchs; now, when the third of these saw that blessing expanding over twelve *contemporary* patriarchs, it was most natural that Jacob, who had been so anxious to obtain it for himself, should name the one from whom the seed of blessing in the highest sense was to come. And unless we admit that a prerogative is granted to Judah, far different from the narrow concession in time and degree which is made by those who understand Shiloh here to be a place, it will be difficult to discover any ground for the assertion that the chief ruler was to spring from Judah, of whom the Lord had made choice for this place of power and honor (1 Chron. v, 2; xxviii, 4). It is true that some of the best living expositors of the Messianic interpretation do not think that the descent of our Lord from Judah is the notion conveyed in the words "from between his feet." But it is vain to make any difficulty out of this; for, speaking of each of the tribes in succession and one by one as Jacob does, it is impossible that he can mean to make Shiloh belong to any other tribe.

(3.) If we understand Shiloh to be a person, we see that the blessing pronounced on Judah is one complete homogeneous whole. It begins with laying emphasis on his name, "He that shall be praised," a verb which certainly is used habitually, it would even seem exclusively, of God; as if to hint that there is a mysterious fullness of blessing in Judah's case which involves something more than human. It promises him all praise and favor from his brethren; and in the middle of this it places his invincible superiority to his enemies. It compares him to a lion, in respect of his resistless activity, and of his safety when he lies down; and on this metaphor it enlarges throughout a verse. It carries the blessing onward to its culmination in Shiloh: for there is no change of subject, since Shiloh is a part of Judah, its head and noblest part; and there is no limitation in the word "until," which has an inclusive (not an exclusive) meaning in this as in many passages, as much as to say, "The sceptre does not depart till Shiloh comes, and of course after his coming there is no risk of its departure." And so Judah, at whose head is Shiloh, enjoys a rest at once glorious and luxurious in the Promised Land, possessing all the fullness of God's goodness, as is related of the earthly Solomon's reign (1 Kings iv, 24, 25; v, 4, 5), and as shall be realized more nobly in the reign of the heavenly Solomon, whose life on earth already contrasted with that of his ascetic forerunner in certain respects, to which his enemies called attention for a malignant purpose (Luke vii, 33, 34).

(4.) This interpretation is confirmed by other texts referring to it. The prophecies of Balaam refer more than once to the blessing pronounced on Judah, the lion-like course of the people, the royal honor in store for them, and the leader by whom all the noblest things were to be achieved. Especially Numb. xxiv, 17, "I shall see him, but not now; I shall behold him, but not nigh; there shall come a *star* out of Jacob, and a *scep-*

tre shall rise out of Israel, and shall smite the corners of Moab, and destroy all the children of Sheth," of tumult or of pride. Perhaps this distance of the time of fulfilment of the prophecy may be the reason of the extreme brevity of the blessing of Moses pronounced on Judah; though its brevity may be also owing to this, that it is an allusion to the fuller blessing of Jacob. Again, in the age in which the sceptre and the law-giver appeared in Judah, we are at a loss to know what earlier stepping-stone led to the language of Psalms ii and cx, and to that of Nathan's prophecy of the perpetuity and glory of David's line, if Shiloh be not a person: Psalm lxxii, in particular, is the expansion of the faith in his glorious and peaceful reign. In the prophecies of Isaiah there are several references to the Messiah in language which seems connected with this one; the very name "Prince of Peace" (ix, 6) is an interpretation of Shiloh. And in Ezek. xxi, 30-32 (25-27 in the English) there is a reference which few critics have hesitated to acknowledge, and whose influence upon the ancient translators must yet be noticed: "And thou profane wicked prince of Israel, whose day is come, when iniquity shall have an end, thus saith the Lord, Remove the diadem and take off the crown; this shall not be the same: exalt him that is low, and abase him that is high. I will overturn, overturn, overturn it: and it shall be no more, *until he come whose right it is; and I will give it him.*" To mention no more, there are names given to our Lord in the New Test. which must be traced back to this prophecy: such are found in Eph. ii, 14, "For he is our peace," and especially in Rev. v, 5, "the Lion of the tribe of Judah."

b. Objections to this Interpretation.—These have been greatly exaggerated. They are chiefly of a negative character.

(1.) Kurtz, following the earlier opinion of Hofmann in his *Weissagung und Erfüllung*, interposes a theoretical objection that the organic progress of prophecy in connection with the developments of history is unfavorable to the notion of a personal Messiah in the Pentateuch: it would not arise till the promises to the patriarchs had been realized so far as concerned the expansion of the individual into a numerous offspring, when the necessity of a head would come to be felt, that this multitude might be led back to a unity again.

This assumption cannot be admitted: there is a connection certainly between history and prophecy, yet it is nevertheless true that the latter, from time to time, bursts the limits which are imposed upon the former; so that, as we have already said, he who rejects the personal Messiah in this text must be prepared for prophecy taking a much greater and more sudden leap in the age of David. Grant, too, for the sake of argument, that Moses had no conception of a personal Messiah, there is nothing to hinder our belief that Jacob had been gifted enough to see it; just as, if we deny that Jacob saw it, we must admit that Abraham did see Christ's day and rejoice, unless we renounce confidence in our Lord's testimony. Nay, we do not hold that the understanding of the prophets is the measure of the meaning of their predictions; so that our belief that Shiloh is the Saviour does not necessitate our belief that Jacob understood this in the way that we do. Yet, so far as we comprehend the circumstances, we know of no reason for doubting that Jacob did expect a personal Saviour whom he named Shiloh; for an individual head seems requisite for the work mentioned in the text, at once subduing the heathen and attracting them to willing obedience. Compare Psalm xviii, 40 sq., where the head and his work appear, when the sceptre of Judah came into view; also Isa. xi, 1; lv, 4. There is weight in Hengstenberg's observation that the individual comes strongly out in the patriarchal history on account of its biographical character; so that one feels no surprise at the mention of the personal Messiah after reading passages like these: "I will bless *thee*," "In *thee*," not less than "in thy seed, shall all the nations

of the earth be blessed." This is apart from any weight which the apostle teaches us to attach to the word in the singular number: "Now to Abraham and his seed were the promises made; he saith not, And to seeds, as of many; but as of one, And to thy seed, which is Christ."

(2.) A very different objection of a most practical kind is that our interpretation is contradicted by facts, since the sceptre had departed from Judah for centuries before Christ was born; and the appeal is made to the end of the kingdom by the Babylonian captivity, to the continued subjection of the people to the Persian and the Greek governments, to the fact that even the Maccabean princes did not spring from the tribe of Judah, and to the thoroughly foreign nature of the rule of Herod and his family.

In reply, we do not need to enter into a laborious discussion for the purpose of showing that something of Judah's sceptre still remained. Were we to grant all that is alleged, the very fact that Christ arose in due time is proof that the sceptre had not departed from Judah in the course of these reverses; precisely as a total eclipse is no proof that the day is at an end. The sceptre was long of appearing in Judah; Israel had to wait for centuries in faith that kings would arise in the line of promise, although they had not been long of arising in the rejected line of Esau (Gen. xvii, 16; xxxv, 11; xxxvi, 31). The lapse of centuries before the sceptre appeared in Israel does not disturb our faith in this prophecy; neither need the lapse of centuries after it disappeared, if Judah was only kept together till the predicted rod should come forth of the stump of Jesse (Isa. xi, 1). At the worst, we rest in faith on Gabriel's words to Mary—"The Lord God shall give unto him the throne of his father David; and he shall reign over the house of Jacob forever; and of his kingdom there shall be no end" (Luke i, 32, 33). It is important to observe that the facts which stumble some modern Christians were no stumbling-block to ancient Jews and Christians, to whom they were equally well known, and by whom translations and paraphrases were made in which Shiloh was, without hesitation, interpreted to be the Messiah. They understood the true meaning of the prophecy—that it secured a kingdom substantially and truly perpetual, yet liable to interruptions which should seem to the world to be failures of God's word, because only his children understand that chastisements are a part of the blessings secured to them by covenant. At the time when the sceptre did first appear in Judah the law of the kingdom on this point was laid down explicitly by Nathan (2 Sam. vii, 12-16), of which we have a more expanded statement throughout *Psa. lxxxix*.

In a very important sense, however, the sceptre had not departed from Judah even during the Babylonian captivity and the Persian rule; for the national elders were always more or less recognised by these foreign powers, as the titles *Resh gelutha* (prince of the captivity) and *alabarch* (q. v.) evince in later times. See CAPTIVITY; DISPERSED. The authority of Zerubbabel as "governor of Judah" (Hag. ii, 2) evidently rested upon a recognition of this traditional supremacy. Moreover, the Jewish people well understood that this foreign yoke was imposed as a temporary penalty for their sins, and the prophecy obviously refers to a *final*, as well as total, passing-away of civil power, which, it is demonstrable, did not occur till after the reduction of Judea to a Roman province. The restoration of royalty in the persons of the Amonian line, therefore, served legitimately as a link to keep alive this grant; and its transfer to Herod, although but a Jew by adoption, was in like manner a renewal of the prerogative. After the coming of Christ, the Jews themselves acknowledged that "they had no king but Cæsar" (John xix, 15). It would seem to have been Jehovah's original intention to make the Davidic dynasty absolutely perpetual in a political sense, but the condition of loy-

alty to him, which was never overlooked, having failed, the promise was suspended, and at last finally revoked so far as the nationality was concerned. Yet the spiritual import of the grant remained in full force, and shall never be repealed. Christ was the true Heir of David, and the supremacy, whatever it may have originally contemplated, took, in his person, the spiritual phase exclusively. It is this change in the aspect of the Judaic sceptre that justifies the peculiar term Shiloh, the Peaceful, as characterizing the new "kingdom of heaven," in distinction from the vindictive and often sanguinary spirit of the older Judaism.

(3.) It is alleged that we take the word Shiloh in a sense elsewhere unknown, and here unnecessary. The necessity, however, seems to us to be proved by the impossibility of resting satisfied with the other interpretation; and confessedly this necessity has been felt by the vast majority of interpreters of every age, and country, and school of opinion, always excepting open unbelievers. We have pointed out the real and intimate connection of the two names, that of the person and that of the city; nor is there anything unusual in this double use of a name, of which the book of Genesis gives other examples in Enoch and Shechem (iv, 17; xxxiii, 18, 19). If we think that the name of a city has been imagined erroneously here, this is no more than is now commonly supposed in regard to Shalem in ver. 18.

(4.) A comparatively trifling objection is that we mar the simplicity of the structure of the sentence by introducing Shiloh as a new subject; an objection, besides, which presses with equal weight upon our opponents, who forget that "the sceptre" or "the lawgiver," and not "Judah," is the original subject.

On the above questions, see, besides the regular commentaries, and the treatises already cited, the monographs in Latin by Stempel (F. ad O. 1610); Altling (Franec. 1662); Leusler (Giess. 1662); Müller (Jen. 1667); Bürger (Aldt. 1710); Schöttgen (F. ad O. 1718); Vriemoet (Ultraj. 1722); Sherbach (Vitemb. 1743); Huth (Erlang. 1748); Nagel (Aldt. 1767); Gülcher (Lips. 1774); Sixt (Aldt. 1785); and in German by Kern (Gött. 1786); Bahr (Vienna, 1789); also the *Christ. Rev.* 1849, p. 285; *Journ. of Sac. Lit.* April, 1857; *Presb. Quar. Rev.* April, 1861.

2. (Heb. *Shiloh*, שִׁילֹה [Josh. xviii, 1, 8, 9, 10; xix, 51; xxi, 2; xxii, 9, 12; Judg. xviii, 31; xxi, 12; 1 Sam. i, 3, 9; ii, 14; iii, 21; iv, 3, 4, 12; xiv, 3; 1 Kings xiv, 2, 4; Jer. xxvi, 6], שִׁילֹה [1 Kings ii, 27]; also *Shilo*, שִׁלֹה [Judg. xxi, 19; 1 Sam. i, 24; iii, 21; Psa. lxxvii, 60; Jer. vii, 14; xxvi, 9; xli, 5], or שִׁילֹה [Judg. xxi, 21; Jer. vii, 12]; and perhaps also *Shilon*, שִׁילֹן [which does not occur], whence the gentile *Shilonite* [q. v.], שִׁילֹנִי [1 Kings xi, 29; xii, 15]; in the Sept. usually *Σηλώ* or *Σηλώμ*, v. r. *Σαλών*, *Σαλήμ*; Josephus, *Σίλω* [*Ant.* viii, 7, 7; 11, 1; *Σιλόων*, v, 1, 19; 2, 9]; *Σηλό* [v, 2, 12]; Vulg. *Silo*, and more rarely *Selo*, a town or village in the tribe of Ephraim, interesting for its sacred associations, and regarded by many as indicated in the blessing of the dying Jacob (Gen. xlix, 10). See the preceding article. The name was derived probably from שָׁלוֹחַ, שָׁלַח, "to rest," and represented the idea that the nation attained at this place to a state of rest, or that the Lord himself would here rest among his people. Taanath-shiloh (q. v.) may be another name of the same place, or of a different place near it, through which it was customary to pass on the way to Shiloh, as the obscure etymology may indicate. See also Kurtz, *Gesch. des A. Bund.* ii, 569. See EPHRAIM, TRIBE OF.

Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The ark of the covenant, which had been kept at Gilgal during the progress of the conquest (Josh. xviii, 1 sq.), was removed thence on the subjugation of the country, and kept at Shiloh from

Seilûn, from the south. (From a photograph by the Editor.)

the last days of Joshua to the time of Samuel (ver. 10; Judg. xviii, 31; 1 Sam. iv, 3). It was here the Hebrew conqueror divided among the tribes the portion of the west Jordan-region, which had not been already allotted (Josh. xviii, 10; xix, 51). In this distribution, or an earlier one, Shiloh fell within the limits of Ephraim (xvi, 5). The seizure here of the "daughters of Shiloh" by the Benjamites is recorded as an event which preserved one of the tribes from extinction (Judg. xxi, 19-23). The "annual feast of the Lord" was observed at Shiloh, and on one of these occasions the men lay in wait in the vineyards, and when the women went forth "to dance in dances," the men took them captive and carried them home as wives. Here Eli judged Israel, and at last died of grief on hearing that the ark of the Lord was taken by the enemy (1 Sam. iv, 12-18). The story of Hannah and her vow, which belongs to our recollections of Shiloh, transmits to us a characteristic incident in the life of the Hebrews (i, 1, etc.); Samuel, the child of her prayers and hopes, was here brought up in the sanctuary, and called to the prophetic office (ii, 26; iii, 1). The ungodly conduct of the sons of Eli occasioned the loss of the ark of the covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the divine indignation. "Go ye now," says the prophet, "unto my place which was in Shiloh, where I set my name at the first, and see what I did to it, for the wickedness of my people Israel" (Jer. vii, 12). Some have inferred from Judg. xviii, 31 (comp. Psa. lxxviii, 60 sq.) that a permanent structure or temple had been built for the tabernacle at Shiloh, and that it continued there (as it were *sine numine*) for a long time after the tabernacle was removed to other places. But the language in 2 Sam. vii, 6 is too explicit to admit of that conclusion. God says there to David, through the mouth of Nathan the prophet, "I have not dwelt in any house since the time that I brought up the children of Israel out of Egypt, even to this day, but have walked in a tent and in a tabernacle." So in 1 Kings iii, 2, it is said expressly that no "house" had been built for the worship of God till the erection of Solomon's Temple at Jerusalem. It must be in a spiritual sense, therefore, that the tabernacle is called a "house" or "temple" in those passages which refer to Shiloh. God is said to dwell where he

is pleased to manifest his presence or is worshipped; and the place thus honored becomes his abode or temple, whether it be a tent or a structure of wood or stone, or even the sanctuary of the heart alone. Ahijah the prophet had his abode at Shiloh in the time of Jeroboam I, and was visited there by the messengers of Jeroboam's wife to ascertain the issue of the sickness of their child (1 Kings xi, 29; xii, 15; xiv, 1, etc.). The people there after the time of the exile (Jer. xli, 5) appear to have been Cuthites (2 Kings xvii, 30) who had adopted some of the forms of Jewish worship. (See Hitzig, *Zu Jerem.* p. 331.) Jerome, who surveyed the ruins in the 4th century, says, "Vix ruinarum parva vestigia, vix altaris fundamenta monstrantur" (*Ad Zeph.* i, 14).

The principal conditions for identifying with confidence the site of a place mentioned in the Bible are—(1) that the modern name should bear a proper resemblance to the ancient one, (2) that its situation accord with the geographical notices of the Scriptures; and (3) that the statements of early writers and travellers point to a coincident conclusion. Shiloh affords a striking instance of the combination of these testimonies. The description in Judg. xxi, 19 is singularly explicit. Shiloh, it is said there, is "on the north side of Bethel, on the east side of the highway that goeth up from Bethel to Shechem, and on the south of Lebonah." In agreement with this, the traveller at the present day, going north from Jerusalem, lodges the first night at Beitln, the ancient Bethel; the next day, at the distance of a few hours, turns aside to the right, in order to visit Seilûn, the Arabic for Shiloh; and then passing through the narrow Wady which brings him to the main road, leaves el-Lebbân, the Lebonah of Scripture, on the left, as he pursues "the highway" to Nablûs, the ancient Shechem. Its present name is sufficiently like the more familiar Hebrew name, while it is identical with Shilon (see above), on which it is evidently founded. Again, Jerome (*ut sup.*) and Eusebius (*Onomast.* s. v. Σηλώ) certainly have Seilûn (Σηλῶν) in view when they speak of the situation of Shiloh with reference to Neapolis or Nablûs. It discovers a strange oversight of the data which control the question, that some of the older travellers have placed Shiloh at Neby Samwil, about two hours north-west of Jerusalem. The contour of the region, as the traveller views it on the ground, indicates very closely where the ancient town must have stood. A tell, or moderate hill, rises from

an uneven plain, surrounded by other higher hills, except a narrow valley on the south, which hill would naturally be chosen as the principal site of the town. The tabernacle may have been pitched on this eminence, where it would be a conspicuous object on every side. The ruins found there at present are very inconsiderable. They consist chiefly of the remains of a comparatively modern village, with which some large stones and fragments of columns are intermixed, evidently from much earlier times. Near a ruined mosque flourishes an immense oak, the branches of which the winds of centuries have swayed. Just beyond the precincts of the hill stands a dilapidated edifice, which combines some of the architectural properties of a fortress and a church. Three columns with Corinthian capitals lie prostrate on the floor. An amphora between two chaplets, perhaps a work of Roman sculpture, adorns a stone over the doorway. The natives call this ruin the "Mosque of Seilân" (so Robinson; Wilson understood it was called "Mosque of the Sixty" [*Sittin*] [*Lands of the Bible*, ii, 294]). The interior was vaulted. The materials are unsuited to the structure, and have been taken from an older building. At the distance of about fifteen minutes from the main site is a fountain, which is approached through a narrow dale. Its water is abundant, and, according to a practice very common in the East, flows first into a pool or well, and thence into a large reservoir, from which flocks and herds are watered. This fountain, which would be so natural a resort for a festal party, may have been the place where the "daughters of Shiloh" were dancing when they were surprised and borne off by their captors. In this vicinity are rock-hewn sepulchres, in which the bodies of some of the unfortunate house of Eli may have been laid to rest. There was a Jewish tradition (Asher, *Benj. of Tud.* ii, 435) that Eli and his sons were buried here. It is certainly true, as some travellers remark, that the scenery of Shiloh is not specially attractive; it presents no feature of grandeur or beauty adapted to impress the mind and awaken thoughts in harmony with the memories of the place. At the same time, it deserves to be mentioned that, for the objects to which Shiloh was devoted, it was not unwisely chosen. It was secluded, and therefore favorable to acts of worship and religious study, in which the youth of scholars and devotees, like Samuel, was to be spent. Yearly festivals were celebrated there, and brought together assemblages which would need the supplies of water and pasturage so easily obtained in such a place. Terraces are still visible on the sides of the rocky hills which show that every foot and inch of the soil once teemed with verdure and fertility. The ceremonies of such occasions consisted largely of processions and dances, and the place afforded ample scope for such movements. The surrounding hills served as an amphitheatre whence the spectators could look and have the entire scene under their eyes. The position, too, in times of sudden danger, admitted of an easy defence, as it was a hill itself, and the neighboring hills could be turned into bulwarks. To its other advantages we should add that of its central position for the Hebrews on the west of the Jordan. An air of oppressive stillness hangs now over all the scene, and adds force to the reflection that truly the "oracles" so long consulted there "are dumb;" they had fulfilled their purpose, and given place to "a more sure word of prophecy." A visit to Shiloh requires a détour of several miles from the ordinary track, and it has been less frequently described than other more accessible places. See Reland, *Palästina*, p. 1016; Bachiene, *Beschreibung*, ii, 582; Raumer, *Paläst.* p. 201; Ritter, *Erdk.* xv, 631 sq.; Robinson, *Bib. Res.* ii, 269-276; Wilson, *Lands of the Bible*, ii, 294; Stanley, *Sin. and Pal.* p. 231-233; Porter, *Handb. of Syria*, ii, 328; Ridgway, *The Lord's Land*, p. 517 sq.; Bäder, *Palästine*, p. 327; Conder, *Tent Work in Palestine*, i, 81 sq.

Shiloh. See SHILOH; SHILONITE.

Shilo'ni [rather *Shi'loni*] (Neh. xi, 5). See SHILONITE.

Shi'lonite [some *Shilo'nite*] (Heb. with the art. *hash-Shiloni'*, הַשִּׁילֹנִי [2 Chron. ix, 29], הַשִּׁילֹנִי [x, 15], הַשִּׁילֹנִי [1 Kings xi, 29; xii, 15; xv, 29; 1 Chron. ix, 5 (A. V. "the Shilonites")], or הַשִּׁילֹנִי [Neh. xi, 5; A. V. "Shiloni"]; Sept. ὁ Σηλωνίτης; but in 1 Chron. ix, 5, ὁ Σηλωνί; in Neh. xi, 5, Δηλωνέ v. r. Ἰλωνί and Σηλωνί, a patril or patronymic, used for two classes of persons.

1. A native or resident of Shiloh—a title ascribed only to Ahijah, the prophet who foretold to Jeroboam the disruption of the northern and southern kingdoms (1 Kings xi, 29; xii, 15; xv, 29; 2 Chron. ix, 29; x, 15). Its connection with Shiloh is fixed by 1 Kings xiv, 2, 4, which shows that that sacred spot was still the residence of the prophet. See SHILOH.

2. A descendant of Shelah, the youngest son of Judah—a title that occurs (Neh. xi, 5) in a passage giving an account (like 1 Chron. ix, 3-6) of the families of Judah who lived in Jerusalem at the date to which it refers, and (like that) it divides them into the great houses of Pharez and Shelah. The same family are mentioned among the descendants of Judah dwelling in Jerusalem at a date difficult to fix (1 Chron. ix, 5). They are doubtless the members of the house who in the Pentateuch (Numb. xxvi, 20) are more accurately designated SHELANITES (q. v.). This is supported by the reading of the Targum Joseph on the passage "the tribe of Shelah," and is allowed by Gesenius. The change of *Shelani* to *Shiloni* is the same which seems to have occurred in the name of Siloam—Shelach in Nehemiah and Shiloach in Isaiah. See SHELAH.

Shil'shah (Heb. *Shilshah'*, שִׁלְשָׁה, triad [Gesen.] or strong [Fürst]; Sept. Σαλίσά), the ninth named of the eleven sons of Zophah of the tribe of Asher (1 Chron. vii, 37). B.C. ante 1015.

Shim'eä (Heb. *Shima'*, שִׁמְעָא, fame; Sept. Σαμαά, v. r. Σαμά, Σαμάς, Σαμάν, etc.), the name of four Hebrews. See also SHIMEAH.

1. A Gershonite Levite, father of Berachiah and grandfather of Asaph the musician (1 Chron. vi, 39 [Heb. 24]). B.C. cir. 1200.

2. A Merarite Levite, son of Uzza and father of Hagiah (1 Chron. vi, 30 [Heb. 15]). B.C. ante 1043.

3. The third in age of David's brothers, and father of Jonathan who slew Goliath's brother (1 Chron. xx, 7). In the A. V. at 1 Chron. ii, 13 the name is even less correctly Anglicized "Shimma." Josephus calls him *Samamus* (Σάμαμος, Ant. vi, 8, 1) and *Sama* (Σαμά, ibid. vii, 12, 2). He is elsewhere (2 Sam. xiii, 3, etc.) called SHIMEAH (q. v.); but SHAMMAH (q. v.) appears to have been his more correct name (1 Sam. xvi, 9). See also SHIMEATHITE.

4. A son of David and Bathsheba (1 Chron. iii, 5), elsewhere (2 Sam. v, 14; 1 Chron. xiv, 4) called SHAMMUA (q. v.). See also DAVID.

Shim'eah (Heb. *Shimah'*, שִׁמְעָה [text in 2 Sam. xxi, 21, *Shimay'*, שִׁמְעָי, but the margin has שִׁמְעָי], i. q. *Shimeä*, Sept. Σαμαά, v. r. Σαμά, Σαμαά, Σαμαέ; in 2 Sam. xxi, 21, Σεμεί), the name of two Hebrews.

1. One of David's older brothers, and father of Jonathan and Jonadab (2 Sam. xxi, 21); elsewhere (1 Sam. xvi, 9) called SHAMMAH (q. v.), also SHIMEA (1 Chron. xx, 7; "Shimma," 1 Chron. ii, 13).

2. A "son" of Mikloth, who seems to have been the youngest son of Jehiel, a Benjamite, and "father" (? founder) of Gibeon (1 Chron. viii, 32). B.C. perhaps 536. In a parallel passage (1 Chron. ix, 38) he is called SHIMEAM (q. v.).

Shim'eäm (Heb. *Shimam'*, שִׁמְעָם, their fame; Sept. Σαμαά v. r. Σαμά), a descendant of Jehiel the Benjamite, and a chief resident at Jerusalem (1 Chron.

ix, 38); elsewhere (1 Chron. viii, 32) called SHIMEAH (q. v.).

Shim'eāth (Heb. *Shimath'*, שִׁמְעָת, fem. of *Shimeah*; Sept. Σημάθ, v. r. Σαμάθ, Σαμά, and Ἰεμονάθ), an Ammonitess, mother of Zabad or Jozachar, one of the two murderers of king Josiah (2 Kings xii, 21; 2 Chron. xxiv, 26). B.C. ante 609.

Shim'eāthite (Heb. only in the plur. *Shimathim'*, שִׁמְעָתִים, a patronymic from *Shimeah*; Sept. Σαμαθίμ), the name of one of the three families of "scribes" resident at Jabez (q. v.) in the tribe of Judah; descendants apparently of a Shimeah who seems himself to have been of the family of Salma, and not to have been connected with the Kenites (q. v.), possibly the brother of David (2 Sam. xxi, 21).

Shim'ei (Heb. *Shimi'*, שִׁמְעִי, *my fame*, or *renowned*; Sept. Σεμεί, but Σαμαθ in 1 Chron. viii, 21; Σαμου in Ezra x, 23; Σεμείας in Esth. ii, 5; and v. r. Σεμεία occasionally elsewhere), the name of some sixteen Hebrews.

1. The second named of the two sons of Gershon the son of Levi (Exod. vi, 17; A. V. "Shimi;" Numb. iii, 18; 1 Chron. vi, 17 [Heb. 2]; Zech. xii, 13). B.C. post 1874. In 1 Chron. vi, 29 [Heb. 14] he is called the son of Libni and father of Uzza, and both are reckoned as sons of Merari; but there is reason to suppose that there is some clerical error in this verse, as he is everywhere else represented to be Libni's brother. In 1 Chron. xxiii, 7-10 his posterity is enumerated, but the text has probably there also suffered a transposition, so that we ought to read, "Of the Gershonites were Laadan [or Libni] and Shimei. The sons of Laadan the chief was Jehiel, and Zetham, and Joel, three; these were the chief of the fathers of Laadan. The sons of Shimei, Shelomith [or Shelomoth], and Haziel, and Haran, three. And the sons of Shelomith [instead of Shimei] were Jahath, Zina, and Jeshu, and Beriah; these four were the sons of Shelomith [or perhaps Shimei might here remain]. And Jahath was the chief," etc. Both Keil and Zöckler (in Lange), however, regard Laadan as different from Libni, and make out two distinct persons here by the name of Shimei. See No. 3, below.

2. A Reubenite, son of Gog and father of Micah (1 Chron. v, 4). B.C. post 1874.

3. A Gershonite Levite, son of Jahath and father of Zimnah in the ancestry of Asaph (1 Chron. vi, 42 [Heb. 27]). B.C. cir. 1695. Some have regarded him as identical with the younger son of Gershon (ver. 17 [Heb. 2]), but the other particulars do not allow this.

4. A Simeonite, son of Zachur, and father of sixteen sons and six daughters (1 Chron. iv, 26, 27). B.C. ante 1618. He was perhaps the same with SHEMALAH (q. v.) the ancestor of Ziza (1 Chron. iv, 37).

5. One of the heads of the families of Benjamites resident at Jerusalem (1 Chron. viii, 21; A. V. "Shimhi"); apparently the same with SHEMA (q. v.) the son of Elpaal (ver. 13). B.C. post 1618.

6. A citizen of Ramah appointed overseer of David's vineyards (1 Chron. xxvii, 27). B.C. 1043.

7. The son of Gera, a Benjamite of the house of Saul, who lived at Bahurim during the reign of David, and is associated with some of the most painful transactions of the reign of that monarch and his successor. His residence there agrees with the other notices of the place, as if a marked spot on the way to and from the Jordan valley to Jerusalem, and just within the border of Benjamin. See BAHURIM. He may have received the unfortunate Phaltiel after his separation from Michal (2 Sam. iii, 16).

1. When David and his suite were seen descending the long defile from Olivet on his flight from Absalom (2 Sam. xvi, 5-13), the whole feeling of the clan of Benjamin burst forth without restraint in the person of Shimei. His house apparently was separated from the

road by a deep valley, yet not so far as that anything that he did or said could not be distinctly heard. He ran along the ridge, cursing, throwing stones at the king and his companions, and when he came to a patch of dust on the dry hill-side, taking it up and throwing it over them. Abishai was so irritated that, but for David's remonstrance, he would have darted across the ravine (ver. 9) and torn or cut off his head. The whole conversation is remarkable, as showing what may almost be called the slang terms of abuse prevalent in the two rival courts. The cant name for David in Shimei's mouth is "the man of blood," twice emphatically repeated: "Come out, come out, thou man of blood" — "A man of blood art thou" (xvi, 7, 8). It seems to have been derived from the slaughter of the sons of Saul (ch. xxi), or generally perhaps from David's predatory, warlike life (comp. 1 Chron. xxiii, 8). The cant name for a Benjamite in Abishai's mouth was "a dead dog" (2 Sam. xvi, 9; comp. Abner's expression, "Am I a dog's head?" iii, 8). "Man of Belial" also appears to have been a favorite term on both sides (xvi, 7; xx, 1). The royal party passed on, Shimei following them with his stones and curses as long as they were in sight. (See Lorenz, *De Crimine Simeï in Davidem* [Strasb. 1749].) B.C. 1023.

2. The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (2 Sam. xix, 18; Sept. διαβαίνοντος; Josephus, *Ant. vii, 2, 4, ἐπὶ τῇ γέφυρᾳ*), the first person to welcome him on the western, or perhaps even on the eastern, side was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in abject penitence. "He was the first," he said, "of all the house of Joseph," thus indicating the close political alliance between Benjamin and Ephraim. Another altercation ensued between David and Abishai, which ended in David's guaranteeing Shimei's life with an oath (2 Sam. xix, 18-23), in consideration of the general jubilee and amnesty of the return. B.C. 1023.

3. But the king's suspicions were not set to rest by this submission; and on his death-bed he recalls the whole scene to the recollection of his son Solomon. Shimei's head was now white with age (1 Kings ii, 9), and he was living in the favor of the court at Jerusalem (ver. 8). B.C. 1013. Solomon gave him notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. The Kidron, which divided him from the road to his old residence at Bahurim, was not to be crossed. He was to build a house in Jerusalem (ii, 36, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two slaves who had escaped to Gath, he went out on his ass and made his journey successfully (ii, 40). On his return, the king took him at his word, and he was slain by Benaiah (ii, 41-46). B.C. 1009. In the sacred historian, and still more in Josephus (*Ant. viii, 1, 5*), great stress is laid on Shimei's having broken his oath to remain at home; so that his death is regarded as a judgment, not only for his previous treason, but for his recent sacrilege. (See Ortlieb, *De Processu Sol. contra Shimeï* [Lips. 1719].) See DAVID; SOLOMON.

8. One of the faithful adherents of Solomon at the time of Adonijah's usurpation (1 Kings i, 8). B.C. 1015. Probably he is the same as Shimei the son of Elah, Solomon's commissariat officer in Benjamin (iv, 18). Ewald, however, suggests (*Gesch. iii, 266*) that he may have been the same with Shimeah or Shammah, David's brother (1 Sam. xvi, 9; 2 Sam. xxi, 21). From the mention which is made of "the mighty men" in the same verse, one might be tempted to conclude that Shimei is the same with Shammah the Hararite (2 Sam. xxiii, 11).

9. The head of the tenth division of twelve musicians severally in the distribution by David (1 Chron. xxv, 17). B.C. 1013. It would seem that he was one

of the sons of Jeduthun, for a name is necessary in ver. 3 to complete the number six there given, and all the other lists are full.

10. A Levite of the descendants of Heman who assisted in the purification of the Temple under Hezekiah (2 Chron. xxix, 14). B.C. 726.

11. A Levite who, in connection with his brother Cononiah the Levite, had charge of the offerings, the tithes, and the dedicated things in the renewal under Hezekiah (2 Chron. xxxi, 12, 13). B.C. 726. He was probably the same as the preceding.

12. A son of Pedaiah and brother of Zerubbabel (q. v.), but whether by the same mother or not is doubtful (1 Chron. iii, 19). B.C. 536.

13. A Benjamite, "son" of Kish and "father" of Jair in Mordecai's ancestry (Esth. ii, 5). B.C. ante 479.

14. A Levite who divorced his Gentile wife after the captivity (Ezra x, 23). B.C. 459.

15. An Israelite of "the sons of Hashum" who did the same (Ezra x, 33). B.C. 459.

16. An Israelite of "the sons of Bani" who did the same (Ezra x, 38). B.C. 459.

Shim'eon (Ezra x, 31). See SIMEON.

Shim'hi (1 Chron. viii, 21). See SHIMEI 5.

Shi'mi (Exod. vi, 17). See SHIMEI 1.

Shim'ite (Heb. with the art. *hash-Shimi'*, שִׁמְיִי, a patronymic from *Shimei*; Sept. ὁ Σημί; A. V. "the Shimeites"), a name (Numb. iii, 21; comp. Zech. xii, 13) of the descendants of Shimei 1, the son of Gershon.

Shim'ma (1 Chron. ii, 13). See SHIMEAH 1.

Shi'mon (Heb. *Shimon'*, שִׁמְעוֹן, *desert*; Sept. Σεμίων v. r. Σεμίων), a person vaguely mentioned (1 Chron. iv, 20) among the descendants of Judah in Canaan, and the father of four sons. B.C. post 1618.

Shim'rath (Heb. *Shimrath'*, שִׁמְרָת, *guard*; Sept. Σαμαράθ), the last named of the nine sons of Shimhi (i. e. Shimei), a Benjamite of Jerusalem (1 Chron. viii, 21). B.C. post 1618.

Shim'ri (Heb. *Shimri'*, שִׁמְרִי, *my watch*, or *vigilant*), the name of four Hebrews.

1. (Sept. Σεμρί, v. r. Σαμάρ, Σαμαριάς.) Son of Shemaiah and father of Jedaiah, chief Simeonites (1 Chron. iv, 37). B.C. post 1618.

2. (Sept. Σαμερι v. r. Σαμαρι.) Father of Jediel (q. v.), one of David's body-guard (1 Chron. xi, 45). B.C. ante 1043.

3. (Sept. Φυλάσσοντες, reading שִׁמְרִי.) Son of Hoshah, a Merarite Levite appointed by David a doorkeeper of the ark. Although not the first-born, his father made him chief among his brothers (1 Chron. xxvi, 10; A. V. "Simri"). B.C. 1043.

4. (Sept. Σαμβρι v. r. Σαμβρι.) First named of the two sons of Elizaphan, and one of the Levites who assisted at the purification of the Temple under Hezekiah (2 Chron. xxix, 13). B.C. 726.

Shim'rith (Heb. *Shimrith'*, שִׁמְרִית, fem. of *Shimri'*, "vigilant"; Sept. Σαμαριθ v. r. Σαμαριθ and Σομαριώθ), an Ammonitess, and mother of Jehoazabad, one of the assassins of king Joash (2 Chron. xxiv, 26); elsewhere (2 Kings xii, 21) called SHOMER (q. v.).

Shim'rom (1 Chron. vii, 1). See SHIMRON 1.

Shim'ron (Heb. *Shimron'*, שִׁמְרוֹן, *watch-height*), the name of a man and also of a place. See also SHIMRON-MERON.

1. (Sept. Σαμαρόμ v. r. Σαμβράν, etc.) Last named of the four sons of Issachar (Gen. xli, 13; 1 Chron. vii, 1, "Shimrom" in later editions), and head of the family of the Shimronites (Numb. xxvi, 24). B.C. 1874.

2. (Sept. Σομερών v. r. Σεμερών and Σεμίων.) A town of Zebulun (Josh. xix, 15, where it is named between Nahallal and Idalah), one of those which joined the northern confederacy under Jabin against Joshua (Josh.

xi, 5), and apparently the same elsewhere (xii, 20) more fully called Shimron-meron (q. v.). Eusebius and Jerome in the *Onomasticon* confound it with *Samaria*. The old Jewish traveller Hap-Parchi fixes it at two hours east of Engannim (Jenin), south of the mountains of Gilboa, at a village called in his day Dar Meron (Asher, *Benjamin*, ii, 434). This is in accordance with the tradition existing among the Jews of Safed that Shimron-meron is identical with the sacred village of Meiron, where the tombs of the rabbins Hillel and Shammai are still preserved and honored (Wilson, *Lands of the Bible*, ii, 313). Schwarz, with greater probability (see Reland, *Palest.* p. 1017; Gesenius, *Thes. Heb.* p. 1445), proposes (*Palest.* p. 172) to identify it with the *Simonias* of Josephus (*Life*, § 24), now Simintiyeh, a village a few miles west of Nazareth, which is mentioned in the Talmud (*Jerus. Megillah*, c. 1) as the ancient Shimron.

Shim'ronite (Heb. with the art. *hash-Shimroni'*, שִׁמְרוֹנִי, patronymic; Sept. ὁ Σαμαραῖ v. r. Ἀμσπαμεί, A. V. "the Shimronites"), a name (Numb. xxvi, 24) for the descendants of Shimron (q. v.) the son of Issachar.

Shim'ron-me'ron (Heb. *Shimron' Meron'*, שִׁמְרוֹן מֶרֶוֹן [marg. מֶרֶוֹן], *watch-height of Meron*; Sept. Συμεών [v. r. Σαμρών και πασγά and Μαβρώθ] και Μαρών), a town whose king was conquered by Joshua (Josh. xii, 20); probably the same elsewhere (xi, 1) called simply SHIMRON (q. v.).

Shim'shai (Heb. *Shimshay'*, שִׁמְשַׁי, *my suns*, or *sunny*; Sept. Σαμψά v. r. Σαμασά, etc.), a scribe or secretary of Rehun, who was a kind of satrap of the conquered province of Judea and of the colony at Samaria supported by the Persian court (Ezra iv, 8, 9, 17, 23). B.C. 529. He was apparently an Aramæan, for the letter which he wrote to Artaxerxes was in Syriac (ver. 7), and the form of his name is in favor of this supposition. He is called *Semelius* by Josephus (Σεμέλιος, *Ant.* xi, 2, 1). The Samaritans were jealous of the return of the Jews, and for a long time plotted against them without effect. They appear ultimately, however, to have prejudiced the royal officers, and to have prevailed upon them to address to the king a letter which set forth the turbulent character of the Jews and the dangerous character of their undertaking, the effect of which was that the rebuilding of the Temple ceased for a time. See NEHEMIAH.

Shin were supposed by the Chinese to be spirits of the air, and, according to Dr. Milne, are to be considered as *aëons*, spirits or intelligences. In the *Le-ke* it is said that "if we speak of all the *Shin* collectively, we call them SHANG-TE" (q. v.); but the very circumstance that the word *Shin* is a collective noun, and never used with a numerical affix, shows that it cannot be considered as denoting the one supreme God.

Shi'nab (Heb. *Shinab'*, שִׁנְאָב, *father's tooth* [so Gesenius as literally; but Hitzig refers the last element to the Arab. for *serpent*, or the Sanscrit for *elephant*; while Fürst prefers *splendor of the Father* (i. e. God)]; Sept. Σανναάβ; Josephus Σαναβάρης, *Ant.* i, 9), the king of Admah at the time of the invasion by Chedorlaomer (Gen. xiv, 2). B.C. cir. 2064.

Shi'nar (Heb. *Shinar'*, שִׁנְאָר [on the signif. see below]; Sept. usually Σαναάρ, Σενναάρ; Vulg. *Sennaar*) seems to have been the ancient name (Gen. x, 10; xi, 2; xiv, 1, 9) of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea—the tract known in later times as *Chaldea*, or *Babylonia*. It was a plain country, where brick had to be used for stone, and slime, bitumen, or mud, for mortar (xi, 3). Among its cities were Babel (Babylon), Erech or Orch (Orchoë), Calneh or Calno (probably Niffer), and Accad, the site of which is unknown. These notices are quite enough to fix the situation. It may, however, be re-

marked, further, that the Sept. renders the word by "Babylonia" (Βαβυλωνία) in one place (Isa. xi, 11), by "the land of Babylon" (γῆ Βαβυλωνος) in another (Zech. v, 11), and by *ποικιλὴ* in a third (Josh. vii, 21) as an equivalent to Βαβυλωνική (A. V. "Babylonish").

The native inscriptions contain no trace of the term, which seems to be purely Jewish and unknown to any other people. At least it is extremely doubtful whether there is really any connection between Shinār and Singara, or Sinjar. Singara was the name of a town in Central Mesopotamia, well known to the Romans (Dion Cass. lxxviii, 22; Amm. Marc. xviii, 5, etc.), and still existing (Layard, *Nin. and Bab.* p. 249). It is from this place that the mountains which run across Mesopotamia from Mosul to Rakkeh receive their title of "the Sinjar range" (Σινγάρας ὄρος, Ptolemy, v, 18). As this name first appears in Central Mesopotamia, to which the term Shinār is never applied, about the time of the Antonines, it is very unlikely that it can represent the old Shinar, which ceased practically to be a geographic title soon after the time of Moses (the use in the above passages of Isaiah and Zechariah is an *archaism*; so also, perhaps, in Dan. i, 2).

It may be suspected that Shinar was the name by which the Hebrews originally knew the lower Mesopotamian country, where they so long dwelt, and which Abraham brought with him from "Ur of the Chaldees" (Mugheir). Possibly it means "the country of the Two Rivers," being derived from שְׁנֵי, "two," and 'ar, which was used in Babylonia, as well as *nahr* or *nahār* (נָהָר), for "a river." (Comp. the "Ar-malchar" of Pliny [*H. N.* vi, 26] and "Ar-Macales" of Abydenus [Fr. 9] with the Naar-malcha of Ammianus [xxiv, 6], called *Ναπύδα* by Isidore [p. 5], which is translated as "the Royal River;" comp. again the "Narragam" of Pliny [*H. N.* vi, 80] with the "Aracanus" of Abydenus, *l. s. c.*). See MESOPOTAMIA.

Shingle, a wooden tile for covering roofs, spires, etc., made of cleft oak. Shingles were formerly very extensively employed in some districts, but their use has, for the most part, been superseded by more durable kinds of covering; they are, however, still to be found on some church roofs, and on many timber spires, especially in the counties of Kent, Sussex, Surrey, and Essex, England.

Shin-men, a Chinese deity, said to be the son of Fo or Fo-hi, and to correspond with the Hindū god *Ganesa*.

Shin-moo, a goddess worshipped in China as the supposed mother of Fo, and styled the Queen of Heaven. Her image is generally placed in a niche behind the altar, sometimes having an infant either in her arms or on her knee, and her head encircled with a glory.

Shinn, Asa, a minister of the Methodist Episcopal Church, was born in New Jersey, May 3, 1781. He was converted at the age of seventeen years, and in his twentieth year entered the itinerancy in the Baltimore Conference. In 1824 Mr. Shinn took a prominent part in the discussion of lay representation in the Methodist Episcopal Church; and when the discussion culminated in the disciplining of a number of the advocates of the measure, he withdrew from the Church, and identified himself with the lay-representation movement. He took an active part in the organization of the Methodist Protestant Church, and received the most important offices in the gift of his constituents. He was frequently elected president of the Annual Conference, and twice (1838 and 1842) president of the General Conference. In 1834 he was elected, with Rev. Nicholas Snethen, editor of the *Methodist Protestant* of Baltimore. Owing to an accident received in his youth, and overstrain of work and care, he had four attacks of insanity—in 1813, 1819, 1828, and 1843. From the last he never recovered, but was sent to an asylum in Philadelphia, and then to another in Brattlebor-

ough, Vt., where he died, Feb. 11, 1853. He was a strong and effective speaker and a ready and forcible writer. He published, *Essay on the Plan of Salvation* (Baltimore, 1813; 2d ed. Cincinnati, 1831):—*The Benevolence and Rectitude of the Supreme Being* (Baltimore, 1840, 12mo). He also wrote a series of articles in the *Mutual Rights*. See Sprague, *Annals of the Amer. Pulpit*, vii, 360; Simpson, *Cyclop. of Methodism*, s. v.

Shinn, John, a minister of the Methodist Episcopal Church, was born in Warren County, O., March 2, 1824, and united with the Church at the age of fifteen. He was received into the Cincinnati Conference in 1854. In 1862 he entered the Christian Commission, and afterwards became an army chaplain. After the war he was county agent of the Bible Society for one year. In 1866 he again entered the pastorate, and labored until death (by paralysis), which occurred at West Mansfield, O., Sept. 26, 1871. See *Minutes of Annual Conferences*, 1872, p. 107.

Shinshiu (meaning *New Sect*) is the name of a Japanese sect of Buddhists, who are the adherents of one of the most remarkable developments of Buddhism, unique in many points. Buddhism has been called the Protestantism of Asia; the Shinshiu followers are the Protestants of Buddhism. Many of the distinctive tenets of Buddhism so called are repudiated by the Shin sect. Their priests marry and rear families, eat flesh and drink wine. Nuns, monks, and monasteries are unknown within their pale; schools, or rather real theological seminaries, taking their place. Penance, fasting, pilgrimages, prescribed diet, isolation from society, and, generally, amulets and charms, are proscribed. The Protestant doctrine of justification by faith in Buddha is their central tenet, in opposition to the common Buddhist idea of salvation by works. Devout prayer, purity and earnestness of life, and trust in Buddha himself as the only worker of perfect righteousness, are insisted upon. They scornfully reject the worship of most of the idols venerated by the other sects. The Scriptures of Shinshiu, instead of being kept in the Sanscrit and archaic Chinese, as in other sects, are translated into the vernacular, and their daily reading urged. The Shin temples are built, not on mountains and in secluded places, but on the main streets, and in the crowded and business centres of great cities, with altars gorgeous in their magnificence. The Shin priests are more highly educated than those of any other Japanese sect, and the average intelligence of their worshippers is superior. They profess never to intermeddle with political affairs, receive no government aid, and pride themselves on their self-reliance. When travelling, they assume the lay dress, and in time of war claim the right of defence. Whole battalions of sacerdotal soldiery have been recruited from the Shin sect in the wars of the past. Their influence is probably greater than that of any other sect in Japan. Within the last decade, they have organized their training-schools on the model of Christian theological seminaries, and have carefully studied the weapons and methods of Christian missionaries. They have lately sent out successful missionaries to China, Corea, and the Riu-Kiu (Loochoo) islands. There are six subsets or divisions in Shinshiu, who have in all 13,718 temples. Other names for the Shin sect are *Montō* ("Followers of the Gate") and *Ikkō*, from the initial of one of their canonical books, both terms referring to their singleness of aim and unity of organization. Shinshiu was founded by Shinran (born 1171, died 1262), who was a pupil of Honen, founder of the Jodo sect, and a man of noble descent. When in Kioto, at thirty years of age, he married a lady of noble rank, and thus set the example of marriage, and gave the newly founded sect a prestige it has ever since enjoyed with both mikado and shōgun (tycoon). So great has been the numerical, intellectual, and religious influence of Shinshiu upon the nation, that the mikado Mutsuhito, by a rare act of imperial favor,

honored the memory of Shinran by bestowing upon him the posthumous title, by imperial letters patent, of Ken-shin Daishi (Great Revealer of Light), on Nov. 28, 1876. Though wary and ceaselessly active in their endeavors to counteract Christianity, now so aggressive in Japan, they have resisted every effort of the government to amalgamate them with other sects, and their enemies and rivals of late have charged them with being so much like Christians that separation from the latter is inconsistent. (W. E. G.)

Shintō (*Shintōism*, *Sintuism*, "the Religion of the Kami") is the term for the religion of the ancient Japanese which existed before the introduction of Confucian ethics or Buddhism into Japan, and which was practiced in a more or less pure form until the restoration of the mikado to supreme power in 1868, when a thorough purification and propagation of the ancient cult was ordered by the government. Nearly all accounts of Shinto by European writers prior to 1870 are of little value, as these treat of the impure Buddhized form. The ancient documents and archaic literature of Shinto have been unearthed and made accessible even to native readers only during the last and present centuries. The ancient faith has always had a distinct life and literature apart from the imported creeds of India and China, and pure Shintoists insist that the native and the foreign religions are incompatible.

Shinto is a Chinese term repudiated by native scholars, who use the pure Japanese word *Kami no Michi* (way or doctrine of the gods). Since the introduction of Chinese letters in the 6th century A.D., every important Japanese word has a Chinese equivalent and synonyms. The term *Shinto* was coined to distinguish the native cult from the two other to or do then new upon the soil, viz. Ju-do (Confucianism) and Butsu-do (Buddhism). The literal rendering of Shinto is "theology."

I. *The Scriptures, Essence, and Characteristics of Shintōism* (to A.D. 60).—To decide positively the ultimate origin of Shinto, whether a purely indigenous growth or imported from the Asian mainland, is to decide the origin of the Japanese people. Believing as we do that the aborigines of Japan were Ainos in the north and Malays in the south, ultimately conquered by immigrant tribes from the Manchurian highlands, descending through Corea, who thus became the dominant race in Japan, we must refer the origin of the germs, but the germs only, of Shinto to the Asian mainland. The pre-Confucian religion of China (see the *She King: Book of Ancient Chinese Poetry* [transl. by Dr. Legge], p. 46-53) and Shinto had some striking points in common, though the growth and development of Shinto have been on Japanese soil. The Asian invaders in Japan had neither letters nor writing until they were brought from China after the 3d century A.D. Rigid Shintoists, however, assert that previously there was a native alphabet in use called *Shindaiji* or *Shinji* (god-letters, or letters of the divine age). The Buddhists and all foreign scholars maintain that this alphabet was derived from Corea. Certain it is that these "god-letters" were never in general use, nor can their influence be traced on the alphabets now written in Japan, while no literary remains have yet been found written in them. The origin of most of the Shinji may be discovered by comparing them with the alphabet invented in Corea in the latter part of the 7th century A.D., and still in use by the Coreans. This subject has been fruitful of literary controversy in Japan.

The oldest monuments both of Shinto and the Japanese language are the *Kojiki* (book of ancient traditions, or "notices of ancient things"), the *Nihongi* (chronicles of Japan), and some liturgical works, such as the *Nakatomi no Hirai* (the Nakatomi ritual) and the *Engishiki* (book of the ceremonial law of Shinto). These ancient texts, with the recensions, commentaries, and controversial writings of the native scholars and Shinto revivalists—Mabuchi (1697-1769), Motoōri (1730-1801),

and Hirata (1776-1843)—form the chief sources of information concerning Shinto. In the texts are imbedded a number of poetical passages forming the Noritō, or Shinto liturgies, composed most probably centuries before the introduction of writing, and preserved through the medium of the human memory. The ancient texts contain the cosmogony, philosophy, and ritual of Shinto. According to them, Japan is the centre of the earth, and the mikado is the first of men and vicar of gods. Infallibility is his attribute, and his will is the test of right.

The *Kojiki* is written almost entirely in pure Japanese style as concerns the forms both of language and thought, while the text of the *Nihongi* is full of Chinese modes of expression and purely Chinese philosophical conceptions. Both are expressed by Chinese characters, which in some cases are phonetic for Japanese words, but in others are ideographic. The correct deciphering of the texts, especially that of the *Kojiki*, and the interlinear given in *kana* letters in some editions, is a comparatively modern work, which is as yet by no means infallible. The *Kojiki* was composed A.D. 712 by order of the 44th mikado, Gemmō, and first printed in the period 1624-42. The *Nihongi* was composed A.D. 720, and the evident intent of the writer is to clothe the matter in hand in Chinese garb and give a Chinese character to the native history. The tenor of both works is best shown by a comparison of their opening sentences literally translated:

Kojiki.

"At the time of the beginning of heaven and earth, there existed three pillar (chief) *kami* (gods). The name of one *kami* was 'Lord of the Middle of Heaven'; next, 'High Ineffable Procreator'; next, 'Ineffable Procreator.' These three existing single, hid their bodies (died, passed away, or became pure spirit). Next, when the young land floated like oil moving about, there came into existence, sprouting upwards like a rush shoot, a *kami* named 'Delightful Rush Sprout'; next, 'Heavenly Standing-on-the-Bottom' *kami*. The two chief *kami*, existing single, hid their bodies. Next came into existence these three *kami*," etc.

Nihongi.

"Of old, when heaven and earth were not yet separated, and the *in* (male, active, or positive principle) and the *yo* (female, passive, or negative principle) were not separated, chaos, enveloping all things, like a fowl's egg, contained within it a germ. The clear and ethereal substance expanding became heaven; the heavy and thick substance agglutinating became earth. The ethereal union of matter was easy, but the thickened substance hardened with difficulty. Therefore heaven existed first; the earth was fixed afterwards. Subsequently deity (*kami*) was born (or evolved, *umaru*). Now, it is said that in the beginning of heaven and earth the soil floated about like a fish floating on the top of the water," etc.

In the *Kojiki* we have the original Japanese theory of creation, and in the *Nihongi* the same account with Chinese philosophical ideas and terms added. Indeed, the first verse of the *Nihongi* down to "Now, it is said," etc., is borrowed direct from Chinese books. Both texts show that the Japanese scheme of creation starts without a Creator or any first cause; matter appears before mind, and deity has no existence before matter. The idea of space apart from matter was also foreign to these ancient philosophers. There is no creation, properly speaking, but only evolution until the gods (*kami*) are evolved or get being. The work of creation properly so called begins only when after the genesis of several pairs of (*hitori-gami*) single, sexless beings, Izanagi and Izanami appear. Standing upon the floating bridge of heaven, Izanagi plunged his jewelled falchion (or spear) into the unstable waters beneath, and, withdrawing it, the drops which trickled from it congealed, and formed an island. Upon this they descended, and planting the falchion in the ground, made it the central pillar of a palace which they built around it, intending that it should be the pillar of a continent. Izanagi means "The-male-who-invites," Izanami "The-female-who-invites." In Izanagi was the first manifestation of the male principle; in Izanami that of the female

principle. They were the first beings who were conscious of a difference of sex. They separated to make a tour of the island. At their meeting the female spirit spoke first—"How joyful to meet a lovely male!" Izanagi, offended that the female had spoken first, required the circuit to be repeated. Meeting a second time, the male spirit spoke first, and said, "How joyful to meet a lovely female!" Then followed the first practice of the art of love. Whence the origin of the human race, the gods (*kami*), and the ten thousand things in heaven and earth. The first series of children born were the islands of Japan. The details of creation were carried out by the various *kami* who sprang from Izanagi and Izanami. In the conception of many of the subordinate *kami* and the objects which make up the world, the two creator-deities had a common part, but many others were generated by the separate action of each. Thus, in bringing forth the god of fire Izanami suffered great pain, and from the matter which she vomited forth in her agony sprang the god and goddess of metal. She afterwards created the gods of clay and fresh water to pacify the fire-god when he was inclined to be turbulent. Izanagi, being incensed at the fire-god, clove him in three pieces with his sword. From the fragments sprang the gods of thunder, of mountains, and of rain. The gods of clay and fresh water married. From the head of their offspring grew the mulberry and silkworm; from the navel, the five esculent grains—rice, wheat, millet, beans, and sorghum. Izanami had enjoined upon her consort not to look upon her during her retirement, but Izanagi disregarding her wish, she fled into the nether world (the "root-land," or "land of darkness"). Izanagi descended to induce her to return to earth. He found the region one of awful foulness, and the body of his consort a mass of worms. Escaping to the upper world, he purified himself by repeated washings in the sea. In these acts many gods were born, among others Susanoō from his nose and Amaterasu from his left eye. The deities created out of the filth from which he washed himself are the evil deities that war against the good gods and still trouble mankind in many ways. At this time heaven and earth were very close to each other, and the goddess Amaterasu being a rare and beautiful child, whose body shone brilliantly, Izanagi sent her up the pillar that united heaven and earth, and bade her rule over the high plain of heaven. She ever afterwards illuminated heaven and earth. Her name, Ama-terasu-Ō-Mi-Kami, means "From-heaven-far-shining-Deity." The Chinese equivalent is "Ten-Sho-Dai-Jin," and the common English term "sun-goddess." Susanoō, whose full name is "Take-Haya-Susano-Ō-Mikoto," was likewise commanded to rule over the blue plain of the sea and the multitudinous salt waters. He, however, neglected to keep his kingdom in order, was very slovenly, and cried constantly. To cure him of his surly behavior, his father made him ruler over the kingdom of night. He is usually styled the god of the moon. Instead of reforming his conduct, Susanoō grew worse. He turned a wild horse loose into the rice-fields planted by his sister the sun-goddess, defiled the white rice in her storehouse, and, finally, while one day she was weaving, he flung the reeking hide of a wild horse freshly skinned over her loom, and the carcass into the room. Dreadfully frightened and hurt, the sun-goddess withdrew into a rocky cave and shut the door. Instantly there was darkness over heaven and earth—a calamity which the turbulent gods improved by making a confused noise like the buzzing of flies. A great congress of all the gods was now held in the dry bed of the River of Heaven (the Milky-way), and after devising and carrying out many expedients—which became the foundation of the arts of life in Japan—the sun-goddess came out, light shone again, and Susanoō was banished into a distant land, where his adventures took place, the accounts of which fill many pages in the national mythology. As the earth-gods and evil deities multiplied, confusion and

discord reigned, which the sun-goddess seeing resolved to correct by sending her grandson, Ninigi, to earth to rule over it. She gave him a mirror—the emblem of her own soul—a sword of divine temper taken by Susanoō from the tail of an eight-headed dragon which he had slain, and a seal or ball. Accompanied by a great retinue of deities, he descended by means of the floating bridge of heaven on which the divine first pair had stood to Mount Kirishima (which lies between Hiuga and Satsuma). After his descent, heaven and earth, which had already separated to a considerable distance, receded utterly, and further communication ceased. Ninigi was received with due honors by the earthly *kami*, and began to rule without much opposition. His grandson, whose mother was a dragon in the form of a woman, was Jimmu Tennō (as he is usually styled), the first mikado of Japan. At this point the first volume of the *Kojiki* ends. Thenceforth the narratives of the *Kojiki* (with *Nihongi*) form the history of Japan to the time of Suiko (empress), who reigned A.D. 593–628, and on these books all subsequent works are based.

The *Kojiki* and *Nihongi* form the historic and doctrinal basis of Shinto, and from them we gather its characteristics. Its cosmogony and theogony is evolution. In it is no Supreme God, Creator, or Trinity (as some foreign writers have said). Its highest gods were once creatures before being creators, and all its lower grades of deities were once men. The Shinto earth is Japan; its heaven is immediately above the mikado's realm. The literal meaning of the names of the several pairs of deities preceding the first having sex, and the comments of the native writers, show that they are merely names descriptive of the various stages through which they passed before arriving at the perfection of existence. Thus, some of the names of these rudimentary deities are "First Mud," "Sand and Mud," "Body without Hands, Feet, or Head—fœtus," "Beginning of Breath," "Complete Perfection," "Awful One," etc. Thus, out of the mud, through a series of protoplasmic deities, the first creative pair evolved unto perfection.

So far we have given an outline of the *Kojiki* and *Nihongi* texts, refraining from any but the most necessary explanations or comment. From the acknowledged native orthodox commentators, who add much more in works which are the richest mines for the student of Japanese archaeology and religion, we add further explanation. The description of the act of Izanagi and Izanami in creating Japan is only a euphemism for the sexual act. The jewelled spear, Hirata thinks, was in the form of a linga. The worship of the phallus has from prehistoric times been nearly universal in Japan (*The Mikado's Empire*, p. 33, note). The point of the spear became the axis of the earth. That "the motion imparted to the fluid mass of earth was the origin of its daily revolutions" is a statement showing how the acquisition of European knowledge enables a Shinto commentator to accommodate an ancient text to modern notions. The island formed by the congealed drops was once at the north pole, but has since taken its present position in the Inland Sea. Japan lies on the top of the globe, which accounts for the fact that she escaped the flood which took place in China in the reign of Yao (B.C. 2356), and by which Occidental countries were drowned, China and Corea suffering less, because near Japan. The stars were formed when Izanagi's spear was drawn out of the earth; the muck which was unfit to enter into the composition of the world flew off in lumps into space and became the stars. After the birth of the Japan islands (Yezo and Saghalin not being mentioned, as these were not discovered till long after the writing of the *Kojiki*) by ordinary generation, the remaining small islands and foreign countries were formed by the spontaneous consolidation of the foam of the sea; hence their immeasurable inferiority. Hence Japan is the Holy Country—the Land of the Gods—and the mikado is the Tenno (heavenly king) and the Ten-

shi (son of heaven) whom all Japanese must reverently obey.

Shinto contains no moral codes. The duty of the Shintoist is to live in fear and reverence of the memories of the dead, to imitate the example of the gods and illustrious ancestors. Shinto prescribes no ritual, formulates no dogmas, contains no argument, teaches no immortality, commands no polemic propagation. These two latter doctrines may be easily developed from its Scriptures, as in practice they have been, since all men are derived from gods who are immortal, and the heavenly kami made war upon the earthly, and the mikados by divine right slew the disobedient rebels. The prescribed ecclesiastical machinery and *personnel* are extremely simple. Its temples (*miya*, "house worthy of honor") are thatched or shingled edifices of *hinoki* wood, about which there should be no paint, gilding, or gaudy decoration. The type of Shinto architecture, easily recognised, is the primitive hut with ridge-pole and cross-beams. Within are no idols or emblems. Nothing is visible save the strips of notched white paper called the *gohei*, which depend from a wand of hinoki wood, or are fixed in a pair of vases. A mirror—emblem of the purity of the sun-goddess—a closet of hinoki containing a paper on which a prayer is written, and, on occasions, the offerings of fruit, fish, and various foods, which become the property of the shrine-keepers, are the appurtenances of a Shinto temple. Outside, at the entrance of the path leading to the shrine, is the *torii* (bird-rest), or portal; now serving to the common mind as a gateway, but anciently used as a perch for the sacred fowls who proclaimed the break of day. Among the most approved of the ancient sacrifices, besides rice, rice-beer, fine cloth and coarse cloth, silk and brocade (now partly symbolized by the *gohei*), were white horses, boars, and cocks—the first for the personal use of the gods, the second for food, and the third for time-keepers. A peculiarity concerning the living sacrifices was that they were not slaughtered, but after being hung up by the legs before the shrine were again set free. Sin was recognised, and the need of confession and cleansing recognised. All sin was conceived as pollution. The chief Shinto rite is that of purification, and its rituals consist almost wholly, besides offerings, of prayers for cleansing and actual lustrations. Anciently the mikados commanded public ablutions in the river. Later on, the symbolical cleansing from sin was made by the people casting paper figures of men into the river; then the mikado deputed the high-priest at Kiôto to perform the symbolical act for the whole na-

tion, and an iron mannikin was made of the size of the mikado and thrown into the river. The ancient elaborate systems of purification by salt or water in the cases of birth, death, etc., binding the mouth of the officiating priest with paper, lest breath pollute the offerings, are only observed at present by Shinto purists, and their modern expression is that of rinsing the mouth or dipping the hands in water before prayer at the shrine. The following is a characteristic Shinto prayer. The worshipper at the shrine pulls a white rope attached to a bell hung in the roof above the shrine, claps his hands thrice, folds them palm to palm, bows his head on his thumbs, and prays, "I say with awe, deign to bless me by correcting the unwitting faults which, seen and heard by you, I have committed; by blowing off and clearing away the calamities which evil gods might inflict; by causing me to live long and hard, like the lasting rock; and by repeating to the gods of heavenly origin and to the gods of earthly origin the petitions which I present every day, along with your breath, that they may hear with the sharp-earedness of the forth-galloping colt." In the *Engishiki*, or *Book of Ceremonial Law*, there are numerous specimens of prayers and joyful chants for harvest, remarkable alike for their solemn simplicity and poetic beauty. The deified forces of nature—thunder, lightning, earthquakes—and the kami of the sea, rivers, hot springs, mountains, trees, roads, yards, and wells, are all worshipped and addressed in prayer.

Such is "pure Shinto"—a bald mythology, a patriarchal cult of autochthons, a literary scaffolding for propping up the supremacy of a tribe of conquerors, a religious device for a nation in its savage infancy—a Robinson Crusoe among religions. Motoôri teaches that morals were invented by the Chinese because they were an immoral people; but in Japan there is no necessity for any system of morals, as every Japanese acted aright if he only consulted his own heart. The duty of a good Japanese consists in obeying the mikado, without questioning whether these commands are right or wrong. It is only immoral people like the Chinese who presume to discuss the character of their sovereigns. Hence, in ancient Japan, government and religion were one and the same. The mikado is the centre of Church and State, which are one. He is more than sovereign pontiff. Japan is the land of the gods. The mikado is god and vicar of all the gods, and in his hands rests the ownership of all the land; hence, what a Japanese eats, drinks, and enjoys is from the mikado and his heavenly ancestors. And, above all, is the crowning glory of the Holy Country—one dynasty of heaven-descended rulers, which from all time has stood unchanged, and to all eternity will stand unchangeable. (In Japan the dynasty has never changed. The present mikado is the 123d of the line, while in China there have been thirty-three or thirty-four dynasties. The date fixed for the accession of Jimmu Tennô is B.C. 660.) As a political force, Shinto has no parallel in the history of Japan, if indeed of any nation. More than all else, it has contributed to the unity of the Japanese people. It was the main-spring of the tremendous revolution of 1868, whose secondary effect and outward phases have attracted the attention of the world. Such was Shinto before the advent of Confucian ethics or Buddhism. "It is quite possible to show that the indigenous belief of the ancient Japanese contained unformed materials out of which might have been evolved, in the course of ages, both positive morality and law, had not the process been interrupted at an early stage."

II. *History of Shintoism, including its Developments and Modifications by Buddhism and Chinese Ethics* (A.D. 600–1700).—The Chinese ethical system reached Japan long before Buddhism. Confucianism easily lends itself to despotism, and the Five Relations of the Chinese sage were grafted on Shinto before the creed of Buddha began to influence the Japanese in and after A.D. 552. The new faith from India met with ready acceptance,

Shinto Priest, with *gohei*, in prayer to the kami.

its gorgeous ritual soon eclipsing the old cult, which gradually lost many of its distinguishing characteristics, and for centuries was unknown in its purity to the masses, though jealously guarded by a few court nobles. In some sequestered miyas its rites were perfectly preserved, even to the lighting of fire by means only of the fire-drill and *Retinospora obtusa* wood, whence the native word *hinoki*, "fire-wood."

In spite of the attractions of their more sensuous worship, the Buddhist propagandists found that the roots of Shinto were very deep in the hearts of the martial Japanese. To retain permanent hold upon the national heart, it would be necessary to propound some scheme of reconciliation by which the ancient traditions of their divine ancestors were woven into the Indian dogmas. To do this required some master spirit profoundly learned in both Shinto and Buddhism, a deep student of the Japanese nature, bold, and perhaps unscrupulous. The conversion of a line of theocratic emperors, whose authority was derived from their divine origin and sacerdotal character, is a striking anomaly in Japanese history; but to fuse into unity such cults as Shinto and Buddhism was a task like that of reconciling Homer and Moses—Grecian and Hebrew culture. Nevertheless, a Japanese Philo was at hand. Kobo, a Buddhist priest (b. 774, d. 835), perhaps Japan's mightiest intellect—the resemblance of whose head to that of Shakespeare has been pointed out—achieved the work with almost perfect success. Kobo was a scholar in Sanscrit, Pali, and Chinese, a zealous student of Buddhism in Corea and China, and a master of the Shinto Scriptures, which he studied at the Japanese Mecca, Isé. While at the shrine of the goddess Toyou, she manifested herself to him and delivered the revelation on which his system is founded. His scheme, briefly stated, is that the Shinto deities were the incarnations of Buddha in Japan previous to the teaching of his perfect doctrines. Each Shinto kami is rebaptized with a Buddhist name. Thus Amaterasu becomes Amida, Ojin, Hachiman, etc. The legends of the *Kojiki* were explained according to the philosophy of Buddhism, and shown to contain the essence and tenets of Buddha's teachings. A characteristic specimen of this style of reasoning is the *Sankashû*, one of the best Japanese theological works. Kobo's system finally secured the complete ascendancy of Buddhism. The mikado was so pleased that he gave it the name of *Riôbu-Shinto* (twofold doctrine of the gods). In the daily worship for each month, the Buddhist Bosatsu (Podhisattva) and certain of the Shinto kami are worshipped as one and the same. The general name for the kami, who were incarnations of Buddha, is *gongen*. Thenceforth, until within the last decade, the form of Shinto generally known and practiced, and as such treated of by European writers, was Riôbu, impure or Buddhized Shinto, which is utterly repudiated by true Shintoists, who accuse Kobo of fraud and forgery. We have not space to do more than mention that there are fifteen or more sects of corrupt Shintoists, but pass on to glance briefly at the recent developments and sudden outburst of Shinto as a tremendous political force in and since the ever-memorable year of 1868, when Japan achieved the paradox of a return to the ancient régime and to the modern order of things.

III. *Revival and Reformation of Shintoism* (from A.D. 1700 to the present time).—Within the last hundred years a school of native writers have attempted to purge Shinto of its foreign elements and present it in its original purity. The activity of these scholars bore fruit in the creation of a large body of literature, some polemic, but most of it of high historic and antiquarian value. At the same time the eyes of the people were opened to see that the shôgun was a political usurper, and the mikado, being the vicar of the gods, was, and ought of right to be, the sole ruler of his people. The increasing reverence for the mikado generated by Shinto scholars soon grew into fiery zeal, and a turbulent determination to restore the mikado, abolish Buddhism,

sweep all foreigners from the Holy Country, and rehabilitate Shinto as the State religion. Shinto created one of the most powerful currents of thought that helped to swell the flood which in 1868 swept away the dual system of government and restored the Tennô (son of heaven) or mikado (honorable gate, sublime porte, Pharaoh) to supremacy, abolished the office of shôgun, and made the city of Yedo the national capital, now called Tokio. These changes would doubtless have taken place even if Perry or other foreigners had not come to Japan. Their presence gave to the mighty uprising of the nation that outward direction which has filled the eye of Christendom with wonder. No sooner was the new or ancient form of government established in Tokio than successive edicts were issued which utterly purged the Riôbu-Shinto temples and all the national shrines of all Buddhist influences, both material and personal, and again the *gohei*, mirror, and unpainted wood replaced the symbols, gilding, candles, incense, and paint of Buddhism. The Buddhist monasteries and temples were shorn of much of their revenues, and "sequestration" was the order of the day. A propaganda was instituted in Tokio, and attempts made to convert all the Japanese people to Shinto tenets and practice. Despite of sporadic and local successes, the scheme was a splendid failure, and bitter disappointment succeeded the first exultation of victory. Confronted by modern problems of society and government, the mikado's ministers found themselves unable, if indeed willing, to entomb politics in religion, and gradually the shadowy cult of Shinto waned from its momentary splendor. Its fortunes may be traced in the rank and grade of the Department of Religion. Anciently, and for a while in 1868, the Jin Gi Kuan (council of the gods of heaven and earth) held equal authority and influence with the Dai Jo Kuan (the great council of the government). Soon, however, from a supreme Kuan, it was made one of the ten boards of administration, the Jin Gi Shô. In less than a year its dignity was again lowered by being made the Kiô Bu Shô (board of religious instruction). Finally, in 1877, it was quietly turned over to the Home Department and made a bureau with a very shadowy existence. Nevertheless, Shinto is still a living force to millions in Japan, and, with Buddhism, shares the arena against advancing Christianity in that country. The census of 1874 gave a return of 76,119 Shinto officials and priests, and 128,000 Shinto shrines as against 207,699 Buddhist priests and monks and 90,000 temples. It is probable that the Buddhists still outnumber Shintoists four or five times over. The cardinal tenets promulgated by the Department of Religion in 1872, which are the central themes of the Shinto lectures (who, however, enforce them by texts drawn from the Confucian and Chinese classics), are the three following:

1. Thou shalt honor the gods and love thy country.
2. Thou shalt clearly understand the principles of heaven and the duty of man.
3. Thou shalt revere the mikado as thy sovereign and obey the will of his court.

In its higher forms, Shinto is simply a cultured and intellectual atheism. In its lower forms it is blind obedience to governmental and priestly dictates. "Shinto, as expounded by Motoôri, is nothing more than an engine for reducing the people to a condition of mental slavery." Japan being a country of very striking natural phenomena, the very soil and air lend themselves to support in the native mind this system of hero-worship and worship of the forces of nature. In spite, however, of the conservative power of the ancestral influences, the patriotic incentives, and the easy morals of Shinto, it is doubtful whether, with the pressure of Buddhism, the spread of popular education and Christianity, it can long retain its hold upon the Japanese people. For the details of worship, festivals, symbols, description of temples, etc., see works on Japan.

IV. *Literature*.—The leading writer on Shinto is Ernest Satow, secretary in Japanese to H. B. M. Lega-

tion in Japan, who has written *The Revival of Pure Shinto*, and *The Shinto Shrines of Isé*, in the *Transactions of the Asiatic Society of Japan* for 1874; *The Mythology and Worship of the Ancient Japanese*, in the *Westminster Review* for July, 1878. See also Griffis, *The Mikado's Empire*, p. 43-53, 96-100, 160, 300; *Appletons' Cyclopædia*, ix, 538, 551, 562; Fuso Mimi Bukuro (a budget of Japanese), *Notes* (Yokohama, 1874); see also, with caution, Klaproth, *Aperçu des Annales des Empereurs du Japon*; Siebold, *Archiv zur Beschreibung von Japan*; Kämpfer, *History of Japan*; and the various sketches of travellers and missionaries. See JAPAN. (W. E. G.)

Ship (for the original term, see below). Under this head we propose to bring together all the important information extant relating to ancient and especially Biblical naval operations. These latter, although somewhat late historically and not very scientific, have nevertheless a peculiar interest.

I. *Extent of Navigation*.—The Jews cannot be said to have been a seafaring people; yet their position on the map of the world is such as to lead us to feel that they could not have been ignorant of ships and the business which relates thereunto. Phœnicia, the north-western part of Palestine, was unquestionably among, if not at the head of, the earliest cultivators of maritime affairs. Then the Holy Land itself lay with one side coasting a sea which was anciently the great highway of navigation, and the centre of social and commercial enterprise. Within its own borders it had a navigable lake. The Nile, with which river the fathers of the nation had become acquainted in their bondage, was another great thoroughfare for ships. The Red Sea itself, which conducted towards the remote east, was at no great distance even from the capital of the land. Then at different points in its long line of sea-coast there were harbors of no mean repute. Let the reader call to mind Tyre and Sidon in Phœnicia, and Acre (Acco) and Jaffa (Joppa) in Palestine. Yet the decidedly agricultural bearing of the Israelitish constitution checked such a development of power, activity, and wealth as these favorable opportunities might have called forth on behalf of seafaring pursuits. There can, however, be no doubt that the arts of ship-building and of navigation came to Greece and Italy from the East, and immediately from the Levant; whence we may justifiably infer that these arts, so far as they were cultivated in Palestine, were there in a higher state of perfection at an early period, at least, than in the more western parts of the world (Ezek. xxvii; Strabo, bk. xvi; Comenz, *De Nave Tyria*). In the early periods of their history the Israelites themselves would partake to a small extent of this skill and of its advantages, since it was only by degrees that they gained possession of the entire land, and for a long time were obliged to give up the sovereignty of very much of their seaboard to the Philistines and other hostile tribes. The earliest history of Palestinian ships lies in impenetrable darkness, so far as individual facts are concerned. In Gen. xlix, 13 there is, however, a prophecy, the fulfilment of which would connect the Israelites with shipping at an early period: "Zebulun shall dwell at the haven of the sea, and he shall be for a haven of ships, and his border shall be unto Zidon" (comp. Deut. xxxiii, 19; Josh. xix, 10 sq.).—words which seem more fitly to describe the position of Asher in the actual division of the land. These local advantages, however, could have been only partially improved, since we find Hiram, king of Tyre, acting as carrier by sea for Solomon, engaging to convey in floats to Joppa the timber cut in Lebanon for the Temple, and leaving to the Hebrew prince the duty of transporting the wood from the coast to Jerusalem. When, after having conquered Elath and Ezion-geber on the farther arm of the Red Sea, Solomon proceeded to convert them into naval stations for his own purposes, he was still, whatever he did himself, indebted to Hiram for "shipmen that had knowledge of the sea" (1 Kings ix, 26; x, 22). The

effort, however, to form and keep a navy in connection with the East was not lastingly successful; it soon began to decline, and Jehoshaphat failed when at a later day he tried to give new life and energy to the enterprise (xxii, 49, 50). In the time of the Maccabees Joppa was a Jewish seaport (1 Macc. xiv, 5). Herod the Great availed himself of the opportunities naturally afforded to form a more capacious port at Cæsarea (Josephus, *War*, iii, 9, 3). Nevertheless, no purely Jewish trade by sea was hence even now called into being. Cæsarea was the place whence Paul embarked in order to proceed as a prisoner to Rome (Acts xxvii, 2). His voyage on that occasion, as described most graphically in the Acts of the Apostles (xxvii, xxviii), if it requires some knowledge of ancient maritime affairs in order to be rightly understood, affords also rich and valuable materials towards a history of the subject, and might, we feel convinced, be so treated as of itself to supply many irresistible evidences of the certainty of the events therein recorded, and, by warrantable inferences, of the credibility of the evangelical history in general. No one but an eye-witness could have written the minute, exact, true, and graphic account which these two chapters give. The vessels connected with Biblical history were, with the exception of those used on the Sea of Galilee (for which see below), for the most part ships of burden, almost indeed exclusively so, at least within the period of known historical facts, though in a remote antiquity the Phœnician states can hardly fail to have supported a navy for warlike, as it is known they did for predatory, purposes. This peculiarity, however, of the Biblical ships exonerates us from entering into the general subject of the construction of ancient ships and their several subdivisions. A good general summary on that head may be found in *Smith's Dictionary of Greek and Roman Antiquities*, s. v. A few details chiefly respecting ships of burden may be of service to the scriptural student.

II. *Sources of Information*.—Ancient literature is singularly deficient in everything which relates to ships or navigation. No work written expressly on the subject has come down to us; and we are dependent for our knowledge on the subject upon the incidental notices in poets and historians, or upon the figures on coins, marbles, or paintings, often the works of ignorant artists, which are calculated to mislead. Recent discoveries have, however, added much to our knowledge of the subject, especially in the marbles and pictures exhumed at Herculaneum and Pompeii. No one writer in the whole range of Greek and Roman literature has supplied us (it may be doubted whether all put together have supplied us) with so much information concerning the merchant-ships of the ancients as Luke in the narrative of Paul's voyage to Rome (Acts xxvii, xxviii). There was also dug up at the Piræus, in 1834, a series of marble slabs, on which were inscribed the inventories of the ships of the Athenian fleet. They have been published by Prof. Böckh, of Berlin, under the title of *Urkunden über das Seewesen des attischen Staates* (Berlin, 1840, fol. and 8vo). The pictorial representations on the Egyptian and Assyrian monuments supply us some additional information. Julius Pollux, in his *Onomasticon*, has given a long list of nautical terms which, although not often accompanied by explanations, puts us in possession of the terminology of ancient seamanship, and is satisfactory as agreeing in a remarkable manner with that of Luke. Isidore of Seville, in his *Origines*, also gives many nautical terms with explanations. For other literature, see at the end of this article.

III. *Original Terms*.—As regards Paul's voyage, it is important to remember that he accomplished it in three ships: first, the Adramyttian vessel [see ADAMYTTIAN] which took him from Cæsarea to Myra, and which was probably a coasting-vessel of no great size (Acts xxvii, 1-6); secondly, the large Alexandrian corn-ship, in which he was wrecked on the coast of Malta (ver. 6; xxviii, 1) [see MELITA]; and, thirdly, another large Al-

exandrian corn-ship, in which he sailed from Malta by Syracuse and Rhegium to Puteoli (ver. 11-13).

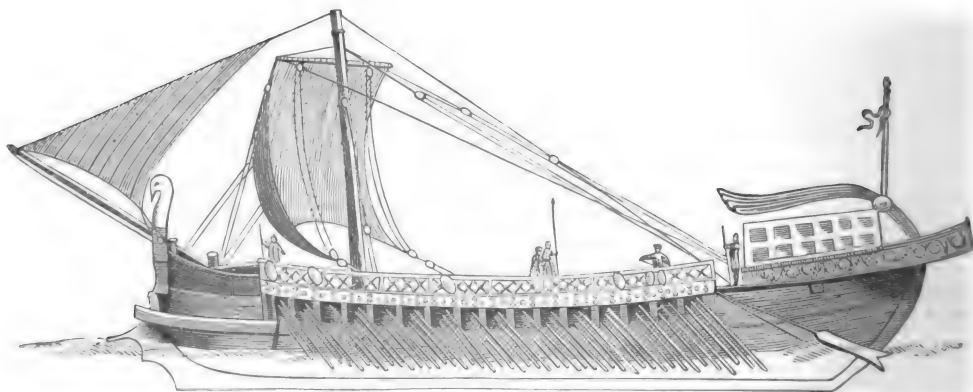

The word employed by Luke of each of these ships is, with one single exception, when he uses *ναῦς* (Acts xxvii, 41), the generic term *πλοῖον* (ver. 2, 6, 10, 15, 22, 30, 37, 38, 39, 44; xxviii, 11). The same general usage prevails throughout. Elsewhere in the Acts (xx, 13, 38; xxi, 2, 3, 6) we have *πλοῖον*. So in James (iii, 4) and in the Revelation (viii, 9; xviii, 17, 19). In the Gospels we have *πλοῖον* (*passim*) or *πλοῖάριον* (Mark iv, 36; John xxi, 8). In the Sept. we find *πλοῖον* used twenty-eight times and *ναῦς* nine times. Both words generally correspond to the Hebrew *נִיְנִי, onī, or נִיְנִי, oniyāh*. In Jonah i, 5, *πλοῖον* is used to represent the Heb. *סִפִּינָה, sephīnāh*, which, from its etymology, appears to mean a vessel covered with a deck or with hatches, in opposition to an open boat. The senses in which *σκάφος* (2 Macc. xii, 3, 6) and *σκάφη* (Acts xxvii, 16, 32) are employed we shall notice as we proceed. The use of *τριήρης*, or *trireme* (A. V. "galley"), is limited to a single passage in the Apocrypha (2 Macc. iv, 20). In four passages (Numb. xxiv, 24; Isa. xxxiii, 21; Ezek. xxx, 9; Dan. xi, 30) the Heb. term is *נֶפֶשׁ, tsī*, so called from being set up or *built*. See *BOAT*.

IV. *Styles of Ancient Ships*.—1. *Their Size*.—The narrative which we take as our chief guide affords a good standard for estimating this. The ship in which Paul was wrecked had 276 persons on board (Acts xxvii, 37), besides a cargo (*φορτίον*) of wheat (ver. 10, 38); and all these passengers seem to have been taken on to Puteoli in another ship (xxviii, 11) which had her own crew and her own cargo; nor is there a trace of any difficulty in the matter, though the emergency was unexpected. Now in English transport-ships, prepared for carrying troops, it is a common estimate to allow a ton and a half per man; thus we see that it would be a mistake to suppose that these Alexandrian corn-ships were very much smaller than modern trading-vessels. What is here stated is quite in harmony with other instances. The ship in which Josephus was wrecked (*Life*, § 3), in the same part of the Levant, had 600 souls on board. The Alexandrian corn-ship described by Lucian (*Navig. s. vota*) as driven into the Piræus by stress of weather, and as exciting general attention from her great size, would appear (from a consideration of the measurements, which are explicitly given) to have measured 1100 or 1200 tons. As to the ship of Ptolemy Philadelphus, described by Athenæus (v. 204), this must have been much larger; but it would be no more fair to take that as a standard than to take the "Great Eastern" as a type of a modern steamer. On the whole, if we say that an ancient merchant-ship might range from 500 to 1000 tons, we are clearly within the mark.

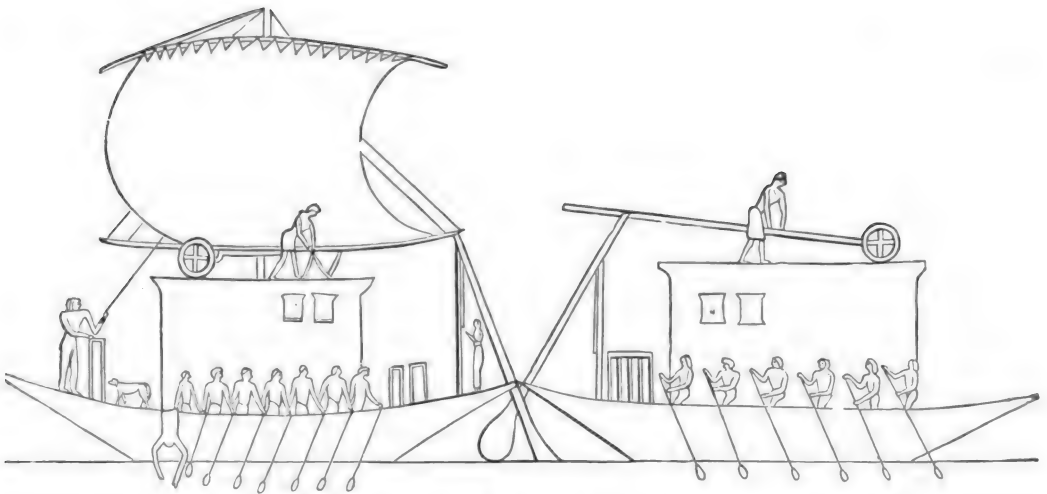

2. *Merchant-ships in the Old Test.*—The earliest pas-

sages where seafaring is alluded to in the Old Test., are the following in order: Gen. xlix, 13, in the prophecy of Jacob concerning Zebulun (Sept. *κατοικήσει παρ' ὄρμον πλοίων*); Numb. xxiv, 24, in Balaam's prophecy (where, however, ships are not mentioned in the Sept.); Deut. xxviii, 68, in one of the warnings of Moses (*ἀποστρέψει σε Κύριος εἰς Αἴγυπτον ἐν πλοίοις*); Judg. v, 17, in Deborah's Song (*Δὲν εἰς τὴ παροικίᾷ πλοίοις*). Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job (ix, 26, *ἡ καὶ ἐστὶ ναυσὶν ἵχνος ὁδοῦ*) and in the Psalms (xlvii [xlviii], 7, *ἐν πνεύματι βιαίῳ συντρίψεις πλοῖα θαλάσσης*; ciii [civ], 26, *ἐκεῖ πλοῖα διαπορεύονται*; cvi, 23, *οἱ καταβαίνοντες εἰς θάλασσαν ἐν πλοίοις*). Prov. xxiii, 34 may also be quoted. To this add xxx, 19 (*τρίβους νῆος ποντοπορούσης*); xxxi, 14 (*ναῦς ἐμπορευομένη μακρόθεν*). Solomon's own ships, which may have suggested some of these illustrations (1 Kings ix, 26; 2 Chron. viii, 18; ix, 21), have previously been mentioned. We must notice the disastrous expedition of Jehoshaphat's ships from the same port of Ezion-geber (1 Kings xxii, 48, 49; 2 Chron. xx, 36, 37). The passages which remain are in the prophets, especially Isaiah and Ezekiel. In the former prophet the general term "ships of Tarshish" is variously given in the Sept., *πλοῖον θαλάσσης* (Isa. ii, 16), *πλοῖα Καρχηδόνας* (xxiii, 1, 14), *πλοῖα θαλάσσης* (lx, 9). For another allusion to seafaring, see xliii, 14. The celebrated 27th chapter of Ezekiel ought to be carefully studied in all its detail; and in Jonah i, 3-16 the following technical phrases in the Sept. (besides what has been already adduced) should be noticed: *ναῦλον* (ver. 3), *συντριβῆναι* (ver. 4), *ἐκβολὴν ἐποιήσαντο τῶν σκευῶν, τοῦ κουφισθῆναι* (ver. 5), *κοπάσει ἡ θάλασσα* (ver. 11, 12). In Dan. xi, 40 (*συναχθήσεται βασιλεὺς τοῦ βορρᾶ ἐν ἔρμασι καὶ ἐν ἱππέσιν καὶ ἐν ναυσὶ πολλαῖς*) we touch the subject of ships of war.

3. *Ships of War in the Apocrypha*.—Military operations both by land and water (*ἐν τῇ θαλάσσῃ καὶ ἐπὶ τῆς ξηρᾶς*, 1 Macc. viii, 23, 32) are prominent subjects in the books of Maccabees. Thus in the contract between Judas Maccabæus and the Romans it is agreed (ver. 26, 28) that no supplies are to be afforded to the enemies of either, whether *σίτος, ὕψλα, ἀργύριον*, or *πλοῖα*. In a later passage (xv, 3) we have more explicitly, in the letter of king Antiochus, *πλοῖα πολεμικά* (see ver. 14), while in 2 Macc. iv, 20 (as observed above) the word *τριήρεις*, "galleys," occurs in the account of the proceedings of the infamous Jason. Here we must not forget the monument erected by Simon Maccabæus on his father's grave, on which, with other ornaments and military symbols, were *πλοῖα ἐπιγεγραμμένα, εἰς τὸ θωπεῖσθαι ὑπὸ πάντων τῶν πλεόντων τὴν θάλασσαν* (1 Macc. xiii, 29). Finally must be mentioned the *noyade* at Joppa, when the resident Jews, with their wives and children, 200 in number, were in-

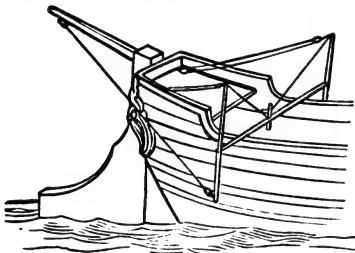

Ancient Ship of the largest size. (From a painting at Pompeii.)

Ancient Egyptian Ship of the largest size. (From the sculptures in the Grotto of Eleutherum.)

duced to go into boats and were drowned (2 Macc. xii, 3, 4), with the vengeance taken by Judas (τὸν μὲν λιμένα νύκτωρ ἐνέπηρσε καὶ τὰ σκάφη κατέφλεξε, ver. 6). It seems sufficient simply to enumerate the other passages in the Apocrypha where some allusion to seafaring is made. They are the following: Wisd. v, 10; xiv, 1; Eccclus. xxxiii, 2; xliii, 24; 1 Esd. iv, 23.

Modern Levantine Ship.

In row-boats the rowers are seated on the cross-beams (ζυγά, in Latin *transtra*), hence called *zygites*. Before the invention of gunpowder, naval combats were necessarily at close quarters; but to enable the soldiers (ἱπιδάραι) to fight without interfering with the rowers, a platform or gangway (πάροδος) was laid on the top of the bulwarks which surround the deck, projecting partly over the side and partly over the deck. Upon this they fought; and, where great speed was required, as in pursuit or flight, the fighting-men rowed, in which case movable seats or stools (θρᾶνοι) were requisite for them to sit upon, and from these they were called *thranites*. It appears, therefore, that from the necessity of the case, fighting-vessels must have had more than one rank of rowers, just as the natives of the South Seas both fight and row from the outriggers of their canoes. The adjoining cut represents the upper rank,

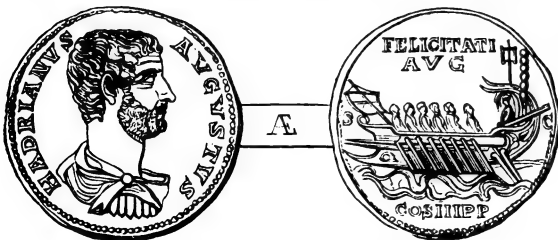

or *thranites*, rowing from the gangway. It is right to explain that the artist has contrived to give the details of the bow and stern, by introducing only one fourth of the straight part of the ship where the rowers were seated. Otherwise, if done to a scale, a long low vessel would have appeared on a coin little more than a mere line.

As the size of the vessels was increased, and they were decked over, the *zygites* retained their name, but were necessarily placed upon raised seats. Upon trial it was found that an additional rank of rowers, seated on the deck between the oars of the primitive rank, could, by keeping time, row without difficulty. As these were seated nearer the side of the ship, and under the gangway or sheltered portion of the deck, which was called the *thalamus*, or sleeping-place, they were called *thalamites*. Hence the three ranks of rowers in a trireme were the *thranites*, *zygites*, and *thalamites*; and hence the vertical distance between the rowers was only one half of the horizontal distance, or only eighteen inches, instead of six feet, as is usually supposed.

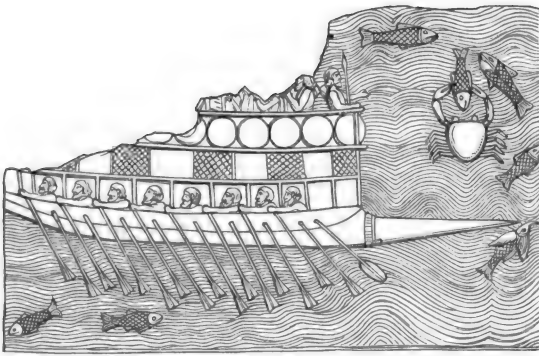

The monoxyle, or hollow tree, with both ends rounded, must be held to be the primitive form and model for the ship, and continued to be so with little alteration till the Middle Ages, when a change in the mode of steering rendered a change in the form of the stern necessary, but which it is foreign to our purpose to take into consideration.

4. *Boats on the Sea of Galilee.*—The reader of the New Test. is well aware how frequently he finds himself with the Saviour on the romantic shores of the Sea of Gennesareth. There Jesus is seen, now addressing the people from on board a vessel, πλοῖον (Matt. xiii, 2, Luke v, 3), now sailing up and down the lake (Matt. viii, 23; ix, 1; xiv, 13; John vi, 17). Some of his earliest disciples were proprietors of barks which sailed on this inland sea (Matt. iv, 21; John xxi, 3; Luke v, 3). These "ships" were indeed small. Josephus designates

the ships here employed by the term *σκάφη*. They were not, however, mere boats; they carried their anchor with them (War, iii, 10, 1; *Life*, § 33). There was, too, a kind of vessel larger than this, called *σχεδία* by Josephus, who narrates a sea-fight which took place on the lake, conducted on the part of the Romans by Vespasian himself (War, iii, 10, 9). It thus appears that the lake was not contemptible nor its vessels mean; and those should hence learn to qualify their language who represent the Galilean fishermen as of the poorest class.

Coin of Hadrian, showing a Trireme.

Assyrian Armed Galley in Motion. (Sculpture from Koyunjik, in the British Museum.)

There is a melancholy interest in that passage of Dr. Robinson's *Researches* (iii, 253) in which he says that on his approach to the Sea of Tiberias he saw a single white sail. This was the sail of the one rickety boat which, as we learn from other travellers (see especially Thomson, *Land and Book*, ii, 81), alone remains on a scene represented to us in the gospels and in Josephus as full of life from the multitude of its fishing-boats. In the narratives of the call of the disciples to be "fishers of men" (Matt. iv, 18-22; Mark i, 16-20; Luke v, 1-11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Matt. viii, 23-27; Mark iv, 35-41; Luke viii, 22-25), it is for every reason instructive to compare the three narratives; and we should observe that Luke is more technical in his language than Matthew, and Mark than Luke. Thus, instead of *σεισμός μέγας ἐγένετο ἐν τῇ θαλάσῃ* (Matt. viii, 24), we have *κατέβη λαίλαψ ἀνέμου εἰς τὴν λίμνην* (Luke viii, 23), and again *τῷ κλύδωνι τοῦ ὕδατος* (ver. 24); and instead of *ὥστε τὸ πλοῖον καλύπτεσθαι*, we have *συνεπληροῦντο*. In Mark (iv, 37) we have *τὰ κύματα ἐπέβαλλον εἰς τὸ πλοῖον, ὥστε αὐτὸ ἤδη γεμίζεσθαι*. This evangelist also mentions the *προσκεφάλαιον*, or boatman's cushion, on which our blessed Saviour was sleeping *ἐν τῇ πρύμνῃ*, and he uses the technical term *ἐκούπασεν* for the lulling of the storm. See more on this subject in Smith, *Dissertation on the Gospels* (Lond. 1853). We may turn now to John. In the account he gives of what followed the miracle of walking on the sea (vi, 16-25), *πλοῖον* and *πλοιάριον* seem to be used indifferently, and we have mention of other *πλοιάρια*. There would of course be boats of various sizes on the lake. The reading, however, is doubtful. Finally, in the solemn scene after the resurrection (John xxi, 1-8),

we have the terms *αἰγιαλός* and *τὰ διέξια μέρη τοῦ πλοίου*, which should be noticed as technical. Here again *πλοῖον* and *πλοιάριον* appear to be synonymous. If we compare all these passages with Josephus, we easily come to the conclusion that, with the large population around the Lake of Tiberias, there must have been a vast number both of fishing-boats and pleasure-boats, and that boat-building must have been an active trade on its shores (see Stanley, *Sin. and Pal.* p. 367).

The so-called ships of the Lake of Tiberias were, in fact, fishing-boats impelled by oars (see Mark vi, 48; John vi, 19). We learn also from Luke's account of Christ stilling the tempest, and his using the expression *πλειόντων*, "sailing" (viii, 23), that they must have had masts and sails; and from Mark's account of the same event (ix, 38) they must have been

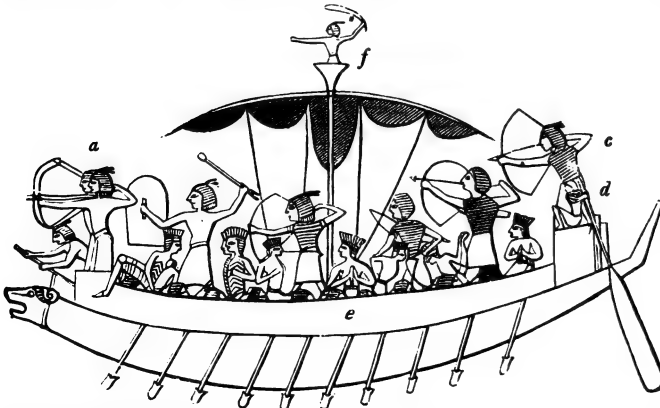

furnished with a *προσκεφάλαιον*, "pillow," which, according to Hesychius, was the same as the *ὑπερεισμίον*, or fleece, upon which the rowers sat. So far as we can learn from the scriptural account, they fished with nets, we must suppose with the drag-net, and also with the *ἀμφίβληστρον* (Matt. iv, 18) or *ἀμφιβάλλοντα* (Mark i, 16).

Fishermen Dragging a Net. (Mosaic pavement from Carthage, in the British Museum.)

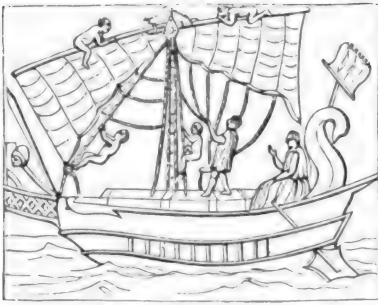

V. Construction and Equipment.—1. *Shape and Ornaments of the Hull*.—It is probable, from the mode of steering (and, indeed, it is nearly evident from ancient works of art), that there was no very marked difference between the bow (*πρόρα*, "foreship," Acts xxvii, 30, "fore part" ver. 41) and the stern (*πρύμνα*, "hinder part," ver. 41; see Mark iv, 38). The "hold" (*κοίτη*, "the sides of the ship," Jonah i, 5) would present no special peculiarities. In merchant-ships the sides of the deck were defended by an open rail, the stem-post and stern-post rising in

a curve, most frequently terminated by an ornament representing the head of a water-fowl bent backwards. This was termed the *apelustre* or *ch-nisus* (*χηνισκος*, from *χην*, a goose); or by a head in profile, probably suggestive of the sign (*παράσημον*, Acts xxviii, 11) or name of the ship. Outside of these ornaments were projections at each end, which increased the dimensions without adding to the capacity or tonnage of the vessels. This must be kept in mind in estimating the relative size of ancient and modern ships. On the stern-projections we sometimes see an awning represented, as in the ship on the tomb at Pompeii; and on the

Ancient Egyptian War-galley; the sail being clewed up during the action. (Thebes.)

a, raised forecastle, in which the archers were posted; c, another post for the archers, and the pilot, d; e, a bulwark, to protect the rowers; f, slingers, in the top.

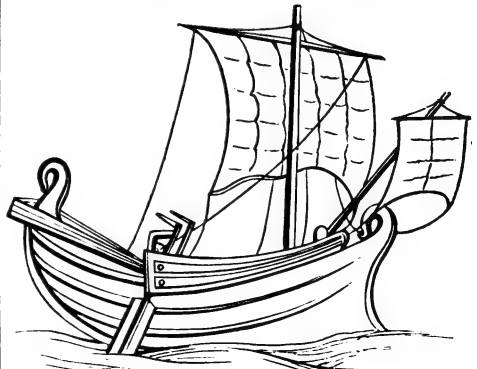

Ancient Ship. (From a painting at Pompeii.)

corresponding projections at the bow, we are informed by Lucian, in his description of an Alexandrian ship, that the anchors were stowed, and also the *στροφεία* and *παραγωγείς*. The *στροφεία* may be interpreted capstans for heaving up the anchors, and the *παραγωγείς* oars or paddles for helping the ship round when "slack in stays," rendered by Hedericus "instrumentum ad circumagendam navem." In the picture of Theseus deserting Adriadne, from Herculaneum, we see the cable coiled round a capstan near the stern. We see also the roof of one of the *οικήσεις*, or cabins, mentioned by Lucian in his description of the ship of Alexandria. It will be observed that the mode of furling the sails like a window-curtain, more fully indicated in another figure, is marked by the outline of the sole or lower edge of the sail. Of two other customary ornaments, however, one is probably implied, and the second is distinctly mentioned in the account of Paul's voyage. That personification of ships which seems to be instinctive led the ancients to paint an eye on each side of the bow. Such is the custom still in the Mediterranean, and indeed our own sailors speak of "the eyes" of a ship. This gives vividness to the word *ἀνθρώπου ὄφθαλμοῦ*, which is used (Acts xxvii, 15) where it is said that the vessel could not "bear up into" (literally "look at") the wind. This was the vessel in which Paul was wrecked. An ornament of that which took him on from Malta to Pozzuoli is more explicitly referred to. The "sign" of that ship (*παράσημον*, Acts xxviii, 11) was "Castor and Pollux" (*lucida sidera*—brilliant constellations, auspicious to navigators, Horace, *Od.* i, 3; Liv. xxxvii, 92; Tacit. *Ann.* vi, 34; Ovid, *Trist.* i, 10, 1); and the symbols of these heroes (probably in the form represented in the coin engraved under that article) were doubtless painted or sculptured on each side of the bow, as was the case with the goddess Isis on Lucian's ship (*ἡ πρώτη τὴν ἐπώνυμον τῆς νεῶς Σεὺν ἔχουσα τὴν Ἰσὶν ἐκατέρωθεν*, *Navis.* c. 5). The Rev. George Brown found an inscription at Port Phenix which had been on an ancient building, superintended by an Alexandrian gubernator (*κυβερνητής*, Acts xxvii, 11), of the ship whose sign was "Isopharia." In the list of the Attic fleet we find names like those of the moderns, such as "Agatha," "Amphitrite," "Aura," "Delia," "Lyra," "Europa," "Centaur," "Roma," etc.

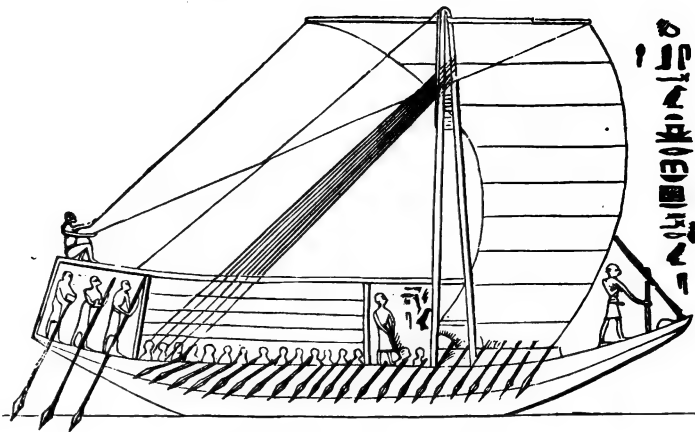

2. *Masts, Sails, Ropes or Rigging, Yards, Oars, etc.*—These, in distinction from the hull or vessel itself, were collectively called *σκεῦη* or *σκευή*, *gear* (*τὰ δὲ σύμπαντα σκευή καλεῖται*, Jul. Poll.). We find this word twice used for parts of the rigging in the narrative of the Acts (xxvii, 17, 19). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Such was the rig also of the ships of the Northmen at a later period. Hence the strain upon the hull and the danger of starting the planks were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient

merchantman. But these were repetitions, so to speak, of the same general unit of rig. In the account of Paul's shipwreck very explicit mention is made of the *ἀντημῶν* (Acts xxvii, 40), which is undoubtedly the "foresail" (not "mainsail," as in the A. V.). Such a sail would be almost necessary in putting a large ship about. On that occasion it was used in the process of running the vessel aground. Nor is it out of place here to quote a Crimean letter in the *Times* (Dec. 5, 1855): "The 'Lord Raglan' [merchant-ship] is on shore, but taken there in a most sailorlike manner. Directly her captain found he could not save her, he cut away his mainmast and mizzen, and, setting a topsail on her foremast, ran her ashore stem on." Such a mast may be seen raking over the bow, in representations of ships in Roman coins. In the Old Test. the mast (*ιστός*) is mentioned (Isa. xxxiii, 23); and from another prophet (Ezek. xxvii, 5) we learn that the cedar-wood from Lebanon was sometimes used for this part of ships. There is a third passage (Prov. xxiii, 34, *רֵאשִׁית חֵבֶל*) where the top of a ship's mast is probably intended, though there is some slight doubt on the subject, and the Sept. takes the phrase differently. Both ropes (*σχολία*, Acts xxvii, 32) and sails (*ιστία*) are mentioned in the above-quoted passage of Isaiah; and from Ezekiel (xxvii, 7) we learn that the latter were often made of Egyptian linen (if such is the meaning of *στρωμνή*). There the word *χαλῶν* (which we find also in Acts xxvii, 17, 30) is used for lowering the sail from the yard. It is interesting here to notice that the word *ὑποστέλλομαι*, the technical term for furling a sail, is twice used by Paul, and that in an address delivered in a seaport in the course of a voyage (Acts xx, 20, 27). It is one of the very few cases in which the apostle employs a nautical metaphor. The annexed cut, from a marble in the Borghese collection at Rome, gives a good idea of the relative size and position of the sails, although in other respects the details are incorrect. It will be observed from this, as well as from the figure of the ship from the tomb at Pompeii, the sails are divided into compartments by ropes sewed across them; so that should the sail be torn in a storm, the injury would be confined to one of the squares. The name of the great and proper mast (*ὁ μέγας καὶ γνήσιος ιστός*) was *acatium* (*ἀκάτιον*); the mast at the stern *epidromus*, according to Julius Pollux, who adds that the smallest was called *dolon*, without, however, mentioning its position. Isidore of Seville gives the same names to the sails in a passage evidently taken from the foregoing, which is as follows: "Acatium velum maximum et in medium navi constitutum, epidromus secundæ amplitudinis sed ad puppim. Dolon minimum velum et ad proram artemo dirigendæ potius navis causa commendatum quam celeritate." It has generally been supposed by this that the sail at the bow was called the *dolon*. Mr. Smith, however, in his essay has shown, by numerous extracts from ancient authors, that the *dolones* were

Ship under Sail. (From a sculptured marble.)

small sails to be substituted for the larger in stormy weather, and that the mast at the bow with its sail was the *artemon*. In addition to the three lower sails, they had *suppara*, or topsails, to be set in light winds; and it would appear from a coin of Nero, given by Montfaucon (pl. cxliii), that they had sails above the *suppara* equivalent to topgallant-sails—a ship being represented with two yards above the main-yard. We have no proof that the ancients made use of what, in modern language, are termed fore-and-aft sails; but they certainly had triangular sails, at least in the war-galleys, with the apex at the foot of the mast; such a sail could

Large Ancient Egyptian Boat with sail, apparently made of the papyrus, a double mast, and many rowers. (In a tomb at Kom Ahmar, above Minieh.)

be braced about without interfering with the rowers, which was probably the reason why this form was adopted. The lower corners of the sails, or rather the ropes which attach them to the sides of the ship, in English the "sheets," were called the feet of the sail. The *propes*, fore-foot (*πρόπους*), a word which has puzzled commentators, is simply the sheet which is drawn forward, and would no doubt have been called in English the fore-sheet, had that term not been applied to the sheet of the foresail. The *σκεύη* in ancient ships consisted of *σκεύη ξύλινα* (wooden gear), and *σκεύη κρεμαστά* (hanging gear); the first consisted of masts, yards, oars, rudders, etc. The *σχονία* (*funes*) were the *hawser*s or strong ropes for the anchors, and also for fastening the ship ashore; while the *ροπία* were a lighter kind of *cordage*, carefully made and attached to the masts, yards, and sails. The yards (*κεραία*) were composed of two spars doubled in the centre. This explains an apparently absurd *non sequitur* of Pliny. He tells us that, although single spars were large enough, yet seamen were so rash as to add sail to sail—the word "non" being obviously omitted. The above cut, from the tomb of Nævoleia Tyche at Pompeii, explains the mode of furling the sails by drawing them up to the yard like a window-curtain, as already noticed in the ship of Theseus.

This seems the best place for noticing three other points of detail. Though we must not suppose that merchant-ships were habitually propelled by rowing, yet sweeps must sometimes have been employed. In Ezek. xxvii, 29, oars (כַּשָּׁשׁ) are distinctly mentioned; and it seems that oak-wood from Bashan was used in making them (ἐκ τῆς Βασανίτιδος ἐποίησαν τὰς κώπας σου, ver. 6). Again, in Isa. xxxiii, 21, אֶנֶךְ שִׁיטָה literally means "a ship of oar," i. e. an oared vessel. Rowing, too, is probably implied in Jonah i, 13, where the Sept. has simply *παρεβύζοντο*. Another feature of the ancient as of the modern ship is the flag, or *σημεῖον*, at the top of the mast (Isa. *loc. cit.* and xxx, 17). Here, perhaps, as in some other respects, the early Egyptian paintings supply our best illustration. Each ship was provided also with a plumb-line for sounding (Acts xxvii, 28; Isidor. *Orig.* xix, 4).

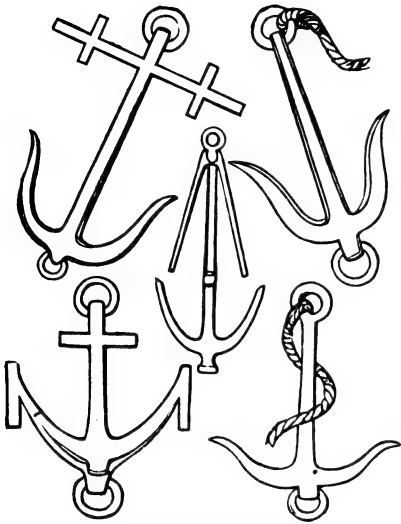

writer says in reference to a similar comment on a passage of Cicero, "It is hardly possible that he can have seen a ship." The sacred writer's use of *πηδάλια* is just like Pliny's use of *gubernacula* (*H. N.* xi, 37, 88) or Lucretius's of *guberna* (iv, 440). Ancient ships were in truth not steered at all by rudders fastened or hinged to the stern, but by means of two paddle-rudders, one on each quarter, acting in a rowlock or through a port-hole, as the vessel might be small or large. This fact is made familiar to us in classical works of art, as on coins, and the sculptures of Trajan's Column. The same thing is true, not only of the Mediterranean, but of the early ships of the Northmen, as may be seen in the Bayeux tapestry. Traces of the "two rudders" are found in the time of Louis IX. The hinged rudder first appears on the coins of king Edward III. There is nothing out of harmony with this early system of steering in James ii, 4, where *πηδάλιον* occurs in the singular; for "the governor" or steersman (*ὁ ἐυθύων*) would only use one paddle-rudder at a time. In a case like that described in Acts xxvii, 40, where four anchors were let go at the stern, it would of course be necessary to lash or trice up both paddles, lest they should interfere with the ground tackle. When it became necessary to steer the ship again, and the anchor-ropes were cut, the lashings of the paddles would of course be unfastened.

4. *Anchors*.—It is probable that the ground tackle of Greek and Roman sailors was quite as good as our own. The anchors appear to have differed little from those of the moderns, except that in place of the palms or iron plates attached to the extremities of the arms, the arms themselves were beaten flat, as in the Dutch anchors. It is a common error to suppose that they were without stocks. Thus Capt. Beechey says, "The transverse piece or anchor-stock is wanting in all of them." The annexed cut, from a coin of Antoninus Pius, shows that this is a mistake.

Two allusions to anchoring are found in the New

Coin of Antoninus Pius, showing Anchor.

Ancient Anchors.

Test., one in a very impressive metaphor concerning Christian hope (Heb. vi, 19). A saying of Socrates, quoted here by Kypke (οὐτε γὰρ ἔξ ἐνὸς ἀγκυρίου οὐτε βίον ἐκ μιᾶς ἐλπίδος ὁρμίσασθαι), may serve to carry our thoughts to the other passage, which is part of the literal narrative of Paul's voyage at its most critical point. The ship in which he was sailing had four anchors on board, and these were all employed in the night, when the danger of falling on breakers was imminent. The sailors on this occasion anchored by the stern (ἐκ πρύμνης ῥιψάντες ἀγκύρας τέσσαρας, Acts xxvii, 29). In this there is nothing remarkable, if there has been time for due preparation. English ships of war anchored by the stern at Copenhagen and Algiers. It is clear, too, that this was the right course for the sailors with whom Paul was concerned, for their plan was to run the ship aground at daybreak. The only motives for surprise are that they should have been able so to anchor without preparation in a gale of wind, and that the anchors should have held on such a night. The answer to the first question thus suggested is that ancient ships, like their modern successors, the small craft among the Greek islands, were in the habit of anchoring by the stern, and therefore prepared for doing so. We have a proof of this in one of the paintings of Herculaneum, which illustrates another point already mentioned, viz. the necessity of tricing up the movable rudders in case of anchoring by the stern (see Acts xxvii, 40). The other question, which we have supposed to arise, relates rather to the holding-ground than to the mode of anchoring; and it is very interesting here to quote what an English sailing-book says of Paul's Bay in Malta: "While the cables hold, there is no danger, as the anchors will never start" (Purdy, *Sailing Directions*, p. 180).

5. *Undergirders*.—The imperfection of the build, and still more (see above, 2) the peculiarity of the rig, in ancient ships resulted in a greater tendency than in our times to the starting of the planks, and consequently to leaking and foundering. We see this taking place alike in the voyages of Jonah, Paul, and Josephus; and the loss of the fleet of Æneas in Virgil ("laxis laterum compagibus omnes," *Æn.* i, 122) may be adduced in illustration. Hence it was customary to take on board peculiar contrivances, suitably called "helps" (βοηθῆαις, Acts xxvii, 17), as precautions against such dangers. These were simply cables or chains, which in case of necessity could be passed around the frame of the ship, at right angles to its length, and made tight. The process is in the English navy called *frapping*, and

many instances could be given where it has been found necessary in modern experience. Ptolemy's great ship, in Athenæus (*loc. cit.*), carried twelve of these undergirders (ὑποζώματα). Various allusions to the practice are to be found in the ordinary classical writers. See, for instance, Thucyd. i, 29; Plato, *Rep.* x, 3, 616; Horace, *Od.* i, 14, 6. But it is most to our purpose to refer to the inscriptions containing a complete inventory of the Athenian navy, as published by Böckh (*Urkunden über das Seewesen des attischen Staates* [Berl. 1840]). The editor, however, is quite mistaken in supposing (p. 133-138) that these undergirders were passed around the body of the ship from stem to stern.

6. *Ship's Boat*.—This is perhaps the best place for noticing separately the σκάφη, which appears prominently in the narrative of the voyage (Acts xxvii, 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach Phœnice, had her boat towing behind. When the gale came, one of their first desires must have been to take the boat on board, and this was done under the lee of Claudia, when the ship was undergirded, and brought round to the wind for the purpose of lying-to; but it was done with difficulty, and it would seem that the passengers gave assistance in the task (μόλις ἰσχύσαμεν περικρατεῖς γενέσθαι τῆς σκάφης, ver. 16). The sea by this time must have been furiously rough, and the boat must have been filled with water. It is with this very boat that one of the most lively passages of the whole narrative is connected. When the ship was at anchor in the night before she was run aground, the sailors lowered the boat from the davits with the selfish desire of escaping, on which Paul spoke to the soldiers, and they cut the ropes (τὰ σχοινία) and the boat fell off (ver. 30-32).

VI. *Command and Management*.—1. *Officers and Crew*.—In Acts xxvii, 11 we have both κυβερνήτης and ναύκληρος. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The same word occurs also in Rev. xviii, 17; Prov. xxiii, 34; Ezek. xxvii, 8, and is equivalent to πρωτεύς in ver. 29; Jonah i, 6. In James iii, 4, ὁ ἐνθύρων, "the governor," is simply the steersman for the moment. The word for "shipmen" (Acts xxvii, 27, 30) and "sailors" (Rev. xviii, 17) is simply the usual term, ναῦται. In the latter passage ὄμιλος occurs for the crew, but the text is doubtful. In Ezek. xxvii, 8, 9, 26, 27, 29, 34, we have κοπηλάται for "those who handle the oar," and in the same chapter (ver. 29) ἐπιβάται, which may mean either passengers or mariners. The only other passages which need be noticed here are 1 Kings ix, 27, and 2 Chron. viii, 18, in the account of Solomon's ships. The former has τῶν παιδῶν αὐτοῦ ἄνδρες ναυτικοὶ ἐλαύνειν εἰδότες θάλασσαν; the latter, παῖδες εἰδότες θάλασσαν.

2. *Rate of Sailing*.—Paul's voyages furnish excellent data for approximately estimating this, and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forget), that winds are variable. Thus the voyage between Troas and Philippi, accomplished on one occasion (Acts xvi, 11, 12) in two days, occupied on another occasion (xx, 6) five days. Such a variation might be illustrated by what took place almost any week between Dublin and Holyhead before the application of steam to seafaring. With a fair wind an ancient ship would sail fully seven knots an hour. Two very good instances are again supplied by Paul's experience—in the voyages from Cæsarea to Sidon (xxvii, 2, 3) and from Rhegium to Puteoli (xxviii, 13). The result given by comparing, in these cases, the measurements of time and distance corresponds with what we gather from Greek and Latin authors generally—e. g. from Pliny's story of the fresh fig produced by Cato

in the Roman senate before the third Punic war: "This fruit was gathered fresh at Carthage three days ago; that is the distance of the enemy from your walls" (*H. N.* xv, 20).

3. *Sailing Before the Wind and Near the Wind.*—The square-rig which has been described is, like the rig of Chinese junks, peculiarly favorable to a quick run before the wind. We have in the New Test. (Acts xvi, 11; xxvii, 16) the technical term *εὐθύδρομιον* for voyages made under such advantageous conditions. The run of Paul's ship from Rhegium to Puteoli, one hundred and eighty miles, in two consecutive days, the wind being from the south and consequently fair, agrees perfectly with the instances adduced by captain Beechey in his remarks on ancient ships (Appendix to *Travels in Africa*, p. 38). It would, however, be a great mistake to suppose that ancient ships could not work to windward. Pliny distinctly says: "Isidem ventis in contrarium navigatur prolati pedibus" (*H. N.* ii, 48). Cicero, in one of his epistles, says that in consequence of contrary winds they navigated slowly and with difficulty: "Adversis ventis usi essemus tardeque et incommode navigassemus" (*Epist. ad Familiares*, lib. xiv, ep. 5), a passage which agrees in a very remarkable manner with one in Luke's account of Paul's voyage, *βραδυπλοοῦντες καὶ μάλιστα γινόμενοι*, etc. (Acts xxvii, 7)—sailing slowly and with difficulty were come, etc. Luke does not mention contrary winds; but we know from the context that the ship was sailing to the westward, in a region and at a season when westward winds constantly prevail. The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. At one very critical point of Paul's voyage to Rome (*ibid.*) we are told that the ship could not hold on her course (which was west by south, from Cnidus by the north side of Crete) against a violent wind (*μὴ προσέωντος ἡμᾶς τοῦ ἀνέμου*) blowing from the north-west, and that consequently she ran down to the east end of Crete [see *SALMONE*], and worked up under the shelter of the south side of the island (ver. 7, 8). See *FAIR HAVENS*. Here the technical terms of our sailors have been employed, whose custom is to divide the whole circle of the compass-card into thirty-two equal parts called points. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, of which the hull was more clumsy and the yards could not be braced so tight, it would be safe to assign seven points as the limit. This will enable us, so far as we know the direction of the wind (and we can really ascertain it in each case very exactly), to lay down the tracks of the ships in which Paul sailed, beating against the wind, on the voyages from Philippi to Troas (*ἀχρις ἡμερῶν πέντε*, Acts xx, 6), from Sidon to Myra (*διὰ τὸν ἀνέμονα ἐκείνου ἐναντίον*, xxvii, 3-5), from Myra to Cnidus (*ἐν ἱκαναῖς ἡμέραις βραδυπλοοῦντες*, ver. 6, 7), from Salmone to Fair Havens (*μάλιστα παραλεγόμενοι*, ver. 7, 8), and from Syracuse to Rhegium (*περιελθόντες*, xxviii, 12, 13).

4. *Lying-to.*—This topic arises naturally out of what has preceded, and it is so important in reference to the main questions connected with the shipwreck at Malta that it is here made the subject of a separate section. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is not to make progress at all hazards, but to ride out a gale in safety; and this is what was done in Paul's ship when she was undergirded and the boat taken on board (Acts xxvii, 14-17) under the lee of Claudia. It is here that Luke uses the vivid term *ἀντοφθαλμίει* mentioned above. Had the gale been less violent, the ship could easily have held on her course. To anchor was out of the question; and to have drifted before the wind would have been to run into the fatal Syrtis on the African coast. See *QUICKSANDS*. Hence the vessel was *laid-to*

("close-hauled," as the sailors say) "on the starboard tack," i. e. with her right side towards the storm. The wind was east-northeast [see *EUROCLYDON*], the ship's bow would point north by west, the direction of drift (six points being added for "lee-way") would be west by north, and the rate of drift about a mile and a half an hour. It is from these materials that we easily come to the conclusion that the shipwreck must have taken place on the coast of Malta. See *ADRIA*.

5. *Storms and Shipwrecks.*—The dangers of the ocean to sailors on board such ships as these were great, and, in the then ignorance of navigation, caused sailing to be restricted to the spring, summer, and autumn months; winter was avoided. To the Romans the sea was opened in March and closed in November (Cæsar, *Bell. Gall.* iv, 36; v, 23; Philo, *Opp.* iv, 548; Acts xxvii, 9); and ships which, towards the end of the year, were still at sea earnestly sought a harbor in which to pass the winter (ver. 12).

The first century of the Christian æra was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and, perhaps, as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass and very imperfect charts and instruments, if any at all; and though it would be a great mistake to suppose that they never ventured out of sight of land, yet, dependent as they were on the heavenly bodies, the danger was much greater than now in bad weather, when the sky was overcast and "neither sun nor stars in many days appeared" (Acts xxvii, 20). Hence, also, the winter season was considered dangerous and, if possible, avoided (*ὄντος ἤδη ἐπισφαλούς τοῦ πλοός, διὰ τὸ καὶ τὴν νηστιάν ἤδη παρεληλυθῆναι*, ver. 9). Certain coasts, too, were much dreaded, especially the African Syrtis (ver. 17). The danger indicated by breakers (ver. 29), and the fear of falling on rocks (*τραχεῖς τόποι*), are matters of course. Paul's experience seems to have been full of illustrations of all these perils. We learn from 2 Cor. xi, 25 that, *before* the voyage described in detail by Luke, he had been "three times wrecked;" and, further, that he had once been "a night and a day in the deep," probably floating on a spar, as was the case with Josephus. These circumstances give peculiar force to his using the metaphor of a shipwreck (*ἐνανάγησαν*, 1 Tim. i, 19) in speaking of those who had apostatized from the faith. In connection with this general subject we may notice the caution with which, on the voyage from Troas to Patara (Acts xx, 13-16; xxi, 1), the sailors anchored for the night, during the period of dark moon, in the intricate passages between the islands and the main [see *MITYLENE*; *SAMOS*; *TROGYLLIUM*]; the evident acquaintance which, on the voyage to Rome, the sailors of the Adramyttian ship had with the currents on the coasts of Syria and Asia Minor (xxvii, 2-5) [see *ADRAMYTTEUM*]; and the provision for taking soundings in case of danger, as clearly indicated in the narrative of the shipwreck at Malta; the measurements being apparently the same as those which are customary with us (*βολίσαντες εὗρον ὀργυῖας εἴκοσι· βραχὺ δὲ διαστήσαντες, καὶ πάλιν βολίσαντες, εὗρον ὀργυῖας δεκαπέντε*, ver. 28).

6. *Nautical Terms.*—The great repository of such terms, as used by those who spoke the Greek language, is the *Onomasticon* of Julius Pollux; and it may be useful to conclude this article by mentioning a few out of many which are found there, and also in the New Test. or Sept. First, to quote some which have been mentioned above. We find the following, both in Pollux and the Scriptures: *σχοινία*, *σκευή*, *κλεισθῶν*, *χειμῶν*, *φορτίον*, *ἐκβολή*, *σύρτις*, *οὐδὲν ὑποστέλλεσθαι*, *οἷε ἦν τὸν ἥλιον ἰδεῖν*, *σκάφη*, *σκάφος*, *ναῦλον*, *συντριβῆναι*, *ὀφθαλμὸς ὅπου καὶ τοῦνομα τῆς νεῆς ἐπιγράφεται* (compared with Acts xxvii, 15; xxviii, 11), *τραχεῖς αἰγιαλοὶ* (compared with xxvii, 29, 40). The following

are some which have not been mentioned in this article: *ἀνάγεσθαι* and *κατάγεσθαι* (e.g. Acts xxviii, 11, 12), *συνιδέσθαι* (Ezek. xxvii, 5), *τρόπις* (Wisd. v, 10), *ἀναβαίνω* (Jonah i, 3; Mark vi, 51), *γαλήνη* (Matt. viii, 26), *ἀμφίβληστρον* (iv, 18; Mark i, 16), *ἀποφορτίσασθαι* (Acts xxi, 4), *ὑποπνέω* (xxvii, 13), *τυφών* (*ἀνεμὸς τυφωνικός*, ver. 14) *ἀγκύρας κατατείνειν* (*ἀγκύρας ἐκτείνειν*, ver. 30), *ὑβρίστῃ ἀνεμὸς* (*ὑβρεως*, ver. 10; *ὑβριν*, ver. 21), *προσκολλῶ* (*ἐπικολλῶ*, ver. 41), *κολυμβᾶν* (ver. 42), *διαλυθείσης τῆς νεώς* (*ἡ πρῶμα ἐλύετο*, ver. 41). This is an imperfect list of the whole number; but it may serve to show how rich the New Test. and Sept. are in the nautical phraseology of the Greek Levant. To this must be added a notice of the peculiar variety and accuracy of Luke's ordinary phrases for sailing under different circumstances, *πλέω*, *ἀποπλέω*, *βραδυπλοέω*, *διαπλέω*, *ἐκπλέω*, *καταπλέω*, *ὑποπλέω*, *παραπλέω*, *εὐδωδρομέω*, *ὑποτρέχω*, *παραλέγομαι*, *φέρομαι*, *διαφέρομαι*, *διαπεράω*.

VII. *Authorities*.—Smith's work on the *Voyage and Shipwreck of St. Paul* (Lond. 1848, 1856) is the standard work on ancient ships, and it contains a complete list of previous books on the subject. Reference, however, may be made to the memoranda of admiral Penrose, incorporated in Conybeare and Howson, *Life and Epistles of St. Paul* (Lond. 1856, 2d ed.), ch. xxvii, notes. See also Schlözer, *Vers. einer allgem. Gesch. d. Handels u. der Schiffahrt in den ältesten Zeiten* (Rostock, 1760); Le Roy, *La Marine des Anciens Peuples* (Paris, 1777); Berghaus, *Gesch. d. Schiffahrtkunde* (Leips. 1792); Benedict, *Vers. einer Gesch. d. Schiff. u. d. Hand. bei d. Alten* (ibid. 1809); Howell, *On the War Gallies of the Ancients*; Jal [A.], *Archéologie Navale* (Paris, 1840). A full account of the ancient Egyptian vessels is given by Wilkinson, abridgm. i, 411 sq.; ii, 119 sq. See NAVIGATION; SHIPWRECK.

SHIP, in ecclesiastical usage, is the name given to the vessel, shaped like a ship, in which incense is kept. It is also called a *boat*.

Shipherd, FAYETTE, a Congregational minister, was born in Granville, N. Y., Aug. 18, 1797. He was prepared for college at the Granville and Cambridge academies. He entered Middlebury College in 1819, remaining but one year, on account of ill-health, which prevented the completion of his course. He next studied theology with the Rev. William Chester, D.D., of Saratoga, and was ordained at Pawlet, Vt., Dec. 5, 1826, as colleague of Rev. John Griswold. From this pastorate he was dismissed Oct. 27, 1830. Choosing for a time the missionary work, he was sent, first to Vermont in 1830, and to New York in 1831, remaining in this field until he received a call to become a colleague of Dr. Beman, at Troy, N. Y. Here he remained one year, and then became pastor of Bethel Free Church, at the same place, and remained two years, at which time he received and accepted a call to the pastorate of the Church at Walton, N. Y. At this place he was installed April 29, 1835, and after remaining in charge three years was dismissed, to again take charge of the Bethel Church of Troy, which he continued to supply from 1838 to 1841. He organized the Congregational Free Church at Troy, Feb. 16, 1842, and remained there, preaching with success, until 1849, at which time the pastorate was dissolved. In 1850 he was acting pastor at Stephentown, also at Nassau from 1851 to 1853. He then, from 1853 to 1855, was agent, in Watertown and vicinity, of Carson League, at the same time supplying churches at Perch River, Stone Mills, Orleans, Four Corners, and La Fargeville. He was acting pastor at Pulaski from 1855 to 1858; also, without charge, filled the pastorate at Oberlin, O., from 1858 to 1873, preaching often, and supplying at Wellington from 1863 to 1865, and at Pittsfield from 1866 to 1868. In 1873 he removed to Walton, N. Y., and to Sidney Plains in 1877. In 1876 he published a pamphlet entitled *What May Women Do?* At length, be-

coming gradually feeble, he died, Aug. 14, 1878. (W. P. S.)

Shi'phi (Heb. *Shiphí*, שִׁפְי, *my abundance*, or *abundant*; Sept. Σαφαί v. r. Σεφείν and Σαφάλ), the son of Allon and father of Ziza, which last was a chief Simconite in the time of Hezekiah (1 Chron. iv, 37). B.C. ante 726.

Shiph'mite (Heb. with the article *hash-Shiphmí*, שִׁפְיָהּ, patral adj.; Sept. *ó τοῦ Σεφνί*), an epithet of Zabdi, David's chief vintage-master (1 Chron. xxvii, 27); probably as being a native of Shepham (q. v.).

Shiph'rah (Heb. *Shiphrah*, שִׁפְרָה, probably *brightness*, as in Job xxvi, 13; but perhaps Egyptian; Sept. Σεφώρα), first named of the two Hebrew midwives who disobeyed Pharaoh's order to kill the male infants, and were rewarded by Divine Providence for their humanity (Exod. i, 15). B.C. cir. 1740.

Shiph'tan (Heb. *Shiptan*, שִׁפְטָן, *judicial*; Sept. Σαφτάν v. r. Σαβαθάν), father of Kemuel, which latter was the phylarch of Ephraim and one of the commissioners appointed to divide Canaan among the tribes (Numb. xxxiv, 24). B.C. ante 1618.

Shipley, JONATHAN, a learned English prelate, was born about 1714. His education was liberal, and at a proper age he entered Christ Church, Oxford. In April, 1738, he took his degree of Master of Arts, entered holy orders, and obtained a living; in 1743 he was installed a prebendary in the Cathedral Church of Winchester, and in March, 1745, was appointed chaplain to the duke of Cumberland. He received the degree of Doctor of Divinity Oct. 14, 1748; became canon of Christ Church, Oxford, Jan. 28, 1749; and was made dean of Winchester in 1760, being permitted, by dispensation, to retain the livings of Silchester and Chilton. His last preferment took place in 1769, when he was promoted to the bishopric of St. Asaph, in which he remained until his death, in Bolton Row, Piccadilly, Dec. 9, 1788. His works, consisting of sermons, charges, and parliamentary speeches, were published in 2 vols. 8vo (1792).

Shipwreck, a term that occurs but twice in the New Test. in the verbal form *ναυαγίω*, once literally (2 Cor. xi, 25) and once metaphorically (1 Tim. i, 19). We learn from the former of these passages that Paul had already three times experienced this mishap prior to his more notable instance on the way to Rome. The interest that centres around this latter event, and the light it sheds upon many points of Biblical history, geography, and archaeology, are so great as to justify a special treatment of the topic in addition to the remarks given under previous heads. It is a singular coincidence that another Jew, a contemporary of Paul, should have suffered a similar mishap on the same route, viz. Josephus (*Life*, § 3); but the account left is so brief as to afford but little illustration of the case. Luke's narrative of the shipwreck of the apostle, on the contrary, is so full and graphic that we are enabled to trace the causes, progress, and culmination of the catastrophe in great detail; and his nice but artless discriminations show not only his truthfulness, but his careful habits of observation. His language, although of course not professional, is yet highly appreciative of the technical particulars to which he was an eye-witness. We here present a brief outline of the results of the accurate and most interesting investigations of Mr. Smith, of Jordanhill, in his work *On the Voyage and Shipwreck of St. Paul* (3d ed. Lond. 1866). A winter's residence in Malta afforded this learned writer ample opportunities for personal examination of the localities of the shipwreck. Having been a yacht sailor of more than thirty years' standing, and with much practical experience in planning, building, and altering vessels, he was able to bring a kind of knowledge to the interpretation of the passage which no commentator could possess.

Paul's company embarked in a ship of Adramyttium, a seaport of Mysia, on the eastern shore of the Ægean, opposite Lesbos. On the second day they touched at Sidon, sixty-seven geographical miles from Cæsarea. Loosing from thence, they were forced, by contrary winds, to run under the lee of Cyprus. A ship's course from Sidon to Myra is W.N.W., leaving Cyprus on the right. The contrary wind must have been from the west, which prevails in this part of the Mediterranean in the summer. Under these circumstances, they left Cyprus on the left hand, doing as the most accomplished seamen of the present day would do under similar circumstances. Favored, as they probably were, by the land-breeze and currents, they arrived, without any unusual incident, at Myra in Lycia, then a flourishing city, now a desolate waste and about three miles from the sea. The company were there transferred to a corn-ship from Alexandria bound for Italy. From the dimensions of one of these ships given by Lucian, they appear to have been quite as large as the largest class of merchant-ships of modern times. Myra lies due north from Alexandria, and its bay is well fitted to shelter a wind-bound ship. Their progress after leaving Myra was extremely slow, for it was many days before they "came over against Cnidus," at the entrance to the Ægean Sea. As the distance between Myra and Cnidus is not more than 130 geographical miles, the delay was probably caused by unfavorable winds, which may be inferred from the words "with difficulty." The course of a ship on her voyage from Cnidus to Italy is by the north side of Crete, through the archipelago, W. by S. But this would be impossible with a north-west wind. With that wind the ship would work up to Cnidus, because she had the advantage of a weather shore and a westerly current; but there the advantage would cease. The only alternative would be to wait at Cnidus for a fair wind, or else to run under the lee of Crete in the direction of Salmone, which is the eastern end of Crete. As the south side of this island is a weather shore, they would be able, with north-west winds, to work up as far as Cape Matala. Here, however, the land bends suddenly to the north, and their only resource would be to make for a harbor. Fair Havens is the harbor nearest to Cape Matala. This was probably no more than an open roadstead, or, rather, two roadsteads contiguous to each other. The site of the city Lasæa is but recently known. It was now after the autumnal equinox, and sailing was dangerous. It was a question whether they should winter here or sail to port Phœnice, on the same side of Crete, about forty miles west. Paul strongly urged the officers to remain, but his advice was overruled. Phœnice, the harbor which they expected to reach, looks (Luke says) "towards the south-west and north-west," or, as Mr. Smith translates the preposition, *in the same direction as*, i. e. the point *towards* which, the wind Libs blows; so that the harbor would open, not to the south-west, but to the north-east. It seems to have been the one now called Lutro, which looks towards the east. The south wind, which now blew, is a fair wind for a ship going from Fair Havens to Lutro. The island of Claudia is exactly opposite to Lutro, the Claudos of Ptolemy, and the Gozzo of the modern charts.

Sailing from Fair Havens close to the land, they might hope, with a south wind, to reach Phœnice in a few hours. But soon the weather changed; the ship was caught in a typhoon which blew with such violence that they could not face it, but were forced, in the first instance, to scud before it. It follows from this that the wind must have blown off the land, else they would have been stranded on the Cretan coast. This sudden change from a south wind to a violent northerly wind is a common occurrence in these seas. The Greek term *typhonie* means that the wind was accompanied by the agitation and whirling motion of the clouds caused by the meeting of the opposite currents of air. By this single word are expressed the violence and direction of

the gale. The wind Euroclydon (according to the most ancient versions, Euroaquilo = east-northeast) forced them to run under the lee of Claudia. Here they availed themselves of the smooth water to prepare the ship to resist the fury of the storm. Their first care was to secure the boat by hoisting it on board. Luke tells us that they had much difficulty in doing this, probably because it was filled with water. The next care was to undergird the ship. Only one naval officer with whom Mr. Smith had met had ever seen it put in practice. Mr. Henry Hartley, who piloted the Russian fleet in 1815 from England to the Baltic, mentions that one of the ships, the "Jupiter," was trapped round the middle by three or four turns of a stream-cable. Sir George Back, on his return from his perilous arctic voyage in 1837, was forced, on account of the shattered condition of his ship, to undergird her.

We are next told that, fearing they should be driven towards the Syrtis, they lowered the gear (not "strake sail," which would be equivalent to saying that, being apprehensive of a certain danger, they deprived themselves of the only possible means of avoiding it). A ship preparing for a storm sends down upon deck the "top hamper," or gear connected with the fair-weather sails, such as the *suppara*, or topsails. When the ship was thus borne along, she was not only undergirded and made snug, but had storm-sails set and was on the star-board tack, i. e. with her right side to the wind, which was the only course by which she could avoid falling into the Syrtis (q. v.). On the next day they threw overboard the ship's tackling. From the expression "with our own hands" Mr. Smith supposes the main-yard is meant, an immense spar, probably as long as the ship, and which might require the united efforts of passengers and men. The storm continued with unabated fury for eleven days more. "All hope was taken away:" probably not so much from the fury of the gale as from the state of the ship, their exertions to keep her from foundering being unavailing. At length, on the fourteenth night, the seamen suspected (to use the graphic sea-phrase of Luke) "the land was nearing them," probably from the noise of the breakers. No ship can enter St. Paul's Bay in Malta from the east without passing within a quarter of a mile of the point of Koura: but before reaching it the land is too low and too far from the track of a ship driven from the eastward to be seen on a dark night. When she does come within this distance, it is impossible to avoid observing the breakers, which are so violent as to form its distinctive character. On Aug. 10, 1810, the British frigate "Lively" went to pieces on these very breakers at the point of Koura. Mr. Smith here goes into calculations in order to show that a ship starting late in the evening from Claudia would, by midnight on the 14th, be less than three miles from the entrance of St. Paul's Bay. A coincidence so close as this is, to a certain extent, accidental; but it is an accident which could not have happened had there been any inaccuracy on the part of the author of the narrative with regard to the numerous incidents upon which the calculations are founded, or had the ship been wrecked anywhere but at Malta. The number of conditions required in order to make any locality agree with the narrative are so numerous as to render it impossible to suppose that the agreement in the present case can be the effect of chance. The first circumstance is that the shipmen suspected the approach of land evidently without seeing it. The quartermaster of the "Lively" states, in his evidence at the court-martial, that at the distance of a quarter of a mile the land could not be seen, but that he saw the surf on the shore. Another point is this: the shipmen when they sounded found twenty fathoms, and then fifteen fathoms. Every ship, indeed, in approaching the land must pass over twenty fathoms and fifteen fathoms; but here must not only the twenty-fathom depth be close to the spot where they had the indications of land, but it must bear east by south from

the fifteen-fathom depth, and at such a distance as would allow of preparation for anchoring with four anchors from the stern, which must have required some time. Now, about half an hour farther the depth was fifteen fathoms. Fearing lest they should fall upon rocks, they cast four anchors out of the stern. This implies that there were rocks to leeward on which they were in danger of falling; but the fifteen-fathom depth is, as nearly as possible, a quarter of a mile from the shore, which is here girt with mural precipices, and on which the sea must have been breaking violently. Their only chance of safety was to anchor; but to do this in a gale on a lee shore not only requires time, but very tenacious holding-ground. Is there such ground here? In the *English Sailing Directions* it is said (to repeat an important fact given under a previous article), "The harbor of St. Paul is open to easterly and north-east winds. It is, notwithstanding, safe for small ships, the ground generally being very good; and while the cables hold there is no danger, as the anchors will never start." But why anchor from the stern? "The anchor is cast from the prow," it being much easier to arrest a ship's way by the bow than the stern. Ships constructed like those of the ancients were, of necessity, amply provided with anchors and cables. It seems, too, from the figure of the ship in the picture of Theseus deserting Ariadne, that they could anchor by the stern, as they had hawse-holes aft (a hawser is seen towing astern; it passes through the rudder-port, and within board it is seen coiled round an upright beam or capstan in front of the break of the poop-deck). The advantages of being anchored in this manner are that by cutting away the anchors, loosing the bands of the rudders, and hoisting the artemon (the foresail, not the mainsail), all of which could be done simultaneously, the ship was immediately under command, and could be directed with precision to any part of the shore which offered a prospect of safety. But if anchored in the usual mode, she might have taken "the wrong cast" or drifted on the rocks. The number of anchors let go show that nothing was neglected.

The shipmen, after taking a meal, lightened the ship, not only by pumping, but by throwing the wheat into the sea. When day broke, they knew not the land, but it had certain peculiarities: the shore was rocky, it being, in fact, skirted with precipices. They then discovered a creek with a *sandy beach* (the Greek word, in a restricted sense, means this, in contradistinction to a

rocky coast). Into this creek they were minded to thrust the ship. They now cut their cables and left the anchors in the sea; and, loosing the lashings of the rudder and hoisting the foresail, they made for the creek. On the west side of the bay there are two creeks. One of them, Mestara Valley, has a shore. The other, though its sandy beach has been worn away by the action of the sea, was probably the scene of the wreck, for here "two seas meet." At the entrance of the bay, where the ship anchored, it could not have been suspected that at the bottom of it there was a communication with the sea outside. But such is the case. Salmone island, which separates the bay from the sea outside, is formed by a long, rocky ridge separated from the mainland by a channel of not more than a hundred yards in breadth. Near this channel they ran the ship ashore; the fore-part stuck fast, but the stern was dashed in pieces. A ship impelled by a gale into a creek such as that in St. Paul's Bay would strike a bottom of mud graduating into tenacious clay, into which the fore-part would fix itself and be held fast, while the stern would be exposed to the force of the waves. See MELITA.

The correspondence in the direction and distance is no less striking. A modern merchant-ship can sail within six points. Taking the mean between these, we cannot be so much as a point wrong if we assume that an ancient ship would, under favorable circumstances, make good her course about seven points from the wind. But there is another element which must be taken into account when we calculate the course of a ship in a storm—it is the lee-way, which in a modern ship, in a gale such as described in Acts xxvii, is about six points. Now, if we apply these elements to Luke's account of Paul's voyage, the result will be found to be very striking. The facts mentioned in the narrative are: (1.) The point of departure—Clauda. (2.) The direction of the wind—in the received text, Euroclydon, but since the discovery of the Codex Sinaiticus the reading of the Vulg., Euroquilo, east-northeast (that is, a wind between *eurus*, east, and *aquilo*), must be considered established. (3.) The ship's course—seven points from the wind, which, with six points of lee-way added, must have been thirteen points to the west of east-northeast, or west by north, which is as nearly as possible the bearing of Malta. (4.) Distance; this is inferred from the ship's rate of sailing and the time consumed.

Situation of St. Paul's Ship on the Fifteenth Morning.

In the voyage in question we know within very narrow limits the time consumed: it was "about midnight on the fourteenth night" (Acts xxvii, 27), and therefore thirteen days complete and a fraction. With regard to the rate at which a ship would drive under the circumstances described by Luke, Mr. Smith, in the work already alluded to, taking the mean from the determinations of skilful and scientific seamen, assumed that it would be about thirty-six and one twelfth miles in the twenty-four hours, and the distance ascertained from the nautical observations of admiral Smyth is four hundred and seventy-seven miles to the nearness of a mile. Now a ship laid-to, in a gale from east-north-east, according to these calculations, founded on the incidental notices of the narrative, would—about midnight, "when the fourteenth night was come" of their being driven through (διαφερομένων), not up and down, Adria—have been exactly at Malta, and within two or three miles of St. Paul's Bay. Such were the results arrived at by Mr. Smith, and given in the first edition of his treatise on the *Voyage and Shipwreck of St. Paul*. Since then Dr. Howson in his researches discovered that admiral Sir Charles Penrose had made a similar calculation, agreeing with the above to about four hours in time and six miles in distance; but, as such results can only be approximations, a nearer agreement could not have been anticipated from the most accurately kept dead-reckoning.

We here note an incidental fact with regard to Salmone, the east point of the island of Crete. In the account of Paul's voyage to Rome this promontory is mentioned in such a way (Acts xxvii, 7) as to afford a curious illustration both of the navigation of the ancients and of the minute accuracy of Luke's narrative. We gather from other circumstances of the voyage that the wind was blowing from the north-west (ἐναντίως, ver. 4; βραδυλαοῦντες, ver. 7). See MYRA. We are then told that the ship, on making Cnidus, could not, by reason of the wind, hold on her course, which was past the south point of Greece, west by south. She did, however, just fetch Cape Salmone, which bears south-west by south from Cnidus. Now we may take it for granted that she could have made good a course of less than seven points from the wind [see SHIP]; and, starting from this assumption, we are at once brought to the conclusion that the wind must have been between north-northwest and west-northwest. Thus what Paley would have called an "undesigned coincidence" is elicited by a cross-examination of the narrative. This ingenious argument is due to Mr. Smith, of Jordanhill (*Voyage and Shipwreck of St. Paul*, p. 73, 74, 2d ed.), and from him it is quoted by Conybeare and Howson (*Life and Epistles of St. Paul*, ii, 393, 2d ed.). To these books we must refer for fuller details. We may just add that the ship had had the advantages of a weather shore, smooth water, and a favoring current before reaching Cnidus, and that by running down to Cape Salmone the sailors obtained similar advantages under the lee of Crete, as far as Fair Havens, near Lasæa.

See the monographs on the various incidents connected with Paul's shipwreck, cited by Volbeding, *Index Programm.* p. 84; and Danz, *Wörterb.* s. v. "Apostelgesch." No. 114-116; also the *Journ. of Sac. Lit.* vi, "Josephus." See PAUL; SHIP.

Shire-mote, the highest of the three motes, or courts, among the Saxons, was held twice a year, and was composed of the freeholders. Hearing both civil and ecclesiastical causes, the shire-mote was presided over by an ealdorman and a bishop, who were not the absolute judges, being present chiefly to keep order and advise. Cases were decided by the majority of votes. See Hill, *English Monasticism*, p. 199.

Shirer, JOHN WESLEY, a minister of the Methodist Episcopal Church, was born in Muskingum County, O., Dec. 19, 1821, and united with the Church in 1842. He

was licensed to preach Jan. 30, 1847, and the same year was admitted into the Pittsburgh Conference. He continued in the active ministry, with the exception of two years supernumerary, until 1873, when he became superannuated and so continued until his death, at Akron, O., May 3, 1874. See *Minutes of Annual Conferences*, 1875, p. 34.

Shirley, Walter, the rector of Loughrea, Galway County, Ireland, was a cousin of the countess of Huntingdon. He was born in 1725 and died in 1786. He published, *Twelve Sermons* (Dublin; reprinted Lond. 1763 [some 1764], 12mo):—poems, *Liberty, an Ode*; *The Judgment*:—and some *Hymns* ("Lord, dismiss us with thy blessing" is believed to be his). He also revised Lady Huntingdon's *Hymn-book* (1764). See Roger, *Lyra Brit.* 1868, p. 498, 673; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Shirley, Walter Augustus, D.D., was a member of the noble house of Ferrers and the son of Rev. Walter Shirley, vicar of Woodford, Northamptonshire. He was born at Westport, Mayo County, Ireland, in 1797, and was educated at Winchester College, and New College, Oxford, of which he was a fellow. He became curate to his father, at Woodford, in 1820; vicar of Shirley, Derbyshire, in 1828; rector of Brailsford in 1839; prebendary of Lichfield and archdeacon of Derby in 1841; bishop of Sodor and Man, Jan. 10, 1847; and died April 21, 1847. Besides his *Letters to Young People* (Lond. 1850, 8vo), there is a volume of his *Sermons* (1850, 12mo), also *Letters*, etc. (1850, 8vo). Two only of his Bampton lectures had been delivered at his death. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Shi'sha (Heb. *Shisha'*, שִׁשָּׁה, an orthographical variation of *Shavsha* [q. v.]; Sept. Σειρά v. r. Σηβά), father of Elihoreph and Ahiah, Solomon's secretaries (1 Kings iv, 8); elsewhere called *Shavsha* (1 Chron. xviii, 16), etc.

Shi'shak (Heb. *Shishak'*, שִׁשָּׁק [so the margin, but the text has *Shushak'* or *Shoshak'*, שִׁשָּׁק]; Sept. Σουσακιμ; Vulg. *Sesac*), a king of Egypt contemporary with Jeroboam, to whom he gave an asylum when he fled from Solomon (1 Kings xi, 40). This was indicative of his politic disposition to encourage the weakening of the neighboring kingdom, the growth of which, under David and Solomon, was probably regarded by the kings of Egypt with some alarm. After Jeroboam had become king of Israel, and probably at his suggestion, Shishak invaded the kingdom of Judah, B.C. 971, at the head of an immense army, and, after having taken the fortified places, advanced against Jerusalem. Satisfied with the submission of Rehoboam, and with the immense spoils of the Temple, the king of Egypt withdrew without imposing any onerous conditions upon the humbled grandson of David (xiv, 25, 26; 2 Chron. xii, 2-9). The importance of this connection between the Hebrew and Egyptian annals justifies a full treatment of the subject, which we give from the latest archaeological investigations. See JUDAH, KINGDOM OF.

I. Name.—We see above an uncertainty in the Hebrew form of Shishak's name. Josephus Grecizes the name as *Susacus* (Σούσακος, Ant. vii, 5, 8; viii, 7, 8). He has generally been recognised as the *Sesonchis* (Σεσώνχης) of Manetho, and the *Sheshenk* or *Sheshonk* I of the monuments, first sovereign of the Bubastite, or twenty-second, dynasty. The accompanying cartouches present his name as written in hieroglyphics. The following is a transcription and translation of the second oval, containing more particular-

Cartouches of Shishak.

ly his royal title, which reads *Amenem Sheshenk*, i. e. "Sacred to Shishak."

A m n m s k s k

Hieroglyph of Shishak.

II. *History*.—In order to render the

following observations clear, it will be necessary to say a few words on the history of Egypt before the accession of Sheshenk I. On the decline of the Theban line or Rameses family (the twentieth dynasty), two royal houses appear to have arisen. At Thebes the high-priests of Amen, after a virtual usurpation, at last took the regal title, and in Lower Egypt a Tanitic dynasty (Manetho's twenty-first) seems to have gained royal power. But it is possible that there was but one line between the twentieth and twenty-second dynasties, and that the high-priest kings belonged to the twenty-first. The origin of the royal line of which Sheshenk I was the head is extremely obscure. Mr. Birch's discovery that several of the names of the family are Shemitic has led to the supposition that it was of Assyrian or Babylonian origin. *Shishak*, שִׁשְׁכָּן, may be compared with *Sheshak*, שֶׁשַׁק, a name of Babylon (rashly thought to be for *Babel* by "*Atbash*"); Usarken has been compared with Sargon, and Tekerut with Tiglath in Tiglath-pileser. If there were any doubt as to these identifications, some of which, as the second and third cited, are certainly conjectural, the name Namuret, Nimrod, which occurs as that of princes of this line, would afford conclusive evidence, and it is needless here to compare other names, though those occurring in the genealogies of the dynasty, given by Lepsius, well merit the attention of Shemitic students (*XXII ägypt. Königsdyn.* and *Königsbuch*). It is worthy of notice that the name Nimrod, and the designation of Zerah (perhaps a king of this line, otherwise a general in its service), as "the Cushite," seem to indicate that the family sprang from a Cushite origin. They may possibly have been connected with the *Mashuwasha*, a Shemitic nation, apparently of Libyans, for Tekerut II as prince is called "great chief of the *Mashuwasha*," and also "great chief of the *Matu*," or mercenaries; but they can scarcely have been of this people. Whether eastern or western Cushites, there does not seem to be any evidence in favor of their having been Nigritians; and as there is no trace of any connection between them and the twenty-fifth dynasty of Ethiopians, they must rather be supposed to be of the eastern branch. Their names, when not Egyptian, are traceable to Shemitic roots, which is not the case, so far as we know, with the ancient kings of Ethiopia, whose civilization is the same as that of Egypt. We find these foreign Shemitic names in the family of the high-priest king Her-har, three of whose sons are called, respectively, *Masaharata*, *Musakaharata*, and *Maten-neb*, although the names of most of his other sons and those of his line appear to be Egyptian. This is not a parallel case to the preponderance of Shemitic names in the line of the twenty-second dynasty, but it warns us against too positive a conclusion. M. de Rougé, instead of seeing in those names of the twenty-second dynasty a Shemitic or Asiatic origin, is disposed to trace the line to that of the high-priest kings. Manetho calls the twenty-second a dynasty of Bubastites, and an ancestor of the priest-king dynasty bears the name Meri-bast, "beloved of Bubastis." Both lines used Shemitic names, and both held the high-priesthood of Amen (comp. *Étude sur une Stèle Égyptienne*, p. 203, 204). This evidence does not seem to us conclusive; for policy may have induced the line of the twenty-second dynasty to effect intermarriages with the family of the priest-kings, and to assume their functions. The occurrence of Shemitic names at an earlier time may indicate nothing more than Shemitic alliances, but those alliances might not improbably end in usurpation. Lepsius gives a genealogy of Sheshenk I from the tablet of

Har-p-sen from the Serapeum, which, if correct, decides the question (*XXII ägypt. Königsdyn.* p. 267-269). In this, Sheshenk I is the son of a chief Namuret, whose ancestors, excepting his mother, who is called "royal mother," not, as Lepsius gives it, "royal daughter" (*Étude*, etc., p. 203, note 2), are all untitled persons, and all but the princess bear foreign, apparently Shemitic, names. But, as M. de Rougé observes, this genealogy cannot be conclusively made out from the tablet, though we think it more probable than he does (*ibid.* p. 203, and note 2).

Sheshenk I, on his accession, must have found the state weakened by internal strife and deprived of much of its foreign influence. In the time of the later kings of the Rameses family, two, if not three, sovereigns had a real or titular authority; but before the accession of Sheshenk it is probable that their lines had been united; certainly towards the close of the twenty-first dynasty a Pharaoh was powerful enough to lead an expedition into Palestine and capture Gezer (1 Kings ix, 16). Sheshenk took as the title of his standard "He who attains royalty by uniting the two regions [of Egypt]" (De Rougé, *Étude*, etc., p. 204; Lepsius, *Königsbuch*, xliv, 567 A, a). He himself probably married the heiress of the Rameses family, while his son and successor, Usarken, appears to have taken to wife the daughter, and perhaps heiress, of the Tanitic twenty-first dynasty. Probably it was not until late in his reign that he was able to carry on the foreign wars of the earlier king who captured Gezer. It is observable that we trace a change of dynasty in the policy that induced Sheshenk, at the beginning of his reign, to receive the fugitive Jeroboam (1 Kings xi, 40). Although it was probably a constant practice for the kings of Egypt to show hospitality to fugitives of importance, Jeroboam would scarcely have been included in their class. Probably, it is expressly related that he fled to Shishak because he was well received as an enemy of Solomon. We do not venture to lay any stress upon the Sept. additional portion of 1 Kings xii, as the narrative there given seems irreconcilable with that of the previous chapter, which agrees with the Masoretic text. In the latter chapter Hadad (Sept. Ader) the Edomite flees from the slaughter of his people by Joab and David, to Egypt, and marries the elder sister of Tahpenes (Sept. Thekemina), Pharaoh's queen, returning to Idumæa after the death of David and Joab. In the additional portion of the former chapter, Jeroboam—already said to have fled to Shishak (Sept. Susakim)—is married, after Solomon's death, to Anô, elder sister of Thekemina the queen. Between Hadad's return and Solomon's death, probably more than thirty years elapsed, certainly twenty. Besides, how are we to account for the two elder sisters? Moreover, Shishak's queen, his only or principal wife, is called Karaäma, which is remote from Tahpenes or Thekemina. See TAHPENES.

The king of Egypt does not seem to have commenced hostilities during the powerful reign of Solomon. It was not until the division of the tribes that, probably at the instigation of Jeroboam, he attacked Rehoboam. The following particulars of this war are related in the Bible: "In the fifth year of king Rehoboam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the Lord, with twelve hundred chariots and threescore thousand horsemen; and the people [were] without number that came with him out of Egypt, the Lubim, the Sukkimi, and the Cushim. And he took the fenced cities which [pertained] to Judah, and came to Jerusalem" (2 Chron. xii, 2-4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam, and apparently made him tributary (ver. 5, 9-12, especially 8). The narrative in Kings mentions only the invasion and the exaction (1 Kings xiv, 25, 26). The strong cities of Rehoboam are thus enumerated in an earlier passage—"And Rehoboam dwelt in Jerusalem, and built cities for defence in Judah. He built even Beth-Jehem, and Etam, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath,

Profile of Shishak. (From the outer wall of the Great Temple at Karnak.)

and Mareshah, and Ziph, and Adoraim, and Lachish, and Azekah, and Zorah, and Ajjalon, and Hebron, which [are] in Judah and in Benjamin fenced cities" (2 Chron. xi, 5-10).

Shishak has left a record of this expedition sculptured on the wall of the Great Temple of Karnak. It is a list of the countries, cities, and tribes conquered or ruled by him, or tributary to him. In this list Champollion recognised a name which he translated "the kingdom of Judah," and was thus led to trace the names of certain cities of Palestine. It is well to observe that this figure has not, as some have hastily conceived, been alleged to represent the king, but to personify the kingdom of Judah (Champollion, *Système Hieroglyph.* p. 205; Rosellini, *Monumenti Storici*, i, 85; Wilkinson, *Anc. Egypt.* i, 37; Cory, *Chronological Inquiry*, p. 5). See REHOBOM. The list of Shishak in the original hieroglyphics is published by Rosellini, *Monumenti Reali*, No. cxlviii; Lepsius, *Denkmäler*, Abth. iii, Bl. 252; and Brugsch, *Geogr. Inschr.* ii, Taf. xxiv; commented upon by the latter (*ibid.* p. 56 sq.) and Dr. Blau (*Zeitschr. d. deutsch. morgenländ. Gesellsch.* xv, 233 sq.). There are several similar geographical lists, dating for the most part during the period of the empire, but they differ from this in presenting few, if any, repetitions, and only one of them contains names certainly the same as some in the present. They are lists of countries, cities, and tribes forming the Egyptian empire, and so far records of conquest that any cities previously taken by the Pharaoh to whose reign they belong are mentioned. The list, which contains some of the names in Sheshenk's, is of Thothmes III, sixth sovereign of the eighteenth dynasty, and comprises many names of cities of Palestine, mainly in

the outskirts of the Israelitish territory. It is important, in reference to this list, to state that Thothmes III, in his twenty-third year, had fought a battle with confederate nations near Megiddo, whose territories the list enumerates. The narrative of the expedition fully establishes the identity of this and other towns in the list of Shishak. It is given in the document known as the "Statistical Tablet of El-Karnak" (Birch, "Annals of Thothmes III," *Archæologia* [1853]; De Rouge, *Rec. Arch.* N. S. xi, 347 sq.; Brugsch, *Geogr. Inschr.* ii, 32 sq.). The only general result of the comparison of the two lists is that in the later one the Egyptian article is in two cases prefixed to foreign names, Nekbu of the list of Thothmes III being the same as Penakbu of the list of Shishak, and Aïmeku of the former being the same as Peäakma of the latter. It will be perceived that the list contains three classes of names mainly grouped together—(1) Levitical and Canaanitish cities of Israel; (2) cities of Judah; and (3) Arab tribes to the south of Palestine. The occurrence together of Levitical cities was observed by Dr. Brugsch. It is evident that Jeroboam was not at once firmly established, and that the Levites especially held to Rehoboam. Therefore it may have been the policy of Jeroboam to employ Shishak to capture their cities. Other cities in his territory were perhaps still garrisoned by Rehoboam's forces, or held by the Canaanites, who may have somewhat recovered their independence at this period. The small number of cities identified in the actual territory of Rehoboam is explained by the erasure of fourteen names of the part of the list where they occur. The identification of some names of Arab tribes is of great interest and historical value, though it is to be feared that further progress can scarcely be made in their part of the list.

The Pharaohs of the empire passed through northern Palestine to push their conquests to the Euphrates and Mesopotamia. Shishak, probably unable to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would interpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gerar, if we may infer this from their sharing his overthrow.

III. *Chronology.*—The reign of Shishak offers the first determined synchronisms of Egyptian and Hebrew history. Its chronology must therefore be examined. We first give a table with the Egyptian and Hebrew data for the chronology of the dynasty, continued as far as the time of Zerah, who was probably a successor of Shishak, in order to avoid repetition in treating of the latter. See ZERAH.

Respecting the Egyptian columns of this table, it is only necessary to observe that, as a date of the twenty-

third year of Usarken II occurs on the monuments, it is reasonable to suppose that the sum of the third, fourth, and fifth reigns should be twenty-nine years instead of twenty-five, KΘ being easily changed to KE (Lepsius, *Königsbuch*, p. 85). We follow Lepsius's arrangement, our Tekerut I, for instance, being the same as his.

The synchronism of Shishak and Solomon and that of Shishak and Rehoboam may be nearly fixed, as shown in the article CHRONOLOGY. Lepsius, however, states that it is of the twenty-first year, correcting Champollion, who had been followed by Bunsen and others (*XXII ägypt. Königsdyn.* p. 272, note 1). It must therefore be supposed that the invasion of Judah took place in the twentieth, and not in the twenty-first, year of Shishak. The first year of Shishak would thus about correspond to the twenty-sixth of Solomon, and the twentieth to the fifth of Rehoboam.

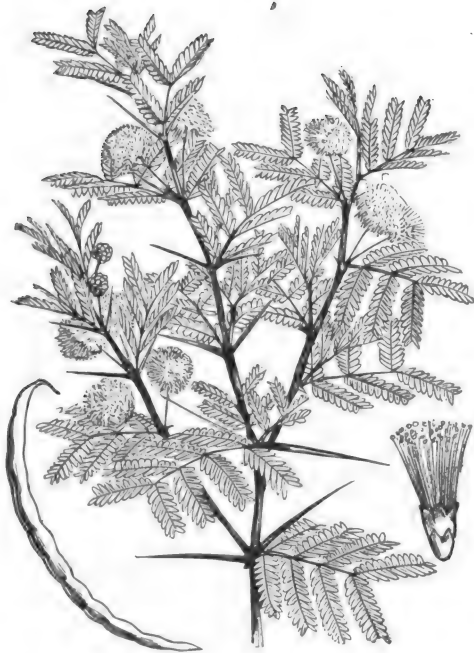

The synchronism of Zerah and Asa is more difficult to determine. It seems, from the narrative in Chronicles, that the battle between Asa and Zerah took place early in the reign of the king of Judah. It is mentioned before an event of the fifteenth year of his reign, and afterwards we read that "there was no [more] war unto the five and thirtieth year of the reign of Asa" (2 Chron. xv, 19). This is immediately followed by the account of Baasha's coming up against Judah "in the six and thirtieth year of the reign of Asa" (xvi, 1). The latter two dates may perhaps be reckoned from the division of the kingdom, unless we can read the fifteenth and sixteenth, for Baasha began to reign in the third year of Asa, and died after a reign of twenty-four years, and was succeeded by Elah, in the twenty-sixth year of Asa. It seems, therefore, most probable that the war with Zerah took place early in Asa's reign, before his fifteenth year, and thus also early in the reign of Usarken II. The probable identification of Zerah is considered under that name. See EGYPT.

Shit'rai (Heb. *Shiray*, שִׁירַי [marg. *Shirtay*'], שִׁירַי, *my decisions, or decisive*; Sept. Σαρται v. r. *Asap-riac*), a Sharonite who had charge of David's herds feeding in Sharon (1 Chron. xxvii, 29). · B.C. 1043.

Shittah (שִׁטָּה, *Shittah*, for שִׁטָּה, *shintah*, properly *the thorny*, if Heb. [see below]; i. q. the Arabic *Sunt*; only once in the sing. Isa. xli, 19; Sept. πύλος, Vulg. *pinna*; A. V. "Shittah-tree") or SHITIM (שִׁטִּים, *Shitim*, plur. of the same, used with צֵד, *êts, tree or wood*; Sept. δασυπρος, Vulg. *setim*), a tree, generally regarded as the *acacia*, the wood of which was extensively employed in the construction of the tabernacle, the boards and pillars being made of it; the ark of the covenant and the staves for carrying it, the table of show-bread with its staves, the altar of burnt-offerings and the altar of incense with their respective staves, were also constructed out of this wood (see Exod. ch. xxv, xxvi, xxxvi, xxxvii, xxxviii). In Isa. xli, 19 the same tree is mentioned with the "cedar, the myrtle, and the oil-tree," as one which God would plant in the wilderness. The Heb. term (שִׁטָּה) is, by Jablonski, Celsius, and many other authors, derived from the Egyptian word, the 3 being dropped; and, from an Arabic MS. cited by Celsius, it appears that the Arabic term also comes from the Egyptian, the true Arabic name for the *acacia* being *karadā* (*Hierob.* i, 508). The Egyptian name of the *acacia* is *sant, santh, or santh*. See Jablonski (*Opusc.* i, 261), Rossius (*Etymol. Egypt.* p. 273), and Prosper Alpinus (*Plant. Egypt.* p. 6), who thus speaks of this tree: "The *acacia*, which the Egyptians call *sant*, grows in localities in Egypt remote from the sea, and large quantities of this tree are produced on the mountains of Sinai, overhanging the Red Sea. That this tree is, without doubt, the true *acacia* of the ancients, or the Egyptian thorn, is clear from several indications, especially from the fact that no other spinous tree occurs in Egypt which so well answers to the required characters. These trees grow to the size of a mulberry-tree, and spread

their branches aloft." "The *acacia-tree*," says Dr. Shaw, "being by much the largest and most common tree in these deserts (Arabia Petrea), we have some reason to conjecture that the *shittim* wood was the wood of the *acacia*, especially as its flowers are of an excellent smell, for the *shittah* tree is, in Isa. xli, 19, joined with the myrtle and other fragrant shrubs." Bruce, as quoted by Dr. Harris, remarks that "the *acacia* seems the only indigenous tree in the Thebaid. The male is called the *Saïel*; from it proceeds the gum-arabic on incision with an axe. This gum chiefly comes from Arabia Petrea, where these trees are most numerous." Kitto says the required species is found in either the *Acacia gummifera* or in the *A. Seyal*, or rather in both. They both grow abundantly in the valleys of that region in which the Israelites wandered for forty years, and both supply products which must have rendered them of much value to the Israelites. We think the probability is that the *A. Seyal* supplied the *shittim* wood, if, indeed, the name did not denote *acacia* wood in general. This tree grows from fifteen to twenty feet in height. So M. Bové, "Le lendemain, en traversant le Voudé (Wady) Schen, je vis un grand nombre d'*Acacia Seyal*; cet arbre s'élève à la hauteur de vingt à vingt-cinq pieds. Les Arabes font avec son bois du charbon qu'ils vont vendre à Suez." The *A. Seyal* is very common in some parts of the peninsula of Sinai (M. Bové, *Voyage du Caire au Mont Sinai*, *Ann. des Scienc. Nat.* 1834, sec. ser. i, 166; Stanley, *Sin. and Pal.* p. 20, 69, 298). These trees are more common in Arabia than in Palestine, though there is a valley on the west side of the Dead Sea, the *Wady Seyal*, which derives its name from a few *acacia*-trees there. The *A. Seyal*, like the *A. Arabica*, yields the well-known substance called gum-arabic, which is obtained by incisions in the bark, but it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley thinks it is to be traced the use of the plural form of the Heb. noun *Shittim*. "The wild *acacia* (*Mimosa Nilotica*), under the name of *Sünt*," the same writer says (*ibid.* p. 20), "everywhere represents the 'seneh' or 'senna' of the burning bush." But neither of these conjectures appears to be well founded. Besides the above, there is another species, the *A. tortilis*, common on Mount Sinai. Although none of the above-named trees are sufficiently large to yield planks ten cubits long by one and a half cubits wide, which we are told was the size of the boards that formed the tabernacle (Exod. xxxvi, 21), yet there is an *acacia* that grows near Cairo, viz. the *A. serissa*, which would supply boards of the required size. There is, however, no evidence to show that this tree ever grew in the peninsula of Sinai. And though it would be unfair to draw any conclusion from such negative evidence, still it is probable that "the boards" (בָּרֵי שִׁטִּים) were supplied by one of the other *acacias*. There is, however, no necessity to limit the meaning of the Heb. קֶרֶשׁ (*kéresh*) to "a single plank." In Ezek. xxvii, 6 the same word, in the singular number, is applied in a collective sense to "the deck" of a ship (comp. our "on board"). The *kéresh* of the tabernacle, therefore, may denote "two or more boards joined together," which, from being thus united, may have been expressed by a singular noun. These *acacias*, which are for the most part tropical plants, must not be confounded with the tree (*Robinia pseudo-acacia*) popularly known by this name in England, which is a North American plant, and belongs to a different genus and suborder. The true *acacias*, most of which possess hard and durable wood (comp. Pliny, *H. N.* iii, 19; Josephus, *Ant.* iii, 6, 1), belong to the order *Leguminosæ*, suborder *Mimoseæ*. Livingstone (*Trav. in S. Africa*, abridged ed., p. 77) thinks the *A. giraffa* (camel-thorn) supplied the wood for the tabernacle, etc. "It is," he adds, "an imperishable wood, while that which is usually supposed to be the *shittim* (*A. Nilotica*) wants beauty and soon decays."—Kitto;

Smith. But there is no evidence that this tree grows in Arabia. The *A. Seyal* is the only timber tree of any size in the Arabian desert. It is a gnarled and very thorny tree, somewhat like the solitary hawthorn in its habit of growth, but much larger. It flourishes in the driest situations, and is scattered over the whole of the Sinaitic peninsula. It is also abundant in the many ravines which open on the Dead Sea at Engedi, and all along its western shores. Several places on the eastern shore also derive their names from its presence. See SHITTIM. The wood is very hard and close-grained, very much resembling that of the yellow locust, of a fine orange-brown color, with a darker heart, and admirably adapted for cabinet-work. Its leaves are small and pinnate, and in spring it is covered with its round tufts of yellow blossoms, which grow in clusters round the branches, like little balls of fibre. The bark is yellow and smooth, like that of the ailantus. It is powerfully astringent, and is used by the Bedawin for tanning yellow leather. The branches are often cut by the natives for making charcoal, but the camels browse on them when young and tender. The bark exudes a gum, the *gum-arabic* of commerce, not only by incisions, but spontaneously, which the Arabs collect for sale and occasionally employ for food. They also say that it allays thirst. See Tristram, *Nat. Hist. of the Bible*, p. 390 sq. See THORN.

Acacia of the Desert (*Acacia Seyal*), with Flower and Fruit.

Shittah (שִׁטָּה; plur. שִׁטִּין) means in Chaldee a *line* or *series*. Thus, the passage in Isa. xxx, 8, על ספר חקק, "Noted in a book," is rendered by the Targum רשום, "Register it on the lines of the book." The passage in the Song of Songs, v, 13, "His cheeks are like beds of balsam," is rendered כְּרִיבֵן בַּסְמָא, i. e. "were written (viz. the two tables of stone which he gave to his people) in ten rows, resembling the rows or beds in the garden of balsam." The Masorites denote with *Shittah* a series or catalogue of words—a register of things of the same import, as a number of verses, pairs, words, which are alike either in vowel-points or letters. Thus, they noted down a list of pairs of words which

occur once, but the first of which commences with a *Lamed*, viz. לִאחֻז עֹלָם (Gen. xvii, 8), לִאחֻז עֹלָם (Exod. xvi, 16); or they give us a list of thirty-eight words which respectively have in one instance only the accent on the penultima, as רִבְוָה (Gen. xviii, 20), יִצְחָק (xvi, 6), וְסֹפֶר (Lev. xv, 13), etc.; or they give a list of words which, on the contrary, occur only once with the accent on the ultima, as הִבְוָה (Gen. xxix, 21), מִתָּה (xxx, 1), יָרָא (xli, 33), etc. See Buxtorf, *Tiberias, seu Commentarius Massoreticus*, p. 273; Levita, *Massoreth ha-Massoreth* (ed. Ginsburg), p. 205, 210; Frensdorff, *Massora Magna*, p. 381 sq.; id. *Ochla-ve-Ochla*, § 20, p. 36; § 372, p. 61, 171; § 373, p. 61, 172. (B. P.)

Shit'tim (Heb. with the art. *hash-Shittim*, הַשִּׁטִּים, the acacias; Sept. *Sarriiv*; in the Prophets, *ra' sxiiva*; Vulg. *Settim*, *Abel-sutim*), a designation rather than proper name of at least two localities in Palestine. See SHITTAH.

1. The place of Israel's encampment between the conquest of the Transjordanic highlands and the passage of the Jordan (Numb. xxxiii, 49; xxv, 1; Josh. ii, 1; iii, 1; Mic. vi, 5). Its full name appears to be given in the first of these passages—*Abel* (אֶבֶל) *hash-Shittim*—"the meadow or moist place of the acacias." See ABEL-SHITTIM. It was "in the Arboth-Moab, by Jordan-Jericho," such is the ancient formula repeated over and over again (Numb. xxii, 1; xxvi, 3; xxxi, 12; xxxiii, 48, 49); that is to say, it was in the Arabah or Jordan valley, opposite Jericho, at that part of the Arabah which belonged to and bore the name of Moab, where the streams which descend from the eastern mountains and force their winding way through the sandy soil of the plain nourished a vast growth of the *Seyal*, *Sunt*, and *Sidr* trees, such as is nourished by the streams of the Wady Kelt and the Ain Sultan on the opposite side of the river. See MOAB. It was in the shade and the tropical heat of these acacia-groves that the people were seduced to the licentious rites of Baal-peor by the Midianites; but it was from the same spot that Moses sent forth the army, under the fierce Phinehas, which worked so fearful a retribution for that license (xxx, 1-12). It was from the camp at Shittim that Joshua sent out the spies across the river to Jericho (Josh. ii, 1). Tristram thinks that "the situation of *Keferin* [of which he gives a view] at the northern margin of the oasis (the Ghôr es-Seisam), and its marshy verdure, unmistakably identify it with *Abel-shittim*" (*Land of Israel*, p. 525).

2. A "valley" (נָחַל, *náchal*, winter-torrent) of Shittim, or *Wady Sunt*, as it would now be called, of Joel (iii, 18), can hardly be the same spot as that described above, as it must certainly have been west of the Jordan, and probably in the neighborhood of Jerusalem, although the particular vale cannot now be distinguished. The name is probably to be regarded as an appellative—"acacia vale" denoting, perhaps, as that tree delights in a dry soil, an arid, unfruitful vale.

Shiva. See SIVA.

Shiva-Narayanais. See SIVA-NARAYANAIS.

Shivararti, in Hindû mythology, is a festival celebrated in the month of March in honor of *Siva*, in which the grossest indecencies, accompanied with lascivious songs, are publicly perpetrated without shocking or offending observers, since everything of the kind is regarded as highly pleasing to the god. The *Linga* (q. v.), *Siva's* most eminent symbol, is preferably dedicated and sold at this festival.

Shi'za (Heb. *Shiza*, שִׁיזָא, perhaps *splendor*; Sept. *Σίζα*, v. r. *Σεζά*, *E'záz*, etc.), a Reubenite, father of Adina (q. v.), one of David's warriors (1 Chron. xi, 42). B. C. ante 1043.

Sho'á (Heb. id. שׁוֹעָא, a cry for help, or *rich*, or *lib*—

eral; Sept. Σοὺ v. r. Σοῦδ; Vulg. *tyranni*), a proper name which occurs only in Ezek. xxiii, 23, in connection with Pekod and Koa. The three apparently denote districts of Assyria with which the southern kingdom of Judah had been intimately connected, and which were to be arrayed against it for punishment. The Peshito-Syriac has *Lúd*, that is, Lydia; while the Arabic of the London Polyglot has *Sút*, and *Lúd* occupies the place of Koa. Rashi remarks on the three words, "The interpreters say that they signify officers, princes, and rulers." This rendering must have been traditional at the time of Aquila (ἐπισκίπτης καὶ τύραννος καὶ κορυφαῖος) and Jerome (*nobiles, tyranni, et principes*). Gesenius (*Thesaur.* p. 1208 a.) maintains that the context requires the words to be taken as appellatives, and not as proper names; and Fürst, on the same ground, maintains the contrary (*Handb.* s. v. קרישׁ). Those who take Shoa as an appellative refer to the use of the word in Job xxxiv, 19 (A. V. "rich") and Isa. xxxii, 5 (A. V. "bountiful"), where it signifies rich, liberal, and stands in the latter passage in parallelism with קריב, *nadib*, by which Kimchi explains it, and which is elsewhere rendered in the A. V. "prince" (Prov. xvii, 7) and "noble" (viii, 16). But a consideration of the latter part of the verse (Ezek. xxiii, 23), where the captains and rulers of the Assyrians are distinctly mentioned, and the fondness which Ezekiel elsewhere shows for playing upon the sound of proper names (as in xxvii, 10; xxx, 5), lead to the conclusion that in this case Pekod, Shoa, and Koa are proper names also; but nothing further can be said. The only name which has been found at all resembling Shoa is that of a town in Assyria mentioned by Pliny, "*Sue* in rupibus," near Gangamela, and west of the Orontes mountain chain. Bochart (*Phaleg*, iv, 9) derives Sue from the Chaldee שׁוּעָא, *shu'a*, a rock. See KOA.

Shoaff, DAVID, a minister of the Methodist Episcopal Church, South, was born in Juniata County, Pa., July 17, 1823, and was converted Aug. 23, 1844. In March, 1848, he was admitted on trial into the Baltimore Conference. At the division of the Baltimore Conference in 1857, he became a member of the East Baltimore Conference. In 1866 he severed his connection with the Methodist Episcopal Church, and united with the Methodist Episcopal Church, South, in which he continued to labor until his death, May 26, 1871. See *Minutes of Annual Conferences of the M. E. Ch., South*, 1872, p. 648.

Sho'bab (Heb. *Shobab'*, שׁוֹבָב, *rebellious*, as in Jer. iii, 14, 21; Isa. lviii, 17; Sept. Σωβάβ v. r. Σουβάβ, etc.), the name of two Hebrews.

1. Apparently the second named of the three sons of Caleb the son of Hezron by his first wife Azubah (1 Chron. ii, 18). B.C. post 1874.

2. Second named of the sons of David born in Jerusalem (2 Sam. v, 14; 2 Chron. iii, 5; xiv, 4). B.C. post 1044.

Sho'bach (Heb. *Shobak'*, שׁוֹבָךְ, *expansion*; Sept. Σωβάχ v. r. Σαβάχ; Vulg. *Sobach*), the general of Hadarezer king of the Syrians of Zoba, who was in command of the army summoned from beyond the Euphrates against the Hebrews after the defeat of the combined forces of Syria and the Ammonites before the gates of Rabbah. He was met by David in person, who crossed the Jordan and attacked him at Helam. The battle resulted in the total defeat of the Syrians. Sho'bach was wounded, and died on the field (2 Sam. x, 15-18). B.C. 1034. In the parallel passage (1 Chron. xix, 16, 18) he is called *Shophach*, and by Josephus *Sabecus* (Σάβεκος, *Ant.* vii, 6, 3).

Sho'bai [some *Shoba'i*] (Heb. *Shobay'*, שׁוֹבַי, [but always in pause, as שׁוֹבַי], *taking captive* [Gesen.], or *glorious* [Fürst]; Sept. Σωβαί v. r. Σαβί, etc.), one of the heads of the Levitical family of doorkeepers of the

Temple, whose posterity returned from Babylon with Zerubbabel (Ezra ii, 42; Neh. vii, 45). B.C. long ante 536.

Sho'bal (Heb. *Shobal'*, שׁוֹבָל, *flowing*, or a *shoot* [Gesen.], or *wandering* [Fürst]; Sept. Σωβάλ or Σουβάλ v. r. Σωβάβ), the name of two Hebrews.

1. Second named of the seven sons of Seir the Horite (Gen. xxxvi, 20; 1 Chron. i, 38). He was the father of five sons (Gen. xxxvi, 23; 1 Chron. i, 40), and one of the aboriginal "dukes" or sheiks of Edom (Gen. xxxvi, 29). B.C. post 1963.

2. First named of the five sons of Hur the son of Caleb of the tribe of Judah. He became the founder ("father") of Kirjath-jearim (1 Chron. ii, 50). B.C. cir. 1612. He is evidently the same mentioned as father of Reaiah (q. v.) among the descendants ("sons") of Judah in 1 Chron. iv, 1, 2.

Sho'bek (Heb. *Shobek'*, שׁוֹבֵךְ, *forsaking* [Gesen.], or *free* [Fürst]; Sept. Σωβήκ v. r. Ὠβήκ, etc.), one of the chief Israelites who signed Nehemiah's covenant (Neh. x, 24). B.C. 446.

Shober, GOTTLIEB, a Lutheran clergyman, was born in Bethlehem, Pa., Nov. 1, 1756. Under the influence of a careful Christian education, he early became impressed with the importance of religion, and desired to gain satisfactory evidence that he had been born from above. He united with the Moravian Church in his seventeenth year, and entered heartily into everything tending to its prosperity. After reaching fifty years of age he determined to devote the remainder of his life to the ministry, and entered that of the Lutheran Church. In the fall of 1810 he was set apart to the work of the ministry, and immediately became pastor of the church in Salem. Here he continued laboring with zeal and fidelity until a few years before his death, which occurred June 27, 1838. Mr. Shober was one of the founders of the General Synod of the Lutheran Church, was its president in 1825, and a member of the committees to prepare a hymn-book and catechism. He took a deep interest in the education of young men for the ministry, and in 1825 was appointed one of the first directors which adopted the incipient measures for the formation of the Seminary at Gettysburg, Pa. He left it three thousand acres of land. Mr. Shober prepared two volumes for the press—a translation from Stilling, entitled *Scenes in the World of Spirits* (Baltimore, 1818, 12mo):—*A Comprehensive Account of the Rise and Progress of the Christian Church*, by Dr. Martin Luther. See Sprague, *Annals of the Amer. Pulpit*, ix, 141.

Sho'bi (Heb. *Shobi'*, שׁוֹבִי, probably another form for *Shobai* [q. v.]; Sept. Οἰεβί; Vulg. *Sebi*), a son of Nahash of Rabbah of the children of Ammon (2 Sam. xvii, 27), and one of the first to meet David at Mahanaim on his flight from Absalom, and to offer him the hospitality of a powerful and wealthy chief, for he was the son of David's old friend Nahash; and the bond between them was strong enough to survive, on the one hand, the insults of Hanun (who was probably his brother), and, on the other, the conquest and destruction of Rabbah. B.C. 1023. Josephus calls him *Siphar* (Σιφάρ), "chief (δυνάστης) of the Ammonitish country" (*Ant.* vii, 9, 8).—Smith.

Sho'cho (2 Chron. xxviii, 18), or **Sho'co** (xi, 7). See SOCHO.

Sho'choh (1 Sam. xvii, 1). See SOCHOH.

Shock of CORN (גִּדְיִשׁ, *gadish*, a *heap*; hence sometimes "a tomb," as in Job xxi, 32), a "stack" (Exod. xxii, 6 [Heb. 5]) of grain reaped (Judg. xv, 5; Job v, 26). See AGRICULTURE.

Shockley, JAMES A, a Methodist Episcopal minister, was born in South Carolina in 1809. He was converted at twelve years of age, obtained license to preach in 1840, was received on trial in the Mississippi Conference in 1841, and appointed to the Paulding Circuit; in 1842, to the Decatur Circuit; in 1843, to the Whitesand

Circuit, where he died, Sept. 12, 1844. He was a faithful preacher and pastor, and his death was a signal triumph. See *Minutes of Annual Conferences*, iii, 589.

Shodeleth, in Hindû mythology, is a place in the vicinity of every city where the dead are burned. It always contains a stone representing king Arishtandra, who was at one time overseer of such a place, and in that position denied to his own son the honor of being burned because the boy's mother was unable to pay the small sum exacted in return for that privilege. This pious action so moved the gods that they restored the king to his former honors, from which he had been degraded in order that his disposition might be put to the proof.

Shoe (נָעַל, *nâal*, so called from *fusening* on the foot, everywhere so rendered, except once [Isa. xi, 15], "dryshod;" but in Deut. xxxiii, 25 נָעַל, *mînal*, which probably means a *bolt*, as elsewhere ["lock," Neh. iii, 3, 6, 13, 14, 15; Cant. v, 5]; ὑπόδημα), properly a *sandal*. It does not seem probable that the foot-coverings of the Hebrews differed much from those used in Egypt, excepting, perhaps, that from the greater roughness of their country they were usually of more substantial make and materials. The Egyptian sandals varied slightly in form: those worn by the upper classes, and by women, were usually pointed and turned up at the end like our skates and many of the Eastern slippers at the present day. They were made of a sort of woven or interlaced work of palm-leaves and papyrus-stalks or other similar materials, and sometimes of leather; and were frequently lined with cloth on which the figure of a captive was painted, that humiliating position being considered suited to the enemies of their country, whom they hated and despised. It is not likely that the Jews adopted this practice; but the idea which it expressed, of treading their enemies under their feet, was familiar to them (Josh. x, 24). Those of the middle classes who were in the habit of wearing sandals often preferred walking barefooted. Shoes, or low boots, are sometimes found at Thebes; but these are believed by Sir J. G. Wilkinson to have been of late date and to have belonged to Greeks, since no persons are represented in the paintings as wearing them except foreigners. They were of leather, generally of a green color, laced in front

Ancient Assyrian Shoe.

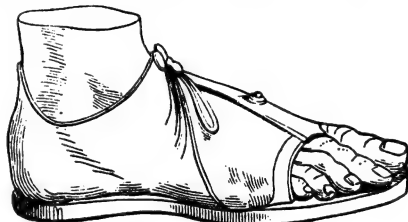

by thongs, which passed through small loops on either side, and were principally used, as in Greece and Etruria, by women (Wilkinson, iii, 374-367). The Assyrian monuments represent shoes of a similar character, but worn by natives, especially princes.

The use of shoes was by no means universal among the Greeks and Romans. The Homeric heroes are represented without shoes when armed for battle. Socrates, Phocion, and Cato frequently went barefoot. The Roman slaves had no shoes. The covering of the feet was removed before reclining at meals. People in grief (as, for instance, at funerals) frequently went barefooted. The Roman shoes may be divided into those in which the mere sole of a shoe was attached to the sole of the foot by ties or bands, or by a covering for the toes or the instep (*solea*, *crepida*, *soccus*), and those which ascended higher and higher, according as they covered the ankles, the calf, or the whole of the leg. To *calceamenta* of the latter kind, i. e. to shoes and boots as distinguished from sandals and slippers, the term *calceus* was applied in its proper and restricted sense. There were also other varieties of the *calceus*, according to its adaptation to particular professions or modes of life. Thus the *caliga* was principally worn by soldiers, the *pero* by laborers and rustics, and the *cothurnus* by tragedians, hunters, and horsemen. The *calcei* probably

Roman Shoes for Women.

did not much differ from our shoes, and are exemplified in a painting at Herculaneum, which represents a female wearing bracelets, a wreath of ivy, and a panther's skin, while she is in the attitude of dancing and playing on the cymbals. On the other hand, a marble foot in the British Museum exhibits the form of a man's shoe.

Roman Shoe for a Man.

Both the sole and the upper leather are thick and strong. The toes are uncovered, and a thong passes between the great and the second toe as a sandal. The form and color of the calceus indicated rank and office. Roman senators wore high shoes, like buskins, fastened in front with four black thongs, and adorned with a small crescent. Among the *calcei* worn by senators, those called *mullei*, from their resemblance to the scales of the red mullet, were particularly admired, as well as others called *alutæ*, because the leather was softened by the use of alum. See Smith, *Dict. of Greek and Roman Antiq.* s. vv.

Roman Half-boot.

Certain scriptural usages connected with shoes deserve especial notice. In transferring a possession or domain it was customary to deliver a sandal (Ruth iv, 7), as in our Middle Ages a glove. Hence the action of throwing down a shoe upon a region or territory was a symbol of occupancy. So Psa. lx, 10, "Upon the land of Edom do I cast my sandal," i. e. I possess, occupy it, claim it as my own. In Ruth, as above, the delivering of a sandal signified that the next of kin transferred to another a sacred obligation, and he was hence called "sandal-loosed." A sandal thong (Gen. xiv, 23), or even sandals themselves (Amos ii, 6; viii, 6), are put for any-

thing worthless or of little value; which is perfectly intelligible to those who have witnessed the extemporaneous manner in which a man will shape two pieces of hide and fasten them with thongs to the soles of his feet, thus fabricating in a few minutes a pair of sandals which would be dear at a penny. It was undoubtedly the custom to take off the sandals on holy ground, in the act of worship, and in the presence of a superior. Hence the command to take the sandals from the feet under such circumstances (Exod. iii, 5; Josh. v, 15). This is still the well-known custom of the East—an Oriental taking off his shoe in cases in which a European would remove his hat (see Hackett, *Illustrations of Script*, p. 66). The shoes of the modern Orientals are, however, made to slip off easily, which was not the case with sandals, that required to be unbound with some trouble. This operation was usually performed by servants; and hence the act of unloosing the sandals of another became a familiar symbol of servitude (Mark i, 7; Luke iii, 16; John i, 27; Acts xiii, 25). So, also, when a man's sandals had been removed, they were usually left in charge of a servant. In some of the Egyptian paintings servants are represented with their master's sandals on their arm: it thus became another conventional mark of a servile condition to bear the sandals of another (Matt. iii, 11). The terms ordinarily applied to the removal of the shoe (נָשַׁל, Deut. xxv, 10; Isa. xx, 2; and נָשַׁל, Ruth iv, 7) imply that the thongs were either so numerous or so broad as almost to cover the top of the foot. It is worthy of observation, however, that the term used for "putting off" the shoes on sacred occasions is peculiar (נָשַׁל), and conveys the notion of violence and haste. See Bynæus, *De Calceis Hebræorum* (Dord. 1715); Kitto, *Pict. Bible*, note at Ruth iv, 8. See SANDAL.

Shoe-latchet. See LATCHET; SHOE.

Shoes, PUTTING-OFF OF. In the ancient Christian Church a few (for it was not a general custom) took off their shoes as they entered the church. Cassian (*Institut.* i, 10) observes of the Egyptian monks that they always wore sandals instead of shoes, and took these off when they went to celebrate or receive the holy mysteries, thinking themselves obliged to do so from a literal interpretation of the command to Moses, "Put off thy shoes from off thy feet," etc. Others observed the custom only among those people who considered it an indication of reverence, as it was in Eastern nations in the time of Moses and Joshua. See Bingham, *Christ. Antiq.* bk. viii, ch. 10, § 7. See SHOE.

Shoham. See ONYX.

Sho'ham (Heb. *id.* שׁוֹחַם, *onyx*, as in Gen. ii, 12; Sept. Σοάμ v. r. 'Ισοάμ), second named of the four sons of the Merarite Levite Jaaziah, who were employed about the ark by David (1 Chron. xxiv, 27). B.C. 1043.

Sho'mer (Heb. *Shomer'*, שׁוֹמֵר, *keeper*, as often; Sept. Σωμήρ v. r. Σαμήρ, etc.), a variation for the names of two Hebrews.

1. Second named of the three sons of Heber, an Asherite (1 Chron. vii, 32); called SHAMER (q. v.) in ver. 34, where his sons are enumerated.

2. The father of Jehozabad, who slew king Joash (2 Kings xii, 21); in the parallel passage in 2 Chron. xxiv, 26, the name is converted into the feminine form SHIMITH (q. v.), who is further described as a Moabite. This variation may have originated in the dubious gender of the preceding name Shimeath, which is also made feminine by the chronicler. Others suppose that in Kings the father is named, and in Chronicles the mother.

Shook, JEFFERSON, a minister of the Methodist Episcopal Church, South, was born in Madison County, Mo., May 20, 1820; was converted and joined the M. E. Church in 1838. He was licensed to preach Sept. 18, 1841, and the same year was admitted into the Arkansas

Conference. In 1844 he was transferred to the Texas Conference, and at its division in 1845 he fell to the East Texas Conference. About 1854 he became supernumerary, and, with the exception of one year, held that relation until his death, Dec. 20, 1872. See *Minutes of Annual Conferences of the M. E. Ch., South*, 1873, p. 893.

Shoo-king, one of the Chinese sacred books. It is chiefly of a historical character, commencing with the reign of the Yaou, one of the very earliest emperors, supposed to have been contemporary with Noah, and stretches onward to the time of Confucius. This work is considered to be of the highest authority, containing many valuable moral and political maxims. On account of the vast influence of the *Shoo-king* over the public mind, the utmost efforts were made to suppress it during the reign of Che-huang-te, B.C. about 240. As edited by Confucius, the *Shoo-king* throws much light upon the early religion of the Chinese, showing that Shamanism (q. v.) was then the prevailing form of religion.

Sho'phach (Heb. *Shophak'*, שׁוֹפָח, prob. a variation of *Shobak*; Sept. Σωφάχ and Σωβάχ v. r. Σωφάθ and Σωφάφ; Vulg. *Sophach*), the general of Hadarezar (1 Chron. xix, 16, 18), elsewhere (2 Sam. x, 16) called SHOBACH (q. v.).

Sho'phan (Heb. *Shophan'*, שׁוֹפָן, prob. i. q. *Shaphan*; Sept. Σοφάπ; Samar. שׁוֹפָן; Vulg. *Sophar*), given in the A. V. as one of the fortified towns on the east of Jordan which were taken possession of and rebuilt by the tribe of Gad (Numb. xxxii, 35); but probably a mere affix (significant, according to some, of *bareness*) to the second Atroth, to distinguish it from the former one, not an independent place. See ATAROTH.

Shore is the rendering in the A. V. of three Heb. and two Greek words. 1. חֹף, *chôph* (so called from being *chafed* by the waves [Geen.], or *enclosed* [Fürst]; comp. Engl. *cove*, and the modern town *Chaifa*), a *roadstead* (Judg. v, 17; Jer. xlvii, 7; "coast" in Josh. ix, 1; Ezek. xxv, 10; "haven" in Gen. xlix, 13; "side" in Deut. i, 7); αἰγιαλός, a *beach* (Matt. xiii, 2, 48; John xxi, 4; Acts xxi, 5; xxvii, 39, 40). 2. קֶצֶה, *katsêh*, the *extremity* of the land (Josh. xv, 2; elsewhere "brim," "brink," etc.). 3. שֹׁפֵךְ, *sophâk*, a *lip* (as often, sometimes "brink," "bank," etc.); χεῖλος, the *lip* (as usually, "shore" only in Heb. xi, 12). See SEA.

Shoshan'nim (Heb. *Shoshannim'*, שׁוֹשַׁן, *lilies*, as often), a technical term, found as such in the phrase "To the chief musician upon Shoshannim," which is a musical direction to the leader of the temple-choir that occurs in Psa. xlv, lxix, and most probably indicates the melody "after" or "in the manner of" (שֶׁל, *al*, A. V. "upon") which the Psalms were to be sung. See also SHOSHANNIM-EDUTH. As "Shoshannim" literally signifies "lilies," it has been suggested that the word denotes lily-shaped instruments of music (Simonis, *Lec.* s. v.), perhaps cymbals (rather trumpets), and this view appears to be adopted by De Wette (*Die Psalmen*, p. 34). Hengstenberg gives to it an enigmatical interpretation, as indicating "the subject or subjects treated, as *lilies* figuratively for *bride* in xlv; the delightful consolations and deliverances experienced in lxix, etc." (Davidson, *Introd.* ii, 246), which Dr. Davidson very truly characterizes as "a most improbable fancy." The Sept. and Vulg. have in both Psalms ὑπὲρ τῶν ἀλλοιωθησομένων and *pro iis qui immutabuntur* respectively, reading apparently שֶׁל מְשִׁיבִים. Ben Zeb (*Otsar Hashshor.* s. v.) regards it as an instrument of psalmody, and Junius and Tremellius, after Kimchi, render it "hexachorda," an instrument with six strings, referring it to the root *shêsh*, "six," and this is approved by Eichhorn in his edition of Simonis. See PSALMS.

Shoshan'nim-e'duth (Heb. *Shoshannim' Eduth'*, שׁוֹשַׁן עֵדוּת, *lilies, a testimony*; Sept. οἱ ἀλλοιωθη-

σόμενοι, μαρτύριον; Vulg. *ii qui commutabuntur testimonium*), a phrase found in the title of Psa. lxxx as a direction to the chief musician, which appears, according to the most probable conjecture, to denote the melody or air "after" or "in the manner of" which the psalm was to be sung. As the words now stand they must be regarded as probably a fragment of the beginning of an older psalm with which the choir were familiar. Ewald gives what he considers the original meaning—"lilies;" that is, pure, innocent, is 'the law;' but the words will not bear this interpretation, nor is it possible in their present position to assign to them any certain meaning. For the conjectures of those who regard the words as the names of musical instruments, see the articles SHOSHANIM; SHUSHAN-EDUTH.

Shoshiskesha, in Hindû mythology, is a surname of *Agni*, the god of fire. It signifies "the lord of brilliancy."

Shotts, KIRK OF. The prolonged services at this place under the ministry of Mr. Livingstone, about 1636, gave rise to the Monday sermon so common in Scotland after a communion service.

Shoulder is the rendering mostly of שֵׁקֶם, *shekém* (as being the part *bent* to receive a burden; but perhaps the word is rather primitive; occasionally "back," etc.), and ὤμος (Matt. xxiii, 4; Luke xv, 4); frequently of שֵׁקֶל, *shék* (properly the *leg* [as sometimes rendered], especially the so-called right or "heaven" shoulder [q. v.], Exod. xxix, 22, 27; Lev. vii, 32, 33, 34, etc.); and elsewhere of קָתֶפֶת, *kathéph*, the *shoulder* properly so called, especially the "shoulder-pieces" (q. v.) of the high-priest's ephod (Exod. xxviii, xxxix); rarely of זֶרֶעַף, *zeráf*, the *arm* (Numb. vi, 19; Deut. xviii, 3), or of some denominative phrase.

Shoulder-blade (שִׁקְמָה, *shikmáh*, fem. of שֵׁקֶם, the common word for shoulder; used only in Job xxxi, 22, where it clearly means the socket or bone to which the arm is attached).

Shoulder-piece (קָתֶפֶת, *kathéph*, from an unused root, meaning [according to Fürst] to *bend* or *protect*; often rendered "side," sometimes "arm"), a term specially used (in the plur. fem. קֶתֶפֶתֹת, *kethephóth*) of the side-pieces on the upper part of the high-priest's ephod (q. v.), which came up over the shoulder, where the front and back flaps were fastened by a golden stud (Exod. xxviii, 7, 25; xxxix, 4; simply "shoulders," xxviii, 12; xxxix, 7; or "sides," xxviii, 27; xxxix, 20); also of the arms of an axle ("undersetters," 1 Kings vii, 30, 34), and the wings or side-spaces of a porch or gate ("sides," Ezek. xli, 2, 26). The term is frequently applied to that part of the body called the shoulder, but only of persons, either literally or figuratively; or metaphorically to places or inanimate objects. According to Gesenius it differs from שֵׁקֶם, *shekém*, in specifically meaning the upper part of the side or arm, the shoulder proper; whereas the latter term denotes originally the *shoulder-blade*, and hence that part of the back where these bones approach each other. But Fürst thinks the two words are altogether synonymous. Mithlau (new ed. of Gesenius's *Handwörterbuch*, s. v.) remarks that שֵׁקֶם signifies only the rear part of the shoulder where the neck joins the back, and hence occurs only in the sing. See SHECHEM.

Shovel is the rendering in the A.V. of—1. רָחַח, *ráchath* (from רָחַח, the *wind*), a winnowing fork or *fun* (Isa. xxx, 24); 2. יָצָא, *yá* (from יָצָא, to *sweep away*), used (in the plur.) of the implements for removing the ashes from the altar (Exod. xxvii, 3; xxxviii, 3; Numb. iv, 14; 1 Kings vii, 40, 45; 2 Kings xxv, 14; 2 Chron. iv, 11, 16; Jer. lii, 18). See AGRICULTURE; ALTAR.

Showalter, WESLEY M., a minister of the Methodist Episcopal Church, was born in Clearfield County, Pa., Feb. 24, 1831. When ten years of age he was con-

verted, and entered the ministry in 1855 as a member of the East Baltimore Conference. His last appointment was Bedford, which he was obliged, by reason of failing health, to relinquish in the fall of 1865. He removed to Salona, Clinton Co., Pa., where he died, Nov. 27, 1865. As a preacher he was discriminating, candid, and direct. See *Minutes of Annual Conferences*, 1866, p. 10.

Showbread is the rendering in the A.V. of the Heb. phrase לֶחֶם הַפָּנִים, *léchem hap-panim*, lit. *bread of the face*, i. e. of Jehovah (this is the usual form); or (in the later books) לֶחֶם הַמִּצְבֵּה, *léchem ham-muaré-keth*, *bread of the ordering* (1 Chron. ix, 32; xxiii, 29; 2 Chron. xiii, 11; Neh. x, 33), or simply the latter word (1 Chron. xxviii, 16; 2 Chron. ii, 4; xxix, 18); also לֶחֶם הַתָּמִיד, *léchem hat-tamid*, the *continual bread* (Numb. iv, 7), and לֶחֶם קֹדֶשׁ, *léchem kódesch*, *holy bread* (1 Sam. xxi, 5). Onkelos sometimes paraphrases it אֶפֶס לֶחֶם, *bread of the nostrils*. The Sept. has lit. ἄρτοι ἐνώπιον or ἄρτοι τοῦ προσώπου, sometimes ἄρτοι τῆς προσφοράς (1 Kings vii, 48), or ἄρτοι τῆς προθέσεως (1 Chron. ix, 32, etc.), as in the New Test. (Matt. xii, 4; Luke vi, 4); but ἡ πρόθεσις τῶν ἄρτων in Heb. ix, 2; Josephus directly ἄρτοι τοῦ Θεοῦ (Ant. viii, 3, 7); the Vulg. *panes propositionis*. In the following account we bring together all the ancient and modern information on the subject.

1. *The Table and its Accessories.*—Within the ark it was directed that there should be a table of shittim wood, i. e. *acacia*, two cubits in length, a cubit in breadth, and a cubit and a half in height, overlaid with pure gold, and having "a golden crown to the border thereof round about," i. e. a border or list, in order, as we may suppose, to hinder that which was placed on it from by any accident falling off. The further description of this table will be found in Exod. xxv, 23-30, and a representation of it as it existed in the Herodian Temple forms an interesting feature in the bas-reliefs within the arch of Titus. The accuracy of this may, as is obvious, be trusted. It exhibits one striking correspondence with the prescriptions in Exodus. We there find the following words: "and thou shalt make unto it a border of a handbreadth round about." In the sculpture of the arch the hand of one of the slaves who is carrying the table, and the border, are of about equal breadth. This table is itself called שֻׁלְחַן הַפָּנִים, "the table of the face," in Numb. iv, 7, and שֻׁלְחַן הַקֹּדֶשׁ, "the pure table," in Lev. xxiv, 6 and 2 Chron. xiii, 11. This latter epithet is generally referred by commentators to the unalloyed gold with which so much of it was covered. It may, however, mean somewhat more than this, and bear something of the spiritual force which it has in Malachi i, 11.

It was thought by Philo and Clement of Alexandria that the table was a symbol of the world, its four sides or legs typifying the four seasons. In the utter ab-

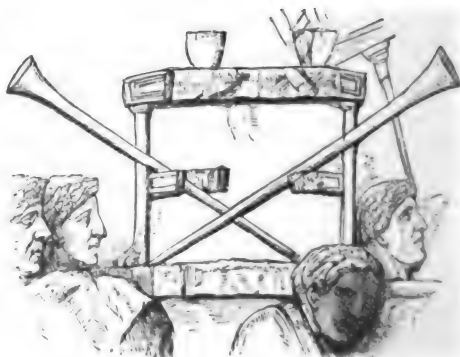

Table of Showbread. (From the Arch of Titus at Rome.)

sence of any argument in their support, we may feel warranted in neglecting such fanciful conjectures, without calling in the aid of Bähr's arguments against them.

In 2 Chron. iv, 19 we have mention of "the tables whereon the showbread was set," and at ver. 8 we read of Solomon making ten tables. This is probably explained by the statement of Josephus (*Ant.* viii, 3, 7), that the king made a number of tables, and one great golden one on which they placed the loaves of God. See TEMPLE.

The table of the second Temple was carried away by Antiochus Epiphanes (1 Macc. i, 22), and a new one made at the refurbishing of the sanctuary under Judas Maccabæus (iv, 49). Afterwards Ptolemy Philadelphus presented a magnificent table (Josephus, *Ant.* xii, 2, 8, 9).

The table stood in the sanctuary, together with the seven-branched candlestick and the altar of incense. Its position, according to Josephus (*Ant.* iii, 6, 6), was on the north side of the sanctuary, not far from the veil that opened into the most holy. Besides the twelve loaves, the showbread table was adorned with dishes, spoons, bowls, etc., which were of pure gold (*Exod.* xxv, 29). These, however, were evidently subsidiary to the loaves, the preparation, presentation, and subsequent treatment of which manifestly constituted the ordinance of the showbread. See TABLE.

II. *The Bread and its Significance.*—Whether the bread was to be leavened or unleavened is not said. The Jewish tradition holds it to have been unleavened (Josephus, *Ant.* iii, 6, 6; 10, 7; Philo, *De Congr.* v, 1); and as Josephus and Philo could scarcely be ignorant of what on such a matter was customary in their time, it is not to be doubted that, according to the later practice at least, the bread was unleavened, affording ground for the inference that the same was the case also in earlier times. The cakes or loaves were to be placed in two rows; but whether each apart, six in a line, or piled up one above another, is not indicated. The Jewish tradition, however, is quite uniform; it represents them as ranged in two columns, six in each. Two reasons seem to confirm this view: first, the dimensions of the table, coupled with the quantity of flour in each cake, which must have rendered it next to impossible to have two parallel lines of six loaves placed on it; and second, the regulation concerning the frankincense (the Sept. and Philo add *salt*) which required this to be set, not on each cake as standing individually apart, but upon each row, as if forming a visible unity (*Lev.* xxiv, 7). The frankincense was to be "on the bread for a memorial, an offering made by fire unto the Lord;" the two golden pots containing it being, according to Josephus (*Ant.* iii, 10, 7), taken out along with the bread, and the frankincense burned on the altar of burnt-offering before the bread was given to the priests to be eaten. On each Sabbath this took place; twelve new loaves which had been prepared the evening before by a portion of the Levites (1 Chron. ix, 32) being made every returning Sabbath to replace the old, and fresh frankincense put in the golden vessels in the room of that which had been burned (*Lev.* xxiv, 8, 9).

The number of the loaves (twelve) is considered by Philo and Josephus to represent the twelve months. If there was such a reference, it must surely have been quite subordinate to that which is obvious at once. The twelve loaves plainly answer to the twelve tribes (*comp. Rev.* xxii, 2). But, taking this for granted, we have still to ascertain the meaning of the rite, and there is none which is left in Scripture so wholly unexplained. Though it is mentioned, as we have seen, in other parts of the Old Test. besides the Pentateuch, it is never more than mentioned. The narrative of David and his companions being permitted to eat the showbread (1 Sam. xxi, 4-6) does but illustrate the sanctity which was ascribed to it; and besides our Saviour's appeal to that narrative (*Matt.* xii, 4), the ordinance is only once referred to in the New Test. (*Heb.* ix, 2), and there it is

merely named among the other appurtenances of the first sanctuary. But although unexplained, it is referred to as one of the leading and most solemn appointments of the sanctuary. For example, the appeal of Abijam to the revolted tribes (2 Chron. xiii, 10, 11) runs thus, "But as for us, the Lord is our God, and we have not forsaken him; and the priests, which minister unto the Lord, are the sons of Aaron, and the Levites wait upon their business; and they burn unto the Lord every morning and every evening burnt-sacrifices and sweet incense; the showbread also set they in order upon the pure table," etc. In this absence of explanation of that which is yet regarded as so solemn, we have but to seek whether the names bestowed on, and the rites connected with, the showbread will lead us to some apprehension of its meaning.

The first name we find given it is obviously the dominant one, פָּנִים, "bread of the face, or faces." This is explained by some of the rabbins, even by Maimonides, as referring to the four sides of each loaf. It is difficult to believe that the title was given on a ground which in no way distinguished them from other loaves. Besides, it is applied in *Numb.* iv, 7, simply to the table, שֻׁלְחָן הַפָּנִים, not, as in the English version, "the table of showbread," but the "show table," the "table of the face, or faces." We have used the words *face* and *faces*; for פָּנִים, it need scarcely be said, exists only in the plural, and is therefore applied equally to the face of one person and of many. In connection with this meaning, it continually bears the secondary one of *presence*. It would be superfluous to cite any of the countless passages in which it does so. But whose face or presence is denoted? That of the people? The rite of the showbread, according to some, was performed in acknowledgment of God's being the giver of all our bread and sustenance, and the loaves lay always on the table as a memorial and monitor of this. But against this, besides other reasons, there is the powerful objection that the showbread was unseen by the people; it lay in the sanctuary, and was eaten there by the priests alone. Thus the first condition of symbolic instruction was wanting to the rite, had this been its meaning.

The פָּנִים, therefore, or presence, is that not of the people, but of God. The ἀποὶ ἐνώπιον and the ἀποὶ τῆς προσφοράς of the Sept. seem to indicate as much, to say nothing of 1 Sam. xxi, 6, where the words פָּנִים הַמִּסְתִּירִים מִלִּפְנֵי יְהוָה seem decisive of the whole question. But in what sense? Spencer and others consider it bread offered to God, as was the Minchah, a symbolical meal for God somewhat answering to a heathen *Lectisternium*. But it is not easy to find this meaning in the recorded appointments. The incense is, no doubt, to be burned on the appointed altar, but the bread, on the Sabbath following that of its presentation, is to be eaten in the holy place by the priests. There remains, then, the view which has been brought out with such singular force and beauty by Bähr—a view broad and clear in itself, and not disturbed by those fanciful theories of numbers which tend to abate confidence in some parts of his admirable *Symbolik*. He remarks, and justly, that the phrase פָּנִים is applied solely to the table and the bread, not to the other furniture of the sanctuary, the altar of incense, or the golden candlestick. There is something, therefore, peculiar to the former which is denoted by the title. Taking פָּנִים as equivalent to the *presence* (of God subaud.), he views the application of it to the table and the bread as analogous to its application to the angel, מִלֵּאךְ פָּנִים (*Isa.* lxiii, 9, compared with *Exod.* xxxiii, 14, 15; *Deut.* iv, 37). Of the angel of God's presence it is said that God's "name is in him" (*Exod.* xxxiii, 20). The presence and the name may therefore be taken as equivalent.

lent. Both, in reference to their context, indicate the manifestation of God to his creatures. "The name of God," he remarks, "is himself, but that, in so far as he reveals himself, the face is that wherein the being of a man proclaims itself, and makes known its individual personality. Hence, as name stands for he or himself, so face for *person*: to see the face, for to see the person. The 'bread of the face' is, therefore, that bread through which God is seen; that is, with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Hence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating and retaining that life which consists in seeing the face of God. Bread is therefore here a symbol, and stands, as it generally does in all languages, both for life and life's nourishment; but by being entitled *the bread of the face*, it becomes a symbol of a life higher than the physical. It is, since it lies on the table placed in the symbolic heaven, heavenly bread. They who eat of it and satisfy themselves with it see the face of God" (Bähr, *Symbolik*, bk. i, ch. vi, § 2). It is to be remembered that the showbread was "taken from the children of Israel by an everlasting covenant" (Lev. xxiv, 8), and may therefore be well expected to bear the most solemn meaning. Bähr proceeds to show very beautifully the connection in Scripture between seeing God and being nourished by God, and points, as the coping-stone of his argument, to Christ being at once the perfect image of God and the bread of life. The references to a table prepared for the righteous man, such as Psa. xxiii, 5; Luke xxii, 30, should also be considered. See BREAD.

Shower is the rendering in the A. V. of גֶּשֶׁם, *gêshem* (Ezek. xiii, 11, 13; xxxiv, 26), a heavy rain (as elsewhere rendered); ὄμβρος (Luke xii, 54); זֶרֶם, *zêrem* (Job xxiv, 8), a pouring rain (elsewhere "storm," "tempest," etc.); and רִבְבִּים, *rebibim* (from their multitude), *drops* (Deut. xxxii, 2; Psa. lxxv, 10; lxxii, 7; Jer. iii, 3; xiv, 2; Mic. v, 7). See RAIN.

Shower, JOHN, an eminent Dissenting minister, was born at Exeter, England, in 1657, and received his early education at that place. At the age of fourteen he removed to the academy of Mr. Warren, at Taunton, and some time after was placed under the care of Mr. Morton, Newington-green, London. He preached his first sermon in his twentieth year; and in 1678, when an evening lecture against popery was established in Exchange Alley, he was one of the lecturers. In the following year he was privately ordained, and chosen assistant to Mr. Vincent Alsop. In 1683 he travelled on the Continent with Mr. Cornish, the nephew of Sir Samuel Barnardiston, where he became acquainted with many Protestant divines. Returning to England, he resumed his lectures in Exchange Alley, but, owing to measures pursued by James II, he retired to Holland, where he was chosen evening lecturer to the English Church. Returning to London in 1690, he labored with Mr. Howe, but soon took charge of a Church in Old Jewry, which, under his labors, greatly prospered. He died June 28, 1715. He published, *Mourner's Companion* (1692, 1699, 12mo);—*Family Religion* (Lond. 1694, 8vo);—*Funeral Discourses* (1699, 2 vols. 12mo);—*Serious Reflections on Time and Eternity* (1699, 8vo), of which there are many editions;—*Heaven and Hell* (1700, 12mo);—*Sacramental Discourses* (1702, 8vo);—*Winter Meditations* (1709, 8vo). See Tong [Wm.], *Memoirs and Funeral Sermon* (1716, 8vo); Bennett, *Hist. of Dissenters* (Lond. 1833), ii, 331.

Shreeve, RICHARD S., a minister of the Methodist Episcopal Church, South, was born in Alexandria County, Va., Oct. 5, 1839. He was graduated at Dickinson College, Carlisle, Pa., in 1860. He entered the Confederate army, serving from the beginning of the war till

its close. In March, 1869, he was admitted into the Baltimore Conference. In 1871 he located, with the intention of residing in Kentucky, but was induced to remain, and the next year was readmitted. He, with his wife, was killed by lightning at the parsonage of Upper Botetourt, Va., June 25, 1874. See *Minutes of Annual Conferences of the M. E. Ch., South*, 1875, p. 137.

Shri Rama. See VISHNU.

Shrift, the act of absolving a penitent. See CONFESSIONAL.

Shrift-father, the priest to whom confession is made.

Shrift-hand, the priest's right hand—that is, the hand used in shriving a penitent.

Shrift-mark. See SHRIFT-SIGN.

Shrift-sign, the sign of the cross used by the priest in shriving a penitent.

Shrine (ναός, Acts xix, 24, a temple, as elsewhere rendered), a miniature copy of the Temple of Diana at Ephesus containing a small image of the goddess. See DIANA.

SHRINE (Lat. *scrinium*), a *feretory* or repository for relics, whether fixed, such as a tomb, or movable. The term is also sometimes applied to the tomb of a person not canonized. Shrines were often made of the most splendid and costly materials, and enriched with jewelry in profusion, as that of St. Taurin at Evreux, in Normandy. Those which were movable were, on certain occasions, carried in religious processions: they were arranged above and behind the altar, on rood or other beams, and lamps were suspended before or around them. Others were substantial erections, generally the tombs of saints, as that of Edward the Confessor in Westminster Abbey, and that of St. Cuthbert, formerly in Durham Cathedral, etc. These were not unfrequently rebuilt (with additional splendor) subsequently to their first erection.

Shrine at Ely Cathedral.

Shrine-clerk, or **Shrine-keeper**, is the official in a church who receives the voluntary oblations of the faithful. At the great and most noted shrines of saints the shrine-clerk sat at a table near, or sometimes at, a tomb, the slab of which served as such, to accept the donations of the pilgrims.

Shrine-cloth, the curtain hanging before a shrine; sometimes called *shrine-veil*.

Shrine-keeper. See SHRINE-CLERK.

Shrine-man, a name by which the *shrine-clerk* was sometimes called.

Shrine-veil. See SHRINE-CLOTH.

Shrive (Saxon, *scrifan*). 1. To absolve a penitent after private confession. 2. To take or receive a confession. 3. To enjoin or impose a penance after confession. The word is now nearly obsolete.

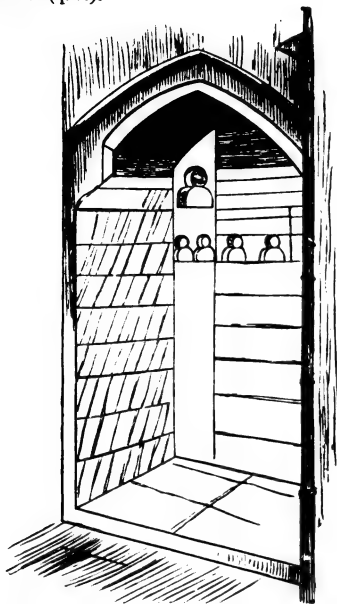

Shriver, or **Shriving-clerk**, a *confessor*.

Shriving-hand, that hand by which the sign of

the cross is made by the priest over the penitent in pronouncing absolution, i. e. the right hand. Also called *Shrift-hand* and *Shrove-hand*.

Shriving Mark or Sign, the sign of the cross made by the priest with his right hand when giving absolution. Also called *Shrift-mark* and *Shrove-sign*.

Shriving-pew, a term sometimes applied to the confessional (q. v.).

Ancient Shriving-pew at Tanfield, near Ripon, Yorkshire.

Shroud is the rendering of the A. V. in Ezek. xxxi, 3, of חֹרֶשׁ, *chôresh*, a *thicket* ("forest," 2 Chron. xxvii, 4; "bough," Isa. xvii, 9; elsewhere "wood").

SHROUD, FEAST OF THE MOST HOLY, a sacred festival of the Roman Catholic Church, held on the Friday after the second Sunday in Lent, in honor of the shroud in which our Lord was buried. Relics bearing the name of the shroud of our Blessed Lord are found in various places in Italy, France, and Germany, all of which are alleged to work miracles. To the altar of the Most Holy Shroud at Besançon, Gregory XIII granted extraordinary privileges, with indulgences to all who visit the same on stated days. Pope Julius II was equally liberal in his grants to the Chapel of the Most Holy Shroud at Turin. There is a hymn to the shroud in the Anglican Breviary, which celebrates it as bearing the impression of the body of our Saviour.

Shrouds, **THE**, a term for a covered walk or cloister in the old Cathedral of St. Paul, London.

Shrove, to, means to join in the festivities of *Shrovetide*.

Shrove-box. See SHRIVING-PEW.

Shrove-hand. See SHRIFT-HAND.

Shrove-sign. See SHRIFT-SIGN.

Shrovetide literally means "confession time," and is the name given to the days immediately preceding Ash-Wednesday. These days were so called because on them, and especially on the last of them, people were accustomed to confess their sins as a preparation for Lent. In most Roman Catholic countries it began on the Sunday before Lent. In the modern discipline of that Church a trace of the custom is still preserved, as in many countries the time of the confession which precedes the Paschal, or Easter, communion commences from Shrovetide. These days are sometimes

called "Fastingtide" and "Fast-mass," names still retained in some parts of Great Britain. The precept of shriving having been fulfilled, the faithful, on the eve of entering upon Lent, were allowed permission to give themselves up to amusements. In England, the pastimes of foot-ball, cock-fighting, bull-baiting, etc., were down to a late period recognised usages of Shrovetide, but are now gradually disappearing.

Shrove-Tuesday, the day before Ash-Wednesday, so called from the custom among the Roman Catholics of confessing their sins on that day, and so qualifying themselves for Lent. In process of time this was turned into taking leave of flesh and other dainties, and afterwards, by degrees, into sports and merrymaking. In old Scotland it was called *Fastern's-eve*, probably the eve of the great fast. In England it received the name of "Pancake-Tuesday," from the fritters and pancakes eaten on that day.

Shroving, the festivity of *Shrovetide*.

Shrub (שִׁרִי, *siach*; Gen. xxi, 15, a *bush*, as rendered in Job xxx, 4, 7; "plant" in Gen. ii, 5).

Shryving-cloth. Some antiquaries hold that this was the veil which was hung before the rood-loft in Lent. Others believe it to have been a head-veil assumed by women when they went to confession in church; for as confessionals probably did not generally exist in the ancient Church of England, a "shryving-cloth" may have been found convenient in protecting the penitent from the public gaze. The latter explanation seems at least reasonable and probable.

Shu'a, the name of a Hebrew and a Hebrewess, which appears in different forms in the original.

1. (Heb. *Shu'â*, שִׁוְעָ, *wealth*, or a *cry* for help, or an *oath*; Sept. Σαῦα or Σαῦα v. r. Σοῦε.) A Canaanite of Adullam, whose daughter (hence named only as Bathshua in the original) was Judah's wife, and the mother of his first three children (Gen. xxxviii, 2, 12 [in both passages the A. V. has incorrectly "Shuah"]; 1 Chron. i, 32). B.C. ante 1895.

2. (Heb. *Shu'â*, שִׁוְעָ, *id.*; Sept. Σωλά.) Daughter of Heber, a grandson of Asher, whose three sons are likewise enumerated (1 Chron. vii, 32). B.C. post 1874.

Shu'ah, the name of three Hebrews, which appears in different forms in the original.

1. (Heb. *Shu'âch*, שִׁוְחָ, *a pit*; Sept. Σωῖ v. r. Σωῖε and Σωῖ.) Last named of the six sons of Abraham by Keturah (Gen. xxv, 2; 1 Chron. i, 32). B.C. ante 1988. See SHUCHITE.

2. The father of Judah's Canaanitish wife (1 Chron. ii, 3). See SHUA.

3. (Heb. *Shuchah*, שִׁוְחָ, *a pit*; Sept. Ἀσχα.) A brother (some MSS. have *son*) of Chelub among the descendants of Judah (1 Chron. iv, 11). B.C. prob. ante 1612.

Shual. See FOX.

Shu'al (Heb. *Shu'âl*, שִׁוְעָל, *a jackal*; Sept. in Chron. Σοῦάλ v. r. Σουλά and Σουδά; in Kings, Σωγάλ), the name of a man and of a region.

1. Third named of the eleven "sons" of Zophah, descendants of Asher (1 Chron. vii, 36). B.C. post 1612.

2. A district ("land of Shual") named only in 1 Sam. xiii, 17, to denote the direction taken by one of the three parties of marauders who issued from the Philistine camp at Michmash. Its connection with Ophrah (probably Taiyibeh) and the direction of the two other routes named in the passage make it pretty certain that the region in question lay north of Michmash. If, therefore, it be identical with the "land of Shalim" (1 Sam. ix, 4)—as is not impossible—we obtain the first and only clue yet obtained to Saul's journey is quest of the asses. The name *Shual* has not yet been identified in the

neighborhood of Taiyibeh or elsewhere. It may have originated in the Hebrew signification of the word ("jackal"), in which case it would be appropriate enough to the wild desolate region east of Taiyibeh—a region containing a valley or ravine at no great distance from Taiyibeh which bore, and perhaps still bears, the name of "Hyænas." See ZERBOIM, VALLEY OF. Others (as Thenius, in *Ezег. Handb.*) derive the name from a different root, and interpret it as "hollow land."

Shu'baël (Heb. *Shubaël'*, שׁוּבָאֵל, i. q. *Shebuel*; Sept. Σουβαήλ v. r. Σωβαήλ, etc.), the name of two Levites, both elsewhere called **SHEBUEL** (q. v.), namely, (a) a son of Gershon (1 Chron. xxiv, 20; comp. xxiii, 16; xxvi, 24); and (b) a son of Heman (1 Chron. xxv, 20; comp. ver. 4).

Shuck, JOHN LEWIS, a minister of the Baptist denomination, was born in Alexandria, D. C., Sept. 4, 1812. Having received an appointment as a missionary of the Baptist General Convention to labor among the Chinese, he reached the field of his labors—Macao—Sept. 17, 1836, where he remained until March 16, 1842, when he removed to Hong-Kong, and afterwards to Canton. Mr. Shuck returned to the United States in 1845, the year in which the separation took place between Northern and Southern Baptists. He was honorably dismissed from the Missionary Union, the name by which the Northern organization was known, and in 1846 became a missionary of the Southern Baptist Convention. By this society he was sent to labor among the Chinese of California. Having spent several years in this work, he returned East, and died at Barnwell Court-house, S. C., in October, 1863. (J. C. S.)

Shuckford, SAMUEL, a learned English divine, the time and place of whose birth are unknown. He was educated at Caius College, Cambridge, graduating in 1716. He became successively curate of Shelton, Norfolk, prebendary of Canterbury (1738), and rector of All-hallows, London. He died in 1754. He published a few occasional *Sermons* (Camb. 1723, 4to; 1724, 4to; 1734, 4to, and later); but he is principally known for his *History of the World, Sacred and Profane* (Lond. 1743, 4 vols. 8vo, and often since), intended to serve as an introduction to Prideaux's *Connection*, but he only lived to bring it down to the time of Joshua. See ALLIBONE, *Dict. of Brit. and Amer. Authors*, s. v.; Hook, *Eccles. Biog.* s. v.

Shu'ham (Heb. *Shucham'*, שׁוּחָם, perhaps *pit-digger* [Gesen.], or *humility* [Fürst]; Sept. Σαμέ v. r. Σαμεδῖ; Vulg. *Shumah*), the son of Dan, and progenitor of a family named after himself (Numb. xxvi, 42); elsewhere (Gen. xli, 23) called **HUSHIM** (q. v.).

Shu'hamite (Heb. with the art. *hash-Shucham'*, שׁוּחָמִי, patronymic from *Shuham*; Sept. ὁ Σαμέ v. r. Σαμεδῖ), the descendants (numbering 4460 at the Eisode) of Shuham (q. v.) the son of Dan (Numb. xxvi, 42, 43).

Shu'hite (Heb. with the art. *hash-Shuchi'*, שׁוּחִי, patronymic from *Shuah*; Sept. ὁ Σαυχῆ v. r. Σαυχῆ, Σαυχῆ, etc.), an ethnic appellative frequent in the book of Job (ii, 11; viii, 1; xviii, 1; xxv, 1; xlii, 9), but only as the epithet of one person, Bildad (q. v.). The local indications of the book of Job point to a region on the western side of Chaldaea, bordering on Arabia; and exactly in this locality, above Hit and on both sides of the Euphrates, are found, in the Assyrian inscriptions, the *Tukki*, a powerful people. It is probable that these were the Shuhites, and that, having been conquered by the Babylonian kings, they were counted by Ezekiel among the tribes of the Chaldeans. Having lost their independence, they ceased to be noticed; but it was no doubt from them that the country on the Euphrates immediately above Babylonia came to be designated as *Sohene*, a term applied to it in the Ptolemaic Tables. The Shuhites appear to have been de-

scendants of Abraham by Keturah (Gen. xxv, 2; 1 Chron. i, 32).—Smith. Others, however, think that *Saccæa* (Σακκαία), which Ptolemy (v, 14) places eastward of Batanaæ, is more probably their representative. See ARABIA.

Shukra, in Hindû mythology, is the planet *Venus*, or the genius who governs and possesses it—a grandson of Brahaspadi, the planet Jupiter, and father of the beautiful Dewajani and a powerful Brahmin.

Shu'lamite (Heb. with the art. *hash-Shulamith'*, שׁוּלָמִית, i. e. *the Shulammitess*; Sept. ἡ Σουλᾶμιτις v. r. Σουλᾶνιτις, etc.; Vulg. *Sulamitis* and *Sunamitis*), one of the personages in the poem of Solomon's Song, who, although named only in one passage (vi, 13), is, according to most interpreters, the most prominent of all the characters, being no other than the bride herself. The name—after the analogy of *Shunammite*—denotes a woman belonging to a place called *Shulem*. The only place bearing that name of which we have any knowledge is Shunem itself, which, as far back as the 4th century, was so called (Euseb. *Onomast.* s. v.). On the theory that *Shulammitess* and *Shunammite* are equivalent, some have supposed that the female in question who was the object of Solomon's passion was Abishag—the most lovely girl of her day, and at the time of David's death one of the most prominent persons at the court of Jerusalem. This would be equally appropriate whether Solomon were himself the author of the Song or it were written by another person whose object was to personate him accurately. See **SOLOMON**. But this is abhorrent to the whole tenor of the Canticles, and is opposed to the Oriental usage with regard to the harem of a deceased king. See **ABISHAG**. It is far more reasonable to suppose that the title *the Shulammitess* was a poetical term applied to the bride in imitation of *Solomon's* name, as they are thus but masculine and feminine forms for "peaceful." See **CANTICLES**.

Shulchan Aruk. See **KARO**, JOSEPH.

Shultz, THOMAS, a Methodist Episcopal minister, was born in Hamburg, Germany, July 11, 1821. He came to New York with his parents in 1834, was licensed to preach in 1845, and employed to commence a mission at Bloomington, Ia. In 1846 he was admitted on trial in the Illinois Conference, and appointed to the Galena mission; in 1847 to the Beardstown mission; and in 1848 to Burlington, where he died March 20, 1848. See *Minutes of Annual Conferences*, iv, 285.

Shum. See **GARLICK**.

Shumah. See **SHUMATHITE**.

Shu'mathite (Heb. collective with the art. *hash-Shumathi'*, שׁוּמָתִי, a gentile or patronymic; Sept. ἡ Σαμαθῆ; Vulg. *Semathes*), one of the four families who sprang from Kirjath-jearim (1 Chron. ii, 53); so called either as being colonists of a village named *Shumah* (שׁוּמָה, *garlic* [Gesen.], or *valuation* [Fürst]), somewhere in that neighborhood, or as descendants from a man of that name; but in neither case is there any other trace of the origin or location.

Shu'nammitess (Heb. with the art. *hash-Shunammith'*, שׁוּנַמִּית, [in 1 Kings ii, 22, the shorter form שׁוּנַמִּית], *the Shunammite*; Sept. ἡ Σωμανῆτις v. r. Σωμανῆτις, a native of **SHUNEM**, as is plain from 2 Kings iv, 1. It is applied to two persons—Abishag, the nurse of king David (1 Kings i, 3, 15; ii, 17, 21, 22), and the nameless hostess of Elisha (2 Kings iv, 12, 25, 36). See Woodward, *Lectures on the Shunammite* (Lond. 1840). The modern representative of Shunem being *Solam*, some have suggested (as Gesenius, *Thesaur.* p. 1379 b), or positively affirmed (as Fürst, *Handb.* ii, 422), that *Shunammite* is identical with *Shulammitess* (Cant. vi, 13). But this lacks probability.

Shu'ne'm (Heb. *Shunem'*, שׁוּנֶם, *uneven place*

[First] from שֻׁנִי, or perhaps [Gesen.] for שֻׁנִי, *two resting-places*; Sept. *Σουνάμ* or *Σουνάν* v. r. *Σωνάμ* or *Σουάν*, etc.), one of the cities allotted to the tribe of Issachar (Josh. xix, 18; where it occurs between Chesulloth and Haphraim). It is mentioned on two occasions. First as the place of the Philistines' first encampment before the battle of Gilboa (1 Sam. xxviii, 4). Here it occurs in connection with Mount Gilboa and Endor, and also, probably, with Jezreel (xxix, 1). Secondly, as the scene of Elisha's intercourse with the Shunammite woman and her son (2 Kings iv, 8). Here it is connected with adjacent corn-fields, and, more remotely, with Mount Carmel. It was, besides, the native place of Abishag, the attendant on king David (1 Kings i, 8), and, according to some, of Shulamith, the heroine of the poem or drama of "Solomon's Song." By Eusebius and Jerome (*Onomast.*) it is mentioned twice, under *Σουβήμ* and "Sunem," as five miles south of Mount Tabor, and then known as Sulem (*Σουλήμ*); and under "Sonam," as a village in Acrabattine, in the territory of Sebasite called Sanim. The latter of these two identifications probably refers to Sanūr, a well-known fortress some seven miles from Sebastiyeh and four from Arrabeh, a spot completely out of the circle of the associations which connect themselves with Shunem. The other has more in its favor, since—except for the distance from Mount Tabor, which is nearer eight Roman miles than five—it agrees with the position of the present *Solam* or *Sülem*, a village on the south-west flank of Jebel Duhý (the so-called "Little Hermon"), three miles north of Jezreel, five from Gilboa (J. Fukua), full in view of the sacred spot on Mount Carmel, and situated in the midst of the finest corn-fields in the world. It is named as *Salem* by the Jewish traveller Hap-Parchi (Asher, *Benjamin*, ii, 431). It had then its spring, without which the Philistines would certainly not have chosen it for their encampment. Now, according to the notice of Dr. Robinson (*Researches*, ii, 324), the spring of the village is but a poor one. The change of the *n* in the ancient name to *l* in the modern one is the reverse of that which has taken place in Zerin (Jezreel) and Beitin (Bethel). There is nothing specially to mark an ancient site in Sülem, for it is only a mud hamlet with cactus-bushes. West of the houses there is a beautiful garden, cool and shady, of lemon-trees, watered by a little rivulet; and in the village are a fountain and trough (Conder, *Tent Work in Palestine*, i, 123).

Shu'ni (Heb. *Shuni'*, שֻׁנִי, *quiet* [Gesen.], or *fortunate* [Fürst]; Sept. *Σουνι* v. r. *Σαυνι*), third named of the seven sons of Gad (Gen. xlv, 16), and progenitor of a family named after him (Numb. xxvi, 15). B.C. 1874.

Shu'nite (Heb. collectively with the art. *hash-Shuni'*, שֻׁנִי, patronymic from *Shuni*; Sept. *ὁ Σουνει* v. r. *Σούν*; A. V. "the Shunites"), a designation of the posterity of SHUNI (q. v.) the son of Gad (Numb. xxvi, 15).

Shunk, MICHAEL, a minister of the Methodist Episcopal Church, was born at Berlin, Somerset Co., Pa., about 1808, and converted at Masontown, Pa., in his twentieth year. He was received into the Illinois Conference in 1837, and was effective until 1870. From that time he was on the supernumerary and superannuated lists until his death, in Jacksonville, Ill., Sept. 1, 1876. "He was a scriptural, sensible, and practical preacher and a faithful pastor." See *Minutes of Annual Conferences*, 1876, p. 144.

Shu'pham, or rather SHEPHU'PHAM (Heb. *Shephupham'*, שֵׁפְחָם, probably for שֵׁפְחָן, *an adder*; Sept. *Σωφάν* v. r. *Ὀφάμ*), a son of Benjamin, and head of a family of the same name (Numb. xxvi, 39); doubtless the same elsewhere (1 Chron. viii, 5) called SHEPHU-PHAN (q. v.), etc.

Shu'phamite (Heb. collectively with the art. *hash-*

Shuphami', שֵׁפְחָמִי, patronymic from *Shephupham*; Sept. *ὁ Σωφάνι* v. r. *Ὀφάμι*; A. V. "Shuphamites"), the designation (Numb. xxvi, 39) of the family of Shephupham ("A. V. Shuphan"), or Shephuphan, the son of Benjamin (1 Chron. viii, 5). See SHUPPHIM.

Shup'pim (Heb. *Shuppim'*, שֻׁפִּים, or [1 Chron. vii, 15] שֵׁפִים, prob. *serpents* [Gesen.], or a contraction for *Shephupham*; Sept. *Σαπφίμ*, v. r. *Σαφείμ*, *Μαμφείν*, etc.), the name of two persons.

1. In 1 Chron. vii, 12, "Shuppim and Huppim, the children of Ir," are reckoned among the posterity of Benjamin. B.C. 1856. It is, by some, thought to be the same as Iri the son of Bela the son of Benjamin, and in that case Shuppim would be the great-grandson of Benjamin. In Numb. xxvi, 39 he and his brother are called *Shupham* and *Hupham*, while in 1 Chron. viii, 5 they appear as *Shephuphan* and *Huram*, sons of Bela, and in Gen. xlv, 21 as *Muppim* and *Huppim*, sons of Benjamin. To avoid the difficulty of supposing that Benjamin had a great-grandson at the time he went down to Egypt, lord A. Hervey conjectures that Shuppim, or Shephuphan, was a son of Benjamin, whose family was reckoned with that of Ir, or Iri. But this is arbitrary and unnecessary, as the date is that of Jacob's death. As he is elsewhere (1 Chron. v, 15) similarly mentioned as the brother of Huphan or Huppim, who was a son of Becher and grandson of Benjamin, he must have been such likewise. See BENJAMIN; JACOB.

2. A Levite of the family either of Kohath or Merari who, together with Hosah, had charge of the Temple-gate Shallecheth, in accordance with an arrangement originally instituted by David (1 Chron. xxvi, 16). B.C. 1013.

Shur (Heb. *Shûr*, שֹׁר; Sept. *Σοῦρ*; Vulg. *Sur*), a place just without the eastern border of Egypt. Its name, if Hebrew or Arabic, signifies "a wall," and there can be little doubt that it is of Semitic origin from the position of the place. The Sept. seems to have thus interpreted it, if we may judge from the obscure rendering of 1 Sam. xxvii, 8, where it must be remarked the extraordinary form Γελαμψούρ is found. This word is evidently a transcription of the words שֹׁרֶה . . . מִצְוֶה, the former, save the initial participle, not being translated. The Targums of Onkelos and Jonathan interpret Shur by *Chagara* (חֲגָרָא), and Josephus by *Pelusium* (Πηλούσιον [Ant. vi, 7, 3]); but the latter was called Sin by the Hebrews.

Shur is first mentioned in the narrative of Hagar's flight from Sarah. Abraham was then in southernmost Palestine, and when Hagar fled she was found by an angel "by the fountain in the way to Shur" (Gen. xvi, 7). Probably she was endeavoring to return to Egypt, the country of her birth—she may not have been a pure Egyptian—and had reached a well in the inland caravan route. Abraham afterwards "dwelled between Kadesh and Shur, and sojourned in Gerar" (xx, 1). From this it would seem either that Shur lay in the territory of the Philistines of Gerar, or that this pastoral tribe wandered in a region extending from Kadesh to Shur. See GERAR. In neither case can we ascertain the position of Shur. The first clear indication of this occurs in the account of Ishmael's posterity: "And they dwelt from Havilah unto Shur, that [is] before Egypt, as thou goest towards Assyria" (xxv, 18). With this should be compared the mention of the extent of the Amalekitish territory given in this passage, "And Saul smote the Amalekites from Havilah [until] thou comest to Shur, that [is] over against Egypt" (1 Sam. xv, 7). It is also important to notice that the Geshurites, Gezrites, and Amalekites, whom David smote, are described as "from an ancient period the inhabitants of the land, as thou comest to Shur, even unto the land of Egypt" (xxvii, 8). The Wilderness of Shur was entered by the Israelites after they had crossed the Red Sea (Exod. xv, 22, 23). It was also called the Wilderness of *Etham* (Numb.

xxxiii, 8). The first passage presents one difficulty, upon which the Sept. and Vulg. throw no light, in the mention of Assyria. If, however, we compare it with later places, we find **בְּאַרְצָהּ אֲשׁוּרָה** here remarkably like **בְּאַרְצָהּ שׁוּרָה** in 1 Sam. xxvii, 8, and **בְּאַרְצָהּ שׁוּרָה** in xv, 7, as if the same phrase had been originally found in the first as a gloss; but it may have been there transposed, and have originally followed the mention of Havilah. In the notices of the Amalekitish and Ishmaelitic region, in which the latter succeeded the former, there can be no question that a strip of Northern Arabia is intended, stretching from the Isthmus of Suez towards, and probably to, the Persian Gulf. The name of the wilderness may perhaps indicate a somewhat southern position. Shur may thus have been a fortified town east of the ancient head of the Red Sea, but in the hands of the Arabs, or at one time the Philistines, not of the Egyptians. From its being spoken of as a limit, it was probably the last Arabian town before entering Egypt. The hieroglyphic inscriptions have not been found to throw any light upon this question. The *Shara* or *Shala* mentioned in them is an important country, perhaps Syria.

According to recent authorities the "Wilderness of Shur" is substantially identical with the modern desert *el-Jifar*, which extends between the Red Sea and the Mediterranean from Pelusium to the south-west borders of Palestine (Rosenmüller, *Alterth.* iii, 241 sq.). It consists of white shifting sand (yet see Schubert, ii, 273), has very little signs of habitations, and is some seven days' journey across. The simple word Shur evidently designates, in general, a high ridge running north and south in the form of a high wall, according to the meaning of the word *before*, i. e. on the east side of Egypt (Gen. xxv, 18; Exod. xv, 22). This can be no other than the high range to the east of Suez, the continuation of the great chain of Jebel et-Tih northward towards the Mediterranean, forming a sharp ridge or a high wall as seen from a distance east and west, and a grand barrier on the east side of Egypt and to the west of the great plain in the interior of the wilderness called Desert et-Tih. There is no other range whatever of the kind between Egypt and the interior of the wilderness (see Palmer, *Desert of the Exodus*, p. 44). This must be, therefore, the Wilderness of Shur. It is called by the Egyptians, and those who live to the west of it, *Jebel er-Rahah*, or the Mountain of Rahah. But (according to some travellers) by the Arabs of the interior of the wilderness, on the east side of the range, it is called *Jebel es-Sûr*, or the Mountain of Shur.

Shuriasawarnen, in Hindû mythology, is a devotee now living, who is destined to become the ruler of the great age which shall follow upon the present, over which Vaivassada presides. In that age Vishnu will appear in his tenth Avatar.

Shurtleff, WILLIAM, a Congregational minister of Portsmouth, N. H., who died in 1747, aged about sixty. He published a number of *Sermons* and two or three religious pamphlets (1726-41). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Shurtliff, ASAPH, a minister of the Methodist Episcopal Church, came from Canada while yet a young man, and settled in Easton, Washington Co., N. Y. There he united with the Church, and was for many years an active and useful local preacher. In 1853 he was received into the Troy Conference, and served as a travelling preacher for eleven years. In 1864 he took a supernumerary relation, in which, and that of a superannuate, he continued until his death, in Easton, N. Y., Feb. 3, 1873. See *Minutes of Annual Conferences*, 1873, p. 68.

Shushan. See LILY.

Shu'shan (Heb. *Shushan'*, שׁוּשָׁן; Sept. Σουσάν and Σούσα; Vulg. *Susa*), or SUSA, one of the most im-

portant towns in the East, in which the kings of Persia had their winter residence (Dan. viii, 2; Neh. i, 1; Esth. i, 2, 5). It is said to have received its name from the abundance of the lily (*Shushân*, or *Shushânâh*) in its neighborhood (Athen. xii, 513). In the following account we collect the archæological information on this subject.

I. *History*.—Susa was originally the capital of the country called in Scripture Elam, and by the classical writers sometimes Cissia (*Κισσία*), sometimes Susis, or Susiana. See ELAM. Its foundation is thought to date from a time anterior to Chedorlaomer, as the remains found on the site have often a character of very high antiquity. The first distinct mention of the town that has been as yet found is in the inscriptions of Ashur-bani-pal, the son and successor of Esar-haddon, who states that he took the place, and exhibits a ground-plan of it upon his sculptures (Layard, *Nin. and Bab.* p. 452, 453). The date of this monument is about B.C. 660. We next find Susa in the possession of the Babylonians, to whom Elam had probably passed at the division of the Assyrian empire made by Cyaxares and Nabopolassar. In the last year of Belshazzar (B.C. 536), Daniel, while still a Babylonian subject, is there on the king's business, and "at Shushan in the palace" sees his famous vision of the ram and he-goat (Dan. viii, 2). The conquest of Babylon by Cyrus transferred Susa to the Persian dominion; and it was not long before the Achæmenian princes determined to make it the capital of their whole empire and the chief place of their own residence. According to some writers (Xenoph. *Cyrop.* viii, 6, 22; Strabo, xv, 3, 2), the change was made by Cyrus; according to others (Ctesias, *Pers. Exc.* 9; Herod. iii, 30, 65, 70), it had at any rate taken place before the death of Cambyses; but, according to the evidence of the place itself and of the other Achæmenian monuments, it would seem most probable that the transfer was really the work of Darius Hystaspis, who is found to have been (as Pliny says, *H. N.* vi, 27) the founder of the great palace there—the building so graphically described in the book of Esther (i, 5, 6). The reasons which induced the change are tolerably apparent. After the conquest of Babylonia and Egypt, the western provinces of the empire had become by far the most important, and the court could no longer be conveniently fixed east of Zagros, either at Ecbatana (Hamadân) or at Pasargadæ (Murgaub), which were cut off from the Mesopotamian plain by the difficulty of the passes for fully one half of the year. Not only were the passes difficult, but they were in the possession of semi-independent tribes, who levied a toll on all passengers, even the Persian kings themselves (Strabo, xv, 3, 4). It was necessary to find a capital west of the mountains, and here Babylon and Susa presented themselves, each with its peculiar advantages. Darius probably preferred Susa, first, on account of its vicinity to Persia (*ibid.* xv, 3, 2); secondly, because it was cooler than Babylon, being nearer the mountain-chain; and, thirdly, because of the excellence of the water there (*Geograph. Journ.* ix, 70). Susa accordingly became the metropolis of Persia, and is recognised as such by Æschylus (*Pers.* 16, 124, etc.), Herodotus (v, 25, 49, etc.), Ctesias (*Pers. Exc.* passim), Strabo (xv, 3, 2), and almost all the best writers. The court must have resided there during the greater part of the year, only quitting it regularly for Ecbatana or Persepolis in the height of summer, and perhaps sometimes leaving it for Babylon in the depth of winter (see Rawlinson, *Herod.* iii, 256). Susa retained its pre-eminence to the period of the Macedonian conquest, when Alexander found there above twelve millions sterling and all the regalia of the Great King (Arrian, *Exp. Alex.* iii, 16). After this it declined. The preference of Alexander for Babylon caused the neglect of Susa by his successors, none of whom ever made it their capital city. We hear of it once only in their wars, when it falls into the power of Antigonus (B.C. 315), who obtains treasure

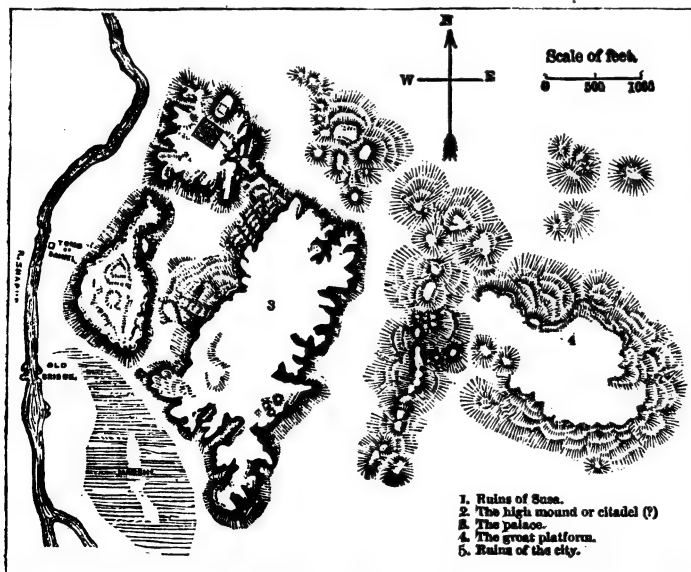

there to the amount of three millions and a half sterling (Diod. Sic. xix, 48, 7). Nearly a century later (B.C. 221) Susa was attacked by Molo in his rebellion against Antiochus the Great. He took the town, but failed in his attempt upon the citadel (Polyb. v, 48, 14). We hear of it again at the time of the Arabian conquest of Persia, when it was bravely defended by Hormuzan (Loftus, *Chaldaea and Susiana*, p. 344).

II. *Position, etc.*—A good deal of uncertainty has existed concerning the position of Susa. While most historians and comparative geographers (Rennel, *Geog. of Herodotus*; Kinneir, *Mem. Pers. Empire*; Porter [K.], *Travels*, ii, 4, 11; Ritter, *Erkunde Asiens*, ix, 294; *Pictorial Bible*, on Dan. viii, 2) have inclined to identify it with the modern *Sus*, or *Shush*, which is in lat. $32^{\circ} 10'$, long. $48^{\circ} 26'$ east from Greenwich, between the Shapur and the river of Dizful, there have not been wanting some (Vincent, *Commerce and Navig. of the Ancients*; Von Hammer, in *Mem. of the Geog. Soc. of Paris*, ii, 320 sq., 333 sq.) to maintain the rival claims of *Shuster*, which is situated on the left bank of the Kurran, more than half a degree farther to the eastward. A third candidate for the honor has even been started, and it has been maintained with much learning and ingenuity that *Susan*, on the right bank of the same stream, fifty or sixty miles above Shuster, is, if not the Susa of the Greeks and Romans, at any rate the Shushan of Scripture (*Geogr. Journ.* ix, 85). But a careful examination of these several spots has finally caused a general acquiescence in the belief that *Sus* alone is entitled to the honor of representing at once the scriptural Shushan and the Susa of the classical writers (see Loftus, *Chaldaea and Susiana*, p. 338; Smith, *Dict. of Geog.* s. v.; Rawlinson, *Herod.* iii, 254). The difficulties caused by the seemingly confused accounts of the ancient writers, of whom some place Susa on the Choaspes (Herod. v, 49, 52; Strabo, xv, 3, 4; Q. Curt. v, 2), some on the Eulæus (Arrian, *Exp. Al.* vii, 7; Ptolem. vi, 3; Pliny, *H. N.* vi, 27), have been removed by a careful survey of the ground; and it thus appears that the Choaspes (Kerkhah) originally bifurcated at Pai Pul, twenty miles above Susa, the right arm keeping its present course, while the left flowed a little to the east of Sus, and absorbing the Shapur about twelve miles below the ruins, flowed on somewhat east of south and joined the Karûn (Pasitigris) at Ahwaz. The left branch of the Choaspes was sometimes called by that name, but more properly bore the

appellation of Eulæus (Ulai of Daniel). Susa thus lay between the two streams of the Eulæus and the Shapur, the latter of which, being probably joined to the Eulæus by canals, was reckoned a part of it; and hence Pliny says that the Eulæus *surrounded* the citadel of Susa (*loc. cit.*). At the distance of a few miles east and west of the city were two other streams—the Coprates, or river of Dizful, and the right arm of the Choaspes (the modern Kerkhah). Thus the country about Susa was most abundantly watered; and hence the luxuriance and fertility remarked alike by ancient and modern authors (Athen. xii, 513; *Geograph. Journ.* ix, 71). The Kerkhah water was, moreover, regarded as of peculiar excellence; it was the only water drunk by the Great King, and was always carried with him on his journeys and foreign expeditions (Herod. i, 188; Plutarch, *De Exil.* ii, 601, D; Athen. *Deipn.* ii, 171, etc.). Even at the present day it is celebrated for its lightness and purity, and the natives prize it above that of almost all other streams (*Geogr. Journ.* ix, 70, 89).

On this site there are extensive ruins, stretching, perhaps, twelve miles from one extremity to the other, and consisting, like the other ruins of this region, of hillocks of earth and rubbish covered with broken pieces of brick and colored tile. At the foot of these mounds is the so-called Tomb of Daniel, a small building erected on the spot where the remains of that prophet are locally believed to rest. It is apparently modern; yet nothing but the belief that this was the site of the prophet's sepulchre could have led to its being built in the place where it stands (Malcolm, *Hist. of Persia*, i, 255, 256); and it may be added that such identifications are of far more value in these parts, where occasion for them is rare, than among the crowded "holy places" of Palestine. The city of Shus is now a gloomy wilderness infested by lions, hyenas, and other beasts of prey.

III. *General Description of the Ruins.*—The ruins of Susa cover a space about 6000 feet long from east to west, by 4500 feet broad from north to south. The circumference of the whole, exclusive of outlying and comparatively insignificant mounds, is about three miles. According to Mr. Loftus, "the principal existing remains consist of four spacious artificial platforms distinctly separate from each other. Of these the western mound is the smallest in superficial extent, but considerably the most lofty and important. . . . Its highest point is 119 feet above the level of the Shapur (Shapur). In form it is an irregular obtuse-angled triangle, with

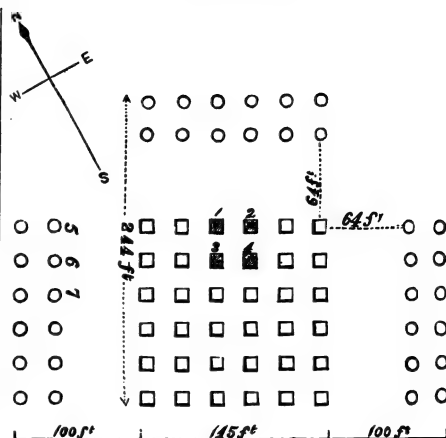

Plan of the Ruins of Susa.

its corners rounded off and its base facing nearly due east. It is apparently constructed of earth, gravel, and sun-dried brick, sections being exposed in numerous ravines produced by the rains of winter. The sides are so perpendicular as to be inaccessible to a horseman except at three places. The measurement round the summit is about 2850 feet. In the centre is a deep, circular depression, probably a large court, surrounded by elevated piles of buildings, the fall of which has given the present configuration to the surface. Here and there are exposed in the ravines traces of brick walls which show that the present elevation of the mound has been attained by much subsequent superposition" (*Chaldaea and Susiana*, p. 343). Mr. Loftus regards this mound

as indubitably the remains of the famous citadel (*ἄκρα* or *ἀκρόπολις*) of Susa so frequently mentioned by the ancient writers (Herod. iii, 68; Polyb. v, 48, 14; Strabo, xv, 3, 2; Arrian, *Exp. Al.* iii, 16, etc.). "Separated from the citadel on the west by a channel or ravine, the bottom of which is on a level with the external desert, is the great central platform, covering upwards of sixty acres (No. 3 on the plan). The highest point is on the south side, where it presents generally a perpendicular escarpment to the plain and rises to an elevation of about 70 feet; on the east and north it does not exceed 40 or 50 feet. The east face measures 3000 feet in length. Enormous ravines penetrate to the very heart of the mound" (Loftus, p. 345). The third platform (No. 2 on the plan) lies towards the north and is "a considerable square mass," about 1000 feet each way. It abuts on the central platform at its north-western extremity, but is separated from it by "a slight hollow," which was, perhaps, an ancient roadway (*ibid.*). These three mounds form together a lozenge-shaped mass, 4500 feet long and nearly 3000 feet broad, pointing in its longer direction a little west of north. East of them is the fourth platform, which is very extensive, but of much lower elevation than the rest (No. 4 on the plan). Its plan is very irregular: in its dimensions it about equals all the rest of the ruins put together. Beyond this eastern platform a number of low mounds are traceable, extending nearly to the Dizful river; but there are no remains of walls in any direction, and no marks of any buildings west of the Shapur. All the ruins are contained within a circumference of about seven miles (*Geograph. Journ.* ix, 71). See Plumptre, *Bible Educator*, iii, 105.

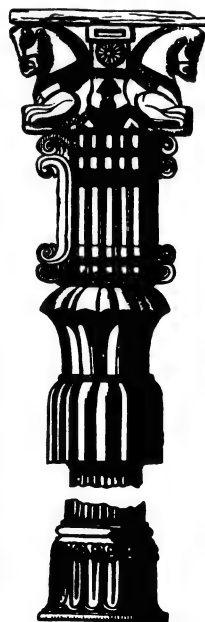

IV. *Architectural Character.*—The explorations undertaken by general, now Sir Fenwick, Williams of Kars in the mounds at Susa, in the year 1851, resulted in the discovery of the bases of three columns, marked 5, 6, 7 on the following plan. These were found to be twenty-seven feet six inches apart from centre to centre; and as they were very similar to the bases of the great hall known popularly as the Chel Minar at Persepolis, it was assumed that another row would be found at a like distance inwards. Holes were accordingly dug, and afterwards trenches driven, without any successful result, as it happened to be on the spot where the walls originally stood, and where no columns, consequently, could have existed. Had any trustworthy restoration of the Persepolitan hall been published at that time, the mistake would have been avoided; but as none then existed, the opportunity was nearly lost for our becoming acquainted with one of the most interesting ruins connected with Bible history which now exist out of Syria. Fortunately, in the following year Mr. Loftus resumed the excavations with more success, and ascertained the position of all the seventy-two columns of which the original building was composed. Only one base had been entirely removed, and as that was in the midst of the central phalanx its absence threw no doubt on any part of the arrangement. On the bases of four of the columns thus uncovered (shaded darker on the plan, and numbered 1, 2, 3, 4) were found trilingual inscriptions in the languages adopted by the Achæmenian kings at Behistun and elsewhere, but all were so much injured by the fall of the superincumbent mass that not one was complete, and, unfortunately, the Persian text, which could have been read with most certainty, was the least perfect of any. Notwithstanding this, Mr. Edwin Norris, with his usual ingenuity, by a careful comparison of the whole, made out the meaning of the first part certainly, of the latter half with very tolerable precision. As this inscription contains nearly all we know of the history of this building, we quote it entire from *Journ. As. Soc.* xv, 162: "Says Artaxerxes (Mnemon), the great king, the king of kings, the king of the country, the king of the earth, the son of king Darius—Darius was the son of king Artaxerxes—Artaxerxes was the son of Xerxes—Xerxes

Plan of the Great Palace at Susa.

es was the son of king Darius—Darius was the son of Hystaspes the Achæmenian—Darius my ancestor anciently built this temple, and afterwards it was repaired by Artaxerxes my grandfather. By the aid of Ormazd I placed the effigies of Tanaites and Mithra in this temple. May Ormazd, Tanaites, and Mithra protect me, with the other gods, and all that I have done."

The bases uncovered by Mr. Loftus were arranged as on the second plan above, and, most fortunately, it is found on examination that the building was an exact counterpart of the celebrated Chel Minar at Persepolis. They are, in fact, more like each other than almost any other two buildings of antiquity, and consequently what is wanting in the one may safely be supplied from the other, if it exists there. Their age is nearly the same, that at Susa having been commenced by Darius Hystaspis, that at Persepolis—if one may trust the inscription on its staircase (*Journ. As. Soc.* x, 326)—was built entirely by Xerxes. Their dimensions are practically identical, the width of that at Susa, according to Mr. Loftus, being 345 feet, the depth north and south 244. The corresponding dimensions at Persepolis, according to Flandin and Coste's survey, are 357.6 by 254.6, or from 10 to 12 feet in excess; but the difference may arise as much from imperfect surveying as from any real discrepancy. The number of columns and their arrangement are identical in the two buildings, and the details of the architecture are practically the same so far as they can be made out. But as no pillar is standing at Susa, and no capital was found entire or nearly so, it is not easy to feel quite sure that the annexed restoration is in all respects correct. It is reduced from one made by Mr. Churchill, who accompanied Mr. Loftus in his explorations. If it be correct, it appears that the great difference between the two buildings was that double bull capitals were used in the interior of the central square hall at Susa, while their use was appropriately confined to the porticos at Persepolis. In other respects the height of the

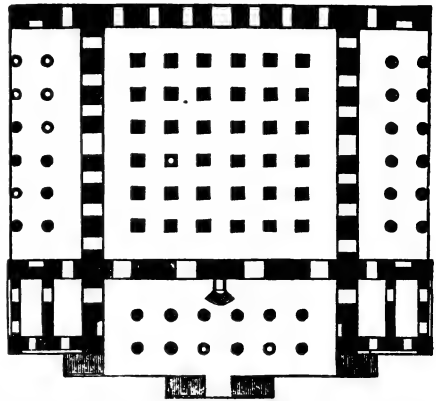

Restored Elevation of Capital at Susa.

capital, which measures 28 feet, is very nearly the same, but it is fuller, and looks somewhat too heavy for the shaft that supports it. This defect was to a great extent corrected at Persepolis, and may have arisen from those at Susa being the first translation of the Ninevite wooden original into stone architecture. The pillars at Persepolis vary from 60 to 67 feet in height, and we may therefore assume that those at Susa were nearly the same. No trace of the walls which enclosed these pillars was detected at Susa, from which Mr. Loftus assumes, somewhat too hastily, that none existed. As, however, he could not make out the traces of the walls of any other of the numerous buildings which he admits once existed in these mounds, we ought not to be surprised at his not finding them in this instance.

Fortunately, at Persepolis sufficient remains still exist to enable us to supply this hiatus, though there also sun-burnt brick was too much used for the walls, and if it were not that the jambs of the doors and windows were generally of stone, we should be as much at a loss there as at Susa. The annexed wood-cut, representing the plan of the hall at Persepolis, is restored from data so complete as scarcely to admit of doubt with regard to any part, and will suffice to explain the arrangement of both (see Fergusson, *The Palaces of Nineveh and Persepolis Restored* [Lond. 1851]). Both buildings consisted of a central hall, as nearly as may be 200 feet square, and consequently, so far as we know, the largest interior of the ancient world, with the single exception of the great hall at Karnak, which covers 58,300 square feet, while this only extends to 40,000. Both the Persian halls are supported by 36 columns, upwards of 60 feet in height, and spaced equidistant from one another at about 27 feet 6 inches from centre to centre. On the exterior of this, separated from it by walls 18 feet in thickness, were three great porches, each measuring 200 feet in width by 65 in depth, and supported by 12 columns whose axes were coincident with those of the interior. These were, beyond doubt, the great audience halls of the palace, and served the same purposes as the House of the Forest of Lebanon in Solomon's palace, though its dimensions were somewhat different—150 feet by 75. These porches were also identical, so far as use and arrangement go, with the throne-rooms in the palaces of Delhi or Agra, or those which are used at this day in the palace at Ispahan. The western porch would be appropriate to morning ceremonies, the eastern to those of the afternoon. There was no porch, as we might expect in that climate, to the south, but the principal one, both at Susa and Persepolis, was that which faced the north with a slight inclination towards the east. It was the throne-room *par excellence* of the palace, and an inspection of the plan will show how easily, by the arrangement of the stairs, a whole army of courtiers or of tribute-bearers could file before the king without confusion or inconvenience. The bas-reliefs in the stairs at Persepolis in fact represent permanently the procession which on great festivals took place upon their steps; and a similar arrangement of stairs was no doubt to be found at Susa when the palace was entire. It is by no means so clear to what use the central hall was appropriated. The inscription quoted above would lead us to suppose that it was a temple, properly so called, but the sacred and the secular functions of the Persian kings were so intimately blended together that it is impossible for us to draw a line anywhere, or to say how far "temple cella" or "palace hall" would be a correct designation for this part of the building. It probably was used for all great semi-religious ceremonies, such as the coronation or enthronization of the king, at such ceremonies as returning thanks or making offerings to the gods for victories—for any purpose, in fact, requiring more than usual state or solemnity; but there seems no reason to suppose it ever was used for purely festal or convivial purposes, for which it is singularly ill suited.

From what we know of the buildings at Persepolis,

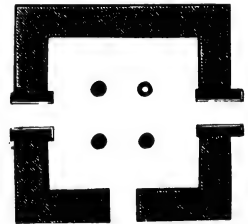

Restored Plan of Great Hall of Xerxes at Persepolis.
(Scale 160 feet to an inch.)

we may assert, almost with certainty, that the "King's Gate," where Mordecai sat (Esth. ii, 21), and where so many of the transactions of the book of Esther took place, was a square hall (see cut below), measuring probably a little more than 100 feet each way, and with its roof supported by four pillars in the centre, and that this stood at a distance of about 150 or 200 feet from the front of the northern portico, where its remains will probably now be found when looked for. We may also

be tolerably certain that the inner court, where Esther appeared to implore the king's favor (Esth. v, 1), was the space between the northern portico and this square building, the outer court being the space between the "King's Gate" and the northern terrace wall. We may also predicate with tolerable certainty that the "Royal House" (i, 9) and the "House of the Women" (ii, 9, 11) were situated behind this great hall to the southward, or between it and the citadel, and had a direct communication with it either by means of a bridge over the ravine, or a covered way underground, most probably the former. There seems also no reasonable doubt that it was in front of one of the lateral porticos of this building that king Ahasuerus (Xerxes) "made a feast unto all the people that were present in Shushan the palace, both unto great and small, seven days, in the court of the garden of the king's palace; where were white, green, and blue hangings, fastened with cords of fine linen and purple to silver rings and pillars of marble: the beds were of gold and silver upon a pavement of red, and blue, and white, and black marble" (Esth. i, 5, 6). From this it is evident that the feast took place, not in the interior of any hall, but out of doors, in tents erected in one of the courts of the palace, such as we may easily fancy existed in front of either the eastern or the western porch of the great central building.

The whole of this great group of buildings was raised on an artificial mound, nearly square in plan, measuring about 1000 feet each way, and rising to a height apparently of 50 or 60 feet above the plain. As the principal building must, like those at Persepolis, have had a *talur*, or raised platform [see TEMPLE], above its roof, its height could not have been less than 100 or 120 feet, and its elevation above the plain must consequently have been 170 or 200 feet. It would be difficult to conceive anything much grander in an architectural point of view than such a building, rising to such a height out of a group of subordinate palace-buildings, interspersed with

Restored Plan of the "King's Gate" at Palace of Persepolis.
(Scale 100 feet to an inch.)

trees and shrubs, and the whole based on such a terrace, rising from the flat but fertile plains that are watered by the Euleus at its base. See PERSIA.

Shu'shan-e'duth (Heb. *Shushan' Eduth'*, שֻׁשָׁן עֲדוּת), an expression occurring in the phrase "To the chief musician upon Shushan-eduth," which is plainly a musical direction, whatever else may be obscure about it (Psa. lx, title). In Psa. lxxxv we have the fuller phrase SHOSHANNIM-EDUTH, of which Rödiger regards Shushan-eduth as an abbreviation (Gesenius, *Thesaur.* p. 1385). As it now stands it denotes the lily of testimony, and possibly contains the first words of some psalm to the melody of which that to which it was prefixed was sung; and the preposition עַל, 'al (A. V. "upon") would then signify "after, in the manner of," indicating to the conductor of the Temple choir the air which he was to follow. The Sept. and Vulg. appear to have read שִׁשְׁתִּים עֲדוּת, for they render τοῖς ἀλλοιωθησομένοις and *pro his qui imutabuntur* respectively. In the Sept. עֲדוּת, *eduth*, becomes עֲדָה, *edā*, etc. There does not appear to be much support for the view taken by some (as by Joel Brill) that Shushan-eduth is a musical instrument, so called from its resemblance to a lily in shape (Simonis), or from having lily-shaped ornaments upon it, or from its six (*shésh*) strings. First, in consistency with their theory with respect to the titles of the Psalms, regards Shushan-eduth as the name of one of the twenty-four divisions of singers appointed by David, so called after a bandmaster, Shushan, and having its headquarters at Eduth, which he conjectures may be the same as Adithaim in Josh. xv, 36 (*Handb.* s. v.). As a conjecture this is certainly ingenious, but it has the disadvantage of introducing as many difficulties as it removes. Simonis (*Lex.* s. v.) connects *eduth* with the Arabic *ūd*, a lute, or kind of guitar played with a plectrum, and considers it to be the melody produced by this instrument; so that in his view Shushan-eduth indicates that the lily-shaped cymbals were to be accompanied with playing on the lute. Gesenius proposes to render *eduth* a "revelation," and hence a psalm or song revealed; but there seems no reason why we should depart from the usual meaning as above given, and we may therefore regard the words in question as a fragment of an old psalm or melody, the same in character as Aijeeth Shahar and others, which contained a direction to the leader of the choir. See PSALMS.

Shushan Gate OF THE TEMPLE AT JERUSALEM (שֻׁשָׁן חֲבִירָה, Mishna, *Chelim*, xvii, 9) was located in the eastern outer wall, being the only entrance on that side. We should naturally identify it with the present *Golden Gate*, which is evidently a Herodian structure; but this can hardly be done, as it lay in a direct line with the interior gates. See TEMPLE.

Shute, Daniel, D.D., a Unitarian minister, was born at Malden, Mass., July 19, 1722. He entered Harvard College in 1739, and graduated in 1743. In September, 1746, he accepted a call to the Third (now Second) Church in Hingham, Mass., and was ordained its pastor Dec. 10, 1746. In both the French and Revolutionary wars Mr. Shute entered warmly into the feelings of the people. In 1758 he was appointed by Gov. Pownall chaplain of Col. Joseph Williams's regiment. In 1780 he was chosen delegate to the convention to frame a constitution for the state, and in 1788 he was associated with Gen. Lincoln to represent the town in the convention of Massachusetts which ratified the Constitution of the United States. Dr. Shute relinquished his public labors in March, 1799, retaining his pastoral relation till his decease, but giving up his salary. He died Aug. 30, 1802. Dr. Shute published three *Sermons* (1767, '68, '87). See Sprague, *Annals of the Amer. Pulpit*, viii, 18.

Shute, Josias, rector of St. Mary Woolnoth, London. He suffered during the civil wars for his attachment to

Charles I, and was made archdeacon of Colchester in 1642, but died the same year. After his death appeared *Ten Sermons* (Lond. 1644, 4to):—*Judgment, or The Plague of Frogs Inflicted, Sermons*, etc. (1645, 4to):—*Sarah and Hagar, or Gen. xvi Opened in Nineteen Sermons* (1649, fol.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Shu'thalite (Heb. collectively with the art. *hash-Shuthalchi'*, שֻׁתְּחָלִי, patronymic from *Shuthelah*; Sept. ὁ Σουθαλαΐ v. r. Σουταλαΐ and Θουσαλαΐ), a designation of the descendants of SHUTHELAH (q. v.), the son of Ephraim (Numb. xxvi, 35).

Shu'telah (Heb. *Shuthe'lach*, שֻׁתְּחֶלַח, perhaps *noise of breaking* [Gesenius], or *setting* [i. e. son] of *Shelach* [Fürst], or *fresh plant* [Mühlau]; Sept. in Numb. Σουθαλά or Σουταλά v. r. Θουσαλά or Θωσουσαλά, in Chron. Σουθαλά v. r. Σωθαλέ and Σωθαλάζ), the name of two Ephraimites.

1. First named of the three sons of Ephraim, but not father of Eran (Numb. xxvi, 35, 36), through whom he became the progenitor of a family that bore both their names (1 Chron. vii, 20). B.C. post 1856 and ante 1802. See BERED.

2. A descendant of the preceding, being the son of Zabab and the father of Ezer and Elead (1 Chron. vii, 21). B.C. apparently post 1618.

Shuttle. See WEAVER.

Shuttleworth, Philip Nicholas, D.D., an English clergyman, was born at Kirkham, Lancashire, in 1782. He was educated at Winchester, and thence elected scholar of New College, Oxford, in 1800. He became rector of Foxley, Wiltshire, in 1824; tutor of his college, and in 1820 proctor of Oxford; warden of New College in 1822; bishop of Chichester in 1840. He died in 1842. His published works consist of *Sermons on some of the Leading Principles of Christianity* (Lond. 2 vols. 8vo; vol. i, 1827; 2d ed. 1829; vol. ii, 1834; 3d ed. of both, 1840, 2 vols. 8vo):—*Paraphrastic Translation of the Apostolical Epistles* (Oxf. 1829, 8vo; 5th ed. 1854):—*Consistency of the Whole Scheme of Revelation, etc.* (Lond. 1832, 12mo):—*Sermons before the University of Oxford* (ibid. 1840, sm. 8vo). See Darling, *Cyclop. Bibliog.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Si'a (Heb. *Siá*, סִיאָ, *congregation*; Sept. Σαΐά v. r. Ἀσσία, etc.), one of the family heads of the Nethinim whose "children" returned from the captivity with Zerubbabel (Neh. vii, 47). B.C. ante 536. In the parallel passage (Ezra ii, 44) the name is written ΣΙΑΙΑ (q. v.).

Si'aha (Heb. *Siahá*, סִיחָא, *congregation*; Sept. Σαΐά v. r. Ἀσαά, etc.), one of the chief Nethinim (Ezra ii, 44); elsewhere (Neh. vii, 47) called ΣΙΑ (q. v.).

Siam (meaning in Malay *the brown race*) is called by its people *Muang T'hai*, "the kingdom of the free." i. e. free from the superstitions of the Brahmins. It is the chief kingdom of the peninsula called Indo-China, or Farther India. Siam proper occupies the middle portion of the peninsula, with all the country surrounding the Gulf of Siam, and stretches between lat. 4° and 22° N., and between long. 97° and 106° E. Its greatest length is 1350 miles, its breadth 450 miles, while its area is estimated at from 190,000 to 300,000 square miles (probably the latter estimate is nearly correct), with a population of between 5,000,000 and 6,000,000.

I. *Soil, Climate, etc.*—A considerable portion of Siam is covered with mountains and hills. Two mountain ranges, extending mainly south-east from the Himalaya, form general natural divisions from China on the north, and partly from Anam on the east, and Burmah and British India on the west. A third range passes through the central regions, and in this is situated the P'hra Bat, or mountain of "the sacred foot" of Buddha. The great river of the country is called by foreigners

Menam, or Meinam, and is the Nile of Siam. Its annual inundation commences in June and ends in November, and the area of land thus fertilized is upwards of 22,000 square miles. The coast-line may be roughly estimated at 1100 miles, with several excellent harbors. The seasons are two: the wet or hot, and the dry or cool. The former begins near the middle of March, the latter in October. Siam is rich in natural productions. Rice, sugar, pepper, cotton, and hemp are the staple products. There are also many valuable articles procured from the forests—gutta-percha, lac, dammar, costly woods, etc. The animal kingdom is very varied, furnishing rhinoceroses, tigers, leopards, bears, otters, musks, civets, wild hogs, monkeys, deer, and elephants, especially the white elephant.

II. *Inhabitants and Government.*—The Siamese are mainly of Mongolian type, but there is much reason to suppose that they are closely allied to the great Indo-European race. According to the researches of the late king, out of 12,800 Siamese words more than 5000 are found to be Sanscrit, or to have their root in that language, and the rest in the Indo-European tongue. Besides the Siamese, a great variety of races inhabit the territories of Siam, as the Chinese, Cambodians, etc. According to the French consul at Bangkok, Garnier (1874), the population of Siam proper and its Laos dependencies is composed of 1,800,000 Siamese, 1,500,000 Chinese, 1,000,000 Laos, 200,000 Malays, 50,000 Cambodians, 50,000 Peguans, 50,000 Karens, and others. The Siamese proper are gentle, timid, careless, indolent, and yet peaceable and polite. Most of the business is in the hands of the Chinese. Marriage takes place as early as eighteen for males and fourteen for females, without the aid of priest or magistrate, though the former may be present to offer prayers. The number of wives, ordinarily one, may, among the wealthy, reach scores and hundreds, but the first is the wife proper, to whom the rest are subject. Eighty or ninety per cent. of the males can read, a limited education being gratuitously furnished at the temples.

The government is theoretically a duarchy, practically a monarchy, for although there is a second or vice king, the first or senior king is actual sovereign. The crown is hereditary, and is bequeathed, with the sanction of the nobles, to any son of the queen. The second king seems to occupy the place of first counselor, and is invariably consulted before taking any important step. The council of state comprises the first king (as president); the ministers, who have no vote; from ten to twenty councillors, who have to draft new laws, and from their own number elect a vice-president; and six princes of the royal house. The country is divided into forty-one provinces, each of which is governed by a *phraya*, or council of the first class.

III. *History and Religion.*—The early history of Siam is entirely unknown. In 1511 the Portuguese, after the conquest of Malacca by Albuquerque, established an intercourse with Siam. In the 16th century Siam was for many years subject to the Burmans, but recovered its independence towards the close of the century. In 1604 the Dutch established relations; in 1612 the first English vessel went to Ayathia. Towards the end of the 17th century a European adventurer, a native of the island of Cephallonia, called Phaulkon, gained the esteem of the king, and was by degrees promoted to an important office in the government. Through his persuasion an embassy was sent to Louis XIV of France, who sent two embassies to Siam in 1685 and 1687, and also a corps of 500 soldiers, who were put in possession of the fortress of Bangkok by Phaulkon. They were expelled in 1690. About 1760 the Burmans laid waste the country and took the capital, Ayathia. In 1782 the present dynasty ascended the throne, and transferred the seat of government to Bangkok. Treaties were made with the East India Company in 1822 and 1825, and with the United States in 1833.

The religion of the Siamese is Buddhism; nevertheless,

IX.—Z z

less the lower classes, and in some respects the more enlightened, are profoundly superstitious. They have peopled their world with gods, demons, and goblins. Over the "footprint of Buddha," on the Phra Bat, is built a beautiful temple, to which crowds of ardent Buddhists perform long and painful journeys, and millions of costly gifts are offered. The following account of missions is from *Appletons' Cyclopædia* (s. v.): "Missions have been carried on by the Roman Catholics, under the greatest vicissitudes, since the middle of the 16th century. The missionaries are French, and their converts were reckoned in 1872 at 10,000, in sixteen congregations. At the head of the mission is a vicar apostolic. Protestant missions date from the visits of Gützlaff, Tomlin, and Abeel, in 1828 to 1831, and properly from the settlement of Jones in 1833. Missions have been established by the American Baptist Union, and by the American Board of Commissioners for Foreign Missions; and the American Missionary Association has established several Protestant congregations, schools, and religious papers. The number of the Baptist congregations in 1874 was 154, and of Presbyterian, 38."

For literature, consult Crawford, *Embassy to Siam and Cochinchina* (Lond. 1828); Pallogoix, *Description du Royaume Thai, ou Siam* (Paris, 1854); Bowring, *Kingdom and People of Siam* (Lond. 1857); Bastian, *Reisen in Siam* (Berlin, 1867); Mrs. Leonowen, *English Governess at the Siamese Court* (Boston, 1870); M'Donald, *Siam, its Government*, etc. (Phila. 1871); Bacon, *Siam*, etc. (N. Y. 1873); Vincent, *Land of the White Elephant* (ibid. 1874).

Siamese Version. Siamese is the language spoken in the kingdom of Siam, which embraces a large portion of the peninsula of India beyond the Ganges. Formerly the language of the Siamese was called *Su-yama phasa*, the "Sa-yam language;" but since the reign of Phra Ruang, who set his country free from the yoke of Cambodia, they call themselves *T'hai*, "free," and their language *phasa T'hay* or *Tai*, "the language of the freemen." As early as the year 1810 the design of providing Siam with a version of the four Gospels was entertained by the Calcutta Auxiliary Bible Society, but it was not till the year 1846 that the translation and publication of the entire New Test. in Siamese were completed. A second edition was published in 1850. (B. P.)

Sias, SOLOMON, a minister of the Methodist Episcopal Church, was born at London, N. H., Feb. 25, 1781. He began to preach Sept. 25, 1805, and in 1806 was admitted into the New England Conference on trial. He was ordained deacon by bishop Asbury in 1806, and elder in 1810. In 1828 he took a superannuated relation, which he held, with the exception of one year, until his death at Newbury, Vt., Feb. 12, 1853. See *Minutes of Annual Conferences*, 1853, p. 222.

Sib'becai (1 Chron. xi, 29; xxvii, 11) or **Sib'bechai** (2 Sam. xxi, 18; 1 Chron. xx, 4) [some *Sibbeca'i* and *Sibbecha'i*] (Heb. *Sibbekay*, סִבְכַּי, according to Gesenius and First for סִבְכַּי, *thicket* [i. e. people] of *Jehovah*, or *Jehovah* is a *thicket* [i. e. defence]; but rather a *weaver*, for it is doubtful if the final י in such cases ever stands for the sacred name; Sept. Σοβοχαί v. r. Σεβοχα, etc.; Josephus Σοβαρχης), the eighth named of the subordinate thirty in David's guard, and eighth captain for the eighth month of 24,000 men of the king's army (1 Chron. xi, 29; xxvii, 11). B.C. 1043. He belonged to one of the principal families of Judah, the Zarhites, or descendants of Zerah, and is called "the Hushathite," probably from an ancestor by the name of Hushah (q. v.). Josephus (*Ant.* vii, 12, 2) calls him "the Hittite," but this is no doubt an error. Sibbecai's great exploit, which gave him a place among the mighty men of David's army, was his single combat with Saph, or Sippai, the Philis-

tine giant, in the battle at Gezer, or Gob (2 Sam. xxi, 18; 1 Chron. xx, 4). In 2 Sam. xxiii, 27 his name is written MEBUNNAI by a mistake of the copyist. Josephus says that he slew "many" who boasted that they were of the descent of the giants, apparently reading מִבְּנֵי רִבְיָהּ for מִבְּנֵי רִבְיָהּ in 1 Chron. xx, 4.

Sib'boleth (Heb. *Sibbo'leth*, שִׁבְבֹּלֶת, for *Shibboleth* [q. v.]; the Sept. does not represent it, the Greek having no aspirate for *s*; Vulg. *Sibboleth*), the Ephraimitish (text "Ephrathite") pronunciation of SHIBBOLETH (Judg. xii, 6).

Sibbs (or **Sibbes**), RICHARD, D.D., a learned English Puritan divine, was born at Sudbury, Suffolk, in 1577, and was educated at St. John's College, Cambridge, where he took his degree with great applause, and obtained a fellowship. Taking orders, he was chosen lecturer of Trinity Church, Cambridge, the living of which he held during the last two years of his life. He became preacher to the Society of Gray's Inn in 1618, and in 1625 was chosen master of Katherine Hall, Cambridge, which, though a Puritan, he held with little molestation until his death. Dr. Sibbs died July 5, 1635. His works are very numerous, chiefly sermons and pious treatises. An incomplete edition of these was published (Lond. 1809; Aberdeen, 1812) entitled *Sibbs's Works*. Mr. Pickering published several of his treatises (1837-38, 2 vols. 12mo), viz. *The Soul's Conflict and Victory*, etc.:—*The Inward Disquietments of Distressed Spirits*, etc.:—*The Bruised Reed and Smoking Flax*:—*The Fountain Sealed*:—and *Description of Christ*. Still later we have *Complete Works of Richard Sibbs, D.D.*, ed. by R. A. B. Grosart (Edinb. 1862, 7 vols. 8vo). Richard Baxter tells us that he in a great measure owed his conversion to *The Bruised Reed*. As a commentator, his principal work is his *Commentary on 2 Cor. i* (1655). See Chalmers, *Biog. Dict.* s. v.; Neal, *Hist. of the Puritans*, ii, 294.

Sibel, CASPAR, a learned Calvinist and active participant in the controversy of the Dutch Church with Arminianism, which eventuated in the Synod of Dort, was born near Elberfeld, June 9, 1590, and was reared in the practice of piety and study, and educated at Herborn and Leyden. When scarcely nineteen years old he assumed the pastorate of the communes Randerath and Geilenkirchen, in the duchy of Juliers, and, in the midst of the discouragements and dangers growing out of the war of succession to the ducal throne in which the country was then involved, he obtained remarkable success. A price of 3000 thalers was offered for his apprehension as one of the evangelical pastors of the neighborhood, and he thrice narrowly escaped the troops of the imperial party; but he nevertheless added three hundred and sixty adult members to his Church in the brief term of two years. In 1611 he became pastor of the military Church in the fortress of Juliers, and was again successful in adding to the strength of its membership, besides obtaining from the States-General the grant of a regular appropriation for the support of its pastor. A visitation of the plague in 1616 afforded opportunity for the display, on his part, of indomitable courage and unflagging zeal. A call to one of the churches at Nimeguen was declined by him because of the opposition raised by the other pastors of that town, who were adherents of the Remonstrant party; but the incident turned the attention of a Church in Deventer, the important metropolis of the province of Overysse, towards him, and he was installed its pastor in the autumn of 1617. In this position he spent the last thirty years of his life. His labors extended into many fields and gave evidence of the qualities which constituted his strength, e. g. a narrow orthodoxy which placed the Reformed Confession on an equal footing with the Bible, an intolerant and energetic spirit, great learning, consummate skill as a controversialist, a profound devotion to duty, and a fervent piety. He assumed charge, for a time, of an orthodox band in the town of Campen, who

were dissatisfied with the ministry of their resident Remonstrant pastors. In 1618 he was delegated to the Synod of Dort, and took an active part in its deliberations until an attack of fever compelled his return to Deventer, May 19, 1619. At the same time he evinced a lively interest in the cause of education by the direct part he took in the founding and development of a paedagogium, and subsequently of an academical gymnasium. It was by his motion that the Synod of Overysse adopted the canons laid down by the General Synod of Dort; and it was on his motion that a number of Remonstrants were suspended or expelled from their ministry by the latter authority. In the preparation of a new version of the Scriptures, as ordered by the Synod of Dort, Sibel rendered to the Church the most important service of his useful life. One of the revisers for the province of Overysse having died, he was chosen to fill the vacancy, and subsequently was made vice-secretary of the board of revisers. Eleven months—from Oct. 30, 1634, to Oct. 10, 1635—were given by the board to the final revision of the translators' work. (On the version thus prepared, see Kist en Royaard, *Archief voor Kerkelyke Geschiedenis*, pt. ii, p. 57-176.) To these varied labors must be added the constant care for the temporal welfare of numerous churches and individuals which was imposed on him by the incessant wars of the time. Sibel married Maria Klöcker, a daughter of the burgomaster of Randerath, and became the father of a daughter, Elizabeth, who was married to the pastor Lubbert Van Goo. In 1648 a stroke of paralysis compelled his retirement from active life. The magistracy of the town and the presbytery of his Church continued to him the salary and honorary rights of an active pastor, and when he died, Jan. 1, 1658, they voted an adequate pension for the support of his widow, and civil protection and guardianship for his grandson.

The productions of Sibel's pen are very numerous, and have often been published in monograph form. They contain nothing, however, of considerable importance to modern readers, and may be classed as follows: Sermons and homilies on parts of the Old-Test. Scriptures:—Sermons and homilies on sections of the New Test., and miscellaneous sermons:—Catechetical writings: *Meditat. Catecheticarum* (1646-50, four parts):—*Proleg. et Paralipomena Catechetica* (1650):—*Epitome Catechismi* (Dutch [1643]; a Latin ed. approved by classis in 1653):—A devotional manual, *Christl. Gebeder ende Dankzeggingen* (last ed. 1645; Latin ed. approved 1653):—Translations of the New Test. (Dutch, with Sibel's *Marginalia* [1640, and often]; Latin, with notes, approved by classis in 1652 and 1653):—*Fasciculus CCIV Questionum et ad illas Francisci Junii Responsionum* (not printed):—An autobiography, incomplete; it extends to 1653, in two volumes, but there is evidence that a third volume must have been written. See Herzog, *Real-Encyklop.* s. v.

Sibien, in Hindû mythology, was a prince of the children of the moon, who was father to Sandren, or Jandra, and grandfather to the rajah Darmamaden.

Sib'mah (Heb. *Sibmah*, שִׁבְמָה, *coolness*, or *fragrance* [Gesenius], balsam-place [Furst]; Sept. Σιβμᾶ v. r. in Jer. Ἀρεμμά, etc.; A. V. "Shibmah" in Numb. xxxii, 38), one of the places on the east of Jordan which were taken possession of by the tribe of Reuben (ver. 38) and rebuilt by them (Josh. xiii, 19). It is probably the same with *Shebam* (i. e. *Sebam*), named in the parallel list (Numb. xxxii, 3). It originally belonged to that section of the territory of Moab which was captured by the Amorites under Sihon (xxi, 26). From the Amorites Moses took it, and gave it to the children of Reuben (xxxii, 1 sq.). Sibmah is grouped with Heshbon and Nebo, and must, consequently, have stood near the western brow of the plateau, east of the Dead Sea. Like most of the Transjordanic places, Sibmah disappears from view during the main part of the Jewish history. We, however, gain a parting glimpse

of it in the lament over Moab pronounced by Isaiah and by Jeremiah (Isa. xvi. 8, 9; Jer. xlviii. 32). It was then famed for the abundance and excellence of its grapes. They must have been remarkably good to have been thought worthy of notice by those who, like Isaiah and Jeremiah, lived close to and were familiar with the renowned vineyards of Sorek (Isa. v. 2, where "choicest vine" is "vine of Sorek"). Its vineyards were devastated, and the town doubtless destroyed by the "lords of the heathen," who at some time unknown appear to have laid waste the whole of that once smiling and fertile district. It will be observed that these prophets speak of the city as belonging to Moab, whereas in the books of Numbers and Joshua it is enumerated among the cities of Reuben. The reason is, on the captivity of the Transjordanic tribes by the Assyrians, the Moabites returned to their ancient possessions and reoccupied their ancient cities, and among them Sibmah. See MOAB.

Sibmah seems to have been known to Eusebius (*Onomast.* s. v. "Sabama"), and Jerome (*Comment. in Isaïam*, lib. v) states that it was hardly 500 paces distant from Heshbon. He also speaks of it as one of the very strong cities (*urbes validissimæ*) of that region. From the way in which it is grouped in the Bible, it seems to have been on the south or south-west of Heshbon; but even the minute researches of De Saulcy, in his recent tour through that country, have failed to discover a trace of it. There are several nameless ruins mentioned by him and noted in his map, one or other of which may mark the site (*Voyage en Terre Sainte*, i, 277 sq.), especially *es-Sameh*, or *es-Samik*, a ruined village near Hesbân, on the north-east. It is interesting to observe, however, that around Heshbon he found traces of the vineyards for which the region was once celebrated; and that from the lips of the Bedawin both he and Tristram (*Land of Israel*, p. 535) heard the name *Neba* given to a mountain-peak a short distance south-west of Heshbon. See NĒBO.

Sibour, MARIE DOMINIQUE AUGUSTE, a French prelate, was born at St.-Paul-Trois-Châteaux (Drôme), April 4, 1792, and was educated in philosophy and theology chiefly at the seminary of Viviers. He afterwards taught the humanities in the seminary of St. Nicolas du Chardonnet at Paris. After spending a year at Rome, he was ordained priest, June 13, 1818, and on his return to Paris was attached to the parish of St. Sulpice, and next to the mission chapel. Nov. 9, 1822, he was made canon of the Cathedral of Nismes, but continued his duties as teacher till interrupted by the revolution of July, 1831, when he occupied himself with literary labors. In September, 1839, he was appointed bishop of Digne, and in October, 1848, he became archbishop of Paris, in which capacity he was noted for benevolent, patriotic, religious, and ecclesiastical labors, which made him conspicuous in both Church and State. He was assassinated Jan. 3, 1857, by a priest whom he had offended by a religious penalty. He was the author of several ecclesiastical works of local interest, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Sib'raim [many *Sibra'im*] (Heb. *Sibra'yim*, סִבְרַיִם, *twofold hope* [Gesenius], or *double hill* [Fürst]; Sept. Σαβραῖμ v. r. [ε]Ἰσραῖμ or Ἐφράμ [ἡλεαίμ]; Vulg. *Sabarim*), one of the landmarks on the northern boundary of the Holy Land, between Berothah and Hazar-hatticon, and between the boundary of Damascus and that of Hamath (Ezek. xlvii. 16). Keil (*Comment.* ad loc.) suggests that it may be identical with the ZIPHRON (q. v.) of the parallel passage (Numb. xxxiv. 9).

Sibyl (Σιβύλλα, commonly derived from Διὸς βουλή, Doric Σιὸς βόλλα, *will of Jupiter*), in Grecian and Roman mythology, etc., one of a class of inspired virgins who were believed to reveal the decrees of the gods, and to whom altars were not unfrequently erected.

The earliest sibyl was reared by the Muses themselves, and her verses were composed in hexameters, probably by the priests, who at a later period sold collections of such oracles. The number of sibyls is sometimes fixed at four, and again at ten. The former list includes the Erythræan, the Samian, the Egyptian, and the Sardinian (*Ælian, Var. Hist.* xii. 35) sibyls; the latter embraces, 1, the Babylonian, named Sabba or Sambethe, living in the days of Noah, and married to one of his sons (she foretold the Tower of Babel, Alexander's march of conquest, the advent of Christ, etc.); 2, the Libyan, a daughter of Jupiter and Lamia, the original sibyl, from whom all the others obtained the title; 3, the Delphian, born in the Temple of Apollo, and living long anterior to the Trojan war, which she foretold (there was an elder Delphian, who was a daughter of Zeus and Lamia, and also a younger Delphian [Pausan. x. 12, 1]); 4, the Italian or Cimmerian, soon after the Trojan war; 5, the Erythræan, before the fall of Troy (here, too, we find an elder and a younger one, who is called Herophile [Strabo, xiv. 645]); 6, the Samian, belonging to the time of Numa; 7, the Cumæan, who was the most noted of them all (she was consulted by Æneas before he descended into the lower world [Ovid, *Metam.* xiv. 104; xv. 712, etc.; Virgil, *Æneid*, vi. 10]; she wrote her predictions on leaves, which she arranged in the morning, but then left exposed to the winds; she is stated to have attained to the age of a thousand years); 8, the Hellespontian or Trojan, who lived in the 6th century B.C., and was buried in a temple of Apollo at Gergithum; 9, the Phrygian; and, 10, the Tiburtine, whose name was Albunea. Pausanias also mentions a Hebrew sibyl of the name of Sabbe, who is called a daughter of Berosus and Erymanthe. All these sibyls are more or less identified with each other, and their respective oracles cannot be determined. Modern researches have shown that the belief in sibyls cannot well be traced back to historical personages, but must instead be assumed to have sprung from the observation of natural phenomena, such as sounds heard in caverns, forests, etc. The belief was afterwards employed to serve the purposes of deceivers, statesmen, etc. See Bernhardt, *Griech. Lit.* ii. 249 sq.; Herrmann, *Gottesdienstl. Alterthümer d. Griechen*, § 37; Klausen, *Æneus*, i. 201 sq.; Müller [Otfrid], *Dorier*, i. 339; and Fabricii *Bibl. Gr.* tom. i. See SIBYLLINE ORACLES.

Sibylline Oracles. The ancient sibyls were, according to the popular belief, female soothsayers or prophetesses, who frequently delivered vaticinations, especially of a threatening character, and sometimes showed how to propitiate the wrath of the gods. The most celebrated of the number was the Cumæan, concerning whom there is the following fable: Apollo, having been enamoured of her, offered to give her what she should ask. She demanded to live as many years as she had grains of sand in her hand, but unfortunately forgot to ask for continued enjoyment of health and bloom. The god granted her request, but she refused in return to listen to his suit, and her longevity, without freshness and beauty, proved rather a burden than a benefit. It was supposed that she was to live about 1300 years, and at the expiration of this period she was to wither quite away, and be converted into a mere voice (Ovid, *Metam.* 14, 104; Serv. ad Virg. *Æn.* vi. 321). She is variously called Herophile, Demo, Phenomonee, Deiphobe, Demophile, and Amalthea. She is said to have come to Italy from the East (Livy, i. 7), and she is the one who, according to most traditions, appeared before king Tarquinus, offering him the *Sibylline Books* for sale (Pliny, *H. N.* xiii. 28; Gellius, i. 19).

According to an ancient legend, the emperor Augustus Cæsar repaired to the Tiburtine sibyl, to inquire whether he should consent to allow himself to be worshipped with divine honors, which the senate had decreed to him. The sibyl, after some days of meditation, took the emperor apart and showed him an altar; and above the altar, in the opening heavens, and in a

glory of light, he beheld a beautiful virgin holding an infant in her arms, and at the same time a voice was heard saying, "This is the altar of the son of the living God;" whereupon Augustus caused an altar to be erected upon Capitoline Hill, with this inscription, *Ara Primogeniti Dei*; and on the same spot, in later times, was built the church called the *Ara Caeli*, well known, with its flight of 124 steps, to all who have visited Rome. A very rude but curious bas-relief, preserved in the church of the *Ara Caeli*, is perhaps the oldest representation extant. The Church legend assigns to it a fabulous antiquity; and it must be older than the 12th century, as it is alluded to by writers of that period. Here the emperor Augustus kneels before the Madonna and Child, and at his side is the sibyl Tiburtina, pointing upwards (Mrs. Jameson, *Legends of the Madonna*, p. 197).

I. *Lost Works*.—The so-called *Sibylline Books* of antiquity were certain writings regarded with much veneration and guarded with great care. The legend concerning them is that a sibyl (some say the Cumæan, others the Ionian) came to Tarquin II (or Tarquin the Superb) with nine books, which she offered to sell for a very high price. Tarquin refusing to purchase, the sibyl went away and burned three of the volumes. Returning, she asked the same price for the remaining six; and when Tarquin again refused to buy, she went and destroyed three more. She came once more to Tarquin demanding the same price for the three as she had for the nine. Her behavior struck the king, and upon his augurs advising him to do so, he bought the volumes. The sibyl disappeared and was never seen afterwards. The books were preserved with great care, and were called *Sibylline Verses*, etc. They were said to have been written on palm-leaves, partly in verse and partly in symbolical hieroglyphics. The public were never allowed to inspect them, but they were kept in the Temple of Jupiter Capitolinus, preserved in a stone chest. A college of priests was appointed to have charge of them. It was the duty of this college to consult these books on all occasions when the gods manifested their wrath by inflicting calamities upon the Romans. The answers which were derived from them were almost invariably of a religious nature, as they either commanded the introduction of some new worship, or the institution of new ceremonies and festivals or the repetition of old ones. In B.C. 83, the Temple of Jupiter was burned and the *Sibylline Books* consumed. In order to restore them, commissioners were appointed to visit various places in Italy, Greece, and Asia Minor, to collect any Sibylline oracles that could be found. They collected about a thousand verses, which were placed in the Temple of Jupiter, after it had been destroyed. The *Sibylline Books* were also burned in the reign of Nero, in the reign of Julian (A.D. 363), and a fourth time in that of the emperor Honorius (A.D. 395); but they were restored each time. Notwithstanding many forgeries which had crept in, they were still held in great esteem, and we find them consulted even as late as the 6th century. See Anthon, *Class. Dict.* s. v. "Sibyllæ."

II. *Extant Writings*.—It is certain, from Roman history, that Sibylline oracles were committed to writing, and that Sibylline books were preserved; and it is a well-known fact that when the conquests of Alexander and the Romans in the East brought in a period of religious syncretism, the faith of the nations in their traditional religions gave way to superstitions of every form, and was replaced no less by an interest in prophecies of every sort than by an inclination to the practice of secret arts. It is not strange, accordingly, that traces are found of a Chaldee and a Babylonian and even of a Hebrew sibyl. When Christianity began to assail heathenism with literary weapons, the belief in sibyls was wide-spread and general, and numerous professed oracles were in circulation. Nor was Christendom itself disinclined to accept the popular belief upon this subject, or to turn that belief to its profit. The theologians and writers of the earliest pe-

riod are especially open to this charge, e. g. Justin, Athenagoras, Theophilus, and Clemens Alexandrinus. So general was the appeal to the Sibylline oracles among these writers that their antagonist Celsus terms them friends, or even manufacturers, of the sibyls (συνβουλοισι, Origen, *Cont. Celsum*, v. 61). The tendency was less apparent in the Western Church, though Lactantius makes more extended and reckless use of this form of argument than does any other writer in either Church; and the writings of Tertullian, Jerome, and Augustine are not free from favorable mention of the *Sibylline Books*. See Besançon, *De l'Emploi que les Pères de l'Eglise ont fait des Oracles Sibyllins* (1851).

1. *History of the Text*.—The Greek text of the *Sibyllines* was lost from sight during the Middle Ages, and it was reserved for certain humanists of the 16th century to unearth a number of manuscripts and publish their contents to the world. The oracles are in each edition divided into eight books, but the text is everywhere exceedingly corrupt, and even marred by arbitrary emendations. The earliest critical editions date from the beginning of our century, e. g. that of cardinal Mai (1817 and 1828), and subsequently appeared those of Alexandre (Paris, 1841) and Friedlieb (Leipsic, 1852). The number of manuscripts thus far recovered amounts to scarcely a dozen, and they have not yet been fully examined. They exhibit great divergencies of both text and arrangement; the language and versification are not everywhere governed by the same standards—the language and even the phrases of Homer, Hesiod, Euripides, and Pseudo-Orpheus being contained in them, and no less those of the Septuagint and of the New Test. If to these considerations we add that entire sections are wanting from some manuscripts, and that whole sections have been added in others, and also that the numerous citations in the Church fathers from the *Sibyllines* afford no aid towards a settling of the text, it will be apparent that definite results in this field are scarcely to be expected. See Thorlacius, *Libri Sibyl. Veteris Ecclesie* (Copenh. 1815); Volkmann, *De Orac. Sibyl.* (Lips. 1853); Friedlieb, *De Codd. Sibyl.* (Bremen, 1847); Floder, *Vestigia Homer, et Hesiod, in Orac. Sib.* (Ups. 1770); and other monographs cited by Volbeding, *Index Program.* p. 14.

2. *Contents*.—The results of criticism show that the *Sibylline Books* are the work of different authors, and that they originated in different countries and periods. The collection as we now have it includes:

a. *Jewish Elements*.—Scholars are generally agreed that book iii is, upon the whole, the work of an Egyptian Jew, though based somewhat on already existent heathen oracles and corrupted by Christian interpolations. The description of historical events in this book reaches to the reign of Ptolemy Physcon (B.C. 170-117), and is followed from that epoch by a fanciful forecasting of the future. To antagonize idolatry, especially under its Egyptian form, was evidently the object of the oracle, which to this end employs persuasion, historico-mythological description, and threatening prophecy—more commonly the latter, as might be supposed from the assumption of a Sibylline garb. The book enumerates successive world-powers, though not in the manner of Daniel, and foretells a period of woe which should be ended by the advent of Messiah, who will overthrow his enemies, restore Judah, and gloriously deliver the saints. There is no unity of arrangement.

Book iv belongs next in the order of chronology. It consists of not quite two hundred verses, and is complete in itself. The history of the world is traced through twelve generations, six of which are Assyrian, two Median, one Persian, and one Grecian. The eleventh covers the period of the Roman world-power, and the twelfth is the Messianic period. The events noted in the book as recent are the destruction of Jerusalem and the eruption of Vesuvius in A.D. 79; that which is most immediately impending is the return of a matricidal emperor from his exile beyond the Euphrates to

make war on Rome. The date of its composition is easy to determine from these data. No specifically Christian elements appear, and the religious bearing of the fragment upon the whole is difficult to determine. Its author was probably a Jewish Christian of the ordinary type, who had no conception of the contradiction involved in such a character.

Book v is a *cruz interpretum*. The first fifty verses recite the list of Roman emperors from Julius Cæsar to Hadrian, their names being indicated by the respective initial letters, etc. The internal evidence assigns the date of composition to the close of Hadrian's reign (A.D. 138). The description it gives of Nero as laying claim to divine honors, after he "shall have returned," indicates a Christian pen; but the Christian element is so little apparent that judicious critics regard the greater part of the book as a Jewish production. The repeated reference to Nero, the arch-enemy, seems to suggest that the author wrote in Nero's time, in which case it would become necessary to separate that portion of the book which reaches down to Hadrian, and upon this point scholars are greatly divided. The subject-matter is largely eschatological, but lacks comprehensiveness of view, so that the author or compiler deals rather with the doom of particular cities and countries than with that of the world.

b. Christian Elements.—Book vi is a brief hymn on Jesus as the Son of God, which touches on his miracles, teachings, and death, and denounces a prophetic curse on the Sodomitic land which wove for him the crown of thorns. In connection with the baptism in Jordan, it introduces the fire mentioned in ancient gospels, and presents an idea of the dove greatly at variance with the canonical idea. It has been supposed that a form of gnosis is here revealed to our notice; but the question may depend for its answer on the connecting of this fragment with book vii. The latter also contains, among apparently disconnected oracles of threatening, a number of extended hymns on Christ, in which the baptism is again particularly referred to and a peculiar philosophy connected with it (the premundane Logos clothed with flesh by the Spirit), and in which, moreover, a ritual of sacrifice is recommended (v, 76) to which the Church was an entire stranger. The only historical allusion which might afford a hint respecting the age of the books is that in which it is said that "other Persians should reign" in the time of greatest trouble (the time then current?). The reference might perhaps apply to the beginning of the Sassanid rule.

Book viii deals more extensively with ideas peculiar to Christianity than any of those described. It is composed of fragments and devoid of unity, but the first half (ver. 1-360) makes the impression of a connected whole. It begins where book v left off, and assigns to Hadrian's family three additional kings. A further reference to a king of different family (Sept. Severus), with his sons, may be a later interpolation. The book is intended to be a prophetic portrayal of the last judgment, but it includes a rehearsal of the life of Jesus, with the famous lines, thirty-four in number, which are known as the *Sibylline Acrostic* (ver. 217-250)—the initial letters forming the words *Ἰησοῦς Χριστός* (sic) *θεοῦ υἱὸς σωτὴρ σαρρῶς*. They were early recognised, e.g. by Eusebius and Augustine (*Civ. Dei*, 18, 23); but it is evident that they originated with a later hand. Neither the first nor the last of the lines is independent of the context in its structure. Lactantius cites at least one of the lines as having a different initial letter. The number of the lines is in some copies limited to twenty-seven; and the form *Χριστός* has no parallel. The less extended second half (ver. 361-501) contains nothing Sibylline in character, and is composed of fragments of Christian hymns. It is supposed to belong to the close of the 4th century.

Books i and ii are probably of later date than those already discussed. No Christian writer earlier than the 5th century quotes from them, and they are remarkable

because of the absence of all reference to Roman history. No definite fixing of their date is accordingly possible. They are distinguished by greater conformity to a settled plan than is found in the others, and doubtless owe to this quality the place they occupy at the head of the collection. The poem follows the outline of Genesis, from the creation and the fall of man, through successive generations, to Noah and the deluge. The sibyl is here introduced into the history, and is identified with Noah's daughter-in-law. After Noah the "golden age" opens, then that of the Titans, and later the Messianic. Three kings are said to reign in the golden age, who are identified by some critics with the sons of Kronos, and by others with the sons of Noah, or with the three patriarchs of early Hebrew history. The Titans are supposed to denote the entire series of heathen powers to the time of the Messiah. Book i continues the history through the destruction of Jerusalem and to the final dispersion of the Jews, while book ii deals chiefly with the last judgment. It is apparent that a portion of the poem has been lost from between the two books as they now exist, and it would seem that the loss of that section has deprived us of all hope of ascertaining the time in which these books originated; but the facts that they were wholly unknown to the Church fathers, that even the sibyllomaniac Lactantius does not mention them, and that they are free from all trace of Chiliasm compel criticism to assign their origin to a period later than that of the other books contained in the earlier collections.

c. The more recently discovered books (xi-xiv) have not yet been thoroughly weighed in the scales of criticism, and opinions with regard to them are very diverse. Their contents are as follows:

Book xi begins at the deluge and the tower of Babel, and follows the history down through the Egyptian, Persian, and Grecian dominions to the time of the Roman supremacy. In the progress of the poem Joseph and the exode are mentioned; and Homer, the Trojan war, Alexander and the Diadochi, the Ptolemies, Cleopatra, Cæsar and his successors, with their relations to Egypt, are all referred to. The book closes with a request from the sibyl for rest from the madness of inspiration, thus implying that it is the first part of a continued poem. The religious element is not made prominent, though the author was evidently acquainted with sacred history. A peculiar wealth of chronological statements and reckonings characterizes the book.

Book xii begins with the reign of Augustus, and mentions the entire succession of Cæsars, designating each individual by the numerical equivalent of his name, with the single exception of Alex. Severus. The absence of all reference to religious ideas is a very noticeable feature, though Vespasian is termed the annihilator of the righteous, and the coming of a *κρῦφος λόγος ὑψίστου* is mentioned (ver. 30 sq.), who may be the Messiah, as ver. 232 declares that in the reign of the first Roman sovereign "the world of the immortal God came upon the earth." The earliest victories of the Sassanids over the Romans are mentioned, and a repeated prayer from the sibyl for rest closes the book.

Much of the history of book xii is inexplicable to us, and the same is true of book xiii. It is fragmentary and brief, and is almost exclusively devoted to Asiatic wars, the different Roman rulers being very indefinitely described. The situation of Oriental countries during the second half of the 3d century appears to have been more familiar to the author than it can be to us. The book is like those mentioned in the absence of religious references, and closes in the usual form.

Book xiv is wholly inexplicable. Lists of emperors are given, but in such a manner as to render their identification impossible. The internal character of the book might suggest the idea that its author was an Egyptian living in the reign of Gallienus, who framed the history of the world and of the emperors in Sibylline verses, and added to it a continuation drawn from

his own resources. No religious, and especially no Messianic, interest is apparent, unless the thought at the close (that after all of conflict shall be over, the earth shall enjoy undisturbed peace) might be regarded as Messianic.

The collection and arrangement of the *Sibylline Books* were evidently the work of comparatively recent hands, and were made in the interests of Christianity. Lactantius appears to have known them only as separate poems. Most of the manuscripts contain only the first eight books, and the differences of arrangement to be observed in them would indicate that, before the entire collection was completed, certain sections had been brought together. The loss of fragments and sections was the natural result of the scattered state in which the material existed; but the date of the last revision, which preserved the books against further losses, is wholly unknown.

3. *Literature*.—In addition to works mentioned in the body of this article, see Blondel, *Des Sibylles Célèbres tant par l'Antiquité Païenne que par les S. Pères* (1649); the elder Vossius, *De Poetis Græc.* (1654); Schmid, *De Sib. Orac.* (1618); Boyle, *De Sibyllis* (1661); Nehring, *Deutsche Uebersetz. d. sibyll. Weiss.* (1702); id. *Vertheid. d. sibyll. Prophezeiungen* (1720); Vossius [Is.], *De Orac. Sibyll.* (1680); Bleek, in the *Berl. theol. Zeitschr.* 1819, pt. i and ii; Lücke, *Einkl. in d. Apokalypse* (2d ed. 1852); Ewald, *Entstehung, Inhalt u. Werth d. 14 sibyll. Bücher* (1858); Dähne, *Alexandr. Religionsphilosophie* (1834), ii, 228; Gfrörer, *Philo* (1831), ii, 121 sq.; Hilgenfeld, *Jüd. Apokal. in ihrer gesch. Entwicklung* (1857), p. 51 sq.; Thorlacius, *Doctr. Christ. in Sibyl. Libr.*, in the *Misc. Hæft.* 1816, vol. i; Terry, *The Sibylline Oracles* (N. Y. 1890).

Sibyllists, a name of reproach given, in early times, to the Christians, because in their disputes with the heathen they sometimes made use of the authority of Sibylla, their own prophetess, against them (Origen, *Cont. Celsum*, lib. v, p. 272). They urged her writings with so much advantage to the Christian cause and prejudice to the heathen that Justin Martyr (*Apol.* 2, p. 82) says the Roman governors made it death for any one to read them, or Hystaspes, or the writings of the prophets. See Bingham, *Christ. Antiq.* bk. i, ch. ii, § 6.

Sicanus, in Grecian mythology, was the son of Neptune and a nymph from whom the island of Trinacria is said to have derived its name of Sicania (later Sicily). He is sometimes represented as the father of Proserpine by Ceres.

Sicard, ROCH AMBROISE CUCURRON, *abbé of*, a French philanthropist and educator, was born at Foussemet, near Toulouse, Sept. 20, 1742, and succeeded the abbé L'Épée as master of the deaf-and-dumb school in Paris in 1789. He had two narrow escapes during the Revolution, at which epoch he joined Jauffret in publishing the *Religious, Political, and Literary Annals of France*. He wrote several works on the interesting subject which chiefly occupied his attention, and in 1800 established a printing-press for the use of his scholars. He died in 1822. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sicarii (σικαριοί, Græcized from the Lat. *sicarius*, an assassin; "robber," Acts xxi, 38; so Josephus, *Ant.* xx, 8, 6; *War*, ii, 13, 5), the special title of a band or sect of Jewish fanatics who fomented the last war with the Romans, and on the downfall of Masada retired to Egypt, where they still maintained their stubborn resistance to the Roman authority (*ibid.* vii, 10, 1). They only appear in the New Test. in the person of Judas (q. v.) of Galilee, the leader of a popular revolt "in the days of the taxing" (i. e. the census, under the prefecture of P. Sulp. Quirinus, A.D. 6, A.U.C. 759), referred to by Gamaliel in his speech before the Sanhedrim (Acts v, 37). According to Josephus (*Ant.* xviii, 1, 1), Judas was a Gaulonite of the city of Gamala, probably taking his name of Galileæan from his insurrection having had its rise in Galilee. His revolt had a theocratic

character, the watchword of which was "We have no lord nor master but God," and he boldly denounced the payment of tribute to Cæsar, and all acknowledgment of any foreign authority, as treason against the principles of the Mosaic constitution, and signifying nothing short of downright slavery. His fiery eloquence and the popularity of his doctrines drew vast numbers to his standard, by many of whom he was regarded as the Messiah (Origen, *Homil. in Luc.* xxv), and the country was for a time entirely given over to the lawless depredations of the fierce and licentious throng who had joined themselves to him. But the might of Rome proved irresistible: Judas himself perished, and his followers were "dispersed," though not entirely destroyed till the final overthrow of the city and nation.

With his fellow-insurgent Sadoc, a Pharisee, Judas is represented by Josephus as the founder of a fourth sect, in addition to the Pharisees, Sadducees, and Essenes (*Ant.* xviii, 1, 1, 6; *War*, ii, 8, 1). The only point which appears to have distinguished his followers from the Pharisees was their stubborn love of freedom, leading them to despise torments or death for themselves or their friends rather than call any man master.

The Gaulonites, as Judas's followers were called, may be regarded as the doctrinal ancestors of the Zealots and Sicarii of later days, and to the influence of his tenets Josephus attributes all subsequent insurrections of the Jews and the final destruction of the city and Temple. James and John, the sons of Judas, headed an unsuccessful insurrection in the procuratorship of Tiberius Alexander, A.D. 47, by whom they were taken prisoners and crucified. Twenty years later, A.D. 66, their younger brother, Menahem, following his father's example, took the lead of a band of desperadoes, who, after pillaging the armory of Herod in the fortress of Masada, near the "gardens of Engaddi," marched to Jerusalem, occupied the city, and after a desperate siege took the palace, where he immediately assumed the state of a king, and committed great enormities. As he was going up to the Temple to worship, with great pomp, Menahem was taken by the partisans of Eleazar the high-priest, by whom he was tortured and put to death, Aug. 15, A.D. 66 (Milman, *Hist. of the Jews*, ii, 152, 231; Josephus, *loc. cit.*; Origen, in *Matt. T.* xvii, § 25. See ZELOTES.

Sicæus, in Phœnician mythology, was the husband of Dido, queen of Carthage, whose brother Pygmalion caused him to be murdered for his treasure. The disembodied spirit revealed the place in which the treasure was concealed to the widow and bade her flee. She accordingly landed in Africa, and founded Carthage (Virgil, *Æneid*, i, 347, etc.; iv, 20, 502, etc.; vi, 474). Justin (xviii, 4) gives the name *Acerbos* to Dido's husband, and states that Pygmalion himself was the murderer; that Dido fled his kingdom in order to escape from the scene which fed her grief, and that she was obliged to use stratagem to induce her attendants to refrain from delivering her up to the king. After touching at Cyprus, the final settlement was made at Carthage.

Si'chem (an incorrect rendering [borrowed from the Vulg.] of the name elsewhere Anglicized **SHECHEM** [q. v.]) occurs in two passages of the A. V.

1. In Gen. xii, 6 the unusual expression "the place of Sichem" may perhaps indicate that at that early age the city did not exist. The "oaks of Moreh" were there, but the town of Shechem as yet was not; its "place" only was visited by the great patriarch.

2. (Ἐν Σικίμοις; Vulg. in *Sichimis*, Ecclus. 1, 26.) If there could be any doubt that the son of Sirach was alluding in this passage to the Samaritans, who lived, as they still live, at Shechem, it would be disproved by the characteristic pun which he has perpetrated on the word Moreh, the ancient name of Shechem: "That foolish people (λαὸς μωρὸς) that dwell in Sichem."

Sicilian Vespers, the name given to the insurrection of Palermo, March 31, 1282. It was at a festival on Easter-Monday that a multitude of the inhabitants of Palermo and the neighborhood had thronged to the Church of the Holy Ghost, about half a mile out of the town. The religious service was over, and amusements of all sorts were going gayly on, when a body of French soldiery appeared, under the pretext of keeping the peace. One of them offering an insult to the daughter of Roger Mastrangelo, he was immediately slain, and in the fighting which followed every one of the 200 Frenchmen present was killed. The insurrection became general; 2000 French were slain. A government was hastily formed, the towns asserted their independence, and formed a league for mutual defence, and in one month Sicily was free; the French had disappeared. See Milman, *Hist. of Latin Christianity*, ii, 155 sq.

Sicily, COUNCIL OF (*Concilium Siculum*), was held in 365 or 366 by Eustathius, bishop of Sebaste, and the Oriental deputies, who convoked the bishops of the country in order to confirm the faith as settled at Nicæa and to nullify the proceedings at Araminum. The use of the term "consubstantial" was approved, and the bishops drew up a synodal letter after the form given by pope Liberius. See Mansi, ii, 830.

Sicinus, in Grecian mythology, was a son of Thoas, king of Lemnos, and a Naiad whom he learned to love while in the island of Enoe. He colonized an island near Eubœa, which received his name. See Schol. *Ad Apollon. Rhod.* i, 624; Strabo, x, 484.

Sick, ANOINTING OF. See EXTREME UNCTION.

SICK, CARE OF, was one of the principal duties of the deaconesses (q. v.) in the apostolic age.

SICK, COMMUNION OF THE, is the celebration of the Lord's supper in a private house for the benefit of one so ill as to be unable to attend the church. Of this there are many instances in antiquity. Paulinus, bishop of Nola, caused the eucharist to be celebrated in his own chamber a few hours before his death. Gregory Nazianzen informs us that his father communicated in his own chamber; and Ambrose is said to have administered the sacrament in a private house in Rome. It has been the constant usage of the Christian Church to permit persons dangerously sick to receive the sacrament in their own homes. The Church of England has a special office for the communion of the sick.

SICK, VISITATION OF. The sick being in special need of pastoral care, and the visitation of them being enjoined by divine authority (Matt. xxv, 36; James i, 27; v, 14, 15), it is made by Christian churches a special duty of the clergy. The Church of England has a special order for it in her Book of Common Prayer. The usual office contains: 1. Supplications to avert evil, in the Salutation and short Litany. 2. Prayer to procure good things, in the Lord's Prayer and the two collects. 3. Exhortations, prescribed in the large form of Exhortation; and directions in the rubric to advise the sick man to forgive freely, etc. 4. Consolations, in the Absolution, the Prayer, etc. There are also added Extraordinary Prayers and the Manner of Administering Communion.

Sickels, WILLIAM, a Presbyterian minister, was born at Troy, N. Y., Aug. 20, 1795. He graduated at Jefferson College, Canonsburgh, Pa., in 1824, and at the theological seminary at Princeton, N. J., in 1827; was licensed by Winchester Presbytery, and ordained by the same, in 1828; and then removed West and settled at Rushville, Ind. He subsequently preached at Washington, Shiloh, Bethany, and Hopewell, within the bounds of Indianapolis Presbytery; also at Connellsville, Pleasant, and Jefferson churches in Madison Presbytery. He died in Indianapolis, Ind., Aug. 9, 1864. Mr. Sickels was an able preacher, always instructive and interesting. He

was known as a good man, a sound theologian, and a genial friend. See Wilson, *Presb. Hist. Almanac*, 1866, p. 169. (J. L. S.)

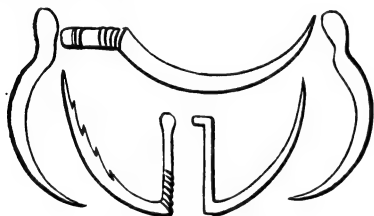

Sickingen, FRANZ VON, a noble and heroic character, living in the early period of the German Reformation, and eminent because of the relation he sustained to that movement, was born May 1, 1481, in the Castle of Ebernburg, near Kreuznach, and in his young manhood entered the armies of the emperor Maximilian, where he served until he had acquired fame and high rank as a military leader. He was likewise engaged, however, in the less legitimate minor wars between the powerful nobles of Germany, which were then so common, though his part generally consisted in protecting the weaker party and delivering the oppressed. Like others, too, of his day, he was often guilty of unnecessary violence. In 1515 he compelled the city of Worms to receive back a number of citizens and councillors who had been banished during a dispute between the magistrates and the public. He then turned his arms against the duke of Lorraine, and compelled the latter to purchase freedom from violence at the cost of fifty thousand florins and a month's pay to Sickingen's troops. Immunity from punishment for such offences was secured through the necessity of retaining Sickingen's skill and experience in the emperor's service. Maximilian died in 1519, and by that time Sickingen had become so important a personage that the candidates for the imperial throne—Francis of France and Charles of Spain and Austria—both sought to obtain his support in their behalf. He decided in favor of the latter, and when his choice was ratified and Charles became emperor, June 28, 1519, he threw himself with enthusiasm into the service of his new lord, and was made commander of the imperial armies, councillor, and chamberlain. As early as 1521 he was enabled to display his devotion to his new master in the field, under the command of count Henry of Nassau, in the abortive campaign against the Netherlands, when the successful defence of Mézières by the chevalier Bayard compelled the retreat of the invading army. Sickingen's next undertaking was intended to break down the despotism of the princes and the superciliousness of the clergy. He was chosen general leader by the nobles of the Upper Rhine, and gathered an army which he employed against the archbishop of Treves, at first with some success, but ultimately to his own injury; as the protracted siege of Treves exhausted his resources and compelled his retreat, after having irritated the allied princes—the elector-palatine, the landgrave Philip of Hesse, and the archbishop—so that they followed him to his Castle of Landstuhl, near Zweibrücken, and stormed that hold. A hostile bullet had, in the meantime, given Sickingen a mortal wound, so that he died at noon, May 7, 1523, while his chaplain was employed in ministering to him the consolations of religion. The hostile princes bowed reverently and repeated a Pater-noster for the repose of his soul. He left five sons, who were hindered from taking possession of their patrimony during nineteen years, when a compromise restored to them their own. His death made a profound impression through all Germany, and so startled Luther that he at first refused to credit the report of its occurrence, though he afterwards saw in the event a display of God's wonderful and righteous judgments. See De Wette, *Luther's Briefe*, ii, 340, 341.

Sickingen's character was unquestionably marred by the faults of the chivalry of his time; but he was distinguished by fidelity to his pledges, devotion to his friends, courageous intervention in behalf of the oppressed. He did not receive the benefits of a liberal education in his youth, but was, nevertheless, possessed of high culture when judged by the standard of his time; and he became a zealous promoter of learning and a protector of scholars. Reuchlin (q. v.) found an asylum with him in April, 1519, when the hostile forces of the Suabian League entered Stuttgart, and again when the Dominicans of Cologne were persecuting him by legal

process. Still more noteworthy is the fact that Ulrich von Hutten (q. v.) resided in the Ebernburg during two years, and was thus able to influence his former comrade to look with favor on the Wittenberg Reformer and his work. It was through the influence of Hutten that Sickingen was released from the fetters of scholasticism, and enabled to attain to a recognition of evangelical truth. Among Sickingen's guests were Caspar Aquila, Martin Bucer, John Ecolampadius, and John Schwebel (q. v.), besides others of inferior rank, in such numbers that his halls came to be known as "Inns of Righteousness." The result of the sojourn of so many reformatory spirits in the Ebernburg was apparent in the reform of the religious services in all of Sickingen's castles, which work was executed, before the expedition to Treves, by Ecolampadius. Sickingen endeavored to promote the cause of the Reformation with his pen as well as with the force of his public and private authority. A *Send-schreiben* (given in Münch, *Fr. von Sickingen*, ii, 132-139) addressed to his brother-in-law Dietrich von Handschuchshheim aims to show that the Reformation is simply a restoration of primitive Christianity, and to set forth the author's views respecting the Lord's supper, the mass, celibacy, and monasticism, the saints and images. He also wrote an *Essay* on the question "Whether it be advisable for the protesting princes of the Holy Roman Empire to conclude a universal or particular treaty of peace with the pope?" (see Jöcher, *Gelehrten-Lexikon*, iv, 569).

Herold bei Eroberung von Sickingen's Burgen*; Seckendorf, *Comment. Hist. et Apolog. de Lutheranism*o (Francf. et Lips. 1692, 4to), i; Planck, *Gesch. d. prot. Lehrbegriffs*, ii, 150 sq.; Münch, *Fr. von Sickingen's Thaten, Pläne, Freunde u. Ausgang* (Stuttg. 1827, 1828, 2 pts. [pt. ii contains the sources]); Strauss, *Ulrich von Hutten* (Leips. 1858, 1860, 3 pts.).

Sickle (חֶרֶם, *chermesh*, a reaping-hook, Deut. xvi, 9; xxiii, 25 [26]; מַגָּל, *magâl*, a reaping-knife, Jer. vii, 16; Joel iii [iv], 13, ὀπέρωνον), the instrument usually employed for cutting grain. See AGRICULTURE; HARVEST; REAPING.

Ancient Egyptian Sickles.

Sickles, JACOB, D.D., a Dutch Reformed minister, was born at Tappan, N. Y., in 1772, graduated from Columbia College in 1792, and prepared for the ministry under Drs. S. Froeligh and J. H. Livingston. He was distinguished as a linguist, both in classical and modern tongues. After his licensure, in 1794, he became assistant to Rev. Dr. Theodorice Romeyn, pastor of the Reformed Church in Schenectady. Two years subsequently he settled over the United churches of Coxsackie and Coeymans, N. Y. In 1798 he went, by appointment of the General Synod, on a tour of missionary exploration among the settlements on the frontier of New York and on the Susquehanna; and in 1809 made a similar tour among the churches of his denomination in Canada. He removed to the large and important Church of Kinderhook, N. Y., in 1807, of which he was pastor until 1835. Here, with a territory which now contains five or six congregations that are offshoots of the still vigorous mother Church, he labored with un-

tiring zeal and uniform success, until the infirmities of age compelled him to resign. About twenty annually were added to the Church during his long ministry. His most striking traits of character were "his condensation, love of evangelical truth, gravity, and mental independence." He was everywhere, and always, the minister of Christ. "His piety was paramount; his daily walk was with God; he preached, as unbelievers admitted, every hour of his life." As a preacher Dr. Sickles was argumentative, exact, ornate, and classical in style; calm, deliberate, and impressive in delivery: pointed, terse, and practical in his applications of truth. In 1811 his ministry was blessed with a remarkable revival of religion, particularly among the young. He was active in promoting missions, temperance, and other benevolent agencies of his time. His latter years were passed in dignified retirement from duties which he could no longer perform. Towards the last his mental powers failed utterly, and he died, a patriarch among his flock, Jan. 19, 1848, having been fifty-four years in the ministry. He left no printed remains. See Sprague, *Annals of the Amer. Pulpit*, s. v.; Van Zandt [Rev. B.], *Memorial Sermon*. (W. J. R. T.)

Sickness (usually some form of חֲלוּה, *to be worn down*; ἄσθενία). The climate of Palestine and the adjoining countries is, on the whole, conducive to health (Tacitus, *Hist.* v, 6, 2), and with regularity of habits the natives do not suffer much from maladies (Niebuhr, *Beschr.* p. 129). When these do occur they are usually of short duration. A list of the more severe diseases occurs in Lev. xxvi, 16; Deut. xxviii, 22. In summer dysentery prevails (Acts xxviii, 8); in spring and autumn fever (Matt. viii, 14; Luke iv, 39; John iv, 52; Acts xxviii, 8; comp. Josephus, *Life*, ii; see Russel, *Aleppo*, ii, 137; Burckhardt, *Arab.* p. 615; also the *Medic.-herm. Untersuchungen*, p. 348 sq.). The latter is specially designated as חֲלוּה דִּלְלֵכֶת, *dalléketh*, πυρετός, or inflammation (Deut. xxviii, 22). A peculiar name is קַדְחָת, *kaddichath* ("burning ague," Lev. xxvi, 16; "fever," Deut. xxviii, 22), which the Sept. renders ἵκτερος, some acute disease (see Schleusner, *Thesaur.* iii, 106). Mention is also made of consumption (שַׁחֲפֶתֶת, *shachépheth*, Lev. loc. cit.), apoplexy (1 Macc. ix, 55 sq.), sunstroke (Judith viii, 3 [? 2 Kings iv, 19]; comp. Joliffe, *Trav.* p. 7), hypochondria (1 Sam. xviii, 10); but epilepsy, paralysis, and especially cutaneous disorders [see LEPROSY], as likewise blindness, were very common. The most destructively raging was the plague (q. v.). Mental diseases (madness, שִׁנְדִּי, of a melancholy type; comp. 1 Sam. xvi, 23) were prevalent in New-Test. times. See POSSESSED. The venereal disease, which prevailed in the Old World, although in a milder type than since the Crusades (Hensler, *Gesch. d. Lusteuche* [Altona, 1783]; Sickler, in Augusti's *Theol. Blätt.* i, 193 sq.), has been thought to be indicated in the form of *Gonorrhœa virulenta* in Lev. xv, 3 (see Michaelis, *Mos. Recht*, iv, 282 sq.; *Oriental. Biblioth.* xxii, 2 sq.; Hebenstreit, *Curæ Sanitatis Publ. ap. Vett. Exempla* [Lips. 1779], ii, 15 sq.) and in 2 Sam. iii, 29; but this is a strained interpretation. See ISSUE. Another disease of the private parts is mentioned in 1 Sam. v (see Beyer, *De Hemorrhoidibus ex Lege Mos. Impur.* [Lips. 1792]; Sprengel, *Pathol.* iii, 29). See HÆMORRHOIDS. Jehoram's disease (2 Chron. xxi, 12 sq.) probably was a severe chronic dysentery of a bloody character. The Sept. seems to indicate the *cholera* in Numb. xi, 10 by the word זֵרָה (see Wamruch, *Disquis. Med. Cholerae, cujus Mentio in Sacris Bibliis Occurrit* [Vienna, 1833]); but the term denotes *nausea* in general. The Mishna occasionally notices various maladies, e. g. in *Yoma*, viii, 6 the *bulimnia* (בּוֹלִימִיָּה), or greediness, which is a frequent concomitant of other diseases. For the bite of a rabid dog (כָּלֵב שׂוֹטֵה), the caul of the liver of the animal seems sometimes to have been used

as a remedy (see Cohn, *De Medicina Talmud.* [Vratislav. 1846]); of no account is Goldmann, *Diss. de Rel. Med. V. T.* [ibid. 1845]). In general, see Wedel, *Exercit. Med.-philolog. Sacra et Profana* (Jen. 1686, 1704); Schmidt, *Bibl. Medicus* (Züllichau, 1743); Reinhard, *Bibelkrankheiten* (Frankf. and Leips. 1767, 3 vols. 8vo); Michaelis, *Philologmata Medica* (Hal. 1758); Mead, *Medica Sacra* (Lond. 1749); Ackermann, *Erläut. d. Krankheiten im N. T.* (in Weisse's *Material f. Gottesgel. u. Relig.* [Gera, 1784], ii, 57 sq.; iii, 124 sq.; iv, 73 sq.); Shapler, *Short Exposition of Diseases in the Sacred Writings* (Lond. 1834). See DISEASE; MEDICINE.

Sicksa, in Slavic mythology, was a mocking sylvan sprite who possessed the power of assuming any form, but delighted particularly in those shapes which involved the extreme of startling oddity.

Sicyon, in Grecian mythology, was a son of Marathon, Metion, Erechtheus, or Pelops, and the husband of Xeurippe, daughter of king Lamedon of Sicyon. The town was named Mecone or Ægiale, but is said to have received its subsequent name from him (see Pausan. ii, 1; vii, 2, 3; Strabo, viii, 382).

Sic'yon (Σικυών), a city mentioned with several others [see PHASELIS] in 1 Macc. xv, 23 as those to which the Romans sent a decree in favor of the Jews. The name is derived from a Punic root (*sák, sik, or sôk*), which always implies a periodical market; and the original settlement was probably one to which the inhabitants of the narrow strip of highly fertile soil between the mountains and the southern shore of the Corinthian Gulf brought their produce for exportation. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was said to have been Αἰγιάλη, or Αἰγυαλοί. This was perhaps the common native name, and Sicyon that given to it by the Phœnician traders, which would not unnaturally extrude the other as the place acquired commercial importance. It is this Sicyon, on the shore, which was the seat of the government of the Orthagorids, to which the Clisthenes celebrated by Herodotus (v, 67) belonged. The commercial connection of the Sicyon of the Orthagorids with Phœnicia is shown by the quantity of *Tartessian* brass in the treasury of the Orthagorid Myron at Olympia. The Phœnician (Carthaginian) treasury was next to it (Pausan. vi, 19, 1). But the Sicyon referred to in the book of Maccabees is a more recent city, built on the site which served as an acropolis to the old one, and was distant from the shore from twelve to twenty stadia. Demetrius Poliorcetes, in B.C. 303, surprised the garrison which Ptolemy had five years before placed there, and made himself master of the harbor and the lower town. The acropolis was surrendered to him, and he then persuaded the population, whom he restored to independence, to destroy the whole of the buildings adjacent to the harbor and remove thither, the site being one much more easily defensible, especially against any enemy who might attack from the sea. Diodorus describes the new town as including a large space so surrounded on every side by precipices as to be unapproachable by the machines which at that time were employed in sieges, and as possessing the great advantage of a plentiful supply of water within its circuit. Modern travellers completely confirm his account. Mr. Clark, who in 1857 descended upon Sicyon from "a ridge of hills running east and west, and commanding a splendid prospect of both the [Corinthian and Saronic] gulfs and the isthmus between," after two hours and a half of riding from the highest point, came to a ruined bridge, probably ancient, at the bottom of a ravine, and then ascended the right bank by a steep path. Along the crest of this hill he traced fragments of the western wall of Sicyon. The mountain which he had descended did not fall towards the sea in a continuous slope, but presented a succession of abrupt descents and level terraces, severed at intervals by deep rents and gorges,

down which the mountain-torrents make their way to the sea, spreading alluvium over the plain, about two miles in breadth, which lies between the lowest cliffs and the shore. "Between two such gorges, on a smooth expanse of table-land overlooking the plain," stood the city of Demetrius. "On every side are abrupt cliffs, and even at the southern extremity there is a lucky transverse rent separating this from the next plateau. The ancient walls may be seen at intervals along the edge of the cliff on all sides." It is easy to conceive how these advantages of position must at once have fixed the attention of the great engineer of antiquity—the besieger.

Demetrius established the forms of republican government in his new city; but republican government had by that time become an impossibility in Hellas. In the next half century a number of tyrants succeeded one another, maintaining themselves by the aid of mercenaries, and by temporizing with the rival sovereigns, who each endeavored to secure the hegemony of the Grecian race. This state of things received a temporary check by the efforts of Aratus, himself a native of Sicyon, of which his father Clinias for a time became dynast. In his twentieth year, being at the time in exile, he contrived to recover possession of the city and to unite it with the Achæan league. This was in B.C. 251, and it appears that at this time the Dorian population was so preponderant as to make the addition of the town to a confederation of Achæans a matter of remark. For the half century before the foundation of the new city, Sicyon had favored the anti-Lacedæmonian party in Peloponnesse, taking active part with the Messenians and Argives in support of Megalopolis, which Epaminondas had founded as a counter-check to Sparta.

The Sicyonian territory is described as one of singular fertility, which was probably increased by artificial irrigation. In the changeful times which preceded the final absorption of European Hellas by the Romans it was subject to plunder by any party who had the command of the sea; and in B.C. 208 the Roman general Sulpicius, who had a squadron at Naupactus, landed between Sicyon and Corinth (probably at the mouth of the little river Nemea, which was the boundary of the two states), and was proceeding to harass the neighborhood, when Philip, king of Macedonia, who was then at Corinth, attacked him and drove him back to his ships. But very soon after this Roman influence began to prevail in the cities of the Achæan league, which were instigated by dread of Nabis, the dynast of Lacedæmon, to seek Roman protection. One congress of the league was held at Sicyon under the presidency of the Romans in B.C. 198, and another at the same place six years later. From this time Sicyon always appears to have adhered to the Roman side, and on the destruction of Corinth by Mummius (B.C. 146) was rewarded by the victors not only with a large portion of the Corinthian domain, but with the management of the Isthmian games. This distinction was again lost when Julius Cæsar refounded Corinth and made it a Roman colony; but in the meanwhile Sicyon enjoyed for a century all the advantages of an entrepôt which had before accrued to Corinth from her position between the two seas. Even in the days of the Antonines the pleasure-grounds (τῆμενος) of the Sicyonian tyrant Cleon continued appropriated to the Roman governors of Achaia; and at the time to which reference is made in the Maccabees it was probably the most important position of all over which the Romans exercised influence in Greece (Diodorus Siculus, xv, 70; xx, 37, 102; Polybius, ii, 43; Strabo, viii, 7, 25; Livy, xxxii, 15, 19; xxxv, 25; Pausan. ii, 8; v, 14, 9; vi, 19, 1-6; x, 11, 1). See Clark, *Peloponnesus*, p. 338 sq.; Smith, *Dict. of Class. Geog.* s. v.

Sicyonia, in Grecian mythology was, 1, an appellative of Venus, derived from her temple at Sicyon, where she was represented in a statue of gold and

ivory—apparently the famous Venus Victrix, since, according to Pausanias, it held in its hand an apple; 2, a surname of Minerva, to whom Epopeus erected a temple after his victory over the Thebans.

Sida, in Grecian mythology, was the wife of Orion, who was banished by Juno to Hades because she pretended to be more beautiful than the goddess (Apollod. i, 4, 3).

Sid'dim, VALE OF (Heb. *E'mek has-Siddim*, מֶמְקַת הַשִּׁדִּים; Sept. ἡ φάραγξ ἡ ἀλυσκή, and ἡ κοιλὰς ἡ ἀλυσκή; Vulg. *Vallis Silvestris*), a place mentioned in Gen. xiv, 3, 8, 10 as the scene of the encounter between Chedorlaomer and the five confederate kings of the plain of the Dead Sea. Following we give the Scriptural and archaeological information on this subject.

1. *The Name*.—The word *Siddim* appears to be from the root שָׁדַד, *saddad*, "to be straight or level." The singular שָׁד or שִׁדָּה would thus signify "a level field;" and the phrase *Ēmek Siddim* (שִׁדִּים), "the valley of fields." Prof. Stanley conjectures (*Sin. and Pal.*) that *Siddim* is connected with שִׁדָּה, *sadēh*, "a field," and that the signification of the name was thus directly the "valley of the fields," so called from the high state of cultivation in which it was maintained before the destruction of Sodom and the other cities. Gesenius expresses his conviction (by inference from the Arabic *sad*, "an obstacle") that the real meaning of the words *Ēmek has-Siddim* is "a plain cut up by stony channels which render it difficult of transit;" and with this agree Fltstr (*Handwb.* ii, 411 b) and Kalisch (*Genesis*, p. 355). Perhaps more accurately the word may in this sense be derived from שָׁדַד, *saddad*, "to harrow." See Kalisch, *loc cit.*, who, however, disapproves of such a derivation, and adheres to that of Gesenius.

The following are the equivalents of the name given in the ancient versions: Samar. Vers., מִישֵׁר הַלְקִיָּה; Onkelos, מִישֵׁר הַקִּלְיָה; Saadias, *merjel-hakul*; Peshito, *umekā dī-sedumē*; Aquila, κοιλὰς τῶν περιπεδίωνων; Symm. and Theod., κοιλὰς τῶν ἀλσῶν (= אֲשֵׁרָה); Josephus, Φοιᾶρα ἀσφάλτου; Jerome (*Quest. in Gen.*), *Vallis Salinarum*. The authors of the Sept. probably thought that the clause "which is the Salt Sea" was explanatory of the word *Siddim*, which they therefore rendered ἡ ἀλυσκή. Or perhaps they may have read הַרְשִׁים instead of הַשִּׁדִּים; and ἀλυσκή may be an error for ἀλσάκος = ἀλσώδης, "wooded;" a view corroborated by the Vulgate, which has *silvestris*; and by the reading of Symmachus and Theodotion, τῶν ἀλσῶν.

2. *Topographical Indications*.—The word rendered "vale" is in Hebrew מֶמְקַת, *ēmek*, which means a low or sunken tract of land. See VALLEY. It was probably a section of the Arabah somewhat lower than the rest; perhaps resembling the plain of Sabkah at the southern end of the Dead Sea. It was "full of bitumen-pits;" or, as the Hebrew idiom expresses it, it was "wells, wells of bitumen" (בְּאֵרֵת חֶמֶר). They are so numerous as to stud its whole surface (Gen. xiv, 10). It was the battle-field on which the king of Sodom and his allies were vanquished. It seems probable, though it is not stated, that Sodom and Gomorrah were situated in the vale. Be this as it may, the vale was included in the general destruction when "the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord in heaven" (xix, 24).

But the most remarkable fact regarding the vale of *Siddim* is that stated in Gen. xiv, 3, "it is the Salt Sea" (הַיָּם הַמֶּלַח). The meaning of these words cannot be mistaken; and we have no more ground for questioning their genuineness than for questioning the genuineness of any other passage in Genesis. There is abundant evidence that the book as it now stands was the production of Moses. He may have embodied in it

authentic documents handed down from a remoter age, arranging and supplementing them as he deemed necessary. But his additions would be as authoritative as the documents themselves. Until we can prove from clear evidence that the clause was interpolated by an uninspired writer, we must regard it as an integral part of the Mosaic record, and we must believe that the vale of *Siddim* was submerged.

3. *Probable Identification*.—If we understand, therefore, the latter clause of ver. 3 to designate a part of what was afterwards known as "the Salt Sea," then we must agree with Dr. Robinson and others in identifying the Valley of *Siddim* with the enclosed plain which intervenes between the south end of the lake and the range of heights which terminate the Ghôr and commence the Wady Arabah. This is a district in many respects suitable. In the ditches and drains of the Sabkah are the impassable channels of Gesenius. In the thickly wooded Ghôr es-Sâfieh are ample conditions for the fertility of Prof. Stanley. The general aspect and formation of the plain answer fully to the idea of an *ēmek*. The most careful explorations of recent travellers have not brought to light a single fact calculated to overthrow this view. On the contrary, the following results of scientific research go far to establish it. At the present day there are no bitumen-pits in the plains around the Dead Sea, and time could not have effaced them had they remained above water. It has been ascertained, from masses of bitumen frequently thrown to the surface, that there must be wells of bitumen in the bed of the sea towards its southern end. Traces of what appears to have been "a shower of sulphur" have been discovered recently on the south-west shore; and with it are layers and lumps of bitumen calcined by heat. The section of the Dead Sea south of el-Lisān has been found to be very shallow—only a few feet, and in places only a few inches of water covering a flat, slimy plain—whereas the whole northern section is a deep and regularly formed basin. These facts would seem at least to suggest that that section of the Dead Sea which is south of the peninsula covers the region which was called in Lot's time "the vale of *Siddim*." Josephus states this view emphatically. His words (*An. i, 9*), are, "They encamped in the valley called the Wells of Asphalt; for at that time there were wells in that spot; but now that the city of the Sodomites has disappeared, that valley has become a lake which is called Asphaltites." See also Strabo, xvi, 764. See SALT SEA; SODOM.

Si'dē (Σίδῃ, Vulg. *Side*), a city on the coast of Pamphylia, in lat. 36° 46', long. 31° 27', ten or twelve miles to the east of the river Eurymedon. It is mentioned in 1 Macc. xv, 23 among the list of places to which the Roman senate sent letters in favor of the Jews. See PHASELIS. It was a colony of Cumæans. In the time of Strabo a temple of Athene stood there, and the name of that goddess associated with Apollo appears in an inscription of undoubtedly late times found on the spot by Admiral Beaufort. It is now called *Eshky Adabia*. *Si'dē* was closely connected with Aradus in Phœnicia by commerce, even if there was not a considerable Phœnician element in the population; for not only are the towns placed in juxtaposition in the passage of the Maccabees quoted above, but Antiochus's ambassador to the Achæan league (Livy, xxxv, 48), when boasting of his master's navy, told his hearers that the left division was made up of men of *Si'dē* and of Aradus, as the right was of those of Tyre and of Sidon, "quas gentes nullæ unquam nec arte nec virtute navali æquasent." It is possible that the name has the same root as that of Sidon, and that it (as well as the *Si'dē* on the southern coast of the Euxine [Strabo, xii, 3]) was originally a Phœnician settlement, and that the Cumæan colony was something subsequent. In the times in which *Si'dē* appears in history it had become a place of considerable importance. It was the station of Antiochus's navy on the eve of the battle with the Rhodian

fleet described by Livy (xxxvii, 23, 24). The remains, too, which still exist are an evidence of its former wealth. They stand on a low peninsula running from north-east to south-west, and the maritime character of the former inhabitants appears from the circumstance that the walls towards the sea were but slightly built, while the one which faces the land is of excellent workmanship, and remains, in a considerable portion, perfect even to this time. A theatre (belonging apparently to the Roman times) is one of the largest and best preserved in Asia Minor, and is calculated to have been capable of containing more than 15,000 spectators. This is so prominent an object that, to persons approaching the shore, it appears like an acropolis of the city, and, in fact, during the Middle Ages, was actually occupied as a fort. The suburbs of Side extend to some distance, but the greatest length within the walls does not exceed 1300 yards. Three gates led into the town from the sea, and one, on the north-eastern side, into the country. From this last a paved street with high curb-stones conducts to an agora, 180 feet in diameter, and formerly surrounded with a double row of columns, of which only the bases remain. In the centre is a large ruined pedestal, as if for a colossal statue, and on the southern side the ruins of a temple, probably the one spoken of by Strabo. Opposite to this a street ran to the principal water-gate, and on the fourth side of the agora the avenue from the land-gate was continued to the front of the theatre. Of this last the lower half is, after the manner of Roman architects whenever the site permitted, excavated from the native rock, the upper half built up of excellent masonry. The seats for the spectators, most of which remain, are of white marble, beautifully wrought.

The two principal harbors, which at first seem to have been united in one, were at the extremity of the peninsula: they were closed, and together contained a surface of nearly 500 yards by 200. Besides these, the principal water-gate on the north-west side was connected with two small piers 150 feet long, so that it is plain that vessels used to lie here to discharge their cargoes. The account which Livy gives of the sea-fight with Antiochus, above referred to, also shows that shelter could also be found on the other (or south-east) side of the peninsula whenever a strong west wind was blowing.

The country by which Sidè is backed is a broad swampy plain, stretching out for some miles beyond the belt of sand-hills which fringe the sea-shore. Low hills succeed, and behind these, far inland, are the mountains which, at Mount Climax, forty miles to the west, and again about the same distance to the east, come down to the coast. These mountains were the habitation of the Pisidians, against whom Antiochus, in the spring of B.C. 192, made an expedition; and as Sidè was in the interest of Antiochus until, at the conclusion of the war, it passed into the hands of the Romans, it is reasonable to presume that hostility was the normal relation between its inhabitants and the highlanders, to whom they were probably objects of the same jealousy that the Spanish settlements on the African seaboard inspire in the Kabyles round about them. This would not prevent a large amount of traffic, to the mutual interest of both parties, but would hinder the people of Sidè from extending their sway into the interior, and also render the construction of effective fortifications on the land side a necessity. (Strabo, xii, xiv; Livy, xxxv, xxxvii; Cicero, *Epp. ad Fam.* iii, 6.) — Smith. See Fellows, *Asia Minor*, p. 201; Leake, *Asia Minor*, p. 195; Beaufort, *Karamania*, p. 146 sq.

Sideromancy (*σιδηρος*, iron, and *μαντεία*, divination), a mode of divination anciently practiced by placing straws on red-hot iron, and drawing inferences as to the will of the gods from the manner of their burning. See DIVINATION.

Sidesmen (properly *synod's-men*; also called *quest-*

men). It was usual for bishops in their visitations to summon some credible persons out of every parish, whom they examined on oath concerning the condition of the Church. Afterwards, these persons became standing officers, especially in the great cities; and when personal visitations were a little disused, and when it became the custom for the parishioners to repair the body of the church (about the 15th century), these officers were still more necessary. They are chosen every year, according to the customs of the place, and their business is to assist the church-wardens in things relating to the church, and to make presentment of such matters as are punishable by the ecclesiastical laws. Hence they are called *questmen*. The whole office now generally devolves upon the church-wardens. *Sithcondmen* and *sithcundmen* were old English terms for sidesmen.

Sidgrani, in Norse mythology, was a surname of Odin.

Sidha, in Hindû mythology, designates a large class of good and strikingly beautiful genii. The latter quality is indicated by the name.

Sidharta, the name of *Gotama* (q. v.) before he became a Buddha. For interesting traditions concerning Sidharta, see Hardy, *Eastern Monachism*, p. 2, 6, 87, 271, 325.

Sidhoete, in Norse mythology, was a surname of Odin, derived from a hat descending low over the forehead, in which he was accustomed to conceal his face when associating with men.

Sidney, MARY, countess of Pembroke, was the sister of Sir Philip Sidney, and married Henry, earl of Pembroke, in 1576. She died in London, Sept. 25, 1601. The countess possessed a talent for poetical composition, and translated from the Hebrew many of the Psalms, said to be preserved in the library at Wilton, and in this was assisted by her brother. She also translated (from the French of P. Mornay) and published *A Discourse of Life and Death* (Wilton, 1590; Lond. 1600, 12mo). She wrote an *Elegy* on her brother:—*A Pastoral Dialogue in Praise of Astræa* (i. e. queen Elizabeth [1602]):—and a poem, *Our Saviour's Passion* (Sloanian MS. No. 1308, British Museum).

Si'don (*Σιδών*), the Greek form (2 Esdr. i, 11; Judith ii, 28; 1 Macc. v, 15; Matt. xi, 21, 22; xv, 21; Mark iii, 8; vii, 24, 31; Luke iv, 26; vi, 17; x, 13, 14; Acts xii, 20; xxviii, 3) of the city called in the Heb. (but in the A. V. "Sidon," also in Gen. x, 15, 19) ZIDON (q. v.), or rather *Tsidon*.

Sido'nian (*Σιδώνιος*), the Greek form of the gentile ZIDONIAN (q. v.), usually so exhibited in the A. V. of the Old Test. (Deut. iii, 9; Josh. xiii, 4, 6; Judg. iii, 3; 1 Kings v, 6).

Sidonius, Caius Sollius, APOLLINARIS MODESTUS, a learned ecclesiastic, was born probably in Lyons about 431. He was educated with care, and became very skilful in all parts of literature, especially in poetry. He married Pampianilla, the daughter of Avitus, afterwards emperor. When the city of Lyons was taken by Majorian, the latter treated Sidonius with great consideration, and in return for his lenient treatment he wrote a poem in honor of Majorian, by whom he was created a count and sent to govern the Gallic province of Arles. He also erected a statue to Sidonius in the city of Rome. In 467 he went to Rome as ambassador of the Arverni, and so pleased the reigning emperor, Anthemius, by a panegyric on him, as to be made governor of the city and honored with a second statue. In 472 he was chosen bishop of Clermont (Avernum), and though only a layman, fulfilled his duties faithfully and strenuously opposed Arianism. He died in 487. Of his works, nine books of *Epistles*, with about twenty-four poems interspersed, are still extant. They were published in Milan (1498) and Paris (1614); republished by Labbé in 1652 (the best edition).

Sidonius, Michael, a prelate of the Church of Rome who became noteworthy through his participation in many of the most important transactions connected with the Reformation, but whose family name was *Helding*, was born in Baden in 1506, studied at Tübingen, and entered the priesthood at Mayence, where he became cathedral preacher and rector of the cathedral school in 1531. In 1538 he was made suffragan to the archbishop of Mayence, and received from pope Paul III the title of bishop of Sidon in *partibus infidelium*, which gave him the name of Sidonius, by which he is commonly known. The Theological Faculty of Mayence conferred the degree of D.D. on him in 1543, and afterwards he for a time represented the elector of Mayence in the Council of Trent. In 1547 he was made imperial councillor by Charles V. He took possession of the pulpit of the reformer Musculus during the Diet of Augsburg, and from it preached a series of anti-Lutheran sermons (*Sleidani de Statu Rel.* etc. [Frankf. 1786]). In 1548 he served with Jul. v. Pflug, bishop of Naumburg, and with Joh. Agricola, the court preacher at Eisleben, on the commission which drew up the *Augsburg Interim* (q. v.), after which he was sent by his archbishop to promote the execution of the Interim at Frankfort. Prince George of Anhalt was at this time coadjutor of the bishopric of Merseburg, having been chosen by a majority of the canons; but the emperor declared against him and nominated Sidonius in his stead (Seckendorf, *Comment. de Lutheranism* [Lips. 1694], lib. iii, c. 30, § 117, p. 497 sq.), though the opposition raised against the measure delayed his investiture until 1550. In that year Sidonius was present at the Diet of Augsburg, in 1556 at that of Regensburg, in 1557 at the Colloquy of Worms, where he contributed according to his ability to render reconciliation impossible by his addresses, and by introducing at the sixth session a rejoinder to a declaration of facts submitted by the Protestants, in which he not only defended the traditional teachings and practice of Rome, but also asserted that the interpretation of difficult and controverted passages of Scripture belongs rightfully to the Romish Church. The Romish collocutors finally refused to continue the negotiations (Salig, *Vollst. Hist. d. Augsb. Conf.* [Halle, 1735], iii, 292 sq.). To the honors already enjoyed by Sidonius was added by the emperor in 1558 the office of judge in chambers. He died Sept. 30, 1561, at Vienna, and was buried in St. Stephen's Church. His writings include a *Catechismus Mogunt. s. Institut. ad Christ. Pietatem* (frequently reprinted and much controverted by Protestants);—the *Sleidani de Statu Rel.* already mentioned;—*Decreta Concil. General. Moguntini*;—*Instructio Visitorum*, and *Explicatio Paraphrast. Missee*. See *Unschuld. Nachrichten*, 1715, p. 394 sq.; 1716, p. 7 sq.

Siebelis, Carl Gottfried, a German theologian, was born in 1769 at Naumburg. After he completed his philosophical studies he was called in 1798 as conrector to Zeitz, and in 1804 as rector to Bautzen, where he died in 1843. He wrote, *Disputationes Quinque, quibus Ostenditur in Vet. Græcorum et Romanorum Doctrina Religionis ac Morum Plurima esse, quæ cum Christiana Consentiant* (Lips. 1837);—*Ad didacta ad Disputationes Quinque*, etc. (ibid. 1842);—*Die Bibel die beste Grundlage der Kindererziehung* (Zittau, 1818). See Zuchold, *Bibl. Theol.* ii, 1226; *Regensb. Conversationslex.* s. v. (B. P.)

Siege (some form of סִיג, *tsir*, to press in a hostile manner). The Egyptian and Assyrian monuments depict all the operations of capturing a city (see Wilkinson, *Anc. Egypt.* i, 387 sq.; Layard, *Ninereh*, ii, 281 sq.). See WAR.

Sienna, Council of (*Concilium Senense*), was held first at Pavia, and subsequently translated to Sienna (a central province of Italy, in Tuscany), June 22, 1423. This council lasted till Feb. 26, 1424, and many sessions were held. Among the acts is a decree against the heresies previously condemned at Constance, and

against all aiding and abetting the Wycliffites and Hussites. Indulgence was granted to their persecutors. The question of a reunion with the Greek Church was also debated, and its further consideration postponed. It was determined that everything relating to the reformation of the Church should be referred to the council about to be held at Basle. See *Mansi*, xii, 365.

Sieva, in Slavic mythology, was the goddess of love. She was the wife of Siebog, the patron of marriage, and was highly venerated by all lovers. The reports sometimes mentioned concerning beautiful paintings in which the Wendish artists had represented this deity are fabulous.

Sieve (סִבָּה, *kebaráh*, Amos ix, 9; נָפֶה, *napháh*, a winnowing fan, Isa. xxx, 28; to "sift" is נָפַח, *núa*, or נָפַח, to wave [as often rendered], or throw up into the air for winnowing; σνιάζω, Luke xxii, 31). Among the ancient Egyptians sieves were often made of string, but some of an inferior quality, and for coarse work, were constructed of small thin rushes or reeds (very similar to those used by the Egyptians for writing, and frequently found in the tablets of the scribes); a specimen of which kind of sieve is in the Paris Museum. The paintings also represent them made of the same materials; and the first they used were evidently of this humble quality, since the hieroglyphic indicating a sieve is borrowed from them. Horse-hair sieves are ascribed by Pliny to the Gauls; the Spaniards, he says, made them of string, and the Egyptians of papyrus stalks and rushes. See Wilkinson, *Anc. Egypt.* ii, 95.

Sieveking, Amalia, the founder and long the head of the woman's union for the care of the poor and the sick of the city of Hamburg, belonged to one of the most respected senatorial families of that city, and was born in 1794. She lost her parents at an early age, and was received into the home of an elderly relative of her mother, where she began, when scarce seventeen years of age, to display the qualities which stamped her a born deaconess. Her earliest efforts were expended on an uninstructed girl living in the same house with herself, and five other girls were soon added to her school. She devoted three hours a day to instruction in elementary branches, omitting nothing but religion, which she did not at the time either possess or understand. Kempis's *Imitation of Christ* first directed her thoughts towards the Bible, and A. H. Francke's *Manuductio ad Lectionem Script. Sacr.* (q. v.) taught her to find the sense of Scripture by comparing its parts together, and also to transmute all that should be found into experience, through prayer and personal application. She claims, accordingly, that her faith was grounded on no human authority whatever, but solely on that of the Lord. The doctrine of the atonement continued to trouble her, however, until an enlightened Bible student, who had been the school friend of her early-deceased brother, was able to relieve her doubts. Religion was now given a prominent place in her curriculum, and a weekly "Bible-hour" was added to her labors, for the benefit of such as had by confirmation been removed from school into the walks of common life. These Bible-hours yielded fruit also for a wider circle through a publication issued in 1822, and entitled *Betrachtungen üb. einzelne Theile d. heil. Schrift*, upon which followed, in 1827, *Beschäftigungen mit d. heil. Schrift*, and in 1855 *Unterhaltungen üb. einzelne Abschnitte d. heil. Schrift*. These schools for girls were continued, with rare interruptions, down to the last year of her life, the sixth class being admitted in 1854; and it became a desirable thing in the eyes of her neighbors, even when they differed from her in religious opinion, to have their children placed under her care.

The disposition to give and help in every way was too strong in Amalia's nature to be confined within the limits of her school. She thought at first of organizing

an evangelical sisterhood after the pattern of the Romish orders. Her way was made clear, however, by the first breaking-out of the cholera epidemic in Europe in the summer of 1831, when she offered her services to the cholera hospital, which were accepted. She was at last placed over the entire corps of male and female nurses. The experience so gained was practically utilized afterwards in the forming of a *woman's society* for the relief of the poor and the sick instead of the proposed sisterhood. It was composed of women belonging to the middle and higher classes of society, at first thirteen in number (1832), and was placed under stringent rules of administration. Direct visitation was made a duty, certain families being assigned to a number of members, who were required to visit in succession and record the results of the visits in books provided for that purpose. No case of chronic poverty was received, and the most careful inquiries were made with reference to applicants for aid, covering the business, number of persons in the family, their age and sex, attendance on schools, the home, and its appearance as to neatness and order. A weekly meeting was held in which the claim of such applicants to admission was discussed, and at which they were placed under the care of certain members if received. It was also a principle never to visit the poor empty-handed, but never to give them money, orders on tradesmen or provisions in kind being preferred; and if want of work was the occasion of the suffering, the effort was made to secure employment. The union even erected a number of manufactories itself, and had them managed under its control, for the purpose of affording employment to the poor; and its reports show that this part of its business was not conducted at a loss. Nor was the spiritual welfare of its clients neglected. Every visitor was expected to use all proper effort to secure the moral and religious improvement of the persons under her care, no less than to minister to their temporal needs. The workings of this union caused its fame to spread, not simply throughout an appreciative city, but over wide areas, so that when a terrible conflagration laid Hamburg low in 1842, contributions from women's unions in numerous German cities, all of which called themselves daughters of the union of Hamburg, were forwarded to the parent society for its use. Amalia Sieveking's life-purpose was thus fully realized, and crowned with blessing beyond all her expectations. The last two years of her life were shadowed by pulmonary troubles, which destroyed her strength and compelled her gradual withdrawal from the work whose supervision had become to her a second nature. She died April 1, 1859. For her life, see *Denkwürdigkeiten aus d. Leben von Amalia Sieveking*, etc. (Hamb. 1860).

Sif, in Norse mythology, was the beautiful second wife of Thor, celebrated on account of her wonderful blonde hair, which the evil Loki cut off on one occasion while she slept. Thor compelled him, on peril of his life, to procure golden hair for Sif instead of that which he had stolen, and Loki obtained it from the dwarfs. Sif had been previously married, and had given birth to a son, Ullar; Thor's children by her were named Thrudr and Lorríde. Sif would appear to have been the most virtuous of the asins, for when Loki, at Aeger's banquet, charged upon the women and virgins their numerous loves, he spared Sif such exposure. She handed him a cup while thanking him for his forbearance; upon which he replied that he must concede to her an eminence above all others, since she had possessed only one lover, who was *himself*.

Sifra. See SIPHRA.

Sifridenses. See SISCIDENSES.

Siga, the name of an alleged Phœnician goddess who has been likened to *Minerva*.

Signalon, XAVIER, a French painter, was born at Uzès (Gard) in 1788, of parents in humble circum-

stances, and was educated in the school of design at Nîmes. He painted chiefly sacred subjects, especially the *Last Judgment*, a copy of Michael Angelo's at Rome, which made his fortune. He died of the cholera at Rome, Aug. 18, 1837. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sigarsholm, in Norse mythology, was an island in the north on which a battle was fought that brought forty-six heroes to their graves, and in which their swords are buried. The walkure Svava brought the most famous of the swords to her lover Helgi, who was under her protection.

Sigarsvoellur, in Norse mythology, was the place where the battle was fought between Helgi and Hrodmar. Helgi Hattینگaskade fell mortally wounded, and expired in the arms of his beloved Svava, the walkure. Sigarsvoellur was subsequently given by Sigmund Wolsungssohn to Helgi Hundingstóðtr, his son, in honor of his name.

Sigebert of GEMBLoux (*Gemblic*), a Belgian monk, was born about A.D. 1030, and educated in the convent of Gembloux, where he also became a monk. About A.D. 1048 he assumed charge of the school attached to the convent of St. Vincent at Metz, but returned to Gembloux, after a successful career, about 1070, and continued during forty additional years to labor in the work of teaching and authorship, being generally admired and revered. He was characterized by frankness and piety, gifted with a sound judgment, so that he was fitted to administer in secular affairs, and was decidedly true to principle. It was because of his influence that the Church of Liege remained loyal to the emperor, despite the efforts put forth by certain abbots to subject it to the pope alone. The celebrated letter written by Gregory VII to bishop Hermann of Metz, which asserted the right of the pope to place a sovereign under the ban and dissolve the allegiance of his subjects, was answered by Sigebert, and so also was the demand of Paschal II, made in 1102 or 1103, that count Robert of Flanders should head a crusade to punish the Church of Liege for its fidelity to the sovereign. With like good judgment he resisted the imposing of the yoke of asceticism on the entire Church, though he himself was predisposed in favor of a monastic life. His fearless attitude with reference to such questions produced a strong impression on the minds of his contemporaries. He died Oct. 5, 1112.

The works of Sigebert are enumerated by himself in the work *De Viris Illustribus* (best ed. in *Miræi Biblioth. Eccl.* ed. ii, cur. J. A. Fabricio), a book whose only value now consists in the preservation of a few interesting facts which it contains. The *Vita Deoderici*, an early work commemorating the founder of the abbey of St. Vincent at Metz, gives evidence of the author's extensive reading. He also wrote a life of king Sigebert, the founder of the church and abbey of St. Martin, near Metz, and a number of saints' legends in either prose or verse, particularly a life of Wiebert, the founder of Gembloux, and a history of the convent to 1048; and he gave attention to music and chronology. His last and most celebrated work is the *Chronicon*, extending from A.D. 381 to 1111, but being a mere compilation from other works down to 1023, after which date it possesses, to some degree, the character of an independent source. The selections from other books are judicious, the treatment of facts cautious, moderate, and impartial, and the whole is characterized by something of the historic spirit. The work became in time the principal source of information with reference to the churches and abbays of Belgium and Northern France. The charge that Sigebert had invented the legend of pope Joan is now disbelieved, and Bethmann, in the *Monumenta Germ. SS.*, omits it from his collection of Sigebert's works. See the *Monumenta Germ. SS.* passim; Hirsch, *De Vita et Scriptis Sigeberti* (Berol. 1841); Wattenbach, *Deutschland's Geschichtsquellen* (Berl. 1858).

particularly p. 291-299; Pertz, *Archiv*, xi, 1-17; Herzog, *Real-Encyklop.* s. v.

Sigfaudur, in Norse mythology, was a surname of Odin, signifying the *father of victory* (German, *Siegesvater*).

Siggautr, in Norse mythology, was a surname of Odin, the god of victory (German, *Siegesgott*).

Siggonas, the second class of priests among the ancient Prussians. They were probably more widely scattered over the country than were the Grivaites (the first class), who dwelt constantly at the sanctuary Romowa; and even there the Siggonas were probably found, since it was a Siggo who slew bishop Adalbert on the borders of the sacred forest of Samland, near Romowa. The name Siggo is suggestive of blessing (German, *Segen*), to pronounce which, over the people, may have been the principal business of these priests. It would seem that they also had supervision over the sacred groves, forests, fountains, hills, etc. Possibly their residences were chosen with reference to such places, so that they might conveniently receive the sacrificial gifts of the people in exchange for their blessing.

Sigi, in Norse mythology, was a son of Odin, who was compelled to forsake the kingdom because he had, in the heat of passion, slain the brave Bredi, who had been more successful than himself in the hunt. He obtained ships from Odin and became a powerful viking, who subdued mighty kingdoms to his rule. He fell, at an advanced age, in a battle against his wife's brother, who had rebelled against his authority.

Sigill (*sigillum*), a *seal*, or signature.

Sigillaria, the last two days of the feast of Saturn, so called from little earthenware figures (*sigilla*) exposed for sale at this season, and given as toys to children. See SATURNALIA.

Sigillo, ROBERT DE, an English prelate, was preferred to the see of London by the empress Maud in 1141. When the Londoners revolted to king Stephen, the bishop was required to take the oath of allegiance to that revolution, which he refused. Pope Eugenius wrote to king Stephen and his queen, asking that Sigillo be excused from taking the oath. He died in 1151. See Collier, *Eccles. Hist.* ii, 245.

Sigillum Altaris (*seal of the altar*). "The authentic mark of an altar was its five crosses; and there was a small stone called *sigillum altaris*, by which the aperture for the insertion of relics was closed up by mortar tempered in holy water" (Fosbrooke).

Sigismund (*St.*), king of BURGUNDY in the 6th century, was baptized in youth by Avitus, and succeeded his father, Gondebaud, in 516. In 517 he assembled a council at Ekaone, which was attended by twenty-seven Burgundian bishops, and fixed the limits of his kingdom. He governed with wisdom. Being very liberal towards the Church, he founded, in 515, the monastery of Argaune at Maurice, in Valais, which became celebrated. He was assassinated in 524, in revenge for the execution of his son, Sigeric, by his first wife; and as he had already taken the tonsure and religious habit, he was canonized as a martyr, his festival being fixed on May 1. According to Savigny (*Geschichte des römischen Rechts*, vol. ii) it was Sigismund, and not his father, who compiled the Burgundian code called the *Loi Gombette*; but this is successfully disputed by Gaupp (*Die germanischen Ansiedelungen* [Breslau, 1844], p. 296-317). See Hofer, *Nouv. Biog. Générale*, s. v., Mrs. Jameson, *Legends of the Monastic Orders*, p. 173.

Sigismund, JOHANN, elector of Brandenburg (1608-19), was born Nov. 18, 1572, and became noteworthy through his transition from the Lutheran to the Reformed Church. His father had endeavored to bind

him to the support of the *Formula of Concord* (q. v.) by securing his signature to a declaration approving of that standard, and of the existing organization in churches and schools. His wife, Anna, a daughter of duke Albert of Prussia and Maria Eleonore of Cleve, was a rigid Lutheran, and exercised all her influence to prevent a change in his Church relations; and the temper of many of his subjects in Brandenburg and the district of Prussia which he held as a fief from Poland threatened to render such a step productive of grave complications. To these influences must be added the certainty that many neighboring princes would withdraw their favor. Sigismund, nevertheless, took that step, and partook of the Lord's supper under the Reformed ritual, for the first time, on Christmas-day of 1613. Even his most embittered enemies never charged secular or political motives on him for this action, though a later generation adopted that explanation (Schröckh). He had been prejudiced against the *Formula of Concord* from the beginning, and had already, in 1610, issued statutes to the University of Frankfurt, in which subscription to the *Formula* was not required. An immense excitement was caused. The elector of Saxony wrote, under date of Feb. 1, 1614, to dissuade Sigismund from completing the transfer; and on the 24th of the same month the latter was compelled to issue an edict forbidding the clergy to inveigh against his measures in the pulpit. The estates of Brandenburg demanded the continuation of the prerogatives enjoyed by the Lutheran Church, and the disuse of all measures intended to favor the Reformed. The difficulty was finally composed by the action of the elector, who (Feb. 5, 1615) engaged that the Lutherans should continue to enjoy liberty of conscience and to exercise the right of patronage where legally entitled thereto; but insured like privileges to their Reformed opponents. A colloquium of clergymen was held at Berlin in October, 1614, where the resolution was reached that defamation of the Reformed party should thereafter be avoided. The result of the whole

St. Sigismund.

contest was that the Reformed Church obtained legal recognition. Soon after his entrance into the Reformed communion the elector published his *Confession of Faith* (*Joh. Sigism. Confessio Fidei*), May, 1614. It claims to deal with points at issue between Evangelical Protestants only. Its introduction disclaims the intention of introducing novelties, but asserts the necessity for removing certain remainders of popery, and concludes with a recognition of the sole authority of the Word of God and an approval of the "Apostolical, the Athanasian, and the Nicene, Ephesian, and Chalcedonian symbols;" to which list is added the Augsburg Confession of 1530, but as afterwards revised and improved. The *Confessio* rejects all later Lutheran additions—as the ubiquity of Christ's body, the involving of Christ's Deity in his passion, and the ascription of omnipotence to his humanity, etc. The remaining articles relate to the sacraments and the election of grace, and are entirely in accord with the ordinary Reformed, Calvinian view. See Hering, *Hist. Nachr. v. d. ersten Anfänge d. evang.-ref. Kirche in Brandenb. u. Preussen* (1778); Küster, *Altes u. Neues* (Berlin); Von Mühler, *Gesch. d. evangel. Kirchenverfassung in d. Mark Brandenburg* (1846); Möller, *Joh. Sig. Uebertritt zum ref. Bekenntnis*, in the *Deutsche Zeitschrift* (Berlin, 1858), p. 189 sq.; and various *Essays* by prorektor Schmidt, of Schweidnitz, etc.

Sigmaringen, FIDUSS OF, properly MARC RET, a Capuchin monk, was born at Sigmaringen in 1577; and educated at Fribourg. He was sent as a missionary to the Grisons, by whom he was murdered at Senis, April 24, 1622. He was canonized by Benedict XIV in 1746. See Hoefler, *Nouv. Biog. Générale*, s. v.

Sigmund WOLSENSSOHN, in Norse mythology, was a celebrated hero who was invulnerable and proof against poison, and who drank the cup of poison intended for his brother without injury to himself. He became the father, by the beautiful Danish queen Borghild, of Helgi Hundingsdöter and Sigurd Fafnirsdöter.

Sign is the rendering in the A. V. of several Heb. and Gr. words, especially *אֵימָה*, *ēth*, *σημεῖον*, which usually denote a miraculous or, at least, divine or extraordinary token of an event, generally in the future. See **MIRACLE**. In Biblical language a sign is a token, or whatever serves to express or represent another thing. Thus the Lord gave to Noah the rainbow as a sign of his covenant (Gen. ix, 12, 13), and for the same purpose he appointed circumcision to Abraham (xvii, 11; see also Exod. iii, 12; Judg. vi, 17). In Isa. vii, 18 the word is used for a prophetic similitude: "Behold, I and the children whom the Lord hath given me are for signs and for wonders in Israel" (see also Ezek. iv, 3). Signs and wonders, as they are usually connected, sometimes denote those proofs or demonstrations of power and authority which were furnished by miracles, and by other tokens of the divine presence (John iv, 48; Matt. xii, 38; Acts ii, 22); sometimes those unusual appearances which betoken the approach of great events (Luke xxi, 11, 25), and at other times tokens or pledges as evidences of fulfilment (ii, 12; 1 Cor. i, 22). This word is emphatically used in Scripture for a miraculous appearance, which would attest the divine authority of a prophet or teacher. The Jews asked our Lord for "a sign from heaven" (Matt. xvi, 1), meaning, thereby, the appearance of the Messiah coming in the clouds of heaven, which Daniel had foretold (vii, 13), and which "the traditions of the elders," as appears from the Talmud, had declared to be the only certain sign of the advent of the promised inheritor of David's throne and deliverer of the Jewish nation. So our Lord refers to "the sign of the Son of man" (Matt. xxiv, 30), as prefigured by the national overthrow of the Jews (see Zetner, *De Astre Judæis quondam Ominoso* [Alt. 1724], and the monographs cited by Hase, *Leben Jesu*, p. 187). See **ESCHATOLOGY**.

SIGN, a term used in defining a sacrament to describe the relation existing between an external ordinance and that which it represents. The former is called the "outward part, or sign," the latter the "inward part, or thing signified." See **SIGNS**.

SIGN OF THE CROSS. See **CROSS**, **SIGN OF**; **SIGNUM CRUCIS**.

Signe, in Norse mythology, was a daughter of queen Bera of Zealand. Hagbart of Drontheim, the bold son of Hake and a celebrated viking, came to Zealand with the intention of challenging the queen's sons, Alf and Alger, to single combat in order to measure strength with them. He saw and loved Signe, but her cruel mother hated him and prevented their union. Alf fell in the duel, and Hagbart recklessly suffered himself to be made a prisoner, because he trusted in his strength, but a lock of Signe's hair bound him fast. He was doomed to death, and the archers were prepared to execute the queen's decree, when the victim took his own life. Signe was rescued from her blazing dwelling by her brother Alger, but only in order to die beside the corpse of her lover, for she had taken poison. Comp. Ehlenkläger's touching tragedy, in which he has elaborated this material, entitled *Hagbart og Signe*.

Signet is the rendering in the A. V. of *חֹתֶמֶת*, *chothām* (Gen. xxxviii, 18; Exod. xxviii, 11, 21, 36; xxxix, 6, 14, 30; Jer. xxii, 24; Hag. ii, 23), or *חֹתֶמֶת*, *chothē-meth* (fem. of the same, only in Gen. xxxviii, 25), a *seal*, as elsewhere rendered; and of the Chald. *ܫܢܝܬܐ*, *izkā*, the same (Dan. vi, 17 [18]); both so called from being engraved; also of *σφραγίς*, *stophagis*, Tob. i, 22; Ecclus. xvii, 22; xxxii, 6; xlix, 11; Bel ii, 1; 1 Macc. vi, 15, a *seal*, as elsewhere rendered.

The importance attached to seals in the East is so great that without one no document is regarded as authentic (Layard, *Nin. and Bab.* p. 608; Chardin, *Voyages*, v, 454). The use of some method of sealing is obviously, therefore, of remote antiquity. Among such methods used in Egypt at a very early period were engraved stones, pierced through their length and hung by a string or chain from the arm or neck, or set in rings for the finger. The most ancient form used for this purpose was the scarabæus, formed of precious or common stone, or even of blue pottery or porcelain, on the flat side of which the inscription or device was engraved. Cylinders of stone or pottery bearing devices were also used as signets. One in the Alnwick Museum bears the date of Osirtasen I, or between 2000 and 3000 B.C. Besides finger-rings, the Egyptians, and also the Assyrians and Babylonians, made use of cylinders of precious stone or terra-cotta, which were probably set in a frame and rolled over the document which was to be sealed. The document, especially among the two latter nations, was itself often made of baked clay, sealed while it was wet and burned afterwards. But in many cases the seal consisted of a lump of clay, impressed with the seal and attached to the document, whether of papyrus or other material, by strings. These clay lumps often bear the impress of the finger, and also the remains of the strings by which they were fastened. One such found at Nimrūd was the seal of Sabaco, king of Egypt, B.C. 711, and another is believed by Mr. Layard to have been the seal of Sennacherib, of nearly the same date (Birch, *Hist. of Pottery*, i, 101, 118; Wilkinson, *Anc. Egypt.* ii, 341, 364; Layard, *Nin. and Bab.* p. 154-160). In a somewhat similar manner doors of tombs or other places intended to be closed were sealed with lumps of clay. The custom prevalent among the Babylonians of carrying seals is mentioned by Herodotus, i, 195, who also notices the seals on tombs, ii, 121; Wilkinson, i, 15; ii, 364; Matt. xxvii, 66; Dan. vi, 17. The use of clay in sealing is noticed in the book of Job xxxviii, 14, and the signet-ring as an ordinary part of a man's equipment in the case of Judah (Gen. xxxviii, 18), who probably, like

many modern Arabs, wore it suspended by a string from his neck or arm. (See Cant. viii, 6; Gesenius, p. 538, 1140; Robinson, i, 36; Niebuhr, *Descr. de l'Arab.* p. 90; Chardin, *loc. cit.*; Olearius, *Travels*, p. 317; Knobel, *on Gen. xxxviii*, in *Exeg. Handb.*) The ring or the seal as an emblem of authority, in Egypt, Persia, and elsewhere, is mentioned in the cases of Pharaoh with Joseph, Gen. xli, 42; of Ahab, 1 Kings xxi, 8; of Ahasuerus, Esth. iii, 10, 12; viii, 2; of Darius, Dan. *loc. cit.*; also 1 Macc. vi, 15; Josephus, *Ant.* xx, 2, 2; Herodotus, iii, 128; Curtius, iii, 6, 7; x, 5, 4; Sandys, *Travels*, p. 62; Chardin, ii, 291; v, 451, 462; and as an evidence of a covenant in Jer. xxxii, 10, 54; Neh. ix, 38; x, 1; Hag. ii, 23. Its general importance is denoted by the metaphorical use of the word (Rev. v, 1; ix, 4). Rings with seals are mentioned in the Mishna (*Shabb.* vi, 3), and earth or clay as used for seals of bags (viii, 5). Seals of four sorts, used in the Temple, as well as special guardians of them, are mentioned in *Shekal.* v, 1.

Among modern Orientals the size and place of the seal vary according to the importance both of the sender of a letter and of the person to whom it is sent. In sealing, the seal itself, not the paper, is smeared with the sealing substance. Thus illiterate persons sometimes use the object nearest at hand—their own finger, or a stick notched for the purpose—and, daubing it with ink, smear the paper therewith (Chardin, v, 545; ix, 347; Arvieux, *Travels*, p. 161; Rawolf, *Travels*, in Ray, ii, 61; Niebuhr, *loc. cit.*; Robinson, i, 36). Engraved signets were in use among the Hebrews in early times, as is evident in the description of the high-priest's breastplate (Exod. xxviii, 11, 36; xxxix, 6), and the work of the engraver as a distinct occupation is mentioned in Eccles. xxxviii, 27.

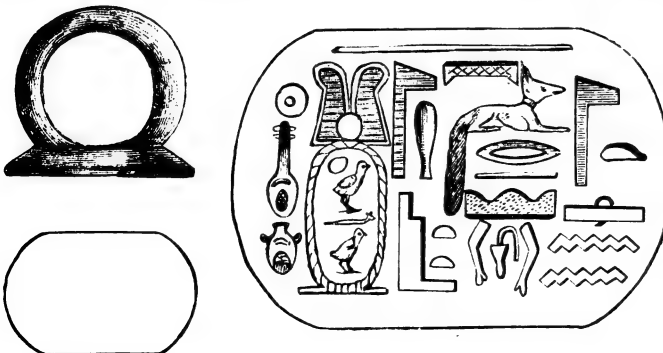

There seem to have been two kinds of seals in use among the Hebrews. A notion appears to exist that all ancient seals, being signets, were rings, intended to be worn on the hand. But this was by no means the case; nor is it so now in the East, where signet-rings are still, probably, as common as they ever were in ancient times. Their general use of seals was very different from ours, as they were employed not for the purpose of impressing a device on wax, but in the place of a sign manual, to stamp the name of the owner upon any document to which he desired to affix it. The name thus impressed had the same legal validity as the actual signature, as is still the case in the East. This practice may be illustrated by a circumstance which occurred in the last days of George IV. When he became too ill to affix his sign manual to the numerous documents which required it, a fac-simile was engraved on a stamp, by which it was in his presence impressed upon them. By this contrivance any one may give to any paper the legal sanction of his name, although he may be unable to write; and the awkward contrivance to which we resort in such cases, of affixing a cross or mark with the signature of an attesting witness, is unnecessary. For this purpose the surface of the seal is

smeared with a black pigment, which leaves the figure of the body of the seal upon the paper, in which the characters appear blank or white. The characters required are often too large or too many to be conveniently used in a signet-ring, in which case they are engraved on a seal shaped not unlike those in use among ourselves, which is carried in the bosom, or suspended from the neck over the breast. This custom was ancient, and, no doubt, existed among the Hebrews (Gen. xxxviii, 18; Cant. viii, 6, Hag. ii, 23). These seals are often entirely of metal (brass, silver, or gold), but sometimes of stone set in metal. As an appendage thus shaped might be inconvenient from the pressure of its edges, the engraved stone was sometimes made to turn in its metal frame, like our swivel seals, so as to present a flat surface to the body. (See below.)

If a door or box was to be sealed, it was first fastened with some ligament, over which was placed some well-compacted clay to receive the impression of the seal. Clay was used because it hardens in the heat which would dissolve wax, and this is the reason that wax is not used in the East. A person leaving property in the custody of strangers—say in one of the cells of a caravansarai—seals the door to prevent the place from being entered without legal proof of the fact. The simplicity of the Eastern locks, and the ease with which they might be picked, render this precaution the more necessary. Sometimes a coarsely engraved and large wooden seal is employed for this purpose. There are distinct allusions to this custom in Job xxxviii, 14; Cant. iv, 12.

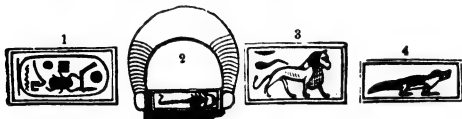

Signet-rings were very common, especially among persons of rank. They were sometimes wholly of metal, but often the inscription was borne by a stone set in silver or gold. As impression from the signet-ring of a monarch gave the force of a royal decree to any instrument to which it was affixed, so the delivery or transfer of it to any one gave the power of using the royal name, and created the highest office in the State (Gen. xli, 42; Esth. iii, 10, 12; viii, 2; Jer. xxii, 24; Dan. vi, 10, 13, 17; comp. 1 Kings xxi, 8). Rings, being so much employed as seals, were called *תבואות*, *tubba'oth*, which is derived from a root signifying to imprint, and also to seal. They were commonly worn as ornaments on the fingers—usually on the little finger of the right hand (Exod. xxxv, 22; Luke xv, 22; James ii, 2). Such rings were anciently made of silver, gold, or bronze; sometimes the hoop was of iron, and the signet part of gold. Rings were early set with gems or other stones; and when designed for seals or signets, the gems were engraved (Exod. xxviii, 11, 21). In the British Museum there are several rings, ear-rings, nose-rings, pendants, signets, beads, necklaces, bracelets, and other ornaments, from the tombs of Egypt. They are of gold, silver, bronze, iron, electrum, cornelian, jasper, porcelain, ivory, glass, emerald, etc. Some of the signets are set with amulets or scarabæi, and bear the prænomens of Thotmes

III. There are finger-rings, some in open work, with figures of deities, etc.; and on the faces of some the prænomens of Amenophis III; on others, the names of Amentuonk, Amounra, etc. Among the Egyptian antiquities in the possession of Dr. Abbot, English resident physician at Cairo, is the well-authenticated signet-ring of Cheops. It is, perhaps, the oldest article of the kind in the world, and is of fine gold, weighing nearly three sovereigns, and bearing the name of Shûfû, the Suphis of Manetho, and the Cheops of the Greeks. This precious relic

Signet-ring of Cheops, with enlarged view of the engraved face.

of the age of the founder of the Great Pyramid is in the highest state of preservation. The style of the hieroglyphics is in perfect accordance with those in the tombs about the Great Pyramid, and all the details are minutely attended to and beautifully executed. It was found in a tomb near the pyramids of el-Gizeh. One of the largest signets seen by Wilkinson contained twenty pounds' worth of gold. It consisted of a massive ring, half an inch in its largest diameter, bearing an oblong plinth, on which the devices were engraved, one inch long, six tenths in its greatest, and four tenths in its smallest breadth. On one face was the name of king Horus, of the eighteenth dynasty; on the second a lion, with the legend "Lord of strength," referring to the monarch; on the third side a scorpion; and on the fourth a crocodile (*Anc. Egypt.* ii, 337). See SEAL.

Signet-ring of Horus. (2 is the entire ring, with its swivel: 1 is the face-side, with signature of Horus; 3 and 4 are the other sides.)

Significat was a brief name for the writ *De Excommunicato Capiendo* from the word at the beginning of the writ—"Significat nobis venerabilis Pater, H. L. Episcopus," etc.

Signorelli, LUCA (called *Luca of Cortona*), an Italian painter, was born at Cortona about 1440. He was instructed first by Matteo da Sienna and afterwards by Pietro della Francesca, whose style he seized so effectually that the works of the two have often been confounded. He painted many religious subjects, of which a list is given in Hoefer, *Nouv. Biog. Générale*, s. v.

Signs. 1. The great bells at Canterbury in the 12th century; one took twenty-four and another thirty-two men to sound it. 2. A most intricate system of talking with the fingers, used by the Clugniacs to indicate their wants in hall. 3. Gerbert furnishes a minute account of a similar manual telegraph made use of by the precentor in a choir.

Signum Crucis (*sign of the cross*), words used in the form for confirmation, etc. The modern form in the Roman Catholic Church is as follows: "Signo te signo crucis, et confirmo te chrismate salutis, in nomine Pa (+)tris, et Fi (+)lii, et Spiritus (+) Sancti. Amen."

Signy, in Norse mythology, was a daughter of king Wolsung, and was married against her consent to Sigmund of Gothland. She had feared that her husband would bring misfortune to her family, and her dread was realized in the murder of her father and eight of her brothers, Sigmund, the ninth brother, being rescued by her. She lived in concealment in a hut in the forest with Sigmund, and having presented herself before him in a changed form, she conceived a son, who was afterwards known as Sinfioeti, and who consequently belonged to the Wolsung race by descent from both his father and his mother. Like his father, he was immensely strong. Sigmund and Signy avenged the murder of their father in the blood of Signy's husband, and Signy then caused herself to be burned with the corpse, as she had no wish to live after her revenge had been inflicted.

Signrhoeffundr, in Norse mythology, was one of *Odin's* names, signifying the originator of victory.

Sigrin (or *Sigurlin*), in Norse mythology, was a daughter of king Swafnir of Swawaland, and the most beautiful of women. She was sought in marriage by king Hiorward and also by Hrodmar, the former winning the prize through the cunning of his follower, the

jarl Idmund, who shot the jarl Franmarr when the latter, wearied with the duty of guarding Sigrin, which he did in the form of an eagle, had fallen asleep.

Sigrun, in Norse mythology, was a celebrated heroic maiden of the primitive time. See SWAWA.

Sigrunnur, in Norse mythology, was a surname of *Odin*, signifying the fortunate victor.

Sigthror, in Norse mythology, was one of *Odin's* names, signifying the mighty victor.

Sigtifar (*the fortunate, victorious gods*), in Norse mythology, is a name given to all the Asens.

Sigtöpir (*the houses of the blessed ones*), in Norse mythology, is the abode which shall be occupied by the asas who remain after the destruction of the world.

Sigtun, in Norse mythology, is the residence beside the Mælar sea in the dominions of king Gylfe which *Odin* selected for himself. It was a temple and place of sacrifice.—Vollmer, *Wörterb. d. Mythol.* s. v.

Sigtyr, in Norse mythology, is a surname of *Odin*, signifying the god of victory.

Sigurlami, in Norse mythology, was a son of *Odin* who was made king of Garderike (Russia) by his father. He married Heida, the daughter of a Swedish king, and became the ancestor of a famous race of heroes.

Sigyn, in Norse mythology, was the wife of the evil asa Loki, to whom she bore two sons, named Narve and Vale.

Si'hon (Heb. *Sichon*, סִיחֹן [or סִיחָן], Numb. xxi, 21, 23, 26, 28, 34; xxxii, 33; Deut. i, 4; ii, 24, 31, 32; iii, 2, 6; iv, 46; xxix, 7; Josh. ii, 10; Jer. xlviii, 45], sweeping away, i. e. warrior [Gesen.], or bold [Furst]; Sept. Σιών v. r. Σίων; Josephus, Σιχών), the king of the Amorites when Israel arrived on the borders of the Promised Land (Numb. xxi, 21). B.C. 1618. He was evidently a man of great courage and audacity. Shortly before the time of Israel's arrival, he had dispossessed the Moabites of a splendid territory, driving them south of the natural bulwark of the Arnon with great slaughter and the loss of a great number of captives (xxi, 26-29). When the Israelitish host appears, he does not hesitate or temporize like Balak, but at once gathers his people together and attacks them. But the battle was his last. He and all his host were destroyed, and their district from Arnon to Jabbok became at once the possession of the conqueror. Josephus (*Ant.* iv, 5, 2) has preserved some singular details of the battle, which have not survived in the text either of the Hebrew or Sept. He represents the Amoritish army as containing every man in the nation fit to bear arms. He states that they were unable to fight when away from the shelter of their cities, and that being especially galled by the slings and arrows of the Hebrews, and at last suffering severely from thirst, they rushed to the stream and to the shelter of the recesses of the ravine of the Arnon. Into these recesses they were pursued by their active enemy and slaughtered in vast numbers. Whether we accept these details or not, it is plain, from the manner in which the name of Sion fixed itself in the national mind, and the space which his image occupies in the official records and in the later poetry of Israel, that he was a truly formidable chieftain (Deut. xxxi, 4; Josh. ix, 10; xii, 2, 5; xiii, 10, 21, 27; Judg. xi, 19, 20, 21; 1 Kings iv, 19; Neh. ix, 22; Psa. cxxxv, 11; cxxxvi, 19). It is probable that a trace of the name still remains in the *Jebel Shihan*, a lofty and conspicuous mountain just to the south of the Wady Mojeb.

Si'hor (Josh. xiii, 8). See SHIHOR.

Sikes, HENRY N., a minister of the Methodist Episcopal Church, was born in Fulton County, Pa., in 1833.

He was converted in early youth, and began to preach in his nineteenth year. He united with the Baltimore Conference in 1854, and served in the regular ministerial work (with the exception of two years—1861 and 1862—when he acted as chaplain of the U. S. Penitentiary at Washington, D. C.) until his death, June 20, 1865. Mr. Sikes had a vigorous and well-stored mind, and was untiring, industrious, and of unflinching courage. See *Minutes of Annual Conferences*, 1866, p. 17.

Sikhs (a corruption of Sanscr. *śiṣya*, *disciple*), originally a religious sect, since grown into a nation, and inhabiting the Punjab. Their founder was Nanok (q. v.), who has been succeeded by nine pontiffs, each of whom, like himself, is popularly denominated *guru*, or teacher. His object was to unite Hindûs and Mohammedans on the basis of a pure monotheism and of human brotherhood. Sufficient proof of the comprehensive character of his scheme is afforded by the circumstance that he accepted concurrently the incarnations of Neo-Brahmarism and the mission of the Arabian prophet. Nanok's three immediate successors, while zealously protecting the interests of the infant sect, avoided secular pursuits, and held themselves aloof from political complications. Arjūn (Arjunmal), compiler of the Sikh doctrines in a volume called *Ādigranth*, and founder of Amritsar, the holy city of the Sikhs, also rendered himself conspicuous as a partisan of the rebellious prince Khusrū, son of Jahangir. He was imprisoned by the Mussulman government, tortured, and put to death in 1606. His son, Har Govind, led the Sikhs against the Mohammedans, but was driven from Lahore to the northern mountains. It was under Guru Govind, the tenth of the "teachers," that the Sikhs were first formed into a separate state. He combated the Mohammedan power and religion; and Hindûism, with its castes, fictions, and irrational idolatry, fell under his ban. He also wrote the second volume of the Sikh Scriptures, in which are taught the worship of one God, strict morality, and, equally, living by the sword. He was assassinated while in the imperial service in 1708, on the banks of the Godāvari. After his death, persecution from time to time greatly reduced the strength of the tribe; but their religious fanaticism, nourished by the sacred writings which successive leaders had prepared, lent vigor to their warlike energies. In 1764 they convened a general assembly, formally assumed the character of a nation, and issued coin from which the name of the emperor was omitted. Their commonwealth was designated *Khalsa*, and its twelve component states were called *misals*, and were governed by *sirdars*, or petty chiefs, of whom Maha Singh was the most powerful. His son, Runjit Singh, consolidated the misals into a unity subject to his own sway, A.D. 1838. The following year he died, aged fifty-nine years, leaving a kingdom, called Lahore, which included all the principal Sikh states except those east of the Sutlej. In 1846 they were conquered by the English, and ceased to be a nation. New complications arising, war between the Sikhs and English was renewed in 1848, but concluded unfavorably for the Sikhs in February, 1849. The portion of the Sikh territory remaining independent is comprised in the nine small states of Sirhind. The Sikhs were faithful to the English during the Sepoy rebellion in 1857, and aided materially in its suppression. The Sikhs still maintain their national characteristics, being tall, thin, dark, active, excellent soldiers, frank, sociable, and pleasure-loving. Their number in British India was officially given in 1868 as 1,129,319. A critical acquaintance with the real views of Nanok and Govind must remain a matter of conjecture until a detailed translation is made of their works by some scholar completely versed in Hindû philosophy. The *Ādigranth* (the original record) and the *Dasvīn Palāshī dā Granth* (the record of the tenth king) are metrical throughout, and are chiefly in Hindû and Panjabi, the former containing additionally a little Sanscrit, and the latter a long chapter in Persian.

See Cunningham, *History of the Sikhs*; Malcolm, *Sketch of the Sikhs*; *Asiatic Researches*, vols. i, ii; and *The Calcutta Review*, vols. xxi, xxiii.

Silānus is mentioned as governor of Syria by Josephus (*Ant.* xviii, 2, 4, s. f.). According to Tacitus (who surnames him *Creticus*), he was in that office in A.D. 16, but removed from the governorship by Tiberius in the following year, on account of the connection of his family with Germanicus, inasmuch as a daughter of Silanus had been betrothed to Nero, the eldest of the children of Germanicus (*Annals*, ii, 4, 43). From his name, Creticus Silanus, it has been conjectured that he originally belonged to the Julia gens, but was adopted by the Cæcilia gens. It has been further supposed that he is the same person as the consul Silanus of A.D. 9 (Dion Cass. iv, 30), who is better known as *Metellus*. In that case his full name would have been Q. Cæcilius Metellus Creticus Silanus.

Sil'as (Σίλας), an eminent member of the early Christian Church, described under that name in the Acts, but probably as *Silvanus* (q. v.) in Paul's epistles, B.C. 47-55. The Alexandrine writers adopted somewhat bold abbreviations of proper names, such as Zenas for Zenodorus, Apollos for Apollonius, Hermas for Hermodorus. The method by which they arrived at these forms is not very apparent. Silas first appears as one of the leaders (ἡγούμενοι) of the Church at Jerusalem (Acts xv, 22), holding the office of an inspired teacher (προφήτης, ver. 32). His name, derived from the Latin *silva*, "wood," betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (xvi, 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (xv, 22, 32). Having accomplished this mission, he returned to Jerusalem (ver. 33; the following verse, ἔδοξε δὲ τῷ Σίλᾳ ἐπιμεῖναι αὐτοῦ, is perhaps an interpolation introduced to harmonize the passage with ver. 40). He must, however, have immediately revisited Antioch, for we find him selected by Paul as the companion of his second missionary journey (ver. 40; xvii, 40). At Berea he was left behind with Timothy while Paul proceeded to Athens (ver. 14), and we hear nothing more of his movements until he rejoined the apostle at Corinth (xviii, 5). Whether he had followed Paul to Athens in obedience to the injunction to do so (xvii, 15), and had been sent thence with Timothy to Thessalonica (1 Thess. iii, 2), or whether his movements were wholly independent of Timothy's, is uncertain (Conybeare and Howson, *Life of St. Paul*, i, 458, note). His presence at Corinth is several times noticed (2 Cor. i, 19; 1 Thess. i, 1; 2 Thess. i, 1). He probably returned to Jerusalem with Paul, and from that time the connection between them appears to have terminated. Whether he was the Silvanus who conveyed Peter's first epistle to Asia Minor (1 Pet. v, 12) is doubtful; the probabilities are in favor of the identity; the question is chiefly interesting as bearing upon the Pauline character of Peter's epistles (De Wette, *Einleit.* § 4). We have to notice, for the purpose of rejecting the theories which identify Silas with Tertius (Rom. xvi, 22) through a Hebrew explanation of the name (שִׁלְשִׁי), and again with Luke, or at all events with the author of the Acts (Alford, *Prolegom. in Acts*, i, 1). The traditions (ap. Dorotheum et Hippolytum) regard Silas and Silvanus as different persons, making the former bishop of Corinth, and the latter bishop of Thessalonica (see Fabricius, *Luz Evang.* p. 117; Cellarius, *Diss. de Sila Viro Apostol.* Jen. 1773). See PAUL.

Silent Prayer. In the ancient Church none but communicants were permitted to remain in the Church during the communion service. The entrance on this service was made by a mental or silent prayer, offered by the people in private, and thence called *εὐχή διὰ σωπῆς*, the silent prayer, and *εὐχή κατὰ διάνοιαν*, the

mental prayer (*Cont. Laodic.* can. 19). Some take the prayer in silence here to mean no more than prayers made over the communicants by the minister alone, the people not making any responses; but we are to understand here such private prayers as each particular person made by himself. That there were such private prayers appears not only from the canon, but from several ancient writers (Chrysostom, *De non Evulgandis Peccatis*, v, 762; Basil, *Ep.* 63). See Bingham, *Christ. Antiq.* bk. xv, ch. i, § 1.

Silentiarii, a name given, 1, to some monks in early times. This was not a name of any particular order, but given to some few for their professing a more than Pythagorean silence; such as Johannes Silentarius, who was first bishop of Colonia in Armenia, but renounced his bishopric to become a monk in Palestine, where he got the name of *Silentiarius* from his extraordinary silence (Cyril, *Acta Sanctorum*, Maii 13, vol. iii, p. 234).

2. More commonly to certain men who were civil officers in the emperor's palace, and served both as apparitors to execute public business, and as guards to keep the peace about him, when they had the name of *Silentiarii*, under which title they are spoken of in the *Theodosian Code* (lib. vi, tit. 23). See Bingham, *Christ. Antiq.* bk. vii, ch. ii, § 14.

Silentium Indicere, an ancient form of speech used to bid the people fall to their private devotions. This signal was given by the deacon; but when the bishop gave the signal, he said *Oremus* (Let us pray). See Bingham, *Christ. Antiq.* bk. xv, ch. i, § 1.

Silenus, in Grecian mythology, was originally synonymous with *satyr* (q. v.); but when the latter term became attached to a class of companions of Bacchus, a single one of them, Silenus, obtained a special prominence. He was said to be the son of Mercury or of Pan, and the inseparable companion of Bacchus, whom he brought up and instructed. Silenus was represented as a jovial old man, bald-headed, pug-nosed, fat and round like the wine-bag which he constantly carried, and usually intoxicated. He did not, consequently, trust to his legs, but generally rode on an ass. His special delight was in music and dancing, a certain dance being named from him, *Silenus*; and the invention of the flute is sometimes attributed to him. He also appears, in contrast with his undignified external appearance, as a Bacchic inspired prophet who has a familiar knowledge of things both past and future, and as a despiser of the gifts of fortune and of earthly life. When he was drunk and asleep, he was in the power of mortals, who might compel him to prophesy and sing by surrounding him with chains of flowers. Silenus had a temple at Elis, in Greece, where Methe (drunkenness) stood by his side handing him a cup of wine. As the companion of Bacchus, he took part in the contest with the giants, whom he put to flight, in part through the braying of his ass. The name is thought to be derived from a root signifying to *flow* or *run*, so that Silenus was considered the rearer of Bacchus, either because moisture is necessary to the growth of the vine, or because the ancients always mixed water with the wine they drank. See Smith, *Dict. of Class. Mythol.* s. v.; Vollmer, *Wörterb. d. Mythol.* s. v.; Hirt, *Mythol. Bilderb.* p. 104, etc.; Müller, *Ancient Art*, etc., § 336.

Silfintopr, in Norse mythology, was one of the famous asa-horses on which the gods rode to the daily seat of judgment.

Silicernium (etymology unknown), a feast given in honor of the dead, but it is uncertain on what day. It sometimes appears to have been given at the time of the funeral, sometimes on the *Novendiale* (q. v.), and sometimes later.

Siliniež, in Slavie mythology, was the forest god of the Poles, to whom the mosses were sacred and whose

altar-fires were fed with moss alone. See Vollmer, *Wörterb. d. Mythol.* s. v.

Silk. The only *undoubted* notice of this material in the canonical Bible occurs in Rev. xviii, 12, where it is mentioned (*σηρικόν*) among the treasures of the typical Babylon. So also in 1 Macc. iv, 23, in the enumeration of the spoil obtained from the Syrians by Judas. It is, however, in the highest degree probable that the texture was known to the Hebrews from the time that their commercial relations were extended by Solomon. For, though we have no historical evidence of the importation of the raw material to the shores of the Mediterranean earlier than that of Aristotle (*Hist. Anim.* v, 19) in the 4th century B.C., yet that notice, referring as it does to the island of Cos, would justify the assumption that it had been known at a far earlier period in Western Asia. The commercial routes of that continent are of the highest antiquity, and an indirect testimony to the existence of a trade with China in the age of Isai-ah is probably afforded us in his reference to the Sinim (q. v.). The well-known classical name of the substance (*σηρικόν*, *sericum*) does not occur in the Hebrew language, although Calmet conjectured that שֵׁרִיקוֹת, *serikóth* (Isa. xix, 9, A. V. "fine") was connected with *sericum*. But the absence of the mention of silk in the Old Test. may be accounted for partly on the ground that the Hebrews were acquainted only with the texture, and not with the raw material, and partly on the supposition that the name *sericum* reached the Greeks by another channel, viz. through Armenia. The Hebrew terms which have been supposed to refer to silk are מֶשֶׁה, *mésh*, and מֶשֶׁשׁ, *deméshek*. The former occurs only in Ezek. xvi, 10, 13 (A. V. "silk"), and is probably connected with the root *masháh*, "to draw out," as if it were made of the finest drawn silk in the manner described by Pliny (vi, 20; xi, 26); the equivalent term in the Sept. (*τριχαπτον*), though connected in point of etymology with *hair* as its material, is, nevertheless, explained by Hesychius and Suidas as referring to silk, which may well have been described as resembling hair (see Fuller, *Miscell.* ii, 11; Schröder, *Vestit. Mulier.* p. 324 sq.). The other term, *deméshek*, occurs in Amos iii, 12 (A. V. "Damascus"), and has been supposed to refer to silk from the resemblance of the word to our "damask," and of this again to "Damascus," as the place where the manufacture of silken textures was carried on. It appears, however, that "damask" is a corruption of *dímakso*, a term applied by the Arabs to the raw material alone, and not to the manufactured article (Pusey, *Min. Proph.* p. 183). The A. V. confounds שֵׁשׁ, *shésh*, *byssus*, with "silk" in Prov. xxxi, 22. We must therefore consider the reference to silk as extremely dubious. (See Hartmann, *Hebräerinn.* ii, 126 sq.; iii, 406 sq.) We have notice of silk under its classical name (שֵׁרִיקוֹת) in the Mishna (*Kil.* ix, 2), where Chinese silk is distinguished from floss-silk. The value set upon silk by the Romans, as implied in Rev. xviii, 12, is noticed by Josephus (*War.* vii, 5, 4), as well as by classical writers (e. g. Sueton. *Calig.* 52; Mart. xi, 9). Aristotle (*Hist. Anim.* v, 19) gave the first correct account of its nature by describing it as unwound from a large horned caterpillar. Notwithstanding this information, however, the most erroneous notions continued to be entertained respecting its origin; for Pliny (*Hist. Nat.* xi, 22) attributed it to a worm that built nests of clay and collected wax; while Virgil (*Georg.* ii, 121) and other authors supposed that the Seres carded the down from the leaves of plants and from flowers.

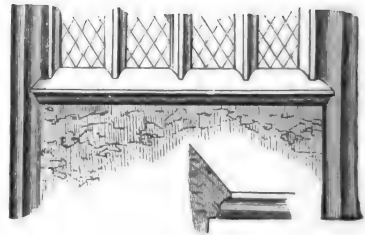

There can scarcely be a doubt that silk, the most beautiful of all the fabrics of the loom, was known and employed by the Assyrians long before the captivity of the prophet by the river Chebar. The Medes were notorious for the luxuriance and effeminacy of their costume, as is well shown in Xenophon's copious details

(*Cyrop. passim*). After the conquest of Babylon and the possession by the Persians of universal empire, the very quintessence of magnificence was "the Median robe," which thenceforward became the dress of honor. "Cyrus distributed robes to his great men, most beautiful and noble, all of the Median sort." These were made of silk; for Procopius, writing long afterwards, when the silk-worm had become known in Europe, says, "The robes which the Greeks used to call Median we now call *silken*." The author of *The Periplus of the Erythrean Sea* speaks of silk in Malabar as an article imported from countries farther east, which, however, can only apply to the raw material; for in the Statutes of Menu, of an antiquity far more remote, we read of "silk and woollen stuffs" and "silken clothes" (*Menu*, v, 120; xii, 64); and "woollen cloth, deer-skins, jewels, soft silks, variously colored garments, and beautiful ornaments" are enumerated as presents in the *Ramayāna* (i, 61). Pliny, commenting on the passage in Aristotle above cited, states that silk came to Greece from Assyria and was worked up by the Grecian women; and we may fairly conclude that the rich and curious products of China, her silk and porcelain, reached the marts of Egypt, of Phœnicia, and of Greece by various routes—one from the south of China through India, and thence either by sea up the Persian and Arabian gulfs or across the Indus through Persia by the great Syrian and Arabian caravans; and another by the grand route of Central Asia, by Bactra, "situate on the highway of the confluence of nations," whence the opulence of Thibet, Tartary, and China was poured in a ceaseless and splendid tide of traffic through the Caspian Gates (see Heeren, *Hist. Researches*, *passim*; and Wilkinson, *Anc. Egypt*, iii, 107). "As the dress described [in Ezek. xvi] is intended to be of the richest materials, it might well be supposed that the prophet would mention silk if silk were known to him. Silk continued to bear an astonishingly high price down to a comparatively late period. Thus we find that silk was forbidden to be worn by men under Tiberius. When they did wear it, silk formed only part of the fabric, robes entirely of silk being left to the women. It is numbered among the most extravagant luxuries or effeminacies of Heliogabalus that he was the first man who wore a robe of entire silk; and the anecdotes are well known of the emperor M. Antoninus, who caused a silk robe which had become his property to be sold, and of the emperor Aurelian, who refused, on the ground of its extravagant cost, a silk dress which his consort earnestly requested from him. Such anecdotes have an emphasis here, where, by a figurative reference to the most rich and costly articles of dress then known, God describes the precious and glorious things with which he had invested the people he redeemed from the bondage and misery of Egypt" (Kitto, *Pict. Bible*, ad loc.).

The silk known to us is entirely produced by one insect, the caterpillar of a sluggish moth known as *Bombyx mori*, after its proper food-plant, the mulberry (*Morus*). The larvæ of other moths produce silk, and in India several species are cultivated, as the Tusseh and the Arrindy silk-worms. But there is none that can compete with the Chinese worm for the exquisite softness, gloss, and beauty of its silk, and its suitability for the finer textiles. Every one in this country is now familiar with the history of the bombyx; with the

round, flattened eggs; the gray worms which they produce which feed so voraciously on mulberry-leaves, till they become plump white caterpillars, three inches long, and furnished with a little horn behind; with the oval yellow cocoons of silk which these caterpillars form around their own bodies; with the short brown pupa into which each immature caterpillar changes; and with the soft, downy, cream-colored moth with feathery antennæ that in due time emerges from the pupa, and from the cocoon if undisturbed. The mode of unwinding the cocoons and reeling off the silken thread is also familiarly known.

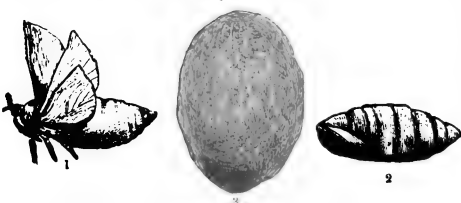

Sill, CILL, or SOLE (Fr. *seuil*, from Lat. *solum*). 1. The horizontal piece of timber or stone forming the bottom of a window, doorway, or other similar opening. 2. Also the horizontal piece of timber, or plate, at the bottom of a wooden partition. 3. Also the horizontal piece of timber near the base of houses which are built partly of timber and partly of brick.—Parker, *Gloss. of Architect.* s. v.

Window-sill, Fotherlughay, England.

Sill, GEORGE G., a Presbyterian minister, was born at Lyme, Conn., Jan. 26, 1791. He received a good education, studied theology at Auburn Seminary, N. Y., was licensed by Rochester Presbytery in 1821, and ordained by the same in 1825 as an evangelist among the new settlements of the presbytery. He afterwards preached at Mendon, N. Y., for some years. In 1827 he edited the *Rochester Observer*, the first religious newspaper in Western New York. He removed, in 1835, to Illinois, where, in 1841, he joined the Reformed Dutch Church, and labored at Brunswick, Peoria Co. In 1849 he removed to Farmington, Mich., and finally returned East with no regular charge, preaching in the vicinity of Albany, N. Y., to the poor and destitute. He died May 28, 1859. Mr. Sill was a good scholar, and specially fond of antiquarian research. He was the author of a *Verse Book of Scripture for Sunday-schools* (Rochester, 1834, 8vo):—a *Manual of the History and Polity of the Reformed Dutch Church*:—and a *Genealogical History of the Sill Family* (Albany, 1859, 12mo), posthumous. See Wilson, *Presb. Hist. Almanac*, 1860, p. 204; Whitmore, *Hand-book of Amer. Geneal.* p. 158. (J. L. S.)

Sil'la (Heb. *Silla'*, סִלָּה, a twig or basket [Gesen.], a highway [Furst]; Sept. Γαῖλλα and Γαλαᾶδ; Vulg. Sela). "The house of Millo which goeth down to Silla" was the scene of the murder of king Joash (2 Kings xii, 20). Millo seems most probably to have been the citadel of the town, and situated on Mount Zion. Silla must have been in the valley below, overlooked by that part of the citadel which was used as a residence. The situation of the present so-called Pool of Siloam would be appropriate, and the agreement between the two names is tempting (Schwarz, *Palest.* p. 241); but the likeness exists in the Greek and English versions only, and in the original is too slight to admit of any inference. Gesenius, with less than his usual caution, affirms Silla to be a town in the neighborhood of Jerusalem. Others (as Thénien, in *Kurzgef. erz. Handb.* on the passage; Ewald, *Gesch. Isr.* iii, 70) refer it to a place on connected with the causeway or flight of steps (סִלָּה) which led from the central valley of the city up to the court of the temple. This latter is confirmed

Silk-worm. 1. Moth; 2. Chrysalis; 3. Cocoon.

by the etymology (from שִׁלָּה, to raise an embankment). See JERUSALEM.

Silla, the actual and supreme god in the mythology of the Greenlanders, who is also named *Pirksuma*. The name signifies *the one above*. He raises the dead to eternal life, and is graciously or angrily disposed towards men in accordance with their character for virtue. The training of children is not at all understood by that people; but the invariable earnestness, quietness, and good behavior of the older persons produce their effects upon the young in begetting in them similar traits. A mother may, nevertheless, be heard now and then to rebuke her child with the words "Silla tekou," i. e. *the one above sees it*. Silla is to them the Supreme and Incomprehensible Being.

Sillagik Sartok, a powerful idol, venerated among the Greenlanders. He dwells in the fields of ice, and causes storms.

Sillery, FABIO BRULART DE, a French prelate, was born at the castle of Pressigny (Touraine) Oct. 25, 1655, and was a relative of the marquis Nicolas de Brulart. He was educated in philosophy at the Collège de la Maréche, and was received into the Sorbonne as a teacher in 1681. In 1689 he was appointed bishop of Avranches, and in 1692 exchanged that see for Soissons. He died at Paris Nov. 20, 1714. He left a few religious works, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Sillick, JOHN A., a minister of the Methodist Episcopal Church, was born in Saratoga, N. Y., May 21, 1805, and was converted at the age of twelve. Falling away, he was restored when about twenty-four. He then spent two years at Wilbraham Academy, and about two years at the Wesleyan University. In 1834 he joined the New York Conference, and remained in it until its division (1848), when he became a member of the New York East Conference. In 1854 he was transferred to the New York Conference, and continued effective till 1861, when he took a superannuated relation, and settled in Yorkville, a suburb of New York city, where he died July 10, 1865. He was kind and generous, a good preacher, practical, entertaining, and instructive. See *Minutes of Annual Conferences*, 1865, p. 73.

Sillon See BRIER.

Silnoy-Bog, a god mentioned in Slavic mythology who is believed to be the war-god of the ancient Russians and Poles. He is represented as a warrior, heavily armed, and having the skulls of men and beasts scattered about at his feet.

Silo'äh, Silo'am, or Shilo'äh, a place in the vicinity of Jerusalem, of great importance in some respects both in ancient and modern times.

I. *Name*.—This occurs in a different form both in the original and in the A. V., as applied to water, in three passages of Scripture, which we here arrange chronologically.

1. "THE WATERS OF SHILOAH" (Heb. *Mey hash-Shilo'äh*, מַי הַשִּׁלּוֹחַ; Sept. τὸ ὕδωρ τοῦ Σειλωάμ v. r. Σιλωάμ; Saadiah, *Ain Selwân*; Vulg. *agua Siloe*), a certain soft-flowing stream employed by the prophet Isaiah (viii, 6) to point his comparison between the quiet confidence in Jehovah which he was urging on the people, and the overwhelming violence of the king of Assyria, for whose alliance they were clamoring.

There is no reason to doubt that the waters in question were the same that are better known under their later name of *Siloum*—the only perennial spring of Jerusalem. Objection has been taken to the fact that the "waters of Siloam" run with an irregular intermittent action, and therefore could hardly be appealed to as flowing "softly." But the testimony of careful investigators (Robinson, *Bib. Res.* i, 341, 2; Barclay, *City of the Great King*, p. 516) establishes the fact that the disturbance only takes place, at the oftenest, two or three times a day, say three to four hours out of the twenty-

four, the flow being "perfectly quiescent" during the rest of the time. In summer the disturbance only occurs once in two or three days. Such interruptions to the quiet flow of the stream would therefore not interfere with the contrast enforced in the prophet's metaphor.

2. "THE POOL OF SILOAH" (Heb. *Berekäth hush-She'elach*, בְּרֵכַת הַשִּׁלָּח; Sept. *κολυμβήθρα τῶν κωδίων* v. r. τῶν Σιτοῦ Σιλωάμ; Vulg. *Piscina Siloe*), a locality on the southern wall of the city near "the king's garden" (Neh. iii, 15). This was possibly a corrupt form of the name which is first presented as Shiloach, then as Siloam, and is now *Selwân*. The root of them all is doubtless שָׁלַח, *shalách*, "to send." The meaning of *Sheluch*, taken as Hebrew, is "dart." This cannot be a name given to the stream on account of its swiftness, because it is not now, nor was it in the days of Isaiah, anything but a very soft and gentle stream (Isa. viii, 6). It is probably an accommodation to the popular mouth, of the same nature as that exemplified in the name Dart, which is now borne by more than one river in England, and which has nothing whatever to do with swiftness, but is merely a corruption of the ancient word, which also appears in the various forms of Derwent, Darent, and perhaps Trent.

3. "THE POOL OF SILOAM" (ἡ κολυμβήθρα τοῦ Σιλωάμ, which the evangelist immediately explains by adding, "which is interpreted *Sent*," ὃ ἐρμηνεύεται Ἀπισταλμένος, evidently deriving it from שָׁלַח), a bathing-place in the vicinity of Jerusalem to which our Lord sent the blind man to wash in order to the recovery of his sight (John ix, 7-11).

In this connection we may also refer to the only other Biblical occurrence of the name by "the TOWER IN SILOAM" (ὁ πύργος ἐν τῷ Σιλωάμ, Vulg. *turris in Siloe*), to which Jesus alluded as the cause of a great calamity to certain Jews (Luke xiii, 4). There is no good reason to suppose a different place to be here meant; but some structure adjoining the fountain is doubtless designated. There were fortifications hard by, for of Jotham we read, "on the wall of Ophel he built much" (2 Chron. xxvii, 3); and of Manasseh that "he compassed about Ophel" (xxxiii, 14); and, in connection with Ophel, there is mention made of "a tower that lieth out" (Neh. iii, 26); and there is no unlikelihood in connecting this projecting tower with the tower in Siloam, while one may be almost excused for the conjecture that its projection was the cause of its ultimate fall.

The above change in the Masoretic punctuation perhaps indicates merely a change in the pronunciation or in the spelling of the word, sometime during the three centuries between Isaiah and Nehemiah. Rabbinical writers, and, following them, Jewish travellers, both ancient and modern, from Benjamin of Tudela to Schwarz, retain the earlier *Shiloach* in preference to the later *Shelach*. The rabbins give it with the article, as in the Bible (חֲשִׁילָּח, *Dach*, *Codex Talmudicus*, p. 367). The Sept. gives Σιλωάμ in Isaiah; but in Nehemiah *κολυμβήθρα τῶν κωδίων*, the pool of the sheep-skins, or "fleece-pool;" perhaps because, in their day, it was used for washing the fleeces of the victims. In Talmudical Hebrew *Shelach* signifies "a skin" (Levi, *Lingua Sacra*); and the Alexandrian translators attached this meaning to it, they and the earlier rabbins considering Nehemiah's *Shelach* as a different pool from Siloam, probably the same as Bethesda, by the sheep-gate (John v, 2), the *προβατικὴ κολυμβήθρα* of Eusebius, the *probatica piscina* of Jerome. If so, then it is Bethesda, and not Siloam, that is mentioned by Nehemiah. We may observe that the Targum of Jonathan, the Peshito, and the Arabic versions of 1 Kings i, 33 read Shiloah for the *Gihon* of the Hebrew. The Vulg. has uniformly, both in the Old and the New Test., *Siloe*; in the Old calling it *piscina*, and in the New *natatoria*. The Latin fathers, led by the Vulg., have always *Siloe*; the old pilgrims, who knew nothing but the Vulg., *Siloe* or

Syloe. The Greek fathers, adhering to the Sept., have *Siloam*. The word does not occur in the Apocrypha. Josephus gives both *Siloam* and *Silwa* (Σιλωάμ and Σιλωά), generally the former.

II. *Identification*.—Siloam is one of the few undisputed localities (though Reland and some others misplaced it) in the topography of Jerusalem, still retaining its old name (with the Arabic modification, *Silwān*), while every other pool has lost its Bible designation. This is the more remarkable as it is a mere suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were both "sweet and abundant" (*War*, v, 4, 1). Apart from the identity of name, there is an unbroken chain of exterior testimony, during eighteen centuries, connecting the present *Birket Silwān* with the *Shiloah* of Isaiah and the *Siloam* of John. There are difficulties in identifying the Bir Eyub (the well of Salah-ed-dīn, *Ibn-Eyub*, the great digger of wells, Jalal-Addin, p. 239), but none in fixing Siloam. Josephus mentions it frequently in his *Jewish War*, and his references indicate that it was a somewhat noted place, a sort of city landmark. From him we learn that it was without the city (ἐξω τοῦ ἁστυος, *War*, v, 9, 4); that it was at this pool that the "old wall" took a bend and shot out eastward (ἀνακάμπτον εἰς ἀνατολήν, *ibid.*, v, 6, 1); that there was a valley under it (τὴν ὑπὸ Σιλωάμ φάραγγα, *ibid.*, vi, 8, 5), and one beside it (τῇ κατὰ τὴν Σιλωάμ φάραγγι, *ibid.*, v, 12, 2); a hill (λόφος) right opposite, apparently on the other side of the Kedron, hard by a cliff or rock called Peristereon (*ibid.*); that it was at the termination or mouth of the Tyropoeon (*ibid.*, v, 4, 1); that close beside it, apparently eastward, was another pool called Solomon's Pool, to which the "old wall" came after leaving Siloam, and past which it went on to Ophlas, where, bending northward, it was united to the eastern arcade of the Temple. In the *Antonine Itinerary* (A.D. 333) it is set down in the same locality, but it is said to be "juxta murum," as Josephus implies; whereas now it is a considerable distance—upwards of 1200 feet—from the nearest angle of the present wall, and nearly 1900 feet from the southern wall of the Haram.

Jerome, towards the beginning of the 5th century, describes it as "ad radices montis Moriah" (*in Matt. x*), and tells (though without endorsing the fable) that the stones sprinkled with the blood ("rubra saxa") of the prophet Zechariah were still pointed out (*in Matt. xxiii*). He speaks of it as being in the Valley of the Son of Hinnom, as Josephus does of its being at the mouth of the Tyropoeon (*in Jer. ii*); and it is noticeable that he (like the rabbins) never mentions the Tyropoeon, while he, times without number, speaks of the Valley of the Son of Hinnom. He speaks of Hinnom and Tophet, with their groves and gardens, as watered by Siloam (*in Jer. xix*, 6; *xxii*, 35). "Tophet, quæ est in valle filii Ennom, illum locum significat qui Siloe fontibus irrigatur, et est amœnus atque nemorosus, hodieque hortorum præbet delicias" (*in Jer. viii*). He speaks of Siloam as dependent on the rains, and as the only fountain used in his day: "Uno fonte Siloe et hoc non perpetuo utitur civitas; et usque in præsentem diem sterilitas pluviarum, non solum frugum sed et bibendi inopiam facit" (*in Jer. xiv*). Now, though Jerome ought to have known well the water supplies of Jerusalem, seeing he lived the greater part of his life within six miles of it, yet other authorities and the modern water provision of the city show us that it could never have been wholly dependent on its pools. Its innumerable bottle-necked private cisterns kept up a supply at all times, and hence it often happened that it was the *besiegers*, not the *besieged*, that suffered most; though Josephus records a memorable instance to the contrary, when, relating a speech he made to the Jews, standing beyond their darts on a part of the south-eastern wall which the Romans had carried, he speaks of Siloam as overflowing since the Romans had got access to it, whereas before,

when the Jews held it, it was dry (*War*, v, 9, 4). We may here notice, in passing, that Jerusalem is, except perhaps in the very heat of the year, a well-watered city. Dr. Barclay says that "within a circuit swept by a radius of seven or eight miles there are no less than thirty or forty natural springs" (*City of the Great King*, p. 295); and a letter from consul Finn adds, "This I believe to be under the truth, but they are almost all found to the south and south-west: in those directions there does not appear to be a village without springs." Strabo's statement is that Jerusalem itself was rocky but well watered (εὐὺδρον), but all the region around was barren and waterless (ἀνυδρὸν καὶ ἀνυδρὸν, xvi, 2, 36). We have only to add that Jerome (*Comment. in Esa. viii*, 6), indicating its situation more precisely, also mentions its irregular flow—a very remarkable circumstance, which has been noticed by most subsequent pilgrims and travellers. This assures us that the present fountain of Siloam is that which he had in view, and that it is the same to which the scriptural notices refer there is no reason to doubt.

Soon after Jerome, Antoninus of Placentia, in his *Pilgrimage* (A.D. 570), gives a similar description, and mentions especially that at certain hours only did the fountain pour forth much water. He also distinguishes between the fountain and the pool where the people washed themselves for a blessing. In the 7th century Antoninus Martyr mentions Siloam as both fountain and pool. Bernhard the monk speaks of it in the 9th century, and the annalists of the Crusades mention its site, in the fork of two valleys, as we find it. Benjamin of Tudela (A.D. 1173) speaks of "the great spring of Shiloach which runs into the brook/Kedron" (Asher's ed. i, 71), and he mentions "a large building upon it" (כנ), which he says was erected in the days of his fathers. Is it of this building that the present ruined pillars are the relics? Caumont (A.D. 1418) speaks of the Valley of Siloah, "ou est le fonteyne ou le (sic) vierge Marie lavoit les drapellez de son enfant," and of the fountain of Siloam as close at hand (*Voyage d'Oultramer en Jherusalem*, etc. [Paris ed.], p. 68). Felix Fabri (A.D. 1484) describes Siloam at some length, and seems to have attempted to enter the subterranean passage, but failed, and retreated in dismay after filling his flasks with its eye-healing water. Arnold von Harff (A.D. 1496) also identifies the spot (*Die Pilgerfahrt* [Col. ed.], p. 186). After this the references to Siloam are innumerable; nor do they, with one or two exceptions, vary in their location of it. We hardly needed these testimonies to enable us to fix the site, though some topographers have rested on these entirely.

Scripture, if it does not actually set it down in the mouth of the Tyropoeon as Josephus does, brings us very near it, both in Nehemiah and John. The reader who compares Neh. iii, 15 with xii, 37 will find that the pool of Siloah, the fountain-gate, the stairs of the city of David, the wall above the house of David, the water-gate, and the king's garden were all near each other. The evangelist's narrative regarding the blind man, whose eyes the Lord miraculously opened, when carefully examined leads us to the conclusion that Siloam was somewhere in the neighborhood of the Temple. The Rabbinical traditions, or *hitories*, as they doubtless are in many cases, frequently refer to Siloam in connection with the Temple service. It was to Siloam that the Levite was sent with the golden pitcher on the "last and great day of the feast" of Tabernacles; it was from Siloam that he brought the water which was then poured over the sacrifice, in memory of the water from the rock of Rephidim; and it was to this Siloam water that the Lord pointed when he stood in the Temple on that day and cried, "If any man thirst, let him come unto me and drink." The Lord sent the blind man to wash, not *in*, as our version has it, but *at* (ἐν) the pool of Siloam (see Wolfii *Cure*, etc. Or ἐν gets its force from ὑπαγε, νῆσαι coming between the verb and its

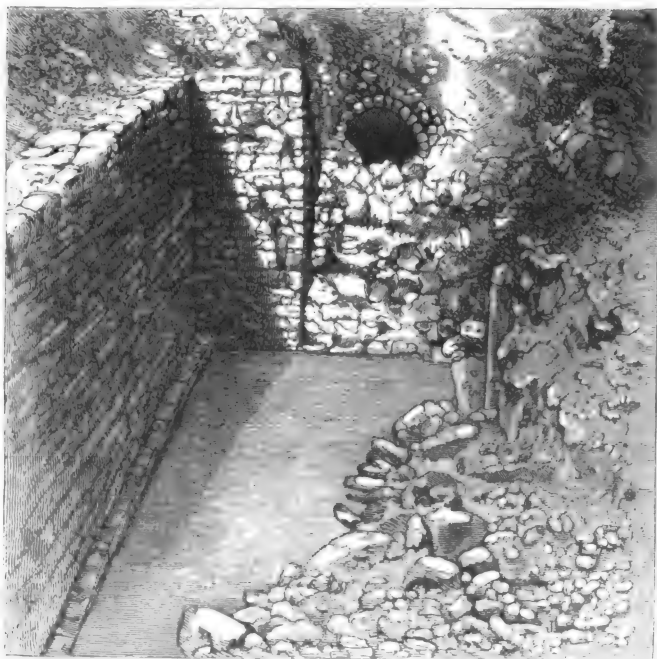

preposition, parenthetically, "Go to the pool and wash thine eyes there"), for it was the clay from his eyes that was to be washed off; and the evangelist is careful to throw in a remark, not for the purpose of telling us that Siloam meant an "aqueduct," as some think, but to give higher significance to the miracle. "Go wash in the pool of Siloam" was the command; the evangelist adds, "which is by interpretation, sent." On the inner meaning here, the parallelism between "the sent one" (Luke, iv, 18; John x, 36) and "the sent water," the missioned one and the missioned pool, we say nothing further than what St. Basil said well, in his exposition of the 8th of Isaiah: *τίς οὐν ὁ ἀπεσταλμένος καὶ ἀφοψηγὶ ῥέων; ἡ περὶ οὗ εἰρήναι, κύριος ἀπέσταλκε με· καὶ πάλιν, οὐκ ἔρρει οὐδὲ κραυγάζει.* That "sent" is the natural interpretation is evident, not simply from the word itself, but from other passages where *ἀποστέλλω* is used in connection with water, as Job iii, 10, "he sendeth waters upon the fields;" and Ezek. xxxi, 4, "she sent out her little rivers unto all the trees of the field." The Talmudists coincide with the evangelist, and say that Shiloach was so called because it sent forth its waters to water the gardens (Levi, *Lingua Sacra*). We may add Homer's line—

ἐννήμιον δ' ἐς τεῖχος ἴει ῥέον (Il. xii, 25).

III. *Modern Locality.*—1. *General Description.*—A little way below the Jewish burying-ground, but on the opposite side of the valley, where the Kedron turns slightly westward and widens itself considerably, is the Fountain of the Virgin, or Um ed-Deraj, near the beginning of that saddle-shaped projection of the Temple hill supposed to be the Ophel of the Bible and the Ophlas of Josephus. See EN-ROGEL. At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, as did Robinson, Barclay, and Warren, sometimes walking erect, sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloam. This rocky conduit, which twists considerably, but keeps, in general, a south-westerly direction, is, according to Robinson, 1750 feet long, while the direct distance between Silwān and Um ed-Deraj is only a little above 1200 feet. In former days this passage was evidently deeper, as its bed is sand of some depth, which has been accumulating for ages. This conduit has had tributaries, which have formerly sent their waters down from the city pools or Temple wells to swell Siloam. Barclay writes, "In exploring the subterraneous channel conveying the water from the Virgin's Fount to Siloam, I discovered a similar channel entering from the north, a few yards from its commencement; and on tracing it up near the Mugrabin gate, where it became so choked with rubbish that it could be traversed no farther, I there found it turn to the west, in the direction of the south end of the cleft or saddle of Zion; and if this channel was not constructed for the purpose of conveying to Siloam the surplus waters of Hezekiah's aqueduct, I am unable to suggest any purpose to which it could have been applied" (*City of the Great King*, p. 309). In another place he tells us something more: "Having loitered in the pool [Virgin's Fount] till the coming-down of the waters, I soon found several widely separated places where it gained admittance, besides the opening under the steps, where alone it had for-

merly been supposed to enter. I then observed a large opening entering the rock-hewn channel, just below the pool, which, though once a copious tributary, is now dry. Being too much choked with tesserae and rubbish to be penetrated far, I carefully noted its position and bearing, and, on searching for it above, soon identified it on the exterior, where it assumed an upward direction towards the Temple, and, entering through a breach, traversed it for nearly a thousand feet, sometimes erect, sometimes bending, sometimes inching my way snake-fashion, till at last I reached a point near the wall where I heard the donkeys tripping along over my head. I was satisfied, on subsequently locating our course above ground with the theodolite, that this canal derived its former supply of water, not from Moriah, but from Zion" (*ibid.* p. 523). Lieut. Warren, of the English party exploring Jerusalem, has more recently examined the water-passages from the Virgin's Fount, and found several outlets, all blocked up, however, with debris, except one which led up through the rock to the surface on the west. He is inclined to think that the supply of water came from the Temple rock (*Jerusalem Recovered*, p. 194 sq.). Certain it is, at all events, that the water of both fountains is the same, though some travellers have pronounced the water of Siloam to be bad, and that of the Fountain of the Virgin good. It has a peculiar taste, sweetish and very slightly brackish, but not at all disagreeable. Late in the season, when the water is low, it is said to become more brackish and unpleasant. The most remarkable circumstance is the ebb and flow of the waters, which, although often mentioned as a characteristic of Siloam, must belong equally to both fountains. Dr. Robinson himself witnessed this phenomenon in the Fountain of the Virgin, where the water rose in five minutes one foot in the reservoir, and in another five minutes sank to its former level. The intervals and the extent of the flow and ebb in this and the fountain of Siloam vary with the season; but the fact, though it has not yet been accounted for, is beyond dispute.

This conduit enters Siloam at the north-west angle; or, rather, enters a small rock-cut chamber which forms the vestibule of Siloam, about five or six feet broad. To this you descend by a few rude steps, under which the

The Present "Pool of Siloam." (From a photograph taken by the Editor in 1874.)

water pours itself into the main pool (*Narrative of Mission to the Jews*, i, 207). This pool is oblong; eighteen paces in length according to Laffi (*Viaggio al Santo Sepolcro*, A.D. 1678), fifty feet according to Barclay, and fifty-three according to Robinson. It is eighteen feet broad and nineteen feet deep according to Robinson; but Barclay gives a more minute measurement: "fourteen and a half at the lower (eastern) end and seventeen at the upper; its western end side being somewhat bent. It is eighteen and a half in depth, but never filled, the water either passing directly through, or being maintained at a depth of three or four feet. This is effected by leaving open or closing (with a few handfuls of weeds at the present day, but formerly by a flood-gate) an aperture at the bottom. At a height of three or four feet from the bottom its dimensions become enlarged a few feet, and the water, attaining this level, falls through an aperture at its lower end into an educt, subterranean at first, but soon appearing in a deep ditch under the perpendicular cliff of Ophel, and is received into a few small reservoirs and troughs" (Barclay, p. 524). This large receptacle is faced with a wall of stone, now greatly out of repair. Several columns stand out of the side walls, extending from the top downward into the cistern, the design of which it is difficult to conjecture. The water passes out of this reservoir through a channel cut in the rock, which is covered for a short distance; but subsequently it opens and discloses a lively copious stream, which is conducted into an enclosed garden planted with fig-trees. It is afterwards subdivided, and seems to be exhausted in irrigating a number of gardens occupied with fig, apricot, olive, and other trees, and some flourishing legumes.

2. *Coincidences with Ancient Accounts.*—The small basin at the west end, which we have described, is what some old travellers call "the fountain of Siloe" (F. Fabri, i, 420). "In front of this," Fabri goes on, "there is a bath surrounded by walls and buttresses, like a cloister, and the arches of these buttresses are supported by marble pillars," which pillars he affirms to be the remains of a monastery built above the pool. The present pool is a ruin, with no moss or ivy to make it ro-

mantic; its sides falling in; its pillars broken; its stair a fragment; its walls giving way; the edge of every stone worn round or sharp by time; in some parts mere debris; once Siloam, now, like the city which overhung it, a heap; though around its edges "wild flowers, and, among other plants, the caper-tree, grow luxuriantly" (*Narrative of Mission*, i, 207). The gray crumbling limestone of the stone (as well as of the surrounding rocks, which are almost verdureless) gives a poor and worn-out aspect to this venerable relic. The present pool is not the original building; the work of crusaders it may be; perhaps even improved by Saladin, whose affection for wells and pools led him to care for all these things; perhaps the work of later days. Yet the spot is the same. Above it rises the high rock, and beyond it the city wall; while eastward and southward the verdure of gardens relieves the gray monotony of the scene, and beyond these the Kedron vale, overshadowed by the third of the three heights of Olivet, "the mount of corruption" (1 Kings x, 7; xxiii, 13), with the village of Silwân jutting out over its lower slope, and looking into the pool from which it takes its name and draws its water. This pool, which we may call the *second*, seems anciently to have poured its waters into a *third*, before it proceeded to water the royal gardens. This *third* is perhaps that which Josephus calls "Solomon's pool" (*War*, v, 4, 2), and which Nehemiah calls "the king's pool" (Neh. ii, 14); for this must have been somewhere about "the king's garden" (Josephus's βασιλικὸς παράδεισος, *Ant.* vii, 14, 4); and we know that this was by "the wall of the pool of Siloah" (Neh. iii, 15). The *Antonine Itinerary* speaks of it in connection with *Siloe* as "alia piscina grandis foras." It is now known as the *Birket el-Hamra*, and may be perhaps some five times the size of Birket es-Silwân. Barclay speaks of it merely as a "depressed fig-yard;" but one would like to see it cleared out.

Siloam is in Scripture always called a *pool*. It is not an מִצְּדָה, that is, a marsh-pool (*Isa.* xxxv, 7); nor a נֶחֱלָה, a natural hollow or pit (*xxx*, 14); nor a מִקְוֵה, a natural gathering of water (*Gen.* i, 10; *Isa.* xxii, 11);

The Village of *Silwân* (Siloam) and the Lower Part of the Valley of the Kedron, showing the "King's Gardens," which are watered by the Pool. The background is the highlands of Judah. The view is from a photograph by James Graham, Esq., taken from beneath the south wall of the Haram.

nor a בֹּרֶא, a well (Gen. xvi, 14); nor a בֹּרֶא, a pit (Lev. xi, 36); nor an עֵינַי, a spring (Gen. iii, 17); but a בִּרְכָה, a regularly built pool or tank (2 Kings xx, 20; Neh. iii, 15; Eccles. ii, 6). This last word is still retained in the Arabic, as any traveller or reader of travels knows. While Nehemiah calls it a *pool*, Isaiah merely speaks of it as "the waters of Shiloah;" while the New Test. gives κολυμβήσρα, and Josephus πηγή. The rabbins and Jewish travellers call it a fountain; in which they are sometimes followed by the European travellers of all ages, though more generally they give us *piscina*, *natatoria*, and *stagnum*.

It is the least of all the Jerusalem pools: hardly the sixth part of the *Birket el-Mamilla*; hardly the tenth of the *Birket es-Sultan*, or of the lowest of the three pools of Solomon at *El-Burak*. Yet it is a sacred spot, even to the Moslem; much more to the Jew; for not only from it was the water taken at the Feast of Tabernacles, but the water for the ashes of the red heifer (Dach, *Talm. Babyl.* p. 380). Jewish tradition makes Gihon and Siloam one (Lightfoot, *Cent. Chor. in Matt.* p. 51; Schwarz, p. 265), as if Gihon were "the bursting forth" (צִיָּה, to break out), and Siloam the receptacle of the waters "sent." If this were the case, it might be into Siloam, through one of the many subterranean aqueducts with which Jerusalem abounds, and one of which probably went down the Tyropeon, that Hezekiah turned the waters on the other side of the city, when he "stopped the upper watercourse of Gihon, and brought it straight down to the west side of the city of David" (2 Chron. xxxii, 30).

The rush of water down these conduits is referred to by Jerome ("per terrarum concava et antra saxi durissimi cum magno sonitu venit," in *Isa. viii*, 6), as heard in his day, showing that the water was more abundant then than now. The intermittent character of Siloam is also noticed by him; but in a locality perforated by so many aqueducts, and supplied by so many large wells and secret springs (not to speak of the discharge of the great city baths), this irregular flow is easily accounted for both by the direct and the siphonic action of the water. How this *natural* intermittency of Siloam could be made identical with the *miraculous* troubling of Bethesda (John v, 4) one does not see. The lack of water in the pool now is no proof that there was not the great abundance of which Josephus speaks (*War.* v, 4, 1); and as to the "sweetness" he speaks of, like the "aque dulces" of Virgil (*Georg.* iv, 61), or the Old Test. מֵי חַיִּים (Exod. xv, 25), which is used both in reference to the sweetness of the Marah waters (ibid.) and of the "stolen waters" of the foolish woman (Prov. ix, 17; it simply means fresh or pleasant, in opposition to bitter (בִּרְ; πικρός). The miracle performed on the blind man gave rise, most probably, to the tradition of the healing qualities of the water. We may here note that the sacredness and efficacy of the water are still held by Jewish tradition, but more particularly at its source, the well of the Virgin. It is the טְבִילַת ר' יִשְׁמַעֲלֵל—the bathing-place of rabbi Ismael, where the high-priest used to plunge himself, and where the modern Jews of Jerusalem visit as one of their holy places, especially on the first day of their year (*Rosh Hashshana*) and the day of atonement (*Yom Kippur*).

The expression in Isaiah, "waters of Shiloah that go softly," seems to point to the slender rivulet, flowing gently, though once very profusely, out of Siloam into the lower breadth of level, where the king's gardens, or "royal paradise," stood, and which is still the greenest spot about the Holy City, reclaimed from sterility into a fair oasis of olive-groves, fig-trees, pomegranates, etc., by the tiny rill which flows out of Siloam. A winter-torrent like the Kedron, or a swelling river like the Euphrates, carries havoc with it by sweeping off soil, trees, and terraces; but this Siloam-fed rill flows softly, fertilizing and beautifying the region through which it

passes. As the Euphrates is used by the prophet as the symbol of the wasting sweep of the Assyrian king, so Siloam is taken as the type of the calm prosperity of Israel under Messianic rule, when "the desert rejoices and blossoms as the rose." The word softly or secretly (סָתָן) does not seem to refer to the secret transmission of the waters through the tributary viaducts, but, like Ovid's "molles aquæ," "blandæ aquæ," and Catullus's "molle flumen," to the quiet gentleness with which the rivulet steals on its mission of beneficence, through the gardens of the king. Thus "Siloah's brook" of Milton, and "cool Siloam's shady rill," are not mere poetical fancies. The "fountain" and the "pool" and the "rill" of Siloam are all visible to this day, each doing its old work beneath the high rock of Moriah, and almost beneath the shadow of the Temple wall.

3. *Adjoining Village of the Same Name.*—East of the Kedron, right opposite the rough gray slope extending between Deraj and Silwân, above the kitchen-gardens watered by Siloam which supply Jerusalem with vegetables, is the village which takes its name from the pool—*Kefr-Silwân*. At Deraj the Kedron is narrow, and the village is very near the fountain. Hence it is to it rather than to the pool that the villagers generally betake themselves for water. For as the Kedron widens considerably in its progress southward, the Kefr is at some little distance from the Birkeh. This village is unmentioned in ancient times; perhaps it did not exist. It is a wretched place for filth and irregularity; its square hovels all huddled together like the lairs of wild beasts, or, rather, like the tombs and caves in which savages or demoniacs may be supposed to dwell. It lies near the foot of the third or southern height of Olivet; and in all likelihood marks the spot of the idol-shrines which Solomon built to Chemosh and Ashtoreth and Milcom. This was "the mount of corruption" (2 Kings xxiii, 13), the hill that is before (east; before in Hebrew geography means east) Jerusalem (1 Kings xi, 7); and these "abominations of the Moabites, Zidonians, and Ammonites" were built on "the right hand of the mount," that is, the southern part of it. This is the "opprobrious hill" of Milton (*Par. Lost*, i, 403); the "mons offensionis" of the Vulgate and of early travellers; the *Moṣṣaṣ* of the Sept. (see Keil, *On Kings*); and the Berg des Aergernisses of German maps. In Ramboux's singular volume of lithographs (Col. 1858) of *Jerusalem and its Holy Places*, in imitation of the antique, there is a sketch of an old monolith tomb in the village of Silwân, which few travellers have noticed, but of which De Sauley has given us both a cut and a description (ii, 215), setting it down as a relic of Jebusitish workmanship. The present village of Siloam occupies the site of an old quarry. The houses are often made simply by walling up an excavation, and sometimes they cling to the scarped face of the cliff. Steps are cut in different parts of the village, originally for the convenience of the quarrymen, and now serving as streets (*Ordinance Survey*, p. 64).

For further details, see Robinson, *Biblical Researches*, i, 460, 492-498; Olin, *Travels*, ii, 153, 154; Williams, *Holy City*, p. 378, 379; Barclay, *City of the Great King*, p. 311 sq.; Thomas, *Land and Book*, ii, 524; *Jerusalem Recovered*, p. 20; and especially Tobler, *Die Siloah-quelle und der Oelberg* (Berlin, 1852).

Silva, SAMUEL DA, a Jewish physician of the 17th century, deserves our attention on account of the part he took against Uriel (or Gabriel) Acosta (q. v.). Having succeeded in perusing Acosta's work before it was printed—a work in which the Pharisaic tradition was not only attacked, but also the immortality of the soul and the oral tradition denied—Da Silva published his *Tradado da Immortalidade da Alma* (Amst. 1623), in which he combats the ignorance "of a certain adversary of his time" (*de certo contrariador de nosso tempo*). In consequence of this attack, Acosta published his work *Er-amen das Tradicoens Pharisaeas Conferidas com a L.*

Escrita por Uriel, Juristo Hebreo (ibid. 1623), with a rejoinder against Da Silva, *Com Reposta á hum Samuel da Silvea, seu Falso Calumniador*. Ten years before the publication of the *Tradado*, Da Silva published a translation of Maimonides' treatise on repentance, *Tradado de la Thesuah, ó Contrición, Traduzida Palavra por Palavra da Língua Hebr.* (ibid. 1613). See Fürst, *Bibl. Jud.* iii, 324; De Rossi, *Dizionario Storico degli Autori Ebrei* (Germ. transl.), p. 296 sq.; Wolf, *Bibl. Hebr.* iii, 1115; Kaisersling, *Gesch. d. Juden in Portugal* (Leips. 1867), p. 288; Schudt, *Jüd. Denkwürdigkeiten*, i, 287. (B. P.)

Silvānus, an old Italic divinity. The etymology of the name denotes a *silvan* god, but descriptions of the qualities and doings of Silvanus indicate that he symbolized the life-giving forces of nature generally. He was the god of arable fields as well as of the forests, and in that character watched over the boundaries of fields and presided over their fruitfulness. The law of the *agrimensori* (a collection of various instructions relating to the surveying of land) even requires that every landed property should possess three Silvani. The forest, however, would seem always to have been the peculiar domain of Silvanus. His loud-rousing voice would be heard to issue from the wood like that of Pan, with whom he was often confounded; and sacrifices of corn, pigs, meat, and wine were there presented to him in order to invoke his favorable interference with the welfare of the herds of cattle. Pigs which devastated cultivated fields were also offered to him in sacrifice. See Smith, *Dict. of Mythol.* s. v.; Vollmer, *Wörterb. d. Mythol.* s. v.

Silvānus (Græcized Σιλωανός, from the Lat. *silvanus* for *silvanus*, "of the grove"), a distinguished Christian teacher, the companion of Paul in his journey through Asia Minor and Greece (2 Cor. i, 19; 1 Thess. i, 1, 2 Thess. i, 1; 1 Pet. v, 12); elsewhere (Acts xv, 22, 27, 32, 34, 40; xvi, 19, 25, 29; xvii, 4, 10, 14, 15; xviii, 5) in the contracted form **SILAS** (q. v.).

Silver (כֶּסֶף, *kēseph*, often rendered "money"). There is no mention of this metal in Scripture until the time of Abraham. Before that time brass and iron appear to have been the only metals in use (Gen. iv, 22). Abraham was rich in gold and silver, as well as in flocks and herds, and silver in his day was in general circulation as money. It was uncoined, and estimated always by weight. Coined money was not in use among the Israelites until an advanced period of their history. The Romans are said to have had only copper money until within five years of the first Punic war, when they began to coin silver (Pliny, *Hist. Nat.* xxx, 3). Their coins were extensively introduced into Judæa after it became a Roman province.—Kitto.

In early times, according to the Bible, silver was used for ornaments (Gen. xxiv, 53), for cups (xliv, 2), for the sockets of the pillars of the tabernacle (Exod. xxvi, 19, etc.), their hooks and filets, or rods (xxvii, 10), and their capitals (xxxviii, 17); for dishes, or chargers, and bowls (Numb. vii, 13), trumpets (x, 2), candlesticks (1 Chron. xxviii, 15), tables (ver. 16), basins (ver. 17), chains (Isa. xl, 19), the settings of ornaments (Prov. xxv, 11), studs (Cant. i, 11), and crowns (Zech. vi, 11). Images for idolatrous worship were made of silver or overlaid with it (Exod. xx, 23; Hos. xiii, 2; Hab. ii, 19; Bar. vi, 39), and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix, 24). But its chief use was as a medium of exchange, and throughout the Old Test. we find *kēseph*, "silver," used for money, like the Fr. *argent*. To this general usage there is but one exception. See METAL. Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtasen I and Thothmes III, the contemporaries of Joseph and Moses (Wilkinson, *Anc. Egypt.* iii, 225). In the Homeric poems we find indications of the constant application of silver to purposes of ornament and luxury. It was used for basins (*Od.* i, 137; iv, 53),

goblets (*Il.* xxiii, 741), baskets (*Od.* iv, 125), coffers (*Il.* xviii, 413), sword-hilts (i, 219; *Od.* viii, 404), door-handles (i, 442), and clasps for the greaves (*Il.* iii, 331). Door-posts (*Od.* vii, 89) and lintels (*ibid.* 90) glittered with silver ornaments; baths (iv, 128), tables (x, 355), bows (*Il.* i, 49; xxiv, 605), scabbards (xi, 31), sword-belts (xviii, 598), belts for the shield (*ibid.* 480), chariot-poles (v, 729), and the naves of wheels (*ibid.*) were adorned with silver; women braided their hair with silver-thread (xvii, 52), and cords appear to have been made of it (*Od.* x, 24); while we constantly find that swords (*Il.* ii, 45; xxiii, 807) and sword-belts (xi, 237), thrones, or chairs of state (*Od.* viii, 65), and bedsteads (xxiii, 200) were studded with silver. Thetis of the silver feet was probably so called from the silver ornaments on her sandals (*Il.* i, 538). The practice of overlaying silver with gold, referred to in Homer (*Od.* vi, 232; xxiii, 159), is nowhere mentioned in the Bible, though inferior materials were covered with silver (Prov. xxvi, 23).

Silver was brought to Solomon from Arabia (2 Chron. ix, 14) and from Tarshish (ver. 21), which supplied the markets of Tyre (Ezek. xxvii, 12). From Tarshish it came in the form of plates (Jer. x, 9), like those on which the sacred books of the Singhalese are written to this day (Tennent, *Ceylon*, ii, 102). The silver bowl given as a prize by Achilles was the work of Sidonian artists (*Il.* xxiii, 743; comp. *Od.* iv, 618). In Homer (*Il.* ii, 857), Alybe is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients. Possibly the hills of Palestine may have afforded some supply of this metal. "When Volney was among the Druses, it was mentioned to him that an ore affording silver and lead had been discovered on the declivity of a hill in Lebanon" (Kitto, *Phys. Hist. of Palestine*, p. 73).

For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see MINE. The whole operation of mining is vividly depicted in Job xxviii, 1-11, and the process of purifying metals is frequently alluded to in Psa. xii, 6; Prov. xxv, 4, while it is described with some minuteness in Ezek. xxi, 20-22. Silver mixed with alloy is referred to in Jer. vi, 30, and a finer kind, either purer in itself or more thoroughly purified, is mentioned in Prov. viii, 19.—Smith. There is a beautiful allusion in the prophecy of Malachi to the refining of this precious metal. The Lord of hosts is represented "sitting as a refiner and purifier of silver" (Mal. iii, 3). In the process of refining silver, the workman sits with his eye steadily fixed on the surface of the molten metal, and the operation is only known to be complete when he sees his own image reflected in it. So in this passage we have a beautiful figure descriptive of God's purpose in placing his people in the furnace of affliction, while he is, as it were, seated by their side, his all-seeing eye being steadily intent on the work of purifying, and his wisdom and love engaged on their behalf until his own glorious image is reflected on their souls, and the work of purifying is fully accomplished. The way in which silver is spoken of in the book of Job (xxviii, 1), "Surely there is a vein for the silver and a place for gold where they fine it," affords one of the many instances of the scientific accuracy of Scripture. An eminent geologist has remarked on the distinction here drawn, and which the discoveries of modern science have made clear, between the "vein of silver" and "dust of gold," indicating that there are mines of the one and not of the other (Murchison, *Siluria*, p. 457).

Silverius, Str., and pope in 536-37. He was a son of pope Hormisdas, who had been married before he became a priest, and prior to his elevation to the papacy was a subdeacon. That elevation was caused by Theodatus, the Gothic king, who was involved in disputes with Justinian, and would not consent that a candidate who favored the emperor should be confirmed. It is said, however, that Silverius added bribes to the other mo-

tives which influenced the king. The imperial general Belisarius soon afterwards degraded the new pope on the charge of treason, and sent him to Patara, in Lycia. Vigilius became his successor. Silverius succeeded in returning to Italy, but was delivered up to Vigilius by Belisarius, and sent to the island of Palmaria, where he soon afterwards died. He was canonized by the Romish Church, and is commemorated June 20.

Silverling (סִלְבֶּרְלִינג, *késeph*, i. e. *silver*, as elsewhere rendered; Sept. *σικλος*; Vulg. *argenteus*, i. e. *siclus* understood), a word used once only in the A. V. (Isa. vii, 23) to signify a *piece of silver* (q. v.). In this sense it exactly corresponds with the Greek *ἀργύριον*, which was used, however, for the *half shekel*, or *denarius*.

Silvester. See SYLVESTER.

Silvestro DE' GOZZOLINI, founder of the Order of Silvestrians, was born in 1177 at Osimo, where he became canon and religious teacher. In 1227 he retired to a desert in the neighborhood, where he practiced rigid austerities, and in 1231 laid the foundation of the order named after him and placed it under the rule of St. Benedict. Pope Innocent IV approved it in 1248, and assigned Silvestro a house at Rome, which still exists. He died at Fabiano, Nov. 26, 1267. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sim, WILLIAM RONDAN, a Presbyterian minister, was born in Golconda, Ill., Nov. 25, 1831. He graduated at Hanover College, Hanover, Ind., Aug. 9, 1854, and at Danville Theological Seminary in 1857, was licensed to preach in the autumn of the same year, and in 1858 was ordained by Kaskaskia Presbytery and installed pastor of the congregations of Jordan Grove and Lively Prairie, Ill. In October, 1860, he took charge of the Church in Golconda, where he remained until his death, July 7, 1864. Mr. Sim was a pure-minded Christian, characterized by a very remarkable degree of refinement, in thought, expression, and deportment. See Wilson, *Presb. Hist. Almanac*, 1865, p. 120. (J. L. S.)

Simalcu'ō (Σιμαλκουή v. r. Εἰμαλκουαί, etc.; Vulg. *Emalchuel*, *Malchus*; Josephus, *Μάλχος*, *Ant.* xiii, 5, 1; comp. xiv, 14, 1; *War*, i, 14, 1), an Arabian chief who had charge of Antiochus, the young son of Alexander Balas, before he was put forward by Tryphon as a claimant to the Syrian throne (1 Macc. xi, 39). According to Diodorus (*Eclog.* xxxii, 1) the name of the chief was *Diocles*, though in another place (*Frag.* xxi, Müller) he calls him *Jamblichus*. The name evidently contains the element *melek*, "king," but the original form is uncertain (comp. Grotius and Grimm on 1 Macc. loc. cit.).

Simān (סִימָן), like the Greek *σημεῖον*, *σημα*, a sign or a symbol, denotes among the Masorites:

1. A chapter of a book or the number of a psalm. In the Pentateuch neither book nor chapter is quoted, but always the section, which is called פֶּרֶשֶׁה, or סֵדֶר and סֵדֶרָה. Thus the *Masora Finalis* on כאלה remarks: ג' וסימניהון נמסר בירמיה סימן נ"א ואיוב ריש י"ד סימן י"ד, i. e. "it occurs three times, and the passages are found in Jer. li, and in Job at the beginning of ch. xvi." On לפני אלהים the Masorah remarks: ז' וסימניהון נמסר בחלים סימן ז', i. e. "it occurs four times, and the passages are quoted in Psa. lvi." On אמר אלהים it is remarked, נמסר, בפרשת בראשית, i. e. "it occurs six times, and the passages are quoted in the section *Bereshith*" [i. e. Gen. i, 1-6, 8. By comparing the Masoretic note in the Rabbinic Bible, it will be found that the passages are quoted at the beginning of the third chapter, since the phrase אמר אלהים occurs here for the first time].

2. It denotes passages, examples, which are quoted in order to confirm the Masoretic notes.

3. It is used as a symbol or mnemotechnical sign. Thus when a word occurs three times, four times, etc., as often as it occurs a corresponding symbol, which is generally of a very artificial character, is given. Thus the *Masora Parva* remarks on יקח (Gen. xviii, 4), וסירמן מיר ג' וסירמן פרולא, i. e. "it occurs three times, and the symbol is 'the water of the mighty, iron.'" Now each of these three words represents a symbol, signifying the passage in which the word יקח occurs. Thus מיר, "water," is the symbol of the passage in which we read יקח נא מנע מים, "let a little water be fetched" (ver. 4). The second word, דגברא, "of the mighty," refers to the passage יקח גבור יקח, "even the captivity of the mighty shall be taken away" (Isa. xlix, 25). The third word, פרולא, "iron," refers to ברזל יקח, "iron is taken out of the earth" (Job xxviii, 2). In the same verse the *Masorah* remarks on ורחצו, "and wash," מירא דכברא דכיא, i. e. "it occurs three times, and its symbol is 'the waters of the servant are clean.'" The first word, מירא, "the waters," refers to that verse in which before ורחצו is read מים [i. e. in the same verse]; the second word, דכברא, "of the servant," refers to כבדכם, "your servant," which occurs in Gen. xix, 2. The third word, דכיא, "clean," refers to Isa. i, 16, ורחצו הזכו, "wash you, make you clean."

4. The word סימן stands alone without any addition or explanation, and in this position it serves as a monitor: a. When one word differs from a similar one, either by its prefix or through another letter, and in this instance it calls the attention to the difference. Thus in Lev. xxv, 25 we read כיימון אחיך, "if thy brother be waxen poor;" but in ver. 35 we read וכיימון אחיך, "and if thy brother," etc. To the latter passage the *Masorah* adds סימן, to call attention to the כי in ver. 25, and וכי in ver. 35. b. When the difference is caused by another word. Thus in Numb. iv, 6, 14, we read ושמנו בדיו, "and shall put in the staves thereof;" but in ver. 8, 11 we read את שמנו בדיו, "and shall put," etc. Here, in this instance, the *Masorah* places סימן to the first form. Comp. also Lev. xix, 5 and xxii, 29; Psa. lvi, 5, 12. c. When a difference consists in the accents. Thus in Numb. iv, 30 we read עור בן־חמשים שנה, "even until fifty years;" but in ver. 35 we read ועור בן־חמשים שנה. In this instance the attention is called to the difference of the accents, viz. the first וְעַר has the *Tebir*, the second the *Tiphcha*. These few examples will show the importance of the meaning of the סימן in its different stages. See Buxtorf, *Tiberias*, seu *Massoreticus Commentarius*, p. 259 sq.; Freudenthal, *Massora Magna*, introd. p. 9. (B. P.)

Sim'ēōn (Heb. *Shimon'*, שִׁמְעוֹן, a hearing, i. e. by Jehovah; Sept. and New Test. *Συμῶν*, and so Josephus, *Ant.* i, 19, 7), the name of one of the heads of the Hebrew tribes, and of several other Jews named from him. In our account of the former we collect all the ancient and modern information. See also SIMON.

1. The second of Jacob's sons by Leah. B.C. 1918. His birth is recorded in Gen. xxix, 33, and, in the explanation there given of the name it is derived from the root *shama'*, "to hear"—"Jehovah hath heard that I was hated" . . . and she called his name Shimeon." This metaphor is not carried on (as in the case of some of the other names) in Jacob's blessing; and in that of Moses all mention of Simeon is omitted. Fürst (*Hebr. Handwb.* s. v.) inclines to the interpretation "famous" (*ruhmvreicher*). Redslöb (*Alttest. Namen*, p. 93), on the other hand, adopting the Arabic root *shama*, considers

the name to mean "sons of bondage," or "bondmen." But the above text gives the natural etymology.

The first group of Jacob's children consists, besides Simeon, of the three other sons of Leah—Reuben, Levi, and Judah. With each of these Simeon is mentioned in some connection. "As Reuben and Simeon are mine," says Jacob, "so shall Joseph's sons Ephraim and Manasseh be mine" (Gen. xlviii, 5). With Levi, Simeon was associated in the massacre of the Shechemites (xxxiv, 25), a deed which drew on them the remonstrance of their father (ver. 30), and evidently also his dying curse (xlix, 5-7). With Judah the connection was drawn still closer. He and Simeon not only "went up" together, side by side, in the forefront of the nation, to the conquest of the south of the Holy Land (Judg. i, 3, 17), but their allotments lay together in a more special manner than those of the other tribes, something in the same manner as Benjamin and Ephraim. Besides the massacre of Shechem—a deed not to be judged of by the standards of a more civilized and less violent age, and, when fairly estimated, not wholly discreditable to its perpetrators—the only personal incident related of Simeon is the fact of his being selected by Joseph, without any reason given or implied, as the hostage for the appearance of Benjamin (Gen. xlii, 19, 24, 36; xliii, 23).

These slight traits are characteristically amplified in the Jewish traditions. In the Targum of Pseudo-Jonathan it is Simeon and Levi who are the enemies of the lad Joseph. It is they who counsel his being killed, and Simeon binds him before he is lowered into the well at Dothan. (See further details in Fabricius, *Cod. Pseudep.* p. 535.) Hence Joseph's selection of him as the hostage, his binding and incarceration. In the Midrash the strength of Simeon is so prodigious that the Egyptians are unable to cope with him, and his binding is only accomplished at length by the intervention of Manasseh, who acts as the house steward and interpreter of Joseph. His powers are so great that at the mere roar of his voice seventy valiant Egyptians fall at his feet and break their teeth (Weil, *Bibl. Leg.* p. 88). In the "Testament of Simeon" his fierceness and implacability are put prominently forward, and he dies warning his children against the indulgence of such passions (Fabricius, *Cod. Pseudep.* p. 533-543).

TRIBE OF SIMEON.—The six sons of Simeon and the chief families of the tribe are mentioned in the lists of Gen. xli, 10 (in which one of them, bearing the name of Shaul [Saul], is specified as "the son of the Canaanites"), Numb. xxvi, 12-14, and 1 Chron. iv, 24-43. In the last passage (ver. 27) it is mentioned that the family of one of the heads of the tribe "had not many children, neither did they multiply like to the children of Judah." This appears to have been the case not only with one family, but with the whole tribe. At the census at Sinai Simeon numbered 59,300 fighting-men (Numb. i, 23). It was then the most numerous but two, Judah and Dan alone exceeding it; but when the second census was taken, at Shittim, the numbers had fallen to 22,200, and it was the weakest of all the tribes. This was no doubt partly due to the recent mortality following the idolatry of Peor, in which the tribe of Simeon appears to have taken a prominent share, but there must have been other causes which have escaped mention.

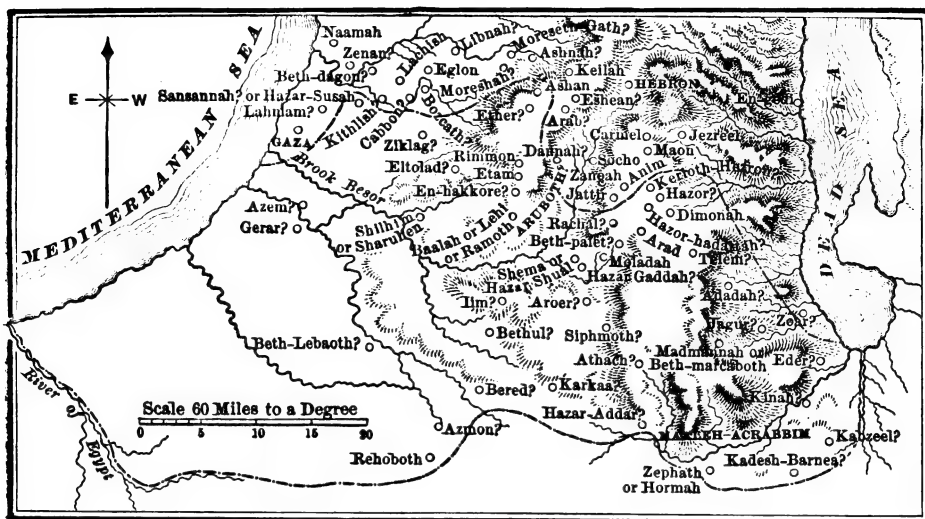

The connection between Simeon and Levi implied in the blessing of Jacob (Gen. xlix, 5-7) has already been adverted to. The passage relating to them may be thus rendered:

Simeon and Levi are [interine] brethern,
Instruments of violence are their swords.
Into their [secret] council come not my soul!
Unto their assembly join not my honor!
For in their wrath they slew man,
And in their self-will they houghed ox.
Cursed be their wrath, for it [was] fierce,
And their anger, for it [was] cruel!
I will divide them in Jacob,
And scatter them in Israel.

The terms of this denunciation seem to imply a close bond of union between Simeon and Levi, and violent and continued exploits performed under that bond, such as the one that now remains on record. The expressions of the closing lines evidently refer to the more advanced condition of the nation of Israel after the time of the death of the father of the individual patriarchs. Taking it, therefore, to be what it purports—an actual prediction by the individual Jacob—it has often been pointed out how differently the same sentence was accomplished in the cases of the two tribes. Both were "divided" and "scattered." But the dispersion of the Levites arose from their holding the post of honor in the nation, and being spread, for the purposes of education and worship, broadcast over the face of the country. In the case of Simeon the doom refers primarily to the fact that originally this tribe had no separate allotment of territory, but only a series of cities selected from the region at first assigned to Judah (Josh. xv, 21 sq.; comp. with xix, 1 sq.). See **SOUTH COUNTRY**. The eventual dispersion seems to have arisen from some corrupting element in the tribe itself, which first reduced its numbers, and at last drove it from its allotted seat in the country—not, as Dan, because it could not, but because it would not, stay—and thus in the end caused it to dwindle and disappear entirely. The non-appearance of Simeon's name in the blessing of Moses (Deut. xxxiii, 6) may be explained from the circumstance that the tribe is, in accordance with the above peculiarities, not regarded as having an independent existence.

During the journey through the wilderness Simeon was a member of the camp which marched on the south side of the sacred tent. His associates were Reuben and Gad—not his whole-brothers, but the sons of Zilpah, Leah's maid. The head of the tribe at the time of the Exode was Shelumiel, son of Zurishaddai (Numb. i, 6), ancestor of its one heroine, the intrepid Judith. Among the spies Simeon was represented by Shaphat, son of Hori, i. e. Horite, a name which, perhaps, like the "Canaanites" of the earlier list, reveals a trace of the lax tendencies which made the Simeonites an easy prey to the licentious rites of Peor, and ultimately destroyed the permanence of the tribe. At the division of the land his representative was Shemuel, son of Ammihud.

The connection between Judah and Simeon already mentioned seems to have begun with the conquest. Judah and the two Joseph-brethren were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the sacred tent to be established without risk in the heart of the country, the work of dividing the remainder among the seven inferior tribes was proceeded with (Josh. viii, 1-6). Benjamin had the first turn, then Simeon (xix, 1). By this time Judah had discovered that the tract allotted to him was too large (ver. 9), and also too much exposed on the west and south for even his great powers. To Simeon accordingly was allotted a district out of the territory of his kinsman, on its southern frontier, which contained eighteen or nineteen cities, with their villages, spread round the venerable well of Beersheba (ver. 1-8; 1 Chron. iv, 28-33). Of these places, with the help of Judah, the Simeonites possessed themselves (Judg. i, 3, 17); and here they were found, doubtless by Joab, residing in the reign of David (1 Chron. iv, 31). During his wandering life David must have been much among the Simeonites. In fact, three of their cities are named in the list of those to which he sent presents of the spoil of the Amalekites, and one (Ziklag) was his own private property. It is therefore remarkable that the numbers of Simeon and Judah who attended his installation as king of Hebron should have been so much below those of the other tribes (xii, 23-37). Possibly it is due to the fact that the event was taking place in the heart of their own territory, at Hebron. This, however, will not account for the curious fact that the warriors of Simeon (7100) were more numerous than

those of Judah (6800). After David's removal to Jerusalem, the head of the tribe was Shephatiah, son of Maachah (xxvii, 16).

The following list contains all the names of places in this tribe, with the probable modern names. (On the possible identifications, see the *Quar. Statement* of the "Pal. Explor. Fund," Jan. 1875, p. 23 sq.). See TRIBE.

What part Simeon took at the time of the division of the kingdom we are not told. The tribe was probably not in a sufficiently strong or compact condition to have shown any northern tendencies even had it entertained them. The only thing which can be interpreted into a trace of its having taken any part with the northern kingdom are the two casual notices of 2 Chron. xv, 9 and xxxiv, 6, which appear to imply the presence of Simeonites there in the reigns of Asa and Josiah. But this may have been merely a manifestation of that vagrant spirit which was a cause or a consequence of the prediction ascribed to Jacob. On the other hand, the definite statement of 1 Chron. iv, 41-43 (the date of which by Hezekiah's reign seems to show conclusively its southern origin) proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike, lawless spirit of their progenitor. This fragment of ancient chronicle relates two expeditions in search of more eligible territory. The first, under thirteen chieftains, leading, doubtless, a large body of followers, was made against the Hamites and the Mehunim, a powerful tribe of Beduin, "at the entrance of Gedor at the east side of the ravine." The second was smaller, but more adventurous. Under the guidance of four chiefs a band of five hundred undertook an expedition against the remnant of Amalek, who had taken refuge from the attacks of Saul or David, or some later pursuers, in the distant fastnesses of Mount Seir. The expedition was successful. They smote the Amalekites and took possession of their quarters; and they were still living there after the return of the Jews from cap-

tivity, or whenever the first book of Chronicles was edited in its present form.

The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in the last of his descendants of whom there is any express mention in the sacred record. Whether the book which bears her name be a history or a historic romance, Judith (q. v.) will always remain one of the most prominent figures among the deliverers of her nation. Bethulia would almost seem to have been a Simeonitish colony. Ozias, the chief man of the city, was a Simeonite (Judith vi, 15), and so was Manasses, the husband of Judith (viii, 2). She herself had the purest blood of the tribe in her veins. Her genealogy is traced up to Zurishaddai (in the Greek form of the present text Salasadaï, ver. 1), the head of the Simeonites at the time of their greatest power. She nerves herself for her tremendous exploit by a prayer to "the Lord God of her father Simeon" and by recalling in the most characteristic manner, and in all their details, the incidents of the massacre of Shechem (ix, 2).

Simeon is named by Ezekiel (xlviii, 25) and the author of the book of Revelation (vii, 7) in their catalogues of the restoration of Israel. The former removes the tribe from Judah and places it by the side of Benjamin. See *Meth. Quar. Rev.* Jan. 1875, p. 121.

2. (A. V. "Shimeon.") An Israelite of the family of Harim who divorced his Gentile wife after the return from Babylon (Ezra x, 31). B.C. 458.

3. A priest, son of Joiarib (i. e. Jehoiarib), father of John and grandfather of Mattathias the father of the Maccabee brothers (1 Macc. ii, 1).

4. The son of Judah and father of Levi in the maternal genealogy of our Lord (Luke iii, 30). B.C. cir. 886. He seems to have been the same with Maaseiah the son of Adaiah (2 Chron. xxiii, 1).

5. A devout Jew, inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took him in his arms, and gave thanks for what he saw, and knew of Jesus (Luke ii, 25-35). B.C. 6. The circumstance is interesting as evincing the expectations which were then entertained of the speedy advent of the Messiah; and important from the attestation which it conveyed in favor of Jesus from one who was known to have received the divine promise that he should "not taste of death till he had seen the Lord's Christ."

In the Apocryphal gospel of Nicodemus, Simeon is called a high-priest, and the narrative of our Lord's descent into hell is put into the mouths of Charinus and Lenthinus, who are described as two sons of Simeon, who rose from the grave after Christ's resurrection (Matt. xxvii, 53) and related their story to Annas, Caiaphas, Nicodemus, Joseph, and Gamaliel.

Rabban Simon, whose grandmother was of the family of David, succeeded his father Hillel as president of the Sanhedrim about A.D. 13 (Otho, *Lexicon Rabb.* p. 697), and his son Gamaliel was the Pharisee at whose feet Paul was brought up (Acts xxii, 3). A Jewish writer specially notes that no record of this Simeon is preserved in the Mishna (Lightfoot, *Horæ Heb.* Luke ii, 25). It has been conjectured that he (Prideaux, *Connection*, anno 37, Michaelis) or his grandson (Schöttgen, *Horæ Heb.* Luke ii, 25) of the same name may be the Simeon of Luke. In favor of the identity it is alleged that the name, residence, time of life, and general character are the same in both cases; that the remarkable silence of the Mishna and the counsel given by Gamaliel (Acts v, 38) countenance a suspicion of an inclination on the part of the family of the rabban towards Christianity. On the other hand, it is argued that these facts fall far short of historical proof, and that Simeon was a very common name among the Jews; that Luke would never have introduced so celebrated a character as the president of the Sanhedrim merely as "a man in Jerusalem;" and that his son Gamaliel, after all, was educated as a Pharisee. The question is

discussed in Witsius, *Miscellanea Sacra*, i, 21, 14-16. See also Wolf, *Curæ Philologicae* at Luke ii, 25; and *Bibl. Hebr.* ii, 682. See SIMON BEN-HILLEL.

6. A form (Acts xv, 14; also 2 Pet. i, 2 in some MSS.) of the name of *Simon* Peter (q. v.).

7. The proper name (Acts xiii, 1) of NIGER (q. v.), an eminent Christian at Antioch.

Simeon of DURHAM, an English chronicler, taught mathematics at Oxford, and afterwards was *precentor* in the cathedral at Durham. We owe to him a *Historia de Gestis Regum Anglorum*, from 616 to 1129, continued down to 1156 by John of Hexham, and inserted in the *Anglicana Historia Scriptores X* of Twysden (Lond. 1652, fol.). It is mostly a literal reproduction of the *Chronicles* of Florence of Worcester, who died in 1118. Simeon is likewise the author of a letter *De Archiepiscopis Eboraci*; and he has given under his own name, without any addition to the work, another production, *Historia de Dunelmensi Ecclesia*, printed in Twysden's edition, but which altogether belongs, as Selden has shown, to Turgot, prior of Durham, who died in 1115. Simeon died after 1130. See Wright, *Biogr. Britann. Literaria*, vol. i.

Simeon of POLOTZK, a Russian monk, poet, and ecclesiastical historian, was born at Polotzk in 1628, and was brought up by strangers; but after the capture of Smolensk he was called by the czar Alexis to educate his oldest son, and thus introduced a literary taste at the Kremlin. He composed dramas which were appreciated chiefly by Sophia, the intelligent sister of Peter I. When the emperor Theodore ascended the throne (1676), his preceptor obtained permission to establish a press in connection with the palace. He conceived the design of reforming the Church. Being suspected, not without reason, of Roman Catholic tendencies, he was protected by his pupil from the animadversion of the Muscovite patriarch. We owe to Simeon several religious and poetical treatises, but the greater part of his works remain buried in the libraries of Moscow and Novgorod. He died at Moscow, Aug. 25, 1680.

Simeon, St., surnamed **STYLITES** (from *στυλος*, a pillar), an early anchorite, was born about 390 at Sisan, on the confines of Cilicia and Syria. He was the son of a shepherd, and followed the same vocation himself till his thirteenth year, when he entered a monastery where several brethren consecrated themselves entirely to a knowledge of the Holy Scriptures. Living among austere devotees, he surpassed them all in the rigor of his mortifications, so that the superior, fearful of his example, at last dismissed him. After spending three years in solitude on Mt. Selenissia, where he is said to have passed forty days without eating, a feat which he re-enacted for many years afterwards, he betook himself to the top of a mountain in Syria, and there made for himself a sort of shelter with stones piled on each other. In order to withdraw himself from the importunities of the crowds who came to him for the cure of their maladies, he contrived, about the year 423, to establish his residence on the top of a column, which he raised first from six to twelve, and at length to twenty-eight and thirty-six feet in height. Its summit was three feet in diameter and was surrounded with a balustrade of sufficient height. It was impossible to lie down upon it, and Simeon there maintained his abode day and night. A mode of life so extraordinary was, in general, regarded as a piece of extravagance and vanity, but by many as a mark of unusual holiness. From his aerial retreat the ascetic gave his instructions to the people who resorted thither, and held public consultations. Three Christian emperors—Theodosius the Younger, Marcion, and Leo—came to see him. His life was compared to that of angels—offering up prayers for men from his elevation and bringing down graces on them. His neck was loaded with an

iron chain. In praying he bent his body so that his forehead almost touched his feet. He took only one scanty meal a week and fasted throughout the season of Lent. He uttered prophecies and wrought an abundance of miracles. Simeon's fame became immense. Pilgrims from distant lands, as Spain, Gaul, and even Britain, flocked to see him. Little figures of him were, during his own lifetime, set up in the workshops of Rome as charms against evil. He corresponded with bishops and emperors, and influenced the policy both of Church and State. By his life and his exhortations he converted multitudes of Saracens and other nomads of the desert. Some time after he had adopted his peculiar manner of life, some neighboring monks sent to ask why he was not content with such fashions of holiness as had sufficed for the saints of earlier days. The messenger was charged to bid him leave his pillar, and, in case of a refusal, to pull him down by force. But Simeon, on hearing the order, put forth one of his feet as if to descend; and the messenger, as he had been instructed, acknowledged this obedience as a proof that the Stylite's mode of life was approved by God, and desired him to continue in it. At length the devil appeared to Simeon in the form of the Saviour and invited him to ascend to heaven in a chariot drawn by cherubim. Simeon put out his foot to enter the chariot, when the tempter vanished, and, in punishment of his presumption, left him with an ulcer in his thigh, which, for the remaining year of his life, obliged him to support himself on one leg. He died Sept. 1, 460. His body was removed with great ceremony to Antioch, the inhabitants of which had requested that it might be given to them as a defence for their city instead of the walls which they had lost. The Latins celebrate Simeon's festival on Jan. 5. There exists from him a *Letter* addressed to Theodosius the Younger to induce him to return to the Jews their synagogues; it is inserted in the *Biblioth. Orientalis* of Assemani. There is also found in vol. vii. of the *Bibl. Max. Patrum* a homily, *De Morte Assidue Cogitanda*, which is variously attributed to St. Simeon, to St. Macarius of Egypt, to St. Ephrem, and to Theophetus of Alexandria. See Hoefler, *Nouv. Biog. Générale*, s. v. See STYLITES.

A disciple of Simeon by the name of *Daniel* succeeded to his reputation for sanctity and to his mode of life, which he maintained for thirty-three years in the still more trying climate of the shore of the Bosphorus, about four miles from Constantinople. The marvels of Daniel's career are still more startling. Sometimes he was almost blown by the storms from the top of his pillar. At times for days together he was covered with snow and ice. How he sustained life, what nourishment he took, was a mystery to his disciples. The emperor at length insisted on a covering being placed over the top of the pillar, and Daniel survived till the year 494. See DANIEL THE STYLITE.

See Theodore, *Hist. Ascetica*, c. 26; Ceillier, *Hist. des Auteurs Sacrés*, xv, 439; *Acta Sanctorum*, Jan.; Muratori, *Acta Martyrum Orient.* (1700); Krebs, *De Stylitis* (Lips. 1753); Uhlemann, *Simeon, der Fürst Stylita* (Leips. 1846). See PILLAR SAINTS.

Simeon, archbishop of THESSALONICA in the 14th and 15th centuries, and author of a number of works which are still extant, was a pronounced advocate of monasticism, a patriot, and a determined opponent of the Latin Church, against which he directed his most notable work, *Karà Aipiótow*, etc. (Jassy, 1683, and abridged in R. Simon's *Critique de la Biblioth. de M. Du-Pin*, p. 403 sq.), and his *De Divino Templo*, etc. (see Leon Allatii *De Sim. Scriptis Diatriba* [Par. 1664], p. 185-192). Extracts are given in Jac. Goar, *Euchologium Græcorum* (Par. 1647), and by Morinus, Gessner, and Possevin (*De Simeon. Scriptis*, p. 193; comp. *Bibl. Max. Patrum*, xxii, 768 sq.). A number of additional writings from his pen are mentioned in Allatius, among them several hymns. He conducted a valiant defence of Thessalonica against the Turks, and died in A.D.

1430, about six months before the surrender of the city to Amurath II. See Allatii *De Eccles. Occident. atque Orient. Perpetua Consensione Libri Tres* (Col. Agripp. 1648), lib. ii, c. 18, No. 13, p. 862 sq.; Gass, *Mystik d. Nikolaus Cabasilas vom Leben in Christo* (Greifswald, 1849), p. 157 sq.

Simeon, Charles, an English clergyman, was born at Reading, Sept. 24, 1759, and was educated at Eton and at King's College, Cambridge, of which he became a fellow. He was presented to the living of Trinity Church, Cambridge, in 1783, which he held until his death, in 1836. As a preacher, Simeon was distinguished for an impassioned evangelicalism in language, sentiment, and doctrine, that at first roused bitter opposition, but he eventually became the centre of evangelical influence. He may be regarded as the founder of the Low-Church party. His best-known work is the *Horæ Homileticæ, or Discourses* (skeleton) upon the *Whole Scriptures* (1819-20, 11 vols. 8vo; Appendix, 1828, 6 vols. 8vo). The entire works of Simeon, including *Claude's Essay on the Composition of a Sermon*, were published in 21 vols. 8vo (Lond. 1840). *Claude's Essay*, with notes, etc., and 100 skeletons of *Sermons*, etc., were published in London in 1853 (12mo). For the copyright of his works he received £5000, of which Mr. Simeon appropriated £1000 to the Society for Promoting Christianity among the Jews, £1000 to the London Clerical Education Society, £1000 to the Church Missionary Society, and £210 to the binding of twenty large-paper copies presented to dignitaries and libraries. This series is now published by Henry G. Bohn (London), who issued a new edition of Simeon's select works in 1854, 2 vols. 32mo. See *Recollections of the Conversation Parties of the Rev. C. Simeon*, etc. (1862, 8vo); *London Reader*, 1863, i, 87; 1864, ii, 295; Carus, *Memoirs of Simeon* (1847, 8vo; 2d ed. 1847, 8vo); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

Simeon Metaphrastes was born of noble parents at Constantinople in the 10th century. He was well educated, and raised himself by his merit to very high trust under the reigns of Leo the Philosopher and his son Constantine Porphyrogenitus. It is said that being sent by the emperor to Cyprus, a contrary wind carried his ship to the isle of Paphos. There he met an anchorite, who advised him to write the life of Theoctista, a female saint of Lesbos, and he gradually extended his work so that it included the lives of 120 saints. He died in 976 or 977. His 120 *Lives of the Saints* are to be found in Latin translations in Surius; the Greek is not extant. See Chalmers, *Biog. Dict.* s. v.; Darling, *Cyclop. Bibliog.* s. v.

Sim'eonite (Heb. collect. with the art. *hash-Shimoni'*, הַשִּׁמְעוֹנִי; Sept. Συμεών), a patronymic designation of the descendants of Simeon (Numb. xxv, 14; xxvi, 14; 1 Chron. xxvii, 16).

Similitude סִמְלִיטוּדָה, a physical resemblance, 2 Chron. iv, 3; Dan. x, 16; תְּבַלְתִּי, a pattern, Psa. cvi, 20; cxliv, 12; תְּבַלְתִּי, a shape, Numb. xii, 8; Deut. iv, 12, 15, 16; ὁμοίωσις, ὁμοίωμα, ὁμοίωσις, similarity in general). The word is now chiefly used in a figurative sense of a form of speech including the simple metaphor, or the extended comparison of various kinds, especially the two following of the latter.

1. The *Allegory*, a figure of speech, has been defined by bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing;" the first representation being consistent with itself, but requiring, or being capable of admitting, a moral and spiritual interpretation over and above its literal sense. An allegory has been incorrectly considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile. But the two figures

are quite distinct; no sustained metaphor, or succession of metaphors, can constitute an allegory, and the interpretation of allegory differs from that of metaphor in having to do not with words, but things. In every allegory there is a twofold sense—the immediate or historic, which is understood from the words, and the ultimate, which is concerned with the things signified by the words. The allegorical interpretation is not of the words, but of the things signified by them; and not only may, but actually does, coexist with the literal interpretation in every allegory, whether the narrative in which it is conveyed be of things possible or real. An illustration of this may be seen in Gal. iv, 24, where the apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah; not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation.

In *pure* allegory no direct reference is made to the principal object. Of this kind the parable of the prodigal son is an example (Luke xv, 11–32). In *mixed* allegory the allegorical narrative either contains some hint of its application, as Psa. lxxx, or the allegory and its interpretation are combined, as in John xv, 1–8; but this last passage is, strictly speaking, an example of a metaphor.

The distinction between the parable and the allegory is laid down by dean Trench (*On the Parables*, ch. i) as one of form rather than of essence. "In the allegory," he says, "there is an interpretation of the thing signifying and the thing signified, the qualities and properties of the first being attributed to the last, and the two thus blended together, instead of being kept quite distinct and placed side by side, as is the case in the parable. According to this, there is no such thing as pure allegory as above defined. See ALLEGORY.

2. The *Parable*, as a form of teaching, differs from the Fable, (1) in excluding brute or inanimate creatures passing out of the laws of their nature, and speaking or acting like men; (2) in its higher ethical significance. It differs, it may be added, from the Mythus in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs, lastly, from the Proverb in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. So far as proverbs go beyond this, and state what they affirm in a figurative form, they may be described as condensed parables, and parables as expanded proverbs (comp. Trench *on Parables*, ch. i; and Grotius *on Matt. xiii*). See PARABLE.

Simlai, *Rabbi*, a famous Jewish teacher of the 2d century, is known as the first who reduced all laws of Judaism to certain principles. Thus we read in the Talmud *Babyl. Maccoth*, fol. 23, col. 2 sq.: "R. Simlai said that Moses was instructed to give 613 injunctions to the people, viz. 365 precepts of omission, corresponding to the days of the solar year, and 248 precepts of commission, corresponding to the members of the human body. David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly,' etc. The prophet Isaiah reduced them to six (xxxiii, 15): 'He that walketh righteously,' etc. The prophet Micah reduced them to three (vi, 8): 'What doth the Lord require of thee but to do justly, and to love mercy, and to walk humbly with thy God?' Isaiah, once more, reduced them to two (lvi, 1): 'Keep ye judgment and do justice.' Amos reduced them all

to one (v, 4): 'Seek ye me, and ye shall live.' But lest it might be supposed from this that God could be found in the fulfilment of his whole law only, Habakkuk said (ii, 4): 'The just shall live by his faith.'" Rabbi Simlai also acquired fame for his virulent opposition to Christianity. It has been suggested, and with apparent probability, that he had been chiefly engaged in controversy with the celebrated Origen, who spent considerable time in Palestine, and, as is well known, introduced into the Church a kind of Hagadic exegesis. It will readily be conceived that Christian truth was placed at disadvantage when made to depend on isolated portions or texts, and defended by exegetical niceties and subtleties, instead of resting on the general scope and bearing of the Old-Test. teaching, and on whole passages, taken in their breadth and fulness, as the individual exponents of general and well-ascertained principles. However, Hagadic studies sometimes led to a spirit of zealous inquiry, and to frequent controversies between Christians and Jews. An instance of these has, among others, been recorded by Jerome (*Quæst. in Genesin*) in a discussion between Jason, a converted Jew, and his friend Papiasus. In the Talmud *Jerus. Berachoth*, ix, 11 d, 12 a, and *Genesis Rabbâ*, c. viii, we still find some of those controversial points disputed by Simlai. See Grätz, *Gesch. d. Juden*, iv, 265 sq.; Edersheim, *Hist. of the Jewish Nation*, p. 517; Bäck, *Die Gesch. des jüd. Volkes* (Lissa, 1878), p. 207; Cassel, *Lehrbuch der jüdischen Geschichte u. Literatur* (Leipzig, 1879), p. 182. (B. P.)

Simler, Johann Jakob, a descendant of the following, was born in 1716 and died in 1788. He was inspector of the seminary at Zurich, and left at his death a comprehensive collection of historical documents relating largely to events connected with the Reformation. It includes many letters by the various Reformers, though often they are only copies, and it ranks as an ornament of the town-library of Zurich. A work entitled *Sammungen alter u. neuer Urkunden zur Beleuchtung der Kirchengeschichte, vornehmlich d. Schweizerlandes* (Zurich, 1757 sq.) is from his pen.

Simler, Josias, a prominent Swiss theologian, was born Nov. 6, 1580, at Cappel, near Zurich, being the son of a prior who had quitted the convent there and married. Young Simler had applied himself with success to belles-lettres, the sciences, and theology, devoting several years to visiting the principal schools of Germany; and on his return to Zurich in 1549, he first assisted Conrad Gessner in the chair of mathematics, and afterwards was appointed to the exposition of the New Test. (1552) in the capacity of deacon in the Church of St. Peter. In 1563 he succeeded Bibliander (q. v.) and Vermigli in the theological chair at Zurich, and distinguished himself by an immense literary activity, in addition to a faithful performance of the duties of his office. He was twice married, and left by his second wife four children. Though greatly afflicted with gout, he possessed an exceedingly amiable disposition, and was fond of society, given to hospitality, and benevolent. He died of gout, July 2, 1576. His life was written by his colleague Stucki, of Zurich (1577), and his writings are catalogued in Gessner's *Bibliotheca*, amplified by Frisium (Zurich, 1583). Letters addressed to him from Hungary may be found in *Miscell. Tigur.* ii, 213 sq., and in the *Zurich Letters* of the Parker Society. Comp. also Trechsel, *Antitrinitarier*, ii, 377 sq. Simler's works deal with astronomy, geography, history, biography, and statistics, no less than with theology. He republished Gessner's *Bibliotheca Universalis* in an abridged but much improved form (1555 and 1574). His *Republ. Helvetiorum* was translated into three languages, and passed through twenty-nine editions. In theology he was chiefly engaged in defence of the doctrine of Christ's twofold nature. We mention, *Responsio ad Maledicum Francisci Stancari . . . de Trinitate et Mediatore Nostro Jesu Christo* (1558):—*De Æterno*

Dei Filio Domino et Servatore Nostro Jesu Christo et de Spiritu Sancto, etc. (1558):—*Assertio Orthod. Doctr. de Duabus Naturis Christi*, etc. (1575):—*Scripta Veterum, de Una Persona et Duabus Naturis Christi*, etc. (1571). *The Commentarii in Ezeodum* was published after his death, in 1584. The *Confessio Helvetica* of 1556, by Bullinger, has a preface by Simler. See Herzog, *Real-Encyklop.*, s. v.; Hofer, *Nouv. Biog. Générale*, s. v.

Simmons, George Frederick, a Unitarian minister, was born in Boston, Mass., in 1814. He was prepared for college at the Latin school in that city, entered Harvard University in 1828, and graduated in 1832. On leaving college he became private tutor in the family of David Sears, Longwood, Me. The next year he accompanied his family to Europe, and returning in July, 1835, entered the divinity school at Cambridge, where he completed his course in 1838. He was ordained evangelist, Oct. 9, 1838, and went immediately to Mobile and commenced his ministry. He only remained there until 1840, being obliged to fly because of his protest against slavery. In April, 1841, he began to preach regularly at Waltham, Mass., and was installed as minister in that town in November following. In the spring of 1843, having resigned his charge, he repaired to the University of Berlin to still further study theology. He returned in October, 1845, and preached in several pulpits, till February, 1848, when he became pastor of the Unitarian Church, Springfield, lately vacated by Dr. Peabody. He was dismissed from this church because of his sympathy with George Thompson, the English abolition lecturer, and retired to Concord, Mass. In November, 1853, he began to supply a church in Albany, N. Y., and was installed as its pastor, January, 1854. He died of hasty consumption, Sept. 5, 1855. The following is a list of his publications: *Who was Jesus Christ?* (1839):—*The Trinity; its Scripture, Formalism*, etc.:—*a Lecture* (Springfield, 1849):—*Sermons* (1840, 1851, 1854):—*A Letter to the So-called Boston Churches* (1846). A volume of his sermons was printed in 1855. See Sprague, *Annals of the Amer. Pulpit*, viii, 554.

Simmons, John, a minister of the Methodist Episcopal Church, South, was born in Hancock County, Ga., Nov. 6, 1791. In his nineteenth year he united with the Church, and in 1815 was admitted into the South Carolina Conference. After four or five years he located, the better to provide for his family; but he still continued to labor. He organized societies, and even erected a church at his own expense. In 1847 Mr. Simmons was readmitted into the Georgia Conference, and again entered upon the regular work of the ministry, until compelled to take a superannuated relation. This relation he sustained until his death, in Upson County, Ga., Dec. 12, 1865. See *Minutes of Annual Conferences*, M. E. Church, South, 1866, p. 24.

Simmons, John C., a minister of the Methodist Episcopal Church, South, was born in Jackson County, Ga., in 1806. In 1830 he was received on trial into the Georgia Conference, and labored thirty-eight years, most of the time as presiding elder. He died in 1868. See *Minutes of Ann. Conf. of M. E. Ch., South*, 1869, p. 319.

Simmons, Perry A., a minister of the Methodist Episcopal Church, was born in Macon County, Tenn., Dec. 1, 1833, and united with the Church at the age of fifteen. He received license to preach in 1854, removed to Missouri in 1861, and in 1868 united with the Missouri Conference. He was superannuated in 1870, and located at his own request in 1872. In 1875 he was readmitted to the conference, but died, near Lancaster, Schuyler Co., Mo., Oct. 3, 1876. See *Minutes of Annual Conferences*, 1876, p. 77.

Simmons, William, a minister of the Methodist Episcopal Church, was born in Mason County, Ky., June 24, 1798, and removed with his parents the next year to Ohio. He was converted in 1816, licensed to preach July 17, 1820, and received on trial the same year by

the Ohio Conference. In his early ministry he travelled over extensive territory; and in 1825, besides being pastor of the church in Detroit, Mich., he served as presiding elder of a district including the whole of that state and a part of Northern Ohio. His relation to his conference, during fifty-four years, was always effective. He was an agent of the Freedman's Aid Society for a number of years, up to the time of his death, Aug. 6, 1874. For several years he was president of the trustees of Xenia College. See *Minutes of Annual Conferences*, 1874, p. 102.

Simmons, William S., a minister of the Methodist Episcopal Church, was born in Bristol, R. I., Sept. 24, 1813, and was converted at the age of sixteen. Having received a good education, and having served as a supply for two years, he joined the New England Conference on trial, June, 1839. He was ordained deacon, June 13, 1841; and elder, June 11, 1843. His last appointment was Hopeville, Providence Conference, where he died, Jan. 4, 1867. See *Minutes of Annual Conferences*, 1867, p. 102.

Simōis, in Grecian mythology, was the god of the river Simois, which joins the Scamander, or Xanthus, in the plain of Troy. He was the son of Oceanus and Tethys, and father of Astyoche and Hieromemne.

Simon, in Grecian mythology, was one of the Tyrrhenian pirates who attempted to enslave the youthful Bacchus and were by him turned into dolphins.

Si'mon (Σίμων), a name of frequent occurrence in Jewish history in the post-Babylonian period. We here present those found in the Apocrypha, the New Test., and Josephus. It is doubtful whether it was borrowed from the Greeks, with whom it was not uncommon, or whether it was a contraction of the Hebrew *Shimeon*, i. e. SIMEON. That the two names were regarded as identical appears from 1 Macc. ii, 65.

1. **SIMON CHOSAMÆUS**, a name that erroneously appears in 1 Esdr. ix, 32, in place of the four names "Shimeon, Benjamin, Malluch, and Shemariah" of the Hebrew text (Ezra x, 31, 32). "Chosamæus" is apparently formed by combining the last letter of Malluch with the first part of the following name, Shemariah.

2. Second son of Mattathias and last survivor of the Maccabean brothers. See MACCABEE, 4.

3. Son of Onias, whom he succeeded in the high-priesthood (B.C. 302-293), being himself succeeded by his uncle Eleazar, although he left a son also called Onias (Josephus, *Ant.* xii, 2, 5; 4, 1, 10). He is generally called "Simon the Just." See the following article, No. 6. He is doubtless identical with the son of Onias the high-priest (ἱερεὺς ὁ μέγας), whose eulogy closes the "praise of famous men" in the book of Ecclesiasticus (ch. iv). See ECCLESIASTICUS. Fritzsche, whose edition of Ecclesiasticus (*Exeg. Handb.*) appeared in 1860, maintains the common view that the reference is to Simon II, but without bringing forward any new arguments to support it, though he strangely underestimates the importance of Simon I (the Just). Without laying undue stress upon the traditions which attached to this name (Herzfeld, *Gesch. Isr.* i, 195), it is evident that Simon the Just was popularly regarded as closing a period in Jewish history, as the last teacher of "the great synagogue." Yet there is, in fact, a doubt to which Simon the title "the Just" was given. Herzfeld (i, 377, 378) has endeavored to prove that it belongs to Simon II, and not to Simon I, and in this he is followed by Jost (*Gesch. d. Judenth.* i, 95). The later Hebrew authorities, by whose help the question should be settled, are extremely unsatisfactory and confused (Jost, p. 110, etc.); and it appears better to adhere to the express testimony of Josephus, who identifies Simon I with Simon the Just (*Ant.* xii, 2, 4, etc.), than to follow the Talmudic traditions, which are notoriously untrustworthy in chronology. The legends are connected with the title, and Herzfeld and Jost both agree in supposing that the reference in Ecclesiasticus is to Simon known

as "the Just," though they believe this to be Simon II (comp. for the Jewish anecdotes, Raphall, *Hist. of Jews*, i, 115-124; Prideaux, *Connection*, ii, 1).

4. A governor of the Temple in the time of Seleucus Philopator, whose information as to the treasures of the Temple led to the sacrilegious attempt of Heliodorus (2 Macc. iii, 4, etc.). B.C. 175. After this attempt failed, through the interference of the high-priest Onias, Simon accused Onias of conspiracy (iv, 1, 2), and a bloody feud arose between their two parties (ver. 3). Onias appealed to the king, but nothing is known as to the result or the later history of Simon. Considerable doubt exists as to the exact nature of the office which he held (*προσπάρτης τοῦ ἱεροῦ*, iii, 4). Various interpretations are given by Grimm (*Exeg. Handb.* ad loc.). The chief difficulty lies in the fact that Simon is said to have been of "the tribe of Benjamin" (ver. 3), while the earlier "ruler of the house of God" (*ὁ ἡγούμενος οἴκου τοῦ Θεοῦ* [*κυρίου*], 1 Chron. ix, 11; 2 Chron. xxxi, 13; Jer. xx, 1) seems to have been always a priest, and the "captain of the Temple" (*στρατηγὸς τοῦ ἱεροῦ*, Luke xxii, 4, with Lightfoot's note; Acts iv, 1; v, 24, 26) and the keeper of the treasures (1 Chron. xxvi, 24; 2 Chron. xxxi, 12) must have been at least Levites. Herzfeld (*Gesch. Isr.* i, 218) conjectures that *Benjamin* is an error for *Minjamin*, the head of a priestly house (Neh. xii, 5, 17). In support of this view it may be observed that Menelaus, the usurping high-priest, is said to have been a brother of Simon (2 Macc. iv, 23), and no intimation is anywhere given that he was not of priestly descent. At the same time, the corruption (if it exist) dates from an earlier period than the present Greek text, for "tribe" (*φυλῇ*) could not be used for "family" (*οἶκος*). The various reading *ἀγορανομίας* ("regulation of the market") for *παρανομίας* ("disorder," iii, 4), which seems to be certainly correct, points to some office in connection with the supply of the sacrifices; and probably Simon was appointed to carry out the design of Seleucus, who (as is stated in the context) had undertaken to defray the cost of them (ver. 3). In this case there would be less difficulty in a Benjamite acting as the agent of a foreign king, even in a matter which concerned the Temple service.

5. A resident of Jerusalem, son of Boethus, a priest of Alexandria, and a person of considerable note, whose daughter Herod the Great married, having first raised her father's family to sufficient distinction by putting him into the high-priesthood in place of Jesus the son of Phabet (Josephus, *Ant.* xv, 9, 3). B.C. 23. The woman having become involved in the domestic conspiracies of his later reign, he divorced her, and displaced her father in the pontificate by Mattathias the son of Theophilus (*ibid.* xvii, 4, 2). B.C. 5. See HIGH-PRIEST.

6. A slave of Herod who usurped royalty and committed many atrocities till he was overcome and beheaded by Gratus (Josephus, *Ant.* xvii, 10, 6). B.C. 4.

7. A prophet of the sect of the Essenes who interpreted Archelaus's dream of the end of his reign (Josephus, *Ant.* xvii, 13, 3). A.D. 6.

8. The father of Judas (q. v.) Iscariot (John vi, 71; xii, 4; xiii, 2, 26). A.D. ante 27.

9. One of the apostles, usually designated Simon Peter (q. v.).

10. Another of the apostles, distinguished from the preceding as "the Canaanite," or rather *Cananite* (Matt. x, 4; Mark iii, 18), otherwise described as *Simon Zelotes* (Luke vi, 15; Acts i, 13). A.D. 27. The latter term (*ζηλωτής*), which is peculiar to Luke, is the Greek equivalent for the Chaldee term (ܙܠܘܬܝܐ) preserved by Matthew and Mark (*Kanavirēs*, as in *text. recept.*, or *kanauiot*, as in the Vulg., *Cananæus*, and in the best modern editions). Each of these equally points out Simon as belonging to the faction of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic

ritual. The supposed references to Canaan (A. V.) or to Cana (Luther's version) are equally erroneous. See CANAANITE. The term *Kanavirēs* appears to have survived the other as the distinctive surname of Simon (*Const. Apost.* vi, 14; viii, 27). He has been frequently identified with Simon the brother of Jesus, although Eusebius (*H. E.* iii, 11) clearly distinguishes between the apostles and the relations of Jesus. It is less likely that he was identical with Symeon, the second bishop of Jerusalem, as stated by Sophronius (*App. ad Hieron. Catal.*). Simon the Canaanite is reported, on the doubtful authority of the Pseudo-Dorotheus and of Nicephorus Callistus, to have preached in Egypt, Cyrene, and Mauritania (Burton, *Lectures*, i, 333, note), and, on the equally doubtful authority of an annotation preserved in an original copy of the *Apostolical Constitutions* (viii, 27), to have been crucified in Judæa in the region of Domitian.

11. A relative of our Lord, the only undoubted notice of whom occurs in Matt. xiii, 55; Mark vi, 3, where, in common with James, Joseph, and Judas, he is mentioned as one of the "brethren" of Jesus. A.D. 28. He has generally been identified with Symeon, who became bishop of Jerusalem after the death of James, A.D. 62 (Euseb. *H. E.* iii, 11; iv, 22), and who suffered martyrdom in the reign of Trajan at the extreme age of 120 years (Hegesippus, ap. Euseb. *H. E.* iii, 32) in the year 107, or, according to Burton (*Lectures*, ii, 17, note), in 104. A very considerable probability also has from early times been attached to the opinion which identifies him with the subject of the preceding paragraph, for in all the lists of the apostles he is named along with James the son of Alphæus, and Jude or Thaddæus. But in whatever sense the term "brother" is accepted—a vexed question which has been already amply discussed under BROTHER and JAMES—it is clear that neither Eusebius nor the author of the so-called *Apostolical Constitutions* understood Symeon to be the brother of James, nor consequently the "brother" of the Lord. Eusebius invariably describes James as "the brother" of Jesus (*H. E.* i, 12; ii, 1, al.), but Symeon as the son of Clopas and the cousin of Jesus (iii, 11; iv, 22), and the same distinction is made by the other author (*Const. Apost.* vii, 46).

12. A Pharisee in whose house a penitent woman anointed the head and feet of Jesus (Luke vii, 40). A.D. 28.

13. A resident at Bethany, distinguished as "the leper," not from his having leprosy at the time when he is mentioned, but at some previous period. It is not improbable that he had been miraculously cured by Jesus. In his house Mary anointed Jesus preparatory to his death and burial (Matt. xxvi, 6, etc.; Mark xiv, 3, etc.; John xii, 1, etc.). A.D. 29. Lazarus was also present as one of the guests, while Martha served (John xii, 2). The presence of the brother and his two sisters, together with the active part the latter took in the proceedings, leads to the inference that Simon was related to them; but there is no evidence of this, and we can attach no credit to the statement that he was their father, as reported on Apocryphal authority by Nicephorus (*H. E.* i, 27), and still less to the idea that he was the husband of Mary. Simon the leper must not be confounded with the preceding.

14. A Hellenistic Jew, born at Cyrene on the north coast of Africa, who was present at Jerusalem at the time of the crucifixion of Jesus either as an attendant at the feast (Acts ii, 10) or as one of the numerous settlers at Jerusalem from that place (vi, 9). A.D. 29. Meeting the procession that conducted Jesus to Golgotha as he was returning from the country, he was pressed into the service (*ἡγγάρευσαν*, a military term) to bear the cross (Matt. xxvii, 32; Mark xv, 21; Luke xxiii, 26) when Jesus himself was unable to bear it any longer (comp. John xix, 17). Mark describes him as the father of Alexander and Rufus, perhaps because this was the Rufus known to the Roman Christians

(Rom. xvi, 18), for whom he more especially wrote. The Basilidian Gnostics believed that Simon suffered in lieu of Jesus (Burton, *Lectures*, ii, 64).

15. A Samaritan living in the apostolic age, distinguished as a sorcerer or "magician" from his practice of magical arts (*μαγέων*, Acts viii, 9)—A.D. 30—and hence usually designated in later history as Simon Magus. His history is a remarkable one. He was born at Gitton, a village of Samaria (Justin Mart. *Apol.* i, 26), identified with the modern *Kuryet Jit*, near Nablûs (Robinson, *Bib. Res.* ii, 308, note). Some doubt has been thrown on Justin's statement from the fact that Josephus (*Ant.* xx, 7, 2) mentions a reputed magician of the same name and about the same date who was born in Cyprus. It has been suggested that Justin borrowed his information from this source, and mistook Citium, a town of Cyprus, for Gitton. If the writers had respectively used the gentile forms *Κιτιεύς* and *Γιτιτεύς*, the similarity would have favored such an idea. But neither does Josephus mention Citium, nor yet does Justin use the gentile form. It is far more probable that Josephus would be wrong than Justin in any point respecting Samaria. Simon Magus was probably educated at Alexandria (as stated in *Clem. Homil.* ii, 22), and there became acquainted with the eclectic tenets of the Gnostic school. Either then or subsequently he was a pupil of Dositheus, who preceded him as a teacher of Gnosticism in Samaria, and whom he supplanted with the aid of Cleobius (*Const. Apost.* vi, 8). He is first introduced to us in the Bible as practicing magical arts in a city of Samaria, perhaps Sychar (Acts viii, 5; comp. John iv, 5), and with such success that he was pronounced to be "the power of God which is called great" (Acts viii, 10). The A. V. omits the word *καλούμενη*, and renders the words "the great power of God." But this is to lose the whole point of the designation. The Samaritans described the angels as *δυνάμεις* (חַיִּלִּים), i. e. uncreated influences proceeding from God (Gieseler, *Eccles. Hist.* i, 48, note 6). They intended to distinguish Simon from such an order of beings by adding the words "which is called great," meaning thereby the source of all power—in other words, the Supreme Deity. Simon was recognised as the incarnation of this power. He announced himself as in a special sense "some great one" (Acts viii, 9), or, to use his own words (as reported by Jerome, on *Matt. xxiv*, 5), "Ego sum sermo Dei, ego sum Speciosus, ego Paracletus, ego Omnipotens, ego omnia Dei." The preaching and miracles of Philip having excited Simon's observation, he became one of his disciples, and received baptism at his hands. Subsequently he witnessed the effect produced by the imposition of hands as practiced by the apostles Peter and John, and being desirous of acquiring a similar power for himself, he offered a sum of money for it. His object evidently was to apply the power to the prosecution of magical arts. The motive and the means were equally to be reprobated; and his proposition met with a severe denunciation from Peter, followed by a petition on the part of Simon, the tenor of which bespeaks terror, but not penitence (Acts viii, 9-24). The memory of his peculiar guilt has been perpetuated in the word *simony* (q. v.) as applied to all traffic in spiritual offices. Simon's history subsequently to his meeting with Peter is involved in difficulties. Early Church historians depict him as the pertinacious foe of the apostle Peter, whose movements he followed for the purpose of seeking encounters, in which he was signally defeated. In his journeys he was accompanied by a female named Helena, who had previously been a prostitute at Tyre, but who was now elevated to the position of his *ἐννοια*, or divine intelligence (Justin Mart. *Apol.* i, 26; Euseb. *H. E.* ii, 13). In the *ἐννοια*, as embodied in Helena's person, we recognise the dualistic element of Gnosticism derived from the Manichean system. The Gnostics appear to have recognised the *δύναμις* and the *ἐννοια* as the two original principles from

whose junction all beings emanated. Simon and Helena were the incarnations in which these principles resided. Simon's first encounter with Peter took place at Cæsarea Stratonis (according to the *Const. Apost.* vi, 8), whence he followed the apostle to Rome. Eusebius makes no mention of this first encounter, but represents Simon's journey to Rome as following immediately after the interview recorded in Scripture (*H. E.* ii, 14); but his chronological statements are evidently confused, for in the very same chapter he states that the meeting between the two at Rome took place in the reign of Claudius, some ten years after the events in Samaria. Justin Martyr, with greater consistency, represents Simon as having visited Rome in the reign of Claudius, and omits all notice of an encounter with Peter. His success there was so great that he was deified, and a statue was erected in his honor with the inscription "Simoni Deo Sancto" (*Apol.* i, 26, 56). Justin's authority has been impugned in respect to this statement on the ground that a tablet was discovered in 1574 on the *Tiberina insula*, which answers to the locality described by Justin (*ἐν τῇ Τιβερι ποταμῷ μετὰ τῶν δύο γεφυρῶν*), and bearing an inscription, the first words of which are "Semoni Sanco Deo Fidio." This inscription, which really applies to the Sabine Hercules (*Sancus Semo*), is generally supposed to have been mistaken by Justin, in his ignorance of Latin, for one in honor of Simon. Yet the inscription goes on to state the name of the giver and other particulars: "Semoni Sanco Deo Fidio sacrum Sex. Pompeius, Sp. F. Col. Mussianus Quinquennalis decus Bidentalıs donum dedit." That Justin, a man of literary acquirements, should be unable to translate such an inscription—that he should misquote it in an *Apology* duly prepared at Rome for the eye of a Roman emperor—and that the mistake should be repeated by other early writers whose knowledge of Latin is unquestioned (Irenæus, *Adv. Hæres.* i, 20; Tertullian, *Apol.* 13)—these assumptions form a series of difficulties in the way of the theory (Salmasius, *Ad Spartianum*, p. 38; Van Dale, *De Oraculis*, p. 579; Burton, *Hæreses of the Apostolic Age*, p. 374, etc.). The above statements can be reconciled only by assuming that Simon made two expeditions to Rome—the first in the reign of Claudius; the second, in which he encountered Peter, in the reign of Nero about the year 68 (Burton, *Lectures*, i, 233, 318); and even this takes for granted the disputed fact of Peter's visit to Rome. See PETER. This later date is to a certain extent confirmed by the account of Simon's death preserved by Hippolytus (*Adv. Hæres.* vi, 20); for the event is stated to have occurred while Peter and Paul (the term *ἀποστόλοις* evidently implying the presence of the latter) were together at Rome. Simon's death is associated with the meeting in question. According to Hippolytus, the earliest authority on the subject, Simon was buried alive at his own request, in the confident assurance that he would rise again on the third day (*ibid.* vi, 20). According to another account, he attempted to fly, in proof of his supernatural power, in answer to the prayers of Peter, he fell and sustained a fracture of his thigh and ankle bones (*Const. Apost.* ii, 14; vi, 9); overcome with vexation, he committed suicide (Arnob. *Adv. Gent.* ii, 7). Whether this statement is confirmed, or, on the other hand, weakened, by the account of a similar attempt to fly recorded by heathen writers (Sueton. *Nero*, 12; Juven. *Sat.* iii, 79), is uncertain. Simon's attempt may have supplied the basis for this report, or this report may have been erroneously placed to his credit. Burton (*Lectures*, i, 295) rather favors the former alternative. Simon is generally pronounced by early writers to have been the founder of heresy. It is difficult to understand how he was guilty of heresy in the proper sense of the term, inasmuch as he was not a Christian. Perhaps it refers to his attempt to combine Christianity with Gnosticism. He is also reported to have forged works professing to emanate from Christ and his disciples (*Const. Apost.* vi, 16). See Tillemont, *Mémoires*, i, 158 sq.;

Beausobre, *Hist. du Manichéisme*, vol. i; Ittigius, *Hist. Eccles. Selecta Capita*, v, 16, etc.; Mosheim, *History of the Church*, cent. ii, 5, 12; *De Rebus Christianorum*, etc., p. 190 sq.; Burton, *Heretics of the Apostolic Age*, lect. iv; Milman, *Hist. of Christianity*, ii, 96 sq., etc.

16. A tanner and a Christian convert living at Joppa at whose house Peter lodged (Acts ix, 43). A.D. 32. The profession of tanner was regarded with considerable contempt, and even as approaching to uncleanness, by the rigid Jews. See TANNER. That Peter selected such an abode showed the diminished hold which Judaism had on him. The house was near the seaside (x, 6, 32), for the convenience of the water.—Smith. The traditional "house of Simon" is still shown at Jaffa in a not improbable position. Some time since an order was issued by the sultan for removing the old walls and fortifications at Jaffa (Joppa). In cutting a gate through a water battery at an angle of the sea-wall built by Vespasian, and directly in front of the reputed house of Simon the tanner, the men came on three oval-shaped tanners' vats, hewn out of the natural rock and lined with Roman cement, down very near the sea, and similar in every respect to those in use eighteen centuries ago. There is also a fresh-water spring flowing from the cliffs close by, long known as the town spring. This discovery at least proves that the house on the rocky bluff above, and from which steps lead down to the vats, must have belonged to some tanner; and, as perhaps not more than one of that trade would be living in so small a place as Jaffa, some probability is given to the tradition that this is the identical spot where the house of Simon stood with whom Peter was sojourning when he saw his vision. See JOPPA.

17. A well-informed citizen of Jerusalem who persuaded the people to exclude Agrippa from the Temple, but was pardoned for the offence on his confession (Josephus, *Ant.* xix, 7, 4). A.D. 38.

18. Son of Saul, and a distinguished Jew who slew many of the inhabitants of Scythopolis, and finally killed himself, with his entire family (Josephus, *War*, ii, 18, 4). A.D. 69.

19. Son of Gioras of Gerasa, and a prominent leader of the Jews in their last struggle with the Romans, according to Josephus, who relates at length some of his exploits against Cestius Gallus (*War*, ii, 19, 2), his intrigues at Massada, his campaigns in Acrabbattine and

Idumæa (*ibid.* iv, 9, 3 sq.), and his final capture and execution by the Romans (*ibid.* vii, 2, 1; 5, 6). A.D. 70.

20. Son of Cathlas and one of the Idumæan generals who came at the invitation of the Zealots during the intestine broils at the final siege of Jerusalem. Josephus recites a speech of his on the occasion (*War*, iv, 4, 4.) A.D. 70.

Simon, a name common to a number of Jewish rabbins and literati, of whom we mention the following:

1. SIMON DURAN. See RASHBAZ.

2. SIMON BEN-GAMALIEL I, A.D. cir. 50-70, succeeded his father Gamaliel (q. v.). The authentic notices of him are very few. We get a glimpse or two of him in the storm which was then so fiercely raging in Jerusalem. As the resolute opponent of the Zealots, he took an active part in the political struggles whose convulsions hastened the ruin of the state. He also took an active part in the defence of Jerusalem, and fell, one of the many victims of the national struggle. Josephus (*Life*, § 38) says of him: ὁ δὲ Σίμων οὗτος ἦν πόλιως μὲν Ἱεροσολύμων, γίνους δὲ σφόδρα λαμπροῦ, τῆς δὲ Φαρισαίων αἰρέσεως, οἱ περὶ τὰ πατρία νόμιμα δοκοῦσι τῶν ἄλλων ἀκριβείᾳ διαφέρειν. Ἦν δὲ οὗτος ἀνὴρ πλήρης συνέσεως τε καὶ λογισμοῦ, δυνάμειός τε πράγματα κακῶς κείμενα φρονήσει τῇ ἑαυτοῦ διορθώσας. His recorded maxim is: "The world exists by virtue of three things—viz., truth, justice, and peace; as it is said, Truth and the judgment of peace shall be in your gates" (*Aboth*, i, 18). He also belongs to the ten teachers who were called מלכודת, "the killed for the kingdom," and their death is celebrated on the 25th of Sivan, for which day a fast is ordained. Comp. Schürer, *Lehrbuch der neutest. Zeitgeschichte* (Leips. 1874), p. 335, 453, 459; Derenbourg, *Essai sur l'Histoire et la Géographie de la Palestine*, p. 270 sq.; Bäck, *Gesch. des jüd. Volkes* (Lissa, 1878), p. 157; Grätz, *Gesch. d. Juden*, iii, 324, 354, 370, 388 sq.; Cassel, *Lehrbuch der jüd. Gesch. u. Literatur* (Leips. 1879), p. 147, 150, 166, 168, 177.

3. SIMON BEN-GAMALIEL II, A.D. cir. 140-160, a contemporary of Nathan the Babylonian (q. v.), was the only schoolboy who escaped from the slaughter at Bethira under Bar-cocheba. He was the father of the famous Judah the Holy (q. v.), and was elected to the presidency when yet a youth. Simon was much regarded by the people for the sake of his illustrious forefathers; but his striving for autocratic power aroused an opposition party

Reputed House, Well, and Vat of Simon the Tanner at Jaffa. (From a photograph by the Editor.)

against him, which rendered his position very difficult. From some of the decisions of Simon which have come down to us, he seems to have been not only a man with a passable knowledge of Hebrew law, but, for a Jew at that time, an extraordinary proficient in Gentile literature. He cultivated the study of the Greek language, and gave his countenance to the reading of the Sept. Comp. the essay by Ph. Bloch on Simon, in Frankel's *Monatsschrift*, 1864, p. 81 sq.

4. SIMON BEN-HILLEL, who succeeded his father Hillel (q. v.) A.D. cir. 10-30, is said (Baronius, A.D. 1, n. 40), upon the authority of Athanasius and Epiphanius, to have been that same Simon whom Luke described as embracing the infant Saviour in the Temple and pronouncing the *Nunc dimittis* (ii, 23-35). Whether he is the same whom Josephus (*Ant.* xix, 7, 4) describes as accusing king Agrippa of an unholy living, and that he should be excluded from the Temple, since it belonged only to native Jews (*προσπορευσης τοις ιγγενειναι*) is difficult to tell. Simon's recorded maxim is found in *Aboth*, i, 17: "All my life have I been brought up among sages, nor have I found anything better than to keep silence; for to act, and not to explain, is the principle and basis of all; but he who multiplies words only induces sin." See SIMON 5.

5. SIMON BEN-JOCHAI, the reputed author of the *Zohar* (q. v.), lived in the 2d century. The biographical notices of him are so enveloped in mythical extravagances as to make it difficult to give a true statement of his life. His whole life was absorbed in the study of the Cabala, in which science he was regarded as one of the most eminent masters. He existed in a world of his own, a region beyond the bounds of ordinary nature, and peopled by the genii of his own imagination. His occasional intercourse with his coreligionists did not propitiate their good affections; he was disliked by some for the moroseness of his disposition, and feared by others from his supposed connection with the spirits of the other world. "He had the character of being an unpleasant companion and a bitter opponent; moreover, he merited the reproaches of his countrymen by causing the overthrow of the school at Jamnia. At a time when their Gentile rulers were grudging the Jews the partial relaxation they had lately enjoyed from the severe discipline of Hadrian, and when the jealousy and suspicion entertained against them were so great that the patriarch, who dared not use the title of *nasi* nor assume any outward mark of authority, was constrained to screen the ordinary routine of the schools as much as possible from observation, and not only to prohibit the publication of books, but also to forbid the students to take written notes of the lectures, Simon ben-Jochai was rash enough to inveigh against their oppressors in a public discourse." The affair, becoming a topic of public conversation, aroused the displeasure of the civil authorities. A process of law was instituted, and Simon was doomed to die. He managed, however, to escape, and, accompanied by his son, he concealed himself in a cavern, where he remained for twelve years. Here, in the subterranean abode, he occupied himself entirely with the contemplation of the sublime Cabala, and was constantly visited by the prophet Elias, who disclosed to him some of its secrets which were still concealed from the theosophical rabbi. Here, too, his disciples resorted to be initiated by their master into those divine mysteries; and here Simon ben-Jochai expired with this heavenly doctrine in his mouth while discoursing on it to his disciples. Scarcely had his spirit departed when a dazzling light filled the cavern, so that no one could look at the rabbi; while a burning fire appeared outside, forming, as it were, a sentinel at the entrance of the cave, and denying admittance to the neighbors. It was not till the light inside and the fire outside had disappeared that the disciples perceived that the lamp of Israel was extinguished. As they were preparing for his obsequies, a voice was heard from heaven, saying, "Come ye to the marriage of Simon ben-Jochai; he is entering

into peace, and shall rest in his chamber!" When the funeral procession moved towards the grave, a light revealed itself in the air; and when the remains were deposited in the tomb, another voice was heard from heaven, saying, "This is he who caused the earth to quake and the kingdoms to shake!" Such is the statement concerning Simon ben-Jochai, and in its traditional garb it is probably more intended to show the affection and reverence with which this sage was regarded by his disciples. See Fürst, *Bibl. Jud.* iii, 329 sq.; Etheridge, *Introduction to Jewish Literature*, p. 80 sq.; Ginsburg, *The Kabbalah*, p. 9; Edersheim, *History of the Jewish Nation*, p. 261; Grätz, *Gesch. d. Juden*, iv, 196 sq.; 470 sq.; Bäck, *Gesch. des jüd. Volkes*, p. 199; Cassel, *Lehrbuch der jüd. Gesch. u. Literatur* (Leips. 1879), p. 176; Herzog, *Real-Encyklop.* s. v.

6. SIMON I "THE JUST" (B.C. cir. 300-200). Under this name he was known *διὰ τε τὸ πρὸς θεὸν εὐσεβὲς καὶ τὸ πρὸς τοὺς ὁμοφύλους εὐνοῦν* (Josephus, *Ant.* xii, 2). Derenbourg has conclusively established that this Simon is the same that is spoken of in Ecclesiasticus. There are many legends about him. According to one, it was he who encountered Alexander the Great; according to another, he was the last surviving member of the Great Synagogue (*משיירי כנסת הגדולה*); according to another, it was he who warned Ptolemy Philopator not to enter the Temple. All the traditions, however, combine in representing Simon as closing the better days of Judaism. "Down to his time," says dean Stanley (*History of the Jewish Church*, iii, 276 sq.), "it was always the right hand of the high-priest that drew the lot of the consecrated goat; after his time the left and right wavered and varied. Down to his time the red thread round the neck of the scape-goat turned white, as a sign that the sins of the people were forgiven; afterwards its change was quite uncertain. The great light at the entrance of the Temple burned, in his time, without fail; afterwards it often went out. Two fagots a day sufficed to keep the flame on the altar alive in his time; afterwards piles of wood were insufficient. In his last year he was said to have foretold his death, from the omen that, whereas on all former occasions he was accompanied into the Holy of Holies on the Day of Atonement, to the entrance only, by an old man clothed in white from head to foot, in that year his companion was attired in black, and followed him as he went in and came out. These were the forms in which the later Jewish belief expressed the sentiment of his transcendent worth, and of the manifold changes which were to follow him." In the book called Ecclesiasticus we are told of Simon's activity for his people. Thus he made the city of Jerusalem, which had suffered much through the wars, a great stronghold, in order that it might not be so easily taken, for which many gloomy prospects continually sprang up. The Temple Simon also fortified, repaired all damaged places, and raised the foundation of the fore court. The reservoir in the Temple, holding the water, he enlarged to the extent of a pond, in order that the inhabitants might not suffer from scarcity of water in case of a siege. Since that time, the Temple had always large quantities of water in store, which, in a hot climate, and on dry soil like Jerusalem, was looked upon with great astonishment. If Simon thus cared for the material interest of his people, he was not the less severed from the idea of Judaism, that Israel's strength does not depend upon such means. "Of three things Israel's salvation is composed" is taught by the choice sentence preserved to us—"upon observance of the law (*Torah*); upon reconciliation with God by virtue of means of grace, which the Temple worship furnishes (*Abodah*); and upon works of charity (*Gemiluth Chassadim*)." His piety was a purified one, free from ascetic excess. His period, full of wars and troubles, brought about many evils, and the strictly pious sought, as during the time of the prophets, to withdraw from human society altogether,

and to consecrate themselves in vowing to lead a Nazarite life—the first step to the sect of the Assideans. Simon did not like this mode of life, and showed his protest against it by not allowing the priests to use the pieces due to them from the sacrifices of the Nazarites. Only once he made an exception in favor of a young beautiful shepherd who came to him as a Nazarite. "Why do you wish," inquired the high-priest of the youth, with a splendid head full of ringlets, "to destroy thy beautiful head of hair?" To this the shepherd replied, "Because my head full of ringlets has nearly enticed me to sin from mere vanity. I once saw my reflection in a clear stream, and, as my likeness thus met my eye, the thought of self-deification took hold of me; wherefore I consecrated my hair unto the Lord through the Nazarite vow." On hearing these words Simon kissed the young shepherd of such morally pure simplicity, and said to him, "Oh, if there were only in Israel many Nazarites like yourself!" Beautiful, indeed, is the magnificent eulogy of Ben-Sira, the writer of Ecclesiasticus, in which he describes our Simon (i, 1-21):

"How beauteous was he when, coming forth from the temple,

He appeared from within the veil!
He was as the morning star in the midst of clouds,
And as the moon in the days of Nisan:
As the sun shining upon a palace,
And as the rainbow in the cloud:
As the waving wheat in the field,
As the Persian lily by a fountain,
And as the trees of Lebanon in the days of vintage:
As the perfume of frankincense upon a censer,
As a collar of gold of variegated beauty
And adorned with precious stones:
As a fair olive-tree whose boughs are perfect,
And as the tree of anointing whose branches are full."

This description, says Stanley, "is that of a venerable personage who belonged to a nobler age and would be seen again no more." See Derenbourg, *Essai sur l'Histoire et la Géographie de la Palestine*, p. 47-51; Grätz, *Gesch. d. Juden*, ii, 235 sq., and his essay, *Simon der Gerechte und seine Zeit*, in Frankel's *Monatsschrift*, 1857, p. 45-56; Etheridge, *Introduction to Hebrew Literature*, p. 19 sq.; Edersheim, *The Temple, its Ministry and Services at the Time of Jesus Christ*, p. 325; Milman, *History of the Jews*, i, 495; Stanley, *History of the Jewish Church*, iii, 276 sq.; Herzog, *Real-Encyclop.* xiv, 383; Bäck, *Gesch. d. jüd. Volkes*, p. 37 sq.

7. SIMON BEN-LAKISH, was born at Bostra A.D. cir. 200, and died cir. 275. He was a man remarkable for his bodily stature and a corresponding magnitude of intellect. For some time he served as a legionary in the Roman army, and after his restoration to a life of study became, by marriage, the brother-in-law of R. Jochanan Bar-Napacha (q. v.). Ben-Lakish, or more commonly Resh-Lakish, is the same who held that the book of Job was only an allegory, **אֵיבֹב לֹא הָיָה וְלֹא נִכְרָא אֵלָּא**, **מִשַּׁל הָיָה**, i. e. "Job never lived and never existed, but is a parable." See Grätz, *Gesch. d. Juden*, iv, 260 sq.

8. SIMON BEN-SHETACH was the brother of Alexandra (q. v.), queen of Alexander Jannæus (q. v.). When the Jews revolted against Jannæus and six thousand were killed, Simon ben-Shetach was saved by escaping to Egypt; but soon returned to Jerusalem, having been recalled through the influence of his sister. By way of supplement to what has already been stated on Simon ben-Shetach in the art. *Scribes* (q. v.), we will add the following. He was a man of inflexible rigor, a high-minded ecclesiastic, sensitive withal, thought it no sin to refuse forgiveness to an adversary, and was ever on the alert to magnify his office before his flight to Alexandria. In the Talmud (*Sanhedrin*, tr. **בְּרֵךְ הַמֶּלֶךְ**) we read the following: "One of the king's servants had committed a murder and then absconded. The king, as master of the fugitive, was summoned to answer for his servant, and, as master, did honor to the law by coming. As king, he remembered his dignity and sat down in court, Ben-Shetach being judge.

'Stand up, king Jannai!' shouted this haughty judge, 'stand up upon thy feet while they bear witness concerning thee; for thou dost not stand before us, but before Him who spake and the world was.' . . . The royal displeasure was so signally manifested in consequence that a law was enacted to this effect: 'The king neither judges nor is judged'" (Mishna, ii, 1). See Grätz, *Gesch. d. Juden*, iii, 107, 109, 111, 126, 133; Rule, *History of the Karaite Jews*, p. 22 sq.; Derenbourg, *Histoire et Géographie de la Palestine*, p. 96 sq.; Pick, *The Scribes Before and in the Time of Christ*, in *Lutheran Quarterly*, 1878, p. 260 sq.; Schürer, *Lehrbuch der neuesten Zeitgeschichte*, p. 122 sq., 128 sq., 411, 452, 454. (B. P.)

Simon, Count de. See SAINT-SIMON.

Simon of SUDBURY was archbishop of Canterbury in 1375, lord chancellor in 1379, and was murdered by Wat Tyler's followers June 13, 1381.

Simon of TOURNAY was a dialectician who taught in the University of Paris at the beginning of the 13th century, and who was among the first to apply the Aristotelian philosophy to theology. He is charged by Matthew Paris with having on one occasion interrupted his lecture, in which he had refuted certain arguments raised by himself against the doctrine of the Trinity, with the exclamation "O Jesus, Jesus, how much have I done to establish and honor thy teachings! If I were to become their opponent, I could certainly attack them with yet stronger objections!" Upon this he lost both speech and memory; and though he subsequently recovered his mind to some little degree, he was unable to impress on his memory more than the Lord's Prayer and the Creed. Thomas Cantipratensis ascribes to him the crime usually attributed to the emperor Frederick II, of having said that "there are three who have deceived and oppressed the world through their sects—Moses, Christ, and Mohammed." Both writers assert, but do not adequately prove, the immorality of Simon's life. Henry of Ghent, who became a doctor of the Sorbonne in about 1280, and who held a canonry at Tournay, merely says that Simon had followed Aristotle too far, and that he was for that reason regarded by some as a heretic. None of Simon's writings have appeared in print. The list of them is given by the authors of the *Hist. Littéraire de la France*, xvi, 393, and they state that nothing is contained in them which conflicts with the belief of the Church.

Simon (St.) and Jude's (St.) Day, a holy day appointed by the Church for the commemoration of these two saints, associated probably because of their relationship (Matt. xiii, 55), Oct. 28. When this festival was instituted history does not inform us; but it is usually referred to the 12th or 13th century. See Riddle, *Christ. Antiq.*; Hook, *Ch. Dict.*

Simon, Honoré Richard, a French scholar, but no connection of the following, was born at Castellane in the latter part of the 17th century. After having been curate of St. Uze, a small parish in the neighborhood of St. Vallier, he went for his health to Lyons, where he compiled his *Grand Dictionnaire de la Bible* (1693, fol.), a work the reputation of which is attested by several later editions (ibid. 1713, 1717, 2 vols. fol.), and which maintained its place till supplanted by that of Calmet, who made great use of it in his own *Dictionary*. Simon died at Lyons in 1693.

Simon, Richard, a French Hebrew scholar, was born at Dieppe May 13, 1638. He entered the Congregation of the Oratory in 1662, and soon distinguished himself in Oriental studies. He taught philosophy first at Juilly and then at Paris, where he employed himself in forming a catalogue of the numerous and valuable Oriental MSS. in the library of the Oratory, and thence making collections which assisted him greatly in his subsequent labors. From the beginning of his career he was distinguished by a boldness of thought and action which is rarely found in members of his communion;

and the first work of magnitude which he attempted was prompted by the offer of 12,000 livres by the Protestants of Charenton for a new translation of the Bible in place of that of Geneva, which was objected to as antiquated and obscure. But his plan of a version which should be equally acceptable to Protestants and Roman Catholics had no result except to bring upon him the rebukes of his Roman Catholic brethren. His celebrity is chiefly owing to his *Critical History of the Old Test.*, first published in 1678. In the course of this work he denies that Moses was the author of the Pentateuch, and attributes its compilation to scribes of the time of Esdras, acting under the direction of the Great Synagogue. So daring a criticism could not fail to excite the alarm of his censor Pirot, and the book was by him submitted to Bossuet, who obtained an order from the chancellor to forbid its publication until more rigorously examined. The result of the examination was a decree of council suppressing the work, and ordering all copies of it to be destroyed. One of these escaped, and was the basis of a defective edition published by the Elzevirs in Holland. A Latin translation by Aubert de Verse is still more defective. But a very correct edition, with preface, apology, marginal notes, and controversial tracts, was published at Rotterdam in 1685 by Rainer Leers. An English translation was published in London in 1682. In consequence of his views, Simon was compelled in 1678 to quit the Oratory, and retired to the village of Belleville in Normandy, of which he had been appointed curate in 1676. In 1682 he resigned this charge and went to Paris, where he occupied himself entirely in literary labor. He finally returned to Dieppe, where he died of fever April 11, 1712. He bequeathed his MSS. to the cathedral of Rouen. Besides the above work, Simon published a large number of others, chiefly on Biblical subjects, which are enumerated in Hofer, *Nouv. Biog. Générale*, s. v.

Simonetta, Giacomo, an Italian cardinal, was born at Milan about 1475, and after education at Padua and Pavia was made priest and went to Rome, where Julius I appointed him advocate consistorial in 1505, and later auditor of the *Rota*. Clement VII gave him the bishopric of Pesaro in 1529, and Paul III created him cardinal in 1535, giving him also the bishopric of Perugia as well as the administration of the dioceses of Lodi, Sutri, Nepi, and Conza. Simonetta died at Rome Nov. 1, 1539, having published only two treatises: *De Reservationibus Beneficiorum* (Cologne, 1533; Rome, 1588), and *De Vita et Miraculis Francisci de Paula* (ibid. 1625).

His younger brother, **GIACOMO FILIPPO**, likewise born at Milan, also became an ecclesiastic, and was provided with rich benefices. He wrote *Epigrammata* (Milan, s. d.) and other poems.

Simonetta, Ludovico, an Italian cardinal, was born at Milan early in the 16th century. After having received the diploma of doctor in *utroque jure* (1535), he entered holy orders, and succeeded his uncle Giacomo as bishop of Pesaro in 1536. In 1560 he was called to the episcopal see of Lodi, and was made cardinal in 1561, and in 1564 one of the legates at the Council of Trent. He died at Rome, April 30, 1568. There is preserved in the Ambrosian Library at Milan part of his *Correspondence* with Charles Borromeo, whose friend he was.

Simonians, a heretical sect which arose in the 2d century, and owed its origin to the antichristian influence and teaching of SIMON MAGUS (q. v.). The recent discovery of *The Refutation of All Heresies*, a work written by Hippolytus early in the 3d century, gives a summary of a work by Simon Magus, called *The Great Announcement, a Revelation of the Voice and Name Recognisable by means of Intellectual Apprehension of the Great Indefinite Power*, in which his system was set forth. That system is one of thorough and unflinching pantheism. He introduced into his very definition of the Divine Nature that its substance is exhibited in material

things. He ascribes the formation of the world to certain portions of the divine fulness (æons). The originating principle of the universe is fire, of which is begotten the Logos, in which exists the indefinite power, the power of the godhead, the image of which power is the spirit of God. These æons, called roots, are in pairs—mind and intelligence, voice and name, ratiocination and reflection. In them resides, coexistently, the entire indefinite power, potentially with regard to these "secret" portions of the divine substance, actually when the images of these portions are formed by material embodiment. For mind and intelligence becoming "manifest" are heaven and earth; voice and name are sun and moon; ratiocination and reflection are air and water. The indefinite power becomes then the seventh actual power, the spirit of God wafted over the water, which reduces all things to order. The Logos employs the divine roots or æons, which are both male and female. To the first pair of æons is assigned the first three days' work of the creation; to the second pair is referred the fourth day's; to the third pair the fifth and sixth days'. Every man may become an embodiment of the Logos; an "image," that is, of the Logos, a conversion of the "secret" portion of the divine power into the "manifest." In this system the persons of the Trinity are confused, and Simon professed himself to be the Power of God, with the right of assuming the name of any of the three: Simon taught that Jesus was a man, and suffered only in appearance. Such, in brief, is the system of Simon, a heresy not properly classed with those that bear the name of Christ (Epiph. *Har.* xxi, 1). The Simonians pretended to be Christians that they might insinuate themselves into the Church; and many convicted of this heresy were excommunicated (Eusebius, *Hist. Eccl.* ii, 1, 13). The pretensions of Simon were supported by magic, and magic in several forms was practiced by the sect. Many see nothing unreasonable or unscriptural in supposing that supernatural agencies, the power of evil spirits, may have been permitted to enter into those delusions. Irenæus accuses the sect of lewdness, and his statement is confirmed by the *Great Announcement* itself, which speaks of promiscuous intercourse of the sexes as "sanctifying one another" (Hippolytus, *Refut. Har.* vi, 14). Of the number of this sect Justin Martyr writes that almost all the Samaritans, and a few even of other nations, worshipped Simon. Simon had been much honored at Rome, but his influence fell before the preaching of Peter; and Origen writes, about A.D. 240, that not thirty of Simon's followers could be found in the whole world (*Contr. Cels.* i, 57). By almost universal consent Simon is regarded as the first propagator in the Church, but acting from without, of principles which developed into Gnosticism. Indeed, there are many points in common: i. e. both reject the notion of absolute creation; both hold the unreality of the Lord's body. See Bunsen, *Hippolytus*, i, 47, 48; Burton, *Bampton Lectures*; Blunt, *Dictionary of Sects*, s. v.

Simonians (Saint-). See SAINT-SIMON.

Simonis, JOHANN, conrector of the gymnasium and professor of Church history and antiquities in the University of Halle, was born Feb. 10, 1698, at Drusen, near Schmalkalden, and died Jan. 2, 1768. He wrote, *Onomasticon Vet. Test. sive Tractatus Philologicus, in quo Nomina Vet. Test. Propria*, etc. (Halle, 1741):—*Introductio Grammatico-critica in Linguam Græcam*, etc. (ibid. 1752):—*Introductio Grammatico-critica in Linguam Hebraicam*, etc. (ibid. 1753):—*Arceanum Formularum Nominum Hebraicæ Lingue*, etc. (ibid. 1735):—*Lexicon Manuale Hebr. et Chald.* (ibid. 1752; Amst. 1757 and often; last ed. by Winer, Leipsic, 1828; Engl. transl. by Ch. Seagar, *The Smaller Heb. and Chald. Lexicon Translated and Improved*, Lond. 1832):—*Onomasticon Novi Test. et Librorum Vet. Test. Apocryphorum, sive Tractatus Philol., quo Nomina Propria Novi Test. et Librorum Apocryphorum Vet. Test. ex Ipsorum Orig-*

nibus et Formis Explicantur. Besides these and many other works, mentioned by Fürst and Winer, he edited the *Biblia Hebraica Manualia ad Optimas quasque Editiones Recensita*, etc. (Halle, 1752; 2d ed. 1767; 3d ed. 1822; 4th ed. 1828 [the latter two eds. by Rosenmüller]). Simonis's object in editing his edition of the Hebrew Bible was to publish a correct, but at the same time a cheap, edition of Van der Hooght's text. But, in spite of all care, some inaccuracies have crept into the text. See Fürst, *Bibl. Jud.* iii, 337 sq.; Winer, *Handbuch der theol. Lit.* i, 89, 115, 119, 121, 122, 127, 137, 535, 607; Rosenmüller, *Handbuch für die Literatur der bibl. Kritik und Exegese*, i, 238 sq.; Steinschneider, *Bibliog. Handbuch*, p. 132 sq. (B. P.)

Simonton, ASHBEL GREEN, a missionary of the Presbyterian Church, was born at West Hanover, Dauphin Co., Pa., Jan. 20, 1833. He pursued his preparatory studies in the academy at Harrisburg, Pa., graduated at the College of New Jersey in 1852, studied law in 1854, and was admitted to the privileges of the Church in May, 1855. He entered the Theological Seminary at Princeton in September of the same year, and at an early stage of his course was led to consider his duty in relation to the foreign missionary work. He was licensed by Carlisle Presbytery, April 14, 1858, and his formal application to the board for appointment as a foreign missionary was sent to New York Oct. 25, 1858. The executive committee decided to send him to Brazil, as the pioneer of a numerous company of laborers. The time fixed upon for his departure was May, 1859. Meanwhile he spent two months in New York, taking lessons in the Portuguese language, and lecturing, as opportunity was afforded, upon Brazil. He was ordained by the Presbytery of Carlisle, April 14, 1859. His sermon on this occasion was upon the words, "Come over into Macedonia and help us," and it was an able presentation of the claims of the unevangelized upon the Church, and was afterwards published in Dr. Van Rensselaer's *Presbyterian Magazine*. He arrived at Rio Janeiro Aug. 12, 1859, and, after two years of study and explorations of the field, began a Bible-class, May 19, 1861, at which two were present; but the audiences soon increased to such dimensions that larger accommodations were demanded. In 1863 it was deemed best to enlarge the operations of the mission by taking in the province of São Paulo. In November, 1864, appeared the first number of the *Imprensa Evangelica*, a semi-monthly paper established for the diffusion of religious intelligence among the more cultivated class of minds. The greater part of the labor of writing for its columns and superintending its publication devolved upon him until September, 1866, when he had an assistant. The unanimous impression of those who read his leading editorials in the *Imprensa* was that they were characterized by great ability, clearness, and comprehension of the subjects treated. The paper continued to increase in circulation, and during the three years of his connection with it much good was effected through its instrumentality. In March, 1865, Mr. Simonton made a missionary tour into the province of São Paulo, and while there the Presbytery of Rio Janeiro was organized. He died Dec. 9, 1867. Mr. Simonton possessed a clear, penetrating intellect, well disciplined by diligent study. He excelled as a preacher, and had few superiors as a sermonizer. He greatly loved the missionary work, for which he was eminently fitted by nature, culture, and grace, and labored from first to last with unabated zeal and energy. See Wilson, *Presb. Hist. Almanac*, 1868, p. 135. (J. L. S.)

Simony, the crime, in ecclesiastical law, of buying or selling holy orders and offices. The term is derived from the sin of Simon Magus (q. v.), who wished to purchase from the apostles for money the power to confer the Holy Ghost (Acts viii, 19). The ancient Christian Church distinguished simony into three different kinds: 1. Buying and selling spiritual gifts; 2. Buying and selling spiritual preferments; 3. Am-

bitious usurpation and sacrilegious intrusion into ecclesiastical functions without legal election or ordination. Of course the first sort was that which most properly had the name of simony, resembling most closely the sin of Simon Magus. This crime was thought to be committed when money was offered or received for ordinations, and it was always punished with the severest censures of the Church. The apostolical canons (*Can. Apost.* 29) seem to lay a double punishment, both deposition and excommunication, upon such of the clergy as were found guilty of this crime. Among the councils which have condemned simony are Chalcedon; second of Orleans; second of Constantinople; second of Braga; fourth, eighth, and eleventh of Toledo; second of Nice; Rheims; Placentia; and Trullo—the term of the canons being according to the various circumstances and forms of the crime prevalent. The ancients also include in this sort of crime the exacting of any reward for administering baptism, the eucharist, confirmation, burying the dead, consecration of churches, or any like spiritual offices. The second sort of simony (traffic in spiritual preferments) was denounced by both ecclesiastical and secular laws (*Concil. Chalced. can. 2; Justinian, Novell. 123, c. 1*), the former ordering the deposition of the bishop that "sets grace to sale, and ordains a bishop, etc., for filthy lucre;" the latter ordering every elector to make oath "that he did not choose the party elected either for any gift or promise," etc. The third sort of simony was when men by ambitious arts and undue practices, as by the favor and power of some wealthy or influential person, got themselves invested in any office or preferment to which they had no regular call or legal title; or when they intruded themselves into other men's places, already legally filled. Thus Novatian got himself secretly and simoniacally ordained to the bishopric of Rome, to which Cornelius had been legally ordained before him (*Cyprian, Ep. 52, al. 55, ad Antonian.*). Such ordinations were usually vacated and declared null, and both the ordained and their ordainers prosecuted as criminals by degradation and reduction to the state and communion of laymen. There were also general imperial laws made by Gratian and Honorius (*Cod. Theod. lib. xvi, tit. 2, "De Episc. Leg. 35 Honorii"*), obliging all bishops who were censured and deposed by any synod to submit to the sentence of the synod, under the penalty of being banished a hundred miles from the city where they attempted such disturbance. See Bingham, *Christian Antig.* bk. xvi, ch. vi, § 28-30.

This crime became quite common in the Church during the 11th and 12th centuries. Benedict IX, when a boy of twelve years (A.D. 1033), was elected pope "intercedente thesaurorum pecunia." Guido, archbishop of Milan (A.D. 1059), lamenting the prevalence of simony in his Church, promised for himself and successors utterly to renounce it. Hildebrand, afterwards Gregory VII, was a vigorous opponent of the practice. At a council at Lyons the archbishop and forty-five bishops confessed themselves simoniacal and were deposed. The fortieth of the canons of 1603 (Church of England) is directed against simony, as being "execrable before God," and provides an oath to be taken personally by every one admitted to a benefice that no simoniacal payment, contract, or promise has been or shall be made. While in Great Britain the cognizance of simony and punishment of simoniacal offences appear originally to have belonged to the ecclesiastical courts alone, the courts of common law would have held simoniacal contracts void, as being *contra bonos mores* and against sound policy. According to English law (statutes of Eliz. and 12 Anne, c. 12; 7 and 8 George IV, c. 25; 9 George IV, c. 94; also 1 William and Mary, c. 16), it is not simony for a layman or spiritual person, not purchasing for himself, to purchase while the church is full either an advowson or next presentation, however immediate may be the prospect of a vacancy, unless that vacancy is to be occasioned by some agreement or arrangement between the parties. Nor is it simony for a

spiritual person to purchase for himself an advowson, although under similar circumstances. It is, however, **simony** for any person to purchase the next presentation while the church is vacant; and it is **simony** for a spiritual person to purchase for himself the next presentation, although the church be full. See Milman, *Latin Christianity*, iii, 237, 244, 370 sq.; vii, 270; Willis, *Hist. of Simony* (Lond. 1865, 2d ed.); and the monographs cited by Volbeding, *Index Programmatum*, p. 75.

Simoom. See WIND.

Simpkins, SOLOMON G., a minister of the Methodist Episcopal Church, South, was born in Maryland in 1811; moved to Vicksburg, Miss., in 1837; was licensed to preach in 1840, and became a member of the Mississippi Conference. In 1849 he was appointed to Bayou Pierre Circuit, but died before he could reach it. See *Minutes of Annual Conferences of M. E. Church, South*, 1849, p. 243.

Simple Feasts were, according to the Salisbury use, those on which only the initial words of the antiphon to the *Benedictus* and *Magnificat* were sung. They were comprised under three classes, the first, of nine lessons, with triple or double invitatory; the second, of three lessons, with double invitatory; the third, of three lessons, with simple invitatory; the latter, in distinction from the former two, were marked "sine regimine chori." Simple feasts, like ferials and vespers, had no first vespers.

In the Roman use simple feasts, without ruling the choir, are classed as simples; the simple, with ruling the choir, as semi-doubles. Accordingly, the highest class of Salisbury simples became the Roman doubles, to which succeed greater doubles, doubles of the second, and doubles of the first class.

Simplioes (*simple*), a term of reproach frequently bestowed upon the early Christians.

Simplicianus, archbishop of Milan (398-400), was a friend and teacher of Ambrose, who wrote to him four epistles (comp. Migne, xvi, 874). Augustine dedicated to Simplicianus his *De Diversis Questionibus*, and mentions him very often. Virgilius of Trent addressed to him his *De Martyrio S. Sisinnii et Socinorum* (Migne, vol. xiii), and Ennodius of Pavia wrote an epigram in his honor. See Gennadius, *De Viris Illust.* p. 27. (B. P.)

Simplicius, pope from A.D. 468 to 483, in the period of the Monophysite (q. v.) disputes by which the Western Church was violently agitated. He participated in the controversy, taking sides with Acacius, the patriarch of Constantinople, and anathematized Timotheus Ælurus, Petrus Fullo, Petrus Mongus, John of Apamea, and Paul of Ephesus; but he afforded aid and protection to John Talaja, whom Acacius refused to acknowledge as successor to the see of Alexandria. Simplicius also added to the estimation in which the papacy was held by appointing the bishop Zeno of Seville to be apostolical vicar, and by depriving the bishop of Arles in France of his right to convoke synodal meetings. It is stated that this pope died March 2, 483, and his memory is honored in the Romish Church annually on the recurrence of that date. See Herzog, *Real-Encyklop.* s. v.

Simplicius, a philosopher of the 6th century, was a native of Cilicia, a disciple of Ammonius the Peripatetic, and endeavored to unite the Platonic and Stoic doctrines with the Peripatetic. Distrusting his situation under the emperor Justinian, he went to Chosroes, king of Persia, but returned to Athens after it had been stipulated in a truce between the Persians and the Romans, A.D. 549, that he and his friends should live quietly and securely upon what was their own, and not be compelled by the Christians to depart from the religion of their ancestors. Simplicius wrote commentaries on Aristotle's *Categorizæ*, *Physica*, *De Cælo*, and *De Anima*, which are the most valuable of all the extant Greek commentaries on Aristotle. They are

printed in some of the early editions of Aristotle, and are also contained in *Scholiaz in Aristotelem*, collegit Ch. A. Brandis (Berl. 1836). Simplicius also wrote a *Commentary on the Enchiridion of Epictetus*, which for its pure and noble principles of morality has commanded general admiration. The best separate edition of this commentary is that by Schweighäuser, with a Latin translation, in two volumes (Leips. 1800); it has been translated into English by Dr. G. Stanhope (Lond. 1704, 8vo); into French by Dacier (Paris, 1715); and into German by Schulthess (Zurich, 1778).

Simpson, Benjamin Franklin, a minister of the Methodist Episcopal Church, was born at York, Me., Dec. 30, 1835, and was educated at Wilbraham, Mass. In 1858 he went to Rahway, N. J., to take charge of an academy; then to the Biblical Institute at Concord, in 1860. He joined the Newark Conference in 1862; was drafted into the army July 13, 1864, and in October was appointed chaplain. In September, 1865, he returned from the war and resumed his ministerial work, which he was obliged to give up early in 1869. He died at Hanover, N. J., July 12, 1871. See *Minutes of Annual Conferences*, 1872, p. 34.

Simpson, David, an English clergyman, was born at Ingleby, Yorkshire, Oct. 12, 1745. He was educated at St. John's College, Cambridge, and was successively curate of Ramsden, Essex, of Buckingham, and of the Old Church, Macclesfield. In all three places his alleged Methodism gave offence, and, while at the last place, he was silenced by the bishop of Chester. But his friends erected a new edifice (Christ Church, Macclesfield) for him, in which he officiated until his death, in 1799. He published, *Sacred Literature* (Birm. 1788-90, 4 vols. 8vo):—*Discourse on Stage Entertainments* (1788):—*Key to the Prophecies* (Maccles. 1795, 8vo; 3d ed. 1812, 8vo):—*A Plea for Religion*, etc. (Lond. 1802, 8vo, with numerous later editions):—*Plea for the Deity of Jesus and the Doctrine of the Trinity* (1812, 8vo):—*Sermons* (8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Simpson, Edward, S.T.D., a learned English divine, was born at Tottenham, in May, 1578. Having been prepared at the Westminster School, he entered Trinity College, Cambridge, from which he graduated in 1600, and the next year was admitted fellow. In 1603 he received his degree of A.M., and his A.B. in 1610. He was chaplain to Sir Moyle Finch, 1615-18, and rector of Eastling in 1618, in which year he took his degree of doctor of divinity and was made prebendary of Coringham. He died in 1651. He published, *Mosaica*, etc. (Cantab. 1636, 4to):—*Positive Divinity:—Knowledge of Christ:—God's Providence in Regard to Evil:—Regeneration Defended:—Declaration:—De Justificatione:—Notæ Selectiores in Horatium*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

Simpson, George W., a Presbyterian minister, was born near Churchtown, Lancaster Co., Pa., June 1, 1821. He early embraced religion, and, feeling it to be his duty to preach, he pursued his studies at Easton College, Pa., and Princeton Theological Seminary. He chose Africa as his field of labor, and sailed for the Gambia in Sept., 1849, where he was cordially received by Rev. J. L. Wilson and other missionaries. Corisco was chosen as a missionary station, and Mr. Simpson and his wife immediately occupied it. They embarked March 25, 1850, in an English vessel for Fernando Po, but on the evening of April 5 the ship was capsized by a tornado, and all on board except one of the crew were lost.

Simpson, Robert, D.D., a Scottish divine and instructor, was born at Little Tillerye, near Milnathort, in Kinross-shire, Feb. 15, 1746. Having completed his academic studies, he preached in Yorkshire and Lancashire, and was for several years pastor of a Church at Bolton-le-Moors, near Manchester. He went to London in 1786, where his preaching attracted considerable at-

tion. He was chosen president of the Dissenting school afterwards known as the Hoxton Academy, and applied himself wholly to this work. His health failing in May, 1817, he tendered his resignation, although he continued to lecture his classes as often as illness would permit. He died Dec. 21, 1817.

Simpson, or Sympson, Sydrach, B.D., a Puritan divine, was educated at the University of Cambridge, and became curate and lecturer of St. Margaret's, Fifth Street, London. He was summoned before archbishop Laud for nonconformity in 1635, and retired to Holland. Returning to England at the commencement of the civil wars, he was chosen one of the Assembly of Divines in 1643. He joined the Independents against the Presbyterians, was appointed by Cromwell's visitors master of Pembroke College, Cambridge, in 1650, and died in 1655. He published a few sermons and theological treatises, for which see Darling, *Cyclop. Bibliog.* s. v.; Watts, *Biblioth. Brit.* s. v.

Simpson, William, a minister of the Methodist Episcopal Church, was born in Huntingdon County, Pa., Jan. 22, 1812. He professed conversion and united with the Church in June, 1832, and received license to preach June 3, 1837, at Bloomington, Ill. He entered the Illinois Conference in Sept., 1837, and was ordained deacon in Sept., 1839, and elder in August, 1841. His ministry closed with his life, Feb. 22, 1864. See *Minutes of Annual Conferences*, 1864, p. 178.

Sim'ri (1 Chron. xxvi, 10). See SHIMRI.

Sims, EDWARD DRUMGOOLE, a minister of the Methodist Episcopal Church, South, was born in Brunswick County, Va., March 24, 1805. He graduated at the University of North Carolina in 1823; was tutor in that institution, and afterwards principal of an academy at La Grange, Ala.; and on the establishment of the college at that place was elected professor of mathematics and natural philosophy. He then travelled two years in connection with the Tennessee Conference; afterwards was professor of languages in Randolph Macon College, Va. In 1836 he visited Europe and spent two years at the University of Halle, in Germany; in 1837 he travelled through France and Germany, Italy, Holland, Belgium, and England; in 1838 he returned to the United States, and filled the chair of English literature in Randolph Macon College; and in December, 1841, was elected by a unanimous vote of the trustees of the University of Alabama to the same department. He died April 12, 1845. Prof. Sims was a man of various, extensive, and accurate learning, especially in the department of language in general. Besides the ordinary classics, he wrote and spoke French and German. He was master of the philosophy of language, and almost the entire circle of the sciences; and had collected materials for an Anglo-Saxon grammar, and also for an English grammar, which he designed publishing. As a minister, the qualities of his mind and piety infused themselves into his preaching and distinguished it. Eminent as he was in learning and the social virtues, his Christian character was his highest ornament. His religion was deeply experimental. See *Minutes of Ann. Conferences of M. E. Church, South*, 1845-53, p. 48; Sprague, *Annals of the Amer. Pulpit*, vii, 766. (J. L. S.)

Simsterla, a goddess of the Slavic mythology, chiefly worshipped by the Russians, but not unknown among the Poles. She was the awakener of spring, and the wife of Pogoda (the weather). She possessed wondrous beauty and grace.

Simultaneum (scil. *Religionis Exercitium*) is a term which in Europe designates, in its general bearing, the religious services common to churches or denominations having diverse creeds, and which has particular reference to the employment in common of certain religious arrangements and institutions.

The denial of a churchly character by Romanism to

any but the Papal Church renders a *simultaneum* impossible on that assumption; but the Peace of Westphalia in 1648 insured to the Evangelicals both that character and the resultant rights of worship. The progress of the new Church, however, was irregular, in some places being much more vigorous and rapid than in others, so that the relations existing between Romanists and Protestants were very diverse; and it was thought necessary to provide legal prescriptions for the exercise of a common worship. These prescriptions erected a barrier against religious persecution on the part of a sovereign prince, but they also suggested the denial of religious privileges to certain parties, since the status of the year 1624 was made the condition for granting or refusing the free exercise of religion—they who had then enjoyed it being held to be entitled to a continuance of the privilege, while others were generally, though not always, judged to have no claim to its enjoyment. These regulations were intended to settle the case as between Romanists and Protestants. A different arrangement regulated the affairs of the Lutheran and the Reformed parties, so that the condition of the churches at the conclusion of the Peace of Westphalia was made the basis of their future relations.

The admissibility of a *simultaneum* was much debated in Germany, until the recess of the diet resolved, Feb. 25, 1803, § 63, that "the exercise of religion as hitherto practiced in any country shall be protected against all interference and interruption; especially shall the possession and undisturbed enjoyment of its separate ecclesiastical property, including the school-fund, be insured to each religion according to the directions of the Peace of Westphalia. The sovereign may, however, tolerate the adherents of other religions and allow them the exercise of all civil rights."

The *simultaneum* does not affect the dogmatic relations of the several churches. The Church of Rome still regards Protestants as heretics and schismatics, and refuses to recognise the validity of their services; and the different sections of Protestantism have frequently maintained towards each other an attitude no less hostile. Circumstances, however, have done much to bring about a state of things in which the spirit of a *simultaneum* is measurably realized. Legislation has done much in this regard, and the felt need of fraternal relations has not been least among the influences at work.

When the *simultaneum* has been fixed by special treaties, it must be judged in accordance with their terms, otherwise general principles must determine. The State does not assume the right to ordain the observance of the usages belonging to one religious community by another and different community on general grounds; but it may extend the benefits of institutions enjoyed by any community to others as well, e. g. when civil functions have been intrusted to the clergy of a particular Church, or when but a single burial-ground is available for any community.

It is reported (*Prot. Kirchen-Zeitung*, 1854, No. 5, p. 102) that a very peculiar *simultaneum* existed at Guldensstadt, in Osnaburg, during two hundred years prior to 1850. A Roman Catholic and an Evangelical congregation had a common house of worship, and employed in common a Romish priest and a Protestant clerk. The priest and Romanists began the service with the *Introit*, after which the Evangelicals chanted the *Kyrie Eleison*. Alternate chantings and readings followed, until the offering of the mass, in which the Evangelicals took no part. A sermon was preached to both parties in common, and was usually followed by the singing of an appropriate evangelical hymn. One instance is mentioned in which a sermon assailing the Lutheran Confession of Faith was followed by the singing of Luther's hymn, "Eine feste Burg," etc.

In America what are called "Union Services" are frequently held in a church used in common by several denominations. In such cases the services are some-

times of a mixed character; at other times the different denominational services are held alternately.

On the general subject, see *Instrum. Pacis Osnabrug.*; *Pütter, Geist des westph. Friedens* (Gött. 1795); *Enders, Diss. de Pactorum Hildens. in Confirm. Comm. Cathol. Doctr. circa Simultaneum Efficacia* (1765, 1771); and in *Schmidt, Thesaur. Juris Eccl. tom. v.*, Nos. 7, 8, p. 257 sq., 326 sq.; *Dürr, Diss. de eo, quod Justum est circa Jus Reform. in Territor. Oppimperger*, etc. (Mogunt, 1760, and in *Schmidt, loc. cit.*); *Schöttl, Gegenseit. Gemeinsch. in Cultushandl. zw. Katholiken u. Aukthol. etc.* (Regensb. 1853). Comp. also the Austrian law of Jan. 30, 1849; *Circular d. Consist. zu Detmold*, July 27, 1857; *Von Moser, in Allg. Kirchenbl. f. d. evangel. Deutschl.* 1857, p. 372, etc.

Sin (Heb. *Sin*, סִין; Sept. Σάϊς [v. r. Τάϊς] or Σῦνη; Vulg. *Pelusium*), the name of a town and of a desert perhaps adjoining, upon which modern researches have thrown important light.

1. A city of Egypt, which is mentioned in Ezek. xxx, 15, 16, in connection with Thebes and Memphis, and is described as "the strength of Egypt," showing that it was a fortified place. The name is Hebrew, or, at least, Shemitic. Gesenius supposes it to signify "clay," from the unused root סִין, probably "he or it was muddy, clayey." It is identified in the Vulg. with *Pelusium*, Πηλούσιον, "the clayey or muddy" town, from πηλός; and seems to be preserved in the Arabic *Et-Tneh*, which forms part of the names of *Fum et-Tneh*, the Mouth of *Et-Tneh*, the supposed *Pelusiatic* mouth of the Nile, and *Burg* or *Kal'at et-Tneh*, the Tower or Castle of *Et-Tneh*, in the immediate neighborhood, "tñ" signifying "mud," etc., in Arabic. This evidence is sufficient to show that *Sin* is *Pelusium*. The ancient Egyptian name is still to be sought for; it has been supposed that *Pelusium* preserves traces of it, but this is very improbable. Champollion identifies *Pelusium* with the *Poresoum* or *Peresom* (the second being a variation held by Quatremère to be incorrect) and *Baresoum* of the Copts, *El-Farmâ* of the Arabs, which was in the time of the former a boundary-city, the limits of a governor's authority being stated to have extended from Alexandria to *Pilak-h*, or *Phila*, and *Peremom* (*Acts of St. Sarapamon MS. Copt. Vat. 67, fol. 90, ap. Quatremère, Mémoires Géog. et Hist. sur l'Égypte*, i, 259). Champollion ingeniously derives this name from the article *ph* prefixed to *ep*, "to be," and *oum*, "mud" (*L'Égypte*, ii, 82-87; comp. *Brugsch, Geogr. Inschr.* i, 297). *Brugsch* compares the ancient Egyptian *Ha-rem*, which he reads *Pe-remâ*, on our system *Pe-rem*, "the abode of the tear," or "of the fish rem" (*ibid.* pl. iv, No. 1679). *Pelusium* he would make the city *Samhat* (or, as he reads it *Sâm-hud*), remarking that "the nome of the city *Sâm-hud*" is the only one which has the determinative of a city, and comparing the evidence of the Roman nome-coins, on which the place is apparently treated as a nome; but this is not certain, for there may have been a *Pelusiatic* nome, and the etymology of the name *Samhat* is unknown (*ibid.* p. 128; pl. xxviii, 17).

The exact site of *Pelusium* is not fully determined. It has been thought to be marked by mounds near *Burg et-Tneh*, now called *El-Farmâ*, and not *Et-Tneh*. This is disputed by *Capt. Spratt*, who supposes that the mound of *Abu-Khiyar* indicates where it stood. This is further inland, and apparently on the west of the old *Pelusiatic* branch, as was *Pelusium*. It is situate between *Farmâ* and *Tel-Defenneh*. Whatever may have been its exact position, *Pelusium* must have owed its strength not to any great elevation, but to its being placed in the midst of a plain of marsh-land and mud, never easy to traverse. The ancient sites in such alluvial tracts of Egypt are in general only sufficiently raised above the level of the plain to preserve them from being injured by the inundation. It lay among swamps and morasses on the most easterly estuary of

the Nile (which received from it the name of *Ostium Pelusiaticum*), and stood twenty stades from the Mediterranean (*Strabo*, xvi, 760; xvii, 801, 802; *Pliny, Hist. Nat.* v, 11). The site is now only approachable by boats during a high Nile, or by land when the summer sun has dried the mud left by the inundation; the remains consist only of mounds and a few fallen columns. The climate is very unwholesome (*Wilkinson, Mod. Egypt.* i, 406, 444; *Savary, Letters on Egypt*, i, let. 24; *Henniker, Travels*).

The antiquity of the town of *Sin* may perhaps be inferred from the mention of "the wilderness of *Sin*" in the journeys of the Israelites (*Exod.* xvi, 1; *Numb.* xxxiii, 11). It is remarkable, however, that the Israelites did not immediately enter this tract on leaving the cultivated part of Egypt, so that it is held to have been within the Sinaitic peninsula, and therefore it may take its name from some other place or country than the Egyptian *Sin*. (See No. 2.)

Pelusium is noticed (as above) by *Ezekiel*, in one of the prophecies relating to the invasion of Egypt by *Nebuchadnezzar*, as one of the cities which should then suffer calamities, with, probably, reference to their later history. The others spoken of are *Noph* (*Memphis*), *Zoan* (*Tanis*), *No* (*Thebes*), *Aven* (*Heliopolis*), *Pi-beseth* (*Bubastis*), and *Tehaphnehes* (*Daphnæ*). All these, excepting the two ancient capitals, *Thebes* and *Memphis*, lay on or near the eastern boundary; and, in the approach to *Memphis*, an invader could scarcely advance, after capturing *Pelusium* and *Daphnæ*, without taking *Tanis*, *Bubastis*, and *Heliopolis*. In the most ancient times *Tanis*, as afterwards *Pelusium*, seems to have been the key of Egypt on the east. *Bubastis* was an important position from its lofty mounds, and *Heliopolis* as securing the approach to *Memphis*. The prophet speaks of *Sin* as "the stronghold of Egypt" (xxx, 15). This place it held from that time until the period of the Romans. *Pelusium* appears to have been the perpetual battle-field between the Egyptians and their foreign enemies. As early as the time of *Rameses the Great*, in the 14th century B.C., we find *Sin* proving itself to be what the prophet termed it, "the strength of Egypt." One of the *Sallier papyri* in the British Museum contains a record of the war between the Egyptians and the *Sheta*; and the victory which *Rameses* gained in the neighborhood of *Pelusium* is detailed at length. The importance of this victory may be gathered from the fact that the *Sheta* are said to have made their attack with 4500 chariots. As *Diodorus* specifies the number of this Pharaoh's army, which he says amounted to 60,000 infantry, 24,000 cavalry, and 27,000 chariots of war, it is no wonder that he was enabled successfully to resist the attacks of the *Sheta*. *Diodorus* also mentions that *Rameses the Great* "defended the east side of Egypt against the irruptions of the Syrians and Arabians with a wall drawn from *Pelusium* through the deserts, as far as to *Heliopolis*, for the space of 1500 furlongs." He gives a singular account of an attempt on the part of his younger brother to murder this great Pharaoh, when at *Pelusium* after one of his warlike expeditions, which was happily frustrated by the adroitness of the king (*Diod. Sic.* i, 4). *Herodotus* relates (ii, 141) that *Sennacherib* advanced against *Pelusium*, and that near *Pelusium* *Cambyes* defeated *Psammenitus* (iii, 10-13). In like manner the decisive battle in which *Ochus* defeated the last native king, *Nectanebos* (*Nekht-nebf*), was fought near this city. It was near this place that *Pompey* met his death, being murdered by order of *Ptolemy*, whose protection he had claimed (*Hist. Bell. Alexand.* p. 20, 27; *Livy*, xlv, 11; *Josephus, Ant.* xiv, 8, 1; *War.* i, 8, 7; i, 9, 3). It is perhaps worthy of note that *Ezekiel* twice mentions *Pelusium* in the prophecy which contains the remarkable and signally fulfilled sentence, "There shall be no more a prince of the land of Egypt" (xxx, 13). As he saw the long train of calamities that were to fall upon the country, *Pelusium* may well have stood out as

the chief place of her successive humiliations. Two Persian conquests and two submissions to strangers—first to Alexander, and then to Augustus—may explain the especial misery foretold of this city: "Sin shall suffer great anguish" (Ezek. xxx, 16).

We find in the Bible a geographical name which has the form of a gentile noun derived from Sin, and is usually held to apply to two different nations, neither connected with the city Sin. In the list of the descendants of Noah, the Sinite, סִינִי, occurs among the sons of Canaan (Gen. x, 17; 1 Chron. i, 15). This people, from its place between the Arkite and the Arvadite, has been supposed to have settled in Syria north of Palestine, where similar names occur in classical geography, and have been alleged in confirmation. This theory would not, however, necessarily imply that the whole tribe was there settled, and the supposed traces of the name are by no means conclusive. On the other hand, it must be observed that some of the eastern towns of Lower Egypt have Hebrew as well as Egyptian names, as Heliopolis and Tanis; that those very near the border seem to have borne only Hebrew names, as Migdol; so that we have an indication of a Semitic influence in this part of Egypt, diminishing in degree according to the distance from the border. It is difficult to account for this influence by the single circumstance of the Shepherd invasion of Egypt, especially as it is shown yet more strikingly by the remarkably strong characteristics which have distinguished the inhabitants of North-eastern Egypt from their fellow-countrymen from the days of Herodotus and Achilles Tatius to our own. Nor must we pass by the statement of the former of these writers that the Palestine Syrians dwelt westward of the Arabians to the eastern boundary of Egypt (iii, 5). Therefore it does not seem a violent hypothesis that the Sinites were connected with Pelusium, though their main body may perhaps have settled much farther to the north. The distance is not greater than that between the Hittites of Southern Palestine and those of the valley of the Orontes, although the separation of the less powerful Hivites into those dwelling beneath Mount Hermon and the inhabitants of the small confederacy of which Gibeon was apparently the head is perhaps nearer to our supposed case. If the wilderness of Sin owed its name to Pelusium, this is an evidence of the very early importance of the town and its connection with Arabia, which would perhaps be strange in the case of a purely Egyptian town. The conjecture we have put forth suggests a recurrence to the old explanation of the famous mention of "the land of Sinim," אֶרֶץ סִינִי, in Isaiah (xlix, 12), supposed by some to refer to China. This would appear from the context to be a very remote region. It is mentioned after the north and the west, and would seem to be in a southern or eastern direction. Sin is certainly not remote, nor is the supposed place of the Sinites to the north of Palestine; but the expression may be proverbial. The people of Pelusium, if of Canaanitish origin, were certainly remote compared to most of the other Canaanites, and were separated by alien peoples, and it is also noticeable that they were to the south-east of Palestine. As the sea bordering Palestine came to designate the west, as in this passage, so the land of Sinim may have passed into a proverbial expression for a distant and separated country. See, however, SINIM; SINITE.

2. A "wilderness" (מִדְבַּר סִין; Sept. ἐρημος Σιν; Vulg. desertum Sin) which the Israelites reached after leaving the encampment by the Red Sea (Numb. xxxiii, 11, 12). Their next halting-place (Exod. xvi, 1; xvii, 1) was Rephidim, either Wady Feirân, or the mouth of Wady es-Sheikh [see REPHIDIM]; on which supposition it would follow that Sin must lie between those wadies and the coast of the Gulf of Suez, and of course west of Sinai. Since they were by this time gone more than a month from Egypt, the locality must be too far towards the south-east to receive its name from the Egyptian

Sin of Ezek. xxx, 15, called Σαῖς by the Sept., and identified with Pelusium. (See above.) In the wilderness of Sin the manna was first gathered, and those who adopt the supposition that this was merely the natural product of the *tarfu* bush find from the abundance of that shrub in Wady es-Sheikh, south-east of Wady Ghürundel, a proof of local identity. See ELM. As the previous encampment by the Red Sea must have been in the plain of Mukhah, the "wilderness of Sin" could not well have been other than the present plain *el-Kaa*, which commences at the mouth of Wady Taiyibeh, and extends along the whole south-western side of the peninsula. At first narrow, and interrupted by spurs from the mountains, it soon expands into an undulating, dreary waste, covered in part with a white gravelly soil, and in part with sand. Its desolate aspect appears to have produced a most depressing effect upon the Israelites. Shut in on the one hand by the sea, on the other by the wild mountains, exposed to the full blaze of a burning sun, on that bleak plain, the stock of provisions brought from Egypt now exhausted—we can scarcely wonder that they said to Moses, "Would to God we had died by the hand of the Lord in the land of Egypt, when we sat by the flesh-pots, when we did eat bread to the full; for ye have brought us forth into this wilderness, to kill this whole assembly with hunger" (Exod. xvi, 3). See EXODE.

Sin (properly חַטָּאת, *hamartia*, both originally signifying to miss) is any action, word, desire, purpose, or omission contrary to the law of God; a voluntary violation of, or failure to comply with, the divine law (Rom. iii, 20; iv, 15; vii, 7; James iv, 17). Whether such a law be revealed in the holy oracles, or in the constitution of our nature, the violation constitutes the transgressor a sinner (Rom. i, 19-32; ii, 11-15). The various words by which sin and wickedness are set forth in the Old Test. throw considerable light upon the real nature and tendency of the evil.

1. The proper and original idea of sin appears to be that it is a *coming short of our true destiny*, a "missing" the mark (חָטָא, *hamartânw*). The end of man's being is to be like unto God, to have his will in thorough harmony with the divine will, and so to glorify God and enjoy him forever. God is love; and to love him and be beloved by him is true blessedness. The whole law is summed up in love, whence sin, which is contrary to love, is a failure in the purpose of our existence.

2. This leads us to the second idea of sin, namely, that it is *the transgression of God's law*. From the Christian theistic standpoint there is no doubt as to the existence of an eternal moral order. That which, according to this rule, ought to be done is good; that which ought *not* to be done is sin. The law being neither advice nor prayer, but a positive demand, our only relation to it can be either that of submission or transgression. Whether we look upon God's law as moral, that is, stamped upon our nature, or positive, that is, revealed to us from without, in either case it should be considered binding upon our hearts, and should be implicitly obeyed, because it proceeds from the holy and loving Author of our being. Duty is represented in Scripture as a path along which we should walk, and to sin is to transgress or to go out of the way of God's commandments; hence the use of the word עָבַר, to pass over.

3. Again, every transgression is represented in the Bible as an *act of rebellion* (מַרְדָּת, *mar'at*). God is the Ruler of his people, the Father of the human race. In both these capacities he demands obedience. To sin is to rebel against his paternal rule, to revolt from his allegiance. It is to act independently of him, to set up the will of the creature against the will of the Creator, to put self in the place of God, and thus to dishonor his holy name.

4. Further, to sin against God implies *distrust of him* and a *willingness to deceive him*, and to act treacherously

towards him (חַטָּא; comp. also חַטָּא and חַטָּא). To entertain a suspicion of God's goodness is to distrust him; and when once that suspicion has been planted in the heart, alienation begins, and deceit is sure to follow.

5. Another remarkable fact about sin is that it is *perversion or distortion* (הַפְּשָׁט); it is a wrong, a wrench, a *twist* to our nature (חַטָּא), destroying the balance of our faculties, and making us prone to evil. Man is thrown out of his centre and cannot recover himself, the consequence of which is that there is a jarring of the elements of his nature. Sin is not a new faculty or a new element introduced, but it is the confusion of the existing elements—which confusion the Son of God came to take away, by restoring man to his right balance, and leading him once more to a loving and self-sacrificing trust in God.

6. Sin is also *unrest* (חַטָּא), a perpetual tossing like the waves of the sea; a constant disturbance, the flesh against the spirit, the reason against the inclination, one desire against another, the wishes of one person against the wishes of another; a love of change and excitement and stir; and withal no satisfaction. Man was never intended to find rest except in God; and practically when God is not his centre he is like a wandering star, uncertain and erratic, like a cloud without water, and like seething foam.

7. Connected with this is the idea which identifies sin with *toil* (חַטָּא). Wickedness is wearisome work; it is labor without profit; it is painful, sorrowful travail; it is grief and trouble. And after all the labor expended on sin, nothing comes of it. The works of darkness are unfruitful; sin is *vanity*, hollowness, nothingness (חַטָּא); the ungodly are like the chaff which the wind scatters away; they can show no results from all their toil.

8. Sin is also *ruin*, or a breaking in pieces (חַטָּא). Adversity, calamity, distress, misery, trouble, are represented by the same words as wickedness, mischief, harm, evil, and ill-doing.

Gathering together the foregoing observations, they bring us to this result, that sin is wilful disobedience of God's commands, proceeding from distrust, and leading to confusion and trouble. Sin lies not so much in the act as in the nature of the agent whose heart and life have been perverted. We are taught by the Scriptures that man was led into sin originally by the Evil One, who insinuated suspicions of God's goodness; and was thus misled, deceived, ruined, and dominated over by Satan.

See Burroughs, *Sinfulness of Sin*; Dwight, *Theology*; Fletcher, *Appeal to Matter of Fact*; Fuller, *Works*; Gill, *Body of Divinity*, art. "Sin;" Goodwin, *Aggravations of Sin*; Hagenbach, *Hist. of Doctrines*; Howe, *Living Temple*; King and Jenyn, *Origin of Evil*; Müller, *Christian Doctrine of Sin*; Orme, *Blasphemy against the Holy Ghost*; Owen, *Indwelling Sin*; Payson, *Sermons*; Williams, *Answer to Belsham*; Watts, *Ruin and Recovery*.

SIN, ACTUAL, is a direct violation of God's law, and is generally applied to those who are capable of committing moral evil; as opposed to idiots or children, who have not the full scope for their moral faculties. It may be a sin either of commission or omission (q. v.).

SIN OF COMMISSION is the doing a thing which we ought not to do.

SIN AGAINST THE HOLY GHOST. See UNPARDONABLE SIN.

SIN OF INFIRMITY. Sins of infirmity are those which arise from the infirmity of the flesh, ignorance, surprise, snares of the world, etc.

SIN, MORTAL or DEADLY. See MORTAL SIN.

SIN OFFERING. See SIN-OFFERING.

SIN OF OMISSION differs from that of commission in being negative, and consists in the leaving those things

undone which ought to be done. "Ye pay tithe of mint, and anise, and cummin, and have omitted the weightier matters of the law, judgment, mercy, and faith: these ought ye to have done, and not to leave the other undone" (Matt. xxiii, 23).

SIN, ORIGINAL. I. *Definition*.—"Original sin" is usually defined as "that whereby man is very far gone from original righteousness, and is of his own nature inclined to evil." This absence of "original righteousness" is not only a deprivation, but also a depravation; such an estrangement of the heart from God as to lead to a defiance of his authority and law. Original sin is not only negative, but positive; it is not merely the lack of a thing—viz., original righteousness—but the presence of an inherited tendency towards evil, which tendency is the controlling principle (Eph. ii, 1-3; Col. i, 18; 2 Tim. ii, 26; 1 John iii, 4); and the inexhaustible source of all actual sins (Rom. v, 12-19). But original sin, or this tendency of the mind to evil, is by no means to be regarded in the same sense as *guilt*; inasmuch as involuntary developments of natural susceptibilities have no moral character. A mere desire, growing out of the natural constitution of the mind, excited by temptation, may be innocent. Moral evil only commences when the desire or temptation is followed by the determination, or volition, to gratify the desire or yield to the temptation. See SIN, ACTUAL. All men, as the descendants of Adam, have this original depravity (1 Cor. xv, 21, 22), derived by continual descent from father to son. See DEPRAVITY.

II. *Theories*.—There are four principal hypotheses, to one or the other of which all the various explanations offered on this subject may probably be reduced.

1. The first theory is that the whole human race was literally in Adam as the oak is in the acorn, and thus participated in his transgression. In other words, the race is a unit, and God deals with it as a unit—not with individuals as individuals. Thus, though unconsciously, every soul participated in the first great transgression, and, in the words of the catechism, "sinned in him (Adam), and fell with him in that first transgression."

2. The second theory is that Adam was the representative of the race; that as a king, or as an ambassador, or a congress represent the nation, and the entire nation is held responsible for the act of its representative, so Adam represented the human race, was chosen as the type to stand for humanity, and by his trial the whole race was tried, thus sinning in his sin and falling in his fall. Acting thus as representative for the race, his sin was imputed, i. e. charged, to the whole race. It is said, moreover, that in point of fact this choice of Adam as a representative was not arbitrary; that Adam and Eve fairly represented the race, and that the continual sin of his descendants, placed in similar circumstances of trial, shows that no injustice was done by submitting them to a trial in the person of such a representative. These two views are held, one or the other of them, by those who are known in modern times as belonging to the old school. In them the entire race is treated by God as a unit, and is, because of Adam's sin, under divine condemnation; and, irrespective of the sin or the virtue of the individual, requires to be pardoned and redeemed.

3. The third theory holds that Adam fell, and in falling became a sinner. The universal law of nature is that like begets like. So all his descendants have inherited from him a nature like his own, a nature depraved and prone to sin. Those who maintain this theory add, usually, that man is not responsible for this depraved nature, and that he is not in any strict sense guilty before God for it; that while infants must be redeemed from it through the power of God in Christ Jesus, because nothing impure can enter heaven, still they cannot be said to be guilty until they have arrived at an age when they are capable of choosing between good and evil, and that they are then held responsible for that voluntary choice, and for that alone. In other

words, this school distinguishes between sin and depravity, holding all sin to consist in voluntary action, and depravity to be simply that disordered state of the soul which renders it prone to commit sin. This view is the one generally entertained by the new-school divines in the Presbyterian Church, by a majority of the Congregationalists, and by many of the Episcopalians and the Methodists. According to this view, mankind are overwhelmed in ruin, which Adam brought upon the race, but are not guilty except as they become so by personal conduct.

4. The fourth theory, known in theological language, from its most eminent expounder, Pelagius, as *PELAGIANISM* (q. v.), denies that there is any connection between Adam and his posterity, or that the race is in any sense held responsible for, or on account of, Adam's sin. Each soul, according to this theory, is created as was Adam, pure and innocent, and undetermined towards either sin or holiness. Each soul, for itself, chooses its own destiny by its voluntary choice of good or evil, right or wrong. The universality of sinfulness, it is said, is sufficiently explained by the evil influence and example of those by whom the young are from their earliest years surrounded. According to this theory it is possible, or at least quite conceivable, that a man should be utterly sinless; and in such a case there would be no need of any divine Saviour or any regenerating Spirit. That need is occasioned in each individual case by each individual deliberately choosing for himself the way of sin. A modification of this view, by which there is an endeavor to combine it with the others, is termed *Semi-Pelagianism* (q. v.). According to this view there is no ruin except that which each individual brings upon himself; and, consequently, no need of redemption except such as springs from the individual's own guilt in departing from God and disobeying his law.

III. *History of the Doctrine.*—The early Church, it is maintained by some, was unacquainted with the doctrine; and the most orthodox admit that the doctrine had not at that time been fully developed. We offer the opinions of some of the early fathers. *Gregory of Nazianzum* maintained that both the νόμος and the ψυχή have been considerably impaired by sin, and regarded the perversion of consciousness seen in idolatry, which previous teachers had ascribed to the influence of demons, as an inevitable effect of the first sin. But he was far from asserting the total depravity of mankind and the entire loss of the free will. *Athanasius* maintained man's ability to choose good as well as evil, and even allowed exceptions from original sin, alleging that several persons prior to Christ were free from it. *Cyril of Jerusalem* assumes that the life of man begins in a state of innocence, and that sin enters of the free will. *Chrysostom* insisted upon the liberty of man and his self-determination. *Augustine* laid down that every natural man is in the power of the devil, and upheld the justice of this as a punishment for the share which the individual had in Adam's transgression. *Pelagius*, on the other hand, who rejected the Traducian theory, denied that the fall of Adam has exercised any prejudicial influence on the moral condition of his posterity. He maintained that all men are born in innocence, possess the power of free will, and may live without sin. The views of Augustine never secured a footing in the Eastern Church, and even in the West they met with opposition. The Reformers of the 16th century made original sin a leading doctrine, and thus were enabled effectively to combat the Roman Catholic doctrine of the merit of works.

See *Cunningham, Historical Theology*, i, 333; *Hagenbach, Hist. of Doctrines*; *Van Oosterzee, Christian Dogmatics*; *Edwards, Wesley*, and *Taylor, on Original Sin*. Comp. *FALL*; *IMPUTATION*.

SIN, PHILOSOPHICAL. Philosophical sins, in opposition to theological, according to the Jesuits, are those in which a man at the time of committing them has not God and his law before his mind. He, therefore, with-

out thinking of God, transgresses natural or revealed law. These sins the Jesuits held to be venial; that is, such as do not draw after them a loss of divine grace, and do not deserve eternal, but only temporal, punishment.

SIN, PRESUMPTUOUS. Presumptuous sins are those which are done boldly, and against light and conviction. See *PRESUMPTION*.

SIN, PUNISHMENT OF. That God punishes those who disobey him is a fact generally recognised by men; it is justified by the voice of conscience, and illustrated by the dealings of every parent and judge. The Bible confirms this opinion and reveals the wrath of God against all sin, whether that sin be outward immorality or inward impurity; whether it be positive rebellion against divine law or the absence of a childlike, trusting love exercised towards our heavenly Father.

There are three principles on which punishment is inflicted by men—the remedial, the deterrent, and the retributive; and we find each of these recognised in Scripture as the principles on which God punishes nations and individuals.

1. *National punishments* are for national sins. They are inflicted where a nation as a whole takes part in sins of a grievous character. This was the case with Sodom and Gomorrah, the punishment of which was retributive, not remedial, though intended, doubtless, to deter other nations from similar wickedness. But before a city was visited with final retribution a time of repentance was allowed, and God is represented as waiting till the iniquity of a place was complete, and till it was ripe for destruction. Thus a time was given to Nineveh, and it repented; and the cities of the Canaanites were not destroyed until they had filled up the measure of their iniquity; so it was, also, in the case of the final destruction of Jerusalem. We constantly find that God recognises corporate civil existence and official acts, and that he punishes a nation for the acts of its rulers, as when the pestilence came upon Israel for the sin of David in numbering the people. In many cases the sins of the fathers were visited on the children; for, as an ungodly nation grew older, its sins grew more abundant and its rebellion more unpardonable, until at last the time came when long-suffering turned to wrath (Jer. iv, 4; vi, 11) and God poured out his fury and indignation on the people. The case of Israel is clearly set before us. When, as a nation, they forgot God, he chastised them in order to bring them to a sense of their sins; he warned them from time to time that these chastisements, which were remedial, would be followed by more severe punishments, and in due season, when all warnings were in vain, retribution came—their land was desolated and they were carried into captivity. Here their history would have ended, as the history of many other nations has ended, had not God a special purpose to fulfil through their means. They were brought back to their country, not because they were better than they had been before—though it is true that their punishment had its effect in giving them a lasting abhorrence of idolatry—but because God had made a promise to Abraham which involved the continuation of their national existence. We do not find this in the case of other nations; and thus God's dealings with the heathen mark the retributive principle of punishment, while his conduct towards the chosen people gives more frequent illustrations of remedial chastisement.

2. *The punishment of individuals* was either judicially inflicted by the hand of man for breaches of positive law, as was, doubtless, ordinarily the case in the history of Israel; or it was a special providential visitation for an act of disobedience against God's revealed will, as in the case of the man of God who prophesied against the altar in Bethel; or else it was inflicted to mark God's abhorrence of all sin, however trifling it might seem in man's sight, as in the case of the punishment of Moses.

3. On the *nature* of the far sorer punishment to be inflicted on those who reject the mercy of God in Christ Jesus, see PERDITION; PUNISHMENT, FUTURE; RETRIBUTION.

SIN, SECRET. Secret sins are those committed in secret, or those which we, through blindness or prejudice, do not see the evil of (Psa. xix, 12).

SIN, UNPARDONABLE, seems to consist in the malicious ascription of the dispensations, gifts, and influences of the Spirit to the power of Satan. The reason why this sin is never forgiven is not because of any want of sufficiency in the blood of Christ nor in the pardoning mercy of God, but because such as commit it despise and reject the only remedy, i. e. the power of the Holy Spirit, applying the redemption of the Gospel to the souls of men. See *Meth. Quar. Rev.* April, 1858. See BLASPHEMY; UNPARDONABLE SIN.

SIN, VENIAL. Venial sins are those which, according to the theology of the Church of Rome, do not bring spiritual death to the soul, or which do not turn it away from its ultimate end, or which are only slightly repugnant to the order of right reason. "It is, moreover, certain," says Dens, "not only from the divine compassion, but from the nature of the thing, that there are venial sins, or such slight ones, as in just men may consist with a state of grace and friendship with God; implying that there is a certain kind of sin of which a man may be guilty without offending God." Such doctrine as this meets with no countenance from the Word of God, which declares that "the wages of sin is death," without making any distinction among sins. See VENIAL.

Sí'na (Σινᾶ), the Greek form (Judith v, 14; Acts vii, 30, 38) of the well-known name which in the Old Test. universally, and as often as not in the Apocrypha and New Test., is given in the A. V. SINAI (q. v.).

Sí'nai (Heb. *Sinay*, סִּינַי, perhaps [if Shemitic] *thorny*, i. e. cleft with ravines; possibly [if Egyptian or Zaban] *devoted to Sin*, i. e. the moon; Sept. Σινᾶ [v. r. in Judg. v, 5, Σινᾶ, and in Neh. ix, 13, Σιναι]; in the New Test. Σινᾶ; Josephus, τὸ Σιναιὸν ὄρος, *Ant.* ii, 12, 1; Vulg. *Sinai*; A. V. "Sina" [q. v.] in a few passages), a well-known mountain in the peninsula formed by the gulfs of Suez and Akabah. The name appears to be primeval, and its meaning is unknown. It is mentioned thirty-one times in the Pentateuch and only four times in the rest of the Old Test. (Judg. v, 5; Neh. ix, 13; Psa. lxxviii, 8, 17) and four in the New Test. (Acts vii, 30, 38; Gal. iv, 24, 25). It would thus appear that the name had, in a great measure, become obsolete at an early period. We here present a summary of the Scriptural and other ancient notices, with the light of modern researches.

I. Biblical Notices and Occurrences.—The leading statements made regarding Sinai in the Pentateuch demand special notice, as they constitute the chief evidences in establishing its identity. A small section of the wilderness through which the Israelites passed took its name from the mountain (Exod. xix, 1, 2). In one direction was Rephidim, only a short day's march distant; while Kibroth-hattaavah lay a day's march in another. The "desert of Sinai," therefore, could only have been a very few miles across.

In the third month of their journey the Israelites "departed from Rephidim, came into the wilderness of Sinai . . . and camped before the mount" (Exod. xix, 1, 2). The base of the mount in front of the camp appears to have been so sharply defined that barriers were put up to prevent any of the people from approaching rashly or inadvertently to "touch the mount" (ver. 12). The "top of the mount" was in full view from the camp; so that when the Lord "came down" upon it the thick cloud in which his glory was shrouded was "in sight of all the people" (ver. 11, 16). While Moses was receiving the law on the summit of Sinai, "the

thunderings and lightnings, and the voice of the trumpet" were so near the camp that the people, in terror, "removed and stood afar off," yet still remained in sight of the mount, for "the sight of the glory of the Lord was like devouring fire on the top of the mount in the eyes of the children of Israel" (comp. xx, 18; xxiv, 17). Upon that peak the tables of the law were twice given to Moses, with all the details of the rites and ceremonies recorded in the Pentateuch (xxxi, 18; xxxiv). Sinai was thus emphatically "the mount of the Lord" (Numb. x, 33). There the Lord spake with Moses "face to face, as a man speaketh unto his friend" (Exod. xxxiii, 11); and there he revealed himself in such glory and majesty as were never witnessed on earth.

II. Distinction between Sinai and Horeb.—Those critics who disintegrate the Pentateuch and assign to it a variety of authors are ready to support their view by pointing to a variety of diction; and one evidence of this they find in the use of Horeb throughout the book of Deuteronomy (except in the song of Moses, xxxiii, 2, which they attribute to a still different writer); whereas the person whom they suppose to have been the original composer of the first four books uses Sinai, which is the name always employed except in Exod. iii, 1; xvii, 6; xxxiii, 6; and these passages they attribute to a supplementary writer. This view is still strongly asserted by Ewald (*Geschichte*, ii, 57), who pronounces Sinai the older name, therefore occurring in the ancient song of Deborah (Judg. v, 5); whereas Horeb is not discoverable till the time of his fourth and fifth narrators, in whose age, however, it had become quite prevalent. His statement is a very fair sample of the precision and confidence with which these critics speak of matters as to which there is no evidence except their own critical sagacity, or their imagination, as others may be apt to consider it who claim no such peculiar insight. For while it is quite possible that the same writer might use two names indiscriminately for the same place, as in the case of Bethel and Luz, Baalah and Kirjath-jearim, the Sea of Galilee and the Lake of Tiberias, yet this last example indicates how readily two names may come to be in use indifferently, though originally the one was more definite than the other. Accordingly, Gesenius suggested that Sinai might be the more general name, and Horeb a particular peak; and in this conjecture he was followed by Rosenmüller.

Another supposition was made by Hengstenberg (*Pentateuch*, ii, 325-327) which has gained the assent of almost all the German authorities since his time, as also of Robinson (*Bib. Res.* i, 120, 591), apparently after having inclined to the conjecture of Gesenius. Hengstenberg agrees with Gesenius that the one name is more general than the other; but he differs in this respect—that he makes Horeb the mountain-ridge, and Sinai the individual summit from which the ten commandments were given. The reasons for this opinion as urged by him and by others may be arranged under a threefold division: (1.) The name Sinai is used at the time that the Israelites were upon the very spot of the legislation, that is, from Exod. xix, 11 and onwards till Numb. iii, 1; whereas it is Horeb that is always used in the recapitulation in Deuteronomy; as a writer close beside a particular mountain would naturally single it out when describing his locality, though afterwards, when writing at a distance from it and taking a general retrospect, he might use the more comprehensive name of the entire mass of mountains to which it belonged. The only exception in Deuteronomy is that case in the song of Moses already alluded to (xxxiii, 2), which is universally admitted to be a peculiar composition both by the impugnors and by the defenders of the Mosaic authorship. When we take in the additional expression, "the wilderness of Sinai," as denoting the place in which the Israelites encamped, we have Sinai occurring as early as Exod. xix, 1, 2, and continuing till Numb. x, 12, where the march from Sinai is described. That particular spot would natu-

rally take its name from the mountain-peak beside it, whereas the name "wilderness of Horeb" is unknown to Scripture. The name Sinai never occurs in the Pentateuch after the departure from the spot except in three instances. Two of these (Numb. xxvi, 64; xxxiii, 15) refer expressly to events in language already employed upon the spot about the census, and in the list of stations or encampments, and both use that phrase "the wilderness of Sinai," which never occurs with the name Horeb; so that they are no exceptions in reality. The third (xxviii, 6) is, therefore, the only exception—"It is a continual burnt-offering which was ordained in Mount Sinai;" and this also is explicable on the principle that the phrase had become so common in the legislation. Once, also, Sinai occurs before the Israelites reached it (Exod. xvi, 1), "the wilderness of Sin, which is between Elim and Sinai," and here the precision of this term is thoroughly natural. (2.) The name Horeb occurs in the earlier books thrice, all in Exodus, but it is in circumstances which best suit the general or comprehensive meaning which we attach to it. Moses, while acting as the shepherd of Jethro (iii, 1), "came to the mountain of God [even] to Horeb," or, more literally, "came to the mountain of God Horeb-ward." Our translators have identified the mountain of God with Horeb, an identification which is at least uncertain; for the original may quite as naturally be interpreted that he came to a particular peak in that mass of mountains which had the name of Horeb, to the sacred peak which is to be sought in the direction of Horeb. Particularly distinct is the second instance (xvii, 6), "Behold I will stand before thee there upon the rock in Horeb," etc.; for this miraculous gift of water took place while the Israelites were encamped in Rephidim (ver. 1), the station before the station in the wilderness of Sinai (xix, 2). Probably the like should be said of the third instance (xxxiii, 6), "And the children of Israel stripped themselves of their ornaments by the mount Horeb," retiring every family apart, and every individual apart, as in other cases of humiliation and repentance; and the propriety of the use of the general rather than the specific term is the more apparent if those are right who translate the peculiar Hebrew phrase as exactly as they can, "stripped themselves, etc. [retiring], from Mount Horeb." (3.) An argument may be drawn from the use of the prepositions connected with these two names. Reverting to Exod. xvii, 6, we find the Lord saying, "Behold, I will stand *upon* the rock *in* Horeb," that is, *upon* the particular spot, but *in* the district. Accordingly, it is the preposition *in* (in the English version needlessly varied into "at" once or twice) which is used with Horeb, not only here, but almost always where the name occurs in Deuteronomy, perhaps always, except "from" (i, 2, 19). The same is true of all the passages in which Horeb is mentioned in later Scripture (1 Kings viii, 9; 2 Chron. v, 10; Psa. cvi, 19; Mal. iv, 4 [Heb. iii, 22]), except 1 Kings xix, 8, "unto Horeb the mount of God," or better, "up to the mount of God Horeb [ward]," for it is plainly an expression referring to Exod. iii, 1, of which we have already spoken. With Sinai, on the other hand, there are connected several prepositions, "in" and "from" as in the case of Horeb; also "to," but especially "upon" (Exod. xix, 11, 18, 20; xxiv, 16), which describes the descent of the Lord, or the resting of the symbol of his presence, upon that individual peak from which the law was given, whereas we have no reason to think that it rested upon the whole mass of mountains which are clustered together. The same preposition, "upon," is found in the only passage in later Old-Test. Scripture where Sinai occurs with a preposition (Neh. ix, 13). Indeed, besides this text we find Sinai nowhere but in Judg. v, 5; Psa. lxxviii, 8, 17 (Heb. 9, 18), in passages which indisputably stand in a very close connection with Deut. xxxiii, 2.

Not much can be inferred from the usage of later Scripture in regard to these names; though from what

has been mentioned it may be seen that Horeb is very decidedly the predominant name in the rest of the Old Test., as it is with one exception in Deuteronomy, and probably in both cases for the same reason—that at a distance in time and place the more general name was, on the whole, more natural. Yet the distance may become so great that the peculiarities of the two names fall out of view, and mere usage may determine in favor of the one or the other appellation, now that they have become entirely equivalent. Certainly in the New Test. we find only Sinai (Acts vii, 30, 38; Gal. iv, 24, 25), though reasons might be, perhaps, alleged for the use of the stricter name; for instance, in the first of these, that it is "the wilderness of Mount Sinai," in which connection we have said that Horeb does not occur. Josephus seems also to confine himself to the name Sinai. In the Apocrypha we have noted Judith v, 14, "to the way of Sinai," or, according to another reading, "to the mount Sinai;" and Eccles. xlviii, 7, where "in Sinai" and "in Horeb" occur in a poetical parallelism: but these determine nothing. Perhaps nothing can be concluded from the fact that Horeb never has the prefix "mount" except in Exod. xxxiii, 6, whereas Sinai always has it in both the Old Test. and the New except in Exod. xvi, 1, and Deut. xxxiii, 2, and the passages depending upon this one, Judg. v, 5; Psa. lxxviii, 8, 17.

Once more, it is very doubtful whether etymology can contribute anything to the settlement of the question. Horeb certainly means "dry," or "dried up," a name very descriptive of the region. But the meaning of Sinai is much debated. Gesenius suggests "muddy," but with hesitation, and he appears to have no followers. More probably, Knobel proposes "sharp-pointed," "toothed," or "notched." The old derivation of Simonis and Hiller understood שִׁנְיָי, *Sinai*, to be equivalent to שִׁנְיָי, *sinai*, "the bush of Jehovah," with reference to Exod. iii, 2. Possibly as simple a meaning as any would be "bushy," or "that which has the bush." If so, the etymologies of the two names, so far as they went, would favor the view given of their respective meanings. Rödiger (additions to Gesenius, *Thesaur.*) makes it "sacred to the God of the moon." Ewald and Ebers regard it as equivalent to "belonging to [the Desert of] Sin."

Understanding Horeb to be the more general name, there might still be differences of opinion how wide a circuit should be included under it; though the common opinion seems to be that there is no necessity for taking it wider than that range (some three miles long from north to south) which is called by the modern Arabs Jebel Tûr, or Jebel et-Tûr, sometimes with the addition of Sina, though Robinson says extremely rarely.

III. *Identification of the Particular Mountain.*—In the Biblical notices "there are implied three specifications, which must all be present in any spot answering to the true Sinai: 1. A mountain-summit overlooking the place where the people stood. 2. Space sufficient, adjacent to the mountain, for so large a multitude to stand and behold the phenomena on the summit; and even, when afraid, to remove afar off and still be in sight. 3. The relation between this space where the people stood and the base of the mountain must be such that they could approach and stand at 'the nether part of the mount;' that they could also touch it; and that bounds could be set round the mount" (*Biblioth. Sac.* May, 1849, p. 382). "There are three claimants for the name Sinai, and it will be necessary to examine them successively.

1. *Jebel Serbâl.*—Its claims were suggested by Burckhardt (*Travels*, p. 609), and are advocated by Lepsius (*Letters from Egypt* [Lond. 1853]), Bartlett (*Forty Days in the Desert*), Stewart (*The Tent and the Khan*), and others. The arguments in its favor may be thus summed up: It was the most conspicuous mountain in the peninsula, and therefore the best known to the Egypt-

tian colonists. Near its northern base was the oasis of Feirân, which was probably the centre of the primeval Sinaitic population; and the summit of Serbâl would form their natural sanctuary. Moses, knowing such a fertile and well-watered spot as Feirân, would never have led the Israelites past it, but would naturally select it as the place of the permanent camp (Lepsius, p. 356-363). Besides, it is supposed to be more in accordance with the narration of the wilderness journey than any other mountain; and it is alleged that early historical tradition is wholly in its favor. The last two arguments are the only ones of any weight; and neither of them stands the test of critical examination. The basis of Lepsius's argument is that Rephidim is identical with Feirân, and that Moses selected this spot as the site of a permanent camp because it was well watered and fertile; but the sacred writer tells us that in Rephidim "there was no water for the people to drink" (Exod. xvii, 1). With strange inconsistency Lepsius affirms that the "wonderful fountain of Feirân" was opened by the miracle recorded in ch. xvii. If so, then how could the place have been well watered previously? But further: Rephidim was a day's march—probably a short one—from the permanent camp before Sinai (xix, 1). These facts totally overthrow the alleged argument from Scripture.

The historical argument is not more convincing, although dean Stanley somewhat rashly says: "It (Serbâl) was undoubtedly identified with Sinai by Eusebius, Jerome, and Cosmas; that is, by all known writers till the time of Justinian" (*Sinai and Palestine*, p. 40). Eusebius merely states that "Rephidim is a place in the wilderness by Horeb, and that there Joshua fought with Amalek near Pharan" (*Onomast.* s. v.). Jerome only translates his words without addition or comment (he renders Ἰγγύς by *prope*). The language of Cosmas is equally indefinite (*Topogr. Christ.*

v), especially as it is known that Pharan was a pretty large district, and that Horeb is said to be *six miles* distant from it.

It is hardly necessary to discuss the argument grounded on the remarkable Sinaitic inscriptions, though Lepsius presses it, and Stanley says that the natural inference from them is that Serbâl "in the earlier ages enjoyed a larger support of tradition than Gebel Mousa" (p. 39). But how can this be? Wady Mokatteb, in which most of the inscriptions are found, is the leading route to Jebel Mûsa as well as to Serbâl. Inscriptions have also been discovered on the northern road from Egypt to Jebel Mûsa by Surabet el-Khâdem; and they are much more numerous in the passes around Jebel Mûsa—in Wady Leja, Nukb Hâwy, etc.—than in Wady Aleiyât, the only pass leading to Serbâl. It may be safely affirmed that the Sinaitic inscriptions do not, for the present at least, affect the question at issue in any way (Porter, *Handbook*, p. 16 sq.).

But the nature of the country around Serbâl is sufficient of itself to show that it could not possibly have

Jebel Serbâl.

The Summit of Jebel Mûsa.

been Sinai. Wady Feirân is three miles distant, and from it an occasional glimpse only can be got at the summit. Wady Aleiyât, which leads up to Serbâl, is narrow, rugged, and rocky, affording no place for a large camp. This is acknowledged on all hands (Lepsius, p. 423 sq.; Bartlett, p. 57; Stanley, p. 44; Sandie, *Horeb and Jerusalem*, p. 149); and as there is no other valley or plain at the base of the mountain, it follows that Serbâl cannot be Sinai.

2. *Jebel Mûsa* is the Sinai of recent ecclesiastical tradition, and it has found some advocates among modern travellers (Wilson, *Lands of the Bible*, i, 219; Sandie, *Horeb*, etc.). It is situated in the very centre of the mountain group; but it is neither so lofty nor so commanding as some others around it. Its elevation is only about 7000 feet, while *Jebel Katherin*, three miles south, is 8700 feet, and *Um Shaumer*, beyond it, attains an altitude of 9800 feet. *Jebel Mûsa* is the highest point of a short isolated ridge which runs from north-west to south-east, between the two parallel ravines of *Shueib* and *Leja*. At one end (the south-east) it is bounded by a rugged wady called *Sebalyeh*, at the other by the upland plain of *Er-Râhah*. In *Wady Shueib*, on the north-east of the ridge, stands the convent of *St. Catherine*, with the naked cliffs rising almost perpendicularly over it. In the glen of *Leja*, on the opposite side, is the reputed rock of *Moses*. The peak of *Jebel Mûsa* ("Moses' Mountain"), which the monks identify with Sinai, is at the southern extremity of the range, overlooking *Wady Sebalyeh* and a confined region of rugged gravelly hills near it. The summit is a platform about thirty paces in diameter, partly covered with ruins. At its eastern end is a little chapel, and near it a mosque. Notwithstanding the elevation, the view is not extensive, and no plain is in sight on which the camp of the Israelites could have stood; nor is the base of the peak at all so clearly defined as the incidents of the sacred narrative require.

Various traditions—Jewish, Christian, and Mohammedan—have found a local habitation on this mountain. A rugged ancient path, in many places hewn into flights of steps up the granite cliffs, passes a grotto of the Virgin, the cave where *Elijah* dwelt in *Horeb*, the footmarks of *Mohammed's* camel, and other spots equally apocryphal, in its winding course to the summit. This is the Sinai of tradition, but certainly not that of the Bible.

3. *Râs es-Sufsâfeh* is the third claimant for the name Sinai; and its claim is valid. It forms the north-western point of the ridge of which *Jebel Mûsa* is the south-eastern. The name signifies "the peak (or head) of the willow;" and is derived from a willow-tree which grows in a cleft on its side. The summit is very clearly defined, rising high above all the other peaks near it. In front it descends in broken crags of naked granite to *Wady er-Râhah*. The view from it is not so extensive as that from *Jebel Mûsa*, but it is far more interesting and impressive. The whole extent of the plain of *Er-Râhah*, measuring more than two miles in length, and ranging from one third to two thirds of a mile in breadth, is visible. The eye can follow its windings as it runs away among the mountains in the distance. The level expanse of *Wady es-Sheikh*, which joins *Er-Râhah*, is also seen opening out on the right, while opposite it on the left is another section of plain forming a recess in the mountains.

From near the summit a wild ravine runs down the front of the mountain, conveying a winter torrent into *Er-Râhah*. Up this ravine the ascent may be made from the plain; it is rugged and steep, but an active mountaineer, such as *Moses* was, could easily accomplish it.

There can scarcely be a doubt that *Râs es-Sufsâfeh* is Sinai, "the mount of the Lord." Every requirement of the sacred narrative is supplied and every incident illustrated by the features of the surrounding district. Here is a plain sufficient to contain the Israelitish camp, and so close to the mountain's base that barriers could be erected to prevent the rash or the heedless from touching it. Here is a mountain-top where the clouds that enshrined the Lord when he descended upon it would be visible to the vast multitude, even when in fear they would withdraw from the base and retire to a distance. From this peak the thunderings and the voice of *Jehovah* would resound with terrific effect through the plain, and away among the cliffs and glens of the surrounding mountains. When descending through the clouds that shrouded it, *Moses* could hear also the songs and shouts of the infatuated people as they danced round the golden calf; and in "the brook that descends out of the mount" (*Deut. ix, 21*), through the ravine into *Er-Râhah*, he could cast the dust of the destroyed idol. In fact, the mountain, the plain, the streamlet, and the whole topography correspond in every respect to the historical account given by *Moses*. The words of dean *Stanley* are equally graphic and convincing: "No one who has approached the *Râs Sufsâfeh* through that noble plain, or who has looked down upon the plain from that majestic height, will willingly part with the belief that these are the two essential features of the view of the Israelitish camp. That such a plain should exist at all in front of such a cliff is so remarkable a coincidence with the sacred narrative as to furnish a strong internal argument, not merely of its identity with the scene, but of the scene itself having been described by an eye-witness. The awful and lengthened approach, as to some natural sanctuary, would have been the fittest preparation for the coming scene. The low line of alluvial mounds at the foot of the cliff exactly answers to the 'bounds' which were to keep the people off from 'touching the mount.' The plain itself is not broken and uneven, and narrowly shut in, like almost all others in the range, but presents a long retiring sweep, against which the people could 'remove and stand afar off.' The cliff, rising like a huge altar, in front of the whole congregation, and visible against the sky in lonely grandeur from end to end of the whole plain, is the very image of 'the mount

Ras es-Sufsâfeh from the Plain of Er-Râhah.

that might be touched,' and from which the voice of God might be heard far and wide over the stillness of the plain below, widened at that part to its utmost extent by the confluence of all the contiguous valleys. Here, beyond all other parts of the peninsula, is the adytum, withdrawn, as if in the 'end of the world,' from all the stir and confusion of earthly things" (p. 42, 43).

The remarks of Mr. Beumont, a recent and observant traveller, are of some importance, as showing that some traces of the ancient Scripture names still linger around Mount Sinai: "Two or three facts seem to me well worthy of observation. Immediately above Wady es-Sheikh rises Jebel Fureia, the front of this is named Jebel *Seneh*. Of this name our sheik from Tor knew nothing, but our guide on Ras es-Sufsâfeh needed no prompting to give it its designation. This cluster of Fureia, or Zipporah, is nearly parallel with the cluster of Jebel Mûsa, and extends northward from it to the head of the central Sinaitic cluster. Separated from the same central cluster of Jebel Mûsa on the left by Wady Leja, runs another parallel range of Sinaitic rocks. To one of these, and separated from Jebel Fureia by the broad Er-Râhah, the name *Urrebbek* is given. This name also, as well as the name of the other group, was spontaneously assigned to it by our guide Mohammed. I was rather sceptical on the point, and made him repeat his designation three or four times, that there might be no mistake. My orthography is intended to express, as nearly as I can, the sound of his utterance, for it would have been vain to ask him to spell the word. Supposing, then, that his nomenclature was correct, we have a cluster bearing the name of *Seneh* (*Sinai*; comp. Stanley, p. 42) on the right of Jebel Mûsa, and one bearing the name *Urrebbek* (*Horeb*) on the left; the central cluster itself has no local appellation, and is called after the prophet Moses. May we not, then, suppose that this central cluster bore the name Sinai or Horeb indiscriminately, serving as the nucleus to which the ranges of Sinai and Horeb trended; and that, after the delivery of the law from the peak of Ras es-Sufsâfeh, this bore the special name of 'Mountain of Moses,' and that subsequently the local designations were restricted to the ridges on the right and left?" (*Cairo to Sinai*, p. 81, 82). The name Wady er-Râhah, which is given to the upland plain in front of Ras es-Sufsâfeh, is also suggestive. It signifies "the vale of rest"—rest after labor, as that enjoyed by beasts of burden at the close of the day. This is very expressive as applied to the long encampment of the Israelites in this plain, after the toilsome march from Egypt. The monks, as has been stated, give the name of Jebel Mûsa to the southern peak of the central ridge, identifying it with Sinai; but they identify Ras es-Sufsâfeh with Horeb. There are several traditional sites pointed out in Wady er-Râhah along the base of Sufsâfeh, but they are so manifestly apocryphal as to be scarcely worth notice—such as the hill on which Aaron stood, the mould in which the golden calf was formed, and the pit of Korah (Porter, *Handbook*, p. 35). It is worthy of note that no other district in the whole peninsula, with the exception of a small portion of Wady Feirân, possesses such supplies of water and pasture as that around Mount Sinai. When the springs and wells are dry elsewhere, the Bedawin resort hither. On Sinai itself, on Jebel Kathertn, in Wady Leja, in the convent, and in the plain of Râhah are perennial sources. The pastures, too, among the rocks and in the glens and little upland plains, are comparatively abundant (see Olin, *Travels*, i, 386, 415).

4. The late Dr. Beke of England broached the theory that Sinai was not in the peninsula at all, but east of the Gulf of Akabah, a position that carries its refutation on its own face. In order to accommodate it, he did not hesitate to remove the *Mizraim*, or "Egypt" of the Bible, into the peninsula. He finally made a visit to the region, and imagined he discovered the requisite local-

ity in Jebel *Nura*, up Wady Ithm, a short distance from Akabah; and although the main object of his journey, which was to prove "Mount Sinai a volcano," was effectually exploded by the facts on the spot, he still maintained his general views as stoutly as ever, but without the concurrence of a single writer of note. Soon after his return he died of fatigue and disappointment, and his widow has published the notes of his journey with more affection than discretion (*Sinai in Arabia* [Lond. 1878]).

IV. *Description of the Region.*—The physical features of the peninsula are broadly and deeply marked. In form a triangle, it is shut in on two sides by the gulfs of Akabah and Suez, and on the third by the desert of Tih. Within these outer barriers are others, enclosing what may be termed the shrine. Along the southern edge of Tih runs, like a vast wall, a bare limestone ridge; and south of it again is a parallel belt of sandy plain, appropriately termed Debbet er-Ramleh. A naked gravelly plain called El-Kâa extends along the whole shore of the Gulf of Suez. Between El-Kâa, Debbet er-Ramleh, and the Gulf of Akabah lies a group of mountains, triangular in shape, which forms, as it were, the nucleus of the peninsula, and is now called emphatically *El-Tôr*, "the mountains." On the north and west the group has projecting buttresses of ruddy sandstone, on which most of the inscriptions in the "written valley" are traced; but the main body and all the loftiest peaks are granite, and exhibit a variety of coloring—red, yellow, purple, and green—making them objects of singular beauty when bathed in the bright sunshine. They are all, however, naked and desolate. As the eye wanders over their risen sides and up their jagged peaks, not a tree, not a shrub, not a blade of grass is seen (see Olin, *Travels*, i, 389). Rugged passes, almost as bare and dry and desolate as the granite cliffs overhead, wind from the outer borders up into the centre of the group. On penetrating these ravines, a few acacias are here and there seen in a cranny of the rocks, and a clump of wild palms is occasionally met with fringing a well or fountain. In the heart of these mountains, in nature's profoundest solitude, amid scenery unsurpassed for wild and stern grandeur, history, tradition, and geography have combined to locate Sinai, "the mount of the Lord," and all those wondrous events which were enacted round it.

The Sinaitic group has been arranged (Stanley, *Sin. and Pal.* p. 11) in three chief masses as follows: (1.) The north-western cluster above Wady Feirân; its greatest relief found in the five-peaked ridge of Serbâl, at a height of 6342 feet above the sea. (For an account of the singular natural basin into which the waters of this portion of the mountain mass are received, and its probable connection with scriptural topography, see REPHIDIM.) (2.) The eastern and central one; its highest point the Jebel Kathertn, at a height of 8063 (Rüppell) to 8168 (Russeger) feet, and including the Jebel Mûsa, the height of which is variously set (by Schubert, Rüppell, and Russeger) at 6796, 7033, and 7097 feet. (3.) The south-eastern one, closely connected, however, with 2; its highest point, Um Shaumer, being that also of the whole. The three last-named peaks all lie very nearly in a line of about nine miles drawn from the most northerly of them, Mûsa, a little to the west of south; and a perpendicular to this line, traced on the map westward for about twenty miles, nearly traverses the whole length of the range of Serbâl. These lines show the area of greatest relief for the peninsula, nearly equidistant from each of its embracing gulfs, and also from its northern base, the range of Et-Tih, and its southern apex, the Râs Mohammed.

The vegetation of the peninsula is most copious at El-Wady, near Tûr, on the coast of the Gulf of Suez, in Wady Feirân, the two oases of its waste, and "in the nucleus of springs in the Gebel Mousa" (Stanley, p. 19). As regards its fauna, Seetzen (iii, 20) mentions the following animals as found at Er-Ramleh, near Sinai: the

The Mountains of Sinai. (From a model constructed after the Ordnance Survey.)

wild goat, the wubber, hyena, fox, hare, gazelle, panther (rare), field-mouse (el-jurdy, like a jerboa), and a lizard called el-dsob, which is eaten. See WILDERNESS OF THE WANDERING.

It is a remarkable fact that Sinai never became a place of Jewish pilgrimage. Elijah went there, but it was at the command of God, and to escape the vengeance of Jezebel. It has been thought possible that Paul may have visited Sinai (Gal. i, 17) and been familiar with the name *Hajar* as given commonly to it, signifying "a rock" (Ewald, *Sendschreiben*, p. 493). At a very early period, however, in the Christian era, Sinai began to be an object of reverence. It appears that refugees from persecution in Egypt first sought an asylum amid the mountains. Anchorets consequently flocked to it, and convents were at length founded. The poor monks had hard fare, and were exposed during a long course of ages to persecutions and fearful massacres at the hands of the wild nomads. In the early part of the 6th century the emperor Justinian caused a church to be erected, and a fortified convent to be built round it to protect the monks from the incursions of the Ishmaelites. It is the present Convent of St. Catherine. The number of resident monks is now usually about twenty-four, though in the 14th century it is said to have been as high as four hundred. They are ruled by a prior, but there is an archbishop who always resides at Constantinople, and is one of the four independent archbishops of the Greek Church. The library of the convent contains some 1500 printed books, and about 700 manuscripts. A few of the latter are of great antiquity and value. Among them Tischendorf discovered, in the year 1859, the celebrated *Codex Sinaiticus* (q. v.).

V. Literature.—Mount Sinai and its vicinity have been visited by hundreds of travellers in modern times, and multitudes of descriptions have been written, few of which, however, contain anything specially new. The best accounts are those of Robinson, *Bibl. Res.* i, 88–144; Burckhardt, *Travels in Syria*, p. 541–590; *Biblioth. Sac.* May, 1849, p. 381–386; Stanley, *Sin. and Pal.* p. 3–77; Beaumont, *Cairo to Sinai*, p. 58–85; Sandie, *Horeb and Jerusalem*, p. 154–224. The German writers—Ritter, *Pal. und Syr.* vol. i; Ruppell, *Reise*; Schubert, *Reise*, vol. ii; and Niebuhr, *Description de l'Arabie*—may be consulted with advantage; and full descriptions of the convent, with views, are given in Laborde's *Mount Sinai and Petra*, and in Bartlett's *Forty Days in the Desert*. The vicinity is minutely described in Porter's *Handbook for Palestine*, and in Bäder's also. The results of the English Ordnance Survey—which, however, only extended over the western half of the peninsula—have been published in three noble volumes with two supplementary series of photographs (Lond. 1868–69), and a good abstract may be found in Palmer's *Desert of the Exodus* (Lond. and N. Y. 1872), and more briefly in his *Sinai from the Monuments* (Lond. 1878).

Sinai Codex, HEBREW. This MS., which contains the Pentateuch, contains many variations of the accents, as וִישָׁבִיט, and he heard (Exod. xviii, 1), has the accent *Gershaim*, but in Sinai it has *Rebia*; again, וְהַיָּדְבָר, the desert (ver. 5), has *Zakeph*, while in Sinai it has *Zakeph gadol*. As to the name of the codex, whether it is so called from the author or from the place where it was written is a matter of dispute. According to Levita it would be the name of a codex; Fürst (*Gesch.*

der Karäer, i, 22, 138) thinks that this codex derives its name from Mount Sinai, while Joseph Eshoe, the expositor of the Masorah, says, on Exod. xviii, 1, "As to the remark Sinai has Rebia, know that the inventors of the vowel-points and accents were mostly from the spiritual heads and the sages of Tiberias. Now the name of one of these was Sinai, and he differed from the Masorah, which remarks that יִי־שִׁי־סִי has Gershaim, and said that it has the accent Rebia." From this it will be seen that this great Masoretic authority does not take סִינַי as *Codex Sinaiticus*, but regards it as a proper name of one of the inventors of the vowel-points and accents. Delitzsch (in his Hebrew translation of Paul's Epistle to the Romans, p. 41, 121) thinks that the name סִינַי, *Sinai Codex*, refers rather to the place where it was written or found. See Strack, *Prolegomena Critica in Vet. Test. Hebraicum* (Lips. 1873), p. 23 sq.; Levita, *Masoreth ha-Masoreth* (ed. Ginsburg), p. 259; Hottinger, *Thes. Philologicus* (3d ed.), p. 107; Eichhorn, *Einleitung in das alte Test.* i, 375; Tychsen, *Tentamen de Variis Codd. Hebr.* p. 215. (B. P.)

Sinaitic Inscriptions is the name usually given to certain singular marks cut or rather scratched on the rocks of the Sinaitic peninsula, which have in all ages given rise to great curiosity and many queries. Diodorus Siculus states that in his time there was an oasis in the wilderness of Sinai containing a sacred shrine, to which the inhabitants of the surrounding country were accustomed to make pilgrimages every five years. There was a stone altar at the spot with an inscription in ancient unknown characters. This appears to be the first mention of the now famous Sinaitic inscriptions. The oasis was probably Feirân, though some think it was the village of Tîr, on the coast of the Red Sea. The quinquennial festival is mentioned by Strabo. But the first description of the inscriptions is given (about A.D. 535) by Cosmas, who supposed them to be the work of the Israelites. They are also referred to by several early travellers, as Neitzschitz and Monconys. Pococke and Niebuhr attempted to copy them, but with little success; Seetzen and Burckhardt were more accurate in their transcripts. In the *Transactions of the Royal Society of Literature* (1832, iii, 1), 177 of them are carefully engraved; nine of these are Greek, and one is Latin; the rest are of that peculiar character which recent palæographers, as Beer, have denominated Nabathæan. They are accompanied, wherever they occur, by rude figures of men with shields, swords, bows, and arrows; of camels and horses, of goats and ibexes with horns wondrously exaggerated; of antelopes pursued by greyhounds; of lizards and tortoises, besides a number of nondescripts which will puzzle the zoologist. They are met with in almost every part of the mountainous region of the peninsula, in groups and singly. They have been seen in wadies Sidry, Maghârah, and Feirân; in wadies Humr and Birah, on the northern route to Sinai; on and around Mount Serbâl; in Wady Leja at Sinai; on the plateau between wadies Seyal and El-Ain, on the route to Akabah; at Petra, and on the southern border of Palestine. They occur, however, in greatest numbers in Wady Mokatteb.

The inscriptions are in general very short, consisting of one or two brief lines; the letters are from two to three inches long, rudely cut with a sharp-pointed instrument. The surface of the rock is generally soft, so that with a pocket-knife one could cut a shallow inscription in a few minutes. A few, however, are more deeply and regularly formed. Though Lepsius discovered some of the Sinaitic characters engraved over older Greek names, yet the Greek inscriptions are generally of a much more modern date than the others, judging from their appearance. Some of them have crosses attached; but these are not in all cases of Christian origin. The very same figures are found on Egyptian obelisks. Their position on the face of the cliffs is generally so low that a man could reach them. Some are higher, and would require

a ladder, or at least an expert climber. None are so high as to suggest the necessity for ropes or scaffolding.

Prof. Beer, of Leipsic, has examined them with great care and constructed an alphabet. The results of the researches of this distinguished scholar are as follows: 1. The alphabet is independent; some of the letters are unique, others like the Palmyrene, Estrangelo, and Cufic. They are written from left to right. 2. The contents of the inscriptions, so far as examined, consist only of proper names preceded by some such words as שלם, "peace," דכיר, "in memory," and בריך, "blessed."

The word כהן, "priest," is sometimes found after them. The names are those common in Arabic; not one Jewish or Christian name has yet been found. 3. The language is supposed to be the Nabathæan, spoken by the inhabitants of Arabia Petrea. 4. The writers were pilgrims. The great number around Serbâl leads to the supposition that it was once a holy place. That some of the writers were Christian is evident from the crosses. 5. The age of the inscriptions he supposes to be not earlier than the 4th century. Had they been later, some tradition respecting them would probably have existed in the time of Cosmas.

Prof. Tuch, of Leipsic, while agreeing with Beer in his alphabet and translations, differs from him in regard to the history of the inscriptions. He says the language is Arabic; the authors of them were ancient inhabitants of these mountains, in religion heathens. Pilgrimages were the occasions of the inscriptions. Their date he fixes not later than the 2d century B.C.

Dean Stanley, in his careful résumé, states that there is a great difference of age manifested both in the pictures and letters; that they are intermixed with Greek, Arabic, and even one or two Latin words, apparently of the same date; that crosses are very numerous, and of such form as to show their Christian origin. He concludes that they are, for the most part, the work of Christian pilgrims.

It will be seen from the above statements that these singular inscriptions chiefly occur in the wadies, and on the roads leading to particular spots, such as mounts Sinai and Serbâl, and the Deir at Petra. They seem to have been the work of idle loiterers, rude in their

Sinaitic Inscriptions in Wady Mokatteb.

ideas of art, and ruder still in their morals; for the figures of animals are generally ludicrous, and occasionally obscene. Many of the inscriptions are evidently of remote antiquity, while others are plainly not older than our own æra. That they are of Israelitish origin, as Mr. Forster maintains, no satisfactory evidence has as yet been produced. The letters are not Hebrew. Some of them resemble Phœnician characters, others are different from those of any known language. And yet it would seem they were the symbols of a language at one period universally known throughout the whole peninsula. It does seem strange that all knowledge of these characters and the people who used them has been entirely lost, and it seems stranger still that it was already lost in the 4th century. The researches of the greatest scholars of our age have been unable to solve the mystery of these inscriptions, or afford any satisfactory clue to their origin, authors, and object (Porter, *Handbook for Palestine*, p. 17).

Prof. Palmer has carefully investigated these inscriptions in the *Ordnance Survey of Sinai*, and his conclusions are thus summarily expressed: "They are mere scratches on the rock, the work of idle loungers, consisting, for the most part, of mere names interspersed with rude figures of men and animals. In a philological point of view they do possess a certain interest, but otherwise they are as worthless and unimportant as the Arab, Greek, and European graffiti with which they are interspersed. The language employed is Aramæan, the Shemitic dialect which in the earlier centuries of our æra held throughout the East the place now occupied by the modern Arabic, and the character differs little from the Nabathæan alphabet used in the inscriptions of Idumæa and Central Syria" (*Desert of the Exodus*, p. 160). See, in addition to the above, and travellers in the region, Beer, *Inscriptiones ad Montem Sinai*, etc. (Lips. 1840); Lenormant, *L'Origine Chrétienne des Inscr. Sin.* (Paris, 1856); Schulmann, *Ueber sinait. Inschriften* (Wilna, 1856); Ebers, *Durch Gosen und Sinai* (Leips. 1872); Sharpe, *Heb. Inscriptions between Egypt and Sinai* (Lond. 1875); *Jour. Sac. Lit.* July, 1853; *Ch. of Engl. Review*, April, 1857. See INSCRIPTIONS.

Sinaitic Manuscript (*Codex Sinaiticus*, designated as **Σ**), a MS. of the Septuagint and Greek New Test., brought from the Convent of St. Catherine, on Mount Sinai, by Tischendorf in 1859. It consists of 345 leaves and a half, 199 in the Old Test. and 147 in the New Test. The *Codex Sinaiticus* contains the following portions of the Old Test. and Apocrypha in the order here given: 1 Chron. ix, 27–xi, 22; Tobit ii, 2 to the end; Judith i, 1–xi, 13; xiii, 9–xvi; 1 Macc.; 4 Macc.; Isaiah; Jer. i, 1–x, 25; Joel; Obadiah; Jonah; Nahum; Habakkuk; Zephaniah; Haggai; Zechariah; Malachi; Psalms; Proverbs; Ecclesiastes; Canticles; Wisdom of Solomon; Ecclesiasticus; Job. Of the missing portions the following are supplied by the *Codex Friderico-Augustanus*, and the fragments afterwards published by Tischendorf, which were originally parts of the Sinaitic MS.: a few verses of Gen. xxiii, xxiv, and of Numb. v–vii; also 1 Chron. xi, 22–xxii, 17; Ezra ix, 9 to the end; Nehemiah; Esther: Tobit i, 1–ii, 2; Jer. x, 25 to the end; Lam. i, 1–iii, 20. This codex contains the entire New Test., together with the epistle of Barnabas and parts of the Shepherd of Hermas. There are four columns in each page. The character of the letters, the inscriptions and subscriptions to different books, the absence of the Ammonian sections and Eusebian canons, the nature of the readings, and other peculiarities, agree in a remarkable manner with B, or the Vatican. Tischendorf supposes that it is somewhat older than B, belonging to the 4th century. Probably it is of the 6th century, though made from a text older than that of B. The copyist, writing perhaps from dictation, has made many blunders. The value of this acquisition to the critical apparatus of the Bible can hardly be overestimated. In Tischendorf's *Notitia Editionis Codicis Biblio-*

Specimen of the *Codex Sinaiticus* (containing 1 Tim. iii, 16: και ομολογουμενως μεγα εστιν | το της ευσεβειας | μυστηριον ος εφανερωθη εν σαρκι· εδικαιωθη εν | πανι ωφθη αγ· γελοις | εκηρυχθη εν εθνεσιν επιστευθη εν κοσμω· | ανελημφθη εν | δοση).

rum Sinaitici, etc. (Lips. 1860, sm. fol.), the indefatigable critic has given nine pages entire from the New Test., eight from the Old Test., and one from the epistle of Barnabas and the Shepherd of Hermas (p. 22 sq.). He has also furnished upwards of six hundred readings from all the books of the New Test. (p. 14 sq.). A fac-simile is given above. Tischendorf has likewise printed a brief *Notitia Codicis* to accompany the seventh edition of his Greek Test. of the same size. It may be remarked that the *Codex Sinaiticus* agrees with B in omitting the last twelve verses of Mark's gospel; that it has ος εφανερωθη, not θεος; that it omits the passage respecting the woman taken in adultery (John vii, 53–viii, 11); agrees with B in omitting εν εφσω in Ephes. i, 1 (*a prima manu*); wants the doxology in Matt. vi, 13, as do B D Z; agrees with B in reading την εκκλησιαν του Θεου (Acts xx, 28); with B C D** in having ουδενοσ λογου ποιουμεν την ψυχην τιμαν εμανω (ver. 24), and has μονογενης Θεος with B C L in John i, 18—a reading undoubtedly wrong. The MS. has been published at St. Petersburg in fac-simile (4 vols. fol.), the edition being limited to 300 copies. In 1863 the New-Test. part was published in ordinary type at Leipsic, 4to, with columns the same as the original, and in 1865 Tischendorf issued a new edition in 8vo. Scrivener has also printed its readings in a small vol. (1863), and Hansell has added them to his edition of the New Test. (1864). See *Amer. Theol. Rev.* April, 1861; *Princeton Quar. Rev.* Jan. 1861; *Lond. (Wesl.) Rev.* Oct. 1863; *Brit. Quar. Rev.* Oct. 1863; *Stud. u. Krit.* 1864, iii; *Zeitschr. f. wissenschaft. Theologie*, iv, 1864. See MANUSCRIPTS, BIBLICAL.

Sincerity (from *sincerus*, "without wax;" honey separated from the wax, perfectly pure). In Scripture *sincere* (ἀόλος, εὐκρινής) signifies pure, without mixture. Sincerity is opposed to double-mindedness, or deceit, when the sentiments of the heart are contrary to the language of the lips. Paul (Phil. i, 10) would have the Philippians to be pure, their behavior innocent, free from offence, "that ye may be sincere and without offence till the day of Christ." Peter (2 Epist. iii, 1) exhorts the pure, sincere mind of the faithful. Paul speaks (1 Cor. v, 8) of sincerity and truth, or of purity and truth, in opposition to the leavened bread of iniquity. He reproaches the false apostles with not preaching Jesus Christ sincerely, purely, with upright and disinterested sentiments (Phil. i, 15). The reader is referred to a discussion of this subject by Gurnall, *Christian Armor*, ii, 121–148.

Sinclair, JOHN, a minister of the Methodist Episcopal Church, was born in Loudon County, Va., April 9, 1793. In his twenty-first year, while residing in Lexington, Ky., he professed conversion and joined the Church. He was received on trial in the Kentucky Conference in September, 1824, but was transferred to the Illinois Conference in 1830. Here he labored as pastor and presiding elder until 1844, when he was superannuated. This relation he sustained until 1846, when he again became effective, serving as presiding elder eight years and pastor two. He again took a superannuated relation in 1857, and made his home in Evanston until his death, in 1860 or 1861. He was delegate to the General Conference of 1844. See *Minutes of Annual Conferences*, 1861, p. 206.

Sind, a fabulous hero of the Oriental mythology, who is said to have migrated with his brother Hind to India, and to have there founded several empires.

Sindhee Version. Sindhee is a dialect spoken by the inhabitants of Sinde, an extensive country of Western India, and attached since 1839 to the Bombay presidency. As early as 1815 a translation of the Scriptures was commenced by the Serampore missionaries, but it was not till 1825 that the Gospel of Matthew was committed to press. A translation of the same gospel was also made by Capt. G. Stack, and an edition of 500 copies printed by the Bombay auxiliary of the British and Foreign Bible Society. In 1859 an edition of 580 copies of John's Gospel issued from the same source, having been executed under the care of Rev. A. Burn: 280 copies of this edition were printed in the Arabic character, and 300 copies in the Gurmukhi. In 1860 the book of Genesis, in the Arabic character, was printed, together with 600 copies of the Gospel of John, while the printing of the Acts of the Apostles was commenced by the Rev. Mr. Sheldon. According to the report of 1878 of the British and Foreign Bible Society, besides Genesis, the four Gospels and the Acts are the only parts printed, and all copies distributed amounted to 44,734. See *The Bible of Every Land*, and the *Annual Reports* of the British and Foreign Bible Society. (B. P.)

Sindhû, in Hindû mythology, one of the companions of Ganga, and, like the latter, a river.

Sindon (literally a *cotton cloth*), a word having several ecclesiastical meanings: 1. A napkin; 2. A cloth for holding and enclosing the bread offered for the holy eucharist in the Eastern church; 3. A term sometimes applied to the communion-cloth which the faithful, in certain parts of the Church, hold before them when partaking of the sacrament; 4. In the Liturgy of the Church of Milan this term is applied to the linen cloth which covers the altar-slab.

Sindonary. See **SINDON**.

Sindri, an abode in Gimle—the Scandinavian heaven—which is constructed entirely of gold.

Sindur, in Norse mythology, was one of the nine giant-virgins who together became the mothers of Heimdal by Odin.

Sinecure (*sine cura*, "without care," i. e. of souls), in ecclesiastical usage, may be either—1. A benefice of pecuniary value, a rectory, or vicarage, in which there is neither church nor population; 2. A benefice in which the rector receives the tithes, though the cure of souls, legally and ecclesiastically, belongs to some clerk; or 3. A benefice in which there are both rector and vicar, in which case the duty commonly rests with the vicar, and the rectory is called a sinecure; but no church in which there is but one incumbent is properly a sinecure. A church may be down, or the parish become destitute of parishioners; but still there is not a sinecure, for the incumbent is under an obligation of performing divine service if the church should be rebuilt or the parish become inhabited.

Sinecurist, one who holds a sinecure or is an advocate for sinecures (q. v.).

Siner, in Norse mythology, was one of the twelve famous asa-horses employed by the gods when they rode to the place of judgment by the fountain of Urdar.

Sinew (once for שֵׁנָה, a *gnawer*, i. e. *pain* [Job xxx, 17]; elsewhere גִּיד, *gid*) occurs especially in the phrase שֵׁנָה הַנֶּשֶׁה, *gid han-nashéh*, "the sinew that shrank" (Gen. xxxii, 33), i. e. the *nervus ischiadicus*, or thigh-cord (Gesenius, *Thesaur.* p. 921). Josephus renders it the *broad nerve* (νεῦρον πλατὺ, *Ant.* i, 10, 2), being that which is on the thigh (שֵׁנָה בְּהַיָּדָה), extending from the knee upwards, and in fact but a continuation of that along the shin (Rosenmüller, *Hand. d. Anatomie*, 6th ed. p. 519). Many understand by it the hamstring, or *tendo Achillis*; but this is no proper nerve nor muscle. Modern Jews, in general, regard this part, even of clean animals, to be inedible, although the Mosaic law contains no prohibition on the subject. For the Talmudic prescription see the Mishna (*Cholin*, vii). The rabbins mostly understand the sinews of the hips to be intended (see Philippon, *ad loc.*).

Sinfœtli, in Norse mythology, was a son of Sigmund by his sister Signy (q. v.). The latter had, without being recognised, submitted herself to the embraces of her brother in order that she might obtain a son in whose veins should flow the unmixed blood of Wolsung's race. That son was intended to become the avenger of her father's murder, and he justified his mother's expectations by the utmost boldness and fearlessness.

Singer (properly שָׂר, *shâr*, or some other form of שָׂר, *to sing*; occasionally of שָׂר, *to play an accompaniment*; but the "chief singer" is styled מְנַצֵּחַ, *menatséach*, the *præcentor* of the Levitical orchestra). Singing was always natural to the Hebrews, and formed part of the Levitical worship (see Schmid, *De Cantoribus Eccl. V. et N. T.* [Helmst. 1708]). See **HYMN**; **MUSIC**.

SINGERS, IN CHRISTIAN WORSHIP, one of the subordinate orders of the clergy in the early Church, which seems to have taken its rise about the beginning of the 4th century. Mention is made of them by the Council of Laodicea; and the reason assigned for instituting them seems to have been to regulate and encourage the ancient psalmody of the Church. They were afterwards called canonical or registered singers. They were also called ὑποβολαῖς, *monitors*, or *suggesters*, from their office, which was to act as præcentors of the people. Their ordination required no imposition of hands, nor solemn consecration, and might be conferred by a presbyter using this form of words: "See that thou believe in thy heart what thou singest with thy mouth, and approve in thy works what thou believest in thy heart." Their station in the church was in the *ambo*, or reading-desk. See Bingham, *Christ. Antig.* iii, 7; viii, 5. See **SINGING**.

Singhalese Religion. See **BUDDHISM**.

Singhalese Version. This version—intended for the inhabitants of the southern part of Ceylon, from Batticaloa on the east to the river Chilaw on the west, and for those of the interior—was first made when Ceylon was in the possession of the Dutch. In 1737 the Dutch governor, Van Imhoff, established a printing-press at Colombo, with the view of disseminating Christian knowledge among the natives. In 1739 an edition of the four gospels in Singhalese was completed at this press, under the care of the Rev. J. P. Wetzel, a minister at Colombo. The translation was prepared from the original Greek by the Rev. W. Konym, and was published under the title *Het Heylige Evangelium onses Heeren en Zaligmakers Jesu Christi na de Beschryvinge van de Marmen Gods en H. Evangelisten Mattheus, Marcus, Lucas, en Johannes, uyt het Oorspronkelyke Grieks*

in de Singaleese Tale Overgebracht, etc. A revised and corrected edition was published in 1780 by the Revs. Fybrands and Philipsz, who also superintended an edition of the Acts printed in 1771, and published under the title *De Handelingen der Apostelen Beschreven door den Evangelist Lucas*. For this part of the New Test. two learned Singalese natives were engaged, who prosecuted their translation under the direction of the Rev. S. Cat. In 1776 the whole New Test. was issued, while of the Old Test. only some parts were published. When, in 1812, the Colombo Auxiliary Bible Society was formed, one of the first measures adopted by the society was the examination of the Singalese version of the New Test. It was found that a thorough revision or a new translation was deemed indispensable. The work of revision progressed but slowly; and it was not till 1817 that the revised New Test. left the Colombo press. Six years later the Old Test. was printed. In the meantime, the Rev. Mr. Lambrick, of the Church Mission at Cotta, a village near Colombo, had undertaken another translation of the Singalese Scriptures, which was completed in 1834 at the expense of the Church Missionary Society. This version, which is generally distinguished as the "Cotta Version," differs from the one set forth by the Colombo Bible Society in the following particulars: "1. All the honorific terminations—that is, peculiar terminations of the verbs, nouns, and pronouns indicative of respect—used in books in the high Singalese dialect are omitted in the Cotta version. 2. Those terminations of nouns, etc., in common use in the colloquial dialect are adopted. 3. One pronoun for the second person singular (there are twelve others in use in Singalese books) is uniformly used throughout the Cotta version, whoever may be the person spoken to, human or divine. 4. Words in common use are invariably substituted for learned ones." As both versions had their merits, yet the missionaries of various denominations engaged in Ceylon came to the conclusion that one version should be for common use; and a revision committee was appointed in 1853 to prepare a new translation. In 1857 the revision of the New Test. was completed; but when that of the Old Test. will be completed it is difficult to say. Meanwhile it has been found necessary to print more than one edition of the Old Test. according to the previously existing versions. See Le Long-Masch, *Bibliotheca Sacra* (Halæ, 1778), II, i, 210 sq.; *The Bible of Every Land*, p. 147 sq.; the *Annual Reports* of the British and Foreign Bible Society, 1857 sq. (B. P.)

Singing, an ordinance of divine worship, in which we express our joy in God, and gratitude for his mercies. It has always been a branch both of natural and revealed religion in all ages and periods of time. It was a part of the worship of the heathen. It was practiced by the people of God before the giving of the law of Moses (Exod. xv); also under the ceremonial law. Under the Gospel dispensation, it is particularly enjoined (Col. iii, 16; Eph. v. 19). It was practiced by Christ and his apostles (Matt. xxvi, 30), and in the earliest times of Christianity. The praises of God may be sung privately in the family, but chiefly in the house of God; and should be attended to with reverence, sincerity, joy, gratitude, and with the understanding (1 Cor. xiv, 15).

From the apostolic age singing was always a part of divine service, in which the whole body of the Church joined together; and it was the decay of this practice that first brought the order of singers into the Church. The Council of Laodicea (canon 15) prohibited singing by the congregation; but this was a temporary provision, designed only to restore and revive the ancient psalmody. We find that in after-ages the people enjoyed their ancient privilege of singing all together.

Among the Anti-Pædobaptists, during the early part of their existence, psalmody was generally excluded as a human ordinance; but some congregations having adopted it about the beginning of the 18th century, a

violent controversy was excited. About the middle of the century, however, the praises of God were sung in every Anti-Pædobaptist church.

It was customary, early in the present century, for the precentor in the Church of Scotland to read the psalm line by line as it was sung. When the practice of continuous singing was introduced, it was a source of great and numerous congregational disturbances, and it was popularly stigmatized as an innovation. As to the use of instrumental music as an accompaniment to singing, see CHOIR; MUSIC; SINGER.

Singing-cakes, a name given formerly among Romanists to the consecrated wafers used in private masses.

Singing-schools were established for the instruction of the order of singers as early as the 6th century, and became common in various parts of Europe, particularly in France and Germany. These schools were very much patronized by Gregory the Great, under whom they gained great celebrity. From them originated the famous *Gregorian Chant* (q. v.), a plain system of Church music. The prior, or principal, of these schools was a man of great consideration and influence. The name of this officer at Rome was *archicantor ecclesiæ Romane*, and, like that of *prelatus cantor* in their chapters and collegiate churches, it was a highly respectable and lucrative office. See Coleman, *Christian Antiquities*.

Single Combat has always been, among semi-civilized nations, a favorite resort to decide a dispute without the effusion of much blood. Classical history abounds with instances. The Bible also gives a few noteworthy cases, of which the contest between David (q. v.) and Goliath is the most remarkable. Similar customs still prevail among the Arabs (Burckhardt, *Notes on the Bedouin*, p. 174). The practice has in modern times degenerated into that of *duelling*. See the monographs on the subject cited by Volbeding, *Index Programmatum*, p. 160.

Single Eye is a phrase used in the A. V. (Matt. vi, 29; Luke xi, 34) for ὁφθαλμὸς ἀπλούς, an *unclouded* vision, rather than a single aim. See the commentators *ad loc.*, and the monographs of Zorn in the *Miscell. Duisb.* ii, 240; and Sommel (Lond. and Goth. 1787).

Singlin, ANTOINE, a French theologian, was born at Paris early in the 17th century, and by the advice of Vincent de Paul embraced the monastic life at the age of twenty-two. After learning Latin in the Collège de Paris, he entered the Hôpital de Pitié to teach the catechism to children. Later he attached himself to the abbé of St. Cyran, who induced him to become a priest, and procured him a nomination as confessor to the Port-Royal recluses, to which duty he joined that of superior of two of their houses. His timidity at length caused him to seek a retreat with Madame de Longueville, where he died, April 17, 1664. He was possessed of moderate learning, but sound sense, and a good knowledge of the Scriptures and the fathers—qualities which he showed in his *Instructions Chrétiennes* (Paris, 1671–73, and later), being a collection of his sermons, which are highly spoken of. He is also the author of several letters in the *Nouveaux Mémoires de Port-Royal*. See his *Life* prefixed to Goujet's edition of the former work.

Singular, a word used by old writers in the sense of *incomparable, matchless, of unequalled excellence*. The following examples are taken from king Edward VI's *Primer*: "Breathe into my heart by thy Holy Spirit this most precious and *singular* gift of faith, which worketh by charity. . . that when thou shalt call me out of this careful life [a life full of cares], I may enjoy that thy most *singular* and last benefit, which is everlasting glory through Jesus Christ our Lord."—Staunton, *Dict. of the Church*, s. v.

Sinim (Heb. *Sinim*, סִינִים, prob. of foreign etymology; Sept. *Πέσαι*; Vulg. *australis*), a people whose country ("the land of Sinim") is noticed in Isa. xlix, 12 as being at the extremity of the known world, either in the south or east. The majority of the early interpreters adopted the former view, but the Sept., in giving *Persians*, favors the latter, and the weight of modern authority is thrown into the same scale, the name being identified by Gesenius, Hitzig, Knobel, and others with the classical *Sinæ*, the inhabitants of the southern part of China. No locality in the south equally commends itself to the judgment: Sin, the classical Pelusium, which Bochart (*Phaleg*, iv, 27) suggests, is too near, and Syene (Michaelis, *Spicil.* ii, 32) would have been given in its well-known Hebrew form. There is no *a priori* improbability in the name of the Sinæ being known to the inhabitants of Western Asia in the age of Isaiah; for though it is not mentioned by the Greek geographers until the age of Ptolemy, it is certain that an inland commercial route connected the extreme east with the west at a very early period, and that a traffic was maintained on the frontier of China between the Sinæ and the Scythians, in the manner still followed by the Chinese and the Russians at Kiachta. If any name for these Chinese traders travelled westward, it would probably be that of the Sinæ, whose town Thina (another form of the Sinæ) was one of the great emporiums in the western part of China, and is represented by the modern *Tsin* or *Tin*, in the province of *Shensi*. The Sinæ attained an independent position in Western China as early as the 8th century B.C., and in the 3d century B.C. established their sway under the dynasty of Tsin over the whole of the empire. The Rabbinical name of China, *Tsin*, as well as "China" itself, was derived from this dynasty (Gesenius, *Thesaur.* s. v.).—Smith. This ancient people were known to the Arabians by the name of *Sin*, and to the Syrians by that of *Tini*; and a Hebrew writer may well have heard of them, especially if sojourning at Babylon, the metropolis, as it were, of all Asia. This name appears to have been given to the Chinese by other Asiatics; for the Chinese themselves, though not unacquainted with it, do not employ it, either adopting the names of the reigning dynasties, or ostentatiously assuming high-sounding titles, e. g. *Tchungkue*, "central empire." But when the name was thus given by other nations, and whence it was derived, is uncertain. The opinion of those writers is possibly correct who suppose that the name סִינִים, *Sineses*, came from the fourth dynasty, called Tshin, which held the throne from B.C. 249 to 206 (Du Halde, *Descript. de la Chine*, i, 1, 306; A. Rémusat, *Nouv. Mélanges Asiatiques*, ii, 334 sq.; Klaproth, *Journ. Asiat.* x, 53 sq.). A people called Tshinas are spoken of in the laws of Menu, and the name of this dynasty may have been known among foreign nations long before it acquired the sovereign power over all China. See the *Zeitschr. für wissenschaftl. Theol.* 1863, vol. iv. See CHINA.

Sinir, in Norse mythology, was one of the asahorses.

Sinis, two characters in Grecian mythology.

1. The son of Polypemon, Pemon, or Poseidon, by Sylea, who was surnamed Pitycampe (fir-bender), or Procrustes. He dwelt on the isthmus of Corinth as a robber, and destroyed the travellers who fell into his power by fastening them to the tops of two fir-trees which he had bent down, and which he then permitted to spring back to their upright condition. He was himself killed by Theseus in the same manner.

2. A son of Neptune and Anaxo, and brother to Cercyon. His mother dwelt in Troezen. Theseus murdered her sons and deflowered her daughters, in accordance with the custom of victors at that day.

Si'nite (Heb. collectively with the art. *has-Sini'*,

סִינִי, probably of local etymology; Sept. *Ἀσενναῖος*; Vulg. *Sinaeus*), a tribe of Canaanites (Gen. x, 17; 1 Chron. i, 15) whose position is to be sought for in the northern part of the Lebanon district. Various localities in that district bear a certain amount of resemblance to the name, particularly *Sima*, a mountain fortress mentioned by Strabo (xvi, 755); *Sinum* or *Sini*, the ruins of which existed in the time of Jerome (*Quest. Gen. loc. cit.*); *Syn*, a village mentioned in the 15th century as near the River Arca (Gesenius, *Thesaur.* p. 948); and *Dumiyeh*, a district near Tripoli (Robinson, *Researches*, ii, 494). The Targums of Onkelos and Jonathan give *Orthosia*, a town on the coast to the north-east of Tripolis. See CANAANITE.

Sinlessness OF CHRIST. See CHRIST, SINLESSNESS OF.

Sinðë, in Greek mythology, was an Arcadian nymph who brought up the god Pan, and from whom he was named Sinoëis.

Sin-offering (חַטָּאת, *chattâth*; Sept. *ἀμαρτία*, τὸ τῆς ἀμαρτίας, περὶ ἀμαρτίας; Vulg. *pro peccato*). The sin-offering among the Jews was the sacrifice in which the ideas of propitiation and of atonement for sin were most distinctly marked. It is first directly enjoined in Lev. iv, whereas in ch. i-iii the burnt-offering, meat-offering, and peace-offering are taken for granted, and the object of the law is to regulate, not to enjoin, the presentation of them to the Lord. Nor is the word *chattâth* applied to any sacrifice in ante-Mosaic times. Its technical use in Gen. iv, 7 is asserted, and supported by high authority. But the word here probably means (as in the Vulgate and the A. V.) "sin." The fact that it is never used in application to any other sacrifice in Genesis or Exodus alone makes the translation "sin-offering" here very improbable. It is therefore peculiarly a sacrifice of the law, agreeing with the clear definition of good and evil, and the stress laid on the "sinfulness of sin," which were the main objects of the law in itself. The idea of propitiation was, no doubt, latent in earlier sacrifices, but it was taught clearly and distinctly in the Levitical sin-offering. The ceremonial of the sin-offering is described in Lev. iv and vi. The animal—a young bullock for the priest or the congregation, a male kid or lamb for a ruler, a female kid or lamb for a private person, in all cases without blemish—was brought by the sacrificer to the altar of sacrifice; his hand was laid upon its head (with, as we learn from later Jewish authorities, a confession of sin, and a prayer that the victim might be its expiation); of the blood of the slain victim some was then sprinkled seven times before the veil of the sanctuary, some put on the horns of the altar of incense, and the rest poured at the foot of the altar of sacrifice. The fat (as the choicest part of the flesh) was then burned on the altar as a burnt-offering; the remainder of the body, if the sin-offering were that of the priest himself or of the whole congregation, was carried out of the camp or city to a "clean place" and there burned; but, if the offering were that of an individual, the flesh might be eaten by the priests alone in the holy place, as being "most holy."

The "trespass-offering" (עֲוֹנוֹת; πλημμελεία, τὸ τῆς πλημμελείας; *pro delicto*) is closely connected with the sin-offering in Leviticus, but at the same time clearly distinguished from it, being in some cases offered with it as a distinct part of the same sacrifice, as, for example, in the cleansing of the leper (ch. xiv). The victim was in each case to be a ram. At the time of offering, in all cases of damage done to any holy thing, or to any man, restitution was made with the addition of a fifth part to the principal; the blood was sprinkled round about upon the altar, as in the burnt-offering, the fat burned, and the flesh disposed of as in the sin-offering. The distinction of ceremonial clearly indicates a difference in the idea of the two sacrifices. The nature of that difference is still a subject of great controversy. Look-

ing first to the derivation of the two words, we find that **חטאת** is derived from **חטא**, which is, properly, to "miss" a mark, or to "err" from a way, and, secondarily, to "sin," or to incur "penalty;" that **עולה** is derived from the root **עלה**, which is, properly, to "fail," having for its "primary idea negligence, especially in gait" (Gesenius). It is clear that, so far as derivation goes, there appears to be more of reference to general and actual sin in the former, to special cases of negligence in the latter. Turning next to the description, in the book of Leviticus, of the circumstances under which each should be offered, we find one important passage (Lev. v, 1-13) in which the sacrifice is called first a "trespass-offering" (ver. 6), and then a "sin-offering" (ver. 7, 9, 11, 12). But the nature of the victims in ver. 6 agrees with the ceremonial of the latter, not of the former; the application of the latter name is more emphatic and reiterated; and there is at ver. 14 a formal introduction of the law of the trespass-offering, exactly as of the law of the sin-offering in iv, 1. It is therefore safe to conclude that the word **עולה** is not here used in its technical sense, and that the passage is to be referred to the sin-offering only. See TRESPASS-OFFERING.

We find, then, that the sin-offerings were—

A. REGULAR.

(1.) *For the whole people*, at the New Moon, Passover, Pentecost, Feast of Trumpets, and Feast of Tabernacles (Numb. xxvii, 15-xxix, 38); besides the solemn offering of the two goats on the Great Day of Atonement (Lev. xvi).

(2.) *For the priests and Levites* at their consecration (Exod. xxix, 10-14, 36); besides the yearly sin-offering (a bullock) for the high-priest on the Great Day of Atonement (Lev. xvi).

(3.) To these may be added the sacrifice of the red heifer (conducted with the ceremonial of a sin-offering), from the ashes of which was made the "water of separation," used in certain cases of ceremonial pollution (Numb. xix).

B. SPECIAL.

(1.) *For any sin of "ignorance"* against the commandment of the Lord, on the part of priest, people, ruler, or private man (Lev. iv).

(2.) *For refusal to bear witness* under adjuration (Lev. v, 1).

(3.) *For ceremonial defilement* not wilfully contracted (Lev. v, 2, 3), under which may be classed the offerings at the purification of women (xii, 6-8), at the cleansing of leprosy (xiv, 19, 31) or the uncleanness of men or women (xv, 15, 30), on the defilement of a Nazirite (Numb. vi, 6-11) or the expiration of his vow (ver. 16).

(4.) *For the breach of a rash oath*, the keeping of which would involve sin (Lev. v, 4).

The trespass-offerings, on the other hand, were always special, as—

(1.) *For sacrilege "in ignorance,"* with compensation for the harm done, and the gift of a fifth part of the value, besides, to the priest (Lev. v, 15, 16).

(2.) *For ignorant transgression* against some definite prohibition of the law (Lev. v, 17-19).

(3.) *For fraud, suppression of the truth, or perjury* against man, with compensation, and with the addition of a fifth part of the value of the property in question to the person wronged (Lev. vi, 1-6).

(4.) *For rape of a betrothed slave* (Lev. xix, 20, 21).

(5.) *At the purification of the leper* (Lev. xiv, 12), and the *polluted Nazirite* (Numb. vi, 12), offered with the sin-offering.

From this enumeration it will be clear that the two classes of sacrifices, although distinct, touch closely upon each other, as especially in B (1.) of the sin-offering, and (2.) of the trespass-offering. It is also evident that the sin-offering was the only regular and general recognition of sin in the abstract, and accordingly was far more solemn and symbolical in its ceremonial; the trespass-offering was confined to special cases, most of which related to the doing of some material damage, either to the holy things or to man, except in (5.), where the trespass-offering is united with the sin-offering. Josephus (*Ant.* iii, 9, 3) declares that the sin-offering is presented by those "who fall into sin in ignorance" (*κατ' ἀγνοίαν*), and the trespass-offering by "one who has sinned and is conscious of his sin, but has no one to convict him thereof." From this it may be inferred (as by Winer and others) that the former was used in cases of

known sin against some definite law, the latter in the case of secret sin, unknown, or, if known, not liable to judicial cognizance. Other opinions have been entertained, widely different from, and even opposed to, one another. The opinions which suppose one offering due for sins of omission, and the other for sins of commission, have no foundation in the language of the law. Others, with more plausibility, refer the sin-offering to sins of pure ignorance, the trespass-offering to those of a more sinful and deliberate character; but this does not agree with Lev. v, 17-19, and is contradicted by the solemn contrast between sins of ignorance, which might be atoned for, and "sins of presumption," against which death without mercy is denounced in Numb. xv, 30. A third opinion supposes the sin-offering to refer to sins for which no material and earthly atonement could be made, the trespass-offering to those for which material compensation was possible. This theory has something to support it in the fact that in some cases (see Lev. v, 15, 16; vi, 1-6) compensation was prescribed as accessory to the sacrifice. Others seek more recondite distinctions, supposing, e. g., that the sin-offering had for its object the cleansing of the sanctuary or the commonwealth, and the trespass-offering the cleansing of the individual; or that the former referred to the effect of sin upon the soul itself, the latter to the effect of sin as the breach of an external law. Without attempting to decide so difficult and so controverted a question, we may draw the following conclusions:

First, that the sin-offering was far the more solemn and comprehensive of the two sacrifices.

Secondly, that the sin-offering looked more to the guilt of the sin done, irrespective of its consequences, while the trespass-offering looked to the evil consequences of sin, either against the service of God or against man, and to the duty of atonement, as far as atonement was possible. Hence the two might with propriety be offered together.

Thirdly, that in the sin-offering especially we find symbolized the acknowledgment of sinfulness as inherent in man, and of the need of expiation by sacrifice to renew the broken covenant between man and God.

There is one other question of some interest, as to the nature of the sins for which either sacrifice could be offered. It is seen at once that in the law of Leviticus most of them, which are not purely ceremonial, are called sins of "ignorance" (see Heb. ix, 7); and in Numb. xv, 30 it is expressly said that while such sins can be atoned for by offerings, "the soul that doeth aught presumptuously" (Heb. with a high hand) "shall be cut off from among his people. . . . His iniquity shall be upon him" (comp. Heb. x, 26). But there are sufficient indications that the sins here called "of ignorance" are more strictly those of "negligence" or "frailty," repented of by the unpunished offender, as opposed to those of deliberate and unrepentant sin. The Hebrew word itself and its derivations are so used in Psa. cxix, 67 (Sept. *ἡπλημύλησα*); 1 Sam. xxvi, 21 (*ἡγνόηκα*); Psa. xix, 13 (*παρὰ πτώματα*); Job xix, 4 (*πλάνος*). The words *ἡγνόησα* and *ἄγνοια* have a corresponding extent of meaning in the New Test.; as when in Acts iii, 17, the Jews, in their crucifixion of our Lord, are said to have acted ignorantly (*κατ' ἀγνοίαν*); and in Eph. iv, 18; 1 Pet. i, 14 the vices of heathenism, done against the light of conscience, are still referred to *ἄγνοια*. The use of the word (like that of *ἀγνωμονεῖν* in classical Greek) is found in all languages, and depends on the idea that goodness is man's true wisdom, and that sin is the failing to recognise this truth. If from the word we turn to the sins actually referred to in Lev. iv, v, we find some which certainly are not sins of pure ignorance; they are, indeed, few out of the whole range of sinfulness, but they are real sins. The later Jews (see Ostram, *De Sacrificiis*) limited the application of the sin-offering to negative sins, sins in ignorance, and sins in action, not in thought, evidently conceiving it to apply to actual sins, but to sins of a secondary order.

In considering this subject it must be remembered that the sacrifices of the law had a temporal as well as a spiritual significance and effect. They restored an

offender to his place in the commonwealth of Israel; they were, therefore, an atonement to the King of Israel for the infringement of his law. It is clear that this must have limited the extent of their legal application; for there are crimes for which the interest and very existence of a society demand that there should be no pardon. But so far as the sacrifices had a spiritual and typical meaning, so far as they were sought by a repentant spirit as a sign and means of reconciliation with God, it can hardly be doubted that they had a wider scope and a real spiritual effect, so long as their typical character remained. See SACRIFICE.

For the more solemn sin-offerings, see DAY OF ATONEMENT; LEPROSY, etc.

Sinold, PHILIP BALTHASAR, a German jurist, was born near Giessen, May 5, 1657, studied at Jena, and died at Laubach, March 6, 1742. He wrote many devotional books under the assumed name Ludwig Ernst von Faramund and Amadeus Kreuzberg. His *Gottselige Betrachtungen auf alle Tage des ganzen Jahres* has been edited anew by Rev. C. J. Heinersdorf, with a preface of Dr. Ahlfeld (Halle, 1856). He also composed about seventy-two hymns, one of which, *Lebst du in mir, o wahres Leben*, has been translated into English, "If Thou, True Life, wilt in me live," by Miss Winkworth, in *Lyra German.* i, 19. See Wenzel, *Hymnop.* iv, 87, 91; Neubaur, *Nachrichten* (Züllichau, 1743), p. 1119 sq.; Jöcher, *Allgem. Gelehrten-Lexikon*, s. v.; Koch, *Gesch. d. deutsch. Kirchenlieder*, v, 404 sq.; Knapp, *Evangel. Liederschatz*, p. 1345, s. v. (B. P.)

Sinon, in Grecian mythology, was a son of Æsiurus or Sisyphus, grandson to Autolycus, and related to Odysseus, and was said to have permitted the Trojans to make him prisoner in order to persuade them to admit the wooden horse within their walls. He represented that it had been constructed in atonement for the robbery of the Palladium, and succeeded in obtaining its admission into Troy, after which he gave the preconcerted signal and opened the door in the horse through which the Greeks poured forth and took possession of the city.

Sinōpē, in Grecian mythology, was a daughter of Asopus and Metope, or of Ares and Ægina or Parnassa. Apollo became enamoured of her beauty and carried her off from Beotia to Paphlagonia, where she brought forth Syrus and gave her name to the town of Sinope.

Sinriod, in Norse mythology, was one of the four wives of king Hioward, who were accounted the most beautiful women on the earth. She became the mother of Hylming.

Sinsart, BENOIT, a French controversialist, was born at Sedan in 1696, and after having served as an engineer in Holland, embraced a monastic life in 1716, entering the congregation of the Benedictines at St. Vaune. He taught philosophy and theology at the abbey of Senones, passed into that of St. Gregory at Münster, and became abbot of the latter in 1745, where he died June 22, 1776. Sinsart was a well-educated, laborious man. He wrote several religious works, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

Sintenis, a name common to a number of German theologians, of whom we mention the following:

1. CHRISTIAN FRIEDRICH, was born at Zerbst in 1750, where he was appointed deacon in 1773. In 1791 he was made professor of theology and metaphysics, and died in 1820 as member of consistory and pastor of Trinity Church. He published, *Theologische Schriftsgänge für Prediger* (Leipsic, 1808):—*Elpizon, oder meine Fortdauer nach dem Tode* (Dantzig, 1792, 3 pts.), and a number of other books. See Von Schütz's biography of Sintenis (Zerbst, 1820); Winer, *Handbuch*, i, 290, 410, 413, 470, 477, 840; ii, 90, 138, 141, 227, 280, 353, 356, 366, 398, 779; *Theol. Universal-Lexikon*, s. v.; *Regensburger*

Conversations-Lexikon, s. v.; Fürst, *Bibl. Judaica*, iii, 340.

2. JOHANN CHRISTIAN SIGISMUND, brother of Christian, was born at Zerbst in 1752. In 1785 he was appointed pastor at Dornburg in Anhalt; in 1794 he was called to Roslau; in 1798 he was appointed inspector of church and school, and died in 1829. He published, *Oeffentliche katechetische Prüfungen nebst Schlussreden* (Halle, 1803-6, 3 vols.). See the *Regensburger Conversations-Lexikon*, s. v.; Winer, *Handbuch*, ii, 269, 780; *Theol. Universal-Lexikon*, s. v.

3. KARL HEINRICH, brother of the above, was born in 1744 at Zerbst, and appointed in 1771 rector at Torgau. In 1783 he was called to Zittau, and died at Zerbst in 1816. He wrote, *Theophron* (Zerbst, 1800):—*Lehrbuch der moralischen Vernunftreligion* (Altenburg, 1802):—*Geron und Palämon* (Zerbst, 1803). See the *Regensburger Conversations-Lexikon*, s. v.; *Theol. Universal-Lexikon*, s. v.

4. WILHELM FRANZ, son of Johann Christian Sigismund, was born April 26, 1794, at Dornburg in Anhalt. He studied at Zerbst and Wittenberg. In 1824 he was called to Magdeburg as second preacher of the Church of the Holy Ghost, and in 1831 he was made *pastor primarius*. His rationalistic views brought him in conflict with his ecclesiastical superior. The consequence was that the rationalistic preachers organized a union of so-called *Friends of Light* in 1841. Sintenis died Jan. 29, 1859, having retired some years before from the ministry. He published a great many sermons and discourses, which are enumerated in Zuchold, *Bibliotheca Theologica*, ii, 1231 sq. See also *Theol. Universal-Lexikon*, s. v.; Kurtz, *Lehrbuch der Kirchengeschichte*, § 175, 1. (B. P.)

Sinto, Sintūism. See SHINTO.

Siofn or Siofna, in Norse mythology, was the goddess of youth, gracefulness, and the first motions of love. She excites love in the breasts of young men and maidens and disposes them to mutual affection; but she is not to be confounded with Freya, the proper goddess of love.

Sí'on, MOUNT, the name of two hills in the Scriptures.

1. (Heb. *har Sion*, הַר שִׁיּוֹן; Samar. *הר שִׁיּוֹן*; Sept. *τὸ ὄρος τοῦ Σιών*; Vulg. *mons Sion*.) One of the various names of Mount Hermon which are fortunately preserved, all not improbably more ancient than "Hermon" (q. v.) itself. It occurs in Deut. iv. 48 only, and is interpreted by the lexicographers to mean "lofty." Fürst conjectures that these various appellations were the names of separate peaks or portions of the mountain. Some have supposed that Zion in Ps. cxxxiii, 3 is a variation of this Sion; but there is no warrant for this beyond the fact that so doing overcomes a difficulty of interpretation in that passage.

2. (*τὸ ὄρος Σιών*.) The Greek form of the Hebrew name Ziph (Tsion), the famous Mount of the Temple (1 Macc. iv, 37, 60; v, 54; vi, 48, 62; vii, 83; x, 11; xiv, 27; Heb. xii, 22; Rev. xiv, 1). In the books of Maccabees the expression is always "Mount Sion." In the other Apocryphal books the name "Sion" is alone employed. The New Test. usually employs the simple form "Sion" (Matt. xxi, 5; John xii, 15; Rom. ix, 33; xi, 26; 1 Pet. ii, 6). Further, in the Maccabees the name unmistakably denotes the mount on which the Temple was built; on which the Mosque of the Akssa, with its attendant mosques of Omar and the Mogrebins, now stands. The first of the passages just quoted is enough to decide this. If it can be established that Zion in the Old Test. means the same locality with Sion in the books of Maccabees, one of the greatest puzzles of Jerusalem topography will be solved.

Sion, NUNS OF. These nuns belonged to the order of St. Bridget, and had their house at Sion, near Brentford, Middlesex. It was broken up by

Henry VIII, reassembled by Mary, and finally dispersed under Elizabeth. Many of the nuns settled in Lisbon. In 1810 the house there was broken up, and many of its members sought a refuge in England, some of whom were living in 1825 in Staffordshire.

Sionita. See GABRIEL SIONITA.

Sionites, a sect which arose in Norway in the first half of the 18th century. They called themselves Sionites, as professing to set forth the reign of the king of Sion, of whom they claimed to be children, and with whom they were in such close communion that their acts were identified with his. They also took the name of *Pilgrims and Strangers*. It was their custom to wear long beards, a linen girdle, and to have the word "Sion," with some mystical character, embroidered in red on their sleeves. They delivered passports to their emissaries, whom they charged to aid in establishing the kingdom of Sion. One of their number, George Kleinson, gave out that he was inspired with the spirit of prophecy, and under his guidance they repudiated the baptism of their converts, and rebaptized them when they entered their community. Jeren Bolle, who had studied theology at Copenhagen, was their minister, and celebrated their marriages. Their principal residence in Norway was Bragernes, from which they were exiled in 1743, and obliged to settle at Altona. King Christian VI, in August of the same year, issued orders for dissolving the community on account of its disobedience to the laws, and its pretensions of setting up a kingdom which claimed to be independent. Some chose to emigrate, while others gave up their peculiar customs and adopted those of the country. See Grégoire, *Hist. des Sectes Relig.*; Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.

Siph'moth (Heb. *Siphmoth'*, שִׁפְמוֹת, *fruitful* [Fürst]; Sept. *Sapei* v. r. *Σαφαμός*; Vulg. *Sephumoth*), one of the places in the south of Judah which David frequented during his freebooting life, and to his friends in which he sent a portion of the spoil taken from the Amalekites (1 Sam. xxx, 28). It is not named by Eusebius or Jerome. It is perhaps the present ruined site *Kasi es-Sir* in a wady of the same name not far south-east of Arair, or Aroer (Palmer, *Desert of the Exodus*, p. 341).

Si'phori, a sect found under this name in Gennadius Massiliensis, but it is supposed to be a misreading for SACOPHORI (q. v.).

Siphra (also compounded BE-SIPHRA, DE-SIPHRA), from the Heb. סִפְרָה, "a book," is an expression used by the Masorites to denote a certain book to which reference is made, and it is generally quoted with the prefix ב, and ר, בספרא, בספרא, i. e. also abbreviated in בספ. Thus, on וכל in Gen. ii, 5, the Masora Parva remarks בספרא בספרא וכל, i. e. "the word וכל occurs five times as the beginning of a verse in this book," viz. Genesis. Where books consist of two, as Samuel, Kings, Ezra, and Chronicles [Ezra and Nehemiah forming, according to the Jewish canon, but one book], they are only quoted as one. Thus, on הולא in 1 Kings ii, the Masorah remarks בספרא בספרא וז, i. e. "the word הולא occurs seventeen times written *plene* in that book," i. e. in 1 and 2 Kings. The same is the case with the twelve minor prophets, which are also regarded as one book. Thus, on כה אמר in Amos iii, 12, the Masoretic note is ה' בטעם בספרא, i. e. "the word כה אמר occurs five times in that book [viz. in the twelve minor prophets] with the accent." Hence the Masora Magna laid down the following rule: נקוט האי כלל בדרך כל היכא דאמרין במסרה בחרי עשר בספרא פירושו כל דאמרין במסרה בחרי עשר בספרא, i. e. "take this rule into thine hand: where in the Masorah the twelve minor prophets are

spoken of as 'in the book,' the whole book of the minor prophets is to be understood." Thus, on אבותיכם in Zech. i, 2 the note is מלאים בספרא, i. e. "the word אבותיכם is written three times *plene* in the book," viz. in the minor prophets; or ואם in xiv, 18, רפ, בספרא, i. e. "ואם occurs three times at the beginning of a verse in the book," i. e. not in Zechariah alone, but also in all the other books constituting the minor prophets. It must, however, be observed that when the Masora Parva on the word אוחם in Lev. xv, 29 remarks בספרא בספרא מלאים בספרא, i. e. "there are thirty-nine instances where אוחם is written *plene* in this book," viz. in the Pentateuch, this is a mistake, since בספרא is never used for the "Pentateuch," but always בתורה. With the servile דספרא we read on Gen. xxxiv, 25, on the word פטחין באתנחתא דספרא, פטחין, i. e. "it is one of the words written with a *Pattach* and *Athnach* in that book." To understand this remark, we must call attention to the laws of the vowel-points, viz. that when *Athnach* and *Soph-pasuk* come under *Pattach* and *Segol*, they convert the latter into a long *Kamets*. Some instances, however, are left in each book of the Bible which have not been thus converted, and these are called פתח דספרא = *Pattach de-Siphra*, i. e. "*Pattach* of the book;" and to this the Masoretic remark alludes. See Buxtorf, *Tiberius seu Commentarius Massoreticus*, p. 262 sq.; Levita, *Massoreth Ha-Massoreth* (ed. Ginsburg), p. 234 sq., 197; Frensdorff, *Massora Magna*, p. 9 sq. (B. P.).

Sip'pai (Heb. *Sippay'*, סִפְרִי, *my bowls or sills*; Sept. Σαφόρ v. r. Σαφφί; Vulg. *Saphai*), one of the sons of the Rephaim, or "the giants," slain by Sibbechai the Hushathite at Gezer (1 Chron. xx, 4), called in the parallel passage (2 Sam. xxi, 18) by the equivalent name SAPH (q. v.).

Siprōētēs, in Grecian mythology, was a Cretan youth who accidentally observed Diana while the goddess was bathing, and who was accordingly transformed into a girl.

Sipylus, in Grecian mythology, was one of the sons of Amphion and Niobe, who vainly tried to avoid the fatal arrows of Apollo (Apollod. iii, 5, 6; Ovid, *Met.* vi, 231).

Si quis (Lat. *if any one*), the name of a notice, so called from its first two words, put forth for any objector to dispute the fitness of a candidate for holy orders. It was formerly posted up on the church doors, but now is read from the altar, and is as follows: "Notice is hereby given that A B, now resident in this parish, intends to offer himself a candidate for the holy office of deacon (or priest) at the ensuing ordination of the lord bishop of —, and if any person knows any just cause or impediment for which he ought not to be admitted into holy orders, he is now to declare the same, or to signify the same forthwith to the bishop." In the case of a bishop, the *si quis* is affixed to the door of Bow Church by an officer of the Court of Arches. This notice corresponds to the *predicatio* of the primitive Church and the *epikeruzia* of Chalcedon (451). See Eadie, *Eccles. Cyclop.* s. v.; Walcott, *Sac. Archaeol.* s. v.

Sir. See THORN.

Sir (as the English of *dominus*) was the title adopted by priests, as "dom" by monks, and in consequence they were commonly called Sir Johns. There were three sirs—sir king, sir priest, and sir knight. At the Reformation it was the title of those in orders, but not graduated—those who had graduated being known as *magisters* (masters).

Sira (BEN-), ALPHABET OF. Under the title of "Alphabet of Ben-Sira" (סִירָא), there exists a collection of proverbs in Hebrew and

Chaldee, which is of a later date than those commonly ascribed to Joshua ben-Sirach. In the preface ben-Sira is called the son of Jeremiah. Among these sayings there are some genuine fragments, with much that is worthless. As they offer parallels to the book known under the name of "Ecclesiasticus" (q. v.), we will give them here:

The First or Chaldee Alphabet of Ben-Sira.

1. Give care no place in thy heart, for many has care slain (comp. Eccles. xxx, 23).
2. Let a son who does not conduct himself as a son swim away on the water (i. e. leave him to himself).
3. Pick the bone which has fallen to thy share, whether it be good or bad (i. e. be content with what thou hast).
4. Gold requires to be beaten, and a boy requires chastisement.
5. Be good, and withdraw not thine hand from him who is good.
6. Woe to the wicked, and woe to his companions.
7. Cast thy bread on the waters or cast it on the dry land; at last thou wilt find it again (comp. Eccles. xi, 1).
8. Hast thou seen a black donkey? Neither a black nor a white one (i. e. do not be inveigled in matters of which you are ignorant).
9. Do not good to the evil (person), and evil will not be done thee.
10. The bride enters her chamber, and knows not what may happen to her.
11. To a wise man a nod, to a fool a kick.
12. He who honors a person that despises him is like an ass.
13. One burning light sets fire to many fields of corn.
14. You must run a hundred times to a good and one hundred thousand times to a bad cautioner.
15. Separate your table, and quarrels will cease.
16. May good sons fall to thy lot, if thou art obliged to carry on business.
17. If your goods are at hand, you may eat of them; if they are at a distance, they will eat you.
18. Deny not an old friend (comp. Eccles. ix, 14).
19. You may have sixty counsellors, but do not give up your own counsel.
20. Always appear to be full, and not to have been hungry and afterwards to have become full.

The Second or Hebrew Alphabet of Ben-Sira.

1. Woe to him who follows his eyes, although he knows that they are the children of seduction, and that he will gain nothing by them.
2. Every person likes male children, but alas for the parent of daughters!
3. Keep at a distance from a bad woman, who by her tongue rules over thee, for a bad woman is like to rabid dogs. Her gates are closed even when she talks mildly.
4. Withdraw thy countenance from evil companions; walk not in the way with them; refrain thy foot from their path, lest thou be caught in their snare.
5. My son, conceal thy money during thy life; keep it secret, and give it not to thine heirs till the day of thy death (comp. Eccles. xxxiii, 20, 24).
6. Procure property, a good wife who fears the Lord, and increase thy children—even though they were a hundred.
7. Withdraw from bad neighbors and be not reckoned one of their company, for their feet run to evil and make haste to shed blood. But still have pity on thy companions, even if they are wicked, and give them part of thy food, for they will bear witness for thee when thou standest in the judgment.
8. Gain gold and goods, but tell not thy wife where they are, even although she be a good wife (comp. Eccles. xxxiii, 20).

(We have omitted three proverbs belonging to the second alphabet as being more or less unfit for translation.)

The alphabet was first published at Constantinople, s. a.; then at Venice (1544, and often). In Hebrew and Latin they are given in Bartolocci *Bibl. Rabbinica*, i, 684, and were also edited in Hebrew and Latin with annotations by Fagius (Isny, 1542); in Latin they are given in Von Stein, *Comment. ad Ecclesiast.* p. 29; in Judeo-German they were published by Salomo ben-Jacob (Amst. 1660). They are also given by Duke, *Rabbinische Blumenlese* (Leips. 1844), p. 31 sq. See also Zunz, *Gottesdienstliche Vorträge*, p. 105. (B. P.)

Sirach (Σιράχ, Σιράχ; in Rabbinic writers *Sira*, שִׁירָא), the father of Jesus (Joshua), the writer of the Hebrew original of the book of Ecclesiasticus (Eccles. prol. i, 1; i, 27). See Winer, *De Utriusque Siracide Ætate* (Erlang. 1832). See ECCLESIASTICUS; JESUS THE SON OF SIRACH.

Si'rah (Heb. with the art. *has-Sirah'*, הַסִּירָה, *the turning* [perhaps, as Furst suggests, from a khan in the vicinity]; Sept. ὁ Σειράμ; Vulg. *Sira*), a well (בֵּר; Sept. φεσάρ; Vulg. *cistern*) marking the spot from which Abner was recalled by Joab to his death at Hebron (2 Sam. iii, 26). It was apparently on the northern road from Hebron—that by which Abner would naturally return through Bahurim (ver. 16) to Mahanaim. There is a spring and reservoir on the western side of the ancient northern road, about one mile out of Hebron, which is called *Ain Sara*, and gives its name to the little valley in which it lies (see Dr. Rosen's paper on Hebron in the *Zeitschrift der deutschen morgenl. Gesellschaft*, xii, 486, and the excellent map accompanying it). This may be a relic of the well of Sirah. It is mentioned as far back as the 12th century by rabbi Petachia, but the correspondence of the name with that of Sirah seems to have escaped notice.—Smith. Lieut. Conder suggests that the modern Arabic name, "like the Hebrew, means *withdrawn*, and the title is due to the fact that the spring is under a stone arch at the end of a little alley with dry stone walls, and is thus withdrawn from the high-road" (*Tent Work in Palest.* i, 86). Josephus, however, says (*Ant.* vii, 1, 5) that the place was twenty furlongs from Hebron, and was called *Besira* (Βησιρά).

Sirani, GIOVANNI ANDREA, an Italian painter, was born in 1610 at Bologna, where he also died in 1670. He was a pupil of Guido, some of whose works he finished. His own paintings are of a similar style, being on religious subjects, and found in several churches in Italy.

Sirani's three daughters were among his pupils, the eldest of whom, *Elisabetta* (born at Bologna in 1638, and died there in 1665), left a considerable number of paintings on religious subjects, after the style of Guido, which are quite celebrated even beyond the limits of her own country. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sirath, in Islamism, is a bridge, narrower than a hair and sharper than a sword, which passes over the abyss of hell, and which all human beings must attempt to cross after their death. Moslems are enabled, by sustaining angels, to pass over safely; but Christians, Jews, and other unbelievers fall into the abyss below.

Sireda, in Indian religion, is a name for chief priests among the Burmese, who enjoy the veneration of other priests and the people generally to a high degree. Their bodies are embalmed after death, and interred in the Convent of Immortality.—Vollmer, *Wörterb. d. Mythol.* s. v.

Siren, a name for fabulous beings occurring in Grecian mythology and first mentioned in the *Odyssey* of Homer, who enticed seamen by the magic sweetness of their songs and then slew them. Ulysses escaped their power by stopping the ears of his companions with wax and causing himself to be bound to the mast of his vessel until beyond the reach of their musical charms; and the Argonauts were preserved by the singing of Orpheus, which excelled that of the Sirens. The number of the Sirens was at first two, but afterwards three. Their names were said to be Aglapheme (*clear voice*) and Thelxiepea (*magic song*), Pisinoe being afterwards added, and others being substitut-

Antique Figure of a Siren.

ed by different writers—e. g. Parthenope, Ligea, and Leucosia. They were fabled to have descended from Achelotis, a river-god, by the muse Terpsichore or Caliope, or by Sterope, daughter of Porthaon, from Phorcys, or from the earth. Their form was also variously represented—part woman and part fish or bird, endowed with wings, etc., the latter conception leading to their being sometimes identified with the Harpies. The place of the abode of the sirens was also uncertain—the Sicilian headland Pelorum, the island of Caprea, the Sirenusian isles, the island Anthemusa, and the coast of Parthenope (the modern Naples) all having been so designated. At Parthenope the tomb of the siren of that name was shown; and a temple dedicated to the worship of these beings stood near Surrentum. See Volmer, *Wörterb. d. Mythol.* s. v.; Smith, *Dict. of Mythol.* s. v.; Anthon, *Classical Dict.* s. v.

Siret, PIERRE HUBERT CHRISTOPHE, a French preacher, was born at Rheims, Aug. 3, 1754, and was admitted to the Congregation of the Canons of St. Genevieve, where he taught theology. He became prior of the abbey of the Val des Écoliers; afterwards he devoted himself to preaching, and he has left some remarkable productions in that line. At the time of the Revolution he was curate of Sourdin, near Provins; but he renounced the priesthood and held several civil offices. He died at Paris, May 19, 1834. See Hoefer, *Nouv. Biog. Générale*, s. v.

Siri, VICTOR, an Italian historian, was born in 1608, and was a monk of Parma, where he employed his leisure hours in writing a history of his times. Of the writings of Siri cardinal Mazarin held a very high opinion, and persuaded Louis XIV to invite him to Paris. On his arrival he was preferred to a secular abbey; and, quitting his ecclesiastical functions, lived at court in great intimacy and confidence with the king and his ministers. He was made almoner and historiographer. Siri died in Paris, Oct. 6, 1685. He published a kind of political journal, *Memorie Recondite*, afterwards collected into volumes, running up to the eighth (4to):—*Il Mercurio, ovvero Istoria de' Correnti Tempi* (1647–82, 15 vols. 4to). He also published some mathematical works, and replies to his critics (1653, 1671). See Chalmers, *Biog. Dict.*; Hoefer, *Nouv. Biog. Générale*, s. v.

Siricius, pope from 384 to 398, was a firm defender of the orthodox faith and a zealous promoter of the power of the Church through the exercise of a rigid discipline. He condemned the monk Jovinian and bishop Bonosus of Sardica (q. v.) as heretics, and zealously prosecuted the suppression of the Manichean and Priscillianist heresies at Rome. By carefully making use of circumstances he succeeded in attaching Eastern Illyria to the see of Rome, and induced the bishop of Thessalonica to acknowledge himself the vicar of Rome for that province. He was the first to make celibacy a law of the Church, and furnished in his *Epist. ad Himerium Episc. Tarraconensem* the earliest decretal to this end. Epistles from his pen are still extant. See Petr. Constant. *Epist. Rom. Pontificum* in Gieseler's *Lehrbuch d. Kirchengeschichte*, i, 2; Bonn, p. 333, and comp. p. 199, 276. See Herzog, *Real-Encyklop.* s. v.

Sirion (Heb. *Siryon*, שִׁרְיֹן, in Deut., but in Psa. xxix *Shiryon*, שִׁרְיֹן; Samar. שִׁרְיֹן; Sam. Ver. רִבְן; Sept. Σανῳό; Vulg. *Sarion*), one of the various names of Mount HERMON (q. v.), that by which it was known to the Zidonians (Deut. iii, 9). The word is almost identical with that (סִרְיֹן) which in Hebrew denotes a breastplate, or "cuirass;" and Gesenius therefore expresses his belief that it was applied in this sense to the mountain just as the name *Thorax* (which has the same meaning) was given to a mountain in Magnesia. This is not supported by the Sam. Ver., the rendering in which—*Rubban*—seems to be equivalent to *Jebel esh-Sheik*,

the ordinary, though not the only modern, name of the mountain.

Sirius, a name which occurs in both mythology and astronomy—the *dog* which stands near Orion in the skies, and which belonged either to that hero, to Cephæus, to Isis, or to Erigone; the dog-star.

Sirleto, GUGLIELMO, a learned Italian, was born in 1514 at Guardavalle, near Stiro, in Calabria, of a poor but honorable family, and was early destined to the Church. His intelligence and prodigious memory enabled him to make remarkable progress in study, and he soon gained influential friends, who at length procured him the position of librarian of the Vatican in 1549. Successive popes added to his honors and emoluments, including the cardinalate (1565), and the bishopric of San Marco in Calabria (1566), then that of Squillaci (1568), which he resigned in 1573, to devote himself wholly to the Vatican library. He died at Rome, Oct. 8, 1585, leaving some religious works, which are enumerated in Hoefer, *Nouv. Biog. Générale*, s. v.

Sirmium, COUNCILS OF (*Concilium Sirmiese*). I. The first Synod of Sirmium was held in 351 against Photinus, bishop of that see. His heresy was similar to that of Paul of Samosata. He denied the existence of our Lord before his birth of the Virgin, and maintained that he was merely man; but admitted that the Holy Spirit descended into him, and that he might in a subordinate sense be called the Son of God. After having been condemned in the Council of Milan in 347, he betook himself to Constantius, and demanded a fresh hearing before judges to be appointed by the emperor. This was granted to him; and he pleaded his cause against Basil of Ancyra in the presence of certain judges, all laymen, nominated by the emperor. He was, however, again condemned in the Synod of Rome (A.D. 349), in which Valens and Ursaces embraced the communion of Athanasius. An information of the decree against him having been forwarded to the East, the Oriental bishops met at Sirmium this year to confirm the act of condemnation, and to pass sentence of deposition upon Photinus, which was accordingly done. There seems to be some question about the orthodoxy of the bishops who composed this council, as they drew up a formula of faith which is denounced by Athanasius as erroneous. Hilary, however, commends it as Catholic. It is not to be confounded with the confession which Hosius of Cordova was, by threats and violence, compelled to sign in a subsequent council, held in 357, from which the words *ὁσία, ὁμοούσιον*, were rejected. See Mansi, ii, 729; Pagi, in Baronii *Ann.* (A.D. 351), note xii; Cave, *Apostolici*, p. 406.

II. The second Council of Sirmium was held by order of the emperor Constantius, who was at the time in Sirmium, at the instigation of the Arian bishops, who, having drawn up a new formula of faith, rejecting the words *ὁσία, ὁμοούσιον*, and *ὁμοιούσιον*, in which the Father was declared to be greater than the Son, endeavored to force the Catholic bishops to subscribe it, and especially Hosius of Cordova. The old man, yielding to torture and imprisonment, at last consented, and signed the confession of faith; but Athanasius testifies that before his death he anathematized the Arian heresy (Cave, *Apostolici*).

Sirmond, Antoine, a French Jesuit, nephew of the following, was born at Riom in 1591, and admitted at the age of seventeen to the Order of the Jesuits, in which he taught philosophy, and afterwards devoted himself to preaching. He died at Paris, Jan. 12, 1643, leaving several religious works, which are mentioned in Hoefer, *Nouv. Biog. Générale*, s. v.

Sirmond, Jacques, a learned French Jesuit, was born at Riom, Oct. 12, 1559, being the son of the provost of that place. At the age of ten he was sent to the College of Billon, entered the Society of Jesuits in 1576, and took the vows two years after. He was sent to Paris,

where he taught classical literature two years and rhetoric three, having Francis de Sales as one of his pupils. During this time he acquired his knowledge of the Greek and Latin languages. In 1586 he began his course of divinity, which lasted four years. In 1590 he was sent to Rome by the general of the order, Aquaviva, to become his secretary, which office he filled for sixteen years. The study of antiquities was at that time his principal object, and he became noted as an antiquarian. He returned to Paris in 1608. Pope Urban VIII had a desire to draw him again to Rome, and caused a letter for that purpose to be sent to him by father Vitelleschi, general of their order; but Louis XIII retained him, and in 1637 appointed him his confessor. In 1648, after the death of Louis XIII, he left the court and resumed his ordinary occupations. In 1645 he went to Rome, for the sake of assisting at the election of a general, upon the death of Vitelleschi; and then returned to France and resumed his studies. But, having engaged in a warm dispute in the College of the Jesuits, the exertion brought on a disorder which carried him off in a few days. He died Oct. 7, 1651. Much of Sirmond's life and the better part of his reputation relate to his labors as an editor. His works, as author and editor, amount to fifteen volumes, folio, five of which contain his original productions. They were printed at the royal printing-house, Paris, 1696, under the title *Jacobi Sirmondii Opera Varia, nunc primum Collecta, ex ipsius Schedis Emendatiora, Notis Posthumis, Epistolis, et Opusculis aliquibus Auctiora*. See Hoefer, *Nouv. Biog. Générale*, s. v.

Sirname. See SURNAME.

Sirōna, in Roman mythology, is a name designating a goddess mentioned in several inscriptions in connection with Apollo Grannus. Some writers regard the name as a local appellative of Diana, while others think that it designates a Gallic divinity. The most recent inscription was discovered by the side of a mineral spring at Nierstein, on the Rhine, which is accordingly known as the Sirona spring. Another inscription in stone, having the names of both Apollo and Sirona, and dating from A.D. 201, was dug up at Grossbottwar, in Würtemberg.

Sirpad. See BRIER.

Sis. See CRANE.

Sis'amai [most *Sisam'aī*, some *Sisama'i*] (Heb. *Sisamay'*, שִׁסְמַי', of uncertain etymology, perhaps *distinguished*; Sept. Σισομαί), son of Eleasah, and father of Shallum, descendants of Sheshan, of the line of Jerahmeel, the grandson of Judah (1 Chron. i, 40). B.C. apparently not long ante 1618.

Siscidenses, a sect of the Waldenses which is mentioned by Reinerius as agreeing with them in everything except that they received the sacrament of the eucharist (Reiner. *Contr. Waldens. in Bibl. Max. Lugd.* xxv, 266 sq.). Gieseler (*Ecc. Hist.* iii, 446, n. 6, Clark's ed.) thinks that their name is properly spelled *Sifridenses*, and that they took it from some local leader named Sifred.

Sis'era (Heb. *Sisera'*, שִׁסְרָא, *battle-array* [Gesenius], or *lieutenant* [Furst]; Sept. Σισάρα v. r. [in Ezra and Neh.]; Σισαρίθ, etc.; Josephus, ὁ Σισάρα [Ant. v, 5, 4]), the name of two men.

1. Captain (שַׂר) of the army of Jabin, king of Canaan, who reigned in Hazor. He himself resided in Harosheth of the Gentiles. As this is the only instance in those early times of armies being commanded by other than kings in person, the circumstance, taken in connection with others, intimates that Sisera was a general eminent for his abilities and success. All that we really know of him is stated in the Biblical account of the battle under the conduct of Barak and Deborah (Judg. v). B.C. 1409. See JABIN. The army was mustered at the Kishon, on the plain at the foot of the slopes of Lejjôn. Partly owing to the furious attack of Barak, partly to

the impassable condition of the plain, and partly to the unwieldy nature of the host itself, which, among other impediments, contained 900 iron chariots—a horrible confusion and rout took place. Sisera deserted his troops and fled on foot. He took a north-east direction, possibly through Nazareth and Safed, or, if that direct road was closed to him, stole along by more circuitous routes till he found himself before the tents of Heber the Kenite, near Kedesh, on the high ground overlooking the upper basin of the Jordan valley. Here he met his death from the hands of Jael, Heber's wife, who, although "at peace" with him, was under a much more stringent relation with the house of Israel (Judg. iv, 2-22; v, 20, 26, 28, 30). His name long survived as a word of fear and of exultation in the mouths of prophets and psalmists (1 Sam. xii, 9; Psa. lxxxiii, 9). See JAEI. The number of Jabin's standing army is given by Josephus (*Ant.* v, 5, 1) as 300,000 footmen, 10,000 horsemen, and 3000 chariots. These numbers are large, but they are nothing to those of the Jewish legends. Sisera "had 40,000 generals, every one of whom had 100,000 men under him. He was thirty years old, and had conquered the whole world; and there was not a place the walls of which did not fall down at his voice. When he shouted, the very beasts of the field were riveted to their places. Nine hundred horses went in his chariot" (*Jalkut*, ad loc.). "Thirty-one kings (comp. Josh. xii, 24) went with Sisera and were killed with him. They thirsted after the waters of the land of Israel, and they asked and prayed Sisera to take them with him without further reward" (*Ber. Rab. c. 23*; comp. Judg. v, 19). See Stanley, *Hist. of the Jewish Church*, lect. xiv.

It is remarkable that from this enemy of the Jews should have sprung one of their most eminent characters. The great rabbi Akiba, whose father was a Syrian proselyte of justice, was descended from Sisera of Harosheth (Bartolucci, iv, 272). The part which he took in the Jewish war of independence, when he was standard-bearer to Bar-cocheba (Otho, *Hist. Doct. Mss.* 134, note), shows that the warlike force still remained in the blood of Sisera.

2. After a long interval the name reappears in the lists of the Nethinim as the head of one of the families who returned from the captivity with Zerubbabel (Ezra ii, 53; Neh. vii, 55). B.C. ante 536. Sisera is another example of the foreign names occurring in these lists, and doubtless tells of Canaanitish captives devoted to the lowest offices of the Temple, even though the Sisera from whom the family derived its name were not actually the same person as the defeated general of Jabin. It is curious that it should occur in close companionship with the name Harsha (Ezra ii, 52), which irresistibly recalls Harosheth.

Sisin'nes (Σισίννης), the form in which the name of TATNAI (q. v.) of the Heb. text (Ezra v, 3, 6; vi, 6, 13) appears in the Apocrypha (1 Esdr. vi, 3, 7; vii, 1) and Josephus (*Ant.* xi, 4, 5, 7), being that of the governor of Syria and Phœnicia under Darius, and a contemporary of Zerubbabel, who attempted to stop the rebuilding of the Temple, but was ordered by Darius, after consulting the archives of Cyrus's reign, to adopt the opposite course, and to forward the plans of Zerubbabel.

Sisinnius, pope, was born in Syria, and elected to the pontificate Feb. 7, 708, in place of John VII. He died twenty-eight days afterwards, and was succeeded by Constantine. See Artaud de Montor, *Hist. des Papes*, i.

Sisson, GEORGE L., a Methodist Episcopal minister, was born in Fairfax County, Va., Jan. 5, 1811; converted in 1829; admitted on trial in the Pittsburgh Conference in 1833, and appointed to Connellsville Circuit; in 1834, Braddocksfield Circuit; in 1835, Burgettstown; in 1836, again on Connellsville Circuit; in 1837-38, Chartiers Circuit; in 1839, supernumerary; in 1840-41, Birmingham; in 1842-43, West Newton Circuit, where he died, April 1, 1843. He was a devout Christian man—faithful, zealous, and successful as a minister, and an excel-

lent preacher. See *Minutes of Annual Conferences*, iii, 451.

Sister (אֲחֻיָּה, *achoth'*; ἀδελφή), a term often having, in the style of the Hebrews, equal latitude with *brother* (q. v.). It is used, not only for a sister by natural relation from the same father and mother, but also for a sister by the same father only, or by the same mother only, or a near relation only (Matt. xiii, 56; Mark vi, 3). Sarah is called sister to Abraham (Gen. xii, 13; xx, 12), though only his niece according to some, or sister by the father's side according to others. By the Mosaic law (Lev. xviii, 18) it is forbidden to wed the sister of a wife, i. e. to marry two sisters; or, according to some interpreters, to marry a second wife, having one already; literally, "Thou shalt not take a wife over her sister to afflict her," as if to forbid polygamy. Sometimes the word sister expresses a resemblance of conditions and of inclinations. Thus the prophets call Jerusalem the sister of Sodom and of Samaria, because that city delighted in the imitation of their idolatry and iniquity (Jer. iii, 8, 10; Ezek. xvi, 45). So Christ describes those who keep his commandments as his brothers and his sisters (Matt. xii, 50).

Sisterhoods, associations of women, in the Roman Catholic Church, devoted to the attainment of ascetic perfection and works of charity, and bound together by religious vows. See **NUNS**. Some of these congregations devote themselves exclusively, or in a very special manner, to hospital work, and the care of aged or infirm poor, orphans, and penitent women; others devote themselves entirely, or in a great degree, to the instruction of the young. Such associations of women date back as far as the 5th century, when we find mention made of them at Rome, Milan, and other chief cities of the Roman empire, as giving up their time and riches for the relief of the suffering poor. Of the many orders in the Church of Rome, some have already been given. See **AUGUSTINIAN NUNS**; **BENEDICTINE NUNS**; **BRIGHTINES**; **CALVARY, CONGREGATION OF OUR LADY OF**; **CAPUCHINS**; **CARMELITES**; **CARTHUSIANS**; **CHARITY, SISTERS OF**; **CISTERCIAN NUNS**; **CLARE, ST., NUNS OF**; **CROSS, ORDERS OF THE**; **DOMINICAN NUNS**; **ELIZABETHINES**; **GENEVIÈVE, ST., DAUGHTERS OF**; **IMMACULATE CONCEPTION OF MARY, NUNS OF THE**; **JESUS, SACRED HEART OF, CONGREGATION OF**; **MINIMS**; **NOTRE DAME, CONGREGATION OF**; **PROVIDENCE, NUNS OF**; **SCHOOL SISTERS**; **SHEPHERD, ORDER OF THE GOOD**.

Of the very many orders of these sisterhoods we here mention the following:

1. *Adoration, Perpetual, Sisters of*.—This order was founded at Avignon by Antoine Lequien, a Dominican friar, in 1639, and in 1659 the first regular house was established at Marseilles. The members follow the rule of Augustine, and wear the Dominican habit. They continued to be a congregation until 1674, when they were raised to an order, and placed under the jurisdiction of Marseilles. After the suppression of the convents in France, some fled to Rome and others were condemned to die, but escaped through the death of Robespierre. They returned to Marseilles in 1816, and in 1836 erected a new convent. There are five houses of this order in France, viz. at Marseilles, Bollène, Aix, Avignon, and Carpentras.

2. *Adoration Reparatrice, Congregation of the*, was founded at Paris in 1848, with the object of making reparation for the many evils existing in the world and Church. It was approved by pope Pius IX in 1853, and special privileges were granted for the dispensing of indulgences, etc. With this Congregation is associated another, that of the *Œuvres des Tabernacles*. It has only one house, located in Paris.

3. *Aguës, St., The Sisters of*.—This order was founded at Arras in 1636 by Jeanne Biscot, and was specially engaged in hospital work. It escaped entire destruction in the Revolution, and was re-established by Napoleon.

1. had in the United States in 1890 (see Sadlier, *Catholic Directory*) 11 convents and about 215 sisters.

4. *Ann, St., Daughters of*.—This order was founded in 1848 by the bishop of Montreal, and has its mother-house at Lachine, with 343 sisters and novices. It had in 1891 (see Sadlier, *Catholic Directory*) 83 sisters, 11 schools, and about 50 pupils in the United States, 19 houses in the diocese of Montreal, and 8 in Vancouver's Island and British Columbia.

5. *Assumption, Daughters of the*, called also *Haudriettes*, were founded by Étienne Haudry in the time of St. Louis of France. Their habit consists of a blue dress and mantle, a sash of white linen, and a scapulary. A new convent building was erected during the last century in Paris which was called the Convent of the Assumption, from which the order has taken its name. It has in British America 12 convents, 77 sisters and novices, and teaches about 1390 pupils (see Sadlier, *Catholic Directory*, 1891); and in the U. S. 2 convents and 27 sisters.

6. *Augustine, Sisters of*, a congregation of Hospitalers, were founded at Arras in 1178. Their house was broken up in 1550, but reopened in 1563 as the Hospital of St. John. They experienced much persecution during the Revolution; but in 1810 they were reorganized, with a slight change of their rules.

7. *Calvary, Daughters of*.—This congregation was founded at Gênes, France, by Virginie Centurion, in 1619, and approved by pope Pius VII in 1815. Gregory XVI bestowed upon it a yearly endowment. The work of this order is similar to that of the Order of St. Vincent de Paul, with the exception that the Daughters are employed only in hospitals, and do not attend the sick at their homes. They are also called *Brignole Sisters*.

8. *Childhood of Jesus, Sisters of the*, were founded in Rome, Oct. 15, 1835, by canon Triest, and on July 20, 1836, recognised as a regular religious community. Their special object is to care for poor and sick children under ten years of age. They have only one house, situated at Rome.

9. *Cross, Holy, Sisters of the*, have their mother-house at Le Mans, France. They have a convent at St. Laurent, near Montreal, with 171 sisters and novices; and in the United States (see Sadlier, *Cath. Directory*, 1891), 7 convents, 175 sisters, 33 schools, with 512 pupils, and 5 asylums, etc., with 150 inmates.

10. *Cross, our Lady of the, Sisters of*, were founded by M. Buisson at Murinais, Grenoble, France, in 1832. Their constitution was approved by the bishop of Grenoble, and they had in 1859 6 establishments and 97 sisters.

11. *Father, Eternal, Sisters of the*.—This order was founded at Vannes, France, by Jeanne de Quéler, in the latter part of the 17th century. It was only a secular community until 1701, when the bishop of Vannes gave it a regular constitution. It was the sole order in Brittany in which the perpetual adoration was established. It is not now in existence.

12. *Holy Family, Sisters of the*.—This congregation was founded by Madame Rivier about 1827, and was in reality an outgrowth of the Sisters of the Presentation of Mary. It has in the United States (see Sadlier, *Cath. Directory*, 1891) 3 convents, with 26 sisters.

13. *Holy Names, Sisters of the*, were founded in 1843 in the diocese of Montreal, and have their headquarters at Longueuil. They have in the diocese 12 houses, 511 sisters, novices, etc., and 2839 pupils; in the diocese of St. Hyacinth, 2 houses, with 232 pupils; in the diocese of Sandwich, 3 houses, with 865 pupils; and in the United States, 15 houses, with 2990 pupils (see Sadlier, *Cath. Directory*, 1891).

14. *Humility of Mary, Sisters of the*.—There is a convent of the Sisters of the Humility of Mary at New Bedford, Pa., which had (according to Barnum, *Romanism as It Is*) 18 sisters, 8 pupils, and 20 orphans; also communities at Newburg, Louisville, and Harrisburg, O. Beyond this no information is given, except that they

now have in the United States (Sadlier, *Cath. Directory*, 1891) 3 houses, 120 sisters, and 400 pupils.

15. *Incarnate Word, Sisters of the*, have in the United States (Sadlier, *Cath. Directory*, 1891) 6 houses, 179 sisters, and 400 pupils.

16. *Jesus, Daughters of*, founded in 1820 by the bishop of Cahors, France, and recognised by the government in 1853. Their vows are taken annually for the first eight years of their profession, after which they are taken for five years.

17. *Jesus, the Child, Sisters of*, founded at Paris by Nicolas Barré in 1678. They are dependent on their superiors for their support, not even being allowed to dispose of any property without their consent. They are engaged in teaching from place to place under the direction of their superiors. They confess twice a week before the assembled community. There are several of these establishments in France. In the United States (see Sadlier, *Cath. Directory*) in 1891 they had 3 houses, with 71 sisters and 75 pupils.

18. *Jesus and Mary, Sisters of*.—This congregation was founded in Lyons, France, in 1816, by André Coudre, assisted by Mlle. Claudine Thevenet. The Sisters employ themselves in the education of young children. A branch establishment was founded in Puy, Haute Loire, in 1822; and in 1842 sisters went to Hindostan, and founded schools in several cities. In 1849 they founded an establishment in Barcelona, Spain, from which have arisen several others. In 1854 they came to America, and opened a school in Quebec, in which diocese they have 4 houses, with 102 sisters and novices, and 643 pupils. In the United States they have 5 houses, 47 religious, and 1101 pupils (see Sadlier, *Cath. Directory*).

19. *St. John of Penitence, Sisters of*.—The two monasteries of this name were founded in Spain by cardinal Ximenes, the one at Alcalá in 1504, and the other at Toledo in 1511. Pope Leo X approved the order in 1514, and granted it liberal benefices, which were increased by Philip II. The house at Alcalá was removed to Madrid, and transferred from the Franciscan rule to that of the Augustines.

20. *St. Joseph, Sisters of*.—This order was founded at Puy, France, by father Medaille, in 1650, confirmed by the bishop of the diocese in 1661, and received the royal sanction in 1665. In 1667 an Asylum of Penitence was established in connection therewith. Another congregation was founded at Bourg in 1823. The principal house is at Clermont. In the United States the order has (see Sadlier, *Cath. Directory*, 1891), 85 houses, with 1335 sisters and novices; 77 schools, with 7847 pupils; and 21 asylums, etc., with about 2400 inmates.

21. *St. Louis, Sisters of*, an order founded in 1808 by Madame Malesherbes and her daughter, Madame Molé. There are four establishments, devoted to instruction and religious contemplation.

22. *St. Madeleine, Sisters of*.—This order was founded at Strasbourg in 1225, and approved by pope Gregory IX in 1257. It is under the Augustinian rule. In 1474, during the wars, it was broken up, and the buildings destroyed. The order was afterwards restored, and largely benefited by the pope. In 1523, so greatly had its income increased that the magistrates obliged it to contribute largely of its revenue for civil purposes, and in 1525 its entire income was confiscated.

23. *St. Martha, Sisters of*, an order that was founded in 1813 by Mlle. Edwige de Vivier at Romans. In 1815 it was settled into a community, having had a house built for its accommodation. It was confirmed by the government in 1826, and in 1848 had 30 establishments and about 4500 sisters.

24. *St. Martha, Sisters of*, at Périgueux, founded in 1643, and approved by the bishop in 1650. In 1701 a general hospital was established, and another in 1711. During the Revolution the Sisters were nearly destroyed, being expelled from their house. Afterwards they were allowed to return, but in 1839 took possession of a new convent. At present they have 30 houses. Another

branch of this order, called the *Sisters of the Orphans*, was founded at Gras in 1831. It has 9 houses and about 45 sisters.

25. *Modesty, Sisters of*, founded at Venice about 1573 by Dejanara Valmarana, under the rule of St. Francis. Their employment consists in teaching, visiting the poor, and religious exercises. They have several houses.

26. *Nativity of our Lord, Sisters of the*, founded at Crest, France, in 1813, and a second house at Valence in 1814. The order was approved by the king in 1826, and by pope Pius IX in 1855.

27. *Nativity of the Virgin, Sisters of the*, founded at Saint-Germain-en-Laye, France, in 1818. They are under the Augustinian rule, and devote themselves to the education of girls, having a large boarding-school. They have also a free school for poor children.

28. *Nazareth, Holy Family of, Sisters of the*, founded in 1851. Their object is principally to prepare girls for vocations by religious instruction. They were approved by the bishop in 1855. Another house, Notre Dame of Nazareth, was founded at Marseilles about 1840 by brother Olivier. It was established for the purpose of instructing slave-girls purchased in the markets of the Levant. The *Society of Ladies of Nazareth* was formed at Montmirail, France, in 1822. In 1853 the Ladies founded a house at Nazareth, in Palestine. They now have three houses.

29. *Paul, St., Daughters of*, founded at Tréguier, France, in 1699. Their several establishments were broken up during the Revolution, and their convents are now occupied by the Ursulines.

30. *Paul, St., Hospital Sisters of*, called *Sisters of St. Maurice de Chartres*, were founded in 1690, re-established in 1808, and approved by the government, and also by an imperial edict, in 1811. They had in 1859 38 establishments in the diocese of Chartres, and 67 in the remainder of France; in England, 9 houses, and 1 in Hong-Kong.

31. *Paul, St., Sisters of*.—This congregation was founded at Angoulême, France, in 1826, and was under the Franciscan rule. The Sisters are sometimes called *Ladies of Doyenné*, and have three houses in France.

32. *Philippines, Oblate Sisters of*, were founded at Rome by Rutilio Brandi in 1620, and confirmed by Urban VIII. The object of the sisterhood was the education of poor girls, and they were under a cardinal protector.

33. *Philomene, St., Sisters of*, were established at Poitiers, France, in 1835, and approved in 1838. They founded a small agricultural college for boys, and in 1859 had about 56 sisters.

34. *Poor, Little Sisters of the*, were founded at Saint-Servan, Brittany, by the abbé Le Pailleur in 1840. Much opposed at first, they soon opened houses in all the cities of France. They were approved by Pius IX, July 9, 1854, and recognised by the French government in 1856. In 1868 they came to Brooklyn, N.Y., and now have houses in Cincinnati, New Orleans, Baltimore, St. Louis, New York, Philadelphia, Louisville, and Boston. There is another community, styled *Sisters of the Poor of St. Francis*, which originated at Aix-la-Chapelle in the present century, and came to the United States in 1857. They have many establishments in the large cities.

35. *Presentation, Sisters of the*.—Under this general name were several congregations. That of Notre Dame, founded in the diocese of Digne, France, by Mgr. Miolliss, bishop of Digne, was recognised by royal ordinance in 1826. In 1859 they had 3 establishments and 100 sisters.

36. *Presentation of the Virgin, Sisters of the*.—This order was founded at Tours, France, in 1684 by Marie Poussepin. It has been a flourishing community, having a large number of establishments, with about 1200 sisters, who are chiefly engaged in hospital work. The *Presentation of Mary* was founded at Bourg Saint-Andéol, France, by Madame Rivier, in 1796, and approved by Gregory XVI in 1836. Several other estab-

lishments exist in France. In 1853 an establishment was formed at Sainte-Marie-de-Monnoir, Canada, which has now (1891) in the diocese of St. Hyacinth, 12 houses, 129 sisters, and 2065 pupils. Of the Order of the Presentation there are in the United States 13 houses, 96 sisters, and 1000 pupils.

37. *Saviour, Good, Sisters of the*, were founded at Caen, Normandy, in 1720 by two poor girls, who in 1730 opened asylums for homeless children and others. They were suppressed in 1789, but persevered in their labor until May 22, 1805, when 15 sisters met in community. They were charged with the care of insane women in 1817, and soon after with that of insane men. In 1874 the mother-house numbered 300 sisters, and upwards of 1000 insane patients. They have 3 establishments—Albi, Pont l'Abbé, and Brucourt. In Canada, the care of the insane at Quebec devolved on the Sisters of the general hospital till 1844.

38. *Solitaires*, nuns of the Order of St. Peter of Alcantara, instituted by cardinal Barberini in 1670. They imitate the austere practices of their patron saint, observe perpetual silence, and employ their time wholly in spiritual exercises; they go barefoot, gird themselves with a cord round the waist, and wear no linen.

39. *Trinity, Holy, Sisters of the*, founded at Valence, France, by mother Andréan de Sainte-Esprit in 1685. The congregation suffered much during the Revolution, but was not expelled from its home. In 1837 it received the royal approval, since which time it has largely increased in establishments and numbers.

40. *Union, Christian, Sisters of*, founded at Fontenay-le-Comte, France, by Madame Polailion in 1652, and confirmed by the archbishop of Paris in the same year. This order is under the protection of the Holy Family—Jesus, Mary, and Joseph. Dispersed by the Revolution, the Sisters were authorized to reunite themselves into a community. The order is very flourishing, having houses in many of the provinces of France.

41. *Virgin, Holy, Sisters of the, or Ladies of Budes*, an order founded at Rennes, France, in 1676, and authorized by Louis XIV in 1678. It was founded for the reception of girls who had been converted from Calvinism to the Church of Rome, but has not grown much since the general decline of the Reformation in France.

See *Appletons' American Cyclop.* s. v.; Barnum, *Romanism as It Is*; Migne, *Dict. des Ordres Religieux*, vol. i-iv; Sadlier, *Catholic Directory*, 1879.

SISTERHOODS, PROTESTANT. In the Church of England, several communities of women devoted to works of charity have been organized in the present century.

1. *Sisters of Mercy* were founded at Devonport, about 1845, by Miss Lydia Sellon, and were at first under the visitatorial control of the bishop of Exeter. The society is composed of three orders, viz. those living in the community and leading an active life; those unable to take work, but who wish to lead a quiet, contemplative life; and married and single women who live in the world, but are connected with and assist the community. The Sisters are bound only by the vow of obedience to the superior, and are free to abandon their vocation at will.

2. A sisterhood for nursing the sick at their homes, or in hospitals, etc., was founded at East Grinstead by Dr. John Mason Neale in 1855. In 1874 it had houses in London, Aberdeen, Wigan, and Frome-Selwood.

3. *Sisterhood of St. John the Baptist* was founded at Clewer in 1849, and embraces (1) choir and lay sisters living in community; (2) a second order (formed in 1860) of those who enter for periods of three years, to be renewed at their own desire and with the consent of the Sisters; (3) associates, who live in their own home and render such assistance as they may.

4. *Sisterhood of St. Mary*, Wangate, was established in 1850, and has branch houses at Bedminster, Plymouth, and other places.

5. *Sisterhood of St. Mary the Virgin* was established at Wymering in 1859, and consists of sisterhood (residents) and ladies of charity (associates). It has branches at Manchester and Aldershot.

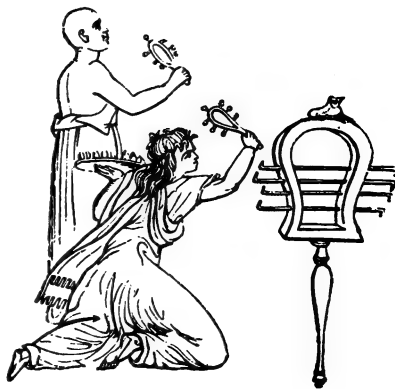

6. *Sisterhood of St. Thomas the Martyr* has its parent house at Oxford, and branches at Liverpool and Plymouth.

7. *Sisters of the Poor* were founded in 1851, and have their parent house in London, with branches at Edinburgh, Clifton, Eastbourne, and West Chester.

In the Protestant Episcopal Church, the *Sisters of the Holy Communion* were founded by the exertions of the Rev. W. A. Muhlenburg, in connection with the Church of the Holy Communion in New York. They are under no vows, and leave whenever they please. They are usually received between the ages of twenty-five and forty years; if under twenty-five, they must secure the consent of their parents or guardians. Since 1858 they have had charge of St. Luke's Hospital, New York.

There is also a community of four or five sisters associated with the "House of Prayer," Newark, N. J.

Sistrum (Gr. *σείστρον*), a mystical instrument of music used by the ancient Egyptians in the worship of Isis. Its most common form is seen in the annexed wood-cut, which represents an ancient sistrum formerly belonging to the library of St. Geneviève, at Paris. Apuleius (*Met.* xi, 119, 121, ed. Ald.) describes the sistrum as a bronze rattle, consisting of a narrow plate curved like a sword-belt, through which passed a few rods that rendered a loud, shrill sound. He says that these instruments were sometimes made of silver, or even of gold. Plutarch says that the shaking of the four bars within the circular apsis represented the agitation of the four elements within the compass of the world, by which all things are continually destroyed and reproduced, and that the cat sculptured upon the apsis was an emblem of the moon.

Sistra.

Sisty, JOHN, a minister of the Baptist denomination, was born near Newark, N. J., March 26, 1783, and became a member of the First Baptist Church in Philadelphia, July 4, 1803. For some years he was engaged in a successful business in Philadelphia, being a manufacturer of pocket-books. His heart being set upon the preaching of the Gospel, he was licensed by the Church in Mount Holly, N. J., whither he had removed, Aug. 13, 1814. For a time he preached without ordination. A congregation having been formed in Haddonfield, he was ordained as its pastor in August, 1819, and held that office for nineteen years, not only without charge to the Church, but proving his love for it by contributing liberally to the erection of a house of worship for his people from his own funds. He resigned Sept. 30, 1838, and removed to Philadelphia, where he died, Oct. 2, 1863. He was a member of the body which in 1814 organized the Baptist General Convention, and was the last of the thirty-three who were the constit-

uent members of that important society. See *The Missionary Jubilee*, p. 118. (J. C. S.)

Sisyphus, in Grecian mythology, was a son of Æolus and Enarete, though authorities differ, who married Merope, the daughter of Atlas and a Pleiad, and became the father of Glaucus. He is said to have built the town of Ephyra, or Corinth. He was noted for craftiness, and numerous instances of this quality are preserved respecting him. Autolycus, the son of Mercury, the celebrated cattle-stealer of Parnassus, had robbed the herds of Sisyphus among others, and defaced the marks by which they might be distinguished; but Sisyphus was able to select his own from the herds on Parnassus, because the initial of his name had been stamped under the hoof. In revenge, Sisyphus violated Anticlea, according to a later tradition, and thus became the real father of Ulysses. When Jupiter carried off Ægina, the daughter of Asopus the river-god, Sisyphus informed the father who the ravisher was, and the king of gods punished him in Tartarus by compelling him to roll a stone up a hill, from which it incessantly rolls back as soon as it reaches the summit. Innumerable reasons are, however, given for the infliction of this punishment. See Vollmer, *Wörterb. d. Mythol.* s. v.; Anthon, *Class. Dict.* s. v.; Smith, *Dict. of Mythol.* s. v.

Sita, in Hindû mythology, was an avatar of the goddess Lakshmi, in which she emerged from the blood exacted as a tribute from holy devotees who had nothing else, by the tyrant of Lanka. Sita was made the consort of Rama or Vishnu. According to others, she was the daughter of Janaka, a king of Mithilâ. The word means literally "furrow," as she was not born in the usual sense of this word, but arose from a furrow when her father was ploughing the ground, whence she is also called Pârthivî (from *pr'thivî*, "the earth").

Sitalcas, in Grecian mythology, was a surname of the Delphian *Apollo*.

Site of Churches. By the Christian religion the worship of God is not limited to place, and yet from a very early period a preference was manifested for certain favorite situations. The primitive Christians selected the summit of some high hill or elevated ground, unless compelled, for the sake of concealment, to resort to some less conspicuous place. They also erected their churches over the tombs of martyrs and confessors. Not unfrequently they built subterranean churches and oratories; but this was always on account of some local and special reason. Such churches were called *κρύπται, crypte*.

Si-Tenno, in Japanese mythology, is a name for the four superior deities of the thirty-third heaven of Shintuism.

Siteresia (Σιτηρία, ἑτήσια), an annual allowance of corn granted (out of the yearly tribute of every city) to the clergy, virgins, and widows of the Church. This grant was ordered by Constantine, and continued to the time of Julian, who withdrew the whole allowance. Jovian restored it in some measure, granting a third of the former allowance, and promising the whole as soon as the public storehouses were better replenished. See Bingham, *Christian Antiq.* bk. v, ch. iv, p. 7.

Sith, in Norse mythology, was one of the streams which flow down from the antlers of the stag Æjkythyrner.

Sithnîdès, in Grecian mythology, were nymphs who were highly venerated at Megara, inasmuch that Theagenes surrounded their fountain with a magnificent enclosure of columns. One of them became, by Jupiter, the mother of Megarus, ancestral hero of the Megarians.

Sithon, in Grecian mythology, was represented as the son of Poseidon and Assa, or of Ares and Achiroe, and as married to the nymph Mendeis, by whom he had Pallene and Rhœteia. He was king of the Ha-

domantes in Macedonia, or of Thrace. Pallene, being sought by many suitors, was by Sithon promised to the aspirant who should successfully wage a single combat with him, and eventually to either Dryas or Cleitus, as the duel might determine. By the connivance of Pallene, Dryas was overcome and killed; but her trick having been discovered by Sithon, he built a pyre on which to burn her with the body of Dryas. Aphrodite, however, extinguished the already blazing pile, and so caused Sithon to change his mind and give Pallene to Cleitus. See Smith, *Dict. of Gr. and Rom. Mythol.* s. v.

Sithsekur, in Norse mythology, the long beard, was a surname of *Odin*.

Sit'nah (Heb. *Sitnah'*, סִתְנָה; Sept. *ἰχθρία*; Josephus, *Ant.* i, 18, 2; Vulg. *Inimicitia*), the second of the two wells dug by Isaac in the valley of Gerar, and the possession of which the herdmen of the valley disputed with him (Gen. xxvi, 21). Like the first one, Esek, it received its name from the disputes which took place over it, *Sitnah* meaning, as is stated in the margin, "hatred," or more accurately "accusation," but the play of expression has not been in this instance preserved in the Hebrew. The Sept., however, has attempted it—*ἰκπινοντο* . . . *ἰχθρία*. The root of the name is the same as that of *Salan*, and this has been taken advantage of by Aquila and Symmachus, who render it respectively *ἀντικείμενη* and *ἐναντιώσις*. See ISAAC.

Sito, an appellative of *Ceres* in Grecian mythology, particularly prevalent in Syracuse.

Sitrangaden, in Hindû mythology, was a son of Santanen and Satiawedi, who suspected his mother of criminal intercourse with her step-son, but, on the manifestation of her innocence and virtue, atoned for his suspicion by causing himself to be burned to death in a hollow tree.

Sitsai Siki, the evening festival, is celebrated in Japan on the seventh day of the seventh month.

Sitting (prop. *שָׁבַע, yashab, καθίσταται*). This is the favorite posture of Orientals. In the absence of chairs, it becomes a necessity to sit upon the floor with the feet crossed under one. "In Palestine people sit at all kinds of work. The carpenter saws, planes, and hews with his hand-adze sitting upon the ground or upon the plank he is planing. The washerwoman sits by the tub; and, in a word, no one stands where it is possible to sit. Shopkeepers always sit, and Levi sitting at the receipt of custom (Matt. ix, 9) is the exact way to state the case" (Thomson, *Land and Book*, i, 191). "No Moslem will move when he can stand, or stand when he can sit. We observed three men in a farrier's shop devoting their combined energies to the shoeing of a little mule. One sat under the mule's nose, and held it down with a halter; another sat with its foot turned up in his lap; and a third sat alongside while he fitted and nailed the shoe. Even the masons must sit on their haunches, and fill their panniers with lime; and a little farther on, where some new pavement was in progress, all the paviors sat at their work, from the boys lolling on their hams, who passed the stones from the heap, to the two men who sat *vis-à-vis* with a great mallet between them, and in that posture lazily poised and let it fall. But the acme of the art of sitting seemed to have been reached by a party of reapers in a wheat-field through which we rode. All in a long row, men and women, sat to reap, and jerked themselves forwards or sideways as their work progressed" (Tristram, *Land of Israel*, p. 616). See ATTITUDE; BED; EATING.

SITTING, as a posture of Christian adoration, never had (according to Bingham) any allowance in the practice of the ancient Church, being considered by them as very irreverent. Neither did they ever receive sitting the sacrament of the Lord's supper, but always

kneeling or standing. It was quite a general custom in the early Church for the people to stand while listening to the sermon. This custom was most observed in Africa, France, and some of the Greek churches, while in the churches of Italy the contrary custom prevailed. This posture is allowed in the Church of England at the reading of the lessons in the morning and evening prayer, and also of the first lesson or epistle in the communion service, but at no other time except during the sermon. Some of our Protestant denominations use sitting as the posture of prayer, and of receiving the Lord's supper. Some Arians in Poland have done this for the avowed reason of showing that they do not believe Christ to be God, but only their fellow-creature. See Bingham, *Christ. Antiq.*; Hook, *Church Dict.* s. v.

Siva, in Hindû mythology, is the third member of the Hindû trinity, the terrible destroyer. According to the doctrine of the Sivaïtes, he is, next to Brahm, the highest god, to whom Brahma and Vishnu are subordinate; but the worshippers of Vishnu and Brahma rank Siva lower than either of these deities. He is commonly represented as riding on the ox Nundi (the symbol of wisdom), and holding his beautiful consort Parvati on his lap. Painters and sculptors have sought to introduce into his countenance every imaginable repulsive element, and he is regarded as cruel and blood-thirsty, so as to require the most terrible sacrifices; but he is nevertheless filled with tenderest love towards his wife, and has established her in one half of his own body, to the end that she need never be separated from him. He is, accordingly, the god who presides over the generation of all living beings. To renounce the joys

Figure of Siva.

of love is to act contrary to his will; for he himself passed a hundred celestial years in the arms of the fascinating Uma, an earlier form of Parvati. He consequently awakens all life, as he destroys it—a contradiction whose solution must be found in the fact that the natural and religious teachings of the Hindûs do not recognise any real annihilation, but simply a transformation, change, the passing from one condition into another. Siva appears as an immeasurable pillar of fire whose dimensions Vishnu and Brahma cannot estimate, and as Mahadeva (the great god); and also in a large number of additional avatars, in all of which he promotes the welfare of the world by means of destruction. The worship paid him is accordingly both cruel and lascivious. The frequent devedashies celebrated in the pagodas of India are chiefly in his honor.

Sivabramnals, in Hindûism, are Brahmins of the sect of Sivaïtes, who recognise Siva as the supreme deity.

Sí'van (Heb. *Sivan'*, סִיבָן; Sept. Σῶάν), the third month of the Hebrew year, from the new moon of June to the new moon of July. The name admits of a Hebrew etymology; but as it occurs only in Esth. viii, 9, it is better to regard it as of Persian origin, like the other names of months; the corresponding Persian month being *Sefend-armed*; Zend, *Spenti Armaiti*; Pehlvi, *Sapand-omad* (Benfey, *Monatsnamen*, p. 13, 41 sq.,

122 sq.; Gesenius, *Thesaur.* p. 946). See **CALENDAR**; **MONTH**.

Sivpasadána, a term employed by the Buddhists in Ceylon to denote almsgiving when practiced in relation to the priests. Of this almsgiving there are four divisions: 1. Chivara-dána, the gift of robes; 2. Ahára-dána, the gift of food; 3. Sayanásana-dána, the gift of a pallet on which to recline; 4. Gilanapratya-dána, the gift of medicine or sick diet. See Hardy, *Eastern Monachism*.

Six-Principle Baptists. See **BAPTISTS**, **SIX-PRINCIPLE**.

Sixt, CHRISTIAN HEINRICH, D.D., a German theologian, member of consistory, and dean of Nuremberg, who died Aug. 20, 1866, is best known as the biographer of Paul Eber (q. v.) (Heidelberg, 1843; Ansbach, 1857). He also wrote, *Petrus Paulus Bergerius, päpstlicher Nuntius, katholischer Bischof und Vorkämpfer des Evangeliums* (Brunswick, 1855); the same in a popular edition (ibid. 1856). See Zuchold, *Bibliotheca Theol.* iii, 1233; *Literarischer Handweiser*, 1866, p. 356. (B. P.)

Sixtus **SENEPENSIS**, an Italian convert from Judaism, was born at Sienna in 1520. After his conversion to Christianity he joined the Order of Franciscans, and distinguished himself by his preaching in many cities of Italy. Having been accused of heterodoxy, the Inquisition condemned him to the stake, but he was saved through the intervention of the cardinal Michael Ghislieri, afterwards pope Pius V, with whose aid he joined the Dominicans. He now betook himself to the study of Greek, Hebrew, history, and philosophy, and distinguished himself both as a writer and a preacher. He died in 1569. The work which immortalized his name is his *Bibliotheca Sancta ex Præcipuis Catholicæ Eccl. Auctoribus Collecta* (Venice, 1566, and often; lastly Naples, 1742), which he dedicated to pope Pius V, and in his dedication he states, "Me, quem tu olim, ab inferis revocatum et errorum tenebris erutum, sincero veritatis lumine illustrasti," etc. The *Bibliotheca* is divided into eight books: the first treats of the division and authority of the Scriptures; the second contains a historical and alphabetical index of the matter; the third treats of the interpretation of the Holy Writings; the fourth gives an alphabetical list of Catholic interpreters; the fifth (published also separately with the title *Ars Interpretandi S. Scripturas Absolutissima* [Cologne, 1577-88]) contains a hermeneutic of the Scriptures, the sixth and seventh contain exegetical disquisitions; and the last an apology of the Scriptures. The work was highly esteemed among both Catholics and Protestants. Besides this, he also published homilies and mathematical writings. See Kalkar, *Israel u. die Kirche*, p. 72 sq.; *Theologisches Universal-Lexikon*, s. v.; Dupin, *Bibl.* vol. xvi; Wolf, *Bibl. Hebræa*, i, 930; Simon [R.], *Histoire Critique*, p. 457 sq.; Fabricii *Delectus Argumentorum et Syllabus*, p. 516; Hoefer, *Nouv. Biog. Générale*, s. v. (B. P.)

Sixtus I (*St.*), pope, was born at Rome, of a senatorial family, near the close of the 1st century, and succeeded Alexander I in 119. We know little of his life, except that he perished in 127 during the persecution ordered by the emperor Hadrian. He was canonized, and his day was fixed as Aug. 6, although he appears in the martyrologies likewise under April 3 or 6. There have been attributed to him two decretal *Letters*, which are spurious; there is also a *Commentary* under his name in the patristic collections. He was succeeded in the episcopal office by Telesphorus.

Sixtus II (*St.*), pope, was born at Athens about the year 180, and was originally a philosopher. Being elected (Aug. 24, 247) to succeed Stephen I, he was accused, during the persecution under Valerian, of preaching Christianity, and was brought to the Temple of Mars to offer sacrifice, but, refusing, he was martyred, Aug. 6, 258. Two of the false decretals [see **DECRE-**

TALA, PSEUDO-ISIDORIAN] are attributed to him. He was succeeded by Denis.

Sixtus III (*St.*), pope, was born at Rome about the beginning of the 5th century. He became a priest under Zosimus, whose decree against the Pelagians he wrote in 418, and to him Augustine directed his celebrated letter on grace. He was elected (July 31, 432) to succeed Celestine I, and labored with more zeal than success to reconcile Cyril of Alexandria with John of Antioch. Sixtus built several churches, adorned others, and enlarged the basilica of Tiberius (now St. Mary Major), as well as of St. John Lateran. He died at Rome, Aug. 18, 440, and was succeeded by Leo the Great. There remain of this pope eight *Letters*, some poems, and a few supposititious works.

Sixtus IV, pope (originally *Francesco della Rovere*), was born July 22, 1414, it is said of the family of Rovere; but, according to the best historians, he was the son of a poor fisherman. He was brought up by cardinal Bessarion, and entered the Order of the Minorites, whose head he eventually became. Paul II made him a cardinal, and he succeeded him as pope, Aug. 9, 1471. His pontificate was occupied with schemes of reform, and with expeditions against the Turks; but he also engaged earnestly in efforts for the maintenance of the privileges of the Holy See, laying the city of Florence under an interdict, and finally Venice likewise. Being of a weak and unprincipled character, he wasted the public and papal resources in his extravagant intrigues. He died at Rome, Aug. 18, 1484, and was succeeded by Innocent VIII. It was he who built the Sistine Chapel and founded the Festival of the Conception of the Virgin. There are a few theological treatises by him, also some *Letters*, etc., for which see Hoefer, *Nouv. Biog. Générale*, s. v.

Sixtus V, one of the most celebrated of the popes of Rome, was descended from Slavonian parents, who had fled to Italy at the period of the Ottoman conquest of their country. His father, Pereto Peretti, was a vine-dresser in the humblest circumstances, but so hopeful of the fortunes of his son that he named him *Felix*, or *Felice*. This child was born in 1521, and educated by his uncle, Fra Salvatore, who had fortunately joined the Franciscan order of friars. Before passing under his care, however, the young Felix had acted as swineherd, or in any field occupation by which a scanty addition could be made to his parents' income. Felix Peretti made great progress in scholarship and dialectics, and being ordained priest acquired a valuable reputation by his oratory as Lent preacher in Rome in the year 1552. His firmness in the Catholic faith at this time, under trying circumstances, procured him also the friendship of the grand inquisitor, and the now rising churchman attached himself to the severe party of Ignatius and others, whose influence was then beginning to be felt. In quick succession he became commissary-general at Bologna, inquisitor at Venice, and procurator-general of his order; and these steps gained, by dint of a pushing and resolute ambition, he is said to have assumed the greatest humility, and affected the infirmities of old age. The truth of such statements, however, is denied by Ranke, who justly observes that the highest dignities are not to be won by such means. It is much more probable that Peretti's energy as a reformer of his order, and the discriminating friendship of the pope, Pius V, marked him out as the man for the epoch, and we know that he stood firmly by his favorite, whom he clothed with the purple in 1570. The son of the vine-dresser was now ranked with the princes of Italy by the title of cardinal Montalto, and he still varied his public labors by rural occupations. We are not informed of all the circumstances attending his election to the papacy, but he succeeded Gregory XIII in 1585, and at once commenced the administrative and social reforms in Italy that he had so long contemplated. Un-

like a recent example, he carried his measures with a high and firm hand, and so vigorously enforced justice that the instances often read more like cold-blooded cruelty. His measures had the desired effect, however, of extirpating the bandits who had so long overrun the country, and of bringing some show of order out of the general lawlessness of society. We cannot enumerate here his great enterprises in administrative reform, or the magnificence of his public works, but they all mark his passion for order and completeness. His foreign policy was of the same trenchant description; no half measures or vaporings were to be tolerated. For examples of this spirit it may be sufficient to name the great Catholic league, and the invasion of England by the Spanish Armada. Still more surprising and gigantic were his conceptions as he grew old, as his rigid financial system enabled him to amass a large public treasure in the vaults of St. Angelo. His designs now were sufficient to prove that he had perfected the government of his own states and improved the discipline of the Church as an instrument of a more universal dominion than the papacy had ever reached; even the Greek Church and the empire of Mohammed were destined to be transformed under his hand. Sixtus V breathed his last amid these visions of grandeur Aug. 27, 1590. A storm burst over the palace of the Quirinal at the moment of his death, and it became an article of the popular faith that he had achieved his enterprises by a compact with the evil one, which had then expired. See Hoefer, *Nouv. Biog. Générale*, and the literature there cited.

Sjebu-no-sit is a martial and religious festival in which the male youth of Japan engage; the Kalamus festival.

Sjugo-nitsi ADSUGI KAJU KURAH is a Japanese popular festival, observed on the fifteenth day of the first month, and in connection with which it is customary to serve a favorite dish of beans.

Sju-go-zin is a subordinate or adjunct deity of the Japanese mythology, who, in the form of a fox, accompanies the moon-god in his travels. He was highly venerated, but even more greatly feared. His form, however, was changed, and he now enjoys the high regard of the people as a protector, though he sometimes appears as the attendant spirit of Inari as well. In the latter character he is honored in the form of a fox, and his image of clay is sold at the annual fairs which fall on the days of the Inari festival, to serve as the patron of the common people. It may be found in every house and in the little temples throughout the land. The belief is still common that the foxes assemble once a year in some unknown place where a flame bursting from the earth foretells the fruitfulness of the year.

Skade, in Norse mythology, was the wife of Njord and daughter of the giant Thjasse. She lives in her father's dwelling, Thrymheim, and hunts the wild boar with bow and arrow as she rides on snow-shoes down the mountain. See NORSE MYTHOLOGY.

Skalds (or **Scalds**) were the poets, reciters, and singers, and also the historiographers, of the ancient Scandinavians. Like the Celtic bards, they went before the heroes to battle with inspiring war-cry, and observed the warriors' deeds, recounted them in song, and transmitted their fame to succeeding generations. As the insurers of posthumous fame and as divinely inspired wise-men and prophets, they were in high esteem at the courts of princes. They were known throughout Norway, Sweden, Iceland, Denmark, and the north of Germany. The legends of the Edda, preserved for us by Snorre Sturleson, were the work of these Skalds.

Skanda, in Hindû mythology, was the child of Rudra (Siva) and the sisters Ganga and Uma, the former of whom was the consort of all the gods, the latter

of Rudra alone. Skanda was taken in charge at his birth by the stars Kartigas, who were six nymphs, and thus obtained his other name, *Kartikeya*. He was washed and nourished, and became so bright that he eclipsed the brilliancy of the sun. He received six heads and twelve arms, and was appointed leader of the heavenly armies when they should march against the evil demons and spirits of the underworld. Numerous pagodas were erected to him in India, in which he was always represented as accompanied by his consorts Devanei and Velliamen. The name Skanda signifies *the rapidly conquering one*.

Skapidur was one of the celebrated skilled dwarfs, in Norse mythology, who came from Swains Haugi to Orwanga on Jorinwall.

Skatalundr, in Norse mythology, was the grove where Odin caused the beautiful Brynhildur to fall into a magic sleep and encased her with shields, leaving her in that condition until Sigurd wrought her deliverance.

Skaugul, in Norse mythology, was one of the battle-virgins, the beautiful Valkyrias.

Skeggöld, in Norse mythology, was a Valkyria. The name signifies *time of axes*.

Skeidbrimer was one of the asa-horses, in Norse mythology, on which the asas (excepting Thor, who walked) rode to the place of daily judgment.

Skelton, PHILIP, a worthy and learned clergyman of Ireland, was born in the parish of Derryagh, near Lisburn, February, 1707, and educated at Trinity College, Dublin. Soon after graduation he went to reside with his brother John at Dundalk, and was ordained deacon for the cure of Newtown-Butler, Fermanagh Co., about 1729. This, after two years, he resigned and returned to his brother's, where he remained until 1732, when he settled on the curacy of Monaghan, in the diocese of Clogher. In 1750 the living of Pettigoe, County Donegal, was given to him; and in 1759 he received the living of Devenish, Fermanagh Co., worth about three hundred pounds a year. In 1766 he removed to Fintona, in the County of Tyrone, from which, in 1780, he took his final leave and removed to Dublin to end his days. He died May 4, 1787. Mr. Skelton was somewhat eccentric, but was a very charitable, unassuming, and useful minister. He published, *A Vindication of the Bishop of Winchester (1736)*:—*Some Propositions for the Revival of Christianity (1736)*:—*Dissertation on the Constitution, etc., of a Petty Jury (1737)*:—*Necessity of Tillage and Granaries (1741)*:—*Truth in a Musk (1743)*:—*The Candid Reader (1744)*:—*The Chevalier's Hopes (1745)*:—*Deism Revealed (1749, 2 vols. 8vo; 2d ed. 1751, 2 vols. 12mo)*:—*The Consultation (1753)*:—*Discourses, Controversial and Practical (1754, 2 vols.)*. He published his works by subscription in 1770, 5 vols. 8vo; in 1784 vol. vi, and in 1786 vol. vii; also in the same year *A Catechism*. See Allibone, *Dict. of Brit. and Amer. Authors*, s.v.; Darling, *Cyclop. Bibliog.* s.v.; *London Monthly Review*, Dec. 1792; *London Gent. Mag.* lxxxi, 104; lxxxi, 349; lxxxvii, 58; Southey [R.], *Life and Correspondence*, ch. xxxii; Chalmers, *Biog. Dict.* s.v.

Skevi-Kare, a small sect in Sweden. In 1734 a little society of Pietists, driven from Denmark and other countries, seek shelter on the little isle of Wermö, near Stockholm. Their contempt for the established worship had drawn them into disagreeable circumstances, but in 1746 they were permitted to fix themselves on this island, where their descendants still remain. Having taken the domain of Skevic, they are called *Skevi-Kare*.

S'kew or ASKEWTABLE. The term skew is still used in the north of England for a stone built into the bottom of a gable or other similar situations to support the coping above it. It appears formerly

to have been applied to the stones forming the slopes of the set-offs of buttresses and other projections. *Skew-table* was probably the course of stone weathered, or sloped, on the top, placed over a continuous set-off in a wall.

Skialgr (*the bent one*) was the name of the moon in Norse mythology.

Skidbladner, in Norse mythology, was a splendid ship belonging to the god Frey. It was built by skilful dwarfs, the sons of Iwald, and was made large enough to hold all the asas with their armor, but is nevertheless capable of being reduced to so small dimensions that it may be carried away in one's pocket. It also commands favorable winds, whatever may be the destination of its voyage.

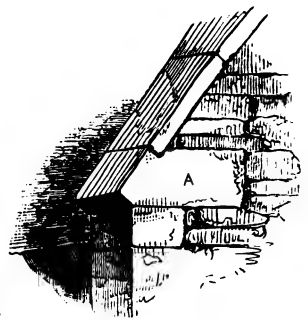

Skidmore, JEREMIAH, an eminent elder in the Presbyterian Church, was born at Rockaway, L. I., March 23, 1797. He came to New York at the age of sixteen, where for fifty-seven years he was engaged in business. He was senior member of the firm of Jeremiah Skidmore & Sons. He early became a member of the Rutgers Street Presbyterian Church, and removed with it to its present location on Madison Avenue, filling successively the office of deacon and elder. He often represented the Church in her higher judicatories, and in Church matters his judgment was highly prized. He maintained an unspotted and honorable business reputation. In social life he was regarded with the highest esteem, and in the domestic circle his Christian virtues were still more prized because better known. His example and influence were an untold blessing to society, and his death was a great loss to the Church. He died in New York, November, 1877. (W. P. S.)

Skierstuves, among the ancient Prussians, was a sausage-festival celebrated in memory of the dead.

Skilfng, in Norse mythology, was a surname of Odin.

Skin (prop. שֶׁן, *śr*, so called, perhaps, from its nudity; once גֶּלֶד, *gêled*, so called from its smoothness [Job xvi, 15]; once improperly for בָּשָׂר, *basâr* [Psa. cii, 5], *flesh*, as elsewhere rendered; δέσμα, *the cuticle of man* (Exod. xxxiv, 29; Lev. xiii, 2; Job vii, 5, etc.), or the *hide of an animal* (Job xl, 31); the latter chiefly as taken off (Gen. iii, 21; xxvii, 16; Lev. iv, 10; vii, 8), also as prepared or wrought into leather (xi, 32; xiii, 48; Numb. xxxi, 20). So in the plur. (Exod. xxvii, 14; xxxix, 34). For the *táchash*-skins (Numb. iv, 8; xi, 12), see BADGER. For the use of holding water, see SKIN-BOTTLE. The word in Heb. is poetically put for *body* (Job xviii, 13). The phrase "skin for skin" (ii, 4) means like for like, or what is intimate and dear as the skin. "Skin of the teeth" (xix, 20) is evidently a proverbial phrase for *the barest nothing*.

Skin-bottle. The people of Asia west of the Indus use the skins of animals, on a journey, for carrying water and other liquids, as well as, in general, other articles of provision which they are obliged to take with them in their journeys across the deserts or thinly inhabited plains. The preference of such vessels is well grounded. Earthen or wooden vessels would soon be broken in the rough usage which all luggage receives while conveyed on the backs of camels, horses, or mules;

Skew (A).

and if metal were used, the contents would be boiled or baked by the glowing heat of the sun. Besides, such skins exclude the encroachments of ants, which swarm in those countries, and also effectually guard against the admission of fine impalpable dust. The scarcity of streams and wells renders it indispensable for all travellers to carry water with them. When a party is large, and the prospect of a fresh supply of water distant, large skins of the camel or ox, two of which are a good load for a camel, are used. Goat-skins serve in ordinary circumstances. Individual travellers, whether in large or small parties, mounted or on foot, usually carry a kid-skin of water, or else a sort of bottle of prepared leather shaped something like a powder-flask. The greater portability of such skins is another advantage. The skins of kids and goats are those used for ordinary purposes. The head being cut off, the carcass is extracted without opening the belly, and the neck serves as the mouth of the vessel. See BOTTLE.

Skin-bottles. (From the Museo Borbonico, Naples.)

Skinfaxi (*bright mane*), in Norse mythology, was the steed of Dagur (day), with which he makes his daily progress round the earth. The glitter of its mane gives light to the world.

Skinner, Ezekiel, a Baptist preacher, was born in Glastenbury, Conn., June 27, 1777. He was apprenticed to a blacksmith, but bought the last year of his apprenticeship and studied medicine. He received his license to practice medicine in 1801, and settled at Granville, Mass. Here he professed religion and united with the Congregational Church; but afterwards adopting the views of the Baptists, he was immersed and joined the Baptist Church in Lebanon. He enlisted in the army in the war of 1812; but was discharged in a few months on account of the failure of his health, and removed to Stafford, Conn. While there he began to preach, and was licensed in 1819 by the Baptist Church in that place. In 1822 he was ordained pastor of the church in Ashford, where he officiated nine years; and also pastor at Westford, where he officiated seventeen years, including a period of four years which were spent in the service of the Colonization Society. In the summer of 1834 he went to Liberia, and rendered important services to that colony. On his final return in 1837, he resumed his pastoral relations with his former charge, which he resigned in April, 1855, and went to reside with his son (Dr. E. D. Skinner, Greenport, L. I.), where he died, Dec. 25, 1855. Mr. Skinner published a series of articles *On the Prophecies*, in the *Christian Secretary* (1842). See Sprague, *Annals of the Amer. Pulpit*, vi, 694.

Skinner, James, a missionary of the Presbyterian Church, was born in Dundee, Scotland, in 1801. His parents were members of the Secession Church of Scotland. He was educated at St. Andrew's College and at Marischal College; studied divinity under John Mitchell, D.D., and John Dick, at Glasgow; was licensed in the summer of 1832; was accepted by the Mission Committee of the United Associate Synod, and designated to go to Canada; and was ordained for that work by the Presbytery of Forfar March 31, 1834. He landed at Montreal in May, 1834, and immediately directed his steps westward to the township of Southwold, on Lake Erie, where he began a series of itinerancies and explorations, setting up regular stations and starting new congregations in every direction. He died Oct. 17, 1865. Mr. Skinner was emphatically a missionary. See Wilson, *Presb. Hist. Almanac*, 1867, p. 481. (J. L. S.)

Skinner, Thomas E., a minister of the Methodist Episcopal Church, was born on Kent Island, Queen Anne Co., Md., April 26, 1838. He was educated at Bal-

timore (where he was converted in his sixteenth year) at Dickinson College, and graduated as Doctor of Medicine at the Maryland University of Baltimore. In 1859 he abandoned the profession of medicine, and entered the Philadelphia Conference. Consumption soon began to prey upon him, and he died June 14, 1862. See *Minutes of Annual Conferences*, 1863, p. 45.

Skinner, Thomas Harvey, D.D., LL.D., a Presbyterian minister, was born at Harvey's Neck, Perquimans Co., N. C., March 7, 1791. He graduated at Princeton in 1809, and commenced the study of law in his native state. After pursuing this study for eighteen months, he experienced religion, and determined to preach. He returned to Princeton, where he remained one year. The year 1812 was mainly spent with Rev. John McDowell at Elizabeth, N. J., and he was licensed to preach in December of that year. He was ordained co-pastor with Dr. Janeway, Philadelphia, June 10, 1813, and in 1816 became pastor of the Fifth Presbyterian Church in Locust Street. He remained in Philadelphia until 1832, when he accepted the chair of Sacred Rhetoric in Andover Seminary. He occupied this for three years, and then became pastor of the Mercer Street Church, New York. After thirteen years of service he became professor of sacred theology in the Union Theological Seminary, N. Y., and continued to discharge the duties of this professorship until his death, Feb. 1, 1871. He published, *Religion of the Bible* (1839):—*Aid in Preaching and Hearing* (1839):—*Hints to Christians* (1841):—*Thoughts on Evangelizing the World*:—*Religious Life of Francis Markoe*:—*Vinlet's Pastoral Theology*, and *Vinlet's Homiletics* (1854):—*Discussions in Theology* (1868). See Plumley, *Presb. Church throughout the World*, p. 410.

Skjoldr, in Norse mythology, was a son of Odin, who obtained for his consort the beautiful Gefion after she, aided by the giants' sons in the form of oxen, had ploughed Zealand off from Sweden. Skjold was ancestor of the Danish kings, traces of whose graves and monuments yet occur near Leira. Leira was the early Hleidra, or Lethra, the principal place of sacrifice among the heathen Danes.

Skinner, in Norse mythology, was an intimate friend and companion of the god Frey.

Skirt is the rendering in the A. V. properly of שָׁרָי, *shul* (so called as being *pendulous*), the flowing *train* of a female dress ("skirts," Jer. xiii, 22, 26; Lam. i, 9; Nahum iii, 5; "train," Isa. vi, 1; elsewhere "hem"); more vaguely of כַּנְפֵּי, *kandph* (literally a *wing*), the *flap* of a robe (Deut. xxii, 30; xxvii, 20; Ruth iii, 9; 1 Sam. xv, 27; xxiv, 4, 5, 11; Ezek. v, 3; Hag. ii, 12; Zech. viii, 23); improperly of פִּי, *peh* (literally the *mouth*, as usually rendered), the upper *opening* of a garment around the neck (Psa. cxxxiii, 2; "hole," Exod. xxviii, 32; xxxix, 28; "collar," Job xxx, 18). To raise the skirts of a female's garment is put for a symbol of the greatest insult and disgrace (Jer. xiii, 22, 26; Nah. iii, 5; comp. Isa. xlvii, 2); whereas to cover her with one's skirt was a token of matrimony (Ruth iii, 9), or to remove it was preliminary to sexual intercourse (Deut. xxiii, 1); the wide Oriental outer garment serving as a coverlet by night. See DRESS.

Skjoeldr, in Norse mythology, is the name of a famous Danish king who, after many conquests and great deeds, caused himself to be placed with his treasures on board a ship and exposed to the mercy of the winds.

Skoll (or *Skoell*), in Norse mythology, was the terrible son of Fenris and Gyge, whose form was that of a monstrous giant resembling a wolf. He steadily pursues the sun in order to devour it, and in this purpose he will eventually succeed. His brother Hate will, in like manner, devour the moon in the end of the world.

Skoptzi. See RUSSIAN SECTS.

Skuld, in Norse mythology, was (1) the youngest of the three *Norns*, or Fates, who guide the life of men. The gods often seek counsel from them; and even Odin has not the power to alter their decrees. (2) A Valkyria who, accompanied by two others, rides to the battle-field to invite the heroes to Odin's banquet in Valhalla.

Skull (רִגְלֵאִם, *gulgóleth*, so called from its round form [2 Kings ix, 35; "head," 1 Chron. x, 10; elsewhere "poll;" *κράνιον*; the Lat. *cranium*, Matt. xxvii, 33; Mark xv, 22; Luke xxiii, 33; John xix, 17]). See CALVARY.

Sky stands in the A. V. as the rendering only of שָׁמַיִם, *sháchak* (Deut. xxxiii, 26; 2 Sam. xxii, 12; Psa. xviii, 11; lxxvii, 17; Isa. xlv, 8; Jer. li, 9), the thick black clouds (as elsewhere rendered) spread over the whole firmament; and thrice (Matt. xvi, 2, 3; Heb. xi, 12) of οὐρανός, the visible expanse of air (elsewhere "heaven"). In Scripture phraseology the heavens (שָׁמַיִם), as the opposite of the earth (Gen. i, 8, 10), constitute with it the world (i, 1; ii, 1; Deut. xxx, 19; Psa. l, 4), for which idea the Heb. had no other proper expression. According to the Mosaic cosmogony, the sky seems to have been regarded as physical, being a space between the upper and lower waters, or rather as a fixed expanse (רָקִיעַ, "firmament") which separates these (Gen. i, 6, 8; Psa. civ, 3; cxlviii, 4). Through this oceanic heaven were poured upon the earth rains, dews, snow, and hail (Job xxxviii, 2) by means of openings, which were under the divine control, and which are sometimes called windows (צִנּוֹת, Gen. vii, 11; viii, 2; 2 Kings vii, 2, 19) or doors (דִּלְתֵּי, Psa. lxxviii, 23). In the sky hung the sun, moon, and stars as lights for the inhabitants of the earth (Gen. i, 14 sq., and above it sat Jehovah as on a throne (Psa. ciii, 3; comp. xxix, 3; Ezek. i, 26). These, however, were rather poetical than literal representations (comp. Exod. xxiv, 10; Dan. xii, 3; Job xxxvii, 18; Ezek. i, 22; Rev. iv, 6), for there are not wanting evidences of a truer conception of the cosmical universe (Job xxvi, 7; xxxvi, 7). See EARTH.

Skyndir, in Norse mythology, is an additional name for the moon, signifying the hastening one.

Slack, Comfort I., a Presbyterian minister, was born in Mexico, N. Y., Aug. 12, 1835. He graduated at Hamilton College, Clinton, N. Y., studied theology in Auburn Seminary, was licensed to preach by the Cayuga Presbytery, and in 1863 was ordained and installed pastor of Westminster Church at Newton, Jasper Co., Ia. This was his only charge, and here he labored faithfully till his death, Feb. 24, 1865. Mr. Slack was distinguished for his fidelity as a student, his interest in the missionary cause, and his devoted piety. The Rev. George Ransom, of Muir, Mich., writes of him: "He brought into the work of the ministry an accuracy of judgment, a perspicuity of reasoning, and a safety in his conclusions which are rarely achieved save by the discipline of a long and trying experience." See Wilson, *Presb. Hist. Almanac*, 1866, p. 224. (J. L. S.)

Slack, Elijah, LL.D., a Presbyterian divine, was born in Lower Township, Bucks Co., Pa., Nov. 24, 1784. He professed religion in 1801, attended the grammar-school at Trenton, N. J., from 1803 to 1806, and graduated at the College of New Jersey, Princeton, in 1808. He was principal of the Trenton Academy three years, during which time he studied theology privately; was licensed by the New Brunswick Presbytery in 1811; was elected vice-president of the College of New Jersey and professor of natural philosophy and chemistry in 1812, and continued to discharge the appertaining duties for five years; removed to Cincinnati, O., in 1817, and was elected superintendent of the Literary and Scientific Institute in that city. In 1819, the Cincinnati College being established, he was appointed president and pro-

fessor of natural philosophy and chemistry, in which position he remained until 1828, when, from deficient endowment, the college closed. During this time he had, in connection with Dr. Daniel Drake, established the Cincinnati Medical College and Commercial Hospital. In 1837 he removed to Brownsville, Tenn., and established a high-school for young men, which was very successful; but in 1842 returned to Cincinnati, and retired from public life. He died May 29, 1866. Dr. Slack was very closely identified for several years with the early educational interests of the West. A short time before his death his alma mater conferred upon him the title of Doctor of Laws. See Wilson, *Presb. Hist. Almanac*, 1867, p. 197. (J. L. S.)

Slade, JOHN, a minister of the Methodist Episcopal Church, was born on Beech Branch, Beaufort District, S. C., April 7, 1790. He joined the Church when about thirty years of age, and was licensed to preach in 1822. In 1823 he was admitted on trial in the South Carolina Conference, and was received in full connection in 1825. In 1828 he was ordained elder; but his health having been impaired by excessive labors and exposure, he was made superannuated. In 1830 he was located, and held this relation until 1845, when upon the organization of the Florida Conference he was readmitted into the travelling connection. He continued his ministerial labors until he was stricken with paralysis, which in a few days resulted in death, June 25, 1854. Mr. Slade possessed an intellect of high order, and was endowed with great courage, both physical and moral. He was distinguished for his humility, his self-denial, his devotedness to Christ, and his fidelity to all his Christian obligations. See Sprague, *Annals of the Amer. Pulpit*, vii, 682.

Slafter, CORODEN H., a Baptist missionary, was born in Norwich, Vt., Jan. 31, 1811. He removed with his parents to the town of Lawrence, St. Lawrence Co., N. Y., and remained there until 1831. Soon after his hopeful conversion, he felt it to be his duty to preach the Gospel. Like so many other young men whom God calls to be his servants in the ministry, he was poor, and saw no way by which he could obtain the funds necessary to procure an education. Trusting, however, in him who, he believed, had chosen him to enter upon what proved to be his life-work, he went to Hamilton, and entered the Baptist institution in that place. His frank statement of his feelings and wishes won the confidence of sympathizing friends, and, along with what he was able to earn by his own efforts, he was supplied with an amount of funds sufficient to carry him through his studies. On leaving the institution, he carried with him the sincere esteem of friends who had given him their love and their aid to fit him for the service upon which he purposed to enter. The cause of Christian missions had taken strong hold upon the mind of Mr. Slafter. It is related of him that "even before his conversion what he had heard and read on the subject had made a deep impression upon his mind, and while pursuing his studies, on looking over the field, the condition of the 'poor perishing heathen' presented a claim which he could not resist." Having decided what was the path of duty, he offered himself as a missionary, and was appointed to the Siam field. He sailed from Boston in December, 1838, and arrived at Bangkok via Singapore Aug. 22, 1839. The hopes which had been raised with reference to Mr. Slafter's qualifications for his work were not disappointed. Having acquired the language, he entered upon his missionary labors with characteristic zeal and energy. Having in his mind made a survey of the great field of his missionary operations, he determined in person to see as much of it as it was possible for him to visit. In order that he might carry out his purpose, he procured and had fitted up a family boat, in which he and his companion made several excursions upon the River Meinaur, and the canals which connect this with the other principal rivers. He

penetrated farther into the interior of the country than any other Protestant missionary has ever done. It was his earnest desire to do a work which no other one had done before him, and it was his delight to distribute tracts and such portions of the Bible as had been translated into Siamese where the good news of salvation through Christ had never before been proclaimed. While thus engaged, the messenger of death came to him, and he was removed from the scene of his earthly toils April 17, 1841. It seemed a dark and mysterious Providence which thus early in his career brought to a termination so many cherished plans. But the cause was God's, not man's, and "he doeth all things well." See *The Baptist Memorial*, i, 82. (J. C. S.)

Slagfidr (or **Finnr**), in Norse mythology, was a prince of Finnish race, who was a great hero or singer, and whom the Valkyria Swanwit chose for her consort. She forsook him after eight years, and he now seeks her incessantly, but in vain.—Vollmer, *Wörterb. d. Mythol.* s. v.

Slander, according to Dr. Barrow, is uttering false speeches against our neighbor, to the prejudice of his fame, safety, welfare, and that out of malignity, vanity, rashness, ill-nature, or bad design. The principal kinds of slander are these: (1) charging others with faults they are not guilty of; (2) affixing scandalous names and odious characters which they deserve not; (3) aspersing a man's actions with foul names, importing that they proceed from evil principles, or tend to bad ends, when it does not or cannot appear; (4) perverting a man's words or acts disadvantageously by affected misconstruction; (5) partial or lame representation of men's discourse or practice, suppressing some part of the truth or concealing some circumstances which ought to be explained; (6) instilling sly suggestions which create prejudice in the hearers; (7) magnifying and aggravating the faults of others; (8) imputing to our neighbor's practice, judgment, or profession evil consequences which have no foundation in truth.

Slater (or **Slatyer**), WILLIAM, a learned English divine and poet, was born in Somersetshire in 1587, entered St. Mary's Hall, Oxford, in 1600, removed to Brasenose College in 1607, took his degree of Bachelor of Arts the following year, and was chosen to a fellowship. In 1611 he entered holy orders, and was beneficed. In 1628 he took his degrees in divinity, and had acquired considerable reputation as a poet. He died in Otterden, Kent, where he was beneficed, October (or November), 1647. His works are, *Threnodia, sive Pandionium*, being elegies and epitaphs on queen Anne of Denmark, to whom he had been chaplain:—*Palæ-Athion, or History of Great Britain* (Lond. 1621, fol.):—*Genethliacon, sive Stemma Regis Jacobi* (ibid. 1630, fol.):—*The Psalms of David, in Four Languages—Hebrew, Greek, Latin, and English* (1652, 16mo), in four parts, set to music, etc. See Burney, *Hist. of Music*; Chalmers, *Biog. Dict.* s. v.

Slaughter, DEVEREAUX J. C., a minister of the Methodist Episcopal Church, South, was born in Dinwiddie County, Va., Nov. 8, 1817. He was converted Aug. 16, 1835, joined the Church May, 1836, was licensed to preach Sept. 25, and received on trial into the Virginia Conference in November, 1842. He received deacon's orders in November, 1844, and elder's in November, 1846. He was effective and very useful until 1862, when, because of ill-health, he obtained a supernumerary relation, which he retained until his death, Nov. 6, 1870. See *Minutes of Annual Conferences of M. E. Church, South*, 1870, p. 403.

Slavery, BIBLICAL. In the discussion of this question we endeavor to bring together all the ancient information together with the best results of modern examination.

I. *Terms Employed to Designate this Condition*.—The word "slavery" does not occur in the English Bible, and the word "slave" is but rarely used, once (in italics)
